Carse, a small bay in Kirkbean parish, SE Kirkcudbrightshire, in the estuary of the Nith, 1 mile NNE of Kirkbean village. A foreshore of about 6000 acres, the Carse Sands, spreads eastward and south-eastward from it to the channel of the Nith; is all bare during a considerable time before and after low water; and renders the navigation, during the flow tide, particularly dangerous. See CARSETHORN.

Carse, a farm in Kirkcudbright parish, Kirkcudbrightshire. An ancient Caledonian fort, about 50 paces in diameter, is on it, and probably was designed to command a neighbouring fort on the river Dee at a considerable reach of the river's valley.

Carsebridge. See ALLOA.

Carseburn, a village in the parish and 1½ mile NNE of the town of Forfar, Forfarshire.

Carsecreugh, a ruined castle in Old Luce parish, Wigtonshire, 2½ miles NE of Glenluce. It stands on a desolate moor, and, says old Symson quaintly, 'might have been more pleasant, if it had been a more pleasant place.' Rebuilt by the first Viscount Stair in the latter half of the 17th century, it was the home of the 'Bride of Lammermoor' (See BALDOON), and is now represented by the square S tower and by the western side of the main edifice.

Carsegown, a hill (593 feet) in the parish and ¾ mile SW of the village of New Abbey, SE Kirkcudbrightshire. It is crowned by the Waterloo monument, a round granite tower, about 600 feet high, built in 1816.

Carsegownie, a farm in the W of Aberlemno parish, Forfarshire. An ancient baronial mansion on it has been modernised; and a Caledonian cairn here was found to contain a sarcophagus and an urn in its centre, with numerous rude sarcophagi all round its circumference.

Carse of Clackmannan, the part of the Carse of Forth lying on the left bank of the river Forth within Clackmannanshire. It has the same character as the part

lying opposite to it within Stirlingshire, but is very much smaller.

Carse of Falkirk, the part of the Carse of Forth, lying along the right bank of the river Forth, from Airth in Stirlingshire to Borrowstounness in Linlithgowshire. It is all very nearly a dead level, and is the richest portion of the entire Carse, particularly within Bothkennar and Falkirk parishes.

Carse of Forth, a great tract of low, flat, alluvial land, along both banks of the river Forth, in the counties of Perth, Stirling, Clackmannan, and Linlithgow. It extends from the foot of the Grampians, in the neighbourhood of Gartmore, away through the opening between the Lennox and the Ochil Hills, on to the low country in the vicinity of Borrowstounness; measures about 34 miles in length, and 6 in breadth; is nearly all a perfect level, with very slight declination to the Forth, having an elevation of from 12 to 20 or 25 feet above high-water level; contains, at various depths, beds of marine shells, from a few inches to a foot thick, of the same species as those still existing in the Forth; has an alluvial soil of finely comminuted earth, without the smallest trace of pebble, except what may have been artificially imported; and, in an agricultural point of view, is the richest and most important district of Scotland.

Carse of Gowrie, a low, flat, alluvial district, along the northern bank of the Tay, from Kinnoul Hill, in Perthshire, to Dundee Law in Forfarshire. It measures about 15 miles in length, and from 2 to 4 miles in breadth; lies at an elevation of from 24 to 40 feet above sea-level; and is flanked, along the N, by the Sidlaw Hills. A tract of it, 8 square miles in area, extending eastward from Kinnoul Hill, is moorish; but all the rest of the Carse is rich arable land, cultivated like a garden, parted into fields only by ditches or low hedges, and looking in summer like a sea of corn, sparsely yet beautifully isletted with trees and houses. It contains a few villages, and about twenty proprietorial mansions; and it has, on the shore, a few tolerable harbours; but, in its main extent, is farmed with the utmost parsimony of space. Most of it was evidently under water at a recent geological period; much of it appears to have been under water at times subsequent to the surrounding country becoming inhabited; several slightly elevated mounds or ridges within it seem to have been islets when all the rest was under water, and bear now the name of *inches* or islands; and numerous parts which now are very fine arable land were, down to 1760 or even later, either morasses or large stagnant pools. The soil on the perfectly flat portions is a blue clay of very rich quality; while that on the inches is dark brown clay-loam, locally called 'black land,' of an older formation and of greater fertility. The Tay is supposed to have anciently taken a circuit round the Carse, washing the foot of the Sidlaw Hills, and entering its present channel at INVERGOWRIE. Staples for holding cables have been found at the foot of the Sidlaws to the N of the flat land; and the parish of St Madoes, now in the Carse, is said to have lain once on the southern side of the river. 'William Lithgow, the traveller,' says Mr Robert Chambers, 'in his singular book referring to a journey through Scotland in 1628, calls the Carse of Gowrie an earthly paradise, but adds the following ungracious information: "The inhabitants being only defective in affableness and communicating courtesies of natural things, whence sprung this proverb—the *Carles* (that is, *Churls*) of the *Carse*." And Pennant records another ill-natured proverb, applicable to the people of the Carse of Gowrie—that "they want water in the summer, fire in the winter, and the grace of God all the year round."'

Carse of Henryie, a small tract in Lady parish, E side of Sanday island, Orkney.

Carse of Kinnell, the part of the Carse of Falkirk within BORROWSTOUNNESS, Linlithgowshire.

Carse of Stirling, the part of the Carse of Forth which extends along the right bank of the river Forth, from Craigforth to Airth, in Stirlingshire; and also, according to some authorities, the parts along the left

bank of the river, from the Moss of Kincardine to the mouth of the Devon, within the counties of Perth, Stirling, and Clackmannan.

Carsethorn, a coast village of Kirkbean parish, SE Kirkcudbrightshire, to the S of the entrance of Carse Bay, and 1 mile NE of Kirkbean village. A sea-wall $1\frac{1}{2}$ mile long, and in places 12 feet high, was built (1866-67) for protection of the farm of South Carse from the tide.

Carsie, a village in the parish and 3 miles S of the town of Blairgowrie, NE Perthshire.

Carskey, an estate, with a modern mansion, in the parish and 4 miles WSW of the hamlet of Southend, Kintyre, Argyllshire. Carskey Bay here, 4 miles ENE of the Mull of Kintyre, affords occasional anchorage to vessels.

Carslogie, an estate, with an ancient mansion, in Cupar parish, Fife. The mansion, $1\frac{1}{2}$ mile WSW of Cupar town, was built in the early part of the 14th century; and for nearly 500 years was the seat of the Clephanes. An iron joug, for punishment of offenders on the estate, hung till 1793 on an aged ash-tree in a field hard by; the fate is not known of the Clephane horn and steel hand, both rendered famous by Sir Walter Scott.

Carsluith, an old tower on the coast of Kirkmabreck parish, SW Kirkcudbrightshire, $3\frac{1}{2}$ miles SSE of Creetown. At it was born Gilbert Brown, the last abbot of NEWABBEY.

Carsphairn, a village and a parish in the extreme N of Kirkcudbrightshire. The village lies, 600 feet above sea-level, on the left bank of the Water of Deugh, 10 miles SE of Dalmellington station, and $9\frac{3}{4}$ NNW of Dalry, under which it has a post office; it consists of a few scattered houses, with the parish church, manse, a school, an inn, and a hotel.

The parish, formed in 1640 out of Kells and Dalry, is bounded N and NE by New Cumnock in Ayrshire, E by Dalry, S by Kells, and W and NW by Straiton and Dalmellington in Ayrshire. Its greatest length from N to S is $10\frac{1}{4}$ miles; its greatest breadth from E to W is $9\frac{3}{4}$ miles; and its area is 54,876 $\frac{1}{2}$ acres, of which 71 $\frac{1}{2}$ are foreshore, and 181 $\frac{1}{2}$ are water. Gala Lane runs $6\frac{1}{2}$ miles northward along the western border to Loch Doon, which itself for $3\frac{3}{4}$ miles separates Carsphairn from Straiton. Rising in the NE, the Water of Deugh curves 5 miles westward along the New Cumnock boundary, and next winds 15 miles southward, east-south-eastward, and southward again, till, at the SE corner of the parish, it falls into the Water of KEN, which traces most of the eastern boundary. Besides several lesser tributaries, the Deugh receives, near the village, Carsphairn Burn, flowing 5 miles south-eastward from its source near Loch Doon, just above its own confluence with the Ken; and Pulmaddy Burn, flowing 7 miles eastward along the southern border. The drainage belongs, thus, partly to the system of the Doon, but mainly to that of the Dee, the 'divide' being marked by the summits of Meikle Craigrarson (2000 feet), CARLINS CAIRN (2650), Meaul (2250), Coran of Portmark (2042), Black Craig (1730), Cullendoch Hill (1120), Ben Brack (1475), Todden Hill (1565), and White Hill (1439), extending north-north-eastward along the western and north-western confines of the parish. To the left of the Deugh, the surface, sinking to 380 feet above sea-level in the extreme SE, rises to 1249 in Marscalloch Hill, 1256 in Craig of Knockgray, 1634 in Knockwhirn, 1753 in Dunoul, 2612 in CAIRNSMORE, 1632 in Dodd Hill, and 2287 in Windy Standard. The rocks are chiefly granitic and Silurian; at Woodhead, 3 miles NW of the village, a lead-mine has been worked since 1838, zinc, copper, and a little silver also being found. The greater part of the parish is suitable enough for sheep and cattle grazing, the hills being green to the top. Antiquities are some very large cairns, vestiges of an ancient Caledonian stone circle, and, near the confluence of the Deugh and the Ken, the ruins of Dundeuigh Castle, at one time seat of a Gordon of the Kenmure family. Garryhorn, 1 mile W by N of the village, was the headquarters of Sir Robert Grierson

CARSTAIRS

of Lag (1650-1736), the Covenanters' bitter persecutor; Prof. Thos. Jackson, D.D., of St Andrews (1797-1878) was a native, as also, according to some authorities, was Sir Jn. Loudon Macadam (1756-1836), of road-making celebrity, who commonly is claimed for Ayr. Three proprietors hold each an annual value of £500 and upwards, 9 of between £100 and £500, and 2 of less than £100. Carsphairn is in the presbytery of Kirkcudbright and synod of Galloway; the living is worth £273. The church, erected about 1815, contains 400 sittings. A public school, with accommodation for 75 children, had (1891) an average attendance of 33, and a grant of £46, 18s. 6d. Valuation (1888) £10,865, 17s. Pop. (1861) 553, (1871) 545, (1881) 484, (1891) 394.—*Ord. Sur.*, shs. 8, 9, 14, 15, 1863-64.

Carstairs, a village, a junction, and a parish of E Lanarkshire. The village stands, at 700 feet above sea-level, near the Caledonian railway, $\frac{1}{2}$ mile SE of Mouse Water, 1 mile WNW of Carstairs Junction, and 4 miles ENE of Lanark, under which it has a post office. Anciently called Castleterres or Carstaires, signifying the castle or fort of the estate, it underwent great improvement prior to 1835, and presents a pleasant appearance, with the parish church on a rising ground in its centre. Pop. (1861) 450, (1871) 484, (1891) 477. The railway junction, at the divergence of the main trunk into the Edinburgh and Glasgow forks of the Caledonian, stands on low flat ground, 7 furlongs NW of the main trunk's viaduct over the Clyde, 23 $\frac{1}{2}$ miles SW of Edinburgh, 31 $\frac{1}{2}$ ESE of Glasgow, and 73 $\frac{1}{2}$ NNW of Carlisle. It includes a long glazed arcade, divided lengthwise into two sections, with offices and refreshment rooms along the middle, as also ranges of engine-houses. A village of the name of Carstairs Junction adjoins the station, and has a post office, with money order, savings bank, and telegraph departments. Pop. (1881) 888, (1891) 943.

The parish, containing also the village of Ravenstruther, is bounded N by West Calder in Edinburghshire, NE and E by Carnwath, S by Pettinain, SW by Lanark, W by Lanark and Carluke, and NW by Cambusnethan. Its greatest length, from N by W to S by E, is 7 $\frac{3}{4}$ miles; its breadth from E to W varies between 1 $\frac{1}{4}$ and 3 $\frac{1}{2}$ miles; and its area is 9899 $\frac{1}{2}$ acres, of which 78 $\frac{3}{4}$ are water. The CLYDE for 3 miles roughly traces all the southern boundary, and its affluent, MOUSE WATER, after following the Carnwath border for 2 $\frac{3}{4}$ miles, winds about 4 miles south-westward through the interior, and passes into Lanark. The surface is low and flat along the Clyde, sinking to 600 feet above sea-level; thence it rises northward to 773 feet at Lang Hill, 884 at Harelaw, 985 at Haminghead, 1029 beyond Birnieball, and 950 at Black Hill on the West Calder boundary, the centre being considerably diversified by a multitude of low roundish sand knolls, and the N being occupied by bleak, tame, moorish uplands. A tract in the S, including the fine demesne of Carstairs House, is highly ornate; and some other spots, particularly along the Mouse Water, have features of considerable beauty. The rocks, in some parts, belong to the Carboniferous formation; in others, arc eruptive. Sandstone and limestone occur, but are not quarried; and very fine clay lies NW of Mouse Water, and is used for the manufacture of tiles. The soil of the low grounds in the S is richly alluvial; of the centre is sandy; and of the grounds in some hollows and in the N, is mossy or moorish. About 8250 acres are either regularly or occasionally in tillage, and some 400 are under wood. A Roman road traversed the S of the parish; a Roman camp has left vestiges on Corbiehall farm; and 'Coria,' here placed by Skene, seems to have been the chief seat of the Damnonii in the 2d century A.D., to judge from remains both native and Roman—urns, weapons, culinary utensils, and vestiges of a bath. Sir John Lockbart-Ross (1721-90), the distinguished admiral, was a native. Carstairs House, near the Clyde, 1 $\frac{1}{2}$ mile south-west of the Junction, is a fine modern Gothic mansion; its owner, Joseph Monteith, Esq., holds 5581 acres in the shire, valued at £8963 per annum. Carstairs is in the presbytery of Lanark and synod of Glasgow and Ayr; the

CARTLAND

living is worth £310. The church, erected in 1794, has a spire and clock, and contains 430 sittings. Carstairs public, Caledonian Railway Company's, and St Joseph's R.C. schools, with respective accommodation for 191, 246, and 104 children, had (1891) an average attendance of 144, 147, and 55, and grants of £158, 8s., £158, 15s. 6d., and £54, 13s. 6d. Valuation £15,737, 6s. Pop. (1801) 899, (1831) 981, (1861) 1345, (1871) 1718, (1881) 1955, (1891) 1977.—*Ord. Sur.*, sh. 23, 1865.

Carstairs and Dolphinton Railway, a railway of E Lanarkshire, from the Edinburgh fork of the Caledonian railway in the vicinity of Carstairs Junction, 11 miles eastward to a junction with the Leadburn, Linton, and Dolphinton railway at Dolphinton. Formed by the Caledonian company, on a capital of £105,000 in shares and £35,000 in loans, it was opened in 1867.

Carstairs Junction. See CARSTAIRS.

Cart, a river of Renfrewshire, formed by the union of the Black Cart and the White Cart at Inchinnan Bridge, and running 7 furlongs northward, along the boundary between Renfrew and Inchinnan parishes, to the Clyde, 1 $\frac{1}{2}$ mile NW of Renfrew town. Its banks are low and wooded; and its mouth contains a wooded islet, said to have been formed by a sunken raft of timber. The Black Cart issues from Castle Semple Loch in Lochwinnoch parish; runs about 9 miles north-eastward past Johnstone and Linwood; and receives the Gryfe from the W at Walkinshaw. Its valley, from head to foot, has nowhere an elevation of 100 feet above sea-level; and its current is dark and sluggish.—The White Cart, rising in the moors of Eaglesham, near the meeting-point of Renfrew, Lanark, and Ayr shires, runs 9 miles northward, partly in Eaglesham, partly on the boundary between Renfrew and Lanark shires, partly in Cathcart; then turns 7 miles westward, past Pollokshaws and Crookston Castle, to Paisley, receiving the Levern from the S near Crookston Castle; and again runs 2 $\frac{1}{2}$ miles northward, through Abbey and Renfrew parishes, to its confluence with the Black Cart. Its upper and middle reaches, particularly in Catcart parish, and thence to the neighbourhood of Paisley, exhibit beautiful scenery, sung by Burns, Campbell, Tannahill, and Grabam; and its waters drive a vast amount of machinery, particularly at Pollokshaws and Paisley. Once everywhere a noble angling water for trout, perch, and braise, the Cart, both in its main body and in much of its upper streams, has been foully polluted by the discharges of public works. Its navigable communication from the Clyde to Paisley was naturally obstructed by shallows at Inchinnan Bridge; but the Paisley authorities are deepening the channel here, in order to increase the trade of their port. A navigation, continuous with it, from the Clyde opposite its mouth to the Forth and Clyde Canal, was artificially formed in 1840; bears the name of the Cart and Forth Junction Canal; and is about $\frac{3}{4}$ mile long.—*Ord. Sur.*, shs. 22, 30, 1865-66.

Carter Fell, a summit of the Cheviots, on the English Border, in Southdean parish, Roxburghshire, 11 miles S by E of Jedburgh town. Rising to an altitude of 1899 feet above sea-level, it divides the head-streams of the river Jed from those of the English Tyne. On its eastern shoulder is a depression called Carter Bar; and here it is traversed by the road from Jedburgh to Newcastle.

Carterhaugh, a wooded peninsula in Selkirk parish, Selkirkshire, at the confluence of Ettrick and Yarrow Waters, 2 $\frac{1}{4}$ miles SW by W of Selkirk town. Here is laid the scene of the fairy ballad of *Tamlane*.

Cartland, a village and a stupendous chasm in Lanark parish, Lanarkshire. The village stands near the chasm, 2 miles NW of Lanark town, and has a public school. The chasm, Cartland Crags, curving fully $\frac{3}{4}$ mile from ENE to WSW, is traversed along the bottom by Mouse Water, under deep gloom, among fallen blocks; and would seem to be a rent, caused by a vertical earthquake, through a tabular hill. It is flanked by lofty cliffs of greywacke and Old Red sandstone, intersected by a vein of trap, which, with trees starting out of

them, high and low, overhanging the muddy stream, or shooting up towards the sky, rise on one side to a height of more than 200 feet, on the other side of about 400, and exhibit an exact correspondence of their confronting crags, face to face, and part to part. A meeting-place of the persecuted Covenanters for public worship, it is graphically described, in connection therewith, by Professor Wilson. A curious ancient bridge, supposed to be Roman, with one semicircular arch and a narrow roadway, bestrides Mouse Water at the lower end of the crags; and a handsome bridge, with three semicircular arches, 129 feet high, was built in 1823 after designs by Telford, a short way higher up. In the N cliff, a few yards above this bridge, is 'Wallace's Cave,' said to have hidden the hero just after his vengeance on Hazelrig, the English sheriff; whilst a spot further up, on the brink of the precipice, called Castle Qua, shows traces of ancient fortification, had subterranean chambers formed in the Caledonian times, and possibly was held by Wallace at the time of his attack on Lanark. A depression on the S flank, at the upper end of the chasm, is believed to have been part of the Mouse's channel, conveying the stream by way of the site of Baronald House, before the occurrence of the earthquake shock. See pp. 41, 42, of Dorothy Wordsworth's *Tour in Scotland* (ed. by Princ. Shairp, 1874).

Cartley Hole. See ABBOTSFORD.

Cartnaval. See GARTNAVAL.

Cartsburn. See GREENOCK.

Cartsdyke. See GREENOCK.

Carty, a harbour in Penninghame parish, Wigtownshire, on the river Cree, at the boundary with Kirkcudbrightshire, 2½ miles SSE of Newton-Stewart. It has commonly about 12 feet of water at spring tides, and is regularly frequented by vessels of from 35 to 40 tons burden.

Carvie Water, a burn in the lower part of Strathdon parish, Aberdeenshire, running 3½ miles northward to the Don.

Carwinning, a hill (652 feet) in the parish and 2¼ miles N by W of the town of Dalry, N Ayrshire. Vestiges of an ancient fort are on it, formed of three concentric circular walls, and covering 2 acres.

Carwood House. See BIGGAR.

Cash-Feus, a southern suburb of Strathmiglo town, in Strathmiglo parish, Fife.

Caskieben, an estate, with a small old mansion, in Dyce parish, SE Aberdeenshire, ¼ mile NE of Blackburn. In August 1880 it was purchased for £37,000 by Mr Louis Miller, of Balloch, Crieff.

Cassencarrie, a mansion in Kirkmabreck parish, SW Kirkcudbrightshire, ½ mile S of Creetown. An old building with a tower, it stands finely in a level holm—the Cree in front, and Larg Hill (969 feet) to the rear. Its late owner, Sir Jas. Caird, K.C.B., F.R.S. (d. 1892), the agricultural reformer, held 2036 acres in the shire, valued at £1297 per annum.

Cassillis House, a noble mansion, romantically situated on the left bank of the winding Doon, and on the NW verge of Kirkmichael parish, Ayrshire, 4 miles NE of Maybole, and 1 mile E by S of Cassillis station, this being 6½ miles S of Ayr. The body of it seems to belong to the middle of the 15th century, and a fine addition was made in 1830; around it are many magnificent trees—an ash, 95 feet high and 24¾ in circumference, with the 'dool' and two other sycamores, which, 67, 77, and 85 feet high, girth 18¾, 13¾, and 17 feet at 1 foot from the ground. In the reign of David II. (1329-71) the lands of 'Castlys' came to Sir John Kennedy by his wife, Marjory de Montgomery; and Cassillis now is one of the seats of Archibald Kennedy, Marquis of AILSA, who also is fourteenth Earl of Cassillis, the earldom having been granted to David, third Lord Kennedy, in 1509. In 1537, Buchanan, tutor to the third Earl, Gilbert, here wrote his *Somnium*, a bitter satire against the Franciscan friars. Gilbert, fourth Earl, the so-called 'King of Carrick,' is infamous for his cruelty to the commendator of Crossraguel; as is John, his successor, for the part that he played in the Auchendrane

Tragedy. But of Cassillis' memories none is so celebrated as that enshrined in the ballad of *Johnie Faa*. It tells how the Gipsies came to Lord Cassillis' gate, and oh! but they sang bonnie; how the lady, with all her maids, tripped down the stair, and, yielding to glamour, followed the Gipsy laddie; how her lord, coming home at even, pursued the fugitives; and how—

'They were fifteen well-made men,
Black but very bonnie;
And they all lost their lives for aye,
The Earl of Cassillis' Ladye.'

In his *History of the Gipsies* (2d ed., New York, 1878), Mr Simson accepts the theory which makes this countess the lady of the 'grave and solemn' sixth earl, Lady Jean Hamilton, daughter of Thomas, first Earl of Haddington; her lover, one Sir John Faa or Fall of Dunbar; and the date of the episode, 1643. But Mr Jas. Paterson overthrows that theory in his *History of Ayrshire* (1858), showing that Lady Jean died in 1642, and was tenderly mourned by the widowed earl. If the story have any historic groundwork, it should rather be referred to the former half of the sixteenth century—to the days when James V. granted letters under the Great Seal to 'oure louit Johnne Faw, Lord and Erle of Littill Egypt.' At least, the Dool Tree remains, on which the Gipsies were hanged; not a half mile off are the 'Gipsies' Steps,' where the Earl came up with his betrayer. See, also CULZEAN, *Scots Mag.* for 1817, *Historie of the Kennedys*, edited by R. Pitcairn (1830), and works cited in *Dict. of Nat. Biog.* (vol. xxx., p. 426, 1892).

Cassley, a small river of Creich parish, S Sutherland. It issues from Gorm Loch Mor, 846 feet above sea-level, and 2½ miles N of Ben More Assynt, and thence runs 20½ miles south-eastward, falling into the Oikell in the vicinity of Rosehall, 8 miles WSW of Lairg, at less than 50 feet above the level of the sea. Its trout fishing is not very good, and salmon cannot ascend beyond the Glenmuick Falls.—*Ord. Surv.*, shs. 108, 102, 1880-81.

Castle, a hamlet in the parish and ¼ mile SE of the village of New Cumnock, E Ayrshire.

Castle, a hamlet in the E of Campsie parish, Stirlingshire, near Milton.

Castle, a small bay in Portpatrick parish, Wigtownshire, at the mouth of Craigoch burn, adjacent to Dunskey Castle, 5 furlongs SSE of Portpatrick town.

Castle or Kismull, a hamlet and a little bay at the S end of Barra island, adjacent to the small old baronial residence of the lairds of Barra, Outer Hebrides, Invernesshire.

Castlebank, an estate, with a mansion, on the right bank of the Clyde, in the parish and ¼ mile SW of the town of Lanark.

Castle-Campbell, a ruined feudal fortalice in Dollar parish Clackmannanshire, 1 mile N of Dollar town, by a pleasant pathway, formed in 1865. It crowns a round insulated mound, which seems to have been partly formed by the hand of Nature, and partly finished by art. W and E are deep wooded ravines, down which run streams, the Burns of Sorrow and Care, that unite just below and form a considerable brook. The mound on the Dollar side is nearly perpendicular, and from the loftier wooded hills behind was formerly disjoined by a ditch, passing down to the bottom of the glen on either side, which rendered the castle inaccessible except by means of a drawbridge, so that it was a place of very great strength. Of unknown antiquity, it formerly was called the Gloume or Castle-Gloom; but passing in 1493 to the Earls of Argyll, it changed its name to Castle-Campbell. In 1645 it was taken and buried by the Marquis of Montrose; and the chief part standing now is the keep, which contains a barrel-vaulted hall, and whose top is gained by a spiral staircase and commands a wide and very noble view. John Knox, in 1556, residing in the castle with the fourth Earl of Argyll, preached and dispensed the Lord's Supper on a greenward sloping from the castle's base to the brink of the neighbouring precipice; and in the hill side is a curious narrow chasm, called Kemp's Score, after a noted free-

booter. The estate of HARRYESTOWN, on which Castle-Campbell stands, was purchased from the Taits in 1859 by the late Sir Andrew Orr. See Billings' *Baronial Antiquities*.

Castlecrary, a hamlet near the W border of Falkirk parish, SE Stirlingshire, on the left bank of the Red Burn, and on the Forth and Clyde Canal, the Edinburgh and Glasgow section of the North British railway, and the Gartsherrie and Greenhead section of the Caledonian, $2\frac{1}{2}$ miles NE of Cumbernauld, and $6\frac{1}{2}$ W by S of Falkirk. One of the principal stations on Antoninus' Wall was here, and was connected by an *iter* with the S. What with the ploughshare, and what with builders in quest of stones for their dykes, it now is wholly effaced; but many Roman antiquities have been found on and near its site—urns, coins, weapons, altars, etc. Castlecrary Castle is an old square tower, 40 feet high, with walls of 5 feet thickness, a spiral staircase, secret passages, and an eastern addition bearing date 1679. Burned by a party of Highlanders in the '15, it is now the property of the Earl of Zetland, and is kept in tolerable repair. At the top of its garden is a noble yew, girthing $8\frac{1}{2}$ feet at 1 yard from the ground. The Red Burn's glen to the W, a rich field for the botanist, here forms the boundary between Dumbarton and Stirling shires, and is crossed by a splendid eight-arched viaduct of the Edinburgh and Glasgow railway. Castlecrary station on that railway is just beyond; in the winter of 1872-73 it was very severely damaged by a singular subsidence, due to great mining excavations for limestone. See pp. 72-76 of *Proceedings of the Alloa Society* (1875).

Castle Clanyard, a ruined tower in Kirkmaiden parish, SW Wigtownshire, $\frac{1}{2}$ mile ESE of Clanyard Bay and $1\frac{1}{2}$ WNW of Kirkmaiden church. It belonged to a branch of the Gordons of Kenmure, and must once have been a splendid residence.

Castlecluggy, a ruined fortalice in Monzievairst and Strowan parish, Perthshire, on a peninsula at the N end of Monzievairst Loch. Long defended by a fosse with a drawbridge, it seems to have been very strong and of considerable extent, but is now represented by only a low square tower, with walls 5 or 6 feet thick and as hard as iron. According to Rymer's *Federa*, Malise, Earl of Strathearn, was here besieged about 1306 by Robert Bruce.

Castle-Coeffin, an ancient fortalice in Appin, Argyllshire, on a small peninsula of Loch Linnhe, opposite Castle-Mearnaig. Said to have been built, for purposes of defence, by a Danish prince of the name of Coeffin, it seems from its architecture coeval with Castle-Shima, but now consists of nothing more than broken ivy-clad walls.

Castle-Cole, an ancient fortalice in Clyne parish, SE Sutherland, on the E side of the Black Water, $1\frac{1}{2}$ mile above that river's junction with the Brora. One of the structures once so common in the N of Scotland, and known as Pictish towers, it has an oblong form, with uncemented walls 11 feet thick, and with a doorway 5 feet high and 3 wide; within the walls it measured 22 feet in length; but it now is reduced to merely the lower part of the S and E walls, about 12 feet high. It was formerly surrounded with a defensive work, 6 feet from its exterior, and with a line of watch-towers onward to the coast; and it must, in the times before the invention of gunpowder, have been impregnable.

Castlecrraig, a ruined ancient residence in the W end of Kirkmichael parish, Ross-shire, on the brow of a precipice, overhanging Cromarty Firth. It is said to have been erected by the Urquharts, Barons of Cromarty; and it was long the principal residence of the Bishops of Ross. It originally consisted of only a tower, but from time to time received extensive additions; and it was once surrounded by a defensive wall, 12 or 13 feet high. Now it is reduced to merely one tower or single wing, probably the original keep, 50 feet high from the ground to the top of the chimney.

Castlecrraig, a fortalice in Nigg parish, Ross-shire, on the top of a rock fronting Cromarty. Said to have been built by William the Lyon for the suppression of robbers,

it is now so nearly obliterated that only the foundations are traceable; but it still gives name to the farm surrounding it.

Castle Craig, an estate, with a modern mansion, in the N of Kirkcudbright parish, W Peebleshire, near the right bank of Tarth Water, 6 miles SE of Dolphinton station. Its owner, Sir Thomas David Gibson-Carmichael of Skirling, fourteenth Bart. since 1628 (b. 1859; snc. 1891), holds 8756 acres in Peebleshire and 732 in Edinburghshire, valued respectively at £5796 and £4624 per annum.

Castlecrraig or Castlegregg. See CALDER, MID.

Castle-Craignish. See CRAIGNISH.

Castle-Dangerous (of Sir Walter Scott). See DOUGLAS CASTLE.

Castle-Donnan, a fine old ruined castle in Kintail parish, SW Ross-shire, in the immediate vicinity of Dornie village. Given by Alexander III., after the battle of Largs, to Colin Fitzgerald, it has long been in a state of ruin.

Castle-Douglas, a town in the N of Kelton parish, Kirkcudbrightshire. Prettily situated at the N end of CARLINWARK Loch, with a background of low rounded hills, it is the junction of three lines of railway—to Dumfries (opened 1860), Portpatrick (1861), and Kirkcudbright (1864)—being $19\frac{1}{2}$ miles SW of Dumfries, 61 E by N of Portpatrick, $10\frac{1}{2}$ NNE of Kirkcudbright, $113\frac{1}{2}$ SW by S of Edinburgh, and $111\frac{1}{2}$ S by E of Glasgow. Till 1765 it was but the tiny hamlet of Causewayend, and its growth to the thriving village of Carlinwark was due to the famous marl-pits of the loch; in 1792, becoming the property of Sir William Douglas of Gelston, it was re-named by him Castle-Douglas, and was erected into a burgh of barony. Under an extended charter (1829), it elects triennially a provost, two bailies, and 7 councillors, the magistrates and councillors acting also as police commissioners; sheriff small debt courts sit in January, April, June, and September, and justice of peace courts on the first Monday of every month. An important market is held on Monday, and the following are the fairs throughout the year:—horses and hiring, 11 Feb. if Monday, otherwise on Monday after; hiring, 23 March, if Monday, etc.; hoggets, Monday before 24 April; hiring, 26 May and 30 June, if Monday, if not, Monday after; lambs, Monday of August before Lock-erbie; hiring, 23 Sept., if Monday, etc.; horses, Monday of November before Dumfries; and hiring, Monday after it. The town is laid out in regular squares, and it has a post office, with money order, savings bank, insurance and telegraph departments, branches of the Bank of Scotland, the British Linen Co., the National, the Union, and the Clydesdale banks, a savings bank, insurance agencies, hotels, a bowling green, a tannery, an iron-foundry, a farming implement works, a mineral water factory, a new cemetery of three acres, three auction marts, and a Friday paper, the *Kirkcudbrightshire Advertiser* (1858). A new town-hall was built of red freestone in 1862 at a cost of £1300, and besides a large hall, capable of containing from 500 to 600 persons, it has a reading-room and library of the Mechanics' Institute; the old town-hall, with a clock-tower, is occupied now as a billiard-room. Since 1873 a *quoad sacra* parish in the presbytery of Kirkcudbright and synod of Galloway, Castle-Douglas possesses six places of worship—the Established church (1868), a good Gothic edifice; King Street and Macmillan Free churches; a U.P. church (1870); St Ninian's Episcopal church; and St John's Roman Catholic (1867). Of the two Free churches, that in King Street is a recent erection, with a spire and a handsome stained E window; whilst Macmillan church is the former Reformed Presbyterian chapel, with the addition of a memorial spire. St Ninian's is a beautiful Early English structure, with tower and spire, completed and consecrated in 1874, but begun many years before; and St John's, too, has a spire 80 feet high. School-B, at the head of Colton Street, was opened in 1877, shortly before which date School A, in Academy Street, was greatly enlarged. With respective accommodation for 300 and 185 children, these had (1891) an

CASTLE-DOUGLAS

average attendance of 237 and 183, and grants of £248, 13s. and £200, 3s. 6d. There is also a Roman Catholic school, with accommodation for 120. Pop. (1841) 1847, (1861) 2261, (1871) 2274, (1881) 2565, (1891) 2851; of *g. s.* parish, 2832.—*Ord. Sur.*, sh. 5, 1857. See chap. i. of Harper's *Rambles in Galloway*, and pp. 34-39 of *Maxwell's Stewartry of Kirkcudbright*.

Castle-Douglas and Dumfries Railway, a railway partly in Dumfriesshire but chiefly in Kirkcudbrightshire, from a junction with the Glasgow and South-Western in the vicinity of Dumfries station, 19½ miles south-westward to Castle-Douglas. It was authorised in 1856, on a capital of £120,000 in shares and £40,000 in loans; was opened 7 Nov. 1860; and was amalgamated with the Glasgow and South-Western 5 July 1865.

Castle-Drumlin, a ruined baronial fortalice in Inverven parish, Banffshire, on the peninsula at the confluence of the rivers Aven and Livet. Nearly half of it has fallen, but the rest is tolerably entire, rises to a considerable height, and has great thickness of wall.

Castle-Duart. See DUART.

Castledykes, a picturesque spot in Dumfries parish, Dumfriesshire, overlooking a beautiful bend of the river Nith, ¾ mile SSE of Dumfries town. A castle of the Comyns stood on it, and figures in the history of the days of Bruce, but has completely disappeared.

Castle-Feather, an ancient fortification on the S coast of Whithorn parish, Wigtonshire, crowning an almost sheer precipice of over 100 feet, and enclosing nearly an acre of ground, 5 furlongs W by N of Borough Head.

Castlefern, a rivulet of Glencairn parish, W Dumfriesshire, rising on Troston Hill (1271 feet), close to the Kirkcudbrightshire border. Along that border and through the interior of Glencairn it flows 7 miles south-eastward and north-eastward, till, ½ mile S of Moniaive village, it unites with Craigdarroch and Dalwhat Waters to form the river CAIRN.

Castle-Forbes, a mansion in Keig parish, central Aberdeenshire, 3 miles N of Whitehouse station, this being 26½ WNW of Aberdeen. Standing on the left bank of the Don, on the finely-wooded slope of the SW base of BENNOCHIE, it is a good modern granite edifice, designed in the Scottish Baronial style by the late Archibald Simpson, Esq. Its owner, Horace-Courtenay Forbes, nineteenth Baron Forbes since 1442 (b. 1829; suc. 1868), is premier baron of Scotland, and twenty-third in direct descent from John de Forbes (fl. 1200); he holds in the shire 13,621 acres, valued at £5676 per annum.

Castle Fraser, a grand old mansion in Cluny parish, central Aberdeenshire, 3 miles ESE of Monymusk station. A six-storied quadrangular building, erected at different periods between 1454 and 1618, it has a square tower to the W, and a round one, 100 feet high, to the SE; and it is one of the finest specimens of Flemish architecture in Scotland. Its original name was Muchells, Muchal, or Muchil-in-Mar; and from 1633 to 1720 four Frasers of Muchells bore the title of Baron Fraser, the second being a zealous Covenanter, and the fourth as zealous a Jacobite. The latter was succeeded by his stepson, Charles Fraser, 'Old Inverallochie,' whose son and namesake, commanding the Frasers at Culloden, was brutally shot by order of the Duke of Cumberland; and whose present descendant, Fred. Mackenzie Fraser, Esq. (b. 1831; suc. 1871), holds 4247 acres in the shire, valued at £3697 per annum.

Castles Girnigoe and Sinclair, two neighbouring ruined fortalices on the coast of Wick parish, Caithness, crowning a rocky peninsula, a little W of Noss Head, and 3¼ miles NNE of Wick town. Built mainly at a time unknown to record, and partly in the 16th century, they were the chief strongholds of the Sinclairs, Earls of Caithness; and, of great extent and irregular structure, included an extant five-storied tower, 50 feet high. A room in Castle-Sinclair, said to have been the bedchamber of the Earls, communicated through a trap-door with the sea; and the whole was so strong, by both nature and art, as to be impregnable prior to the invention of

CASTLE-KENNEDY

gunpowder. In a dark dungeon here, John Garrow, Master of Caithness, was imprisoned (1576-82) by his father, the fourth Earl, whom he had displeased by his lenity towards the townfolk of Dornoch. At last his keepers, having kept him for some time without food, gave him a large mess of salt beef, and then withholding all drink from him, left him to die of raging thirst. The singular episode of the coiner Smith (1612) and the capture of Girnigoe by Sir Rt. Gordon (1623) are recounted in vol. i., pp. 436, 532, of Chambers's *Domestic Annals* (1858).

Castle-Gloom. See CASTLE-CAMPBELL.

Castlegower. See BUTTLE.

Castle-Grant, a mansion in Cromdale parish, Elginshire, 2¼ miles W of the river Spey, and 2½ NNE of Grantown. A plain old castellated edifice, consisting of a high quadrangular five-storied pile, with lower lateral wings, it underwent extensive repairs and improvements about 1836; it contains a superb dining-room, 47 feet by 27; and its extensive grounds are finely adorned with venerable trees, and command an imposing prospect, bounded on the sky-line by the Grampians. On 5 Sept. 1860, the Queen and Prince Consort drove *incognito* to Castle-Grant—'a fine (not Highland-looking) park, with a very plain-looking house, like a factory.' Castle-Grant is the ancestral seat of the Grants of Grant, of whom Sir Lewis Alex. Grant, Bart., succeeded in 1811 to the lands and earldom of Seafield. Caroline Stuart, countess-dowager of Seafield, is proprietrix, and holds in Moray 305,891 acres. In 1884 she erected a neat cottage hospital in memory of her son Ian Charles, the eighth Earl. See Sir William Fraser's *The Grants of Grant* (1883).

Castlehaven, the stronghold of Sir Neil Cunningham, on the coast of Crail parish, E Fife, which, falling into ruin, was demolished in 1839.

Castlehaven, a creek in Tarbat parish, NE Ross-shire, at the extreme point of the Tarbat peninsula. It is traditionally said to have anciently had a fort on an islet within it; and it gives the title of Baron to the Earl of Cromartie. It is accessible only to boats, and to these only at high water.

Castlehill. See CARLUKE and KIPPEN.

Castlehill, a post office hamlet in the parish and 3 miles E by S of the post-town of Inverness.

Castle-Huntly, an estate, with a noble old baronial mansion, in Longforgan parish, Perthshire. The mansion, 1½ mile NNW of the Firth of Tay, and 7 miles W of Dundee, is situated on the summit of a high rock, which, on the SW side, rises sheer up from the dead level of the Carse of Gowrie, and on the E sinks gradually to the plain. It was built, under royal licence of 26 Aug. 1452, by Andrew, second Lord Gray of Foulis, and was named, according to a baseless tradition, after his lady, a daughter of the Earl of Huntly. In 1615 it was sold to Patrick Lyon, first Earl of Kinghorn; and, becoming the favourite residence of his grandson and namesake, the third Earl of Kinghorn and first of Strathmore (d. 1695), it was by him greatly improved, and re-named Castle-Lyon, whilst its estate was erected in 1672 by royal charter into a lordship called the lordship of Lyon. Passing by sale, in 1777, to Geo. Paterson, Esq., a son-in-law of the twelfth Lord Gray, it was restored by him to its original name, renovated without, and modernised within, enlarged with wings, battlements, round tower, and corner turrets, and altogether rendered one of the most remarkable combinations of old and modern masonry in the kingdom. The present proprietor, Geo. Frederick Paterson, Esq. (b. 1857; suc. 1867), holds 2001 acres in the shire, valued at £5321 per annum.

Castle-Island, a small island in Small Isles parish, Inverness-shire, near the SE side of the island of Eigg. It is inhabited only by persons tending cattle, and only during part of the summer months.

Castle-Island. See LEVEN, LOCH.

Castle-Kennedy, a hamlet, a lake, and a ruined ivy-mantled mansion in Inch parish, Wigtonshire. The hamlet lies adjacent to the Dumfries and Portpatrick

railway, and to the southern extremity of the lake, 3 miles E by S of Stranraer, and has a station on the railway, which here forms a loop line, a post office, and a public school. The lake is cut so deeply by a peninsula, as sometimes to be reckoned rather two lakes than one, called Black and White Lochs, which extend parallel to each other, Black Loch having an utmost length and breadth of $1\frac{3}{4}$ mile and $2\frac{3}{4}$ furlongs, White Loch of $7\frac{1}{2}$ and $3\frac{3}{4}$ furlongs. Each contains an islet; and on the south-south-eastward peninsula between the two stands the ruined mansion, included now in the beautiful policies of LOCHINCH, a seat of the Earl of Stair. Built by John, fifth Earl of Cassillis in 1607, it passed about 1677, with the surrounding property, to Sir John Dalrymple, afterwards Viscount Stair. It was a stately square edifice, but, being accidentally destroyed by fire in 1716, it was never restored. The 'dressed grounds' were laid out by Field-Marshal Stair in the Dutch style of landscape gardening, and, after some forty years of neglect, have more than recovered their former beauty since 1841. See pp. 99-103 of Wm. M'Ilwraith's *Wigtownshire*.

Castle-Kilchurn. See KILCHURN.

Castle-Lachlan, an estate, with a mansion, in Strachur and Stralochlan parish, Argyllshire. The mansion, built about 1790, near the old ruinous tower of the chiefs of the MacLachlans, stands on the eastern shore of Loch Fyne, $10\frac{1}{2}$ miles SSW of Inverary by water; its owner, John MacLachlan, Esq. of Stralochlan Castle, holds 12,000 acres in the shire, valued at £2006 per annum.

Castle-Law, a hill in Gifford parish, Haddingtonshire, $2\frac{1}{2}$ miles SSW of Gifford village. A northern spur of the Lammermuirs, it rises to an altitude of 921 feet above sea-level, and is crowned with an ancient circular camp, measuring 370 by 337 feet within the ramparts.

Castle-Law, a conical hill (1028 feet) in Forgandenny parish, SE Perthshire, 2 miles SSE of Forgandenny village. On it are vestiges of a Scandinavian fort, 500 feet in diameter; and it commands an extensive view.

Castle-Law, a summit of the Pentlands, in Glencross parish, Edinburghshire, $3\frac{1}{2}$ miles NNW of Penicuik. It has an altitude of 1595 feet above sea-level, and it shows distinct vestiges of an ancient camp.

Castle-Law, a rising ground in Linton parish, NW Peebleshire, adjacent to West Water, 5 furlongs SSW of Linton village. A cairn stood on it till about 1827, and yielded a stone coffin, which seemed to have contained the body of some very distinguished person.

Castle-Law, a hill (873 feet) on Venchen farm, Yetholm parish, NE Roxburghshire, $1\frac{1}{2}$ mile N of Kirk Yetholm. An ancient Caledonian camp on it has two ramparts and two fosses, and measures 200 yards in diameter.

Castle-Leod, a seat of the Earl of Cromartie (born in 1852; succeeded in 1888), in Fodderty parish, Ross-shire, 1 mile N of Strathpeffer. Built by Sir Roderick Mackenzie (d. 1625), it was a principal seat of his descendants, the Earls of Cromartie; is a bartizaned and turreted five-storied edifice, with walls, in many parts, from 7 to 8 feet thick; contains a hall or dining-room, 32 feet by 21, exclusive of recesses; and presents a venerable and imposing appearance, with its ancient trees, among them a Spanish chestnut, girthing $22\frac{1}{2}$ feet at 1 foot from the ground. See TARBAT HOUSE.

Castle-Loch, a lake in Lochmaben parish, Dumfriesshire, immediately SSE of Lochmaben town. In shape resembling a stone arrow-head, with apex pointing north-north-westward, it has an extreme length and breadth of $\frac{3}{4}$ mile and $5\frac{1}{4}$ furlongs, and, as seen from the NE with the Torthorwald hills on the sky-line, presents a picturesque appearance. Both the site of the original castle of the Bruces, and the scanty remains of the subsequent castle so famous in history, are near its shores, but will be noticed under LOCHMABEN. Its waters contain ten kinds of fish, including loch trout, pike, perch, roach, bream, chub, and vendace. The last of these, a shy, small Telosteian, of the Salmonidæ family, peculiar to this lake and to Mill Loch, has drawn great attention

both from naturalists and from epicures; and is preserved and caught in sweep-nets once a year—on the third Tuesday of July—by the Vendace Club.—*Ord. Sur.*, sh. 10, 1864.

Castle-Lyon. See BORROWSTOUNNESS and CASTLE-HUNTLY.

Castle-Maoil, a ruined, strong, square fortalice, on the N coast of Strath parish, Isle of Skye, Inverness-shire, contiguous to Kyle Akin village. It is said to have been built by the wife of a Macdonald, the daughter of a Norwegian king, for the purpose of exacting toll from all vessels passing through Kyle Akin strait.

Castle-Mearnaig or Castle-Glensanda, a ruined fortalice on the Kingerloch coast of the parish of Kilmallie, Argyllshire, crowning a conical rock, adjacent to Glensanda Hill, opposite Castle-Coeffin. The rock on which it stands is about 150 feet high, and 44 feet by 20 broad at the top. The castle occupies its entire summit; is an oblong building, 45 feet long, 20 wide, and 33 high; and seems to be less ancient, as it is more entire, than Castle-Coeffin.

Castle-Menzies, a mansion in Weem parish, Perthshire, in the valley of the Tay, on the southern slope of Weem Hill (1638 feet), $1\frac{1}{2}$ mile WNW of Aberfeldy. A large and splendid castellated edifice, it was built partly in 1571, partly in 1840, and has a spacious semicircular park, containing some of the finest trees in Scotland. Chief among them are the following, with height in feet and girth at 1 foot from the ground:—2 oaks (73, $15\frac{1}{2}$; 80, $14\frac{3}{8}$), 4 beeches (95, $14\frac{1}{2}$; 85, $15\frac{1}{8}$; 80, $9\frac{1}{2}$; 90, $14\frac{1}{2}$), 3 sycamores (104, $25\frac{1}{2}$; 90, $32\frac{1}{2}$; 100, 18), 2 Spanish chestnuts (60, $26\frac{1}{2}$; 80, $19\frac{1}{2}$), and an ash (83, $13\frac{1}{2}$). See *Trans. Highl. and Ag. Soc.*, 1879-81. Castle-Menzies is a seat of Sir Rt. Menzies of that ilk, seventh Bart. since 1665 (b. 1817; suc. 1844), who owns 32,784 acres in the shire, valued at £8554 per annum.

Castlemilk, an estate, with a mansion, in St Mungo parish, Dumfriesshire, 3 miles SSE of Lockerbie. The estate, which gave name to the parish in the 12th and 13th centuries, went from the Bruces by marriage, first to the royal Stewarts, next to the Maxwells of Nithsdale; and, having passed by sale through many hands, is now the property of Sir Rt. Jardine, Bart. (b. 1826), M.P. for Dumfries 1868-74, and for Dumfriesshire 1880-92, who owns 7714 acres in the shire, valued at £8598 per annum. The mansion, on the left bank of Milk Water, is a stately edifice, rebuilt in 1866 on the site of a previous mansion of date 1796. The original castle was built by one of the Bruces, and is said to have been besieged by both the Protector Somerset and Oliver Cromwell.

Castlemilk. See CARMUNNOCK.

Castle-na-Coir, a ruined feudal fortalice in Creich parish, Sutherland, on a meadow above the mouth of Cassley Water.

Castle-Newe, a mansion in Strathdon parish, W Aberdeenshire, on the left bank of the Don, $10\frac{1}{2}$ miles SW of Rhynie. Partly dating from 1604, it is chiefly a handsome castellated edifice of 1831, with a central tower 85 feet high. Its owner, Sir Chs. S. Forbes, fifth Bart. since 1823 (b. 1867; suc. 1884), holds 29,238 acres in the shire, valued at £5992 per annum.

Castle-O'er, Castle-Over, or Castle-Overbie, a Roman camp in Eskdalemuir parish, NE Dumfriesshire. It was an upper station, communicating by a causeway with the camps of Middlebie and Netherbie; and was long identified with a camp on a hill-top on Yebbye farm, near the confluence of the Black and White Esks. That camp, however, is oval and apparently Saxon, though interesting enough for its well-preserved condition. The true Castle-O'er is at the confluence of the Rae Burn with the White Esk, about a mile above Eskdalemuir church; and comprises, in its present state, an area of $5\frac{1}{4}$ acres, including an enclosed and fortified space of 270 feet by 100, and distinctly retaining its vallum and fosse, the latter 20 feet wide and 5 feet deep.

Castle-Park, a village in the parish and 1 mile from the town of Auchterarder, Perthshire.

Castlephairn. See CASTLEFERN.

Castle-Rachal, a very ancient Scandinavian fortalice in Lismore and Appin parish, Argyllshire, on the NW side of Lismore island, 2½ miles from the north-eastern extremity. It is now a dilapidated ivy-clad ruin.

Castle-Rainy. See TURRIFF.

Castle-Rankine, a rivulet of SE Stirlingshire. It rises on the W border of Denny parish near the S base of Darrach Hill; runs about 4½ miles east-by-northward through Deuny parish; and falls into the Carron near Denuybridge. It took its name from an ancient fortalice on its banks, 1¾ mile WSW of Denny town; it shares its name with a hamlet and a farm in the vicinity of the site of that old fortalice; it drains a basin rich in ironstone; and it supplies an extensive dye-work and a chemical work.

Castle-Row, a hamlet of SE Edinburghshire, near Gorebridge.

Castle-Roy. See ABERNETHY, Inverness-shire.

Castles, a place on the S side of Ulva island, Argyllshire. It shows an assemblage of basaltic columns resembling fortalices; and is pierced, in the face of a perpendicular rock 95 feet high, with a cavern 58 feet wide, 30 high, and 60 long, the entrance somewhat arched, and the sides and roof almost as regular as if they had been fashioned by art.

Castle-Semple, a lake and an estate in Lochwinnoch parish, Renfrewshire. From the vicinity of Lochwinnoch town, the lake extends 1¾ mile north-eastward, whilst tapering to a point from an utmost breadth of 3 furlongs. Originally 4½ miles long, and upwards of 1 mile in width, it was greatly curtailed by draining processes between 1680 and 1774, with the result of recovering from its bed upwards of 400 acres of rich land. It receives the CALDER at its head, and sends off Black CART Water from its foot; it lies in the long, wide valley which separates the heights of SE Renfrewshire and Cunninghame from the moorish uplands to the NW; and it is traversed, along most of its SE shore, by the Glasgow and South-Western railway. Its bosom is gemmed with three small wooded islets; its shores are decked with park and lawn and trees; its flanks shelved upward, with rich embellishment of hamlet, mansion, and farmstead, to picturesque ranges of distant heights; and its waters contain pike, perch, braize, and a few shy lake-trout, whilst on them swim swans and teal and other waterfowl. The estate of Castle-Semple belonged to the noble family of Sempill from the 14th century till 1727, when it was sold to Colonel M'Dowall; in 1813 it was sold again to John Harvey, Esq.; and its present proprietor is James Widdrington Shand-Harvey, Esq., who owns 6500 acres in the shire, valued at £5562 per annum. Elliotston Tower, its original seat, ¾ mile E of the foot of the lake, was occupied by the Sempill family till about 1550, and, 45 feet long by 33 broad, still stands in a state of ruin. The next seat, Castleton or Castle-Semple, on the NW side of the lake, ¼ mile W of the foot, was built about the time of the abandonment of Elliotston Tower; appears to have been an edifice of great size, amid very beautiful grounds; and was demolished in 1735. The present Castle-Semple is an elegant edifice, rebuilt on the site of its predecessor, and standing amid a splendid park. A tower, called the Peel, was built, between 1547 and 1572, by the great Lord Sempill; stood on an islet, now forming part of the mainland, ½ mile E by S of Lochwinnoch town; had the form of an irregular pentagon, with a sharp end towards the head of the lake; and is now represented by some ruins. A collegiate church, for a provost, six chaplains, two boys, and a sacristan, was founded in 1504 by John, Lord Sempill, near the lake, in the vicinity of the site of Castle-Semple; measured 71½ feet in length, 24½ in breadth, and 15½ in height; and included, at its E end, the burial-place of the Sempill family, afterwards the burial-place of the Harveys. A village and a chapel of St Bride also seem to have anciently stood near the foot of the NW side of the lake. A structure in imitation of a Chinese pagoda stands on Kenmure Hill, in the western part of the estate; was built, about the middle of last century, by

one of the M'Dowalls; and commands a fine view of the lake and the surrounding country.—*Ord. Sur.*, sh. 30, 1866.

Castle-Shuna, a ruined fortalice in Lismore and Appin parish, Argyllshire, on Shuna island, in Loch Linnhe, opposite Portnacroish. It looks to be older, and is much less entire, than the neighbouring Castle-Stalker; but is said to have never been completed.

Castle-Sinclair. See CASTLE-GIRNIGOE.

Castle-Spiritual, an ancient fort in Inverness parish, Inverness-shire, on the flat gravelly peninsula between the foot of Loch Ness and the head of Loch Dochfour, 6 miles SW of Inverness town. Its site, at no very distant period, was an island. The original building is thought to have been a crannoge or lake-dwelling; either that building, or one succeeding it, is by some believed to have been a stronghold of the early Pictish kings, the place where St Columba visited King Brude nan Maelchon (565 A.D.); and a later building, vestiges of which remain, appears to have been a small baronial keep of the feudal times, and to have completely commanded the adjoining fords across the river Ness.

Castle-Spynie. See SPYNE.

Castle-Stalker, a ruined old fortalice in Eriska, South Uist parish, Outer Hebrides, Inverness-shire. It presents a picturesque appearance, and serves as a landmark to mariners.

Castle-Stalker, an ancient square tower in Lismore and Appin parish, Argyllshire, on a rocky islet in Loch Linnhe, off the mouth of Appiu Bay. Built by Duncan Stewart of Appin in the reign of James IV., who used it as a hunting-seat, it was re-roofed and re-floored in 1631, and comprises three stories, rising above a prison vault. Over the entrance-gate is a fine carving of the royal arms; and, save that it is now roofless, it still is tolerably entire.

Castle-Stewart, a ruined ivy-clad square tower in Penninghame parish, E Wigtownshire, near the right bank of the Cree, 3 miles NNW of Newton-Stewart. It was built by Col. William Stewart, a soldier of fortune, in the 17th century.

Castle-Stuart, a seat of the Earl of Moray in Petty parish, Inverness-shire, 6 miles NE of Inverness, 1½ mile WSW of Dalcross station, and within ½ mile of the Moray Firth. A fine specimen of the baronial architecture, it seems to have been erected about 1625, and was once designed for the family seat; but, having fallen into disrepair, it has long been kept in order only as a shooting-box. The Earl owns 7035 acres in the shire, valued at £5171 per annum.

Castle-Swin, a ruined fortalice in North Knapdale parish, Argyllshire, crowning a rock on the eastern shore of Loch Swin, 2 miles from its mouth. Traditionally said to have been built in the early part of the 11th century by Sweno, Prince of Denmark, it includes portions whose date must be very much later; it measures 105 feet in length and 35 feet in height; and its walls are 7 feet thick. It figured long and prominently in the wars which desolated the Western Mainland and the Hebrides; it afterwards was occupied as a royal fort, in the hereditary keeping of the Earls of Argyll; and it was besieged, captured, and burned by Montrose's lieutenant, Macdonald of Kolkitto.

Castle-Tirrim, a ruined fortalice in Moidart district, Inverness-shire, on a rock in Loch Moidart. One of Clanranald's strongholds, it is said to have been held for a time by Cromwellian troopers; and it was burned in 1715. It measures 130 yards in circumference; occupies the entire area of a rock that at high water is completely insulated; is now reduced to vaulted chambers and lofty turreted exterior walls; and, viewed in connection with the surrounding scenery, presents an imposing appearance. See p. 640 of *Good Words* for 1874.

Castleton, an estate, with some vestiges of a mansion built in 1320 by William Lambert, Archbishop of St Andrews, in Muchart parish, SE Perthshire.

Castleton, the capital of the Deeside Highlands, in the Braemar section of Crathie and Braemar parish, SE Aberdeenshire, 35 miles N of Blairgowrie, 30 NE of

Blair Athole, 32 ESE of Aviemore, and 17½ WSW of Ballater station, this being 43½ WSW of Aberdeen. Backed by Mor Shron (2819 feet) and Carn nan Sgiat (2260), it stands, at 1110 feet above sea-level, on both sides of turbulent Clunie Water, which here, at 1 mile above its confluence with the Dee, is spanned by a substantial bridge, erected in 1863, in place of one built by General Wade, and which parts the village into Castleton proper to the E, and Anchinryne to the W. At it are Braemar post office under Aberdeen, with money order, savings' bank, and telegraph departments, a branch of the Union Bank, 2 fine hotels (the Fife Arms and the Invercauld Arms), a public library, and a meteorological observatory, whose instruments were a present from the Prince Consort. The Established church, built as a chapel of ease in 1834, and considerably enlarged and raised to *quoad sacra* status in 1879, is a cruciform Early English edifice, with a spire 112 feet high; other places of worship are the Free church, with graceful clock tower and spire, St Margaret's Episcopal church (1880), and St Andrew's Roman Catholic church (1839). There are a public school and two public halls, one in Castleton and one in Anchinryne. On the site of the Invercauld Arms Hotel the Earl of Mar upreared the standard of insurrection, 6 Sept. 1715, in support of the cause of the Old Pretender. Pop. of *quoad sacra* parish of Braemar (1831) 861, (1891) 835.—*Ord. Sur.*, sh. 65, 1870. See also BRAEMAR, CRATHIE, and INVERCAULD.

Castleton, a village in Fowls-Wester parish, Perthshire, 5 miles NE of Crieff. It took its name from a castle, now extinct, of the Earls of Strathearn.

Castleton, a farm, containing remains of an ancient royal palace, in Fordoun parish, Kincardineshire, 4 miles NW of Laurencekirk. The palace was the place where John Balliol, in 1296, resigned his crown to Edward I. of England, and probably was destroyed before the close of the wars of the succession. It stood on a small ridge, at an elevation of about 70 feet above adjoining levels; was surrounded by a morass, which lay undrained till the early part of the present century; and commanded a view of the finest part of the Howe of Mearns. It appears to have been of a quadrangular form, and to have possessed considerable military strength; but now is represented only by foundations or substructions. The ancient town of Kincardine, once the capital of the county, now represented by a small decayed village, stood adjacent to the palace.

Castleton, Caithness. See CASTLETOWN.

Castleton, a large Liddesdale and Border parish of S Roxburghshire, containing in its lower division the village of Newcastleton, which, standing on the right bank of Liddel Water, 320 feet above sea-level, has a station on the Waverley route (1862) of the North British railway, 24½ miles NNE of Carlisle, 8½ SSW of Riccarton Junction, 50½ NW of Hexham, 71 WNW of Newcastle-on-Tyne, 21½ S by W of Hawick, and 74 SSE of Edinburgh. Commenced by Henry, third Duke of Buccleuch, in 1793, this is a neatly-built place with two long streets, and three divergent squares; at it are a post office with money order, savings bank, and telegraph departments, a branch bank of the British Linen Co., a library, a mechanics' hall, a Free church (250 sittings), a U.P. church (600 sittings), an Evangelical Union church (138 sittings), and a public school, which, with accommodation for 288 children, had (1891) an average attendance of 163, and a grant of £171, 18s. A few of the inhabitants are employed by the cotton manufacturers of Carlisle. Hiring fairs are held on the second Friday of April and the Fridays before 17 May and 8 Nov.; ewe fairs on the Friday before the second Wednesday of Sept.; and cattle fairs on the third Friday of Nov. Pop. (1861) 1124, (1871) 886, (1881) 924, (1891) 820.

The parish contains also the stations of Steele Road (4½ miles NNE of Newcastleton), Riccarton Junction (3½ NNE of Steele Road), and Saughtree (2½ E by N of Riccarton). It is bounded N by Teviothead, Cavers, Hobkirk, and Southdean; SE by Northumberland and Cumberland; and W by Canonbie and Ewes in Dum-

frieshire. In shape resembling a rude triangle with apex to the SSW, it has an utmost length, from Wigg Law near Knot i' the Gait to Liddelbank, of 17 miles; an utmost breadth, from E to W, of 12 miles; and an area of 68,152½ acres, of which 294 are water. LIDDEL Water, formed in the NE of the parish by the confluent Caddroun, Wormsleuch, and Peel Burns, at an altitude of about 600 feet above sea-level, flows 15½ miles SW and S by W through the interior, then 3¾ miles SSW along the English Border. Higher up, the Border is traced for 8¾ miles by Kershope Burn, running SW to the Liddel, whose other chief affluent, hazel-fringed Hermitage Water, gathering its head-streams from the NW corner of the parish, winds 8 miles ESE and S by W to a point 1½ mile NNE of Newcastleton. In the farthest S the surface sinks to less than 300 feet above sea-level, thence rising NNE and NNW to the lines of mountain watershed dividing Liddesdale from Teviotdale and Eskdale. E of the Liddel the chief elevations from S to N are Blinkbonny Height (864 feet), Priest Hill (669), Stell Knowe (923), Wilson's Pike (1354), Larriston Fells (1677), *Thorlieshope Pike (1180), *Peel Fell (1964), and *Hartshorn Pike (1789), of which those marked with asterisks culminate on the parish boundaries. Between the Liddel and Hermitage Water, with its affluent Whitterhope Burn, are Arnton Fell (1464), Saughtree Fell (1500), and Lamblair Hill (1635); whilst W of them rise Greena Hill (730), Tinnis Hill (1326), Bttleton Hill (922), Bedda Hill (842), *Black Edge (1461), *Watch Hill (1642), North Birny Fell (902), *Roan Fell (1862), Din Fell (1735), Hermitage Hill (1321), *Tudhope Hill (1961), *Cauldeleuch Head (1996), and *Greatmoor Hill (1964). The rocks are variously eruptive, Devonian, Silurian, and carboniferous. Sandstone of excellent building quality is plentiful, as also is limestone of different kinds; and coal has been found on Liddelbank estate. Mineral springs are at Thorlieshope, Lawston, Flatt, and Dead Water; and a petrifying spring, in a moss traversed by Tweeden Burn, exhibits in a curious manner the stages of petrification—the moss at the surface soft and flourishing, half petrified lower down, and at the roots changed into solid stone. The soils over much of the two chief vales is a deep and fertile loam, and elsewhere is often better than it looks. Many hundred acres, once in tillage, were thrown into pasture on account of the high prices of sheep and wool; but, on the other hand, as many or more, theretofore untouched by the plough, have recently been brought under tillage, and in some cases have yielded as much as 60 imperial bushels of corn per acre. And still, according to the opinion of Mr Brackenridge, of Yorkshire, expressed to a committee of the House of Commons in 1862, some 35,000 acres of the pastoral area could, at little cost, be rendered fit for any agricultural purpose whatever. Such are the general features of Dandie Dinmont's country, which Scott has described so finely in *Guy Mannering*:—'The hills are greener and more abrupt than those of Cumberland, sinking their grassy sides at once upon the river. They have no pretensions to magnificence of height or to romantic shapes, nor do their smooth swelling slopes exhibit either rocks or woods. Yet the view is wild, solitary, and pleasingly rural; it seems a land which a patriarch would have chosen to feed his flocks and herds. The remains of here and there a dismantled ruined tower show that it once harboured beings of a very different description from its present inhabitants, those freebooters, namely, to whose exploits the wars between England and Scotland bear witness.' Elliots and Armstrongs these—the 'sturdy Armstrongs, who were for ever riding.' The latter held the wide hanghs and gently-rolling hills of Lower Liddesdale; the former, the bleak and more mountainous uplands, vapourous with mists from the Atlantic. The Elliots alone had from thirty to forty peels on the banks of the Liddel and the Hermitage; but all, except HERMITAGE Castle, were razed to the ground immediately after the union of the crowns. Yet are the names remembered, the sites still pointed out, of Mangerton, Westburnflat, Liddel, Clintwood, Baholm, Larriston, Riccarton, Thorlieshope,

and many another reiver's forlalice. And still we have such Liddesdale ballads as *Dick o' the Cow*, *Hobbie Noble*, *Jamie Telfer of the Fair Dodhead*, or *Jock o' the Side*; such Liddesdale traditions as that of the Brownie of Goranberry, of Shellycoat and the Kelpie, of the foul murder of the 'Cout of Keeldar' in the foaming linn, or of the boiling of the warlock Sonlis on the Nine-stane Rig; such episodes of Liddesdale history as the starving to death of Sir Alexander Ramsay (1342), as Queen Mary's mad ride from Jedburgh to Hermitage Castle, where Bothwell lay wounded by 'little Jock Elliot' (1566), or as the Regent Morton's raid 'to make the rush-bush keep the Border kye' (1569). So that something remains of the past, for all the changes that have swept over Liddesdale since Scott's first coming in 1792. Then there were no roads, nor inns of any kind; his was the first wheeled vehicle seen here, on occasion of his seventh and last visit, in 1798. Now the Border Counties railway (1862) cuts through part of the CATRAIL, one of the few antiquities surviving. Others are camps, both round and square, on the tops of the hills; * circular forts of the kind called Round-about or Picts' Works; the 'Druidical circle' of the Nine-stane Rig; and Milnholm Cross, 8½ feet high, which marks the burial-place of an Armstrong murdered by Douglas, the 'Flower of Chivalry.' There were no fewer than five churches or chapels in the parish—Hermitage, the Whele, Ettleton, Dinlabyre, and Chapelknowe. Of these the Whele, supposed to have been the chief, stood at Liddelhead, near Dead Water and close to a Roman road, the Whele Causey, from which the church got its name; here Edward I. obtained a night's lodging when on a pilgrimage to St Ninian's shrine in Galloway. In 1604, 'being destitute of all instruction and bringing up in the fear of God, the kirks of Castleton, Ettleton, and Quhelekirk and Belkirk, were united and annexed in ane perpetual rectory or parsonage or vicarage of Castleton.' Thus much for the Castleton of bygone days. At present there are 13 landed proprietors, 6 holding each an annual value of £500 and upwards, 3 of between £100 and £500, 1 of from £50 to £100, and 3 of from £20 to £50. The parish is in the presbytery of Langholm, and synod of Dumfries, the living being worth £399. Its church, at the confluence of Liddel and Hermitage Waters, was built in 1808, and contains 820 sittings; in the graveyard is buried John Armstrong, M.D. (1709-79), a native of Castleton, and author of a didactic poem, *The Art of Preserving Health*. Four public schools—Burnmouth, Hermitage, Riccarton, and Saughtree—with respective accommodation for 55, 75, 87, and 59 children, had (1891) an average attendance of 37, 39, 35, and 57, and grants of £52, 10s., £54, 5s., £46, 10s., and £64, 17s. 6d. Valuation £90,505, 19s. 7d., including £9203 for railways. Pop. (1801) 1109, (1831) 2227, (1861) 3688, many of them navvies, (1871) 2202, (1881) 2256, (1891) 2023.—*Ord. Sur.*, shs. 11, 17, 1863-64. See Scott's *Minstrelsy of the Scottish Border*; Dr. William Chambers's 'Look into Liddesdale,' in *Sketches Light and Descriptive*; and the Countess of Minto's *Border Sketches*.

Castleton of Braemar. See CASTLETON.

Castle-Toward, a fine Gothic mansion in the S of Dunoon parish, Cowal, Argyllshire, at the eastern entrance of the Kyles of Bute, 1½ mile W by N of Toward Point, and 2½ miles NE of Rothesay. Backed by the wooded slopes of Toward Hill (1131 feet), it was built in 1821, near the ruined castle of the Lamonts, Lords of Cowal, and once one of the most powerful families in the west of Scotland. At the old castle Queen Mary once dined, but it was burned in 1646, on occasion of the murder of the Lamonts at DUNOON. The owner of Castle-Toward, C. Campbell Finlay, Esq., holds 6758 acres in the shire, valued at £2867 per annum.

Castletown, a village in Olig parish, Caithness, at the southern corner of Dunnet Bay, 5 miles E by S of Thurso, with which and with Wick it communicates daily by coach. A neat little place, it owes its origin

* Carby or Caerby Hill, to the S of the village, where there is a strong native camp, 100 feet in diameter, with a Roman station opposite, is by Skene identified with 'Guria,' a town of the Otadeni.

to the great Castlehill flag quarry (rental £1713) between it and the shore; at it are a post office under Thurso, with money order, savings bank, and telegraph departments, branches of the Commercial and Town and County Banks, a hotel, a library and reading room, a harbour, Olig parish church (1841), a Free church, a United Original Secession church, and a public school. Pop. (1841) 477, (1861) 758, (1871) 911, (1881) 932, (1891) 979.—*Ord. Sur.*, sh. 116, 1878.

Castle-Urquhart. See URQUHART, Inverness-shire.

Castle-Varrich. See TONGUE.

Castlewalls, an eminence (700 feet) near the E border of Lochwinnoch parish, Renfrewshire, 3 miles SSW of Johnstone. Consisting of trap rock, precipitous on the E and W, sloping on the N and S, it has an ancient circumvallation, supposed to be remains of a camp formed by Sir William Wallace, but more probably remains of a Caledonian fort; and it commands a splendid view over Cunningham and the Firth of Clyde, to Arran and Ailsa Craig.

Castle Wemyss, a mansion in Inverkip parish, W Renfrewshire, near Wemyss Point on the Firth of Clyde, 1¼ mile NNW of Wemyss Bay. It is the residence of Sir John Burns, Bart. (b. 1829; suc. 1890).

Castlewigg, an estate, with a mansion, in Withorn parish, SE Wigtownshire. The mansion, standing 2½ miles NW of Withorn town in a finely wooded park, was built about the beginning of this century; its owners, the trustees of the late Col. Jn. Fletcher, hold 3582 acres in the shire, valued at £5169 per annum.

Castramont, a mansion in Girthon parish, Kirkeudbrightshire, on the left bank of the Fleet, 3 miles N by W of Gatehouse. It stands, embosomed by trees, at the western base of conical Doon Hill, which took its name from a native fort on its summit, as that of Castramont is derived from a Roman camp at its foot.

Catacol, a fishing hamlet on the NW coast of Arran, Buteshire, at the mouth of Glen Catacol, 1¼ mile SW of Loch Ranza. A battle, according to fable, is said to have been fought on its site between Fingal and his enemies; and a small green mound, on the neighbouring beach, is the reputed grave of Arin, the sea-king, whom Fingal slew.

Catcune. See BORTHWICK.

Caterline, an ancient parish and a modern fishing village on the coast of Kincardineshire. The parish, united to Kinnell before the Reformation, now forms the northern portion of that parish. The village stands 5 miles S of Stonehaven; has St Philip's Episcopal church (1848), Early English style, and a pier; and carries on some trifling commerce in the import of lime and coals.

Caterthun, White and Brown, two hills in the N of Menmuir parish, Forfarshire, 5½ miles NW of Brechin. White Caterthun (976 feet) is so steep that its top can be gained only from one side; and, as seen from a distance, resembles the frustrum of a cone. An oval Caledonian fort on it, measuring 436 feet by 200 feet, consists of loose stones round the crest of the hill, with a deep outer ditch; includes near its E side remains of a rectangular building; and was defended, 200 feet lower down, by another double intrenchment. Brown Caterthun (945 feet), ¾ mile to the NE, has also a Caledonian fort, consisting of several concentric circles, but inferior in strength to the first; it takes its designation 'Brown' from the colour of the turf ramparts, whilst its neighbour was named from its rings of white stone. See vol. i., pp. 84, 85, of Hill Burton's *History of Scotland*.

Catgill, a hamlet in Half Morton parish, SE Dumfriesshire, close to Chapelknowe.

Cathcart (Celt. *caer-cart*, 'Cart castle'), two villages of NW Renfrewshire, and a parish formerly partly also in Lanarkshire. The villages, Old and New Cathcart, stand some distance asunder, near the White Cart Water, 2 miles S of Glasgow, on the Cathcart District Circular railway. There are many handsome houses and villas, a post office, a foundry, a dye-work, a paper-mill, a snuff factory, a photographic material manufactory, a cemetery, and the Couper Institute. Pop. of Old Cathcart (1891) 2511; of New Cathcart, 776.

The former Lanarkshire portion of the parish was divided in two, one being a detached part of it, and the other forming part of its main portion. The Boundary Commissioners in 1891 transferred the detached part to the parish of East Kilbride, thus remaining in Lanarkshire, while the remainder of the parish of Cathcart was placed wholly in the county of Renfrew. As this, however, caused the boundary between the two counties to run along the centre of a road, that part of it (see CARMUNNOCK) which had been divided between the parishes of Cathcart and Carmunnock was placed wholly in the parish of Cathcart. Then, in 1892, the Commissioners transferred from the parish Crosshill, Mount Florida, Langside, and Crossmyloof to Lanarkshire, these places having been incorporated in the extended City of Glasgow. The surface is charmingly undulated. The White CART winds through all the parish. Of it the late John Ramsay wrote:—"Sluggish and unadorned though the White Cart be in the lower part of its course, it exhibits much beauty in its progress through the parish of Cathcart, the banks being often elevated and clothed with a rich drapery of wood. Such is the warmth and shelter in some of the sequestered spots on its banks, that an almost perpetual verdure is to be found. In the midst of this scenery, Thomas Campbell and James Graham* were, in their childhood, accustomed to pass their summer months and feed their young fancies, removed from the smoke and noise of their native city. The latter, in his *Birds of Scotland*, says—

"Forth from my low-roofed home I wandered hlythe,
Down to thy side, sweet Cart, where, 'cross the stream,
A range of stones, below a shallow ford,
Stood in the place of the now spanning arch."

And Campbell, in his *Lines on Re-visiting Cathcart*, thus tenderly apostrophises the pleasant fields which he had so often traversed in "life's morning march," when his bosom was young—

"O scenes of my childhood, and dear to my heart,
Ye green waving woods on the margin of Cart,
How blest in the morning of life I have stray'd
By the stream of the vale and the grass-cover'd glade."

The rocks are chiefly of the Carboniferous formation. Sandstone of excellent quality is largely quarried; limestone and coal were formerly worked; ironstone abounds; and various rare minerals, now in the Hunterian Museum of Glasgow University, were found in the channel of the Cart. The soils are various, but generally fertile; about 100 acres are under wood. A ruined village, comprising 42 houses, each of one apartment from 8 to 12 feet square, and all deeply buried beneath rubbish or soil, was discovered in the early part of the present century on Overlee farm; and on Newlands farm, small earthen pots, full of foreign silver coins of the 17th century, have, from time to time, been exhumed. The field of Langside, where in 1568 Queen Mary's last blow was struck, is a chief object of interest, but will be separately noticed. Cathcart Barony either gave name to the ancient family of Cathcart, or from it took its name. That family acquired the barony in the early part of the 12th century, and assumed therefrom the title of Baron about 1447; then having alienated the barony to the noble family of Sempill in 1546, repurchased part of it in 1801; and were created Viscounts and Earls of Cathcart in the peerage of the United Kingdom in 1807 and 1814. Cathcart Castle, on a steep bank of the White Cart, in the southern vicinity of Old Cathcart village, dates from some period unknown to record, and in the days of Wallace and Bruce belonged to the ancestors of the Cathcart line. Seemingly a place of great strength, it continued to be inhabited by successive owners of the barony down to the middle of last century, when it was in great measure demolished for sake of its building materials, so that now it is represented only by one ruined ivy-clad square tower. On the bank of the river, and adjacent to the

* Other names that suggest themselves are Tannahill, John Struthers, 'Christopher North,' and Alexander Smith; the last, in chapter xvi. of his *Summer in Skye*, has left a sketch of this haunt of his boyhood.

castle, stands modern Cathcart House, into whose front a stone has been built, whereon are sculptured the arms of Cathcart, quartered with those of Stair; its present owner is Alan Frederick, third Earl of Cathcart. Other mansions are Aikenhead, Bellevue, Bogton, Camphill, Holmwood, Kirkinton, Linn, and Overdale; and year by year the parish is becoming more and more thickly studded with good residences. Cathcart is in the presbytery of Glasgow and synod of Glasgow and Ayr; the living is worth £241. The parish church, near Old Cathcart village, rebuilt in 1831, is a handsome Gothic edifice, containing 850 sittings. In its kirkyard are the graves of three martyred Covenanters, of the Gordons of Aikenhead, and of two English Gipsies, John Cooper and Logan Lee. The U.P. church was built in 1893-94. At New Cathcart are a Free and a U.P. church. Four schools—Cathcart, Crossmyloof, Queen's Park, and St Joseph's R.C., Busby—with respective accommodation for 841, 522, 1288, and 162 children, had (1891) an average attendance of 480, 506, 907, and 52, and grants of £519, 17s. 6d., £520, 14s., £902, 14s. 6d., and £50, 8s. Pop. of *quoad sacra* parish (1891) 9539; of civil parish (1861) 3782, (1871) 7231, (1881) 12,205, (1891) 16,589, of whom 156 were in Lanarkshire.—*Ord. Sur.*, sh. 30, 1866.

Cathcart District Railway, a circular line that leaves the Caledonian railway a little beyond Eglinton Street station, Glasgow, on the south side of the Clyde. With a station at Pollokshields East, it turns eastward to Queen's Park and Crosshill, and then makes a turn southward to Mount Florida and Cathcart. A recent extension turns westward, north-westward, northward, and again eastward, with stations at Langside, Pollokshaws, Shawlands, and Maxwell Park, returning to the Caledonian at Strathbuogo. The various stations on the line are what are known as island stations, and there are many bridges and some deep cuttings.

Catherine. See KATRINE.

Catherinefield. See DUMFRIES.

Catherine's, St, a ruined ancient chapel in Southend parish, Argyllshire, on a burn in a secluded glen, 7 miles SW of Campbeltown. A cemetery and a spring adjoin it; and the latter, till a comparatively recent period, had the reputation of a 'holy well,' and was frequented by invalids.

Catherine's, St, a ferry on Loch Fyne, Argyllshire, opposite Inverary, and forming the communication from that town with the roads to Kilmun, Lochgoilhead, Cairndow, and Glencroe. Small piers are at it, and an inn is at its E end. See also EDINBURGH, LIBERTON, and PENICUIK.

Cathkin. See CARMUNNOCK.

Cathlaw, an estate, with a mansion, in Torphichen parish, W Linlithgowshire, 3 miles N by E of Bathgate.

Cat Law, a mountain at the meeting-point of Liutathen, Kingoldrum, and Kirriemuir parishes, W Forfarshire, 6 miles NW of Kirriemuir town. One of the Benchinnan Grampians, projecting beyond the general line of the range, it has an altitude of 2196 feet above sea-level; it is crowned with a large cairn; and it commands a very extensive and magnificent view.

Catrail, an ancient earthwork, thus described by the late Dr Hill Burton in his *History of Scotland*, vol. i., pp. 90, 91 (ed. 1876):—"Whether in imitation of the Romans, or from some conception of their own, possibly earlier than the Roman invasion, the inhabitants of Scotland possessed a wall, strengthened by a system of forts. It is fortunate that it was seen by the antiquary Gordon, and caught a strong hold of his attention. He has accordingly followed its tract, and described a great deal that agricultural improvement has obliterated. He finds its northern commencement about a mile from Galashiels, on the river Gala, a tributary to the Tweed on its northern side; and there is a conjecture that it may have been carried from the other side of the stream across to the E coast. The most southerly trace of it is at Peel Fell, in Northumberland; its profile is a ditch between two walls. It has three local names: "The Catrail," "The Deil's Dyke," and "The Picts' Work

Ditch." It passes through the most classic portions of the Border land, by Yarrow, Deloraine Burn, Melrose, and Liddesdale, then near the Leepsteel and Hermitage Castle. Gordon found its most distinct vestiges to be "24 and 26 feet broad, and very deep, the ramparts on every side 6 or 7 feet in perpendicular height, and each of them 10 or 12 feet thick." From the phenomenon that the moss has at one place thickened to a level with the top, so that the sides of the wall are exposed by digging, it is supposed that the wall is of extreme antiquity. There are several hill-forts on the line of this rampart, so disposed as to leave little doubt that they are elements of the system of fortification connected with the walls and ditch.' Thus Dr Hill Burton. On the other hand, in a lengthy correspondence that appeared in the *Scotsman* during November 1880, it was urged that the Catrail was neither designed nor calculated for a work of defence, but was simply a mutual boundary line between two neighbouring and friendly tribes. Among the arguments put forward to support this view are—(1) that the work is not continuous, ceasing, for instance, at Braidlee Burn; and (2) that in places, e.g. on Woodburn farm, the ditch is only 3 feet deep and 6 or 7 wide, while the rampart is only 3 feet high. See Alex. Gordon's *Itinerarium Septentrionale* (1726); Chalmers' *Caledonia* (new edition, Paisley, vol. iii., 1886); T. Craig-Brown's *History of Selkirkshire* (1886), and articles by James Small, F.S.A., in the *Transactions of the Berwickshire Naturalists Club* (1880), and John Russell in *Blackwood's Magazine* (1888).

Catrine, a small manufacturing town in Sorn parish, Ayrshire, pleasantly situated, 300 feet above sea-level, on the right bank of the river Ayr, 2½ miles ESE of Mauchline station, with which it communicates by omnibus. It owes its origin to the extensive cotton factory, established in 1787 by Claude Alexander, Esq. of BALLOCHMYLE, the proprietor, in partnership with the well-known Mr David Dale, of Glasgow. By them the mill was sold in 1801 to Messrs Jas. Finlay & Co., who, having greatly enlarged it, added a bleaching-work and three huge waterwheels in 1824. Regularly built, with a central square, and streets leading off it E, S, and W, the town has a post office under Mauchline, with money order, savings bank, and telegraph departments, a branch of the Royal Bank, several insurance agencies, two hotels, a gas company, a public library, and a brewery. The principal building is the Wilson Bequest Hall (1880), which, measuring 52 by 22 feet, can accommodate 500 persons, and has a reading-room attached. There are Established, Free, U.P., and Evangelical Union churches; and in 1871 Catrine was formed into a *quoad sacra* parish. A public school, with accommodation for 500 children, had (1891) an average attendance of 391, and a grant of £395, 10s. 6d. Pop. (1871) 2584, (1881) 2638, (1891) 2458.—*Ord. Sur.*, sh. 14, 1863.

Catrine House, a mansion in Sorn parish, Ayrshire, 1 mile SW of Catrine town, across the river Ayr, and 2 miles SE of Mauchline. It was the seat of Dr Matthew Stewart (1717-85), to whom and to whose son, Prof. Dugald Stewart, Burns alludes in *The Vision* as 'the learned sire and son,' and here, on the invitation of the latter, he 'dinnered wi' a lord.'

Catslack, a burn in Yarrow parish, Selkirkshire, rising close to the Peeblesshire boundary, and running 2¾ miles SE and E to Yarrow Water, just below Yarrow Feus.

Catstane, an ancient monumental stone in the Edinburgh section of Kirkliston parish, on the peninsula between the Almond and Gogar Burn, 3½ miles WNW of Corstorphine village. Some believe it to commemorate the slaughter, near the spot, of Constantin, King of Alban, in a pitched battle, in the year 997, with Kenneth, son of Malcolm, which St Berchan, however, clearly places on the Tay; the late Sir James Simpson, on the other hand, in a monograph reprinted among his posthumous *Archæological Essays*, asks, 'Is it not the tombstone of the grandfather of Hengist and Horsa?' Perhaps it is.

Catter, a fine old mansion in Kilmarnock parish, Dumbartonshire, near the left bank of Endrick Water, 1¼ mile S by W of Drymen. The property of the Duke of Montrose, it is occupied by his chamberlain; and commands a splendid view of Buchanan park, lower Strathendrick, and the southern waters of Loch Lomond.

Catterline. See CATERLINE.

Cauldchapel, a farm in Wandell and Lamington parish, Lanarkshire. It contains two ancient small circular camps, one of them 180 feet in diameter, and also a moat or tumulus 60 feet in diameter and 5 feet high.

Cauldcleuch, a mountain on the mutual border of Teviothead and Castleton parishes, Roxburghshire, 9¼ miles SSW of Hawick. It is one of the chain of mountains separating Teviotdale from Liddesdale, and has an altitude of 1996 feet above sea-level.

Cauldhame, a hamlet in Kippen parish (which since 1891 is wholly in Stirlingshire), ½ mile SW of Kippen village.

Cauldhane, a hamlet in St Ninians parish, Stirlingshire, 1 mile from Bannockburn.

Cauldron. See CALDRON.

Cauldshiels, a little loch in the Roxburghshire section of Galashiels parish, on the estate and 1¼ mile SSE of Abbotsford. Lying 780 feet above sea-level, it measures 2¾ furlongs by 1, and is prettily wooded along its northern shore; Washington Irving tells how Scott prided himself upon this little Mediterranean Sea in his dominions—its depths the haunt of a water-bull. Cauldshiels Hill (1176 feet), to the SE, is crowned by an ancient Caledonian fort, which seems to have been connected by a rampart and fosse with the camp on the Eildon Hills, 2¾ miles ENE.

Caulkerbush, a hamlet and a burn in Colvend parish, SE Kirkcudbrightshire. The hamlet lies at the burn's mouth, 8 miles ESE of Dalbeattie; and the burn rises on Clonyard Hill, and runs 2½ miles south-eastward to Southwick Water.

Causea. See COVESEA.

Causewayend, a station near the mutual border of Linlithgowshire and Stirlingshire, on the Slamannan railway, 5¼ miles SW of Borrowstouness.

Causewayend, a hamlet on the S border of Penninghame parish, Wigtownshire, near Bishopburn, 3¼ miles S by E of Newton-Stewart.

Causewayend. See CAULDER, MID.

Causewayhead, a village in Stirling and Logie parishes, Stirlingshire, at the end of Stirling Long Causeway, adjacent to the Stirling and Dunfermline railway, 1¼ mile NNE of Stirling. It has a station on the railway and a post office under Stirling. A paraffin work and a quarry of coarse sandstone are adjacent to the village; and seams of coal are near.

Causewayside, a village on the NW border of Old Monkland parish, Lanarkshire, contiguous to Tollcross.

Cava, a small island of Orphir parish, Orkney, 2 miles S of Houton Head in Pomona. It measures 1 by ¼ mile, and has a ruined chapel.

Cavens, an estate, with a mansion, in Kirkbean parish, SE Kirkcudbrightshire, 13 miles S of Dumfries, and 3 furlongs S of Kirkbean village. Its owner is R. A. Oswald, Esq. (b. 1841; suc. 1871) of AUCHENCRIUIE. The Regent Morton had a castle here, which James VI. visited as a boy.

Cavers, a Teviotdale parish of Roxburghshire, containing, in its northern division, the village of DENHOLM, 5 miles NE of Hawick, and, in its southern division, Shankend station, 7 miles SSE of Hawick. Very irregular in shape, being cut in two by Kirkton parish except for a narrow connecting link to the E, it is bounded NW by Wilton and Minto, E by Bedrule and Hobkirk, S by Castleton, and W by Teviothead, Kirkton, and Hawick. It has an extreme length from NNE to SSW of 13½ miles, a width of from 70 yards to 4 miles, and an area of 18,352½ acres, of which 88½ are water. The TEVIOT, for 5½ miles, roughly traces all the boundary with Wilton and Minto; and RULE Water winds 2 miles northward to it along the Bedrule border; whilst

others of its affluents here are the Hone, and Dean Burns in the northern, and SLURRIG Water in the southern, division of the parish. The surface sinks to less than 300 feet above sea-level in the furthest N, thence rising south-westward to 558 feet near Caversmains, 718 at Caversknowes, 675 at Orchard, 901 at Whitacres Hill, and 988 at White Hill—south-south-westward to 1392 at 'dark RUBERSLAW,' 946 at Hogfield Hill, 1053 at Peat Law, 1034 at Berryfell, 1253 at Burnt Craig, 1216 at Shanken Hill, 1516 at the Pike, 1677 at Maiden Paps, and 1964 at Greatmoor Hill, which, forming part of the Teviotdale and Liddesdale 'divide,' culminates just within Castleton. The rocks are variously eruptive, Silurian, and Devonian; and the soils range from very fertile loam to sterile moor. Dr Chalmers was assistant minister from 1801 to 1803; but the name most closely associated with Cavers is that of the scholar-poet, John Leyden (1775-1811). The low-thatched cottage at Denholm in which he was born is still occupied; but Henlawshiel, at the base of Ruberslaw, whither his father removed in 1776, has been long demolished. Antiquities are four or five prehistoric hill-forts, remains near Ormiston of Cocklaw Castle, and, in the southern division, about 3 miles of the CATRAIL; whilst a crag towards the summit of Ruberslaw is pointed out as 'Peden's Pulpit.' Cavers House, a little SE of the parish church, on the site of a castle inhabited by the Baliols in the 12th and 13th centuries, is a large rectangular pile, baronial in aspect, with walls of great thickness and small old-fashioned windows. Its oldest portion, a square tower, was built by Sir Archibald Douglas, younger son of that valiant Earl of Douglas who conquered and fell at Otterburn (1388), and whose banner is here preserved along with the trophy won from Harry Hotspur. Sir Archibald's descendants were hereditary Sheriffs of Teviotdale, and also sometimes Wardens of the Marches, down to 1745; with the twentieth of them, Jas. Douglas, Esq. of Cavers (1822-78), the male line became extinct. Thereupon the estate—9840 acres, valued at £7937 per annum—passed to his niece, Miss Mary Malcolm, who in 1879 married Capt. Edward Palmer. Other mansions are Orchard, Ormiston House, and STROBS Castle, which stand respectively 2½ miles E by N, 2½ E by S, and 4½ S, of Hawick; and 4 proprietors hold each an annual value of £500 and upwards, 7 of between £100 and £500, 1 of from £50 to £100, and 8 of from £20 to £50. Cavers is in the presbytery of Jedburgh and synod of Merse and Teviotdale; the living is worth £324. The old parish church, ¼ mile NNE of Cavers House, is a long plain building, with traces of Norman and First Pointed work; young Leyden made it his week-day study, and played in it some most unholy pranks. A little to the westward, and 2½ miles ENE of Hawick, is the present church, erected in 1822, and containing 500 sittings. Denholm has also a Free church (364 sittings); and under the Cavers and Kirkton school-board, three public schools—Cogsmill, Denholm, and Kirkton—with respective accommodation for 100, 219, and 135 children, had (1891) an average attendance of 69, 142, and 52, and grants of £85, 11s., £150, 16s. 6d., and £52, 10s. 6d. Valuation £16,149, 2s. 1d., including £2296 for the railway. Pop. (1801) 1382, (1831) 1625, (1861) 1824, (1871) 1443, (1881) 1318, (1891) 1211; of registration district (1891) 707.—*Ord. Sur.*, sh. 17, 1864. See the Memoir by Thomas Brown, prefixed to the centenary edition of Leyden's *Scenes of Infancy and other Poems*.

Cavers-Carre. See BOWDEN.

Caverton Mill, a hamlet in Eckford parish, NE Roxburghshire, on the right bank of Kale Water, 4½ miles SSE of Kelso. It was twice burned by the English, in 1544 and 1553; and it now has a public school. The barony of Caverton belonged anciently to the Soulises.

Cawdor, a village in Nairnshire, and a parish formerly partly also in Inverness-shire. The village stands on Cawdor Burn, near its influx to the river Nairn, 5½ miles SW by S of Nairn town, under which it has a post office. At it is a good inn.

In 1891 the Inverness-shire portion of the parish,

while remaining part of Cawdor, was transferred by the Boundary Commissioners to the county of Nairn; and a detached part of the parish bounded by the parishes of Auldearn and Nairn was transferred to the parish of Nairn; while the Nairnshire portion of Moy and Dalarossie parish was transferred to Cawdor. The parish varies in width from E to W between 1¼ and 5½ miles; its greatest length from N to S is 9½ miles, exclusive of a SSE wing 5¼ miles long beyond the Findhorn. The river NAIRN runs 5 miles north-eastward along or near the Croy and Dalcross border, and the northward-flowing Allt Dearg and Riereach Burns unite at the village to form its short affluent, the Cawdor Burn; whilst the FINDHORN winds 2¾ miles through the SE corner of the parish. The surface sinks to less than 80 feet above sea-level in the furthest N, thence rising southward to 328 feet near Whinhill, 564 near Riereach, 698 near Clunas, 1000 in Cairn Maol, 1180 in Creag an Daimh, 1314 in *Carn a Chrasgie, 1380 in *Carn Sgumain, and 2013 in *Carn nan tri-tighcarnan, where asterisks mark those summits that culminate on the boundary; beyond the Findhorn are Carn a' Gharb ghlaic (1523 feet), *Carn an t-Seanliathanaich (2706), and *Carn Glas (2162). To the breadth of about 1 mile along Nairn river extends a cultivated plain, for some distance from which the hill-slopes are either under tillage or covered with fine plantations; and all thence onward to the south-eastern boundary is a wide expanse of brown and barren heath. The arable and planted portions occupy little more than one-sixth of the entire area; the remainder is pasture or moor. Devonian rocks prevail on the lower grounds; grey gneiss, much shattered and contorted by veins of granite, predominates over the uplands; and the two kinds of rock make a junction in the bed of Cawdor Burn. The soil of the plain is mostly an alluvial loam, resting on a substratum of sand and gravel, and rarely of great fertility; elsewhere the soil is generally moorish and poor. Near the Allt Dearg are remains of a vitrified fort and of St Barevan's church; but the chief artificial object—and one of high interest—is Cawdor Castle, perched on the rocky brow of Cawdor Burn, amid magnificent oaks and other venerable trees. The Calders of Calder were said to be descended from a brother of Macbeth, to whom, on his assumption of the crown, he resigned the thanedom of Calder. They were constables of the king's house, and resided in the castle of Nairn, but had a country seat at what is called Old Calder, ½ mile N of the present seat. They received a licence in 1454 to build the Tower of Calder, the nucleus of the present castle; and they ended, in 1498, in a young heiress, Muriella Calder. In 1499 she, still a child, was walking with her nurse near the Tower of Calder, when she was captured by a party of 60 Campbells. Her uncles pursued and overtook the division to whose care she had been entrusted, and would have rescued her but for the presence of mind of Campbell of Innerliver, who, seeing their approach, inverted a large camp-kettle as if to conceal her, and, bidding his seven sons defend it to the death, hurried on with his prize. The young men all were slain, and when the Calders lifted up the kettle no Muriella was there. Meanwhile so much time had been gained, that further pursuit was useless. The nurse, at the moment the child was seized, bit off a joint of her little finger in order to mark her identity—no needless precaution, as appears from Campbell of Anchinbreck's answer to the question, What was to be done should the child die before she came of marriageable age? 'She can never die,' said he, 'as long as a red-haired lassie can be found on either side of Loch Awe.' In 1510 she married Sir John Campbell, third son of the second Earl of Argyll; and from them are descended in a direct line the Campbells of Calder, created Baron Cawdor in 1796 and Earl Cawdor of Castlemartin in 1827. The present and second Earl, Jn. Fred. Vaughan Campbell (b. 1817; suc. 1860), holds 46,176 acres in the shire, valued at £7882, 12s. The Tower of Calder, after coming into the possession of the Campbells, received great additions, and took the name of Cawdor Castle. It was formerly a place of

vast strength. Legend throws over it much mystery and romance, one tradition making it the hiding-place of Lord Lovat after Culloden. 'The whole of Cawdor Castle,' to quote Mr Fraser Tytler, 'is peculiarly calculated to impress the mind with a retrospect of past ages, feudal customs, and deeds of darkness. Its iron-grated doors, its ancient tapestry, hanging loosely over secret doors and hidden passages, its winding staircases, its rattling drawbridge, all conspire to excite the most gloomy imagery in the mind. Among its intricacies must be mentioned the secret apartment which concealed Lord Lovat from the sight of his pursuers. It is placed immediately beneath the rafters of the roof. By means of a ladder you are conducted by the side of one part of a sloping roof into a kind of channel between two, such as frequently serves to convey rain-water into pipes for a reservoir. Proceeding along this channel, you arrive at the foot of a stone staircase, which leads up one side of the roof to the right, and is so artfully contrived as to appear a part of the ornaments of the building when beheld at a distance. At the end of this staircase is a room with a single window near the floor. A remarkable tradition respecting the foundation of this castle is worth notice, because circumstances still remain which plead strongly for its truth. It is said the original proprietor was directed by a dream to load an ass with gold, turn it loose, and, following its footsteps, build a castle wherever the ass rested. In an age when dreams were considered as the immediate oracles of heaven, and their suggestions implicitly attended to, it is natural to suppose the ass—as tradition relates—received its burden and its liberty. After strolling about from one thistle to another, it arrived at last beneath the branches of a hawthorn tree, where, fatigued with the weight upon its back, it knelt down to rest. The space round the tree was cleared for building, the foundation laid, and a tower erected: but the tree was preserved, and remains at this moment a singular memorial of superstition attended by advantage. The situation of the castle accidentally proved the most favourable that could be chosen; the country round it is fertile, productive of trees, in a wholesome spot; and a river, with clear and rapid current, flows beneath its walls. The trunk of the tree, with the knotty protuberances of its branches, is still shown in a vaulted apartment at the bottom of the principal tower. Its roots branch out beneath the floor, and its top penetrates through the vaulted arch of stone above, in such a manner as to make it appear, beyond dispute, that the tree stood, as it stands to-day, before the tower was erected. For ages it has been a custom for guests in the family to assemble round it, and drink, "Success to the hawthorn;" that is to say, in other words, "Prosperity to the house of Cawdor!" What is known as the chain armour of King Duncan is preserved at Cawdor Castle, which is one of three places assigned by tradition as the scene of that monarch's murder in 1040 by Macbeth, Mormaer of Moray. Admission to the Castle may be had by ticket, procurable at the inn. Earl Cawdor owns six-sevenths of the parish, the rest belonging to Rose of Holme Rose. Cawdor is in the presbytery of Nairn and synod of Moray; the living is worth £182. The church, erected in 1619, and enlarged in 1830, contains 638 sittings, and is an interesting building, with a curious lych-gate and some old inscriptions. There is also a Free church; and three public schools—Barivan, Cawdor, and Clunas—with respective accommodation for 37, 155, and 48 children, had (1891) an average attendance of 33, 104, and 41, and grants of £35, 17s., £84, 10s. 6d., and £48, 14s. 6d. Pop. (1801) 1179, (1831) 1184, (1861) 1203, (1871) 1027, (1881) 1070, (1891) 1026.—*Ord. Sur.*, sh. 84, 1876. See *The Book of the Thanes of Cawdor; A series of Papers selected from the Charter-room at Cawdor*, edited for the Spalding Club by Cosmo Innes.

Cawpla or **Caplaw**, a hill in the W of Neilston parish, and a lake on the mutual border of Neilston and Abbey parishes, Renfrewshire. The hill flanks the E side of the lake, 2½ miles WNW of Neilston village,

and has an altitude of 652 feet above sea-level; the lake is a dam on Patrick Water, and, measuring ½ mile by ¾ furlong, is larger in winter than in summer.

Cayle. See **KALE**.

Ceannabeinne. See **DURNESS**.

Ceannard or **Kennard**, a loch in Dull parish, central Perthshire, 3¼ miles SSE of Grantully Castle. Lying 1400 feet above sea-level, it is 5½ furlongs long and from 1 to 3 furlongs broad; its water abounds with small trout. Loch Ceannard Lodge stands on its northern shore.

Ceanmhor, a tarn in Crathie and Braemar parish, SW Aberdeenshire, 1½ mile S of the head of Loch Callader. Lying 2196 feet above sea-level, it measures 1¼ by ¾ furlong, and seems to be the 'Loch Canter, very wild and dark,' of the Queen's *Journal*.

Ceathramgarbh, a division of Eddrachillis parish, Sutherland, between Lochs Laxford and Inchard. The name signifies 'the rough section of a country,' and is truly descriptive.

Cellardyke or **Nether Kilrenny**, a fishing village in Kilrenny parish, SE Fife, forming an eastward extension of ANSTRUTHER-EASTER, but united as a royal burgh to KILRENNY. At it are the new Anstruther harbour, a branch of the National Bank, a *quoad sacra* church, a Free Church hall (1870), a cod-liver oil works, fishing-gear factories, and a saw-mill. A public and an infant school, with respective accommodation for 225 and 238 children, had (1891) an average attendance of 224 and 173, and grants of £245, 16s. and £142, 17s. Pop. of *q. s.* parish, (1891) 1662. See *Geo. Gourlay's Fisher Life; or, the Memorials of Cellardyke*.

Ceres, a small town and a parish of E central Fife. The town, standing on the left bank of Ceres Burn, 2½ miles SE of Cupar station, was originally called *Cyrus* or *Seres*, after St Cyr, its patron saint in pre-Reformation times. It consists of the town proper and the north-western suburb of Bridgend, the former old, the latter modern; and comprises several streets, some good houses, and a neatly-kept green. Over its ancient narrow bridge the men of Ceres marched, according to tradition, to join Robert Bruce's army on the eve of Bannockburn; over it, too, Archbishop Sharp drove, in his lumbering coach, to meet his murderers on Magus Muir. A burgh of barony, under the Hopes of Craighall, Ceres carries on considerable industry in several departments of the brown linen trade, and has a post office under Cupar-Fife, with money order, savings bank, insurance, and telegraph departments, gas-works, an infirmary, and a horticultural society, and fairs on the 24 June and 20 Oct.; if Saturday, Sunday, or Monday, then Tuesday following. The parish church, rebuilt in 1806 on an eminence in the middle of the town, has a square castellated tower, and contains 1100 sittings; adjoining it is the small tiled mausoleum—a transept of the former old church—in which lie several illustrious members of the Crawford-Lindsay family. There are also a Free church, and 2 U.P. churches. Ceres is to have a station on the branch of the proposed East Fife Central Railway which is to run from Leven to Dairsie on the main line. Pop. (1891) 688.

The parish contains also the villages of Craighrothie, Chance Inn, Baldinnie, and Pitscottie, which stand respectively 1½ mile WSW, 2 miles WSW, 2 E, and 1½ mile NE, of Ceres town. Irregular in outline, it is bounded N by Kemback and St Andrews, E by Cameron, SE by Kilconquhar, S by Largo, SW by Kettle, W by Cults, and NW by Cupar. Its greatest length from NE to SW is 6 miles; its breadth varies from ¼ mile to 3¾ miles; and its area is 10,075½ acres, of which nearly ½ acre is water. The Eden flows 2 miles along the north-western boundary; and its affluent, Ceres Burn, formed just above the town by Craighrothie, Class How, Craighall, and two lesser burns, flows 2 miles north-eastward into Kemback parish, and thence 9 furlongs northward through DURA DEN. The surface is pleasantly diversified, here rising to 500, there sinking to 100, feet above sea-level; Walton Hill (622 feet) is the highest point in the parish. The rocks are partly eruptive, partly carboniferous; and basaltic columns form a

range or cliff, extending $\frac{1}{2}$ mile N and S on Newbigging farm. Trap rock has been largely quarried, both for building and for road-metal; sandstone abounds in the N; and limestone and coal are found in the S. The soil, near the town, is a friable earth, incumbent upon gravel; along the Eden is light and sandy; and elsewhere is partly reclaimed moss or moor, but mostly a deep cold earth, incumbent variously on trap, limestone, and tilly clay. About two-fifths of the entire area are in tillage, one-half being in grass, and one-tenth under plantations or waste. Craighall Castle, Struthers House, and Scotstarvet Tower are the chief antiquities, and will be separately noticed. Natives or residents were Rt. Lindsay of Pitscottie, a 16th century historian, and Sir John Scott of Scotstarvet (1585-1670), author of *The Staggering State of Scots Statesmen*; among the ministers were Thomas Buchanan, cousin of the more famous George, and Thos. Halyburton (1674-1712), divinity professor at St Andrews. Teases House and Edenwood are good modern mansions, the former commanding a brilliant view of the Firth of Forth; and 8 proprietors hold each an annual value of £500 and upwards, 18 of between £100 and £500, 12 of from £50 to £100, and 19 of from £20 to £50. Ceres is in the presbytery of Cupar and synod of Fife; the living is worth £234. Three public schools—Bridgend Infant, Ceres, and Craighothie—with respective accommodation for 72, 179, and 108 children, had (1891) an average attendance of 41, 133, and 66, and grants of £28, 15s. 6d., £139, 12s. 6d., and £49, 4s. Valuation (1891) £12,834, 3s. 11d. Pop. (1801) 2352, (1841) 2944, (1861) 2723, (1871) 2381, (1881) 2063, (1891) 1677.—*Ord. Sur.*, shs. 40, 41, 1857-67.

Cessford, a hamlet of Eckford parish, NE Roxburghshire, 6 miles ENE of Jedburgh, and 3 WSW of Morebattle. It stands on the right bank of Cessford Burn which, rising in Oxnam parish, runs $4\frac{1}{2}$ miles north-by-eastward to Kale Water. Cessford Castle, $\frac{1}{4}$ mile NE of the hamlet, was the seat from 1446 or thereabouts of the Kers of Cessford, ancestors of the Duke of Roxburgh, and gives to the Duke the title of Baron Ker of Cessford (1616), and of Marquess of Cessford (1707). A place of great military importance, the centre of many a martial enterprise, it was besieged in 1545 by the Earl of Surrey, who said that 'it might never have been taken had the assailed been able to go on defending.' It was protected by a moat and an outer and an inner wall, and is now represented by the roofless ruin of its keep, 67 feet long, 60 broad, and 65 high, with walls 12 feet in thickness, and with a dismal dungeon of remarkable character, and a subterranean vault. An ash is still pointed out as the 'Jeddart justice' tree; and a large artificial cavern, called Hobbie Ker's Cave, is in a steep bank by the burn, $\frac{1}{2}$ mile N of the castle, and might be often passed and repassed without being observed.

Cessnock, a small river of the NE of Kyle district, Ayrshire. It rises on Auchmannoch Muir, at 980 feet above sea-level, near the Lanarkshire boundary, and 1 mile SW of Distinkhorn Hill; and running 5 miles south-westward through Sorn and Mauchline parishes, to within a mile of Mauchline town, goes thence about 9 miles north-north-westward, partly through Mauchline parish, partly along the boundary between Galston on the right and Craigie and Riccarton on the left; and falls into Irvine Water at a point $2\frac{1}{2}$ miles E by S of Kilmarnock. Its winding course is varied and picturesque, and its waters afford good trout fishing, but are not open to the public. On its banks dwelt the lassie with sparkling roguish een of Burns's song. Cessnock Castle, an ancient tower, the property of the Duke of Portland, stands in the parish and $1\frac{1}{2}$ mile SE of the town of Galston.—*Ord. Sur.*, shs. 22, 14, 1865-63.

Chalmera. See GLASGOW.

Chalum, Loch. See CALHAM.

Champfleurie, an estate, with a mansion, in the parish and $2\frac{1}{2}$ miles E by S of the town of Linlithgow. Its owner, Rt. Hathorn Johnston-Stewart, Esq. (b. 1824; suc. 1842), owns 2036 acres in the shire, valued at £3884 per annum. See also GLASGOW and PHYSIOLOG.

Chance Inn, a hamlet in Inverkeilor parish. Forfar.

shire, near the coast, 6 miles N by W of Arbroath. It has a post office, with money order, savings' bank, and telegraph departments. See also CERES.

Chanlock, a burn of Penpont parish, NW Dumfriesshire. Rising at 1500 feet above sea-level, 3 miles ESE of the meeting-point of Dumfries, Kirkcudbright, and Ayr shires, it runs 6 miles east-by-southward, and falls into Scar Water, 5 miles NW of Penpont village.

Channelkirk, a Lauderdale parish in the extreme NW of Berwickshire, containing the hamlets of Old and New Channelkirk. The former, adjacent to the parish church, $8\frac{1}{2}$ miles ESE of Tynehead station, and 6 NNW of Lauder, is merely the remnant of an ancient village: the latter lies 5 furlongs N of the church.

The parish contains also the village of Oxtou, $4\frac{1}{2}$ miles NNW of Lauder, under which it has a post office. It is bounded E and SE by Lauder, SW and W by Stow in Edinburghshire, NW by Fala-Soutra and Humberie in Haddingtonshire. Its greatest length, from N to S, is $6\frac{1}{2}$ miles; its greatest breadth, from E to W, is 5 miles; and its area is 14,202 $\frac{1}{2}$ acres, of which 12 are water. Armet Water, on its way to the Gala, flows all along the north-western and western boundary; the eastern is traced by Kelphope Burn, one of several head-streams of LEADER Water, by which this parish is principally drained. The surface in the SE sinks to 630 feet above sea-level, thence rising west-south-westward to Collie Law (1255 feet), north-westward to Clints Hill (1535), Turf Law (1248), and Dun Law (1292), north-north-westward to Headshaw Law (1349), Carfrae Common (1373), and Ninecairn Edge (1479) at the NE corner of the parish,—these heights belonging to the western portion of the Lammermuirs. The rocks are chiefly Silurian, and are quarried both for building and for road-metal. The soils are variously sandy, gravelly, peaty, and moorish; about 3000 acres are in tillage. Four proprietors hold an annual value of more and 4 of less than £500. On the hills are two prehistoric camps, one in the S, the other a little W of the church, and near the second is a fine spring, the Well of the Holy Water Cleugh. Here, about A.D. 636, according to the Irish Life of St Cuthbert, he was placed as a boy under the care of a religious man, whilst his mother went on pilgrimage to Rome; and here was afterwards built in his honour the church of 'Childeschirche' (the ancient name of Channelkirk), which church was held by Dryburgh Abbey. Now the parish is in the presbytery of Earlstoun and synod of Merse and Teviotdale; the living is worth £273. The church, rebuilt in 1817, contains 300 sittings; and a public school, with accommodation for 154 children, had (1891) an average attendance of 114, and a grant of £106, 9s. 6d. Valuation £8523, 16s. 11d. Pop. (1801) 640, (1831) 841, (1861) 671, (1891) 545.—*Ord. Sur.*, shs. 25, 33, 1863-65.

Chanonry, a town and the seat of a presbytery in Rosemarkie parish, Ross-shire, on the Moray Firth, at the E side of the Black Isle peninsula, $\frac{1}{2}$ mile SW of Rosemarkie town, and $10\frac{1}{2}$ NNE of Inverness. It commands an extensive view of the waters and shores of the Moray Firth; adjoins a tongue of land, called Chanonry Point, projecting into the Firth to within 7 furlongs of Fort George on the opposite shore; and took its name from being the Canonry of Ross and the residence of the bishop. Constituted a royal burgh by Alexander II., it became united in burgh privileges with Rosemarkie town, under the common name of Fortrose, by charter of James II. in 1455; and now, except for being the seat of a presbytery, is known only as a constituent part of Fortrose. A chief feature in it is the remnant of its ancient cathedral, but that and other matters connected with it will be noticed in our article on FORTROSE. A lighthouse on Chanonry Point was built in 1846 at a cost of £3571, and shows a fixed light, visible at the distance of 11 nautical miles. The presbytery of Chanonry comprehends the *quoad civitatem* parishes of Rosemarkie, Avoch, Cromarty, Killearnan, Resolis, and Knockbain, the *quoad sacra* parish of Fortrose, and the Gaelic church of Cromarty; is in the synod of Ross; and meets at Chanonry on the last Tuesday of March, the

first Tuesday of May and of October, and the last Tuesday of November. Pop. (1871) 10,403, (1891) 9125, of whom 304 were communicants of the Church of Scotland. The Free Church also has a presbytery of Chanonry, with congregations at Fortrose, Avoch, Cromarty, Killearnan, two at Knockbain, and Resolis, which together had 2741 members and adherents in 1891.

Chapel. See ABBOTSHALL.

Chapel and Stirling Bridge, a village in Cambusnethan parish, Lanarkshire. Pop. (1891) 503.

Chapel, a small village in the W of Newtyle parish, Forfarshire.

Chapel, a mansion in the parish and 1 mile of the village of Kettle, central Fife. It was the birthplace in 1794 of the eminent surgeon Jas. Moncrieff Arnott, F.R.S.

Chapel, a farm in Moffat parish, Dumfriesshire, on the hill fronting Moffat Townhead. A ruined chapel, adjoining the dwelling-house, was erected by the Knights Templars, and is in the Transition style from Early English to Decorated, being chiefly represented now by the E and W gables. Traces of the foundations of other ancient buildings, probably the residence of some of the Knights Templars, are in the vicinity. Considerable landed property was annexed to the chapel, and passed to successively the Frenches of Frenchland, Grierson of Lag, and the Annandale family.

Chapel or Chappell, a village in Neilston parish, Renfrewshire, one of the numerous seats of industry between Neilston village and Barrhead.

Chapelden. See ABERDUR, Aberdeenshire.

Chapel-Donan. See GRYVAN.

Chapelgill. See BROUGHTON, Peebleshire.

Chapel Green, a hamlet in the W of Kilsyth parish, Stirlingshire. An ancient chapel stood at it, and in a neighbouring tumulus an urn was found. It now has a public school; and a former schoolmaster here was the minor poet, John Kennedy (1789-1833).

Chapelhall, a large village in the NE of Bothwell parish, Lanarkshire, near the left bank of North Calder Water, 2 miles NNE of Holytown, and 2½ SE of Airdrie, under which it has a post office. Chiefly dependent on the iron-works and collieries of the Calderbank Company, it is of recent origin, and consists of well-built houses, nearly one-half of them the property of operatives; at it are a Free church, St Aloysius Roman Catholic church (1894), and a public and a Roman Catholic school, which, with respective accommodation for 370 and 225 children, had (1891) an average attendance of 211 and 148, and grants of £197, 2s. 6d. and £137, 13s. Pop. (1841) 1431, (1861) 1990, (1871) 1707, (1881) 1829, (1891) 1880.

Chapelhill, a hamlet in Monzie parish, Perthshire, near the left bank of the Almond, 6 miles NNW of Methven Junction. A ruined ancient chapel at it was restored in 1834 to serve as a chapel of ease, and is now the *quoad sacra* parish church of LOGHEALMOND.

Chapelhill, an eminence in Old Kilpatrick parish, Dumbartonshire, adjacent to the Glasgow and Helensburgh railway, the Forth and Clyde Canal, and the river Clyde, ¼ mile W of Old Kilpatrick village. The site of the western terminal forts of Antoninus' Wall, it yielded in 1693 two Roman monumental tablets, which are preserved in the Glasgow University Museum; and Roman vases, coins, and other relics have also been found at it.

Chapelhope, a burn and a farm in the NW of Ettrick parish, Selkirkshire. The burn rises close to the Peebleshire border in the two head-streams of North and South Grain, which nearly encompass Middle Hill (1740 feet); and, from their confluence, runs 1¼ mile E by N to the head of the Loch of the Lowes. The farm, 20 miles WSW of Selkirk, lies to the N of the burn, and contains, 3 furlongs from the loch, moss-covered foundations of an ancient chapel, with vestiges of rows of graves. Chapelhope is the chief scene of Hogg's tale of 'The Brownie of BODESBECK'; and it gave shelter to large numbers of the persecuted Covenanters.

Chapelknowe. See MELROSE.

Chapelknowe, a hamlet in Half-Morton parish, Dumfriesshire, 1 mile E of the English border, and 6 miles

WSW of Canonbie, under which it has a post office. A U.P. church at it was built in 1822, and contains 244 sittings.

Chapel of Garioch, a village and a Donside parish in Garioch district, Aberdeenshire. The village stands near the centre of the parish, 1¼ mile SSW of Pitcaule station, this being 5 miles NW of Inverurie, and 21¼ NW of Aberdeen.

The parish, containing also Pitcaule village, which has a post and railway telegraph office, is bounded NW and N by Rayne, NE by Daviot, E by Bourtie, Keithhall and Inverurie, SE by Kemnay, SW by Monymusk, and W by Oyna. Irregular in outline, it has an utmost length of 8½ miles from NNE to SSW, viz., from Wartle station to Blairdaff; its breadth from E to W varies between 6½ furlongs and 4¾ miles; and its land area is 13,059 acres. The DON flows 3½ miles north-north-eastward along the Kemnay border; and its affluent, the URY, winds 7¼ miles east-south-eastward through the interior and along the boundary with Inverurie, in all its course being closely followed by the Great North of Scotland railway, which here, at Inveramsay, sends off a branch line to Banff. The Mither Tap of BENNOCHIE (1698 feet) lies barely 1 mile from the western border; but within Chapel Garioch itself the surface nowhere exceeds 700, or sinks below 170, feet above sea-level, attaining 324 feet on Balhaggardy, 364 near Letherty, 536 near Knockallochie, 546 by the church, 682 near Backhill, and 647 near Mains of Afforsk—low rounded hills or long flattish ridges which are all either planted or in tillage. The rocks are principally greenstone and granite, and limestone was for some time worked on the estate of Pittodrie. The soil on the banks of the rivers is generally a mixture of strong gravel and vegetable mould, and ranges elsewhere from a rich black loam to thin gravelly soil and poor stony clay. Above two-thirds of the entire area are either regularly or occasionally in tillage, and nearly all the remainder is planted with larches, Scotch firs, and hardwood trees. Antiquities are BALGQHAIN Castle; a circular camp on the Ury, opposite Pitcaule Castle; and the Maiden Stone, ½ mile W of the church, which, 10 feet high, 3 broad, and 10 inches thick, is inscribed with curious hieroglyphics, and is figured in *The Sculptured Stones of Scotland*. The momentous battle of HARLAW (1411) was fought in Chapel of Garioch, a native of which was Alex. Gerard, D.D. (1728-95), the eminent divine. The principal mansions are Pitcaule Castle, Fetternear, Logie, and Pittodrie; and 9 proprietors hold each an annual value of £500 and upwards, 3 of between £100 and £500, and 3 of from £20 to £50. Formed early in the 17th century by the union of Logie Durno, Fetternear, and Chapel, this parish is in the presbytery of Garioch and synod of Aberdeen; the living is worth £298. The parish church, at the village, was built in 1813, and contains 722 sittings. There are also a chapel of ease at BLAIRDAFF, and Free churches of Blairdaff and Chapel of Garioch. Three public schools—Chapel, Fetternear Madras, and Logie Durno—with respective accommodation for 116, 141, and 141 children, had (1891) an average attendance of 97, 114, and 100, and grants of £89, 18s. 6d., £120, 9s. 5d., and £86, 8s. Valuation, £13,181, 7s. 1d. Pop. (1801) 1224, (1851) 2102, (1871) 1928, (1881) 1923, (1891) 1690.—*Ord. Sur.*, sh. 76, 1874.

Chapel Park. See AYR.

Chapel Rome. See BROOMHILL.

Chapelshade. See DUNDEE.

Chapelton, a village in Glassford parish, Lanarkshire, 2½ miles NNW of Strathaven, and 5½ SSW of Hamilton, under which it has a post office. At it are gas-works, an Established church, a Free church, and a public school. In 1875 it, with the district around, was erected into a *quoad sacra* parish in the presbytery of Hamilton and synod of Glasgow and Ay. Pop. of village (1841) 367, (1861) 634, (1881) 443, (1891) 365; of *q. s.* parish (1891) 772.—*Ord. Sur.*, sh. 23, 1865.

Chapelton, a hamlet in the Glenlivet section of Inveraven parish, Banffshire, 13¼ miles SSE of Ballin-

dalloch, under which it has a post office. St Mary's Roman Catholic church here was built in 1829, and contains 360 sittings, whilst a school attached to it, with accommodation for 195 children, had (1891) an average attendance of 87, and a grant of £84, 8s.

Chapelton, a hamlet in Inverkeilor parish, Forfarshire, 4½ miles NNW of Arbroath. At it are a public school and remains of an ancient chapel, long used as the burying-place of the family of Boysack.

Chapelton. See **BORGUE**.

Charleston, a village in Rathen parish, Aberdeenshire.

Charleston, a village in Pitsligo parish, Aberdeenshire.

Charleston, a village in Kilmuir-Wester parish, SE Ross-shire, on Beaully Firth, 2½ miles NW of Inverness.

Charleston, a village in Glamis parish, SW Forfarshire, at the foot of the Glen of Ogilvie, 2½ miles S by E of Glamis station. It was founded in 1833, and built on 3 acres, feued at £24.

Charleston. See **PAISLEY**.

Charlestown, a seaport village in Dunfermline parish, Fife, on the Firth of Forth, at the terminus of the Charlestown railway, ¼ mile W by N of Limekilns, 4 miles SSW of Dunfermline, and 14 WNW of Leith by water. Founded in 1761 by the Earl of Elgin, whose seat of **BROOMHALL** stands ⅓ mile to the E, it was designed, and has well served the design, to be the commercial outlet for lime, limestone, ironstone, and coal from the Elgin estate. It has such close connection with Limekilns, and with the extensive lime-works there, as to be practically one with them; and it was early connected, by a private railway, 5 miles long, with the Earl of Elgin's collieries. It is a regularly aligned and well-built place, with a square enclosing a bleaching-green, and with rows of cottages some distance apart, and each provided with a good-sized garden; at it are a post office under Dunfermline, with money order, savings bank, insurance, and telegraph departments, a steam saw-mill, an iron foundry, salt-works, and a harbour. The railway from it curves northward to the north-western vicinity of Dunfermline, there joining with the Stirling and Dunfermline railway and with the West of Fife Mineral railway; it was purchased in 1859 by the North British Railway Company; and in 1894 was opened for passenger traffic as far as Dunfermline. Certain improvements on the harbour were made concurrently with other improvements on the railway. Having been formed by the Earl of Elgin it is now the property of the North British Railway Company, and has good accommodation for loading and unloading vessels. A public school, with accommodation for 215 children, had (1891) an average attendance of 127, and a grant of £112, 4s. Pop. (1841) 772, (1861) 701, (1871) 749, (1881) 632, (1891) 673.—*Ord. Sur.*, sh. 32, 1857.

Charlestown. See **ABERLOUR** and **ABOYNE**.

Charleton, an estate, with a mansion, in Kilconquhar parish, E Fife, 1 mile WNW of Colinsburgh. Its owner, Jn. Anstruther-Thomson, Esq. (b. 1819; suc. 1833), holds 4034 acres in the shire, valued at £7506 per annum.

Charlotte, Fort. See **LERWICK**.

Charlotte, Port. See **PORT CHARLOTTE**.

Charnac or **Chuinneag**, a small loch in the NW of Rosskeen parish, NE Ross-shire, 7½ miles WSW of Kincardine. Lying 1500 feet above sea-level, it measures 2½ furlongs by 1.

Charterhall, an estate, with a good modern mansion, in Fogo parish, Berwickshire, 3 miles ENE of Greenlaw station. The property of the Trotters for upwards of four centuries, it is now held by Lieut.-Col. Hy. Trotter of Mortonhall (b. 1844; suc. 1874), who owns 6780 acres in the shire, valued at £12,703 per annum.

Charters or **Chesters**. See **SOUTHDEAN**.

Charters-Chest, a recess in the steep slope of Craig Cluny, in Braemar, Aberdeenshire, on the S side of the Dec, 1½ mile E of Castleton. It got its name from its being the depository of the Invercauld title-deeds during the rebellion of 1715.

Chatelherault, a summer-house of the Duke of Hamilton, in Hamilton parish, Lanarkshire, on an eminence in the ravine of the river Avon, opposite Cadzow Castle. Built in 1730 after designs by the elder Adam, it takes its name from the French dukedom of Chatelherault in Poitou, conferred in 1550, with the town and palace thereof, and with a yearly revenue of 30,000 livres, on the regent, James Hamilton, second Earl of Arran. It is partly occupied by the Duke's head gamekeeper; its walls are adorned with beautiful wood-carving and moulding in the style of Louis XIV.; and it displays a fantastic front, with four square turrets all in a line, and with florid pinnacles.

Cheese Bay, a natural harbour on the NE of North Uist island, Outer Hebrides, Inverness-shire.

Cheese Well. See **MINCHMOOR**.

Cherrybank, a village in Perth East Church parish, Perthshire, 1½ mile from Perth. It has a post office under Perth, and a public school.

Chesters House. See **ANCRUM**.

Chesters. See **SOUTHDEAN**.

Chesthill, an estate, with a mansion, in Fortingal parish, Perthshire, on the left bank of the Lyon, 12 miles W by S of Aberfeldy. Its owner, J. B. Stewart-Menzies, Esq., holds 16,117 acres in the shire, valued at £2724 per annum.

Cheviots, a broad range of lofty hills, extending from Cheviot Hill, 25 miles south-westward along the English Border, to Peel Fell, whence another range—included sometimes in the general name of Cheviots—strikes westward to the Lowthers, parting Liddesdale and Eskdale from Teviotdale. Cheviot itself (2676 feet), the highest summit of the range, belongs to England, lying fully a mile within Northumberland, 7 miles SW of Wooler; but Auchopecairn (2422 feet), Windygate Hill (2034), Hungry Law (1645), Carter Fell (1899), and Peel Fell (1964), may be called 'debatable points,' as they culminate exactly on the Border. The outlines of the hills are for the most part rounded; often they stand skirt to skirt, or shoulder to shoulder, like clustering cones. The principal pass is that of **CARTER BAR**. The prevailing rock is porphyritic trap, and the soil, over great part of the surface, bears a rich green-sward, excellent for sheep pasture. The highest portions, to a great extent, are heath; and considerable tracts, on the slopes or in the hollows, are bog. The chief streams on the Scottish side are the Hermitage and the Liddel, going towards the Solway Firth; the Teviot and the Beaumont going towards the Tweed. The golden eagle is now no longer seen; gone is the 'great plenty of redd dere and roe bucks,' mentioned in Leland's *Itinerary*; but grouse are fairly abundant, and the famous white-faced breeds of Cheviot sheep is pastured in large flocks. Many are the Cheviots' records of invasions, of reivers' raids, and of smuggling frays; but these will be noticed under the parishes of Yetholm, Morebattle, Hounam, Jedburgh, Southdean, and Castleton.—*Ord. Sur.*, shs. 18, 17, 1863-64.

Chicken Head (Gael. *Ceann na Cìre*), a headland (211 feet) in Stornoway parish, Lewis, Ross-shire, at the southern extremity of the Aird, flanking the E side of the entrance of Loch Stornoway.

Chirnside, a village and a parish of E Berwickshire. The village is 5 miles WSW of Ayton and 1 mile E by S of Chirnside station, on the Berwickshire branch (1863) of the North British, this being 26¾ miles NE of St Boswells, 4¾ NE of Duns, 4 SSW of Reston Junction, and 50½ ESE of Edinburgh. It consists of two streets, straggling for nearly a mile along the brow of Chirnside Hill, and commands a wide prospect, from the sea to the Cheviots and the heights of Teviotdale; but it lies withal somewhat exposed. At it are a post office, with money order, savings bank, insurance, and telegraph departments, a branch of the Commercial Bank, an inn, gas and water works, a reading room and library, the parish church (rebuilt 1878), a Free, a U.P., and an Episcopal church. In the patronage formerly of the Collegiate church of Dunbar, the old parish church was a venerable structure, with a Norman W

doorway. A fair, of trifling importance, falls on the last Thursday of November. Pop. (1861) 901, (1871) 852, (1881) 939, (1891) 854.

The parish, containing also the hamlet of Edington, 2 miles E by S, is bounded N by Coldingham, E by Ayton and Foulden, S by Hutton and Edrom, and W by Bunkle. It has an utmost length from E to W of $3\frac{1}{2}$ miles, an utmost breadth from N to S of $3\frac{1}{2}$ miles, and an area of 5569 acres, of which $16\frac{1}{2}$ are water. WHITTADDER Water, winding $6\frac{1}{2}$ miles eastward, roughly traces all the southern boundary; whilst its affluent, Billymire Burn, rises in the NW corner of the parish, and, first striking $1\frac{1}{2}$ mile ENE, next flows 2 miles WSW along the northern, and $1\frac{1}{2}$ mile S by W along the western, border. The surface sinks in the extreme SE to a little below 100 feet above sea-level, and rises thence in a long north-westerly ridge to 244 feet near Oxward and 466 on Chirnside Hill, which culminates 5 furlongs ENE of the village. The soil almost everywhere is very fertile; and, with the exception of some 370 acres of plantation and 88 of roads and railway, the entire area is in a high state of cultivation. Ninewells woollen factory, an extensive paper-mill (1841) at Chirnside Bridge, and Edington saw-mills, also furnish employment. Besides the bridge which crosses the Whittadder at Chirnside Bridge hamlet, there is a railway bridge. MAINES and NINEWELLS, the latter interesting from its connection with the two David Humes, are the chief mansions; and 5 proprietors hold each an annual value of £500 and upwards, 7 of from £50 to £100, and 10 of from £20 to £50. Among former ministers were Henry Erskine (1624-96), grand sire of the Secession, to whom a monument, 25 feet high, was erected in the churchyard in 1826; and William Anderson, D.D. (d. 1800), the author of three ponderous histories. Chirnside is the seat of a presbytery in the synod of Merse and Teviotdale; the living is worth £424. A public school at the village, with accommodation for 304 children, had (1891) an average attendance of 216, and a grant of £218. Valuation £13,226, 6s. Pop. (1801) 1147, (1831) 1248, (1861) 1502, (1871) 1413, (1881) 1516, (1891) 1459.—*Ord. Sur.*, sh. 34, 1864.

The presbytery of Chirnside comprises the old parishes of Chirnside, Ayton, Coldingham, Coldstream, Edrom, Eyemouth, Foulden, Hutton, Ladykirk, Mordington, Swinton, and Whitsome, with the *quoad sacra* parish of Houndwood. Pop. (1871) 17,019, (1881) 18,337, (1891) 15,900, of whom 3835 were communicants of the Church of Scotland, the sums raised that year by the above 13 congregations in Christian liberality amounting to £1125. A Free Church presbytery is designated of Duns and Chirnside.

Chisholm, an estate, with a modern mansion, in Robertson parish, W Roxburghshire, near the right bank of Borthwick Water, $7\frac{3}{4}$ miles WSW of Hawick.

Chisholm, an estate in Kilmorack and Kiltarlity parishes, NW Inverness-shire. It comprises about 900 acres of arable land in Kilmorack, and 750 in Kiltarlity, besides a vast extent of woodland, mountain pasture, and picturesque Highland scenery. Its principal seat is ERCHLESS Castle, and it has also a romantic shooting-lodge on Loch AFFRIC. A mountain defile in it bears the name of Chisholm's Pass, and forms the entrance to Strathaffric. The ascent to it commands north-eastward, or behind, a noble vista of Strathglass, and in front overlooks a wooded, rocky, impetuous reach of the river Affric, with several cascades from 10 to 30 feet high; the pass itself is successively a rapid ascent and a level reach, and exhibits, on a grand scale, a wealth and multitude of features similar to those of Rothiemurchus, Killiecrankie, and the Trossachs.—*Ord. Sur.*, shs. 72, 73, 1880-78.

Choaric or **An Corr-eilean**, an islet of Durness parish, NW Sutherland, in Loch Eriboll, $2\frac{1}{4}$ miles from its head. Extending from NNE to SSW, it has an extreme length and breadth of $\frac{3}{4}$ mile and $1\frac{3}{8}$ furlong, exclusive of foreshore; it rises 74 feet above sea-level, is green and fertile, and contains an ancient disused burying-ground.

Choin, Loch. See BLAIR ATHOLE.

Chon, a lonely loch in Aberfoyle parish, SW Perthshire, 7 miles WNW of Aberfoyle hamlet, 7 ESE of Inversnaid, and $1\frac{1}{2}$ mile S of the upper waters of Loch Katrine. Lying 290 feet above sea-level, it has an utmost length from NNW to SSE of $1\frac{1}{4}$ mile, whilst its width varies between $1\frac{1}{2}$ and 3 furlongs. The Avondlin, or northern head-stream of the Forth, flows through it to Loch Ard; mid-way along its eastern shore are three little islets, on which there was formerly a heronry; and around it rise Caisteal Corrach (1075 feet) and Stron Lochie (1643), backed by Ben Venue (2393), and Beinn Uaimhe (1962), Beinn Dubh (1675), and Mulan an't-Sagairt (1398), backed by Ben Lomond (3192). Its shores are clothed with natural copsewood; and its waters abound with trout, averaging $\frac{1}{2}$ lb. The western shore is closely skirted by the Loch Katrine Aqueducts of the Glasgow waterworks; and during their construction a temporary village, Sebastopol, arose near the head of the loch.—*Ord. Sur.*, sh. 38, 1871.

Christ's Kirk or **Rathmuriel**, an ancient parish now forming the eastern portion of Kennethmont parish, W Aberdeenshire. The church, $1\frac{1}{2}$ mile WSW of Insch station, is in ruins; but its graveyard is still in use. On a green here was formerly held an annual fair on a night in the month of May, Christ's Fair or Sleepy Market, which by some antiquaries is supposed to be the theme of the famous poem of *Chryst's Kirk on the Grene*, commonly ascribed to James I. Christ's Kirk Hill (1021 feet) is on the E border of the parish, overhanging the rivulet Shevock, and is divided only by the narrow valley of that stream from the abrupt isolated hill of Dunnideer (876 feet) in Insch.

Chroisg, Loch. See ROSQUE.

Chryston, a village and a *quoad sacra* parish in the E of Cadder parish, NW Lanarkshire. The village stands near the Monkland and Kirkintilloch railway, $1\frac{1}{2}$ mile NE of Garnkirk station, $2\frac{1}{2}$ miles ESE of Lenzie Junction, and 7 NE by E of Glasgow, under which it has a post office. At it are an inn, a beautiful Established church (1878; 800 sittings) with a fine spire, a Free church (1853), and two burying-grounds, in one of which is a neat granite monument to a native of Chryston, the weaver-poet Walter Watson (1780-1854). A public school, with accommodation for 463 children, had (1891) an average attendance of 232, and a grant of £235, 5s. The *quoad sacra* parish, constituted in 1834, and re-constituted in 1869, is in the presbytery of Glasgow and synod of Glasgow and Ayr. Pop. of village (1861) 582, (1871) 486, (1891) 899; of *q. s.* parish (1841) 2670, (1871) 3203, (1891) 3425.

Chuinneag, Loch. See CHARNAC.

Cilla-Chuimein. See AUGUSTUS, FORT.

Cilliechrist. See KILCHRIST.

Cir Vohr. See ARRAN.

Clachaig, a hamlet in Dunoon parish, Cowall, Argyllshire, $3\frac{1}{2}$ miles WNW of Sandbank, on the road between the head of Holy Loch and the head of Loch Striven. It has a post office under Greenock and an inn; and near it are the Clyde powder-mills.

Clachan (Gael. 'a stone'), a village in Kilcalmonell parish, Argyllshire, near the NW coast of Kintyre, $7\frac{3}{4}$ miles NNE of Tayinloan. At it are a post office under Greenock, Kilcalmonell parish and Free churches, and a public school; whilst just to the E is Ballinakill House.

Clachan or **Loch a' Chlachain**, a lake in Daviot and Dunlichity parishes, Inverness-shire, $8\frac{1}{2}$ miles S of Inverness. Lying 683 feet above sea-level, it has an utmost length and breadth of $\frac{1}{2}$ and $\frac{1}{4}$ mile, receives one stream from Loch Duntelchaig, and sends off another to the Nairn. Its splendid trout-fishing has been much spoiled.

Clachan, a village in Kilmorich parish, N Cowal, Argyllshire, at the head of Loch Fyne, 8 miles NE of Inverary.

Clachan, a sound or strait between Seil island and the mainland of Lorn, Argyllshire. It resembles the Kyles of Bute, but is narrower, more diversified, and more richly picturesque; and it is spanned, at the narrowest part, by a one arch bridge.

Clachaneasy (Gae. *clachan Iosa*, 'Jesus hamlet'), a hamlet in Penninghame parish, E Wigtownshire, 8 miles N by W of Newton-Stewart.

Clachan-Heughs, a rocky headland in Kirkcolm parish, Wigtownshire, on the W side of Loch Ryan, 1½ mile N by E of Kirkcolm village.

Clachan-Inair, a place, with a sequestered and picturesquely-situated burying-ground, in the mouth of Glenmoriston, Inverness-shire.

Clachan of Glendaruel. See **GLENDARUEL**.

Clachantiompan, an ancient memorial stone in Foderty parish, Ross-shire, midway between Castle-Leod and Strathpeffer Spa. It is supposed to mark the place where one of the Monroes fell in a conflict with the Maczenkies of Seaforth.

Clachbhein, a hill 912 feet high in the N of Jura island, Argyllshire.

Clachmore, a hamlet in the parish and 4 miles W by S of the town of Dornoch, SE Sutherland. It has a post office, an inn, and a cattle fair on the Monday after the first Wednesday of May. Coal has been found in its vicinity.

Clachmore, a loch in the NW of Assynt parish, SW Sutherland, 7 miles NW of Lochinver. It has an utmost length and breadth of 3 and 2 furlongs, contains trout, running up to 3 lbs., and sends off a stream 3 furlongs WSW to the sea.

Clachnaben, a mountain in Strachan parish, Kincardineshire, flanking the SE bank of the Aa, and culminating 3 miles ENE of the summit of Mount Battock, and 9 SW of Banchory. One of the eastern Grampians, it rises to an altitude of 1944 feet above sea-level; commands a view of the E of Scotland from Peterhead to the Lammermuirs; and is crowned by a mass of bare granite, 100 feet high, from which it is sometimes called the White Stone Hill. According to an old-world couplet—

'There are two landmarks out at sea,
Clachnabin and Bennachie.'

Clachnaharry, a straggling fishing village in Inverness parish, Inverness-shire, on Beaully Firth, at the mouth of the Caledonian Canal, with a station on the Highland railway, 1½ mile NW of Inverness. It takes its name, signifying 'the watchman's stone,' from neighbouring rocks where sentinels stood, in bygone times, to warn the townsmen of Inverness of the approach of any body of marauders; at it are a post office under Inverness, and a public school, which, with accommodation for 150 children, had (1891) an average attendance of 75, and a grant of £67, 2s. 6d. A pillar on the highest point of the adjacent rocks was erected by the late Major Duff of Muirtoun, to commemorate a battle said to have been fought in the vicinity in 1378, between the Monroes of Foulis and the Clan Chattan, and is visible over a great extent of surrounding country.

Clachnamban, two huge stones, the one incumbent on the other, in Alness parish, Ross-shire, on a dismal moor not far from Kildermory. They are purely natural objects, but they look, at first sight, like a work of art; and they are associated, in local tradition, with a wild old legend.

Clach-na-Ossian, a large stone on the banks of Almond Water, near the upper end of Glenalmond Pass, in Crieff parish, Perthshire, a little to the W of Dunmore Hill, and 5 miles S of Amulree. It is 8 feet high, and from 4 to 5 feet broad; and, about 1728 being removed from its original site at the forming of Wade's military road, it was found to cover a cavity 2 feet long, 1½ foot wide, and 2 feet deep, fenced with four stone slabs, and containing some bones and ashes. 'I have learned,' says Newte, who was here in 1791, 'that when Ossian's Stone was removed, and the coffin containing his supposed remains discovered, the people of the country for several miles around, to the number of three or four score of men, venerating the memory of the bard, rose with one consent, and carried away the bones, with bagpipes playing and other funeral rites, and deposited them with much solemnity within a circle

of large stones, on the lofty summit of a rock, sequestered, and of difficult access, where they might never more be disturbed by mortal feet or hands, in the wild recesses of western Glenalmond.' Macculloch, ever at war with 'old poetic feeling,' discredits the story of Ossian's burial here, which Dr Donald Smith upheld most learnedly, and of which Wordsworth sings—

'Does then the Bard sleep here indeed?
Or is it hut a groundless creed?
What matters it?—I blame them not
Whose fancy in this lonely spot
Was moved, and in such way expressed
Their notion of its perfect rest.
A convent, even a hermit's cell,
Would break the silence of this del':
It is not quiet, is not ease,
But something deeper far than these;
The separation that is here
Is of the grave, and of austere
Yet happy feelings of the dead:
And, therefore, was it rightly said
That Ossian, last of all his race,
Lies buried in this lonely place.'

Clachshant or **Clayshant**, an ancient parish since 1650 included in Stoneykirk parish, SW Wigtownshire. Clachshant, signifying 'the holy stone,' was the original name; and Clayshant is a modern corruption. On Clayshant farm, close to the shore, are vestiges of the ancient church, which belonged to Wbithorn priory.

Clackmannan, a town and a parish of Clackmannanshire. The town stands ½ mile SSE of a station of its own name on the Stirling and Dunfermline section of the North British, and 2 miles E by S of Alloa, being built on an eminence which rises gently out of the carse plain to a height of 100 feet above the Forth. On either side the ground has a gradual descent; but to the W, where the old Tower is placed, it is bold and rocky. The view from there is singularly fine. To the W are seen Alloa, Stirling, and St Ninians, and all the country as far as Ben Lomond; on the N the prospect is bounded by the Ochils; S and E are the fertile fields of Stirlingshire, and the towns of Kincardine, Falkirk, and Lintithgow; whilst the foreground is filled by the Forth, expanding into a broad sheet of water, like a large inland lake. In the town itself, with a wide main street, but many poor houses, there is a ruined tower, an old market cross, surmounted by the arms of Bruce, and a pedestal-elevated whinstone, called the King's Stone. The tower, said commonly to have been built by King Robert Bruce, dates rather from the 15th century. Oblong in plan, with a short projecting wing, it is 79 feet high, its modern slated roof being gained by a spiral stair; and it retains the cellars, kitchen, barrel-vaulted hall, upper chamber, machicoulis, corbie-stepped gables, and bartizan, with a 17th century belfry. Adjoining the tower stood the old mansion, the seat of the lineal descendants of that Robert Bruce to whom King David, his cousin, granted the castle and barony of Clackmannan in 1359. Here were preserved the sword and helmet of the great King Robert; and here with the sword Mrs Bruce of Clackmannan (1701-96), the last laird's widow, and a zealous Jacobite, knighted Robert Burns, 26th August, 1787. (See **BROOMHALL** and **KENNET**.) In name at least Clackmannan remains the county town, but it is quite eclipsed by Alloa, under which it has a post office, with money order, etc., departments. The parish church (1815; 1250 sittings) has a lofty tower, on which a town clock was placed in 1866. There are also a Free and a U.P. church; a cemetery, opened in 1857; and a public hall, erected in 1888. The town is lighted by gas. Pop. (1891) 1779.

The parish contains also the villages of Sauchie, Fish Cross, Kennet, Westfield, and Forrestmill. It is bounded N by Tillicoultry and Dollar, NE by Muckart in Perthshire, E by Fossoway in Perthshire and Saline in Fife, SE by Culross and Tulliallan, SW by the Forth, and W by Alloa. Its length is about 5 miles; its width varies between 1½ and 5 miles. Its area was reduced to 8841 acres in 1891 through the transference by the Boundary Commissioners of its detached SAUCHIE section (1028 acres) to the parish of Alloa. The Forth, here from

3 to 7 furlongs broad, flows $1\frac{1}{4}$ mile along the SW border; and its affluent, the Black Devon, after tracing $1\frac{1}{2}$ mile of the Saline boundary, winds $4\frac{1}{2}$ miles W and SW through the interior, sweeping round the NW base of the eminence on which the town is built, and lastly for $2\frac{1}{2}$ miles dividing Alloa from Clackmannan. On the NW border lies Gartmorn Dam ($6 \times 2\frac{1}{2}$ furl.) The surface, for $1\frac{1}{2}$ mile from the Forth, is almost a dead level, part of the Carse of Clackmannan; thence it rises, with a general north-eastward ascent, to 117 feet near Kennet, 200 near Woodyett, 207 at Gartlove, 300 near Parklands, 265 at Meadowhill, and 365 at Weston. The rocks, to a great extent, are Carboniferous. Sandstone, of various qualities, is worked in several quarries; coal has been largely mined for upwards of two centuries; and ironstone is likewise plentiful. The soil exhibits a considerable diversity of character, but almost everywhere rests on a hard cold till. Nearly all the parish, with the exception of about one-fifth under wood, is either regularly or occasionally in tillage. There are in the parish a woollen factory, a vat-building establishment, two saw-mills, and a paper-mill; and on the Forth are two harbours, Clackmannan Pow and Kennet Pans. Schaw Park, Kennet House, Kennet Pans, Kilbagie, Aberdona, Garlet, and Brucefield are the principal mansions; and 5 proprietors hold each an annual value of £500 and upwards, 4 of between £100 and £500, 4 of from £50 to £100, and 23 of from £20 to £50. Clackmannan is in the presbytery of Stirling and synod of Perth and Stirling; the living is worth £334. It gives off a portion to the *quoad sacra* parish of Blairingone; and Sauchie was formed in 1877 into a separate *quoad sacra* parish. Clackmannan, Forrestmill, and Kennet public schools, with respective accommodation for 350, 94, and 121 children, had (1891) an average attendance of 315 day and 92 evening, 25, and 128, and grants of £275, 12s. 6d. and £38, 12s., £33, 2s., and £129, 5s. 9d. Valuation (1892) £16,193, 7s. Pop. of *quoad sacra* parish (1881) 1681, (1891) 2931; of civil parish (1801) 2961, (1831) 4266, (1861) 4425, (1871) 4653, (1881) 4541, (1891) 5072.—*Ord. Sur.*, sh. 39, 1869.

Clackmannan Pow, a harbour in Clackmannan parish, on the river Forth, at the mouth of the Black Devon, $1\frac{1}{2}$ mile SE of Alloa. Its mean depth of water is 10 feet at the usual shipping place, and 20 at the merge of the Black Devon into the Forth.

Clackmannanshire, the smallest county in Scotland. It is bounded N by Perthshire, E by Perthshire and Fife, SW by the upper waters of the Firth of Forth, which divide it from the main body of Stirlingshire, and W by Stirlingshire and Perthshire. Its length from N to S varies between $2\frac{1}{2}$ and $9\frac{1}{2}$ miles; and its greatest breadth from E to W is $8\frac{1}{2}$ miles. The Forth winds $10\frac{1}{2}$ miles south-eastward here, broadening from 1 furlong to 7; other streams are the Devon, and, in CLACKMANNAN parish, the Black Devon. Gartmorn Dam ($6 \times 2\frac{1}{2}$ furl.), on the mutual border of Alloa and Clackmannan parishes, is the only large sheet of water. The surface in the S is low and flat; in the centre is tumulated or moderately hilly; in the northern parishes of Tillicoultry and Dollar forms part of the Ochil Hills, including Benclouch (2363 feet), the Law (2094), Kingseat Hill (2111), and Whitewisp Hill (2110). The rocks, in the S and the centre, are mainly Carboniferous; in the N, are eruptive. Sandstone and trap rock are abundant; coal is very extensively mined; ironstone is worked; and agates, topazes, other precious stones, and ores of copper, lead, antimony, cobalt, and silver, are found. The climate, in the S, is comparatively dry and warm; in the centre is somewhat moister and colder; in the N is drier and warmer than the altitudes and breaks of the Ochils might lead one to anticipate. The scenery is richly diversified and highly picturesque.

The soil, near the Forth and on parts of the banks of the Devon, is richly alluvial; in the central tracts, is generally of a light fine quality, but of no great depth, resting upon a gravelly bottom; in the N, among the Ochils, affords excellent pasturage for sheep. Agriculture is in a highly improved condition; and 49 farms

have each an extent not exceeding 5 acres; 43 have each from 5 to 20 acres; 17 have each from 20 to 50 acres; 23 have each from 50 to 100 acres; and 52 have each above 100 acres. Leases run 19 years or longer. Chief manufactures are woollen fabrics, muslins, camlets, ale, glass, iron, and ships; the commerce is concentrated at ALLOA. The Stirling and Dunfermline railway intersects the county east-south-eastward; a branch goes from that railway at Cambus to Menstrie and Alva; and the Devon Valley railway goes from the Stirling and Dunfermline at Alloa north-eastward to Dollar and Rumbling-Bridge, and communicates there with a railway to Kinross.

The Boundary Commissioners in 1891 made a considerable readjustment of the boundaries of Clackmannanshire as affected by the neighbouring counties of Stirling and Perth. The parish of Alva, after having added to it a part of the Clackmannan portion of the parish of Logie, has been transferred wholly from Stirlingshire to Clackmannanshire. The parish of Alloa received the second part of the Clackmannan portion of Logie parish, and also a detached portion of the parish of Clackmannan, but gave to Stirlingshire (to the parish of Logie) its Perthshire portion (about 4 acres). The third part of the Clackmannan portion of Logie parish was retained to Logie, and the reconstituted parish of Logie was placed wholly in Stirlingshire. The parish of Stirling was partly in Stirlingshire and partly in Clackmannanshire: the latter portion of the parish has been transferred to Stirlingshire. The towns are Alloa, Clackmannan, Dollar, and Tillicoultry; the chief villages, Tullibody, Coalsnaughton, Devonside, Menstrie, Fish Cross, Sauchie, Newtonshaw, Kennet, Cambus, Collyland, Abbey, and part of Causewayhead. The principal mansions are Alloa Park, Schaw Park, Tullibody House, Cambus House, Tillicoultry House, Kennet House, Dollarfield, Hillfoot House, Harviestoun Castle, Aberdona, and Powis House. According to the latest *Miscellaneous Statistics of the United Kingdom*, 30,189 acres, with a total gross estimated rental of £97,482, were divided among 1227 proprietors, one holding 6163 acres (rental £9517), four together 15,306 (£18,550), two 3292 (£4339), three 2158 (£4693), eight 2058 (£10,295), four 300 (£1873), sixteen 402 (£4543), fifty-two 185 (£10,618), eleven hundred and thirty-seven 325 (£33,054).

The parishes are in the presbyteries of Stirling and Dunblane and synod of Perth and Stirling. The places of worship are 8 Established (5427 communicants in 1891), 8 Free Church (1841 communicants in 1891), 7 U.P. (2558 members in 1891), 1 Congregational, 1 Evangelical Union, 2 Baptist, 2 Episcopal, and 1 Roman Catholic. In the year ending 30 Sept. 1891, the county had 17 schools, 16 being public and 1 Roman Catholic. With total accommodation for 4988 children, these in that year had 4738 scholars on their registers, an average attendance of 3352, and grants amounting to £4986, 5s. 4d.

The county is governed by a lord-lieutenant, a vice-lieutenant, 3 deputy-lieutenants, a sheriff, a sheriff-substitute, and about 36 magistrates. The courts are held at ALLOA. The County Council is composed of twenty elected members for as many electoral divisions, besides six appointed by the parochial boards of Stirling, Alloa, Alva, Clackmannan, Tillicoultry, and Dollar (one each). It is divided into the following committees:—Finance Committee, Valuation Committee and Committee on Appeals, Contagious Diseases (Animals) Acts Committee (composed of county councillors and rated occupiers), Justices of the Peace Committee (transferred powers and duties), local committees on roads, health, drainage, and waterworks, for each of the Clackmannan, Tillicoultry, and Alva districts; and the Standing Joint Committee (partly county councillors and partly commissioners of supply). The Finance and the Local Committees each meet once a month, and the other committees as occasion requires. The county prison is at Alloa. The annual value of real property, assessed at £37,978 in 1815, was £155,349 in 1891. The county unites with Kinross-shire in sending a member to Parliament. The parliamentary

constituency in 1891 was 6042. Pop. (1881) 25,677, (1891) 28,432.

The registration county gives off the civil county's former part of Stirling parish to Stirlingshire, and of Logie parish to Perthshire; and had, in 1891, a population of 26,716. All the parishes are assessed for the poor; and all but Logie are included in Stirling combination. The number of registered poor, in the year ending 14 May, 1891, was 252. The number of pauper lunatics was 50, their cost being £1419.

The territory now forming Clackmannanshire belonged anciently to the Caledonian Damnonii. Its chief matters of historical interest are noticed under Clackmannan and Alloa; and its chief antiquities are a Caledonian stone circle in Tillicoultry parish, Clackmannan, Alloa, and Sauchie towers, Castle-Campbell, and Cam-buskenneth Abbey.—*Ord. Sur.*, sh. 39, 1869.

Cladich, a hamlet in Glenorchy parish, Argyllshire, on the E shore of Loch Ave, 9½ miles N of Inverary. It has a post office, an inn, and a public school.

Clairg, a ruined fortalice in Killarrow and Kilmeny parishes, Argyllshire, on Fraoch island, at the SE entrance of the Sound of Islay. Built by the Macdonalds, it was defended by a ditch, and served both to command the Sound and as a prison.

Clairgean, a small bay in Kildalton parish, on the E side of Islay island, Argyllshire.

Clairinch, a Loch Lomond islet of Buchanan parish, Stirlingshire, 1½ furlong SE of the middle part of Inchcalloch, and ¾ mile W by N of the mouth of the Endrick. It measures 2½ furlongs by 1, and is wooded.

Clairstron, a modern mansion in the NW of Orphir parish, Orkney, on the coast, 15 miles WSW of Kirkwall. It was the residence of the late Lord Armadale.

Clamshell or Scallopshell, a cave in Staffa island, Argyllshire. It is 130 feet long and 30 high, whilst gradually contracting from a width of 17 feet at the entrance. One side consists of regular basaltic columns, so curved as to resemble the inner timbers of a ship; the other is a mural face so pitted with ends of basaltic columns as to look like the surface of a honeycomb.

Clanside, a Nairnshire hamlet, 4 miles from its post-town Nairn.

Clanyard, a bay of Kirkmaiden parish, SW Wigtownshire. The bay opens from the Irish Channel, to the N of Laggantalluch Head, 5½ miles NW of the Mull of Galloway; and, triangular in outline, measures 2½ miles across the chord, and 1 mile thence to its inmost recess. It lies thoroughly exposed to all winds from the SE to the NNW. See CASTLE CLANYARD.

Clao-naig, a burn in Saddell and Skipness parishes, N Kintyre, Argyllshire, which, formed by the Larachmor and lesser head-streams, winds 2½ miles south-eastward, past Skipness church, to Kilbrannan Sound, 2¾ miles WSW of Skipness Point. It abounds in trout and sea-trout.

Clar or Loch a'Chlair. See BADEN.

Clarebrand, a hamlet in Crossmichael parish, Kirkcubrightshire, 2½ miles N by E of Castle-Douglas. Here, half a century since, flourished two most original poets, John Gerrond, the blacksmith, and Samuel Wilson.

Clarencefield, a village in Ruthwell parish, Dumfriesshire, near Ruthwell station, under which it has a post office, and 7½ miles W by N of Annan.

Clarkston, a village in Cathcart parish, Renfrewshire, 1 mile NNW of Bueby, and 5½ miles S of Glasgow. It has a station on the Glasgow, Busby, and East Kilbride railway. Pop. (1891) 825.

Clarketon, a village in New Monkland parish, and a *quoad sacra* parish partly also in Shotts parish, Lanarkshire. The village, extending near the right bank of North Calder Water, has a station on the main Bathgate line of the North British, 1½ mile E of Airdrie, of which it ranks as a suburb, and under which it has a post office. The parish, constituted in 1869, is in the presbytery of Hamilton and synod of Glasgow and Ayr; its minister's stipend is £254. The church was built about 1830 as a chapel of ease. Pop. of *quoad sacra* parish (1871) 4902, (1881) 7073, (1891) 10,166.

Clashcarnach, a harbour in the N of Durness parish, Sutherland, 3 miles E of Cape Wrath. It has a slip for boats; and it is the landing place for commodities required by Cape Wrath lighthouse, but it is nearly inaccessible during high northerly winds.

Clashmach, a hill (1229 feet) in the parish and 2 miles SW of the town of Huntly, NW Aberdeenshire, between the rivers Bogie and Deveron.

Clashnessie, a bay and a hamlet in the NW of Assynt parish, SW Sutherland. The bay enters between the Point of Stoer and Oldany island; lies exposed to NW winds; and, excepting over a small space at its head, is properly no more than part of the Minch. The hamlet lies at the bay's head, 2½ miles NNE of Stoer.

Clatchard. See ABDIE.

Clathick, an estate, with a mansion, in Monzievaired and Strowan parishes, Perthshire, 2¾ miles ENE of Comrie. Its owner, Wm. Campbell Colquhoun, Esq. (b. 1838; suc. 1861), holds 1017 acres in the shire, valued at £666 per annum.

Clathy, a village, nearly in the centre of Findo-Gask parish, Perthshire, 2½ miles NNW of Dunning station. Near it are the manseions of Clathy Park, Clathybeg, and Clathymore.

Clatt (Gael. *cleithe*, 'concealed'), a post-office village and a parish in the western extremity of Garioch district, Aberdeenshire. The village stands 3 miles SSW of Kennethmont station, this being 32¾ miles NW of Aberdeen; in 1501 it was erected by James IV. into a free burgh of barony, but its Tuesday market and its May and November fairs are now alike discontinued, and it consists to-day of mere vestiges of its former self, and of a few modern neighbouring erections called Hardgate of Clatt.

The parish is bounded NW by Rhynie, NE by Kennethmont, E by Leslie, S by Tullynessle, and W by Auchindoir. Its greatest length from N to S is 4 miles; its breadth from E to W varies between 1½ and 3½ miles; and its land area is 5711 acres. The Water of BOGIE flows ½ mile along the Rhynie border, and its affluent, the Burn of Kearn, traces 3½ miles of the western boundary, but the drainage is mainly carried eastward by head-streams of GADIE Burn. Of several chalybeate springs, one upon Correen is the most remarkable. The surface nowhere sinks below 550 feet above sea-level, whilst rising to 765 near Boghead, between the Burns of Gadie and Kearn, and to 1443 and 1588 feet on the Hill of Auchmedden and the Mire of Midgates, which culminate close to the southern border, and belong to the Correen Hills. Granite, whinstone, and clay-slate are the prevailing rocks; and the soils range from a rich deep loam to light sandy earth, mixed with decomposed slate and small stones. Little more than one-half of the entire area is in tillage, about 300 acres being planted, and the rest being either pasture or waste. Remains of a 'Druidical circle,' 20 yards in diameter, are in the northern division of the parish, where also upwards of twenty tumuli were discovered in 1838. In the SW corner was fought the clan battle of Tillyangus (1571), in which the Forbeses were wrosted by the Gordons. KNOCKESPOCK is the only mansion; and the property is divided among two proprietors holding each an annual value of more, and three of less, than £100. Clatt is in the presbytery of Alford and synod of Aberdeen; the living is worth £165. A pre-Reformation structure, as witnessed by a carved tabernacle and a piscina found in it, the church was almost rebuilt in 1799, and reset in 1828, containing now 342 sittings. A public school, with accommodation for 117 children, had (1891) an average attendance of 77, and a grant of £68, 18s. Valuation £4101, 7s. 7d. Pop. (1801) 433, (1821) 551, (1871) 483, (1891) 458.—*Ord. Sur.*, sh. 76, 1874.

Clattering Briggs, a village in the parish and near the station of Longforgan, SE Perthshire, 6 miles WSW of Dundee.

Clatto, an estate in St Andrew and Kemback parishes, NE Fife. Its manseion stands near Blebo Craige, on the southern slope of Clatto Hill (547 feet), 5 miles W by S of St Andrews. Its late owner was Sir Jn. Law,

K.C.B., G.C.S.I. (1788-1880), a distinguished Indian general.

Clauchan. See CLACHAN.

Clauchandolly, a hamlet in Borgue parish, Kirkcudbrightshire, 3½ miles SW by S of Kirkcudbright.

Clava, a dismal plain in the Inverness-shire section (since 1891) of Croy and Dalross parish, on the right bank of the river Nairn, 6 miles E of Inverness, and opposite Culloden battlefield. It contains a very striking assemblance of ancient Caledonian stone circles and cairns. The circles vary from 36 to 420 feet in circumference, and many of them seem unfinished. Four of the cairns appear to have been constructed out of pre-existent circles; and one of them, on being cleared away, was found to conceal a passage leading to a circular convex chamber, 12 feet in diameter and 10 feet high. In the summer of 1881 the fallen standing stones were again set up, and the ground was cleared around the largest circle, when causewayed paths were discovered, leading from the base of the cairn to three of the outer standing stones. A great number of 'cup-markings' have also been recently found on stones in this locality.

Claven. See DUNDONALD.

Claverhouse, a hamlet and a bleachfield in Mains parish, Forfarshire. The village stands on Dighty Water, 3½ miles, N by E of Dundee, under which it has a post office. The bleachfield adjoins the hamlet, and is a very extensive establishment for the boiling and bleaching of yarn and linen cloth. Claverhouse mansion, which stood a little to the N, was the family seat of John Graham of Claverhouse, Viscount Dundee (1643-89), the 'Bloody Claver'se' of the Covenanters, the 'Bonnie Dundee' of the Jacobites; its site is now occupied by a modern monumental structure, in the form of a ruin.

Claybarns, a village in Newton parish, Edinburghshire, 1½ mile NNW of Dalkeith.

Clayhouses, a village in Borthwick parish, Edinburghshire, near Gorebridge station.

Clayland. See CLELAND.

Claypotts, an old castle in the E of Dundee parish, Forfarshire, 1 mile NW of Broughty Ferry. It is popularly regarded as the residence of a mistress of Cardinal Beaton; but it really was not built for some years after the cardinal's assassination. The legend of its brownie is given in Chambers's *Popular Rhymes of Scotland*.

Clayquhat, a mansion in the northern division of Blairgowrie parish, Perthshire, 7 miles NNW of Blairgowrie town.

Clayshank. See CLAOHSHANT.

Clayburn, a loch on the mutual border of Yarrow and Ettrick parishes, Selkirkshire, 9 miles ESE of the head of St Mary's Loch. Lying nearly 1000 feet above sea-level, it measures 2¼ furlongs by 1; and sends off a streamlet of its own name, 1¼ mile west-south-westward, to Rangle Burn, at the site of Buccleuch Castle.

Cleat, an estate, with a mansion, in Westray island, Orkney. The mansion stands near Pierwall village, 20 miles N of Kirkwall.

Cleaven Dyke. See CAPUTH.

Cleddin, a burn in Old Kilpatrick parish, Dumbarshire. Part of the fosse of Antoninus' Wall is traceable in a field near it.

Cleghorn, a mansion, an estate, and a station in Lanark parish, Lanarkshire. The mansion stands near the station, on the right bank of Mouse Water, 2¼ miles NE of Lanark town, and is an old but comfortable edifice, surrounded by a finely-wooded park. Its owner, Wm. Eliot Lockhart, Esq. (b. 1833; suc. 1878), holds 2280 acres in the shire, valued at £2554 per annum. The estate includes a romantic ravine along the course of Mouse Water; had anciently a chapel; and contains vestiges of a Roman camp, 600 yards long and 420 broad, supposed to have been formed by Agricola. The station is on the Glasgow and Carstairs section of the Caledonian railway, 2½ miles W of Carstairs; and adjoins the junction of the branch line to Lanark and Douglas.

Cleish, a village and a parish in the S of Kinross-

shire. The village stands near the left bank of Gairney Water, 3 miles from Kinross, under which it has a post office.

The parish is bounded N by Fossoway and Kinross, NE by Portmoak, E by Ballingry, S by Beath and Dunfermline, W by Dunfermline, and NW by Fossoway. In 1891 that part of the parish of Dunfermline which lay north of the south march of Moreland, and was said to be in the county of Kinross, was declared by the Boundary Commissioners so to be, and annexed to the parish of Cleish. Black Loch (2 × 1 furl.) and Loch Glow (6 × 3½ furl.) lie on the Dunfermline border; near them, in the interior, are the still tinier Lurg and Dow Lochs. The Pow Burn traces the north-western, Gairney Water the northern, and the early course of the sluggish ORE great part of the southern boundary; and the two first receive from the interior ten or twelve northward-flowing rivulets. In the E are Blairadam Inn (337 feet above sea-level), Brackly Wood (1072) on a western outskirt of BENARRY, and Blackdub (393); westward, the surface attains 707 feet near Blairadam, 933 in Cowden Wood, 589 near West Mains, and 1241 on Dumglow, the highest of the Cleish Hills. The rocks are variously eruptive, Silurian, and Carboniferous. Basalt is quarried, and excellent sandstone is plentiful; good limestone occurs, and coal was formerly worked. The arable soil in the W is clay; further E is good loam; still further E is gravel and sand; in the SE is stiff retentive loam; and elsewhere is of various character. The grass on the highest hills is of fine quality, and forms excellent pasture for sheep. Traces of an ancient fort or camp are on one of the summits of the Cleish Hills; and urns, containing human bones and pieces of charcoal, have been found under former cairns. A rock, the Lecture Stone, is in a stone dyke ¼ mile E of the parish church; and was used in pre-Reformation days as a rest for the coffin during the reading of the burial service. A stone, inserted in a bridge at the E end of the parish, bears an inscription indicating the road here to have been that by which Queen Mary fled from Loch Leven Castle. The schoolhouse, in which the poet Michael Bruce (1746-67) was schoolmaster, stood on what now is the farmstead of Gairney Bridge; and the public house, in which Ebenezer Erskine and the three other fathers of the Secession formed themselves into a presbytery (15 Dec. 1733), stood on the site of that farmstead's stables. The principal mansions are BLAIRADAM and Cleish Castle. The latter, 7 furlongs W of the village, is a fine old structure; its owner, Harry Young, Esq. (b. 1816; suc. 1840), holds 1910 acres in the shire, valued at £1979, 10s. per annum. Eight lesser proprietors hold each an annual value of upwards of £50. Cleish is in the presbytery of Kinross and synod of Fife; the living is worth £162. The church, rebuilt in 1832, is a very neat edifice containing over 400 sittings, a public school, with accommodation for 81 children, had (1891) an average attendance of 76, and a grant of £83, 9s. Pop. (1881) 498, (1891) 530.—*Ord. Sur.*, sh. 40, 1867.

Cleland, a village and *quoad sacra* parish of N Lanarkshire, chiefly in Shotts parish, but partly also in Bothwell. The village has a station on the Morningside branch of the Caledonian, and stands near the left bank of South Calder Water, 3½ miles from Motherwell, under which it has a post office, with money order, savings bank, and telegraph departments. It mainly depends on the large neighbouring collieries; at it are the Established church (1877), a Free church, and St Mary's Roman Catholic church (1877), to the last of which, designed by Messrs. Pugin, a presbytery was added in 1881. Cleland and Omoa public school and Cleland Roman Catholic school, with respective accommodation for 300 and 271 children, had (1891) an average attendance of 323 and 269 day and 203 evening scholars, and grants of £312, 2s. 10d. and £257, 4s. 6d. and £127, 16s. respectively. Pop. of village (1861) 1233, (1871) 819, (1881) 1503, (1891) 1974; of *q. s.* parish (1891) 3319.

Cleland and Midcalder Railway. See CALEDONIAN RAILWAY.

Clephantown, a village in Croy parish, $6\frac{1}{2}$ miles SW of the town of Nairn, near the left bank of Nairn river.

Clephington. See DUNDEE.

Clerkington, an estate, with a mansion, in Haddington parish, Haddingtonshire, $1\frac{1}{2}$ mile SW of Haddington town. Its owner, Major James Flower Houstoun (b. 1842; suc. 1879), holds 5148 acres in the shire, valued at £2268 per annum.

Clerkston. See CLARKSTON.

Clermiston, an estate, with a mansion, in Forstorphine parish, Edinburghshire. The mansion stands $\frac{2}{3}$ mile N of Corstorphine village, and was built in 1792, at a cost of £3000. The estate belonged in 1771 to the eminent physician Sir Alexander Dick, forming till then a part of the barony of Corstorphine, and was afterwards sold to Samuel Mitchelson, who built the mansion. Sold again in 1795 to George Robinson for £11,000, and yet again in 1836 to Francis Jeffrey, Lord Jeffrey, for £15,250, it is now the property of Wm. Macfie, Esq., who owns 124 acres in the shire, valued at £443 per annum.

Clett, a rocky islet of Thurso parish, Caithness, about 80 yards from the extremity of Holburn Head. Rising to a considerable height from the sea, it is covered in summer by vast flocks of sea-fowl, and offers a grand appearance amid the surf of billows during storms.

Cleugh, a burn in Sorn parish, Ayrshire, rising, at 980 feet above sea-level, on the NW slope of Blackside, and running 4 miles south-westward to the river Ayr, between Sorn Castle and Sorn church. It intersects the castle grounds, traversing a richly-wooded glen, and making several romantic falls.

Cleughearn, a shooting-lodge of the Earl of Eglinton, in East Kilbride parish, Lanarkshire, $5\frac{3}{4}$ miles S of East Kilbride station.

Cleugh-Heads. See APPLGARTH.

Clickamier, a lake near Lerwick, Shetland. It has an island crowned with one of the largest round towers or burgs in Shetland; and, being partially drained in 1874, it was found to contain, at its southern extremity, some curious ancient sepulchral remains.

Cliff, a sound or strait and a hill-ridge in the SW of Shetland. The sound separates West Barray island from the Quarff district of the mainland; measures $6\frac{1}{2}$ miles in length, and from nearly $\frac{1}{2}$ mile to 2 miles in width; has a depth of 8 or 10 fathoms; is flanked, on both sides, by high grounds; and cannot be safely navigated in stormy weather. The hill-ridge, in Quarff district, flanking the eastern shore of the sound, has a maximum altitude of more than 500 feet.

Cliff, a beautiful loch in Unst island, Shetland, the largest of several in the valley which bisects the island from end to end. It measures about 3 miles by $\frac{1}{4}$ mile; contains loch-trout, running 3 to the lb.; receives the Burn of Baliasta; and sends off Cliff Burn to the Bay of Burrarfirth.

Clifton, a village in Killin parish, Perthshire, $\frac{1}{2}$ mile N of Tyndrum station. Lead mines, belonging to the Marquis of Breadalbane on the top of a hill $\frac{3}{4}$ mile WSW, employed over 100 men in 1839, but are now discontinued.

Clifton, the seat of malleable iron works in Old Monkland parish, Lanarkshire, merged in the burgh of Coatbridge. It has numerous iron-smelting furnaces and several rolling mills.

Clifton Hall, a mansion in the Edinburghshire section of Kirkliston parish, standing amid a beautiful park, which is bounded by the river Almond and the Union Canal, 2 miles W of Ratho. Its owner, Sir Jas. Ramsay-Gibson-Maitland, fourth Bart. since 1818 (b. 1848; suc. 1876), holds 4505 acres in the shire, valued at £14,246 per annum.

Clifton Park, an estate in Morebattle and Linton parishes, NE Roxburghshire. The mansion on it is in Linton parish, $1\frac{1}{2}$ mile NNW of Morebattle village; its owner, Rt. Hy. Elliot, Esq. (b. 1837; suc. 1873), holds 5258 acres in the shire, valued at £5178 per annum.

Clifton Hill (905 feet), $3\frac{1}{2}$ miles to the E, is a beautiful dome-shaped eminence, on the right bank of Bowmont Water.

Clintmains, a hamlet in Merton parish, SW Berwickshire, near the left bank of the Tweed, $1\frac{1}{2}$ mile NE of St Boswells, under which it has a post office.

Clints of Drumore, a height (950 feet) in the NE of Kirkmabreck parish, SW Kirkcudbrightshire, 9 furlongs N of Drumore station.

Clintwood, a vanished castle in Castleton parish, Roxburghshire, $4\frac{1}{4}$ miles NE of Newcastleton.

Clippens-Square. See BALAKLAVA.

Cloanden, an estate, with a mansion, near Auchterarder, SE Perthshire. Its owner, Robert Haldane, Esq., holds 747 acres in the shire, valued at £683 per annum.

Clober, an extensive bleachfield and a mansion in New Kilpatrick parish, on Allander Water, $\frac{1}{2}$ mile NNW of Milngavie. The mansion is a modern edifice, in the old English manor style.

Cloch, a small headland in Inverkip parish, Renfrewshire, at the southward bend of the Firth of Clyde, $1\frac{3}{4}$ mile E by S of Dunoon, 3 miles SSE of Strone Point, and $3\frac{3}{4}$ SSW of Barons Point. It has a lighthouse, a circular tower rising 76 feet above the water's level, built in 1797, and showing a fixed white light visible at a distance of 14 miles, and a fog signal, consisting of two differently pitched steam whistles; and it commands a very brilliant view of the opposite shores of the Firth.

Clochach, a village in Rathven parish, NW Banffshire, $2\frac{1}{2}$ miles S by E of Port-Gordon. It has a post office under Buckie.

Clochcan, a hamlet in Old Deer parish, NE Aberdeenshire, 3 miles SW of Stuartfield. A public school at it, with accommodation for 100 children, had (1891) an average attendance of 99, and a grant of £77, 15s. 8d.

Clochnabane. See CLACHNABEN.

Clochoderick, a huge isolated rock on the SW border of Kilbarchan parish, Renfrewshire, $2\frac{1}{4}$ miles SW of Kilbarchan town. It measures 22 feet in length, 17 in breadth, and 12 in height; consists of greenstone, the same in kind as that of neighbouring hills; and has been deemed 'Druidical,' but appears to be nothing more than a fragment of a compact hill mass, gradually isolated by the slow disintegration and washing away of surrounding softer portions of trap rock.

Clocksbriggs, a railway station near the mutual boundary of Forfar and Rescobie parishes, Forfarshire, on the Arbroath and Forfar railway, $2\frac{1}{2}$ miles E by N of Forfar.

Cloffin, a burn in the W of Moffat parish, Dumfriesshire. Formed by three head-streams, it runs 2 miles eastward to Evan Water, at a point $2\frac{3}{4}$ miles NNW of Moffat town.

Cloghill, an estate, with a mansion, in Newhills parish, Aberdeenshire, 5 miles W by N of Aberdeen.

Clola, a hamlet in Old Deer parish, E Aberdeenshire, 3 miles S of Mintlaw, under which it has a post office. At it is also a Free church, rebuilt about 1863.

Cloncaird Castle, a mansion in Kirkmichael parish, Ayrshire, on the right bank of Girvan Water, 5 miles ESE of Maybole. Dating partly from the 16th century, with a huge square tower, it received additions in 1814, forming an entirely new front.

Clonyard. See COLVEND.

Closeburn (12th century *Kylosbern*, 'church of Osbern'), a village and a parish of Nithsdale, Dumfriesshire. The village, standing 238 feet above sea-level, has a station on the Glasgow and South-Western railway, $11\frac{3}{4}$ miles NNW of Dumfries, $2\frac{3}{4}$ SSE of Thornhill, and $8\frac{1}{4}$ SSE of Glasgow; at it are a post office under Thornhill, an inn, and a Free church.

The parish is bounded N by Crawford in Lanarkshire, NE by Kirkpatrick-Juxta, E by Kirkmichael, SE by Kirkmahoc, SW by Keir, and NW by Morton. Its greatest length, from N by E to S by W, is $9\frac{1}{2}$ miles; from E to W it has a varying breadth of 5 and $7\frac{1}{2}$ miles, whilst in the S converging to a point; and its area is $29,347\frac{1}{2}$

acres, of which 245½ are water. The NITH flows 1½ mile S by E through the western corner of the parish, then 5½ miles SSE along the boundary with Koir; the Water of AE, hurrying 8 miles southward from its source upon Queensberry Hill on its way toward Kinnel Water, and so to the Annan, roughly traces all the eastern border; whilst from Morton Closeburn is parted by CAMPLE Water, winding southward and westward to the Nith. A number of burns run to these streams from the interior—Hen Grain, Clerk Grain, Pishnack Burn, Bran Burn, Capel Water, and Windygill Burn, south-eastward to the Ae; Crichope Burn, south-westward to the Cample; and Clauchrie Burn, southward to the Nith. Of these the most notable is Crichope Burn, which, rising in a moss near the northern extremity of the parish, forms, not far from its source, a beautiful cascade, the 'Grey Mare's Tail,' over a precipice of nearly 100 feet in sheer descent. Half a mile lower down the water has, in the course of ages, hollowed out to itself a narrow passage through a mass of red freestone, where a peculiarly romantic linn is upwards of 100 feet from top to bottom, and, although 20 feet deep, is yet so strait at its head that one might easily clear it, but for the yawning gulf below and the din of the water running its dark course. 'Inaccessible in great measure to man, this linn,' says the *Old Statistical*, 'was deemed the habitation of imaginary beings, and at the entrance there was a curious cell, the "Elf's Kirk," which, proving a good freestone quarry, has lately been demolished, and from the haunt of elves has been converted into abodes for men. In the days of the Covenanters, the religious, flying from their persecutors, found a safe hiding-place in Crichope Linn; and a chair, cut out by Nature in the rock, was in later times the resort of a shoemaker, and ever since has borne the name of the "Sutor's Seat."' By Sir Walter Scott, in his *Old Mortality*, this place was chosen for Balfour of Burley's lair. The only two sheets of water now of any size are Loch Ettrick (2¼ × 1 furl.) and Townhead Loch (2½ × 1 furl.), Castle Loch having been drained in 1859. Where the Nith quits the parish, close to Auldgirith station, the surface sinks to 92 feet above sea-level, thence rising northward and north-north-eastward to 784 feet near High Auldgirith, 847 at Clauchrie Hill, 1011 at Auchencairn Height, 1006 at Glencorse Hill, 1156 at Great Hill, 1045 at Sowens Knowe, 1431 at Queen Hill, 1675 at Wee Queensberry, 2285 at QUEENSBERRY, 1989 at Garroch Fell, and 2190 at Gana Hill, which culminates right on the Lanarkshire border. The rocks are chiefly Silurian and Devonian. Laminated sandstone, suitable for paving and slating, and limestone, have both been largely worked, the latter since 1770. The only ground comparatively level, between the railway and the Nith, has a fine rich loamy soil, which on the lower uplands changes to light dry earth, and further N to desolate moss and moor. Along the Nith the parish is finely planted, containing 1158 acres of woodlands; but few of the trees are more than 80 years old. Near the Castle is a sulphureous, and at Town-Cleugh, a chalybeate, spring. About a mile of the CATRAIL may be traced near Town-foot farm-steading; on Barmuir Hill is a 'Druidical' circle; and at different points there are seven tumuli and six cairns, the largest of which, Mid and Pottis Shank Cairns, are respectively 217 and 220 feet in circumference, and 12 and 9 feet high. Bronze celts and tripods have also been discovered, and two Roman cinerary urns were exhumed in 1828 in the garden of Wallace Hall. Closeburn's most interesting antiquity, however, is Closeburn Castle, a quadrangular tower, which, 56 feet high, has walls from 6 to 12 feet high, and consists of a ground-floor and three vaulted apartments. Hill Burton describes it as a featureless Scotch peel, which never seems to have possessed the Norman archway depicted in Grose's *Antiquities*; but, according to Dr Ramage, the Norman mouldings have in reality been plastered over. The barony of Kylosbern belonged to the crown in the reign of David I. (1123-54); his grandson, Alexander II., confirmed its possession, in 1232, to Ivan de Kirkpatrick, ancestor of that Roger de

Kirkpatrick who in 1305 'made siccar' of the Red Comyn at Dumfries, and also of the Empress Eugenie. Thomas Kirkpatrick, for loyalty to Charles I., in 1685 received a baronetcy, the eighth and present holder of which is Sir James Kirkpatrick (b. 1841; suc. 1880); but the estate was sold in 1783 to the Rev. Jas. Stuart-Menteth, and in 1852 to Douglas Baird, Esq., whose twin co-heiresses, Mrs Fred. Ern. Villiers and the Countess of Enniskillen, together hold 13,550 acres in the shire, valued at £11,219 per annum. A mansion built by the first baronet was, through the carelessness of drunken servants, burned to the ground on the night of 29 Aug. 1748, with all the family papers, portraits, and plate; the present Closeburn Hall is a very fine Grecian edifice. Wallace Hall School, giving education in English, mathematics, and modern and classical languages, was founded in 1723 by Jn. Wallaco, merchant in Glasgow, and a native of Closeburn. The dwelling-house was built in 1795, and the whole was greatly improved in 1842; Crauford Tait Ramage, LL.D. (1803-81), a zealous antiquary and man of letters, was rector from 1841. Natives of Closeburn were Dr John Hunter (1746-1837) and the Rev. Dr Gillespie (1778-1844), both professors of humanity at St Andrews, and Dr Aglionby Ross Carson (1780-1850), rector of Edinburgh High School; Rt. Paterson ('Old Mortality') has likewise been claimed, but really was born in Hawick. The fanatical Elspeth Buchan, with several of her followers, lodged in the outhouses of New Cample farm—now 'Buchan Ha'—from April 1784 to March 1787; once she was assailed as a witch, but protected by the sheriff, who afterwards tried 42 of the rioters. Closeburn has memories, too, of Burns, who about 1788 paid many a visit at the old castle to Willie Stewart, the father of 'Lovely Polly,' and factor to Mr Menteth (W. M'Dowall's *Burns in Dumfriesshire*, pp. 22-25). Four proprietors hold each an annual value of £500 and upwards, 2 of between £100 and £500, and 3 of from £20 to £100. Comprising the ancient parish of Dalgarnock since 1697, Closeburn is in the presbytery of Penpont and synod of Dumfries; the living is worth £344. The church (1741; 650 sittings) is rather dilapidated, and there is some talk of building a new one on a different site. There is also a Free church; and Closeburn and Lakehead (girls') public schools, and Gubhill and Wallace Hall Academy, with respective accommodation for 66, 110, 40, and 314 children, had (1891) an average attendance of 47, 45, 18, and 185, and grants of £30, 16s., £33, 15s., £29, 9s., and £168, 12s. 6d. Valuation £18,333, 11s. Pop. (1851) 1732, (1861) 1651, (1871) 1612, (1881) 1512, (1891) 1333.—*Ord. Sur.*, shs. 9, 10, 15, 16, 1863-64. See pp. 167-304 of C. T. Ramage's *Drumlanrig Castle and Closeburn* (Dumf. 1876).

Clouden. See CLUDEN.

Clousta, a bay or voe in Sandsting and Aithsting parish, Shetland, penetrating the land for 1½ mile in a southerly and south-easterly direction. It affords excellent anchorage and good shelter.

Clova, a hamlet and a *quoad sacra* parish of N Forfarshire, in Cortachy and Clova parish. The hamlet, Milton of Clova, stands, at 800 feet above sea-level, on the left bank of the South Esk, 1½ mile SSW of Loch Brandy, 15 miles N by W of Kirriemuir, and 19 S by W of Ballater; at it are a good inn, a public school, the church, almost rebuilt in 1730, and a Roman Catholic chapel. Its padlocked joughs were presented in 1870 to the Edinburgh Antiquarian Museum. On a neighbouring knoll are the ruins of a castle, the seat once of a branch of the Ogilvies. The parish is in the presbytery of Forfar and synod of Angus and Mearns; its minister's stipend is £105. Pop. (1871) 151, (1881) 105, (1891) 127.—*Ord. Sur.*, sh. 65, 1870.

Clova House. See AUCHINDOIR AND KEARN.

Clovenfords, a small village in Caddonfoot *quoad sacra* parish, and in the Selkirkshire section of Stow parish, on the left bank of Caddon Water, 9 furlongs N of its influx to the Tweed, and 3¼ miles W of Galashiels. At it are a station on the Peebles and Galashiels section of the North British, a post office under Galashiels, with money order and savings bank departments,

an inn, and the Tweed vineries, a splendid establishment heated by 5 miles of hot-water pipes, and yielding yearly 15,000 lbs. of grapes. John Leyden was schoolmaster here in 1792; Scott often came hither in the fishing season; and Wordsworth and his sister Dorothy here passed the night of 18 Sept. 1803.

Clovulin, a village in the district and 1 mile WSW of the village of Ardgour, N Argyllshire, near the W shore of Loch Linnhe.

Clow, a burn in Pettinain parish, Lanarkshire, running to the Clyde.

Cløy, a burn on the E side of Arran, Buteshire. It rises at 1480 feet above sea-level, and runs 4 miles NE and N by W to a confluence with the Shurtg and Rosie Burns, their united waters entering Brodick Bay $\frac{1}{4}$ mile further N.

Cluany, Loch. See CLUNIE.

Cluden, a small river of Kirkeudbright and Dumfries shires. It is formed by the confluence of the CAIRN and Old Water of Cluden, close to the beautiful Routing Bridge, on the mutual boundary of Kirkpatrick-Irongray parish in Kirkeudbrightshire, and Holywood in Dumfriesshire, $6\frac{2}{3}$ miles WNW of Dumfries by road. Thence it winds $6\frac{2}{3}$ miles east-south-eastward along the boundary between the shires, and falls into the 'sweeping Nith' at Lincluden, $1\frac{1}{2}$ mile N by W of Dumfries. It figures in our pastoral poetry as 'lonely Cluden's hermit stream,' but nevertheless has a soft and lovely character, connected rather with fields and woods and lawns than sheepwalks. It contains large yellow trout and a few pike; and is ascended by salmon, grilse, sea-trout, and herlings. Its salmon are a distinct variety from those of the Nith, thicker and shorter in the body, much shorter in the head, and generally of a darker hue.—*Ord. Sur.*, sh. 9, 1863.

Cluden, Old Water of. See OLD WATER.

Cluggy. See CASTLECLUGGY.

Clumlee, a hamlet and a headland in the E of Dumfriesshire parish, Shetland, 17 miles SSW of Lerwick.

Clune, an estate in the E of Carnock parish, Fife, $2\frac{1}{2}$ miles WNW of Dunfermline. It contains Balclune and Easter Clune hamlets; and includes rising grounds which command magnificent views.

Clunes, a station in Kirkhill parish, N Invernesshire, on the Highland railway, $7\frac{1}{2}$ miles W by N of Inverness. Near it is Clunes mansion.

Clunie (Gael. *cluaine*, 'place of the good pasture'), a parish in Stormont district, NE Perthshire, whose church, on the W shore of the Loch of Clunie, is $5\frac{1}{2}$ miles W by S of the post-town, Blairgowrie, and which contains the post-office hamlet of Forneth. It is bounded N by Kirkmichael, E by Blairgowrie, Kinloch, and Caputh, SW by Caputh, W by Caputh and Dowally-Dunkeld, NW by Logierait. In 1891 the Gourdie detached portion of the parish (649 acres) was transferred by the Boundary Commissioners to the parish of Caputh, while the Cairns portion of Caputh parish (414 acres) was transferred to Clunie parish. By another transference to Clunie parish from the parish of Caputh, of 'so much of the latter as lies to the north-east of the western march of the estate of Gourdie,' the Essendy detached portion was united to the main portion of Clunie. Baden Burn, rising on Meall Dubh, flows 2 miles SSE through the southern interior, then $2\frac{1}{2}$ miles along the Blairgowrie boundary, which for $1\frac{1}{4}$ mile more is traced by LORNTY Burn, flowing $1\frac{1}{2}$ mile ESE through Clunio from Loch Benachally. BUCKNY Burn, again, runs 2 miles S and W along the western border, and through the interior to the LUNAN, which itself winds 3 miles ESE through the southern division of the parish to the Loch of Clunie, next $1\frac{1}{2}$ mile E of the Loch of Drumallie. The Loch of Clunie, in shape resembling a triangle with southward apex, has an equal utmost length and breadth of 5 furlongs, is 84 feet deep, and contains pike, perch, trout, and eels; Loch BENACHALLY ($7 \times 3\frac{1}{2}$ furl.) is the other chief sheet of water. The surface sinks in the furthest S to 230, in the SE to 195 feet above sea-level; thence rising northward to 653 feet on the Craig of Clunie, a romantic mass of trap

rock, and to 560 near Stars of Forneth, 1045 on Arlick, 1594 on BENACHALLY, 1692 at Craig Wood, and 1775 on Meall Dubh, which culminates right on the Kirkmichael boundary. Granite, quartz, sandstone, and limestone are plentiful; and a fine blue slate, copper pyrites, and sulphate of barytes are found. Mineral springs are at Milton of Clunie, and a little to the E of Bognile. The soil of the arable land is generally light and gravelly, but yields good crops. Nearly 3000 acres are either regularly or occasionally in tillage, and hundreds of acres, waste not long ago, are covered now with thriving plantations of larch and Scotch pine. A number of cairns have disappeared, but part of the Piets' Dyke is traceable near Buckny Burn; near the church is a standing stone; and eight parallel mounds and trenches, known as the Steeds' Stalls, and said to have been formed by an advanced guard of the Caledonian host to watch the movements of the invading Romans, are on the SE slope of Gourdie Hill. On a large green knoll, too, 50 feet high, to the W of the Loch of Clunie, are vestiges of a 'summer palace or hunting-seat of Kenneth Macalpin,' according to the *Old Statistical*; and on an islet in the loch itself are the ruins of Clunie Castle. The islet, half an acre in extent, is evidently artificial, a crannoge probably or lake-dwelling; the castle, with walls 9 feet in thickness, is said to have been built by George Brown, Bishop of Dunkeld from 1485 to 1514, to have been a residence of the Earls of Airlie, and to have been the birthplace of the Admirable Crichton (1560-83). The last it certainly was not, for he was born at Eliock in Dumfriesshire; possibly, however, part of his boyhood was spent in this parish, where his father purchased an estate. The Clunie estate, which includes the loch, was purchased in 1892 from the Earl Airlie at £22,000 by Mr Wm. Cox of Lochee, owner of the adjacent estate of Snaigow. Clunie is in the presbytery of Dunkeld and synod of Perth and Stirling; the living is worth £182. The parish church, rebuilt in 1840, is a good Gothic structure, with a tower and 600 sittings; a Free church stands in the Essendy section. A public school, with accommodation for 141 children, had (1891) an average attendance of 94, and a grant of £100, 17s. 6d. Valuation (1891) £6857, 14s. 6d. Pop. (1801) 913, (1831) 944, (1861) 699, (1871) 603, (1881) 582, (1891) 489.—*Ord. Sur.*, sh. 56, 1870.

Clunie, a loch of Glenshiel and Urquhart parishes, on the mutual boundary of Ross and Inverness shires, 16 miles W by N of Fort Augustus. Lying 606 feet above sea-level, it has a length from W to E of $4\frac{3}{4}$ miles, whilst its width varies between 1 furlong and $\frac{1}{2}$ mile. At its head it receives the river Clunie, flowing $4\frac{3}{4}$ miles eastward, and at its foot sends off the river Moriston to Loch Ness; its northern shore is skirted by Wade's military road from Fort Augustus to Invershiel, and also, closer, by the more modern road thither from Invermoriston. A dreary, featureless lake, but one that affords good trout-fishing.—*Ord. Sur.*, sh. 72, 1880.

Clunie Water, a stream of Crathie and Braemar parish, SW Aberdeenshire, formed by two head-streams, Badoch Burn and Allt Bhruiddh, which rise at 2500 feet above sea-level, close to the Perthshire and Forfarshire borders. Thence it runs 7 miles north-by-eastward along rocky Glen Clunie, and falls into the Dee, 1 mile below Castleton of Braemar. Its chief affluent is CALLADER Burn. The Queen's 'last expedition' with the Prince Consort (16 Oct. 1861) lay up Glen Clunie.—*Ord. Sur.*, sh. 65, 1870.

Cluny, a parish of Aberdeenshire, whose church stands 2 miles SSW of Monymusk station on the Alford Valley railway, this being $20\frac{3}{4}$ miles NW of Aberdeen, with which it communicates daily by coach. The parish of Cluny had a detached part separated from the remainder of the parish by an intervening portion of the parish of Midmar. In 1891 the Boundary Commissioners effected an exchange of territory between these parishes, with the result of connecting the detached part of Cluny with the main portion of the parish, and of transferring to Midmar an intrusive peninsula of the

parish of Cluny. In order to equalize the exchange, as far as possible, Cluny received an additional portion of Midmar, which was taken from the north-east corner of the latter parish. Much of the southern boundary is traced by Kinnernie Burn; of the northern, by Tor Burn, which from the interior receives the Burn of Cluny, with its affluents, the Douglas, Corsindac, and Linton rivulets. The drainage belongs thus partly to the Dee, but chiefly to the Don. The surface sinks on the Tor Burn to 260 feet above sea-level, and over the eastern half of the parish nowhere much exceeds 600 feet; westward it rises to Black Hill (608 feet) and Green Hill (1607), which culminates right upon the Midmar border. Granite is the prevailing rock; and the soils vary from deep yellowish loam along the streams to light, dry, moorish earth on the hill slopes. A large area is under wood, the plantations of Scotch firs and larch ranging in age from 20 to 100 years, and in extent from 1 to 900 acres. Antiquities are three Caledonian circles, five standing-stones, and, in the western half of the parish, the ruins of Tilleicairn Castle, once held by Matthew Lumsden, who died in 1580, and who was author of *A Genealogical History of the House of Forbes*. Cluny Castle, rebuilt (1840-72) on the site of the 15th century stronghold of a Huntly Gordon, stands $1\frac{1}{2}$ mile S of Monymusk station, and is a stately castellated pile of grey granite, with central quadrangle, high parapets and corner turrets, a richly decorated oratory, and a pinetum comprising 400 varieties. Its owner, the widow of John Gordon, Esq. of Cluny (1822-78), who held 20,395 acres in the shire, valued at £13,714 per annum, in 1850 married Sir Reginald Cathcart, Bart. of Killochan. (See also BELCHESTER.) Other mansions are CASTLE FRASER and Linton House, the latter 3 miles SSE of Monymusk station; and in all 4 proprietors hold each an annual value of more, and 6 of less, than £100. Cluny is in the presbytery of Kincardine O'Neil and synod of Aberdeen; the living is worth £190. The parish church is a plain old building; and there is a Free church near Linton House. Three schools—Cluny public and Free Church, and Corenie (Lady Gordon Cathcart's female)—with respective accommodation for 153, 96, and 64 children, had (1891) an average attendance of 74, 67, and 57, and grants of £67, 14s. 6d., £60, and £49, 17s. 6d. Valuation £7526, 13s. 9d. Pop. (1801) 821, (1841) 959, (1861) 1254, (1871) 1366, (1881) 1298, (1891) 1217.—*Ord. Sur.*, sh. 76, 1874.

Cluny, a village in Auchterderran parish, Fife, 1 mile E of Cardenden station, and 4 miles NW of Kirkcaldy. Extensive collieries are in its eastern vicinity.

Cluny Castle, a mansion in Laggan parish, Invernesshire, on the left bank of the Spey, $8\frac{3}{4}$ miles WSW of Kingussie, by the road thence to Loch Laggan. It is the seat of the chiefs of the Clan Macpherson, a line remarkable for its loyalty to the house of Stewart, in the persons of Queen Mary, Charles I., the Old Chevalier, and Prince Charles Edward. The Cluny Macpherson at the time of the '45 distinguished himself at Clifton and Falkirk, and for nine years after led the life of a fugitive on his own estate, £1000 being set upon his head, and his house being plundered and burned. In the present castle—a massive turreted, two-storied, granite edifice—are various relics of the rebellion, as the target, lace wrist-ruffles, and an autograph letter of the Prince. There is also the black pipe chanter, on which depends the welfare of the house of Cluny, and which all true members of the Clan Vuirich believe to have fallen from heaven in place of that lost at the conflict on the North Inch of Perth. Cluny Castle was visited by the Queen and the late Prince Consort, from Ardverikie, in 1847. Its owner, Col. Ewen H. D. Macpherson of Cluny Macpherson, holds 42,000 acres in the shire, valued at £4251 per annum.—*Ord. Sur.*, shs. 63, 64, 1873-74.

Cluny, Hill of. See FORRES.

Cluny or Cluonie, Loch. See CLUNIE.

Clyde (Celt. *clwyd*, 'strong'; the *Clota* of Ptolemy), a river and a firth of western Scotland, and one of the chief commercial highways of the world. As to where

river ends and firth begins, authorities differ. At Glasgow, say some; at Dumbarton, more; and not until Gourock, according to Sir John Hawkshaw: where it seems best to side with the majority. Another moot point is as to the Clyde's true source. Little Clydes Burn, its commonly reputed head-stream, rises in Crawford parish, S Lanarkshire, $3\frac{1}{4}$ miles NW by N of the meeting-point of Lanark, Peebles, and Dumfries shires, at 1550 feet above sea-level, between Pin Stanc (1695 feet) and Clyde Law (1789), and within $\frac{3}{4}$ mile of head-streams of the Annan and the Tweed. So that, according to the time-honoured rhyme—

'Annan, Tweed, and Clyde
Rise a' out o' ae hill-side;
Tweed ran, Annan wan,
Clyde fell, and broke its neck owre Corra Linn.

Thence it runs $4\frac{1}{2}$ miles W by S, falling into the Clyde proper $3\frac{3}{4}$ miles SSE of Crawford village. The 'Clyde proper,' we say, inasmuch as the Clyde's real source, must rather be looked for in Daer Water, which rises in the extreme S of the parish of Crawford and of the shire of Lanark, at 1600 feet above sea-level, on the NE slope of Gana Hill (2190 feet), within $\frac{1}{4}$ mile of the Dumfriesshire border and of a sub-affluent of the Annan. It flows thence $10\frac{1}{2}$ miles northward to a confluence with Potrail or Powtrail Water, which, also rising in Crawford parish, and also close to the Dumfriesshire boundary, has a north-north-easterly course of 7 miles; and their united waters from this point onward are called, in the Ordnance Maps, the River Clyde.

The river Clyde has a total length, if one follows its windings, of 106 miles, viz., $17\frac{1}{2}$ from the head of Daer Water to its union with the Powtrail, 7 thence to Crawford, $36\frac{3}{8}$ from Crawford to Lanark Bridge, $14\frac{1}{8}$ from Lanark to Hamilton Bridge, $2\frac{3}{4}$ from Hamilton to Bothwell Brig, 14 from Bothwell to Glasgow Bridge, 10 from Glasgow to Old Kilpatrick, and 4 from Old Kilpatrick to Dumbarton. Its drainage area has been estimated at 1481 square miles, of which 39 belong to the South Calder, 50 to the North Calder, 22 to the Rotten Calder, 127 to the Kelvin, 93 to the White Cart, 107 to the Black Cart, and 305 to the Leven. Excepting for an eastward bend near Biggar, round the eastern base of Tinto, the Clyde at first takes an almost due northerly course to the near vicinity of Carnwath, receiving, on the left hand, Elvan Water, Glengonner Water, Duneaton Water, Robertson Burn, and Garf Water; on the right, Little Clydes Burn, Midlock Water, Camps Water, and Medwyn Water. Along its left bank lie the parishes of Crawford, Crawfordjohn, Wiston-Roberton, Symington, Covington, and Pettinain; along its right, of Crawford, Lamington-Wandel, Culter, Biggar, and Liberton. Next it winds west-by-southward, south-westward, and north-westward to Lanark, receiving Douglas Water on the left, at the point where it makes its sharp north-westward bend; forming above Lanark the famous falls of Bonnington, Corra, and Dundaff Linn; and having Pettinain, Carmichael, and Lesmahagow parishes on the left, Carnwath, Carstairs, and Lanark on the right. From Stonebyres Linn, below Lanark, the last of its four falls, it sweeps north-westward to Hamilton, and on to Bothwell and Uddingston, along the 'Trough of the Clyde,' its principal affluents here being the Nethan and the Avon to the left, Mouse Water and the South and North Calders to the right, whilst parishes on the left hand are Lesmahagow, Dalserf, Hamilton, and Blantyre, and on the right hand Lanark, Carluke, Cambusnethan, Dalziel, and Bothwell. From just below Uddingston to Rutherglen its course lies almost due W, with Cambuslang and Rutherglen parishes on the left, Old Monkland, Shettleston, and Calton on the right, and the Rotten Calder on the left being its principal tributary. Lastly, from Rutherglen to Dumbarton it resumes a north-westerly course, Govan, Renfrew, Inchinnan, and Erskine parishes lying to the left, Glasgow, Maryhill, Renfrew, New and Old Kilpatrick, and Dumbarton to the right, whilst on the left hand it receives the confluent White and Black Cart,

and on the right the Kelvin and the Leven. The approximate altitude of its channel is 2000 feet above sea-level at the source, 655 at Thankerton, 400 above Bonnington Linn, and 170 below Stonebyres Linn.

Such are the general features of the river Clyde, details being supplied in the articles on the above-named parishes, and the sub-articles therein referred to. But we cannot refrain from quoting this masterly sketch by Sir Arch. Geikie:—'Of the three rivers, the Clyde, the Forth, and the Tay, perhaps the most interesting is the Clyde. Drawing its waters from the very centre of the Southern Uplands, it flows transverse to the strike of the Silurian strata, until, entering upon the rocks of the lowlands at Robertson, it turns to the NE along a broad valley that skirts the base of Tinto (2335 feet), at this point of its course approaching within 7 miles of the Tweed. Between the two streams, of course, lies the watershed of the country, the drainage flowing on the one side into the Atlantic, on the other into the North Sea. Yet instead of a ridge or hill, the space between the rivers is the broad flat valley of Biggar, so little above the level of the Clyde that it would not cost much labour to send that river into the Tweed. Indeed, some trouble is necessary to keep the former stream from eating through the loose sandy deposits that line the valley, and finding its way over into Tweeddale. That it once took that course, thus entering the sea at Berwick instead of at Dumbarton, is probable; and if some of the gravel mounds at Thankerton could be reunited, it would do so again. The origin of this singular part of the watershed is probably traceable to the recession of two valleys, and to the subsequent widening of the breach by atmospheric waste and the sea. From the western margin of the Biggar flat the Clyde turns to the NW, flowing across a series of igneous rocks belonging to the Old Red sandstone series. Its valley is there wide, and the ground rises gently on either side into low undulating hills. But often bending back upon itself and receiving the Douglas Water, its banks begin to rise more steeply, until the river leaps over the linn at Bonnington into the long, narrow, and deep gorge in which the well-known Falls are contained. That this defile has not been rent open by the concussion of an earthquake, but is really the work of subaerial denudation, may be ascertained by tracing the unbroken beds of Lower Old Red sandstone from side to side. Indeed, one could not choose a better place in which to study the process of waste, for he can examine the effects of rains, springs, and frosts, in loosening the sandstone by means of the hundreds of joints that traverse the face of the long cliffs, and he can likewise follow in all their detail the results of the constant wear and tear of the brown river that keeps ever tumbling and foaming down the ravine. A little below the town of Lanark, Mouse Water enters the Clyde through the dark narrow chasm beneath the Cartland Crags. There, too, though

"It seems some mountain, rent and riven,
A channel for the stream has given,"

yet after all it is the stream itself that has done the work. Nay, it would even appear that this singularly deep gorge has been in great measure cut out since the end of the Age of Ice, for there is an old channel close to it filled up with drift, but through which the stream has evidently at one time flowed. Running still in a narrow valley, the Clyde, after receiving Mouse Water, hurries westward to throw itself over the last of its lins at Stonebyres, and to toil in a long and dark gorge until, as it leaves the Old Red sandstone, its valley gradually opens out, and it then enters the great Lanarkshire coalfield. From the top of the highest Fall to the foot of the lowest, is a distance of $3\frac{3}{4}$ miles, in which the river descends about 230 feet, or 61 feet in a mile. From Stonebyres Linn to the sea at Dumbarton, the course of the Clyde is a distance of fully 42 miles, yet its fall is only 170 feet, or about 4 feet $\frac{1}{2}$ inch in a mile. As it winds among its broad meadows and fair woodlands, no one ignorant of the geology of the district would be likely to imagine that this wide level

valley really overlies a set of strata which have been tilted up and broken by innumerable dislocations. Yet such is the fact. The flat haughs of the Clyde were not laid out until after the curved and fractured coal-measures had been plained down, and no extant trace of these underground disturbances remained. The sea may have had much of the earlier part of the work to do, and may have lent its aid now and again during the successive uprisings and sinkings of the land, but we shall, perhaps, not greatly err in attributing mainly to the prolonged action of rains and frosts, and of the Clyde itself, the excavation of the broad valley in which the river flows across the coalfield until it reaches the sea between the hills of Renfrew and Dumbarton.'

The FIRTH OF CLYDE has a length of $64\frac{1}{4}$ miles, viz., $4\frac{3}{4}$ from Dumbarton to Port Glasgow, $2\frac{1}{2}$ from Port Glasgow to Greenock, 5 from Greenock to opposite Kilm, and 52 thence to Ailsa Craig, midway between Girvan and the Mull of Kintyre. Its breadth is 1 mile at Dumbarton; $3\frac{3}{8}$ miles from Greenock to Helensburgh; $1\frac{1}{2}$ from Kempock Point to Kilcreggan; $3\frac{3}{8}$ from Cloch Point to Barons Point, 3 to Strone Point, and $1\frac{3}{4}$ to Dunoon; 2 from Wemyss Point to Inellan pier; $5\frac{1}{2}$ from Largs Bay to Scoullag Point; $1\frac{1}{8}$ from Largs to the nearest part of the Great Cumbrae; $2\frac{1}{4}$, at the narrowest, from the Great Cumbrae to Bute; $1\frac{1}{2}$ from Bute to the Little Cumbrae; $9\frac{7}{8}$ from Farland Head to Sannox in NE Arran; 13 from Turnberry to Dippin Head in SE Arran; and 37 from Girvan to the Mull of Kintyre. It divides in its course the shires of Renfrew and Ayr from those of Dumbarton, Argyll, and Bute, having, on the left hand, the parishes of Erskine, Port Glasgow, Greenock, Innerkip, Largs, West Kilbride, Ardrossan, Stevenston, Irvine, Dundonald, Monkton, Prestwick, Newton-upon-Ayr, Ayr, Maybole, Kirkoswald, and Girvan; on its right, Cardross, Roseneath, Dunoon-Kilmun, Bute, and Kintyre. Both shores are bordered with the low green platform of the old sea-margin—a natural terrace thickly fringed with towns and villages and pleasant mansions. Beautiful itself, with its backgrounds of hill and mountain, the Firth of Clyde sends off five branches that equal, if not surpass, it—Gare Loch, Loch Long, Holy Loch, Loch Striven, and the Kyles of Bute. The tide ascends it up to Glasgow; and as low as Greenock its channel is beset with shoals and banks, which appear at low water, but which, ceasing there, give place to the unbroken stretch of firth that, widening and contracting, then widening out again, at last bends southward on its way to the open sea.

In 1566 the townsfolk of Glasgow, Renfrew, and Dumbarton attempted, seemingly with scant success, to open up a formidable sandbank at Dumbuck, above Dumbarton; in 1622 the magistrates of Glasgow, buying 13 acres, laid out thereon the town of Port Glasgow, with harbours and the first graving-dock in Scotland; in 1688 they built a quay at the Broomielaw; and in 1740 'the Council agreed that a trial be made this season of deepening the river below the Broomielaw, and remitted to the Magistrates to cause to do the same, and go the length of £100 sterling of charges thereupon, and to cause build a flatt-bottomed boat, to carry off the sand and chingle from the banks.' In 1755 Smeaton presented a report, in which he notes that of twelve different shoals between Glasgow and Renfrew the 'shoalest' places, Pointhouse Ford and Hirst, had a depth of $1\frac{1}{2}$ and $1\frac{1}{2}$ feet at low, and $3\frac{3}{8}$ and $3\frac{3}{8}$ feet at high, water; these, now the western limit and within the harbour of Glasgow, having a present depth of 16 at low, and 26 feet at high, water. By Smeaton's advice, the first Act of Parliament (1759) was applied for, whose preamble runs:—'Whereas the river Clyde from Dumbuck to the Bridge of Glasgow is so very shallow in several parts thereof that boats, lighters, barges, or other vessels cannot pass to or from the City of Glasgow except it be in the time of flood or high-water at spring-tides; and if the same was cleansed and deepened, and the navigation thereof made more commodious by a lock or dam over the same, it would be a great advantage to the trade and manufactures of the city and parts adjacent and to the public in general.'

But the earliest marked improvement in the navigation was started in 1768 by Mr John Golborne of Chester, who initiated the system of contracting the river by the construction of rubble jetties, and of removing the gravel shoals by dredging and ploughing. His 'Estimate of the Expense of Improving the Navigation of the Clyde' amounted to only £8640. In 1769 James Watt, examining the declivity of the river's bed from the Broomielaw Quay to Dumbreck Ford, found the low-water depth to be 14 inches at Hirst Ford, and at Dumbreck Ford 2 feet. The second Act was passed in 1770, under which, three years later, Golborne contracted to make Dumbreck Ford 6 feet deep and 300 feet wide at low water; its actual depth was 14 feet in 1781. Next Rennie in 1799 recommended the shortening of some of Golborne's jetties, the lengthening of others, and the construction of 200 new ones, from 50 to 550 feet long, between Glasgow Bridge and Bowling; and both Telford and Rennie presented reports in 1806 and 1807, which were followed by new Acts of 1809 and 1825, the first giving power to deepen the river till it is at least 9 feet deep in every part thereof between Glasgow and Dumbarton, the second to deepen it between Glasgow and Port Glasgow till such time as it is at least 13 feet deep. The deepening, widening, and straightening of the channel was carried on till 1836, when Mr Walker reported that 'there is now at the Broomielaw from 7 to 8 feet at low water, while the lift of a neap-tide at Glasgow Bridge—which was only sensible in 1755—is 4 feet, and of a spring-tide 7 or 8 feet, making 12 feet depth at high water of a neap, and 15 feet of a spring, tide; so that the river which, by artificial means, was to be rendered capable of taking craft of about 30 or 40 tons to Glasgow, has, by what Golborne calls "assisting nature," been rendered capable of floating vessels nearly ten times the burthen.' A fifth Act was passed in 1840; and under this, with several later Acts, the river improvements have since been carried out, with the result that the available depth of channel—only 15 feet at high water in 1839—is now 26 feet, while by a recent resolution of the Clyde Trustees it is intended still further to deepen the river throughout its entire length. The following table shows the width of the river at various points:—

WHERE AT.	1800.	1840-49.	1891.
Mouth of the Cart, . . .	800 feet.	275 feet.	500 feet.
Renfrew,	340 "	245 "	410 "
Finnieston Quay,	160 "	400 "
Napier's Dock,	150 "	490 "

Narrowing the channel by jetties, ploughing, and harrowing have all at times been employed, but dredging has been the principal means. The first steam-dredger was started in 1824, and 'it is undoubtedly,' says Mr Deas, 'to the application of steam power to dredgers, and to the adoption of steam hopper barges for carrying away the dredged material to the sea, that the rapid enlargement of the river and harbour in recent years are due; but for the introduction of the latter it would have been well-nigh impossible to have disposed of the enormous quantity now lifted'—6,557,212 cubic yards in the years 1885-89; 1,413,512 in 1889-90; 1,293,680 in 1890-91; and 26,116,138 in the 21 years 1870-91. 'The deepening and widening,' he sums up, 'of the Clyde have increased the value of the lands on its sides through Glasgow and seaward a hundredfold; created Govan, Partick, and the various other burghs which environ Glasgow; given wealth to thousands, and the means of life to hundreds of thousands.' The revenue of the Clyde Trustees was £331,492 in 1888-89; £356,202 (the largest ever received) in 1889-90; and £354,580 in 1890-91. The expenditure in the last year was £324,192, including £25,779 for dredging and general maintenance; and in the same year the goods

exported and imported amounted to 4,477,506 tons. There are two docks connected with the harbour—the Queen's Dock on the north and Kingston Dock on the south side. Cessnock Dock at Govan, much larger than either of these, is at the present time being proceeded with. For up and down harbour traffic there were in 1892 10 'Clutha' steamers, which carried in 1891 2,625,243 passengers, against 2,177,974 in 1890. For cross-river traffic there were 15 row boats, 10 steam ferries, and 3 carriage ferry boats—one (the 'Finnieston') with elevating tidal platform. The number of vehicles carried across in 1890 was 69,000, in 1891 (the 'Finnieston's' first year) 201,000.

Details of the Clyde's commerce and full descriptions of its harbours must be reserved for articles on the head ports, Glasgow, Port Glasgow, Greenock, Ardrossan, Irvine, Troon, Ayr, and Campbeltown; but its shipbuilding trade, dating from 1718 or thereabouts, and now the most important in the kingdom, may here be glanced at. In January 1812, Henry Bell launched on the Clyde his *Comet*, the first European boat successfully propelled by steam; during the seven years 1846-52 there were built here 247 steamships of 147,604 tons. Of vessels, both sailing and steam, Clyde yards turned out 194 of 192,392 tons in 1885; 152 of 172,765 in 1886; 165 of 184,794 in 1887; 234 of 273,631 in 1888; 219 of 336,065 in 1889; 258 of 352,124 in 1890; and 341 of 326,475 in 1891. In the preceding six years the output in tonnage was—in 1879, 157,605; 1880, 248,656; 1881, 327,013; 1882, 382,671; 1883, 404,383; 1884, 262,022. The percentage of sailing to total tonnage launched in the period from 1879 to 1884 was 12·28; while in that from 1885 to 1891 it had risen to 26·56.

The river improvements are credited with having destroyed one industry—the salmon fishing that flourished once above Dumbarton. Even to-day the Clyde Trustees pay upwards of £200 a year to the burgh of Renfrew for damage done to its fisheries. It seems questionable, however, whether the fish could have survived another hurtful agency—that pollution, namely, which has formed the subject of reports by Dr Frankland and Mr Morton in 1872, Mr M'Leod in 1875, and Sir John Hawkshaw in 1876. Experiments made with floats in 1857-58 by Messrs Bateman and Bazalgette showed that sewage entering the river at the centre of the city, when the volume of water was small, travelled only 2½ miles a week; and this slow progress can hardly have been quickened by the levelling of the river's bed below Glasgow, or by the large abstraction of water caused by the River Supply Works at Westhorn, at the extreme E boundary of the city, which, with two reservoirs, each holding 400,000 gallons, were completed in 1877 at a cost of £30,000. So that, 'in summer weather, the time during which the river is made to loiter on its way to the sea is more than sufficient to establish in full operation those processes of putrefactive fermentation—inevitable whenever the thermometer exceeds 55° Fahr.—to which the formation of sewer gas and other filthy products of this fermentation is due.' Glasgow is the chief, but by no means the only offender; the paraffin oil, iron, coal, paper, cotton, and dye works of New Lanark, Blantyre, Airdrie, Coatbridge, and other seats of industry all helping to swell the liquid mass of pestilence. Appliances have been erected in Glasgow to at any rate abate the nuisance; but their consideration must be reserved for our article on GLASGOW. In the waters of the upper Clyde and its tributaries good trout fishing still may be got, at Abington, Robertson, Lamington, and Crossford; and even still a few salmon ascend as high as the Falls. Strangely enough, too, they and their fry are now and then taken above the Falls; but these must be Tweed fish, and not Clyde fish at all, carried over from Biggar Water in times of heavy spate.

On the Clyde's memories we must not linger, more than to indicate the curious contrasts offered along its banks—hill-forts and a Roman road in Crawford parish, and the Caledonian railway; the 'Mucklewraths' of Bothwell Brig, and Livingstone toiling in Blantyre cot-

ton-mill; Blantyre's and Bothwell's ruins, and Cambuslang, with its memorable 'Wark;' Glasgow's cathedral, and Glasgow's factories; Antoninus' Wall and the chimneys of Paisley; Dumbarton Rock, and Port Glasgow; Greenock, and Cardross, where died the Bruce; Agricola's and Haco's war-galleys, and the royal yachts of Victoria and Alexander. The river has found its *sacer vates* in John Wilson, whose *Clyde, A Descriptive Poem*, appeared in 1764; but a finer, because less laboured, picture of its beauties is given by Dorothy Wordsworth, who, with her brother and Coleridge, drove down its valley from Lanark to Dumbarton in the August of 1803. See pp. 31-62 of her *Tour in Scotland*; Sir Archibald Geikie's *Scenery of Scotland*; Sir John Hawkshaw's *Report on the Pollution of the Clyde and its Tributaries* (1876); Mr James Deas' *River Clyde and Harbour of Glasgow* (1881); W. J. Millar's *The Clyde from its Source to the Sea* (1888); Mr James Nicol's *Vital, Social, and Economic Statistics of the City of Glasgow* (1891).—*Ord. Sur.*, shs. 15, 23, 24, 31, 30, 29, 21, 13, 1864-78.

Clydebank, a burgh in Old Kilpatrick parish, Dumbartonshire, and a *quoad sacra* parish, partly also in Renfrew parish, Renfrewshire. On the right bank of the Clyde, 2 miles NW of Renfrew, it was erected into a police burgh in 1886, having been, so recently as 1872, a purely rural or agricultural district. It includes Dalmuir, Kilbowie, and Yoker, with extensive shipbuilding yards, the works of the Singer Manufacturing Co. and of the Clyde Trust, chemical works, distilleries, a gas-work, a post office, with money order, savings bank, and telegraph departments, British Linen Co.'s branch bank. New burgh buildings, containing a public hall, were built in 1893. There are 2 Established, 2 Free, and 2 U.P. churches, a Union, an Episcopal, a Wesleyan, and a Baptist church, a R. C. chapel and school, and a public school. The last, with accommodation for 1692 children, had (1891) a day and evening average attendance of 924 and 63, and grants of £980 and £24, 16s. The *quoad sacra* parish, St James, was constituted in 1875, and is in the presbytery of Dumbarton and synod of Glasgow and Ayr. Pop. of burgh (1891) 9998.

Clyde Iron-works, a village, with large pig-iron works, in the SW corner of Old Monkland parish, Lanarkshire, on the right bank of the Clyde, in the southern vicinity of Tolleross, 3 miles ESE of Glasgow. Pop. (1881) 670, (1891) 616.

Clydesdale, either the entire basin of the Clyde or the immediate valley of the river, or the part of that valley within Lanarkshire, or the section of the valley between Lanark and Bothwell. The first and second of these senses of the name are ancient and almost obsolete. The third is still in use, designating a region famous for mineral wealth, for manufacturing industry, and for a splendid breed of cart-horses. The fourth, too, is still in use, characterising a famous orchard region. Clydesdale gives the title Marquis (cre. 1643), in the peerage of Scotland, to the Duke of Hamilton. See CLYDE and LANARKSHIRE.

Clydesdale Iron-works, a manufacturing village in Bothwell parish, Lanarkshire, near Holytown station. Pop. (1881) 1117, (1891) 1227.

Clydesdale Junction Railway. See CALEDONIAN RAILWAY.

Clyder, a small watering-place, consisting of neat cottages and a few shops, in Rosneath parish, W Dumbartonshire, on the W side of Gare Loch, nearly opposite Row, and 1 mile NNW of Rosneath village; at it are a post office under Helensburgh, a hotel, and an iron U.P. church (1881). The uplands around are favourite sites for bee-hives, their heather being singularly rich in nectar and pollen. At one time it was not uncommon for a hive brought hither, weighing 18 lbs., to be taken home in six or seven weeks' time weighing 57 lbs. Pop. (1891) 331.

Clyne, a parish of E Sutherland, containing the coast village of BRORA, with a station on the Sutherland railway and a post office. It is bounded NW by Farr, N by Kildonan, NE by Kildonan and Loth, SE by the German Ocean, and SW by Golspie and Rogart. Its

utmost length is 21½ miles from NW to SE, viz., from Creag nah-Iolaire to Brora; its width from NE to SW varies between 3½ and 8½ miles; and its area is 75,911½ acres, of which 288½ are foreshore and 1110 water. The seaboard, 3½ miles long, is low and sandy, followed at no great distance by the railway. The river BRORA flows 1½ mile E along the Rogart boundary, next 12½ miles ENE, SE, and E, through the interior to the sea at Brora village; its principal affluent, the BLACKWATER, rising on Ben-an-Armuinn, in the NW angle of the parish, runs 15½ miles SW, partly along the Rogart boundary, but chiefly through the interior, and itself receives SKINSDALE river, which has a winding course—eastward, south-eastward, and southward—all within Clyne parish, of 13 miles. Loch BRORA (4½ miles × 3½ furl.) is much the largest sheet of water. Others are Gorm Loch Béag (3 × 1½ furl.) and triangular Gorm Loch Mor (4 × 3½ furl.) to the N, and Loch Bad na h-Earba (3½ × 2 furl.) and An Eilthirich (3 × 2 furl.) to the S of the Blackwater; besides Lochs Bad an Aon-Tighe (6 × 2 furl.), BEANNACH (4½ × 3 furl.), and Gruideach (3½ × 2 furl.) on the Rogart border, and 22 tinier tarns. The surface has a general north-westward rise, elevations to the S of the Brora and the Blackwater being *Cagar Feosaig (1239 feet), *Beinn nau Corn (1706), Carrol Rock (684), Kilbrare Hill (1063), and Cnoc Leamhnachd (961), where asterisks mark those summits that culminate on the border of the parish; and to the N, Socach Hill (730), *Ascna Greine (924), Beinn Chol (1767), BEN SMEORALE (1592), *Meall au Liath Mor (1608), Cnoc a Ghrianiann (689), *Cnoc a Chruabaich Mhoir (1368), *Cnoc an Leathaid Mhoir (1423), Creag Mhor (2338), and *Creag nah-Iolaire, the two last being summits of BEN-AN-ARMUINN. Jurassic rocks occur along the coast, and include coal, sandstone, limestone, and shale. The soil around Brora is light and gravelly, naturally poor; but, for its hilly character, the parish comprises a considerable amount of arable land, held mostly in small holdings. Of sheep farms the largest is Kilcolmkill, on the northern shore of Loch Brora, it being leased in 1879 by General Tod Brown for £1171. At Clynelish, 1¼ mile NNW of Brora, is the only distillery in the county. Coal has been found, and is worked to a considerable extent, and bricks and tiles are made. Other industries have been already noticed under Brora. Kilcolmkill occupies the site of a Columban cell, and was a seat of a branch of the Gordons; the Duke of Sutherland is almost sole proprietor. Clyne is in the presbytery of Dornoch and synod of Sutherland and Caithness; the living is worth £164. The parish church, built about 1770, and enlarged and repaired in 1827, contains 900 sittings, and stands 1½ mile NNW of Brora. At the latter there is also a Free church; and Clyne public school, with accommodation for 250 children, had (1891) an average attendance of 168, and a grant of £134, 16s. 6d. Valuation, £5785. Pop. (1801) 1643, (1851) 1933, (1861) 1886, (1871) 1733, (1881) 1812, (1891) 1713.—*Ord. Sur.*, shs. 103, 109, 108, 1878-80.

Clynelish. See CLYNE.

Clyth, a coast hamlet of Latheron parish, Caithness, 2¼ miles E of Lybster. A strong castle on a rock here, overhanging the sea, belonged to one Gunn, justiciary of Caithness, who was basely murdered by Keith, Earl Marischal, in 1478. A baylet, Clyth harbour, lies open to the SE; and a stream, Clyth Burn, runs 3½ miles south-south-eastward to the sea. A public school, called Newlands of Clyth, with accommodation for 150 children, had (1891) an average attendance of 91, and a grant of £92, 15s. 6d.

Cnoc. See KNOCK.

Coalden, a collier village in Auchterderran parish, Fife, 1½ mile E by N of Cardenden station, and 4¼ miles NNW of Kirkealdy.

Coalford, a village of central Fife, 2 miles from Ladybank station.

Coalhall, a village in the southern detached district of Stair parish, Ayrshire, on Drongan estate, 7 miles E by S of Ayr. An extensive pottery of black and

brown earthenware here has long exported its produce to many parts of Scotland, and even to America.

Coalheugh, a copious chalybeate spring in Cromarty parish, Cromartyshire. Situated in the front of a wooded ravine, it originated in an abortive boring for coal, and has been surmounted by a small dome of hewn stone.

Coalsnaughton, a collier village of Clackmannanshire, in the parish and 1 mile S by E of the town of Tillinoultry. It has a public school. Pop. (1891) 838.

Coalstoun or Colstoun House, a mansion in the parish and 2½ miles S of the town of Haddington, on the right bank of Gifford or Coalstoun Water. Here in a silver box is preserved the 'Coalstoun pear,' one version of whose legend runs as follows:—In the 13th century a Broun of Coalstoun married the daughter of Hugo of Yester, the famous warlock of Gifford, described in *Marmion*. As the bridal party was on its way to church, the wizard-lord stopped it beneath a pear-tree, and, plucking one of the pears, gave it to his daughter, saying that he had no dowry to bestow, but that as long as that gift was safe good fortune would never desert her or her descendants. In 1805, Christian, only child and heiress of Chs. Broun of Coalstoun, married the ninth Earl of Dalhousie; and, in 1863, Susan-Georgiana, daughter and co-heiress of the Marquis of Dalhousie, married the Hon. Rt. Bourke (b. 1827; created Lord Connemara in 1887), who was foreign under-secretary from 1874-1880.

Coalton, a village in Kettle parish, Fife, 1½ mile SE of Kettle town.

Coalton, a village in Wemyss parish, Fife, near the coast and 1¼ mile N of West Wemyss, with a post office.

Coaltown, a village, with a public school, in Markinch parish, Fife, 2 miles S of Markinch, with a post office.

Coalyburn, a hamlet on the SE border of Linton parish, Peeblesshire, with a station (Macbie Hill) on the Leadburn and Dolphinton railway, 4¼ miles WSW of Leadburn Junction.

Coalyland or Collyland. See ALLOA.

Coatbridge, a municipal burgh of Old Monkland parish, Lanarkshire. It stands, at 300 feet above sea-level, on the Monkland Canal, and in the midst of a perfect network of railways, being 2 miles W by S of Airdrie, 8¾ E of Glasgow, and 34 W by S of Edinburgh. Fifty years since it was only a village; and its rapid extension is due to its position in the centre of Scotland's chief mineral field. The Airdrie and Coatbridge district comprises some twenty active collieries; and in or about the town are several establishments for the pig-iron manufacture, malleable iron and steel works, and numerous rolling mills. Nor are these the only industries; boilers, tubes, tinplate, firebrick and fireclay, bricks and tiles, oakum, railway waggons, etc., being also manufactured. It is governed by a provost, 4 bailies, and 15 councillors, with a treasurer and dean of guild. Splendid municipal buildings are in course of erection. Coatbridge, in its growth, has absorbed, or is still absorbing, a number of outlying suburbs—Langloan, Gartsherrie, High Sunnyside, Coats, Clifton, Drmm-pellier, Dundyvan, Summerlee, Whifflet, Coatdyke, etc. Fire, smoke, and soot, with the roar and rattle of machinery, are its leading characteristics; the flames of its furnaces cast on the midnight sky a glow as if of some vast conflagration. It has stations on the Caledonian and North British railways, a post office (1894), with money order, savings bank, insurance and telegraph departments, branches of the Clydesdale, Commercial, National, Royal, and Union banks, several hotels, the Alexander Hall, a reading room, gas-work, a water supply conjointly with Airdrie, and a Wednesday paper, the *Coatbridge Express*. A theatre and music hall, seating 2000 spectators, was opened in 1875; at Langloan is the West End Park, where in 1880 a red granite fountain was erected in memory of Janet Hamilton (1795-1873), the lowly Coatbridge poetess; and a fine public park was in 1887 gifted by Mr Weir of Kildonan. New Municipal Buildings, containing Town-Hall, Municipal Chambers, and Police buildings, were erected in 1894, on ground presented by W. Weir, Esq. Gartsherrie *quoad*

sacra church (1839; 1050 sittings) cost over £3300, and is a prominent object, with a spire 136 feet high; and Coats *quoad sacra* church (1875; 1000 sittings) is a handsome Gothic edifice, built from endowment by the late George Baird of Stitchell. Of 4 Free churches—Middle, East, West, and Whifflet—the finest was built in 1875; and other places of worship are 3 U.P. churches, a Congregational church, an Evangelical Union church, a Baptist church, a Wesleyan church (1874), St John's Episcopal church, and two Roman Catholic churches. Besides other schools noticed under OLD MONKLAND, Coatbridge and Coats public school, Langloan public school, and St Patriek's and St Augustine's Roman Catholic schools, with respective accommodation for 1682, 552, 588, and 489 children, had (1891) an average attendance of 1102 day and 102 evening, 385 day and 81 evening, 403, and 416, and grants of £1242, 11s. 6d. and £52, 12s., £407, 11s. 8d. and £48, 12s., £395, 14s. 6d., and £364. There is, besides, the Coatbridge Technical School and West of Scotland Mining College. Valuation of burgh (1892) £132,024, 4s. 3d. Pop. (1831) 741, (1841) 1599, (1851) 8564, (1861) 12,006, (1871) 15,802, (1881) 24,812, (1891) 30,034.—*Ordn. Sur.*, sh. 31, 1867.

Coatdyke, a village chiefly in Old Monkland, but partly also in New Monkland, parish, Lanarkshire, 1 mile WSW of Airdrie, and 1 E of Coatbridge, having a post office, with money order, savings bank, and telegraph departments. A U.P. mission station was opened here in 1881. See COATBRIDGE.

Coates or West Coates. See EDINBURGH.

Coats, a *quoad sacra* parish formed in 1874 from the civil parish of Old Monkland, Lanarkshire, and including part of the town of COATBRIDGE. It is in the presbytery of Hamilton and synod of Glasgow and Ayr. Pop. (1881) 3928, (1891) 5807.

Cobairdy, an estate, with a modern mansion, in Forgue parish, NW Aberdeenshire, 5 miles NE of Huntly.

Cobbler. See BEN ARTHUR.

Cobinshaw, a village and an adjoining reservoir in West Calder parish, Edinburghshire. It has a station on the Caledonian railway, 18 miles SW of Edinburgh. The reservoir, lying 880 feet above sea-level, has an utmost length from SSW to NNE of 1½ mile, whilst its breadth varies from 1 to 3½ furlongs. Its head just falls within Lanarkshire, and its western shore is closely followed by the Carstairs and Edinburgh fork of the Caledonian railway. Formed to supply the Union Canal, it presents the appearance of a bleak natural lake; it was stocked recently with trout and salmon ova from the Tay, the Tweed, and from Ireland. Pop. (1891) 309.

Coburty. See ABERDOUR, Aberdeenshire.

Cochno. See COCKNO.

Cochrage Muir, an extensive tract of barren uplands, formerly in Kinloch parish, Perthshire, 4½ miles NW of Blairgowrie town, but placed in Blairgowrie parish by the Boundary Commissioners in 1891. Covered with moss and heather, it long supplied peats to a large extent of surrounding country; and it accidentally took fire in the summer of 1826, and continued to burn till saturated with the snows of the following winter and spring.

Cochrane, an ancient barony on the W side of Abbey parish, Renfrewshire. It belonged from the 14th century to the family of Cochrane, of whom Sir Wm. Cochrane of Cowdon was ennobled as Baron Cochrane of Dundonald in 1647, as Earl of Dundonald and Lord Cochrane of Paisley and Ochiltree in 1669. By the eighth Earl it was sold about 1760; and the greater part of it now belongs to Houstoun of Johnstone.

Cockairney, an estate, with a mansion, in Dalgety parish, Fife, 1½ mile W of Aberdour.

Cock Burn. See COCKUM.

Cockburnlaw, a conspicuous hill in Duns parish, Berwickshire, culminating 4 miles NNW of Duns town. Its base, 6 miles in circuit, is on three sides encompassed by the Whitadder; its conical top rising to the height of 1065 feet above sea-level, shows traces of an ancient camp, and serves as a landmark to mariners; and its rocks are granitic, while those of all the neighbouring

Lammermuirs are greywacke. On the NE slope are the scanty remains of Edinshall (Edwin's hall), one of the three 'brochs' or dry-built round towers that are known to exist on the Scottish mainland to the S of the Caledonian valley. This one consisted of two concentric circles, the diameter of the innermost being 40 feet, the thickness of the walls 7 feet, and the spaces between the walls 7 and 10 feet. The said spaces were arched over, and divided into cells of 12, 16, and 20 feet. The stones were not cemented by any kind of mortar; they were chiefly whinstone, locked into one another with grooves and projections.

Cockburnspath (anc. *Colbrundspath*), a village and a coast parish in the N of Berwickshire. The village stands $\frac{2}{3}$ mile inland, and $\frac{1}{2}$ mile S of Cockburnspath station on the North British railway, this being 21 miles NW of Berwick-upon-Tweed, 7 SE by E of Dunbar, and $3\frac{1}{2}$ E of Edinburgh. A neat clean place, with an antique cross in its midst, it has a post office, with money order, etc. departments, and a public hall.

The parish contains also COVE fishing hamlet, and comprises the ancient parishes of Cockburnspath and ALDCAMBUS. It is bounded NW by Oldhamstocks in Haddingtonshire, NE by the German Ocean and Coldingham, SE by Coldingham, and SW by Abbey St Bathans. Its greatest length from E to W is $6\frac{1}{2}$ miles; its greatest breadth from N to S is $4\frac{1}{2}$ miles. In 1891 the area of the parish was slightly increased by the Boundary Commissioners, through the addition of the small detached part (96 acres) of the parish of Abbey St Bathans, which lay within the parish of Cockburnspath. The area of the latter is now 13,047 acres, of which $18\frac{1}{2}$ are water. Dean or Dunglass Burn flows 2 miles along the Haddingtonshire border to the sea; EYE Water, from near its source, traces $2\frac{1}{2}$ miles of the south-western boundary; an affluent of the Eye drains the south-western interior; and most of the rest of the parish is drained by Herriot Water and Pease Burn to the sea. The coast is all bold and rock-bound, rising to 117 feet at Reed Point, 203 near Red Rock Cave, 200 at Craig Taw, and 362 near Redheugh; the perils of the neighbouring waters are sometimes terribly instanced by fishing-boat disasters. The interior for some distance inland, particularly in the NW, is arable and in high cultivation, yet has generally an uneven surface; elsewhere this parish is mainly an eastward prolongation of the Lammermuirs, consisting of smooth rounded hills, intersected by deans or deep vales. To the E of the railway the surface attains 771 feet above sea-level at Greenside Hill, 803 at Meikle Black Law, and 727 at Penmanshiel Camps; to the W, 823 near Edmondsdean, 909 at Eelie Hill, 751 at Blackburn Rig, 943 at Little Dod, and 1042 at Corse Law, which culminates right on the SW border. At Cove, Pease Dean, and Dunglass Dean are highly interesting objects which will be separately noticed in their proper place. The rocks are chiefly Silurian; and in some parts, particularly on the coast, they present remarkable phenomena. Sandstone, of the Devonian formation, and of a quality valued chiefly for its power of resisting heat, is quarried near the mouth of Pease Burn. The soil here and there is rich and strong, but as a rule is light. Nearly 6000 acres are in cultivation, about 550 are under wood, and all the remaining area is either pastoral or waste. Cockburnspath Tower, a ruined old fortalice, near the railway, 1 mile E of Cockburnspath village, stands on the edge of a ravine or pass, which it seems to have been intended to defend, and belonged successively to the Earls of Dunbar, to members of the royal family, and to the Earls of Home. Some have identified it with 'Ravenswood Castle,' in Scott's *Bride of Lammermuir*. Roman urns and other Roman relics have been found in various places; and remains of Caledonian and Scandinavian camps are on several hills or vantage grounds. Cockburnspath is in the presbytery of Dunbar and synod of Lothian and Tweeddale; the living is worth £290. The parish church, a building of great antiquity, dating from at least 1163, was repaired in 1875-76 at a cost of £600, and contains 400 sittings. There is a Free church

for Cockburnspath and Oldhamstocks, and a U.P. church, with 420 sittings, is at Stockbridge, 1 mile SW of Cockburnspath village. A public school, with accommodation for 184 children, had (1891) an average attendance of 121, and a grant of £116, 7s. 6d. Pop. (1881) 1130, (1891) 1112.—*Ord. Sur.*, shs. 33, 34, 1863-64.

Cockenzie and Port-Seton, a police burgh and *quoad sacra* parish, in Tranent parish, Haddingtonshire, $1\frac{1}{2}$ mile NNE of Tranent station, and 1 NE of Prestonpans, under which it has a post office, with money order, savings bank, and telegraph departments. At it are a hotel, saltworks, a harbour, small, but substantially constructed by Mr Cadell for shipping coal, a handsome public school, an Established church (1838; 450 sittings), and a Free church; and a model fishing village was erected in 1882. The harbour, Port Seton, opened in 1880, and constructed of concrete at a cost of £11,800, including £2000 from Lord Wemyss, has a draught at high-water of 16 feet, and covers nearly 8 acres. The parapeted E wall, 730 feet long and $21\frac{1}{2}$ feet high, with a cross-pier or 'hammerhead,' and the W breakwater, 450 feet long, from 12 to 6 broad, and $19\frac{1}{2}$ high, leave an entrance 125 feet wide. In 1885 a middle pier was added and other improvements effected at a further cost of £5000. About three dozen deep-sea boats and two dozen yawls belong to this harbour. Cockenzie House adjacent has long been a seat of the Cadells, members of which family were Scott's publisher, Rt. Cadell (1788-1849), and the Australian explorer, Francis Cadell. Here the victors of Prestonpans discovered Cope's military chest, containing £2500. Pop. of Cockenzie and Port Seton (1861) 649, (1871) 1055, (1881) 1612, (1891) 1578; of *q. s.* parish (1891) 1716.

Cockham. See COCKUM.

Cocklaw, a farm in Walston parish, Lanarkshire. Remains of an ancient circular camp are on high ground here; consist of two concentric mounds and ditches; and measure, within the inner circle, 201 feet in diameter.

Cocklaw. See CAVERS.

Cockle, a burn in the NE of Linlithgowshire, running through Dalmeny Park to the Firth of Forth.

Cocklerue or **Cuckold-Le-Roi**, a hill on the mutual border of Linlithgow and Torphichen parishes, Linlithgowshire, 2 miles SSW of Linlithgow town. It has an altitude of 912 feet above sea-level, and it commands a brilliant view of the basin and screens of the Forth from Ben Lomond to North Berwick. The name is supposed, in Glennie's *Arthurian Localities*, to refer to Guinevere's betrayal of the Blameless King.

Cockno, a hill, a loch, and a burn in the E of Old Kilpatrick parish, Dumbartonshire. The hill is one of the Kilpatrick range, and culminates 2 miles NNW of Duntocher at 1140 feet above sea-level. The loch lies at its NE side, and is $\frac{1}{2}$ mile long, with a varying width of $\frac{1}{2}$ and $1\frac{1}{4}$ furlong. The burn issues from the loch, and runs $2\frac{1}{2}$ miles southward, past Cockno House, to Duntocher Burn at Duntocher.

Cock of Arran. See ARRAN.

Cockpen, a parish in the E of Edinburghshire, containing at its NW corner the village of BONNYRIGG (2 miles SW of Dalkeith), and also the villages or hamlets of Hunterfield, Poltonhall, Prestonholm, and Westhall, with part of Lasswade. It is bounded W and N by Lasswade, NE and E by Newbattle, and S by Carington. Its greatest length, from NW to SE, is $3\frac{1}{2}$ miles; its greatest breadth is $2\frac{1}{2}$ miles; and its area is 2950 acres. The South Esk, entering the parish from the S, intersects it for nearly $1\frac{1}{2}$ mile; traces afterwards part of its boundary with Newbattle, receiving there DALHOUSIE Burn; and the North Esk flows, for a brief distance, along the Lasswade border. The land-surface is flatish, though rising southward from less than 200 to over 400 feet above sea-level; it exhibits everywhere a rich and highly-cultivated aspect, and along the banks of the streams is often singularly picturesque. The rocks are chiefly of the Carboniferous formation. Coal is worked; sandstone and limestone abound; and coppers has been obtained from a species of moss. The soil over a small part of the northern district is a very fine rich

loam, on a sandy or gravelly bottom; and elsewhere is generally a stiffish clay. Cockpen House, the mansion of the 'Laird of Cockpen' of Lady Nairne's famous song, stood on a romantic spot about a furlong E of Dalhousie Castle. DALHOUSIE Castle and HILLHEAD House, the former centring around it most of the interest of Cockpen's history, are the principal mansions; and 5 proprietors hold each an annual value of £500 and upwards, 8 of between £100 and £500, 23 of from £50 to £100, and 33 of from £20 to £50. Giving off part of its civil area to Stobhill *quoad sacra* parish, Cockpen is in the presbytery of Dalkeith and synod of Lothian and Tweeddale; the living is worth £199. The parish church (1820; 625 sittings), on rising ground above the left bank of Dalhousie Burn, 1 mile SE of Bonnyrigg and 1 SSW of Dalhousie station, is a cruciform Perpendicular edifice, with a conspicuous tower; in its churchyard lie several members of the Dalhousie family. Within the castle grounds are remains of the old First Pointed parish church. Cockpen has a Free church; and Cockpen public, Bonnyrigg public, and Bonnyrigg girls' schools, with respective accommodation for 110, 301, and 237 children, had (1891) an average attendance of 62, 181, and 226, and grants of £63, 8s., £179, 5s. 6d., and £213, 10s. Valuation £20,842, including £1678 for railways. Pop. of *g. s.* parish (1871) 2481, (1891) 3337; of civil parish (1801) 1681, (1831) 2025, (1851) 3238, (1861) 2902, (1871) 3346, (1881) 4545, (1891) 4495.—*Ord. Sur.*, sh. 32, 1857. See Peter Mitchell's *Parish of Cockpen in the Olden Times* (Dalkeith, 1881).

Cockpool, an old castle, reduced now to the merest vestiges, in Ruthwell parish, SW Dumfriesshire, 1½ mile SSW of Comlongan Castle.

Cockum, a troutful rivulet, partly of Berwick, but chiefly of Edinburgh, shire. It rises in Channelkirk parish at 1050 feet above sea-level; runs ¾ mile west-south-westward to the border of the shires; and, after following it for ¼ mile southward, winds 3¼ miles south-south-westward; and falls into Gala Water in the northern vicinity of Stow village.

Coe, a river of Lismore and Appin parish, N Argyllshire, formed by a number of scaur-born torrents, 1000 feet above the level of the sea, and running 8 miles west-by-northward to Loch Leven at Invercoe. It traverses Loch Triochatan, on its way through the desolate defile of GLENCOE; and its waters contain abundance of river and sea trout and salmon. Some writers suppose it to be the Cona of Ossian, who, says tradition, was born upon its banks.—*Ord. Sur.*, sh. 53, 1877.

Coeffin. See CASTLE-COEFFIN.

Cogrieburn. See JOHNSTONE.

Cogsmill, a hamlet, with a public school, in Cavers parish, Roxburghshire, 5 miles SSE of Hawick.

Coich. See QUOICH.

Coigach, a coast and registration district in Ullapool *quoad sacra* and Lochbroom *quoad civilia* parish, Cromartyshire. Adjoining the north-western extremity of Ross-shire, and bounded W by the Minch, NE by Sutherland, it measures 22 miles from NW to SE, and 7½ miles in the opposite direction; includes Rhu More promontory, between Loch Enard and the Summer Isles; and is a strictly highland region, diversified with glens and numerous small lakes, whilst containing the beautiful vales of Strathcannard and Rhidorch. It has a Free church and a post office under Ullapool, which lies 28 miles to the SE. Pop. (1871) 1239, (1881) 1167, (1891) 1074.

Coila. See COYLE.

Coilantogle, a ford on the river Teith in Callander parish, Perthshire, immediately below the river's efflux from Loch Vennachar, 2½ miles WSW of Callander town. It was 'Clan Alpine's outmost guard,' the place where Roderick Dhu stands vantageless before Fitz-James, in the *Lady of the Lake*; but it has lost its romance by the erection of a huge sluice of the Glasgow waterworks.

Coilsfield, an estate, with a mansion, in Tarbolton parish, Ayrshire. The mansion, standing on the right bank of the Water of Faile, 1¼ mile ESE of Tarbolton village, was the seat, from the middle of the 17th to the

close of the 18th century, of the ancestors of the Earl of Eglinton, and is immortalised in Burns's lovely lyric—

'Ye banks, and braes, and streams around
The castle o' Montgomery,
Green be your woods, and fair your flowers,
Your waters never drumlie!
There Simmer first unfauld her robes,
And there the longest tarry;
For there I took the last farewell
O' my sweet Highland Mary.'

She, Mary Campbell, was byres-woman at Coilsfield in 1786; and here, near the confluence of Faile and Ayr, is the scene of the sorrowful parting. Coilsfield has been considerably altered since Burus's day, being now a classic-looking edifice, finely embosomed by trees; it has, moreover, taken a new name—Montgomerie. The owner, R. P. Paterson, Esq., holds 2552 acres in the shire, valued at £3127 per annum. A circular mound, to the S of the mansion, is traditionally regarded as the tomb of Auld King Coil, that 'sceptred Pictish shade' from whom Coilsfield, Coylton, and Kyle are said to have got their names. It was opened in May 1837, and found to contain several cinerary urns.

Coiltie, a rivulet of Urquhart and Glenmoriston parishes, Inverness-shire. Issuing from Loch nam Meur, on a western shelf of Mealfourvonie mountain, at an altitude of 1575 feet above sea-level, it rushes impetuously 9¾ miles east-north-eastward to Loch Ness, at the mouth of Glen Urquhart, near Drumnadrochit hotel. It passes through Loch Aloaich, and afterwards traverses a broken channel, overhung by precipices and wood, and in times of freshet moves in such bulk and force as to sweep before it enormous masses of stone. Its waters, owned by the Countess Dowager of Seafield, contain abundance of small trout.—*Ord. Sur.*, sh. 73, 1878.

Coinneag, Loch. See CHARNAC.

Coire or **Loch a' Choire**, a lake in Daviot and Dunlichity parish, Inverness-shire, 10½ miles SSW of Inverness. Lying 865 feet above sea-level, it has an utmost length and breadth of 5 and 2¾ furlongs; contains fine trout; and sends off a stream 5 furlongs southward to Loch Ruthven.

Coire Nam Meann, a loch in the SE of Farr parish, Sutherland, which, lying 801 feet above sea-level, has an equal length and breadth of 4½ furlongs, and sends off a stream ¼ mile north-eastward to Loch Leam na Clavan.

Coire na Sith, a loch in the SW of Farr parish, Sutherland, communicating with Loch Naver, 8 miles to the eastward. Lying 990 feet above sea-level, it has an utmost length and breadth of 4 and 3½ furlongs.

Coir nan Uriskin. See BEALACH-NAM-BO.

Coiruisk. See CORUIK.

Colbost, a hamlet of Duirinish parish, in the NW of the Isle of Skye, Inverness-shire, on the W shore of Loch Follart, 2 miles W of Dunvegan. A public school at it, with accommodation for 81 children, had (1891) an average attendance of 74, and a grant of £78, 8s. 6d.

Colbrandspath. See COCKBURNSPATH.

Coldingham (*Urbs Coludi* of Bede, c. 700), a village and a coast parish of NE Berwickshire. The former by road is 3 miles WNW of Eyemouth, 4½ NNW of Ayton, and 3½ NNE of Reston Junction, this being 11 miles NW of Berwick-upon-Tweed, and 46¾ ESE of Edinburgh. 'Situating in a valley,' says Mr Hunter, 'about a mile distant from the sea, the small town meets the eye of the stranger only on his near approach by the several descents, and with striking and picturesque effect. The cottages present a scattered appearance, those on the northern side, called Boggan, being perched on the steep bank of the Reckleside or Gosemount Burn. On the southern side flows another deep-channelled streamlet, the Court Burn, the main part of the town being situated between them, and the two uniting about a furlong below.' At the village itself are a post office under Ayton, with money order and savings bank departments, 2 inns, a volunteer hall (1872), a public hall, a public school, a parish church, and a U.P. church (1870; 550 sittings), Early English in style, with a slated spire; whilst a gentle eminence to the S

is crowned by the ancient Priory. Fairs are held on the second Tuesday of July and the second Thursday of October. Pop. (1871) 647, (1881) 572, (1891) 492.

The parish contains also the villages of Coldingham Shore, Reston, Auchencraw, and Grant's House. It is bounded N and NE by the German Ocean, E by Eyemonth and Ayton, SE by Ayton, S by Chirnside, SW by Bunkle, W by Abbey St Bathans, and NW by Cockburnspath. In 1891 the Higblaws detached portion of the parish (80 acres) was transferred by the Boundary Commissioners to the parish of Eyemouth, while the Butterdean detached portion of Oldhamstocks parish was transferred to the parish of Coldingham. Its area is now 25,662 acres. A stretch of the shore at Coldingham Sands and the farm of Northfield is smooth and of tolerably easy access; but mostly the coast is bold and rock-bound, its cave-pierced cliffs of porphyry and greywacke, the haunt of myriads of sea-fowl, rising steeply from the sea to heights of from 257 to 710 feet. Its extent within Coldingham is fully 10 miles, if one follows all the indentations and promontories, chief of which latter are those of St ABBS and FAST CASTLE, 2½ miles NNE and 4 NW of the village. Within 300 yards but 400 feet above the level of the ocean, 1 mile WSW of St Abbs Head, lies Coldingham Loch, a bleak, triangular lake, which, measuring 3 by 2 furlongs, is several fathoms deep, and contains abundance of perch. EYE WATER, first running 1½ mile NNE along the Oldhamstocks border, from Grant's House station next winds 8 miles ESE through the southerly interior, and then flows 1¼ mile SE, either on or near to the boundary with Ayton, 2 miles of which have already been traced by ALE WATER, rising in and flowing through this parish. Dulaw, Abbey, and three or four more burns run right to the sea; and, indeed, the whole surface is channelled by innumerable rivulets. From E to W it attains, to the N of the Ale, 387 feet above sea-level near Whitecross, 310 at St Abbs Head, 528 at Earnsheugh, 448 near Boggangreen, 659 at Baskinbrae, 748 at Cross Law, 715 at Laverock Law, 644 at Brown Rig, and 710 near the site of Soldiers Dyke; between the Ale and the Eye, 660 near Hillend, 782 at Houndwood Camp, 738 at Drone Hill, 686 at Cowel Hill, and 653 at the site of St David's Cairn; to the S of the Eye, 432 near Stonehiel, 503 at Greenhead, 860 at Horsley Hill, 614 near Brockholes, and 560 at Brockhole Hill—heights that belong to an eastern extension of the Lammernairs. The rocks are chiefly Silurian, with intrusions, however, of trap; the soils are various and not particularly fertile. A considerable aggregate of flat arable land forms the bottom of the valleys; and just about the middle of the parish is 'Coldingham Moor,' a tract of between 5000 and 6000 acres, which, once a mixture of moor, forest, and moss, looked in last century a treeless waste, but now in great measure has been reclaimed and brought under the plough. About 500 acres are clothed with plantation, 100 with natural wood. Mansions are Coldingham Law House, Homefield, Highlavs, Press House, Templeball House, Berrybank, Coveyhugh, Fairlav House, Houndwood House, Newmains, Renton House, Stonehiel House, and Sunnyside; and 12 proprietors hold each an annual value of £500 and upwards, 25 of between £100 and £500, 6 of from £50 to £100, and 22 of from £20 to £50. A native was Geo. Dunbar (1774-1851), Greek Professor in Edinburgh University. FAST CASTLE is a principal antiquity; and at Renton, at Houndwood, at East and West Preston, were fortalices or castles belonging to Logan of Restalrig, its wicked lord, all of which were demolished during last century to furnish building materials. Traces of four camps—two native and two Roman—are on the heights to the W and S of St Abbs; and on St ABBS stood Ebba's monastery. It seems, however, thence to have been transferred to the after site of the Benedictine priory, where foundations were excavated in 1854 of an earlier church with circular E apse. The priory itself was founded or refounded in 1098 by Eadgar, King of the Scots, the son of Malcolm Ceanmor and St Margaret, he having wrested the sceptre from Donald, with Wil-

liam Rufus' assistance, and fighting beneath the banner of St Cuthbert. To St Cuthbert, then, with SS Mary and Ebba, he consecrated this his votive offering, and granted it to St Cuthbert's caons regular of Durham. So that, though situate in Scotland, and though endowed by Scottish kings and nobles, Coldingham priory was long subordinate to the English Church, which exercised over it absolute control, and appropriated great part of its extensive revenues. In 1488 an attempt to suppress it and annex its property to the Chapel Royal of Stirling led to the Douglas rebellion which, ending with James III.'s downfall at Sauchie Burn, left the Homes masters of Coldingham till 1504. An Act of that year annexed it to the Crown; and in 1509 it was finally severed from Durham, and placed under the Abbey of Dunfermline. So it continued till 1560, when it shared in the fate of other religious houses. Its nearness to the Border had exposed it to frequent calamities; and thrice it sustained great hurt by fire—in 1216, 1430, and 1545. Cromwell, too, did great damage to the buildings, which later served for quarry to the village; so that little remains now to show their former glories but the E and N walls of the choir of the church, semi-Norman without, and lapsing into almost First Pointed within. Cruciform in plan, this church consisted of a nave and choir, each 90 by 25 feet, with a transept, 41 by 34, at whose NW angle a massive square tower, which fell little more than a century since, uprose to a height of 90 feet and upwards. The choir, patched up into a parish church, was restored (1854-55) at a cost of £2200, including £625 from the Board of Works. The W and S walls of 1662 were then rebuilt, and the corner towers carried up to their original height; the whitewash was removed from the exquisite carvings, a flat stained-wood roof introduced, a S porch added, and the interior rebenced, containing now 410 sittings. The result is creditable to the early restorers. In the presbytery of Chirnside and synod of Merse and Teviotdale, the civil parish has been, since 1851, divided into the *quoad sacra* parishes of Coldingham and HOUNDWOOD, the former a living worth £344. In it 3 public schools—Coldingham, Coldingham Moor, and St Abbs—with respective accommodation for 196, 32, and 133 children, had (1891) an average attendance of 133, 16, and 103, and grants of £135, 17s., £28, 8s. 6d., and £101, 11s.; Houndwood containing 3 other public schools. Valuation £31,973, 17s. Pop. of civil parish (1801) 2391, (1831) 2668, (1861) 3241, (1871) 3093, (1881) 3159, (1891) 2946; of *quoad sacra* parish (1881) 1644, (1891) 1586; of registration district (1881) 2675, (1891) 2479.—*Ord. Sur.*, sh. 34, 1864. See A. Carr's *History of Coldingham Priory*; J. Raines' *Correspondence, Inventories, Account Rolls, and Law Proceedings of the Priory of Coldingham* (Surtees Soc., Durham); W. K. Hunter's *History of the Priory of Coldingham*; and *The Church of Scotland, Past and Present* (1892).

Coldinghamshire, an ancient jurisdiction in Berwickshire, comprehending the parishes of Coldingham, Eyemouth, Ayton, Lamberton, and Aldcambus, and parts of the parishes of Mordington, Foulden, Chirnside, Bunkle, and Cockburnspath, in all amounting to about one-eighth of the entire area of the county. The nature of the jurisdiction is ill defined, but seems to have been chiefly, if not wholly, ecclesiastical, and connected with Coldingham Priory.

Coldingham Shore, a fishing village in Coldingham parish, Berwickshire, 1½ mile NE of Coldingham village. It has a Free church, a public school, and a boat harbour, formed in 1833 at a cost of £1200; it carries on fishing for herrings, cod, haddocke, turbot, lobster, and crabs, whilst conducting an extensive trade in the curing of herrings; and has a post office with money order and savings bank departments. Pop. (1891) 357.

Coldrochie. See MONEYDIE.

Coldside, a hamlet in the parish and 5 miles NE of the village of Canonbie, SE Dumfriesshire.

Coldstone. See LOGIE-COLDSTONE.

Coldstream, a Border town and parish of S Berwickshire. The town, 100 feet above sea-level, stands on the

left bank of the broad winding Tweed, and of its affluent, Leet Water, 47 miles SE by E of Edinburgh by road, whilst Smeaton's fine five-arched bridge (1763-66) across the Tweed leads $1\frac{1}{2}$ mile east-south-eastward to Cornhill village, in Norham parish, Northumberland, at which is Coldstream station on the North-Eastern railway, $13\frac{1}{2}$ miles SW of Berwick-upon-Tweed, 10 ENE of Kelso, and 62 SE by E of Edinburgh. On the English side are the ruins of Wark Castle, the field of Flodden, and the scene, some fancy, of the 'Hunting of the Chevyat;' and Coldstream itself derived importance from its ford, the first above Berwick of any consequence. By this passage Edward I. invaded Scotland in 1296; and down to 1640, when Montrose led the Covenanters southwards, many other armies, Scottish and English, crossed thereby, to ravage the country of their respective foes. Later, till 1856, its position made Coldstream a chapel of ease, as it were, to Gretna Green, among the more notable of its runaway marriages being that of Lord Brougham (1819). Not a stone remains of the wealthy Cistercian priory, founded in 1143 by Cospatrick, Earl of March, for nuns brought from Whiston in Worcestershire. It stood a little eastward of the market-place; and in 1834 many bones and a stone coffin were dug up in its burying-ground, where, according to tradition, the prioress had given sepulture to the foremost of the Scottish slain at Flodden. The Chartulary of this priory was edited for the Grampian Club by the Rev. C. Rogers in 1879. A yet more interesting building, a house at the E of the market-place, has likewise disappeared; but its successor bears the following inscription—'Headquarters of the Coldstream Guards 1659; rebuilt 1865.' The Coldstreams were formed by General Monk in 1650 from the two regiments of Fenwick and Haslerig; Borderers chiefly, tried and hardy men, they marched with him up and down Scotland, discomfiting all enemies of the Commonwealth from Berwick to Dundee, and from Dundee to Dumfries, till, after ten years spent in Scotland, they followed him to London, there to restore King Charles II. The present town, although irregularly built, is very pretty, with its nice modern cottages and gardens. It has a post office, with money order, savings' bank, and telegraph departments, branches of the British Linen Co. (1820) and Bank of Scotland (1855), a local savings' bank (1842), 2 hotels, gas-works, water-works (1852), a town-hall, a mechanics' institute (1863), a public library, a working men's club, a masonic lodge (1861), a dispensary, a volunteer corps, a horticultural society, an ornithological society, a bowling club, a grain mill, and a brewery. A burgh of barony and a police burgh, it is governed by a baron baillie, under the Earls of Haddington and Home, and by 8 police commissioners. Courts sitting here are noticed under BERWICKSHIRE; and fairs are held at Cornhill on the first Monday of March (hiring), the Wednesday after the second Tuesday of July (lamb and wool), and 26 Sept. (draft ewes). At the E end of the town is a handsome monument, 70 feet high, erected in 1834 to the memory of Charles Marjoribanks, Esq., M.P. for Berwickshire. His statue surmounting it, from the chisel of Mr H. Ritchie of Edinburgh, was shattered by lightning (1873), but was replaced in the following year by another, 4 tons in weight, by the Border sculptor, Mr Currie of Darnick. The parish church (1795; 1100 sittings) has a spire and clock; and other places of worship are a Free church (600 sittings), and 2 U.P. churches, East (700) and West (1000 sittings). Two public schools—Coldstream and Hirsell Law, the last about 2 miles NNW of the town—with respective accommodation for 376 and 120 children, had (1891) an average attendance of 243 and 63, and grants of £251, 7s. and £62, 10s. The weekly market is now discontinued. Pop. (1841) 1913, (1851) 2238, (1861) 1834, (1871) 1724, (1881) 1616, (1891) 1535.

The parish, till 1716 called Lennel or Leinhall, is bounded N by Swinton and Ladykirk, SE and S by Northumberland, and W by Eccles. Rudely resembling a kite in outline, with Todrig at top and Home Farm at bottom, it has an utmost length from ENE to

WSW of $6\frac{1}{2}$ miles, an utmost breadth from NW to SE of $4\frac{3}{4}$ miles, and an area of 8534 $\frac{1}{2}$ acres, of which 214 $\frac{1}{2}$ are water. The TWEED, here a glorious fishing river, sweeps 8 $\frac{1}{2}$ miles along all the English Border, forming a horseshoe bend at the town, and there receiving the ditch-like but troutful LEET, which, after tracing 2 miles of the Eccles boundary, strikes $4\frac{3}{4}$ miles south-eastward through the interior. Graden and Shiels Burns run east-north-eastward to the Tweed; the only large sheet of water is Hirsell Loch ($2 \times 1\frac{1}{2}$ furl.). The surface, with a general north-westward rise, nowhere sinks much below 100, or exceeds 246, feet above sea-level; sheltered by both the Cheviots and the Lammermuirs, it lies exposed to the NE only, whence, in the gale of 14 Oct. 1881, its trees sustained considerable damage. A band of barren moor, from E to W, is now nearly all reclaimed; and the entire area, with very slight exception, is either richly cultivated or under wood. The woods cover a comparatively large extent, particularly on the Hirsell estate. The rocks include white and reddish sandstone, clay marl, limestone, and gypsum; the first of which forms an excellent building material, and has been worked in three quarries. Quartz crystals, calcareous crystals, prehnite, and selenite are found. The soil, near the Tweed, is light; further inland, inclines to clay; and almost everywhere is rich and fertile. Remains of a fortification, probably later than the introduction of cannon, are on the barony of Snook; and an ancient cross, called Maxwell's, stood between Lennel church and Tweed-mill, but was removed about 1730. An episode still to be noticed is Burns's visit of 7 May 1787, which he described in 'Alfred Jingle' style: 'Coldstream—went over to England—Cornhill—glorious river Tweed—clear and majestic—fine bridge. Dine at Coldstream with Mr Ainslie and Mr Foreman—beat Mr F. in a dispute about Voltaire. Tea at Lennel House with Mr Brydone . . . my reception extremely flattering—sleep at Coldstream.' The said Mr Patrick Brydone (1741-1818), who died at Lennel House, was author of a well-known *Tour through Sicily and Malta*. The principal mansions, all noticed separately, are The Hirsell, The Lees, Lennel House, and Milne Graden; and 6 proprietors hold each an annual value of £500 and upwards, 11 of between £100 and £500, 6 of from £50 to £100, and 41 of from £20 to £50. Coldstream is in the presbytery of Chirnside and synod of Merse and Teviotdale; the living is worth £316. Valuation £20,300, 19s. 10d. Pop. (1801) 2269, (1831) 2897, (1851) 3245, (1861) 2823, (1871) 2619, (1881) 2561, (1891) 2388.—*Ord. Sur.*, sh. 26, 1864.

Coldwells. See CRUDEN.

Cole Castle. See CASTLE-COLE.

Colfin, a station in Portpatrick parish, Wigtownshire, on the Dumfries and Portpatrick railway, at Colfin Glen, $3\frac{1}{4}$ miles ENE of Portpatrick town.

Colgrave, a sound or strait in Shetland, separating Yell island on the W from Fetlar on the E. It contains Hascosay island; and it varies in width from 3 miles in the N to 9 in the S.

Coligarth, a district of Lady parish, Sanday island, Orkney. On a barren moor extending along its SW side are three large tumuli, and a number of smaller ones. A headland called Coliness or the Ness of Coligarth projects north-westward into Otterwick Bay, and has foundations of an ancient chapel, as well as a very large artificial mound, in which was found, in 1838, an ancient iron spear-head, 7 inches long.

Colin. See COLLIN.

Colinsburgh, a village of Kilconquhar parish, in the East Neuk of Fife. It stands within 2 miles of, and 120 feet above, the Firth of Forth, $1\frac{1}{4}$ mile N by W of Kilconquhar station, this being $12\frac{1}{2}$ miles E of Thornton Junction, and $32\frac{1}{2}$ NE of Edinburgh. Founded by and named after Colin, third Earl of BALCARRES, about 1718, it is a burgh of barony; and has a post office, with money order, savings' bank, and telegraph departments, a branch of the Commercial Bank, gas-works (1841), an hotel, a public school, a U.P. church (1800; 300 sittings), agricultural and horticultural

societies, a Thursday market, and fairs on the second Tuesday of March and second Thursday of June and October. Pop. (1891) 384.—*Ord. Sur.*, sh. 41, 1857.

Colinton, a village and a parish of Edinburghshire. The village, 4 miles SW by S of Edinburgh, is charmingly situated in a hollow on the Water of Leith, which here is spanned by a high stone bridge; at it are a station on the Balerno loop-line of the Caledonian (1874), a post office, with money order, telegraph, etc., departments, 2 inns, the parish church, an Episcopal church, and a public school. In his *Miller of Deankhaugh*, the late Jas. Ballantine described it 'with its romantic valley, its lines of cottages embedded in the hollows, its kail-yards and their rows of currant-bushes, its sylvan pathway threading the mazes of wood, deep, deep down in the beautiful dell.' The village has changed a little since then, but always for the better, a good many comfortable, old English-looking houses having arisen upon its upper outskirts within the last two or three years. Pop. (1851) 120, (1881) 224, (1891) 476.

The parish, containing also the villages of Juniper Green, Hailes, Longstone, and Slateford, is traversed across the NW corner by the Caledonian railway and the Union Canal, and through the north-western interior by the Balerno line. Till 1697 it was called Hailes, and thence till 1747 Hailes or Collingtoun. It is bounded NW by Corstorphine, NE by St Cuthberts, E by Liberton, SE by Lasswade and Glencross, SW by Penicuik and Currie. Its greatest length, from N to S, is $3\frac{1}{2}$ miles; its greatest breadth is $3\frac{1}{4}$ miles; and its area is $5659\frac{3}{4}$ acres, of which $20\frac{1}{4}$ are water. Triangular Torduff reservoir ($3 \times \frac{3}{4}$ furl.), the lower of the two Edinburgh Compensation Ponds, falls within the south-western border; and through the north-western interior, from Juniper Green to Slateford, the Water of Lerru winds 3 miles east-north-eastward along a lovely little wooded dell. Another streamlet is the Burn of BRAID, running $3\frac{1}{2}$ miles north-eastward, from above Bonally into St Cuthberts, and joined near Dreghorn Castle by Howden Burn. From the flats of Corstorphine the surface rises south-south-eastward to the northern slopes of the Pentlands, in the NW and N sinking to less than 300 feet above sea-level, whilst in the S it attains 1280 feet, CASTLE-LAW (1595 feet) and Bells Hill (1330) culminating in Glencross and Penicuik parishes. In the NE is CRAIGLOCKHART, a beautiful westward extension of the Braid Hills. Most of the parish, down to the 17th century, seems to have been a desolate moor. But now the greater part is in a state of high cultivation, beautified by hedgerows, parks, and woods; and even lower acclivities of the Pentlands, up to 700 feet above sea-level, have recently been planted or brought under the plough. Excellent springs on the lands of Comiston, Swanston, and Dreghorn long furnished Edinburgh with its chief artificial water supply. The rocks of the Pentlands are principally porphyrites, those of the low grounds calciferous sandstones. Excellent sandstone is largely quarried at Redhall and Hailes, and has been much employed in Edinburgh architecture. The soil ranges in character from good alluvium, through several sorts of loam, to moorish earth. About seven-elevenths of the entire area are arable, and nearly one-fourth is hill pasture. Colinton House, in the northern vicinity of Colinton village, was rebuilt by the eminent banker, Sir William Forbes of Pitsligo, Bart. (1739-1806), who died at it, as also did Jas. Abereromby, Lord Dunfermline (1776-1858), for four years Speaker of the House of Commons. It is now the seat of Jn. Moubray Trotter, Esq. Other mansions are Bonally, Dreghorn, Redford, Comiston, Hailes, Redhall, and Craiglockhart; and other illustrious names connected with this parish are those of the Rev. Arch. Alison, Jn. Allen, Lord Cockburn, the Rev. Jn. Dick, D.D., Lord Dregborn, Prof. Wm. B. Hodgson, Lords President Gilmour and Lockhart, David Mallet, and Lord Woodhall. Two prominent buildings are the Edinburgh Workhouse and the Hydro-pathic Establishment, both near Craiglockhart Hill. Some sixteen corn and paper mills are on the Water of

Leith; and an extensive bleachfield is at Inglis Green. The Roman road from York to Carriden passed through the lands of Comiston, where also was a large ancient camp. Two very large conical cairns, which adjoined this camp, are supposed to have marked the scene of an important battle; and a rude whinstone monolith, the Kel Stane or Comes Stone, not far from there, is of course referred to the mythical Camus of BARRY. Ten proprietors hold each an annual value of £500 and upwards, 10 of between £100 and £500, 7 of from £50 to £100, and 31 of from £20 to £50. Colinton is in the presbytery of Edinburgh and synod of Lothian and Tweeddale. The parish church, at the village, containing 660 sittings, was built in 1771, and enlarged in 1837. At Craiglockhart and Juniper Green are Established mission churches, at Juniper Green a Free church (1880; 620 sittings), and at Slateford a U.P. church (1784; 520 sittings). Five public schools—Colinton, Juniper Green infant and industrial, Juniper Green male, Longstone female, and Swanston—with respective accommodation for 265, 146, 223, 90, and 32, had (1891) an average attendance of 142, 93, 155, 85, and 27, and grants of £136, 0s. 6d., £72, £163, 9s. 6d., £67, 19s., and £28, 13s. 8d. Valuation £34,675, including £7589 for railway and water-works. Pop. (1801) 1397, (1831) 2232, (1861) 2656, (1871) 3644, (1881) 4347, (1891) 4549.—*Ord. Sur.*, sh. 32, 1857. See Thos. Murray's *Biographical Annals of the Parish of Colinton* (Edinb. 1863).

Colintraive, a village in Inverchaolain parish, Argyllshire, on the NE side of the Kyles of Bute, $7\frac{1}{2}$ miles by water NW by N of Rothesay. With a number of pretty villas, it has a post office under Greenock, an inn, and a small steamboat pier.

Coll, a coast village in the parish and 6 miles NNE of the town of Stornoway, Lewis, Outer Hebrides, Ross-shire. In a neighbouring cliff is a cave with two vaulted chambers, the entrance, 8 feet high and 14 wide; the interior, 15 high and 30 long; and the sides, so studded with mussels as, on a clear day, to reflect a variety of colours. A burn, the Coll or Anhuinn Chuil, formed by two head-streams, runs $2\frac{1}{2}$ miles SE to Broad Bay, in the S vicinity of the village. Pop. (1891) 525.

Coll, an island and a parish in the Hebrides of Argyllshire. The island lies parallel with the NW coast of Mull, $7\frac{1}{2}$ miles WNW of Callioch Point, 16 of Tobermory; and by a steamboat route of $57\frac{1}{2}$ miles, communicates with Oban, under which it has a post office, with money order and savings bank departments. It is $12\frac{1}{2}$ miles long from ENE to WSW, whilst its breadth varies between 1 and $3\frac{1}{2}$ miles. The coast, in general, is bold and rocky; and the interior is diversified with eminences, but nowhere exceeds 326 feet above sea-level. Mica slate is the predominating rock. Eight or nine lochs yield capital trout-fishing, and the shooting also is good. 'Reaping, mowing, and thrashing machines are common,' says Mr Duncan Clerk, 'and the lands are managed in accordance with the most improved method of culture. The manufacture of butter and cheese is carried on extensively and successfully, some dairies keeping upwards of 80 Ayrshire cows. The pasturage is said to be rich in milk-producing qualities; and considerable numbers of pure Highland cattle are bred on several of the farms.' There are between 6000 and 7000 sheep and over 1000 cattle. A fair is held in May on the Tuesday before those in Mull. Antiquities are the burying-grounds of Crosspoll and Killunaig, the latter with a ruined chapel; two standing-stones, 6 feet high; vestiges of eight Scandinavian forts; and, at the head of a southern bay, the castle of Breacacha, said to have been built by one of the Lords of the Isles. Conflicts between the Macneils and Macleans, the Macleans and Macdonalds, make up the history of Coll, which in 1773 received a week's visit from Johnson and Boswell. John Lorne Stewart, Esq. of Breacacha Castle (b. 1837; suc. 1878), is almost sole proprietor, holding 14,247 acres, valued at £4118 per annum; and there are eight chief tenants. The parish, annexed to Tyree in 1618, but reconstituted in 1866, comprises the pastoral isles of Gunna, Eileanmore, Soay, and Oransay. It is in the

presbytery of Mull and synod of Argyll; the living is worth £178. The parish church (1802; 350 sittings) stands near the middle of the island. There is also a Free church; and two public schools, Acha and Arnabost, with respective accommodation for 72 and 49 children, had (1891) an average attendance of 16 and 31, and grants of £34, 6s. 6d. and £46. Pop. (1801) 1162, (1851) 1109, (1861) 781, (1871) 723, (1881) 643, (1891) 522.

Collace, a village and a parish of Gowrie district, E Perthshire. The village stands 4 miles S by E of Woodside station, and 8 NE of its post-town Perth; it consists of two parts, called Collace and Kirkton of Collace, the latter $\frac{3}{4}$ mile SW of the former.

The parish, containing also the village of Kinrossie, is bounded NW and NE by Cargill, E by Abernethy, SE by Kinnaird, and SW by St Martins. In 1891 the Boundary Commissioners transferred to it a detached portion (237 acres) of the parish of Caputh, and another detached portion (335 acres) of the parish of Kettins in the county of Forfar. Its area is now 3505 acres. The surface has a general ESE rise, attaining 383 feet above sea-level near Milnton, 440 near Saucher, 532 near Balmacolem, 1012 on Dunsinane Hill, and 1182 on Black Hill, of which the two last culminate close to the Abernethy border and belong to the Sidlaw range. Excellent sandstone is plentiful; and the northern district, with its light black loamy soil, is in a state of the highest cultivation, whilst the south-eastern is variously hill-pasture and upland heath. A fifth or rather more of the area is under wood. Dunsinane Hill and Dunsinane House, the two chief features of the parish, are separately noticed; to the owner of the latter the entire parish belongs. Collace is in the presbytery of Perth and synod of Perth and Stirling; the living is worth £162. The parish church (1813; 410 sittings) is a neat Gothic edifice, with a square tower. There is also a Free church; and a public school, with accommodation for 172 children, had (1891) an average attendance of 84, and a grant of £72, 11s. Valuation (1891) £3656, 5s. Pop. (1801) 562, (1831) 738, (1861) 534, (1871) 456, (1881) 409, (1891) 388.—*Ord. Sur.*, sh. 48, 1868.

Colla Firth, a bay and a hamlet in Northmaven parish, Shetland.

Collairney, a ruined fortalice in Dunbog parish, Fife, $\frac{1}{2}$ miles E by S of Newburgh. For nearly five centuries it belonged to the Barclays, hereditary bailiffs of regality of Lindores.

Coll-Earn Castle, the seat of Alex. Mackintosh, Esq., in the parish and near the town of Auchtermuchty, Perthshire. Completed in 1872, it is a picturesque old-fashioned building, with its wainscoting, painted glass, and vaulted ceilings, and commands a magnificent view.

College. See EDINBURGH and GLASGOW.

Collessie, a post-office village and a parish in the N of Fife. The village has a station on the North British railway, $2\frac{1}{2}$ miles NNW of Ladybank, this being 40 miles NNE of Edinburgh, and $18\frac{3}{4}$ SE by E of Perth.

The parish contains also the important junction and the rising police burgh of LADYBANK, and the villages of Giffordtown and Edenstown. It is bounded N by Abdie, NE by Monimail, E by Cults, S by Kettle, SW by Auchtermuchty, and NW by Newburgh. In 1891 the Boundary Commissioners transferred to it the Sweet-home detached part (93 acres) of the parish of Cults. Its area is now 8795 acres. The EDEN flows $2\frac{1}{2}$ miles along all the Kettle border, and lower down, $1\frac{1}{2}$ mile along the boundary with Cults; its channel was straightened about 1787, so that its floods have long been a thing of the past. Rossie Loch, too, which covered upwards of 300 acres, was drained in 1740, its bed being now good meadow and pasture land. Part of the 'Howe of Fife,' the surface, sinking to 100 feet above sea-level in the E, is almost a dead flat over much the larger portion of the parish, but, close to the western and the northern border, attains 427 feet near Craigooverhouse and 642 at Woodhead. Greenstone has been quarried, as also sandstone in a less degree; and marl is plentiful.

The soil of the arable lands is deep and fertile, resting upon a trap-rock bottom, and having a fine southern exposure; of late years great improvements have been carried out on the Melville estate, in the way of building, wire-fencing, clearing, replanting, and reclaiming. Plantations cover a considerable extent, about one-seventh of the entire area. Near the village are a megalith 6 feet in girth by 9 in height, and a tumulus, 'Gask Hill,' which, measuring 120 by 100 feet, and 12 feet high, was opened in 1876 by Mr Anderson of the Edinburgh Antiquarian Museum. In the NW, too, stood two ancient forts, commanding the pass from central Fife to Strathearn; and near the easternmost one coins have been found of Edward I. of England, along with a cinerary urn and other relics of antiquity. Hugh Blair, D.D. (1718-1800), author of *Lectures on Rhetoric*, commenced his ministry here in 1742; and the courtier and diplomatist, Sir James Melville (1535-1607), held the estate of Hallhill. The principal mansions are Melville House, Kinloch, Pitlair, Rankelour, Meadow Wells, Rossie, and Lochiehead. Collessie is in the presbytery of Cupar and synod of Fife; the living is worth £285. The parish church is a very old building, long and narrow, with not more than 600 sittings; but there has been erected a *quoad sacra* church—seating 400, and costing about £2000—at Ladybank, where a Free church was built in 1876 at a cost of £3000. Two public schools, Collessie and Ladybank, with respective accommodation for 129 and 272 children, had (1891) an average attendance of 94 and 273, and grants of £80, 16s. 6d. and £282, 8s. 6d. Valuation (1891) £12,224, 16s. 11d. Pop. (1801) 930, (1831) 1162, (1861) 1560, (1871) 1703, (1881) 1982, (1891) 2073, of whom 1198 were in Ladybank.—*Ord. Sur.*, sh. 40, 1867.

Collie Law. See CHANNELKIRK.

Collieston. See COLLISTON.

Collin, a village, with a public school, in Torthorwald parish, Dumfriesshire, near the left bank of Lochar Water, $1\frac{1}{2}$ mile N by W of Racks station, and $3\frac{1}{2}$ miles E of Dumfries, under which it has a post office.

Collin, an estate, with a mansion, in Renwick parish, S Kirkcudbrightshire, 8 miles SSE of Castle-Douglas.

Collin. See SCONE.

Collinswell, an estate, with a mansion, in the parish and 1 mile WNW of the town of Burntisland, Fife.

Collinton. See COLINTON.

Colliston, a fishing village in Slains parish, Aberdeenshire, on a romantic small bay, $\frac{1}{2}$ mile S of Slains church, and 6 miles E by S of Ellon, under which it has a post office. Eighty years ago a famous smuggling place, it offers a picturesque appearance, straggling among cliffs and over braes; and it carries on a vigorous trade in fishing for haddocks, cod, whittings, and turbot, and in preparing 'Colliston speldings,' or haddocks dried on the rock. Pop. (1891) 419.

Colliston, an estate, with a mansion, in the Glenessland district of Dunscore parish, Dumfriesshire, about 7 miles WSW of Auldgrith station, on the main line of the Glasgow and South-Western railway. It belonged to the father of the eminent John Welch (1570-1623), who probably was born here; and it is now the property of Miss Copland.

Colliston, a village in St Vigeans parish, Forfarshire, 4 miles NW of Arbroath. It has a station on the Arbroath and Forfar section of the Caledonian, a fine board school (1877), a Free church, and an Established church. The last, erected as a chapel of ease in 1871, and raised to *quoad sacra* status in 1875, was enlarged by the addition of a transept in 1876, and now contains 500 sittings. Colliston House, in the vicinity, is said to have been built by Cardinal Beaton for his son-in-law.

Colluthie, a mansion in Moonzie parish, NW Fife, $\frac{1}{2}$ miles NW by N of Coupar. Said to have been built about 1356 by Sir William Ramsay, son-in-law and successor of the last Earl of Fife of the ancient Macduff line, it is manifestly of later date, yet is remarkable for the thickness of its walls, and for arched doors and windows; and it long suffered such neglect as to become

nearly uninhabitable, till about 1840 it underwent thorough renovation, being now the seat of Jn. Inglis, Esq., who owns 485 acres in the shire, valued at £1125 per annum. Colluthie Hill (430 feet) to the S of the mansion, is rocky on the top, and has been planted.

Collyland. See COALYLAND.

Colmkill. See SKYE.

Colmonell, a village and a coast parish of Carrick, S Ayrshire. The village, a neat little place, stands on the left bank of the Stinchar, $4\frac{1}{2}$ miles W by S of Pinwherry station, and $10\frac{1}{2}$ S by W of Girvan, under which it has a post office, with money order, savings bank, and telegraph departments; at it are the parish church, a Free church, and a public school. A fair is held on the first Monday of May, *o. s.*

The parish contains also the coast village of Lendalfoot and the stations of Pinnmore, Pinwherry, and Barrhill on the Girvan and Portpatrick Junction railway (1876), these being 5, 8, and $12\frac{1}{2}$ miles S of Girvan. It is bounded N by Girvan; NE by Barr; E by Minnigaff, in Kirkcudbrightshire; S by Penninghame, Kirkgowan, and New Luce, in Wigtownshire; SW by Ballantrae; and NW by the North Channel. Its greatest length is 13 miles from NW to SE, viz., from Lendalfoot to Loch Maberry; its width from NE to SW varies between $3\frac{1}{2}$ and $7\frac{1}{2}$ miles; and its area is $48,153\frac{1}{2}$ acres, of which $184\frac{1}{2}$ are foreshore and 479 water. The STINCHAR winds $7\frac{1}{2}$ miles south-westward through the NW interior, then 2 miles along the Ballantrae border; at Pinwherry it is joined by the Duisk, which, formed by the Pollgowan and Feoch Burns, runs 6 miles north-westward past Barrhill, itself receiving by the way a score at least of rivulets. By the CREE, flowing $6\frac{1}{2}$ miles along all the Minnigaff boundary, the SE corner of the parish is drained to the Solway Firth, whither also two lakes on the Wigtownshire border discharge their effluence—Lochs Dornal ($5 \times 4\frac{1}{2}$ furl.) and MABERRY ($1\frac{1}{2}$ mile \times 3 furl.) On the Barr boundary lie Loch Goosey (3×2 furl.) and smaller Lochs Crongart and Fanoch; whilst in the interior are Drumlamford ($2 \times 1\frac{1}{2}$ furl.) and thirteen yet tinier lakelets. The coast-line, $6\frac{1}{2}$ miles long, is closely followed, at a height of from 12 to 59 feet above sea-level, by the shore road from Girvan to Ballantrae, just beyond which the surface rises rapidly to 200 feet at Bennane Head, 500 at Carleton, and nowhere much less than 100. Inland, the chief elevations to the NW of the Stinchar are conical Knockdolian (869 feet), Knockdaw Hill (850), and Fell (810); to the SE of it, Dalreoch Hill (604), Pinwherry Hill (548), Wee Wheeb (649), Kildonan (659), Shiel Hill (751), and Barjarg Hill (554). The formation is Lower Silurian. The vales contain a good deal of fertile alluvial land, and great improvements have been effected within the last forty years, especially on the Corwar estate, where fully 3500 acres of wild heathery moor and 200 of deep moss have been reclaimed, and now yield excellent pasturage. Great attention is paid to sheep and dairy farming, particularly to cheese-making; and the harvest of the sea is not neglected. Craigneil is a fine old ruin of the 13th century, and other ruined fortalices are at Knockdolian, Knockdaw, Carleton, Kirkhill, and Pinwherry. The mansions are Ballochmorrie, Corwar, Daljarroch, Drumlamford, Kildonan, Knockdolian, and Pinnmore; and 12 proprietors hold each an annual value of £500 and upwards, 13 of between £100 and £500, 4 of from £50 to £100, and 4 of from £20 to £50. Giving off ARNSHEEN *quoad sacra* parish, Colmonell is in the presbytery of Stranraer and synod of Galloway; the living is worth £324. The parish church, built in 1772, contains 500 sittings; in its kirkyard lie three martyred Covenanters, one of whom, Matthew M'Iraith, was slain, says his epitaph, by order of 'bloody Claverhouse.' Five public schools—Barrhill, Colmonell, Corwar, Lendalfoot, and Pinwherry—with respective accommodation for 200, 137, 60, 48, and 69 children, had (1891) an average attendance of 81, 69, 22, 36, and 44, and grants of £74, 6s. 6d., £63, 13s. 6d., £37, 16s., £49, 6s. and £43, 16s. Valuation, £25,502, 7s. 6d., including £628 for railway. Pop. (1801) 1306, (1841)

2801, (1861) 2588, (1871) 2293, (1881) 2191, (1891) 1900, of whom 988 were in Colmonell registration district.—*Ord. Surv.*, shs. 7, 8, 1863.

Colmslie. See ALLEN.

Colms, St. See COMBS.

Colonsay and Oronsay, two Inner Hebridean islands of Argyllshire, separated by a sound of only 100 yards at the narrowest, and dry at low water for three hours. Colonsay, the northernmost and much the larger of the two, has a good eastern harbour at Schallasaig, which, 16 miles NNW of Port Askaig in Islay, may be reached from Glasgow by the Oban steamer, and at which are an inn and a post office (Colonsay) under Greenock. Its length from NNE to SSW is 8 miles, and its breadth varies between $1\frac{1}{2}$ and $3\frac{1}{2}$ miles; whilst 3 by 2 miles is Oronsay's utmost extent. The surface is irregular, rising to 493 feet in Carn-nan-Eun to the N of Colonsay, where two lochs yield capital trout fishing. The shooting also is good. Mica slate, passing into chlorite and clay slate, and mixed with quartz and limestone, is the leading formation; the soil is well suited for either crops or cattle; and so mild is the climate that fuchsias, hydrangeas, and the like, flourish unchecked by winter cold. A paper read before the Society of Antiquaries of Scotland in 1880 described a bone cave lately discovered in Colonsay by Mr Symington Grieve, and comprising chambers 230 feet in extent, some of which contain a local deposit of stalagmite, and, underneath, successive layers of ashes, charcoal, and bones of the common domestic animals. The most interesting antiquities, however, are the ecclesiastical, second only to those of Iona. Columba and Oran, his colleague, are said, though not by Skene, to have first settled here after quitting Ireland in 563, and to have given name to the two islands; but the Austin Priory of Oronsay must have been founded long after, most likely in the 14th century by a Lord of the Isles as a cell of Holyrood. Early English in style, its roofless church measures $77\frac{1}{2}$ by 18 feet, and contains a number of curious effigies, figured in Gordon's *Monasticon*. Near it, too, are a beautifully sculptured cross, 12 feet high, and the mutilated fragments of another. From the Macduffies, their ancient lords, the islands passed in the 17th century to the Macdonalds of the Colkitto branch, and next to the Duke of Argyll. The latter in 1700 exchanged them for Crerar, in South Knapdale, with Donald M'Neil, two of whose descendants have shed great lustre upon Colonsay in law and in diplomacy. These are Duncan M'Neil (1794-1874), who was raised to the peerage as Lord Colonsay in 1867; and his brother, the Right Hon. Sir John M'Neil, G.C.B. (1795-1883), of Burnhead, Liberton, who was principal proprietor, holding 11,262 acres in Argyllshire, valued at £2172 per annum. Colonsay House (1722; enlarged about 1830), in the northern part of the island, is the present seat of their nephew, Major-General Sir John Carstairs M'Neil, K.C.M.G., K.C.B., V.C. An obelisk of red Mull granite, 30 feet high, was erected in 1879 to the memory of Lord Colonsay, in place of one destroyed three years before by lightning. Long annexed to Jura, the islands now form a parish in the presbytery of Islay and Jura and synod of Argyll; the living is worth £170. The church, built in 1802, contains 400 sittings; there is also a Baptist chapel. Colonsay and Kilchattan public schools, with respective accommodation for 47 and 52 children, had (1891) an average attendance of 18 and 26, and grants of £37, 7s. and £39, 2s. Pop. (1871) 456, (1881) 395, (1891) 381, of whom 358 were in Colonsay and 23 in Oronsay.

Colonsay, Little, an island of Kilninian parish, Argyllshire, in the mouth of Loch-na-Keal, off the W side of Mull, between Ulva island and Staffa, 3 miles W of Inch Kenneth. It exhibits a columnar basaltic formation, similar to that of Staffa, but of less striking character, and its soil is less fertile than that of Ulva or Gometra.

Colpieden, a hamlet 2 miles from Kettle in Fife.

Colport. See COULPORT.

Colpy, a hamlet in Culsalmund parish, Aberdeenshire

on a small burn of its own name, 4 miles ENE of Insch, under which it has a post office. Two cairns are near it.

Colquhalzie, an estate, with a mansion, in Trinity Gask parish, Perthshire, on the right bank of the Earn, $4\frac{1}{2}$ miles NNW of Auchterarder.

Colquhony, an inn and a ruined castle in Strathdon parish, W Aberdeenshire. The inn stands on the river Don, a little above Castle Newe, 16 miles WSW of Alford, and is a central point for visiting the upper or mountainous portion of the Don's valley. The castle is said to have been begun by Forbes of Towie early in the 16th century, but to have never been finished.

Colsay, a small island of Dunrossness parish, Shetland, 8 miles NNW of Sumburgh Head. It used to pasture a good many sheep of a large English breed, but it is now devoted to the grazing of cattle.

Colsnaughton. See COALSNAUGHTON.

Colstane. See LOGIE-COLDSTONE.

Coltbridge. See EDINBURGH.

Coltfield, a hamlet in Alves parish, Elginshire, 4 miles S of Burghhead.

Coltness, an estate, with a mansion, in Cambusnethan parish, Lanarkshire. The mansion, near the left bank of South Calder Water, $\frac{3}{4}$ mile N of Wishaw, is a large and handsome edifice, with modern renovations, and contains a picture gallery nearly 200 feet long. The estate, having passed from the Somervilles in 1553 to Sir Robert Logan of Restalrig, came a century later to Sir James Steuart, twice Lord Provost of Edinburgh, who brought up Archbishop Leighton, and whose chaplain Hugh Mackail, the martyred Covenanter, was captured here in 1666; his grandson, Sir Jas. Steuart, second Bart. (1681-1727), was Solicitor-General for Scotland; and his great-grandson, Sir James Denham Steuart (1713-80), was a zealous Jacobite and an able political economist. The baronetcy became extinct in 1839; and Coltness is now the property of Jas. Houldsworth, Esq. (b. 1825; suc. 1865), who owns 3717 acres in the shire, valued at £11,498 per annum. For Coltness Iron-works see NEWMAINS.

Colvend, a post-office hamlet and a coast parish of SE Kirkcudbrightshire. The hamlet lies $1\frac{1}{2}$ mile NNE of Urr Waterfoot, and $5\frac{1}{2}$ miles SSE of its post-town and station Dalbeattie, this being $14\frac{1}{2}$ miles SW of Dumfries.

The parish contains also the hamlets of Rockcliff, Kippford, Barnbarroch, and Southwick; and comprehends the ancient parish of Southwick. It is bounded NW by Kirkgunzeon, NE by New Abbey, E and SE by Kirkbean, S by the Solway Firth (here 14 to 15 miles wide), and W by Buittle. Its greatest length from E to W is 7 miles; its greatest breadth from N to S is $4\frac{1}{2}$ miles; and its area is 23,472 $\frac{1}{2}$ acres, of which 4011 $\frac{1}{2}$ are foreshore, 13 $\frac{1}{2}$ 'inks,' and 191 water. Urr Water flows $4\frac{1}{2}$ miles south-south-eastward along all the Buittle boundary to the Solway, near Kippford widening into a roomy estuary, in which Rough Island (2 \times 1 furl.) belongs to Colvend; whilst Southwick Water in the E, formed by the Maidenpap, Drumcow, and Boreland Burns, winds 7 miles south-south-eastward and south-westward, traversing, ere it falls into the Firth, the broad expanse of Mersehead Sands. In the south-western and western interior are White, Clonyard, Borean, Auchensheen, and Cloak Lochs, the first and largest of which measures 3 by 2 furlongs. Between Urr Waterfoot and Douglas Hall, a range of reddish lichened copse-clothed cliffs, the haunt of myriads of sea-fowl, rises to 200 feet at Castle Hill of Barclay, and 400 at White Hill, heights that command a glorious prospect. Along it are Gutchers Isle, Cow Snout, Gillies Craig, Portovarren Bay, the Brandy Cave of some Dick Hatteraick, the Piper's Cove, the Murderer's Well, two natural archways called the Needle's Eye, and Lot's Wife, a pillar of Silurian rock. Inland the rugged surface attains 900 feet on Bainloch Hill, 500 on Banks and Clonyard Hills, 800 on Redbank Hill, 1000 on Maidenpap, 1350 on Cuil Hill, and 1335 on Meikle Hard Hill, the two last culminating right on the

New Abbey boundary, within which fall the summits of Boreland Hill (1632 feet) and CRIFFEL (1867). Borean granite hills these, with sour and scanty pasturage, they belong to the Stewarty's third and most easterly group of primary rocks, which commences near the river Nith in the parish of New Abbey, and runs south-westward across Kirkgunzeon and Colvend to the coast. Most of the surface is believed to have anciently been forest; and plantations and natural wood still cover a considerable area. The eastern heights are almost entirely heathy; and many of the others have, at best, a poor shallow soil, and are largely overrun with broom and furze and bramble. Much, however, of the low grounds has naturally a good soil; much of the slopes has been well reclaimed; and many of the farms are in a high state of cultivation. Millstones were formerly quarried; and a copper mine, said to have yielded a rich ore from a tolerably thick seam, was also at one time worked. The Castle Hill of Barclay is crowned by a fosse and the foundations of a wall; on Fort Hill is a vitrified fort. Borean Loch contains a crannoge or lake-dwelling; a ruined ivy-clad chapel adjoins St Laurence's Well, near Fairgirth House; and the remains of Auchenskeoch Castle stand near the head of Southwick Water. The property is divided among 19 landowners, 6 holding each an annual value of £500 and upwards, 6 of between £100 and £500, 1 of from £50 to £100, and 6 of from £20 to £50. Colvend is in the presbytery and synod of Dumfries; the living is worth £255. Its church was rebuilt in 1791; whilst Southwick church, which was used as late at least as 1743, is either of Norman or First Pointed origin. A granite shell, 64 by 25 feet, and 14 high, it lies between Clifton Crag and Bainloch Hill; was dedicated to Our Lady of Southwick, to whom Edward I. paid his devotions; and in its kirkyard has many old curious gravestones. Three public schools—Barnbarroch, Colvend, and Southwick—with respective accommodation for 83, 81, and 120 children, had (1891) an average attendance of 54, 39, and 73, and grants of £57, 1s. 6d., £46, 1s., and £79, 6s. 6d. Valuation (1888) £10,663, 10s. 5d. Pop. (1801) 1106, (1841) 1495, (1861) 1366, (1871) 1318, (1881) 1281, (1891) 1127.—*Ord. Sur.*, sh. 5, 1857. See W. R. M. McDiarmid's *Handbook to the United Parishes of Colvend and Southwick*.

Colville. See CULROSS.

Colzean Castle, the principal seat of the Marquis of AILSA and Earl of CASSILLIS, in Kirkoswald parish, Ayrshire, $4\frac{1}{2}$ miles W of Maybole. It stands near the verge of a basaltic cliff that rises 100 feet from Colzean Bay, and it was built in 1777 and following years after designs by Robert Adam. A magnificent castellated edifice, it commands a brilliant prospect of the Firth of Clyde, with a full view of Ailsa Craig, 15 miles to the south-westward; its entire buildings cover no less than 4 acres of ground; and landward it is engirt with beautiful terraced gardens and a large finely-wooded park. Near the castle, and directly under some of the buildings, are the Coves of Colzean. These coves or caves are six in number. Of the three towards the W, the largest has its entry as low as high-water mark; the roof is 50 feet high, and looks as though two huge rocks had fallen together, forming a Gothic arch. With varying breadth, it extends for about 200 feet, and communicates with the other two, which are both much smaller but of the same irregular shape. The coves to the E likewise communicate with one another, and have much the same height and figure as the former. For two things the Coves are famous, one, that soon after the Revolution they gave shelter to Sir Archibald Kennedy, the Covenanters' foe; the other, that in 1634 there was 'in them either a notable imposture or most strange and much-to-be-admired footsteps and impressions which are here to be seen of men, children, dogs, coney, and divers other creatures. These were conceived to be spirits, and if there be no such thing but an elaborate practice to deceive, they do most impudently betray the truth; for one of this knight's sons and another Galloway gentleman affirmed unto me that all the footsteps have been put out and buried in sand overnight, and have been

observed to be renewed next morning.' The original castle of Colzean, 'ane proper house with very brave yards,' was built by that Sir Thomas Kennedy, younger son of Gilbert, third Earl of Cassillis, who was murdered near Ayr in 1602, at the instigation of Mure of Auchendrane. Sir William Brereton, a Cheshire gentleman, whose *Travels* we have already quoted, describes it as 'a pretty pleasant-seated house or castle, which looks full upon the main sea. Hereunto we went, and there found no hall, only a dining-room or hall, a fair room, and almost as large as the whole pile, but very sluttishly kept, unswept, dishes, trenchers, and wooden cups thrown up and down, and the room very nasty and unsavoury.' By the death without issue of the eighth Earl of Cassillis in 1759, the murdered Sir Thomas's namesake and sixth descendant succeeded to the earldom, whereto was added the marquise of Ailsa in 1831. Arch. Kennedy, present and third marquis, and fourteenth earl (b. 1847; suc. 1870), owns 76,015 acres in the shire, valued at £35,839 per annum.—*Ord. Sur.*, sh. 14, 1863.

Colzium House, a seat of the Edmonstones of DUN-TREATH, in the parish and 1 mile NE of the town of Kilsyth, S Stirlingshire, in the mouth of a romantic glen of its own name. The ruined walls of an ancient castle, the predecessor of the present mansion, crown a fine elevation a little to the E.

Combs, St, a fishing village in Lonmay parish, NE Aberdeenshire, 5 miles ESE of Fraserburgh. It carries on valuable cod and herring fisheries; contains a public school; and down to 1608 had a church, dedicated to St Colm or Columba. Pop. (1891) 565.

Comely Bank, a small Edinburgh suburb in St Cuthberts parish, on the low road to Queensferry, $\frac{1}{2}$ mile WNW of Dean Bridge.

Comiston House, a mansion in the E of Colinton parish, Edinburghshire, near the Braid Hills, $3\frac{1}{2}$ miles S by W of Edinburgh. Built in 1815, it is the seat of Sir William Forrest, third Bart. since 1833 (b. 1823; suc. 1883), who owns 500 acres in the shire, valued at £1290 per annum. Comiston Springs here began so early as 1681 to contribute water supply to Edinburgh.

Comlongon, an ancient castle in Ruthwell parish, SW Dumfriesshire, $1\frac{1}{2}$ mile NW of Ruthwell village. A quadrangular edifice, measuring 60 feet along each side, and 90 feet in height, it was constructed to serve as a strong fortalice, with port-holes and battlements; its walls are so thick as to include within them small apartments. It is still in good preservation; and, having long been the seat of the Murrays of Cockpool, it now belongs to the Earl of Mansfield.

Commondyke, a collier hamlet in Auchinleck parish, Ayrshire, 3 miles NNE of Cumnock. Pop. (1871) 396, (1881) 1048, (1891) 412.

Commonhead Station. See AIRDRIE.

Commore Dam, a reservoir or artificial lake in Neilston parish, Renfrewshire, 2 miles SSW of Neilston village. Lying 600 feet above sea-level, it is fed from Harelaw Dam, and sends off its superfluence to Levern Water; measures $1\frac{1}{2}$ by 1 furlong; and is 24 feet deep.

Compass Hill. See CANNA.

Compstone, an estate, with a fine modern mansion, in Twynholm parish, Kirkcubrightshire, near the right bank of Tarf Water, a little above its confluence with the Dee, $2\frac{1}{2}$ miles N by W of Kirkcubright. It has long been the property of a branch of the Maitlands, to which belonged the two brothers and eminent Scotch judges, Thomas Maitland, Lord Dundrennan (1792-1851), and Francis Maitland, Lord Barcaple (1809-70). Its present owner, David Maitland, Esq. of Dundrennan (b. 1848; suc. 1861), holds 2304 acres in the shire, valued at £2145 per annum. In old Compstone Castle, now represented only by three tottering walls of a tower, the soldier-poet, Alexander Montgomery, composed *The Cherie and the Slave* (1595).

Comrie, a village and a parish of Strathearn, central Perthshire. The village stands, 200 feet above sea-level, on the left bank of the Earn (here spanned by an old

five-arch bridge), immediately below the confluence of the Ruchill and above that of the Lednock. It is $6\frac{1}{2}$ miles W of Crieff, $6\frac{1}{2}$ E by S of St Fillans, being the terminus of the Crieff and Comrie extension of the Caledonian. Z-shaped in plan, and sheltered by wooded slopes, it is a pleasant little place, a burgh of barony under the Dundas family; and it has a post office under Crieff, with money order, savings bank, insurance, and telegraph departments, a branch of the Commercial Bank, insurance agencies, hotels, a reading-room, a public hall, a masonic lodge, gas-works, ploughing and horticultural societies, and fairs on the third Wednesday in March, the second in May, the last in October, and the first in December. The parish church (1804; 1026 sittings) has a lofty spire, and crowns a gentle eminence beside the Earn. The Free church (1879-81; 650 sittings) is one of the finest in Scotland, French Gothic in style, with a clock-tower and an adjoining hall; its cost, exceeding £10,000, was defrayed by a bequest of the late Miss M'Farlane of Comrie. The U.P. church, rebuilt in 1866, is also a good Gothic edifice; the father of the late George Gilfillan, Comrie's most gifted son, was a minister of the old church. There is also an Episcopal mission church. A grauitic obelisk, 72 feet high, was reared in 1815 on Dunmore Hill (841 feet), $1\frac{1}{2}$ mile N by W of the village, to commemorate Viscount Melville's death four years before at Dunira. There is also another memorial, of the same material, 80 feet high, to the memory of the late Sir David Baird. Nowhere else in Britain are earthquakes so frequent as at Comrie, a frequency due, it would seem, to its geological position, which recent survey has shown to be on the great line of fault that separates the Lowlands and the Highlands. In 1875 an ingenious apparatus was established at the village, to register the force and direction of the shocks, among the most noteworthy of which were those of 23d Oct. 1839 and 10th Jan. 1876. A public school, with accommodation for 268 children, had (1891) an average attendance of 143, and a grant of £148, 7s. Pop. (1834) 978, (1861) 789, (1871) 746, (1881) 1038, (1891) 870.

The parish, containing also the villages of Dalginross, Ross, and St Fillans, comprises the ancient parishes of Comrie and Dundurn, and the greater part of Tullie-kettle. It is bounded N by Kenmore, E by Monzievairstrowan, SE by Muthill, SW by Callauder, and W by Balquhitter. In 1891 the Boundary Commissioners transferred to Comrie parish the Cultibregan and Easter Meiggar detached portions of the parish of Monzievairstrowan, unitedly comprising 1407 acres, as well as the Cowden part of the parish of Muthill. It has an utmost length of 11 miles from E to W; its breadth from N to S varies between 8 and 12 miles; and its area is now 64,339 acres, of which 2340 $\frac{3}{4}$ are water. By Loch EARN and the river Earn the parish is divided into unequal halves, that to the N being somewhat the larger. The loch is $6\frac{1}{2}$ miles long by 5 furlongs wide, and lies 306 feet above sea-level; the river, issuing from it, winds 7 miles east-south-eastward through the interior to the village, and thence 9 furlongs on or close to the Monzievairstrowan boundary, where it sinks to less than 200 feet above the sea. At the village it is joined by the hazel-fringed Water of RUCHILL, which, from the SW border hurries $9\frac{1}{2}$ miles north-eastward through 'Ione Glenartnoy,' and by the LEDNOCK, rising between Creag Uigeach and Ruadh Bheul, and running 11 miles south-eastward, down its deep, wooded gorge, where it forms the Deil's Caldron and other less-famed falls. Between it and Loch Earn lies Loch BOLTACHAN ($2 \times 1\frac{1}{2}$ furl.) To the N of the river and Loch Earn the chief elevations from E to W are Dunmore Hill (841 feet), Crappich Hill (1467), Creag Liath (1636), *Creag Mhor na h-Iolair (1783), BEN CHONZIE (3048), *Creag nan Eun (2990), *Creag Uigeach (2840), Meall nam Fiadh (2000), *Ruadh Bheul (2232), Sron Mhor (2203), and *Meall na Cloiche (2175), of which those marked with asterisks culminate on the boundaries of the parish; to the S rise Ben Halton (2033), Birran or Dunduru (2011), a nameless summit in the Forest of Glenartnoy (2317), *Meall Odhar (2066),

Meall na Fearna (2479), BEN VORLICH (3224), and *Stuc a Chroin (3189). Such are the outlines of Comrie's romantic scenery, here grandly savage, there softly picturesque, to be filled in with greater minuteness in articles on its lochs and rivers, its mountains, and valleys, and mansions. The line of junction between the Old Red sandstone and the slates passes diagonally from Glenartney into the Monzievaired hills; and Upper Strathearn to the NW of this line, *i.e.* the greater part of this parish, is wholly composed of slate rocks, which present many glacial phenomena, whilst the level strath appears to have been the bed of an ancient lake. Granite boulders are numerous along the Lednaig, whose channel is crossed by a great dyke of greenstone. Slate, trap, and limestone have all been quarried; and lead and iron ores are also found, the latter being at one time largely worked. The soil in some parts of the glens approaches to loam, but is a light, sharp, stony gravel of no great fertility over most of the arable lands. These occupy barely one-ninth of the entire area, and woods and plantations cover some 3000 acres. The chief antiquities are three stone circles and the remains of Agricola's stationary camp at DALGINROSS. Comrie House, near the Lednock, a little behind the village, is charmingly seated amid surrounding woods; and other mansions are Aberchill, Ardvoirlich, Dalhonzie, Drumearn, and Dunira, 6 proprietors holding each an annual value of £500 and upwards, 2 of between £100 and £500, 5 of from £50 to £100, and 9 of from £20 to £50. Giving off something to Balquhider, and taking in something from Monzievaired, Comrie is in the presbytery of Auchterarder and synod of Perth and Stirling; the living is worth £270. Three public schools—Glenartney, Glenlednock, and St Fillans—with respective accommodation for 23, 30, and 40 children, had (1891) an average attendance of 20, 10, and 20, and grants of £35, 10s. 6d., £26, 9s., and £33, 17s. Valuation (1891) £17, 17s. 4s. Pop. (1801) 2458, (1831) 2622, (1861) 2226, (1871) 1911, (1881) 1726, (1891) 1529.—*Ord. Sur.*, shs. 47, 46, 39, 1869-72. See *Beauties of Upper Strathearn* (Crieff, 1870).

Comrie, a ruined fortalice in a detached section of Weem parish, Perthshire, until 1891, when it was placed in Dull parish, on the river Lyon, a little above its influx to the Tay, and 2½ miles NNE of Kenmore.

Comrie, a hamlet in Culross parish, Fifeshire, ½ mile W by N of Oakley, and 5 miles* of Dunfermline. A little to the W is Comrie Castle.

Comyn's Castle. See DALSWINTON.

Cona, a stream in the Argyllshire portion of Kilmallie parish, flowing 9½ miles east-by-southward to Loch Linnhe, which it enters 6¾ miles SW of Fort William, and joined, 1½ mile above its mouth, by the Seaddle. On its left bank, ¾ mile from Loch Linnhe, and 5 miles N by E of Ardgour, stands Conagen, a seat of the Earl of Morton, who holds 46,883 acres in the shire, valued at £1685 per annum. See also DALMAHOY.

Cona. See COE.

Connachan. See INCH-CONNACHAN.

Conait or **Allt Conait**, a rivulet in Fortingal parish, NW Perthshire. It issues from Loch Dhamh (1869 feet), and, traversing Loch Girre, runs 4½ miles eastward and south-eastward to the Lyon, 8 miles NNW of Killin. With a total descent of 500 feet, it forms some beautiful cascades, especially in the last mile of its course.

Conan (Gael. *caoin-an*, 'gentle river'), a river of SE Ross-shire, formed, at an altitude of 180 feet above sea-level, by the confluent Sheen and Meig, in Contin parish, 3¾ miles W by N of Contin church. Thence it runs 9½ miles east-by-southward and 2¾ north-north-eastward, till it falls into the head of Cromarty Firth, 1 mile S of Dingwall. On its left lie the parishes of Contin, Fodderty, and Dingwall, on its right of Urray and Urquhart-Logie-Wester; and its chief affluents are the Blackwater on the left, the Orrin on the right. The fishing, which is everywhere preserved, is better for salmon than trout; pearl-mussels have been occasionally found, containing magnificent pearls. The Highland railway crosses it, in the vicinity of Conan Bridge village, by a fine viaduct, which, 435½ feet long,

has five very sharply-skewed arches, and commands a charming view of a reach of the river's valley and of the upper waters of Cromarty Firth. Hugh Miller, in *My Schools and Schoolmasters*, devotes many pages to the Conanside of 1821, with its broad lower alder-fringed reaches, its noble hills, its woods of Tor Achilty, Brahan Castle, and Conan House, its winter floods, and its water-wraith.—*Ord. Sur.*, sh. 83, 1881.

Conan-Bridge, a village in Urquhart and Logie-Wester parish, in the county of Ross and Cromarty, on the right bank of the Conan, 2½ miles SSW of Dingwall, under which it has a post office, with money order, savings bank, and telegraph departments. It took its name from a bridge over the Conan, on the road from Beauly to Dingwall, which, built in 1809 by the parliamentary commissioners at a cost of £6854, is a stone five-arch structure, with a water-way of 265 feet. The village has a station (Conan) on the Highland railway, an inn, and a public school. Pop. (1841) 342, (1861) 501, (1871) 385, (1881) 385, (1891) 358.

Conan House, a mansion in Urquhart and Logie-Wester parish, Ross and Cromarty, near the right bank of the Conan, 1 mile S by W of Conan Bridge. It is a seat of Sir Kenneth Smith Mackenzie of Gairloch, sixth Bart. since 1702 (b. 1832; suc. 1843), who owns 164,680 acres in the shire, valued at £7843 per annum.

Condie, an estate, with a mansion, in Forteviot parish (since 1891), Perthshire, 4 miles SW of Bridge of Earn. Since 1601 a seat of a branch of the Oliphants, it now is held by Lawrence Jas. Oliphant, Esq. (b. 1846; suc. 1862), who owns 2667 acres in the shire, valued at £2301 per annum.

Condorrat, a village and *quoad sacra* parish in Cumbernauld parish, Dumbartonshire, 2¾ miles SW of Cumbernauld village, and 6 NNW of Airdrie, under which it has a post office. An Established church, built here in 1875, contains 400 sittings, and cost, with a manse, £2600. Pop. (1891) 607; of *q. s.* parish, 1596.

Conerock, a conspicuous eminence (808 feet) in Rothes parish, Elginshire, 1½ mile SSW of Rothes village. Wooded to the top, it presents a contorted appearance, and it chiefly consists of quartz, containing beautiful rock crystals.

Congalton, an ancient barony in Dirleton parish, Haddingtonshire.

Conghoillis, an ancient parish in Forfarshire, nearly or quite identical with the modern INVERKEILOR.

Conglass, a rivulet in Kirkmichael parish, Banffshire, running 8 miles north-westward, along a mountain glen, to the river Aven, 3 miles NNW of Tomintoul.

Conheath, an estate, with a mansion, in Caerlaverock parish, Dumfriesshire, 4½ miles SSE of Dumfries. It was purchased in 1876 by David Watson Rannie, Esq.

Conicavel, a village in Edenkillie parish, Elginshire, near Darnaway, and 3½ miles SSE of Brodie station. It has a Christian Knowledge Society's school.

Con, Loch. See CHON.

Connell Ferry, a ferry, 1½ furlong wide, across the entrance of Loch Etive, in Argyllshire, on the line of road from Oban to Ballachulish. It is traversed by a tiny steamer, and has an inn on either shore, whilst on the southern is Connell Ferry station upon the Callander and Oban railway, 6 miles NE of Oban, under which there is a post office of Connell. An Established church was erected here in 1888, and a number of villas have been built near it. The loch's channel, suddenly contracting here, is barred two-thirds across by rocks left bare to the height of 5 feet at low water, over which the ebbing tide flows in tumultuous cataract. These so-called Falls of Connell have been identified with Ossian's Falls of Lora.

Connell, a shallow loch in Kirkcolm parish, W Wigtownshire. It sends off a burn, running 4 miles southward and eastward to Loch Ryau. On a hill (314 feet), 3 furlongs SE of the loch, are remains of a large cairn, Cairn Connell.

Connell Park, a village in New Cumnock parish, E Ayrshire, 1½ mile SW of New Cumnock village. Pop. (1891) 622.

Connicaval. See CONICAVEL.

Conningsburgh, a hamlet and an ancient parish in the S of Shetland. The hamlet lies on the E coast of the mainland, 9 miles SSW of Lerwick, and has a Free church. The parish, extending across the mainland, from Aiths Voe to Cliff Sound, is bounded N by Lerwick parish; it contains a ridge of eminences, running nearly parallel with the coast-lines, and called the Conningsburgh Hills; and it is now annexed *quoad civilia* to Dunrossness, and *quoad sacra* to Sandwick.

Conon. See CONAN.

Conrie, a rivulet of Strathdon parish, W Aberdeenshire, winding $3\frac{1}{2}$ miles north-by-eastward to the Don at Culfork.

Contell, a hamlet 2 miles from Lochgelly, in Fife.

Contin, a very large Highland parish of central and south-eastern Ross-shire. Its church and school stand on the right bank of the Blackwater, $4\frac{1}{2}$ miles SW of Strathpeffer station, this being $4\frac{1}{2}$ miles N by W of Dingwall, under which Contin has a post office. It contains four stations on that railway, Garve, Lochluichart, Auchanalt, and Achnasheen. In 1891 the Boundary Commissioners transferred from Contin to the parish of Urray the small portion of the parish lying to the south of the watershed between Strath Conan and Glen Orrin. On the other hand there were transferred to Contin the Aultdearg detached portion (2463 acres) of the parish of Urray, and all the Dalbreac detached portion of Fodderty parish, except the part lying to the south of the above-mentioned watershed. In the south-west of the parish are Lochs Fannich, Rosque, and Benachran. The principal streams are the Sheen and Meig, uniting to form the CONAN, and the BLACKWATER, joining the latter at Moy. Lakes, with their utmost length and width and altitude above sea-level, are Lochs ACHILTY (7×3 furl., 170 feet), GARVE ($1\frac{1}{2} \times \frac{1}{2}$ mile, 220 feet), LUICHART ($4\frac{1}{2}$ furl. \times $6\frac{1}{2}$ furl., 270 feet), FANNICH ($6\frac{1}{2}$ mile \times $6\frac{1}{2}$ furl., 822 feet), ROSQUE ($3 \times \frac{1}{2}$ mile), Benachran (2×1 mile), A Garbh Raoin ($4\frac{1}{2} \times 3$ furl., 900 feet), and Coire Lair (6×1 furl., 980 feet). There are, besides, close upon fifty smaller lochs, most of them, like the above, affording capital angling. The surface sinks in the extreme SE to 53 feet above sea-level, thence rising westward to Carn Sgolbaidh (1342), *Carn na Cloiche Moire (1936), *Meall nan Damh (2198), and Sgurr Maire-suidhe (1899), where asterisks mark those summits that culminate on the borders of the parish; north-westward to Carn na Buaille (650), Cnoc Dubh (749), Carn Faire nan Con (1210), Meall Mhic Iomhair (1984), Beinn Liath Mhor (2464), Tom Ban Mor (2433), Meall Leacachain (2028), Meallan Ban (3120), and BEN DEARG (3547); whilst in the SW wing rise *Beinn Liath Bheag (2173), Sgurr Mor (3637), Meallan Rairigidh (3109), An Coileachen (3015), *A Chailleach (3276), Beinn nan Ramh (2333), and Fionn Bheinn (3060). The Old Red sandstone stretches into the lower parts of the parish, and is covered in places with a stroug reddish clay; in the uplands gneiss is the leading formation, mixed with its subordinato rocks. The soil of the arable lands ranges from strong clayed loam to light friable mould; and great improvements have been effected on the Coul estate, 1400 acres having been here reclaimed within the last thirty-five years, and bearing now rich crops of all descriptions. In the lower grounds, too, plantations and natural wood—a remnant this of the primeval forest—cover a considerable area, yet small to that occupied by sheep-walks, deer forest, and desolate upland moors. Mansions are Coul and Craigdarroch; and 8 proprietors hold each an annual value of £500 and upwards, 3 of between £100 and £500, 2 of from £50 to £100, and 4 of from £20 to £50. Giving off portions to the *quoad sacra* parishes of Carnach and Kinlochluichart, Contin is in the presbytery of Dingwall and synod of Ross; its living is worth £292. The parish church is an old building, and there are Free churches at Contin, Fodderty, Strathconan, and Strathgarve. Two public schools, Contin and Scatwell, with respective accommodation for 100 and 38 children, had (1891) an average attendance of 67 and 17, and grants of £78, 13s. 6d.

and £35, 19s. 6d. Valuation £17,949, 9s. 9d. Pop. of civil parish (1801) 1944, (1831) 2023, (1861) 1509, (1871) 1550, (1881) 1422, (1891) 1298; of *quoad sacra* parish (1891) 592.—*Ord. Sur.*, shs. 83, 93, 92, 1881.

Conval, Meikle, a summit (1867 feet) in Mortlach parish, Banffshire, $2\frac{1}{2}$ miles SW of Dufftown, and $2\frac{1}{2}$ ENE of the summit of Ben Rinnes. Little Conval (1810 feet) rises $1\frac{1}{2}$ mile N by E, and is crowned with vestiges of a Danish camp.

Conval or Coinne-mheall. See BENMORE-ASSYNT.

Conveth, an ancient parish of Inverness-shire, now annexed to Kiltarlity, and forming its south-eastern section.

Coodham, an estate, with a mansion, in Symington parish, Ayrshire, 4 miles SSW of Kilmarnock. Originally a seat of the Fairlies, it was sold in 1871, for £27,880, to Sir Wm. Hy. Houldsworth, Bart. (b. 1834), who owns 585 acres in the shire, valued at £1151 per annum.

Cookney, a *quoad sacra* parish in Fetteresso parish, Kincardineshire, $5\frac{1}{2}$ miles N by W of its post-town Stonehaven, and $2\frac{1}{2}$ WNW of Muchalls station. The old church dated from about 1817, but the present building was erected in 1886. There is a public school, with accommodation for 141 children, an average attendance in 1891 of 116, and a grant of £112, 16s. 1d. The parish is in the presbytery of Fordoun and synod of Angus and Mearns; its minister's stipend is £178. Pop. (1871) 2080, (1891) 1784.—*Ord. Sur.*, sh. 67, 1871.

Coolins. See CUCHULLINS.

Copay, an uninhabited islet in the Sound of Harris, Outer Hebrides, Inverness-shire.

Copenshay or Copinshay, an island of Durness parish, Orkney, $2\frac{1}{2}$ miles E by S of the SE extremity of the Durness portion of the mainland. Measuring 1 by $\frac{1}{2}$ mile, it has lofty cliffs, denized in the summer months by myriads of sea-fowl, whose eggs and feathers have considerable value. An island, called Horse of Copenshay, lies $\frac{1}{2}$ mile off its NE end.

Coppercleuch, a place with a post office in the former Megget section of Lyne parish, S Peeblesshire, near the western shore of St Mary's Loch, and 17 miles WSW of its post-town Selkirk. The Boundary Commissioners in 1891 transferred this section of Lyne parish to Yarrow parish, Selkirkshire.

Coquet, a river briefly connected with Oxnam parish, E Roxburghshire. It rises among the Cheviots, close to the English border, and, following it for $\frac{3}{4}$ mile, turns into Northumberland, there to run 35 miles to the sea at Warkworth, opposite Coquet island.

Coquhalzie. See COLQUHALZIE.

Corah. See KIRKGUNZEON.

Corbelly. See DUMFRIES.

Corbie. See ARITY.

Corbiehall. See CARSTAIRS.

Corbiehall, a suburb of Borrowstouness, Linlithgowshire.

Corbie Pot, a romantic glen in Maryculter parish, Kincardineshire, on the mutual border of Maryculter and Kingussie estates. It is notable for the number and variety of its indigenous plants.

Corchinan. See BOGIE.

Core or Cor. See TWEED.

Coreen Hills, a mountainous range along the north-western border of the Howo or Vale of Alford, Aberdeenshire, culminating in Lord Arthur's Cairn (1699 feet), on the mutual boundary of Alford and Tullynesslo parishes, 5 miles WNW of Alford village. Their laminar mica-slate, of a brownish-black colour, has long been worked.

Corehouse, an estate, with a mansion, and a ruined baronial fortalice, in the NE of Lesmahagow parish, Lanarkshire, $2\frac{1}{2}$ miles S of Lanark. A 'neat, white, lady-like house,' according to Dorothy Wordsworth, the mansion crowns a cliff, at the left side of the river Clyde, a little below CORRA LINN, from which it is almost hidden by lofty trees. It was the seat of the late George Cranstoun (born 1841; died 1890), who was raised to the bench as Lord Corehouse in 1826;

its present owner, Charles J. Edmonstone-Cranston, Esq., holds 2860 acres in the shire, valued at £1893 per annum. The ruins of Corra Castle, on the verge of the weather-worn Old Red sandstone cliff immediately above the linn, so overhangs the surging river sweeping on to the fall, as, during spates, to nod and vibrate from base to summit. Both the estate of Corehouse and the fall of Corra Linn are said to have been named from Cora, a shadowy Caledonian princess, who leaped on horseback over the cliff into the cataract. Not the old castle only, but the very cliff above and about and below the linn, trembles from concussion of high floods. As Wordsworth sings:—

'Lord of the vale! astounding Flood!
The dullest leaf in this thick wood
Quakes—conscious of thy power;
The caves reply with hollow moan,
And vibrates to its central stone
Yon time-cemented Tower.'

Corellan, an islet of Paltalloch estate, South Knapdale parish, Argyllshire. It serves for grazing, and is famed for the quality of its beef and mutton.

Corgarff, a *quoad sacra* parish of W Aberdeenshire, comprising the upper or western portion of STRATHDON parish, and thus containing the sources and head-streams of the river Don. Formed in 1874, it is in the presbytery of Alford and synod of Aberdeen. Its church, on the Don's left bank, 1274 feet above sea-level, and 7½ miles WSW of Strathdon church, was built in 1835, and, with a manse, cost nearly £1000, defrayed by Sir Charles Forbes, Bart. Near it are a post office, and it has a public school, with accommodation for 44 children, and a Roman Catholic chapel. Corgarff Castle, 1½ mile higher up, on the opposite bank of the Don, is a small, oblong, four-storied building with wings, which, purchased by Government in 1746 from Forbes of Skelater, was garrisoned from 1827 till 1831 by 53 soldiers to support the civil authorities in the suppression of smuggling. The tragic story of the burning of its predecessor by Sir Adam Gordon of Auchindoun, in 1551, 1571, or 1581, has been repeated by a number of topographers, who often, however, relate the same event as occurring in 1571 at the Castle of TOWIE, to which indeed it properly belongs.—*Ord. Sur.*, sh. 75, 1876.

Corhabbie Hill, a summit (2563 feet) on the mutual border of Mortlach and Inveraven parishes, Banffshire, 7½ miles SSW of Dufftown, and 4¾ SSE of Ben Rinnes.

Corkindale Law. See NEILSTON.

Cormorant's Cave. See STAFFA.

Corncairn, Banffshire. See CORNHILL.

Corncockle Moor. See LOCHMABEN.

Cornhill, an estate, with an elegant modern mansion, in Culter parish, E Lanarkshire, 2¾ miles SW of Biggar. It was purchased from the Handyside family, in 1866, by Alex. Kay, Esq., who owns 833 acres in the shire, valued at £388 per annum.

Cornhill, a village in the Corncairn or northern district of Ordiqhill parish, Banffshire, on an affluent of the Burn of Boyne, with a station on the Banffshire railway, 8½ miles SW by W of Banff, under which it has a post and telegraph office. Fairs are held here on the second Thursday of every month.

Cornie Burn. See ABERCORN.

Cornton, a place in Logie parish, Stirlingshire, 1½ mile N of Stirling. It was the scene of the battle of STIRLING in 1297.

Corodule, a cave on the E side of South Uist island, Inverness-shire, contiguous to the sea, at the foot of a high hill-range, between Lochs Skipport and Eynort. It gave shelter to Prince Charles Edward for some days in May 1746.

Corpach, a village in Kilmallie parish, Inverness-shire (transferred from Argyllshire in 1891 by the Boundary Commissioners), at the southern extremity of the CALDONIAN CANAL, 2½ miles NNW of Fort William. The landing-place of passengers by the steamers on the route between Oban and Inverness, it communicates with Banavie by omnibus; at it are a hotel, the parish church of Kilmallie, and a Free church.

Corr, A-Choire, or Coir' an Fhearna, a loch of Fari parish, central Sutherland, 6 miles SE of Altnaharrow inn at the head of Loch Naver, from which lake it is screened by BENCLEBRICK (3154 feet). Lying itself 570 feet above sea-level, it has an utmost length from SW to NE of 3¼ miles, whilst in width it varies between 2½ and 3½ furlongs. At its head it communicates with Loch a Vellich, and from its foot sends off a stream to the river Naver. Its trout are large and plentiful.—*Ord. Sur.*, sh. 106, 1880.

Corrachree, an estate, with a modern mansion, in Logie-Coldstone parish, Aberdeenshire, 2 miles SW of Tarland.

Corrah. See CORAH.

Corra Linn, a fall on the river Clyde, on the boundary between Lanark and Lesmahagow parishes, Lanarkshire, ½ mile below Bonnington Linn, and 1¾ mile S of Lanark town. It makes a total descent of 84 feet, but it encounters two ledges of rock, and so is practically a series of cascades—first, a fall of a few feet; next, after a brief break, another of 30 feet; then, a tumultuous rapid of 30 yards; and, lastly, a grand concluding leap into 'a basin, enclosed by noble rocks, with trees, chiefly hazels, birch, and ash, growing out of their sides wherever there is any hold for them.' The river, from Bonnington Linn, is all a continuous rapid, along the bottom of an Old Red sandstone chasm, narrow and 70 to 100 feet high, down which it hurries, under deep gloom and with hoarse, hollow, ever-growing roar. But, at Corra Linn, its previous tumult increases to thunder, its dash of waters is canopied with clouds of spray, sparkling at times with all the colours of the rainbow; and its cataracts blend with the scenery of a surrounding rocky amphitheatre, which rises in places to 120 feet, to produce an effect that is almost overwhelming. A gorge about 8 feet wide, a little above the linn, shows traces of an ancient drawbridge; is reached, from the brink of the chasm, by a narrow path down a shelving descent; and commands a striking view of the ruined castle of Corehouse. One excellent view, both of the linn itself and of an expanse of country westward to a distant skyline, is got from a pavilion built in 1708 on a bank overlooking the cliffs, and furnished with mirrors which reflect the scenery. Another, with backgrounds away to Ben Lomond, and with many intervening features of high interest, is got at a spot opposite the darkest part of the linn's amphitheatre, reached by a pleasant sloping path. And the best close view of the linn itself, commanding its aspects in their highest force, is got from a spot at the bottom of the amphitheatre, directly in front of the linn, down a rustic staircase of woodwork and natural rock, designed in 1829 by Lady Mary Ross, the then proprietrix. Corra Linn entrances all beholders, however fastidious or far-travelled they may be, and it has been more studied by draughtsmen, more sung by poets, than almost any other place in Scotland. See CLYDE, COREHOUSE, and pp. 36, 37, of Dorothy Wordsworth's *Tour in Scotland* (ed. by Princ. Shairp, 1874).

Corran, a beadland in Cowal, Argyllshire, at the deflection of Loch Goil from Loch Long.

Corran Narrows, a strait, 1½ furlong wide, between Loch Linnhe and Lower Loch Eil. On the E shore stands Corran Inn, 8¾ miles SW of Fort William; on the W are Corran lighthouse and ARDGOUR hamlets; and a ferry plies between. Ben Nevis is distinctly seen from here, and to the right there is a grand view of Glencoe. The lighthouse shows a fixed white light up Loch Eil and down Loch Linnhe, and a fixed red light toward the Narrows from Ardshiel Point to Coireherrich Point, both visible at a distance of 10 nautical miles.

Corrennie, a long hill ridge on the mutual border of Tough, Cluny, and Kincardine O'Neil parishes, Aberdeenshire, culminating in Benaquhallie at a height of 1621 feet above sea-level.

Corriche, a marshy hollow almost surrounded by summits of the Hill of Fare, in the N of Banchory-Ternan parish, on the border of Kincardine and Aberdeenshire, 3½ miles SW of Echt, and 15 W of Aber-

deen. It is traversed by a brook of its own name, a head-stream of the Black Burn; and it was the scene, on 28 Oct. 1562, of an action between the forces of Queen Mary under the Earl of Moray, and the followers, barely 500 in number, of the Earl of Huntly, who was easily routed, himself being smothered in his armour, and Sir John Gordon, his son, and Mary's would-be suitor being executed at Aberdeen, with others of the family. From a natural granite seat hard by the Queen is said to have afterwards beheld the battlefield; and it and a spring still bear the names of the Queen's Chair and Queen Mary's Well. A good old ballad celebrates the skirmish.

Corrie, a village on the E coast of Arran island, Buteshire, $5\frac{1}{2}$ miles N by E of Brodick. It has a telegraph post office, an Established church, an inn, and a small harbour; it communicates regularly with the steamers plying between the upper Clyde ports and Lamlash; and it exports large quantities of limestone. The Corrie and Whiting Bay districts of the island were opened up for feuing purposes in 1893.

Corrie, an ancient parish of Annandale, Dumfriesshire, since 1609 annexed to Hutton, and forming its southern section. Corrie Water, rising near the Eskdalemuir border at 800 feet above sea-level, runs 7 miles south-south-westward through the interior, and along the boundary with Applegarth and Dryesdale, and falls into the Water of Milk, $3\frac{1}{4}$ miles E by N of Lockerbie. Corrie church stood 1 mile E of Corrie Water. See HUTTON.

Corriegills, a point on the eastern coast of Arran, Buteshire, immediately S of the entrance to Brodick Bay. It exhibits veins of eruptive rocks ascending through sandstone, and presents an enormous boulder, which figures conspicuously over a great extent of coast.

Corriehabbie. See CORHABBIE.

Corrieknows, a farm on the SE border of Cummertrees parish, Dumfriesshire, $1\frac{1}{2}$ mile W of Annan. A vast quantity of ancient swords, spears, battle-axes, and other muniments of war, were found here about the year 1828, and are supposed to have been relics of some great unrecorded battle, fought before the time of the founding of Annan.

Corriemony, a finely-wooded estate, with a mansion, in Urquhart and Glenmoriston parish, Inverness-shire, at the head of Glen Urquhart, 9 miles W of Drumadrochit on Loch Ness. Its owner, L. A. Macpherson, Esq., holds 10,856 acres in the shire, valued at £1085 per annum. On the estate is a public school, with accommodation for 32 children.

Corriemuchloch, a hamlet in the N of Crieff parish, Perthshire, $1\frac{1}{2}$ mile SSW of Amulree. It was the scene of the 'Battle of Corriemuchloch'—a repulse by smugglers of a party of Scots Greys.

Corriemulzie, a burn in the Braemar section of Crathie parish, SW Aberdeenshire, running $2\frac{3}{4}$ miles W and N to the Dee, near Marr Lodge, 3 miles WSW of Castleton. It traverses a narrow birch-clad ravine; and in its short career has a total descent of 1150 feet, forming one very beautiful cascade.

Corrievrechan (Gael. 'Brecan's cauldron'), a strait between the Argyllshire islands of Jura and Scarba. Scarcely a mile across, it lies about 2 miles W of the route of the Oban steamers, and is seldom traversed by boats, never by ships. The tides—running sometimes 13 miles an hour—here meet round a steep pyramidal rock, which rises from a depth of 100 fathoms to within 15 feet of the surface, and cause a whirlpool, dangerous enough to small craft in stormy weather and at flood-tides. This whirlpool by fancy has been exaggerated into another Malström, the haunt of strange and horrible sea-monsters. Also of mermaids, for Leydon's version of the Gaelic legend tells how Macphail of Colonsay, passing the Corrievrechan, was carried off by one, and for years kept in pleasant durance in a cavern beneath the sea. According to Joyce's *Irish Names and Places* (2d ser. 1875), the name *Corrievrechan* was first applied to a whirlpool in the sound between Rathlin Island and the coast of Antrim, and was thence transferred to the Scotch locality, most likely by the monks of Iona.

Corriskin. See CORUISK.

Corryarrick (Gael. *coire-airigh*, 'rising ravine'), a dreary mountain ridge on the mutual border of Boleskine and Laggan parishes, central Inverness-shire, 7 miles SSE of Fort Augustus. Parting Glenmore from Upper Strathspey, it culminates in Corryarrick Hill (2922 feet) and Carn Leac (2889), midway between which, at 2507 feet above the sea, Wade formed about 1735 his military road from the Bridge of Laggan to Fort Augustus. 'This,' says Hill Burton, 'the most truly Alpine road in the British dominions, has been left to decay, and large portions of it have been swept away by torrents, so that the zigzag lines by which the military engineer endeavoured to render the steep side of an abrupt mountain accessible to artillery, have been tumbled into heaps of rubbish like natural scars.' See also H. Skrine's *Three Successive Tours in the North of England and Great Part of Scotland* (Lond. 1795).

Corrybeg, a hamlet in Kilmalie parish, N Argyllshire, on the northern shore of Upper Loch Eil, 8 miles WNW of Fort William.

Corrybrough, an estate, with a mansion, in Moy and Dalaraossie parish, Inverness-shire, on the right bank of the Findhorn, 16 miles SE of Inverness. Its owner, Herbert Charles Malkin, Esq., owns 6900 acres in the shire, valued at £625 per annum.

Corry Our. See MUTHILL.

Corryvarligan, a mountain pass on the mutual border of Inverness and Ross shires, traversed by a wild road from Loch Hourn Head to Shielhouse on Loch Duich. It has, at the summit point of the road, an elevation of 2000 feet above sea-level; and it commands there a very striking view.

Corryvreckin. See CORRIEVRECHAN.

Corsancone, a hill (1547 feet) in New Cumnock parish, Ayrshire, $3\frac{3}{8}$ miles E by N of New Cumnock village.

Corsbie, a ruined tower in the parish and $1\frac{1}{2}$ mile ENE of the village of Legerwood, E Berwickshire.

Corse. See COULL.

Corseglass. See DALRY, Kirkcudbrightshire.

Corsehill, an estate in Stewarton parish, Ayrshire. Belonging to Sir William J. M. Cuninghame, Bart., V.C., commander of the Glasgow Volunteer Brigade, it has a ruined ancient castle, celebrated by the author of 'My Grandfather's Farm;' and there are lime-works on it.

Corsemill or Crossmill, a village in Abbey parish, Renfrewshire, on the left bank of the Levern, 1 mile NNE of Barrhead.

Corsewall, a mansion, a ruined castle, and a headland with a lighthouse in Kirkcolm parish, W Wigtownshire. The mansion stands amid finely-wooded policies, near the W shore of Loch Ryan, in the northern vicinity of Kirkcolm village, and 6 miles NNW of Stranraer; its owner, Jn. Carrick-Moore, Esq. (b. 1805; suc. 1860), holds 3362 and 2069 acres in Wigtown and Ayr shires, valued at £2920 and £1726, 10s. per annum. The castle, 3 miles NW, is now only part of a thick-walled tower 20 feet high; and, in the latter part of last century, was found to contain a cannon 7 feet long. The headland is situated 1 mile NW of the castle, and $2\frac{1}{2}$ miles WSW of Milleur Point at the entrance to Loch Ryan. Its lighthouse is 92 feet high, and shows every minute a revolving light, alternately red and white, and visible for 15 nautical miles. It has a siren fog-horn, giving four blasts in quick succession every three minutes.

Corskie. See GARTLY.

Corsock, a small village and a *quoad sacra* parish in Kirkcudbrightshire. The village stands on the eastern verge of Parton parish and on the right bank of Urr Water, 6 miles NE of Parton station; at it are a post office under Dalbeattie, with money order, etc., departments, a temperance hotel, the *quoad sacra* church (1839), a Free church, and a public school, which, with accommodation for 110 children, had (1891) an average attendance of 89, and a grant of £91, 13s. The parish, comprising portions of the civil parishes of Parton, Balmaclellan, and Kirkpatrick-Durham, contains also Nether Corsock hamlet, 2 miles S by W of the village; and Corsock Loch ($2\frac{1}{4} \times 1\frac{3}{8}$ furl.), $\frac{3}{4}$ mile W by S. On Hall-

croft farm stood Corsock Castle, the residence of Robert Nelson, the Covenanted confessor; and Corsock House was the seat of the late Mr Murray Dunlop, M.P. for Greenock, to whose memory a granite obelisk has been erected. Corsock is in the presbytery of Kirkcudbright and synod of Galloway; the minister's stipend is £193. Pop. (1861) 544, (1871) 563, (1881) 551, (1891) 540.—*Ord. Sur.*, sh. 9, 1863.

Corstorphine, a village and a parish of NW Edinburghshire. The village stands at the south-western base of Corstorphine Hill, on the Glasgow road, 3 miles W by S of Edinburgh, with which it communicates many times a day by omnibuses running in connection with the Coltbridge tramcars, whilst $\frac{3}{4}$ mile SSE is Corstorphine station on the Edinburgh and Glasgow section of the North British. Sheltered from cold winds, and lying open to the sun, it commands a fair prospect across the wide level plain to Craiglockhart and the Pentlands, and is itself a pleasant little place, with a few old houses, and many more good cottages and first-class villas, a growth—still growing—of the last few years. At it are a post office, with money order, savings' bank, and railway telegraph departments, 4 inns, a subscription library, a public school, the antique parish church, in connection with which a mission hall was opened in 1886, and a Free church with spire (1870; enlarged 1889). A sulphurous spring here was held in high medicinal repute about the middle of the 18th century, when Corstorphine was a fashionable resort of Edinburgh citizens, and had its balls and suchlike amusements of a watering-place. To the E, on the lower slope of the hill, is the Convalescent Home (50 beds) of the Royal Infirmary, Edinburgh, a plain but dignified building, which, standing in spacious grounds, was planned by Messrs Peddie & Kinnear, and opened in 1867. To the S, between the village and the station, is the Edinburgh University cricket, football, and running ground, with a good pavilion; and nearer the village are the curious old burg-like dovecot of Corstorphine Castle and the bronze-leaved 'Corstorphine Plane,' which, said to have been brought as a sapling from the East by a monk about 1429, is 73 feet high, and girths 13 feet at 5 feet from the ground. Beneath it in 1679, James, second Lord Forrester, was stabbed by his paramour, one Mistress Nimmo, who was beheaded at the Cross of Edinburgh. These Forresters held Corstorphine barony from 1376, and in 1633 received their title, which in 1808 devolved upon Viscount Grimston, the after first Earl of Verulam. Their castle was burned to the ground about 1790. In the '45 Corstorphine figured as the scene of the ignominious dispersal of a body of Gardiner's dragoons, and as the place where Prince Charles Edward received two deputations from the Edinburgh magistrates. It has been lighted with gas since 1860, and a water supply was introduced from Clubbidean and the Pentlands in July 1881. Pop. (1861) 688, (1871) 680, (1881) 952, (1891) 1199.

The parish, containing also the village of GOGAR, is bounded N by Cramond, E by St Cuthberts, S by Colinton, SW by Currie and Ratho, and W by Ratho. From E by N to W by S it has an utmost length of $4\frac{3}{4}$ miles; its width varies between 7 furlongs and $2\frac{1}{2}$ miles; and its area is now 3619 $\frac{3}{4}$ acres. In 1891 the Boundary Commissioners transferred from this parish to the parish of Currie a small detached portion of 34 acres lying to the south-west of the village of Corstorphine. The surface is an almost unbroken plain, about 200 feet above sea-level, save in the NE, where Corstorphine Hill slopes gradually upwards, its highest point (520 feet) being crowned by square, five-storied, turreted Clermiston Tower, 70 feet high, built in 1872 on occasion of the Scott Centenary. Clothed with Scotch firs and hardwood trees, this hill figures widely in the Lothian landscape, and itself commands a magnificent view, especially from its steeper eastern side, where, at a point called 'Rest-and-be-Thankful,' two benches were placed in 1880 by the Cockburn Association. Thence one beholds the spires and towers of Edinburgh, its schools and hospitals, the Castle and Calton hills, with

Salisbury Craigs and Arthur's Seat for background, and, to the left, the sparkling waters of the Firth of Forth. The rocks belong mainly to the Calciferous Limestone series, but diorite intrudes on Corstorphine Hill, and here it was that Sir James Hall first called attention to striated rock-surfaces due to glacial action. Sandstone was once extensively quarried on the hill itself and on the lands of Ravelston for building in Edinburgh; and trap rock, blue in hue and compact in structure, is worked at West Craigs and Clermiston for dykes and road-metal. The soil of this parish—the 'Garden of Edinburgh'—is mostly a rich black loam, with patches of clay and sand. The fields are carefully managed, and bear fine crops in rotation; and much of the ground is laid out in well-tilled gardens, which furnish fruit and vegetables for the Edinburgh market. The country is nicely wooded, and contains a number of fine residences—Corstorphine House, Beechwood, Belmont, Hillwood, Hill House, Millburn Tower, Ravelston, Clermiston, Gogar House, Gogarburn, etc. Five proprietors hold each an annual value of £500 and upwards, 16 of between £100 and £500, 9 of from £50 to £100, and 16 of from £20 to £50. David Scot, M.D., an eminent Hebraist and man of letters, was minister from 1814 down to his death in 1834. Corstorphine, including portions of the ancient parishes of Gogar and St Cuthberts, is in the presbytery of Edinburgh and synod of Lothian and Tweeddale; the living is worth £281. A chapel, subordinate to St Cuthbert's church in Edinburgh, is noticed as early as 1123, and afterwards was parish church till its demolition in 1644, when its place was filled by a collegiate neighbour. Of this, in November 1881, an intelligent native assured the writer that it was 'wonderfully ancient, built by the Hottentots, who stood in a row and handed the stones on one to another from Ravelston quarry.' Ancient it most unquestionably is, but it was founded in 1429 by Sir John Forrester for a provost, 4 other prebendaries, and 2 singing boys, and dedicated to St John the Baptist. In style Second Pointed, cruciform in plan, it comprises a chancel and N sacristy, a nave, transepts, a little western galilee, and a low unbuttressed tower, pinnacled and capped by a short octagonal spire, where pigeons have built their nests. The older portions, or those that escaped the hand of the 'restorer' in 1828, are curiously roofed with flags of stone, and lavishly sculptured with the Forrester bearings—three bugles, stringed. The interior has been piteously maltreated, the nave and transepts having been patched into a kind of meeting-house (536 sittings), whose bareness is hardly redeemed by a stained-glass window to the memory of John Girdwood (*ob.* 1861), whilst the chancel serves merely for a vestibule, and is blocked up with a modern gallery staircase. Where stood the altar is now a doorway; but the pre-Reformation piscina and sedilia remain, along with a perfect hour-glass; and here lie two of the three Forrester effigies, life-size and mail-clad, in arched recesses. These, with their dames by their side, are the two Sir Johns, the founder and his son, who died in 1440 and 1454; the third, in the S transept, is a grandson, Sir Alexander, though it has often been falsely asserted to be Bernard Stuart, the celebrated Viceroy of Naples, who died, it is true, at Corstorphine in 1508, but who seems to have been buried in the Blackfriars church of Edinburgh. Without, in the churchyard, are many quaint old headstones, among them one, a natural smoothed boulder, to 'John Foord, shepherd' (1795), another to 'Francis Joseph Trells, native of Hungary, and lete tenant at Saughten Hall' (1796). The public school, with accommodation for 314 children, had (1891) an average attendance of 196, and a grant of £184, 14s. Valuation £22,585, including £530 for railway. Pop. (1801) 840, (1831) 1461, (1861) 1579, (1871) 1788, (1881) 2156, (1891) 2332.—*Ord. Sur.*, sh. 32, 1857. See vol. i. of Billings' *Baronial Antiquities* (1845); David Laing's *Registrum Domus de Soltre*, etc. (Bannatyne Club, 1861); and *A Mid-Lothian Village*, by G. Upton Selway (Edinb., 1890).

Cortachy and Clova, a very extensive parish of NW

Forfarshire, containing the hamlets of CLOVA and Cortachy, the latter lying towards the SE corner, 5 miles N by E of Kirriemuir, under which it has a post office. In 1891 the Boundary Commissioners transferred to this parish the Glenprosen detached part (20,630 acres) of the parish of Kirriemuir. This detached part was situated on the west of the parish to which it has now been transferred. Bounded N by Glenmuick in Aberdeenshire, NE by Lochlee and Lethnot, SSE by Tannadice, S by Kirriemuir, SW by Kingoldrum and Glenisla, and NW by Crathie-Braemar in Aberdeenshire, it has an area now of 63,952 acres. Three lakes are Lochs Esk ($1\frac{1}{2} \times 1$ furl.), BRANDY ($\frac{1}{2} \times \frac{1}{2}$ mile), and Wharral ($3\frac{1}{2} \times 1\frac{1}{2}$ furl.). The South Esk, rising in the NW corner at 3150 feet above sea-level, runs $20\frac{1}{4}$ miles south-eastward and south-south-eastward through the interior, then $3\frac{3}{4}$ miles along the Tannadice border, receiving on the way White Water, flowing $6\frac{1}{4}$ miles east-south-eastward along Glen Doll; the Burn of Heughs, flowing $4\frac{1}{2}$ miles south-south-westward, and the East Burn of Moye, flowing 5 miles south-south-westward along the Tannadice border. The Calty runs 4 miles S by E along the former Upper Kirriemuir boundary to PROSEN WATER; and this in its turn winds $5\frac{3}{4}$ miles SSE and ESE to the South Esk along all the Kingoldrum and Kirriemuir border. The surface sinks in the extreme SE to less than 400 feet above sea-level, thence rising to Tulloch Hill (1230 feet), the Goal (1466), the Hill of Couthernach (1667), Finbracks (2478), Ben Tirran (2860), *Driesh (3105), *Mayar (3043), *Roustie Ley (2868), Tolmount (3143), *Broad Cairn (3268), and *Cairn Bannoch (3314), where asterisks mark those summits that culminate on the borders of the parish. The rocks include Old Red sandstone, clay and mica slate, gneiss, serpentine, trap, and granite; and the soils are as varied as the rocks, in some parts argillaceous, in others a fine gravelly loam, and elsewhere thin, hard, and sandy or stony. The arable lands of the haughs by the watersides bear but a small proportion to hill-pastures and to the deer-forests of Cortachy, Clova, and Bachnagairn; in Glen Clova, whose flora is rich in rare plants, the hill-sides are partially green up to a high elevation, whilst almost to the tops the heather is mixed with 'month' or 'moss' grasses. The property is mostly divided between the Earl of AIRLIE and Donald Ogilvy, Esq. of Balmaboth House, the former owning the southern or Cortachy, the latter the northern or Clova, division. The late Earl was a noted improver of cattle; and his polled herd, commenced about 1865, won many coveted prizes. His seat here, Cortachy Castle, finely embosomed by wooded policies on the South Esk, near the hamlet, comprises a 16th-century tower, which escaped the great fire of 14 Sept. 1883, when the large Scottish baronial addition (1872) by the late Mr David Bryce, R.S.A., was gutted; it has since been restored. It has its ghost, or ghostly music rather, which, variously described as that of a single drum or a whole brass band or (more vaguely) heavenly, presages death or gout in the family. Disjoined *quoad sacra* from Clova, Cortachy is in the presbytery of Forfar and synod of Angus and Mearns; the living is worth £219. The church, rebuilt in 1829 at a cost of more than £2000, is a pretty edifice, and contains 550 sittings. Three public schools, Cortachy, Clova, and Watersk, with respective accommodation for 149, 60, and 39 children, had (1891) an average attendance of 45, 16, and 19, and valuations of £56, 12s. 6d., £29, 13s. 6d., and £34, 2s. 6d. Valuation (1891) £10,678, 13s. Pop. of civil parish (1881) 442, (1891) 440; of g. s. parish (1881) 323, (1891) 313.—*Ord. Sur.*, ehs. 56, 65, 1870. See A. H. Millar's *Historical Castles and Mansions of Perthshire and Forfarshire* (Paisley, 1890).

Coruisk or Corriskin, a fresh-water loch on the mutual border of Strath and Bracadalo parishes, in the SE of the Isle of Skye, Inverness-shire, $\frac{1}{2}$ mile N of the head of salt-water Loch SCAVAIG, which communicates by eteam-launch with Kilbride upon Loch Slapin (14 miles), as that again by public conveyance with Broadford (6 miles). With utmost length and breadth of $1\frac{1}{2}$ and $\frac{1}{2}$ mile, it is of profound depth; contains sea-trout; sends

off a rivulet, the 'Mad Stream,' to Loch Scavaig, whilst fed itself by hundreds of silvery torrents; and on its surface bears three green islets, that offer a striking contrast to the desolation around. For Coruisk lies, still and sombre, in the cup of the mighty CUCHULLINS, which shoot up their bare jagged peaks 3000 feet and more into the sky. To quote Scott's *Lord of the Isles*—

'Rarely human eye has known
A scene so stern as that dread lake,
With its dark ledge of barren stone.
Seems that primeval earthquake's sway
Hath rent a strange and shatter'd way
Through the rude bosom of the hill,
And that each naked precipice,
Sable ravine, and dark abyss,
Tells of the outrage still.
The wildest glen, but this, can show
Some touch of Nature's genial glow:
On high Benmore green mosses grow,
And heath-bells hud in deep Glencroe,
And copse on Cruachan-Ben;
But here, above, around, below,
On mountain or in glen,
Nor tree, nor shrub, nor plant, nor flower,
Nor aught of vegetative power,
The weary eye may ken.
For all is rocks at random thrown,—
Black waves, bare crags, and banks of stone,
As if were here denied
The summer sun, the spring's sweet dew,
That clothe with many a varied hue
The blackest mountain-side.'

Whereon Turner, whose pencil delineated the scene to illustrate Sir Walter's poem, remarked, that 'no words could have given a truer picture of this, one of the wildest of Nature's landscapes.' Of many prose descriptions the finest perhaps is that from the Journal of Norman Macleod, under date 1 Sept. 1837:—'Having left our horses at Camasunary, we ascended by a rough road to a pass, from which we obtained a view of Coruisk. Wilson being a bad walker, I was up nearly half an hour before him. Besides I wished to behold Coruisk alone; and, as I ascended the last few blocks of stone which intercepted my view, I felt my heart beat and my breathing becoming thicker than when I was climbing—for I had rested before in order to enjoy the burst undisturbed—and a solemn feeling crept over me as I leapt on the crest of the hill, and there burst upon my sight—shall I attempt to describe it? How dare I? Around me were vast masses of hypersthene, and the ridge on which I stood was so broken and precipitous that I could not follow its descent to the valley. At my feet lay the lake, silent and dark, and round it a vast amphitheatre of precipices. The whole Cuchullins seemed gathered in a semicircle round the lake, and from their summits to their base not a blade of verdure,—but one bare, black precipice, cut into dark chasms by innumerable torrents, and having their base covered by *débris* and fallen rocks. Nothing could exceed the infinite variety of outline—peaks, points, teeth, pillars, rocks, ridges, edges, steps of stairs, niches—utter wildness and sterility. From this range there are gigantic projections standing out and connected with the main body. And there lay the lake, a part hidden from our view, behind a hugo rock. There it lay still and calm, its green island like a green monster floating on its surface. I sat and gazed; "my spirit drank the spectacle." I never felt the same feeling of the horribly wild—no, never; not even in the Tyrolese Alps. There was nothing here to speak of life or human existence. "I held my breath to listen for a sound, but everything was hushed; it seemed abandoned to the spirit of solitude." A few wreaths of mist began to creep along the rocks like ghosts. Laugh at superstition for coupling such scenes with witches and water-kelpies! I declare I felt superstitious in daylight there. Oh, to see it in a storm, with the clouds under the spur of a hurricane, raking the mountain summit!' (*Memoir*, 1876). From these graphic descriptions one may readily conceive that the scenery around the loch is wild, dark, and stern in the extreme. See also Alexander Smith's *Summer in Skye* (1865), and William Black's *Madcan Violet* (1876).

Corwar, an estate, with a mansion, in Colmonell parish, S Ayrshire, $3\frac{1}{2}$ miles ESE of Barrhill station. See COLMONELL.

Corymulzie. See CORRIEMULZIE.

Coryvreckan. See CORRIEVRECHAN.

Coshieville, a place, with an inn, in Strath Appin, Logierait parish, Perthshire, $5\frac{1}{2}$ miles W by N of Aberfeldy, on a road leading northward to Tummel Bridge, over a pass 1262 feet high.

Cossans. See GLAMIS.

Costa, a headland at the northern extremity of the mainland of Orkney, on the mutual border of Évie and Birsay parishes. Projecting to a point 4 miles ENE of the Brough of Birsay, it comprises a hill 478 feet high, and presents to the ocean a bold precipitous cliff. See ÉVIE.

Costerton House. See CRICHTON.

Cotburn, a hill (559 feet) on the mutual border of Turrif and Monquhitter parishes, N Aberdeenshire, $4\frac{1}{2}$ miles NE of the town of Turrif.

Cotehill, a loch, measuring $1\frac{1}{2}$ by 1 furlong, in Slains parish, E Aberdeenshire, 1 mile W by N of the church.

Cothal, a place with factories of tweed and woolen cloth in Fintray parish, Aberdeenshire, on the left bank of the Don, $7\frac{1}{2}$ miles NNW of Aberdeen, and $2\frac{3}{4}$ NNW of Dyce Junction. The factories were established in 1798, and are famous for both the quantity and the quality of the tweeds which they turn out. It has a post office under Kinallie.

Cotton, a village in Auchindoir and Kearn parish, W Aberdeenshire, 7 furlongs ESE of Rhyynie.

Coul, a mansion in Contin parish, SE Ross-shire, a little NE of the parish church. Built in 1821, it is a handsome edifice, with finely-wooded policies; its owner, Sir Arthur-Geo.-Ramsay Mackenzie, eleventh Bart. since 1673 (b. 1865; suc. 1873), holds 43,189 acres in the shire, valued at £5215 per annum.

Coul, a mansion in the parish and 1 mile ENE of the station of Auchterarder, SE Perthshire.

Coulatt, a loch on the mutual border of Knockando and Dallas parishes, Elginshire, 4 miles W by N of Knockando church. Lying 1100 feet above sea-level, it measures $1\frac{1}{2}$ by 1 furlong, and sends off the Burn of Coulatt, flowing $6\frac{1}{2}$ miles E and SSE to the Spey, 7 furlongs SSE of the said church.—*Ord. Sur.*, sh. 85, 1876.

Coull, a collier hamlet in Markinch parish, Fife, $1\frac{3}{4}$ mile NW of Markinch town.

Coull, a parish of S Aberdeenshire, whose church stands $3\frac{1}{2}$ miles NNW of Aboyne station, this being $32\frac{1}{2}$ miles W by S of Aberdeen. It is bounded N by Leochel-Cushnie, E by Lumphanan, S by Aboyne, W by Logie-Coldstone and Tarland-Migvie. Irregular in outline, it has an utmost length from NNE to SSW of $5\frac{3}{4}$ miles, a varying breadth of $5\frac{1}{2}$ furlongs and $4\frac{1}{2}$ miles, and an area of 9044 acres. The drainage is carried mainly to the Dee, but partly also to the Don—by the Burn of Tarland to the former, and to the latter by the Burn of Corse. In the extreme SE the surface sinks to 410 feet above sea-level, thence rising westward to Scar Hill of Tillyduke (984 feet), and northward to *Mortlich (1248), Leadhlich (1278), *Crag (1563), and Loanhead (994), where asterisks mark those summits that culminate on the confines of the parish. The rocks are all of primary formation, the eastern hills consisting chiefly of reddish, the western of greyish, granite; and the soils vary from gravel-mixed clay to loam and moorish uplands. A 'Druidical' circle on Tomnaverie, a number of small cairns upon Corse Hill, and traces of the Terry Chapel on Newton of Corse make up the antiquities, with the ruined castles of Corse and Coull. The latter at the opening of the 13th century was the seat of the great Durward family, of whom it was said that, a Durward dying, the church bell of Coull tolled of its own accord. A stately pile, it measured some 50 yards square, and had five turrets and four hexagonal towers. Corse Castle bears date 1581, and, though long roofless, is comparatively entire. The lands of Corse, forming part of the barony of Coull and O'Neil, were in 1476 bestowed on

Patrick Forbes, armour-bearer to James III., and youngest son of the second Lord Forbes. Among his descendants were Patrick Forbes (1564-1635), bishop of Aberdeen from 1618; and his son, John Forbes (1593-1648), the scholar and Episcopalian confessor, whose estate was repeatedly ravaged by the famous freebooter Gilderoy. The bishop's male line failing with his grandchildren, Corse passed to the Forbeses of CRAIGIEVAR, and now is held by the trustees of the late Sir John Forbes' second son, James Ochoncar Forbes, Esq., who own 1946 acres in the shire, valued at £1679 per annum. The modern mansion, near the old castle, is $3\frac{1}{2}$ miles NW of Lumphanan station, and $4\frac{3}{4}$ NE of Coull church. Two proprietors hold each an annual vale of £500 and upwards, 2 others holding between £100 and £500, and 1 between £50 and £100. In the presbytery of Kincardine O'Neil and synod of Aberdeen, Coull has since 1621 given off the Corse division *quoad sacra* to Leochel-Cushnie; the living is worth £158. The church (1792; restored 1876; 220 sittings) has a fine-toned bell that was cast in Holland in 1644. A public school, with accommodation for 101 children, had (1891) an average attendance of 45, and a grant of £47, 14s. 6d. Valuation £4006, 15s. 7d. Pop. (1801) 679, (1831) 767, (1851) 734, (1871) 824, (1881) 733, (1891) 746; of *q. s.* parish 444.—*Ord. Sur.*, sh. 76, 1874.

Coull, Braes of. See LINTRATHEN.

Coullins. See CUCHULLINS.

Coulmony House. See ARDLACH.

Coulport, a village on the W side of Roseneath parish, Dumbartonshire, Loch Long, 4 miles N by W of Cove. It maintains a ferry across Loch Long to Ardentynny, and has a pier, erected in 1880, when also several acres were laid out for feuing purposes. The Kibble Crystal Palace, in the Glasgow Botanic Gardens, was removed from Coulport in 1872.

Coulter, a loch in the S of St Ninians parish, Stirlingshire, near the foot of the Lennox Hills, $6\frac{1}{2}$ miles SSW of Stirling. With an utmost length and width of 5 and 3 furlongs, it is shallow towards the W, but very deep to the NE; contains perch and pike; and sends off its superfluous by Auchenhowie Burn to the Carron. During the great earthquake of Lisbon (1735) it was violently agitated, and sank about 10 or 12 feet.—*Ord. Sur.*, sh. 31, 1867.

Coulter, Lanarkshire. See CULTER.

Coultra. See BALMERINO.

Countesswells, an estate, with an old mansion, in Peterculter parish, Aberdeenshire, $4\frac{3}{4}$ miles WSW of Aberdeen. Its owner, the Rev. J. S. Gammell, of Drumtochty Castle, holds 5208 acres in the shire, valued at £5470 per annum. There are a post office of Countesswells under Aberdeen and a public school.

Coupar-Angus, a town and a parish formerly partly in Forfar and Perth shires, but in 1891 the Boundary Commissioners placed them both wholly in the county of Perth. The town stands in the centre of Strathmore, near the left bank of the Isla, on a small tributary of that river, $4\frac{1}{2}$ miles SE of Blairgowrie; whilst its station, the junction for Blairgowrie, on the Scottish Midland section of the Caledonian, is $15\frac{3}{4}$ miles from Perth. The part of it on the left bank of the rivulet having been in Angus or Forfarshire, and also being the older portion, occasioned the whole to be called Coupar-Angus. Dating from a remote antiquity, the town was long a time-worn, decayed, and stagnant place, but within recent years has undergone great revival and improvement, and become a centre of much traffic and a seat of considerable trade. It is governed by nine police commissioners, under selected sections of the General Police and Improvement Act of Scotland, adopted in July 1871; and has a post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland, the Union Bank, and the National Bank, a local savings bank, a Jubilee townhall (1887), several hotels, a gas company, the venerable tolbooth steeple, with town clock, masonic lodge, a young men's Christian association, bowling and curling clubs, etc. In 1874 a much-needed water supply was introduced, at a cost of

nearly £4000, from springs on the Pitcur estate. In 1887 a drainage scheme was completed, which cost £4500. There are extensive linen and jute works, a tannery, a farina work, and an agricultural engineering work. A grain market is held on Thursday, and cattle markets fall on the third Monday of January, February, April, May, November, and December, and on the third Thursday of March and July. The Queen has driven thrice through Coupar-Angus, on 11 Sept. and 1 Oct. 1844, and 31 Aug. 1850. Henry Guthrie (1600-76), bishop of Dunkeld, was a native. A Roman camp here, immediately E of the churchyard, is supposed to have been formed either by Agricola or Lollius Urbicus, and seems to have been a square of 1200 feet, with two strong ramparts and wide ditches; but now is represented only by remains of the eastern part of the ramparts. In 1164 King Malcolm founded the Cistercian abbey of St Mary's within the area of this Roman camp. A large and stately structure, richly endowed by several of the Scottish kings and by the Hays of Errol, it passed at the dissolution to the Balmerino family. An ivy-clad fragment, in the SW corner of the churchyard, is all that is left of it, a beautiful arch having been demolished in 1780 to furnish material for the parish church. This, dating originally from 1681, was in great measure reconstructed in 1780, and thoroughly rebuilt in 1859. Other churches are the Free, U.P. (1790), Evangelical Union (1789), Original Secession (1826), and Episcopal (1847). A new one-story public school, erected (1876-77) at a cost of £2700, with accommodation for 502 children, had in 1895 an average attendance of 394, and a grant of £380, 9s. 11d. Pop. (1841) 1868, (1861) 1943, (1871) 2149, (1881) 2154, (1891) 2106.

The parish, containing also the villages of Arthurstone, Balbrogie, and Washington, is bounded N by Alyth, NE by Meikle, SE by Meikle and Kettins, S by Cargill, and NW by Caputh, Blairgowrie, and Bendochoy. Its greatest length, from NE to SW, is 6 miles; its breadth varies between 5 furlongs and 2½ miles; and its area is 4769½ acres, of which 184 were in Forfarshire, and 70½ are water. The ISLA, which is 10½ miles, 'in many a loop and link,' roughly traces all the northern and north-western border; along it lies a considerable extent of haugh-land, protected by embankments, 7 feet high, from inundations by the river. The rest of the area mainly consists of the level grounds of Strathmore, but is bisected from NE to SW by a ridge, along which runs the great highway from Perth to Aberdeen, and which commands a splendid view of the Sidlaw Hills along the one side of the strath, and of the Grampian Mountains on the other. In the extreme SW the surface sinks to 100 feet above sea-level, thence rising to 224 near Keithick, 172 at Kemphill, 210 at Easter Denhead, and 208 near Arthurbank. The formation is Old Red Sandstone; and the soil is mainly a good sandy loam. Mansions are Balgersho House, Keithick House, Isla Park, Balbrogie, Arthurstone, Denhead, Kinloch, and Bankhead; and 6 proprietors hold each an annual value of £500 and upwards, 15 of between £100 and £500, 14 of from £50 to £100, and 45 of from £20 to £50. Giving off a portion *quoad sacra* to Meikle, Coupar-Angus is in the presbytery of Meikle and synod of Angus and Mearns; the living is worth £350. Valuation (1891) £14,187, 12s. 5d., of which £1027, 18s. was for the Forfarshire section. Pop. of civil parish (1801) 2416, (1831) 2615, (1861) 2929, (1871) 3055, (1881) 2819, (1891) 2760, of whom 276 were in Forfarshire; of *q. s.* parish (1871) 2797, (1881) 2546, (1891) 2343.—*Ord. Surv.*, shs. 48, 56, 1868. See the Rev. C. Rogers' and Major-Gen. A. S. Allan's *Rental Book and Historical Notices of the Abbey of Coupar-Angus* (2 vols., Grampian Club, 1879-80).

Cour, a mansion in Saddell parish, Kintyre, Argyllshire, on Kilbrannan Sound, 7¼ miles from Carradale.

Courance, a hamlet in Kirkmichael parish, Dumfriesshire, 9 miles NW of Lockerbie, under which it has a post office. Courance House is the seat of John Seton-Wightman, Esq. (b. 1846; suc. 1879), who owns 2750 acres in the shire, valued at £1705 per annum.

Cousland, a village in Cranston parish, Edinburghshire, 3½ miles ENE of Dalkeith, under which it has a post office. It was burned by the Protector Somerset in 1547, at the time of the battle of Pinkie. A chapelry of Cousland was annexed to Cranston parish about the era of the Reformation; its chapel stood on the SW side of the village, and has left some remains. It has a school with accommodation for 95 children.

Couston. See BATHGATE.

Couthally. See COWTHALLY.

Couttie, a hamlet in Bendochoy parish, E Perthshire, on the right bank of the Isla, 1 mile NW of Coupar-Angus.

Cove, a fishing village in Nigg parish, Kincardineshire, with a money order and savings bank post office, and a station on the Caledonian railway, 4 miles S by E of Aberdeen. At it are St Mary's Episcopal church (1868), a public and an Episcopal school, a hotel, and a harbour, which, mainly natural, or very slightly improved by art, serves often as a place of refuge to boats in high north-easterly winds. The fishermen engage in various kinds of fishery, and have considerable reputation for the drying and smoking of haddocks. A cave enters from the beach in the vicinity, and probably gave name to the village. Pop. (1861) 385, (1871) 450, (1881) 565, (1891) 482.

Cove, a charming watering-place in Roseneath parish, Dumbartonshire, to the right or E of the entrance to Loch Long. Conjoined as a police burgh with Kilmcreggan, it comprises a number of neat villas and cottages. At it are a post office, with money order, savings bank, and telegraph departments, a steamboat pier, and Craigrownie *quoad sacra* church. A public hall for the united burgh, with recreation and reading rooms, was erected in 1892. See KILCREGGAN and CRAIGROWNIE.

Cove, a fishing hamlet in COCKBURNSPATH parish, Berwickshire, 3 furlongs E of Cockburnspath station. Its harbour, 3 furlongs further to the eastward, is approached through a sloping tunnel, which, hewn out of soft rock, is 65 yards long, and just wide enough to admit a horse and cart; it has a pier for fishing-boats on a little bay, surrounded by cliffs 100 to 200 feet in height. The hamlet consists of little more than a score of one-story cottages, inhabited solely by a population engaged in fishing.

Cove, an estate, with a mansion, in Kirkpatrick-Fleming parish, Dumfriesshire, on the left bank of Kirtle Water, 1 mile W of Kirkpatrick station.

Cove. See CAOLISPORT.

Cove-a-Chiaran. See CAMPEBELTOWN.

Covesea (popularly *Causea*), a little village on the coast of Drainie parish, Elginshire, 5¾ miles NNW of Elgin, and 3¼ W of Lossiemouth. The shore here is rocky, precipitous, and strikingly picturesque. In one place a gently sloping road leads through a natural arch, with stately pillars, to a stretch of fine natural meadow on the beach, shut in to the landward by smooth and mural Old Red Sandstone cliffs, 60 to 100 feet high; elsewhere are caves, fissures, arches, stacks, and fantastic forms of rock, various and romantic as the ruins of a vast city, and far too numerous to be appreciably damaged for ages to come by either the elements or the hand of man. Two peculiarly interesting objects are an isolated rock, which, looking like an inverted pyramid, is 60 feet high, 30 across the top, by only 8 across the base; and the Laird's Stable, a cavern, which, once the abode of a hermit, was used as a stable by Sir Robert Gordon of Gordonstown during the '45. In another cave, near Hopeman, have been found a flint arrow-head, bones of the beaver and the crane, and other traces of prehistoric occupancy; and the side walls are sculptured with figures of the half-moon, sceptre, fish, and such like symbols of ancient Celtic art. A reef or chain of skerries, extending parallel to the coast, about ¼ mile from the shore, was the scene of many shipwrecks; but since 1846 it has been crowned with a lighthouse, built at a cost of £11,514, and showing a revolving light, visible at the distance of 13½ nautical miles. The light appears in its brightest state once every minute, and from W by

N $\frac{1}{2}$ N to SE by E $\frac{1}{2}$ E, it is of the natural appearance; but from SE by E $\frac{1}{2}$ E to SE $\frac{1}{2}$ S it has a red colour. See pp. 323-337 of Jas. Brown's *Round Table Club* (Elgin, 1873).

Covington, a hamlet and a parish in the Upper Ward of Lanarkshire. The hamlet stands between the Clyde and the Caledonian railway, $1\frac{1}{2}$ mile N by E of its station Thankerton, which has a post office, with money order and savings bank departments, and is $33\frac{1}{2}$ miles SW of Edinburgh and $36\frac{1}{2}$ SE of Glasgow; at it is the parish church (230 sittings), an old building enlarged in the early part of last century. A neighbouring tower, built in 1442 by Lindsay of Covington barony, is now a fine ruin; and Covington Mill was the place where that famous martyr of the Covenant, Donald Cargill, was seized by Irving of Bonshaw in May, 1681.

The parish, containing also the villages of Thankerton, Newtown of Covington (7 furlongs NNE of Thankerton), and Hillhead ($\frac{3}{4}$ mile NNE of the church), comprises the ancient parishes of Covington and Thankerton, united some time between 1702 and 1720. Bounded NW by Pettinain, E by Libberton, SE by Symington, and W by Carmichael, it has an utmost length of 5 miles from NNE to SSW, viz., from the Clyde below Brown Ford to the top of Tinto; its greatest breadth, from E to W, is $2\frac{5}{8}$ miles; and its area is $5167\frac{1}{2}$ acres, of which 53 are water. The CLYDE, here winding $3\frac{3}{4}$ miles west-north-westward and northward, roughly traces all the boundary with Libberton; and three or four burns run to it through the interior or on the borders of the parish. In the extreme NE the surface sinks to 630 feet above sea-level, thence rising to 829 at Hillhead, 1049 near Wellbrae, 1013 at Chester, 661 at Thankerton bridge, and 2335 at TINTO; it is divided among meadows or low well-cultivated fields along the Clyde, pastoral slopes, and heathy uplands. Nearly two-fifths of the entire area are under the plough, and about 80 acres are in wood. Other antiquities than Covington Tower are a cairn, three camps, and a 'Druidical temple.' Here, in 1823, his father being parish minister, was born ex-Lord Advocate William Watson, who in 1880 was raised to the peerage as Baron Watson of Thankerton. St John's Kirk is the only mansion; and 2 proprietors hold each an annual value of more, 2 of less, than £500. Covington is in the presbytery of Biggar and synod of Lothian and Tweeddale; the living is worth £227. A public school at Newtown of Covington, with accommodation for 65 children, had (1891) an average attendance of 54, and a grant of £67, 6s. Pop. (1801) 456, (1831) 521, (1861) 532, (1871) 454, (1881) 444, (1891) 396.—*Ord. Sur.*, sh. 23, 1865.

Cowal, the mid eastern district of Argyllshire. Its north-western extremity is an isthmus between the head of Loch Fyne and the boundary with Perthshire; whilst its north-eastern is a range of mountains along the boundary with Perth and Dumbarton shires, to the head of Loch Long; and all the rest is a peninsula bounded E by Loch Long and the Firth of Clyde, S by the Kyles of Bute, and W by Loch Fyne. Its length, from the head of Glen Fyne on the NNE to Lamont Point on the SSW, is 37 miles; and its greatest breadth is $16\frac{1}{2}$ miles. It comprehends the parishes of Lochgoilhead, Dunoon and Kilmun, Strachur and Stralachlan, Inverchaolain, Kilmodan, and Kilfinnan, and the *quoad sacra* parishes of Ardentinn, Innellan, Kirn, Sandbank, Strone, and Tighnabraich, with the chapelries of Kilbride, Kilmorich, and Toward. See ARGYLLSHIRE.

Cowcaddens. See GLASGOW.

Cowdailly. See COWTHALLY.

Cowdenbeath, a town in the S of Beath parish, Fife, 2 miles WSW of Lochgelly, and 3 furlongs N by W of Cowdenbeath station on the Edinburgh, Perth, and Dundee section of the North British, this being $5\frac{1}{2}$ miles ENE of Dunfermline. It adopted the General Police Act in 1890, and has a post office, with money order, savings bank, and telegraph departments, a branch of the National Bank, Free, U.P., and Baptist churches, a public hall, a public school, and a Thursday newspaper.

In the neighbourhood are the extensive collieries of the Cowdenbeath Coal Co. Pop. (1891) 4249.

Cowden Castle, a mansion in Muckart parish, Perthshire, $2\frac{1}{2}$ miles ENE of Dollar. Occupying the site of an ancient fortalice, which belonged to the see of St Andrews, it is the seat of John Christie, Esq. (b. 1824; suc. 1859), who owns 1672 acres in the shire.

Cowdenhill, a hamlet near Borrowstouness, NW Linlithgowshire.

Cowdenknowes, an estate, with a mansion, part ancient and part modern, in Earlstoun parish, Berwickshire, on the left bank of Leader Water, 1 mile S of Earlstoun village. Its strong old tower, with deep pit beneath and 'hanging tree' outside (the latter cut down barely 60 years since), was the seat of those ancestors of the Earls of Home whose feudal cruelties called forth the malediction—

'Vengeance! vengeance! when and where?

Upon the house of Cowdenknowes, now and ever mair.'

Their estate has long been alienated, and now is held by Colonel Charles Hope, who owns 2331 acres in Berwick and Roxburgh shires, valued at £2702 per annum. Behind the house rises Earlstoun Black Hill (1031 feet), a picturesque conical eminence, crowned with remains of a Roman camp. All know the plaintive air and one at least of the three versions of the ballad—

"O the hroom, and the honny, honny hroom,
And the hroom of the Cowdenknowes,"
And aye sae sweet as the lassie sang
I' the hught, milking the ewes.'

But the broom-sprinkled braes and haughs of Cowdenknowes—'one of the most classical and far-famed spots in Scotland'—had been sadly stripped of their golden adornments by the so-called march of agricultural improvement, when, in the winter of 1861-62, the hand of Nature nipped what man had spared.—See pp. 133-137 of Lauder's *Scottish Rivers* (ed. 1874).

Cowey's Linn, a waterfall of 35 feet in leap in Eddlestone parish, Peeblesshire, on a head-stream of Eddlestone Water, 3 miles N by W of Eddlestone village.

Cowgate. See DUNDEE, EDINBURGH, and MAUCHLINE.

Cowglen, a hamlet and a mansion in Eastwood parish, Renfrewshire, 2 miles W by S of Pollokshaws. Coal and limestone are worked in the vicinity.

Cowhill Tower, a mansion in Holywood parish, Dumfriesshire, on the right bank of the Nith, $4\frac{1}{2}$ miles NNW of Dumfries.

Cowie, a fishing village and a stream of Kincardineshire. The village, in Fetteresso parish, stands on the N side of Stonehaven Bay, and $\frac{3}{4}$ mile N by E of Stonehaven town. Anciently it was a free burgh, under charter of Malcolm Canmor, who, on a rock overlooking the sea, is said to have built a small fortalice—the Castle of Cowie. Of this some vestiges remain, while its First Pointed chapel, which afterwards belonged to Marischal College, Aberdeen, is a picturesque ruin, with a burying-ground still in use. Cowie House, in the immediate vicinity, is a seat of Major William Disney Innes, who owns 4750 acres in the shire, valued at £2847 per annum. Cowie Water, rising on the western border of Glenberrie parish at 1000 feet above sea-level, winds 13 miles eastward through the rocky and wooded scenery of Glenberrie and Fetteresso parishes, and at Stonehaven falls into Stonehaven Bay. It is fairly stocked with small trout; is subject to high freshets, which often do considerable damage; and is crossed, $\frac{3}{4}$ mile NNW of Stonehaven, by the grand fourteen-arched Glenury Viaduct of the Aberdeen railway, which, in one part 190 feet high, commands a fine view of the river's ravine, the vale and town of Stonehaven, Dunnottar Castle, and other features of the surrounding landscape.—*Ord. Sur.*, shs. 66, 67, 1871.

Cowiefauld, a hamlet in Strathmiglo parish, Fife, 2 miles WSW of Strathmiglo village.

Cowie's Linn. See COWEY'S LINN.

Cowlairs. See GLASGOW.

Cowlatt, Loch. See COULATT.

Cowpits, a village in Inveresk parish, Edinburghshire,

on the right bank of the Esk, $1\frac{1}{2}$ mile S of Musselburgh.

Cowshaven. See **ABERDOUR.**

Cowthally, a ruined castle in Carnwath parish, Lanarkshire, on the edge of a moss $1\frac{1}{2}$ mile NW of Carnwath village. From the reign of David I. (1124-53) to 1603 it was the seat of the powerful family of Somerville, which, ennobled in 1430 under the title of Baron Somerville, became extinct in 1870 on the death of the nineteenth Lord. Burned by the English in 1320, but afterwards rebuilt, it was surrounded by moat and rampart, and accessible only by a drawbridge. James V. and VI. were both entertained here with great magnificence, the latter punningly remarking that the castle rather should be called *Cow-daily*, because a cow and ten sheep were killed there every day. See **DRUM** and the eleventh Lord Somerville's curious *Memorie of the Somervilles* (2 vols., 1815).

Coxton, an old castellated mansion in St Andrews-Lhanbride parish, Elginshire, 2 miles ESE of Elgin. A tall square structure, with turrets at the angles, it bears date 1644, but is fully a century older; and it was the residence of the Inneses of Invermarkie, but belongs now to the Duke of Fife. See vol. i. of Billings' *Baronial Antiquities* (1845).

Coyle or **Coila** (popularly *Kill*), a stream of Kyle district, Ayrshire. It rises in the S of Ochiltree parish close to the boundary with Coylton, and winds $14\frac{1}{2}$ miles north-westward to the river Ayr, at a point $3\frac{1}{2}$ miles E of the town of Ayr. It makes a cascade, 25 feet wide and 15 feet in fall, under the ridge on which stands Sundrum House; its yellow trout are good, but not over plentiful; and at Millmunnock, on its bank, Burns makes the 'Poor and Houest Sodger' return to his ain dear maid.

Coylton, a village and a parish in Kyle district, Ayrshire. The village stands 2 miles W by N of Dronagan station and 6 ESE of Ayr, under which it has a post office, and consists of two parts, Coylton proper and New Coylton. It is traditionally said to have got its name from the 'Auld King Coil' of COLSFIELD, but figures in old records as Quiltoun and Cuiltoun.

The parish, containing also the villages of Craighall, Woodside, Rankinston, and Joppa, is bounded N by Tarbolton, E by Stair and Ochiltree, S by Dalmellington, SW by Dalrymple, W by Ayr, and NW by St Quivox. Its greatest length, from NNW to SSE, is $8\frac{1}{2}$ miles; its breadth varies between 7 furlongs and $3\frac{1}{2}$ miles; and its area is 11,745 acres, of which 160 are water. From a little below Stair church to just above Mainholm, the river Ayr winds $7\frac{1}{2}$ miles west-south-westward along all the northern and north-western border; to it flows the Water of COYLE, latterly through the NE interior, but chiefly along the boundary with Ochiltree and Stair. Lochs MARTNAHAM ($1\frac{1}{2} \times \frac{1}{2}$ mile) and Snipe ($1\frac{1}{2} \times \frac{1}{2}$ furl.) lie on the Dalrymple border; and on the Ayr border is Loch Fergie (3×1 furl.). Where the Ayr quite the surface sinks to less than 50 feet above sea-level, thence rising to 139 feet near Craighall, 856 at Raithlence, 253 near Joppa, 799 at Craigs of Coyle, 1241 at Ewe Hill, 1122 at Brown Rig, and 1426 at BENWHAT, which last, however, culminates just beyond the southern border. Coal, ironstone, trap rock, sandstone, limestone, and potter's clay are worked, the recent great increase in the population being due to mining development; plumbago was mined, from 1808 till 1815, on the farm of Laigh Dalmorc; fire-clay abounds in the neighbourhood of a limestone quarry; and Water-of-Ayr stone, used for hones, was raised for some years on Knockshoggle farm. The soil of the holme or flat grounds along the streams is light and loamy, on a sandy or gravelly bottom; elsewhere it is mostly a poor cohesive clay on a stiff, cold, tilly subsoil, with patches of moss or peat. About 70 per cent. of the entire land area is in tillage, 23 in pasture, and 7 under wood. Antiquities are a large etone, by tradition associated with the name of 'Auld King Coil'; the castellated portion of Sundrum House; fragments of the old parish church; and the sites of two pre-Reformation chapels.

A field on Bargleuch has yielded four stone coffins; and silver coins of Elizabeth, James VI., and Charles I. have been dug up on Bargunnoch farm. Mansions are Sundrum, Gadgirth, Rankinston, Martuaham Muir, and Oakbank; and the property is divided among 14 landowners, 6 holding each an annual value of £500 and upwards, 3 of between £100 and £500, 1 of from £50 to £100, and 4 of from £20 to £50. Coylton is in the presbytery of Ayr and synod of Glasgow and Ayr; the living is worth £263. The church, built in 1836, is a good Gothic edifice, with a tower upwards of 60 feet high, and contains 744 sittings. Two public schools, Coylton and Littlemill, with respective accommodation for 292 and 214 children, had (1891) an average attendance of 289 and 130, and grants of £252, 17s. 6d. and £113, 15s. Valuation, £20,454, 8s. 9d., including £911 for railway. Pop. (1801) 848, (1831) 1380, (1861) 1604, (1871) 1440, (1881) 3100, (1891) 2667.—*Ord. Sur.*, sh. 14, 1863.

Crag or **Craiglich**, an eminence (1563 feet) on the mutual border of Coull and Lumphanan parishes, Aberdeenshire, $7\frac{1}{2}$ miles SSW of Alford.

Craggie or **Creagach**, a loch on the mutual border of Lairg and Rogart parishes, SE Sutherland, $3\frac{1}{2}$ miles ENE of Lairg village. Lying 525 feet above sea-level, it measures 1 mile by $2\frac{1}{2}$ furlongs, and, with a stiffish breeze, affords as good trouting as any in Sutherland.—*Ord. Sur.*, sh. 102, 1881.

Craggie or **Creagach**, a loch in Tongue parish, Sutherland, receiving the superfluence of Loch Loyal, and sending off its own to Loch Slaim, through two short reaches of the river BORGIE, each 1 furlong long. Lying 369 feet above sea-level, it is $1\frac{1}{2}$ mile long from S to NNE; varies in breadth between $1\frac{1}{2}$ and $3\frac{1}{2}$ furlongs; and contains magnificent trout and salmo-ferox, with occasional salmon and grilse.—*Ord. Sur.*, sh. 114, 1880.

Craibstone. See **ABERDEEN.**

Craichie. See **DUNNICHEN.**

Craick, a hill in Robertson parish, Roxburghshire, 1482 feet high.

Craig, an estate, with a mansion, in Colmonell parish, S Ayrshire, on the Stinchar, 2 miles ENE of Colmouell village.

Craig, an estate, with a mansion, in Kilmaurs parish, Ayrshire, between Carmel Water and the river Irvine, 4 miles W by S of Kilmarnock. Its owner, Allan Pollok-Morris, Esq. (b. 1836; suc. 1862), holds 165 acres in the shire, valued at £846 per annum.

Craig, a hamlet and a coast parish of Forfarshire. The hamlet, Kirkton of Craig, stands on the brow of a gentle acclivity, $1\frac{1}{2}$ mile SSW of Montrose, and commands a splendid view over Moutrose Basin and town away to the Grampians.

The parish, containing also the fishing villages of Ferryden and Usan or Ulysses' Haven, comprises the ancient parishes of Inchbrayock or Craig and St Skeoch or Dunnald, united in 1618. It is bounded N by Montrose Basin and the mouth of the South Esk, SE by the German Ocean, S by the Dysart section of Maryton and by Lunan, SW by Kinnell, W by Farnell, and NW by Maryton proper. Its utmost length is $5\frac{1}{2}$ miles from ENE to WSW, viz., from the Ness to tiny Nicholls Loch upon Ross Muir; its width varies between $1\frac{1}{2}$ and $2\frac{1}{2}$ miles; and its area is $4865\frac{1}{2}$ acres, of which $345\frac{1}{2}$ are foreshore, and $137\frac{1}{2}$ water. The northern border slopes gently down to Montrose Baiein; and Rossie island there, lying at the head of the South Esk's effluence to the sea, and separated from the mainland only by a narrow channel, belongs to Craig, but will be separately noticed. The E coast is rocky, and toward the S precipitous, at Roddin Point rising rapidly to 200 feet above sea-level. On the Ness, or most easterly point of the coast, where the South Esk falls into the sea, is a lighthouse, whose light, fixed white till 1881, is now double intermittent or occulting, visible at a distance of 17 nautical miles. The interior, with gradual southward and eouth-westward ascent, forms, for the most part, an undulating tableland; and, attaining 234 feet near Balkeillie, 426 near

Balstout, and 503 near the Reformatory, commands from many points extensive views. The rocks are chiefly eruptive and Devonian, and include greenstone, amygdaloid, sandstone, and limestone. A coarse sandstone is worked in several quarries for building; limestone was long extensively worked; and many varieties of beautiful pebbles are found in the amygdaloid. The soil in the E is sandy, westward inclines to moorish, and in the central and much the largest section is a strong rich loam. Fully five-sevenths of the entire area are in cultivation, a little less than a fourth being either in pasture or commonage, whilst some 300 acres are under wood. An old castle stood on the coast, in the immediate vicinity of Boddin, and has left slight vestiges called Black Jack; and a square earthen battery, traditionally said to have been thrown up by Oliver Cromwell, stood on a small headland at the mouth of the South Esk. The most interesting antiquity, however, is the strong castle of the barony of Craig,—a barony nearly identical with the present estate of Rossie. Frequently mentioned by Scottish chroniclers, it stood on the N side of the parish, and is now represented by a tower and gateway, and by part of a dwelling-house added in 1639. Mansions are Rossie Castle, Dunnald House, and Usan House; and the property is divided among 4 landowners, 1 holding an annual value of over £5000, 2 of over £2000, and 1 of over £400. Craig is in the presbytery of Brechin and synod of Angus and Mearns; the living is worth £346. The parish church, erected in 1799, is a good building with a square tower 80 feet high, and figures finely in the landscape; a Free church is at Ferryden. Four public schools—Craig, Ferryden Senior, Ferryden Infant, and Westerton—with respective accommodation for 166, 162, 165, and 42 children, had (1891) an average attendance of 114, 144, 163, and 38, and grants of £100, 16s., £110, 12s. 6d., £138, 9s. 6d., and £41, 1s. 6d. Rossie Reformatory for boys towards the south-western corner of the parish, 5½ miles SW of Montrose, was established in 1857, and had 57 inmates in 1891. Valuation (1892) £11,723, 12s., including £1244 for railway. Pop. (1801) 1328, (1831) 1552, (1861) 2177, (1871) 2402, (1881) 2589, (1891) 2472.—*Ord. Surv.*, sh. 57, 1863.

Craig or Craig-of-Madderty. See ST DAVID'S.

Craigallian, a loch in Strathblane parish, SW Stirlingshire, 2 miles WSW of Strathblane station. Lying 380 feet above sea-level, it measures 3¾ furlongs by 1½, and has finely wooded shores.

Craigandaroch. See BALLATER.

Craiganeoin, a deep natural amphitheatre in Moy and Dalaraessie parish, Inverness-shire, 1 mile SE of Moy church. Surrounded by high rocks, and accessible only through one narrow passage, it was used in old times by the Highland caterans for concealing their wives and children during their raids into the low country; and was the scene of a skirmish in the '45, known as the Rout of Moy.

Craigafhiahch or Raven's Rock, a precipitous crag in the W of Fodderty parish, Ross-shire. It gives off a very distinct echo, and is near a strong chalybeate spring, the Saints' Well.

Craiganoin. See CRAIGANEOIN.

Craiganooy, a commodious and safe harbour in Glen-shiel parish, Ross-shire, at the S corner of Loch Duich.

Craigarestie, a chief summit of the Kilpatrick Hills, in Old Kilpatrick parish, Dumbartonshire. It culminates 1½ mile NNE of Bowling, on the SW side of Loch Humphrey, at 1166 feet above sea-level.

Craigbank, a village in New Cumnock parish, Ayrshire, with a population in 1891 of 345.

Craigbarnet, an estate, with a mansion, in the W of Campsie parish, S Stirlingshire, 1¾ mile W by N of Campsie Glen station. Its owner, Major Chs. Graham-Stirling (b. 1827; suc. 1852), holds 3343 acres in the shire, valued at £1716 per annum.

Craigbeg, a hill, 1054 feet high, in Durris parish, Kincardineshire, 5¾ miles ESE of Banchory.

Craigbhockie and Craigboddich, two lofty cliffs in

Loth parish, Sutherland, confronting each other on opposite sides of a small burn running to Loch Glen.

Craigcaffie Castle, the old square tower of the Neilsons in Inch parish, Wigtonshire, 3¼ miles NE of Stranraer. It was surrounded by a fosse, but never could have been a place of much strength; now it is occupied by farm labourers.

Craig Castle. See AUCHINDOIR AND KEARN, and CASTLE CRAIG.

Craigchaillich, a summit (2990 feet) in the NE of Killin parish, Perthshire, 3¼ miles N by W of Killin.

Craig Cluny, a precipitous granite height in Crathie parish, Aberdeenshire, 1½ mile E of Castleton of Braemar. It overhangs the public road, and is clothed far up with rowan, weeping birch, and lofty pines. See CHARTERS CHEST.

Craigcrook Castle, a picturesque old mansion in Cramond parish, Edinburghshire, nestling at the foot of the north-eastern slope of CORSTORPINE Hill, 1 mile W of Craigeith station, and ¾ miles W of Edinburgh. Built probably in the 16th century by one of the Adamsons, it was sold in 1659 to John Mein, in 1670 to John Hall, in 1682 to Walter Pringle, and in 1698 to John Strachan, who, dying about 1719, bequeathed for charitable uses all his property—334 acres, valued now at £1259 per annum. From early in this century till 1814 it was the residence of the publisher, Archibald Constable (1775-1827), whose son and biographer, Thomas (1812-81), was born here, and who in 1815 was succeeded by the celebrated critic and lawyer, Francis Jeffrey (1773-1850). The latter describes it as 'an old narrow high house, 18 feet wide and 50 long, with irregular projections of all sorts, three little staircases, turrets, a large round tower at one end, and an old garden (or rather two, one within the other), stuck close on one side of the house, and surrounded with massive and aged walls, 15 feet high.' He straightway set about the task of reformation; and during the thirty-five summers that he passed at Craigcrook, by extending and remodelling the gardens (a prototype of those of 'Tully-veolan' in Scott's *Waverley*), and by additions to the house in 1835 and earlier, he made it at last a lovely and most delightful spot. See Cockburn's *Life of Lord Jeffrey* (2 vols., Edinb. 1852).

Craigdaimve, a sea inlet on the W side of North Knapdale parish, Argyllshire, branching from the Sound of Jura near Keils Point.

Craigdam, a hamlet in Tarves parish, Aberdeenshire, 1½ mile SW of Tarves village. At it are a U.P. church (1806; 600 sittings) and a girls' public school.

Craigdarroch, an estate, with a mansion, in Glencain parish, Dumfriesshire, 2¼ miles W of Moniaive. Its owner, Robert Cutlar Fergusson, Esq. (b. 1855; suc. 1859), holds 2264 acres in the shire, valued at £1755 per annum. Craigdarroch Burn, rising upon the eastern slope of Cornharrow Hill at 1500 feet above sea-level, close to the boundary with Kirkcudbrightshire, runs 6 miles east-by-southward to the vicinity of Moniaive, where it unites with Dalwhat and Castlefern burns to form the river CAIRN.—*Ord. Surv.*, sh. 9, 1863.

Craigdarroch, an estate, with a modern mansion, in Contin parish, SE Ross-shire, 4 miles WSW of Strathpeffer. The mansion stands amid romantic scenery, near the north-eastern shore of Loch Achilty.

Craig-David. See BERVIE BROW.

Craigderg, a ridge of granitic rocks in Inverness parish, Inverness-shire, adjacent to the side of Loch Dochfour. An ancient watchtower stood upon it, and is supposed to have been an outpost of Castle-Spiritual.

Craigdhuloch, a stupendous cliff in the SW corner of Glenmuick parish, Aberdeenshire, adjacent to the boundary with Forfarshire. It overhangs the S side of the small, dark, sequestered Loch Dhuloch; soars to the height of more than 1000 feet; and is thought by some observers to be grander than the famous rocks of Lochnagar.

Craigdow, a loch (1¼ × 1½ furl.) on the mutual border of Kirkoswald and Maybole parishes, W Ayrshire, ¾ miles SW of Maybole town.

Craigellachie (Gael. *creag-eagalach*, 'rock of alarm'), a bold and wooded height (1500 feet) on the mutual border of Duthil and Alvie parishes, E Inverness-shire, near the left bank of the Spey, above Aviemore station. It gave the clan Grant their slogan or war-cry, 'Stand fast, Craigellachie.'

Craigellachie, a village in the N of Aberlour parish, W Banffshire, finely seated, 300 feet above sea-level, on the left bank of the Spey, which here receives the Fiddich, and here is crossed by a handsome iron bridge, with round embattled towers at the angles and a single arch of 150 feet span, erected in 1815 at a cost of £8000, as also by the viaduct (1857) of the Great North of Scotland railway. The junction of the Morayshire, Keith, and Strathspey sections of that system, it is 12½ miles SSE of Elgin, 14½ WSW of Keith, 68 NW by W of Aberdeen, 33½ NE of Boat of Garten, and 121½ N by E of Perth; and has a post office, with money order, savings' bank, and telegraph departments, two saw mills, a hotel, an Established church, with 116 sittings, and a girls' school, with accommodation for 77 children. Water has been introduced, and building actively carried on since the summer of 1880, when a new street was sanctioned round the top of the lofty quartz crag above the station, on feus given off by the Duke of Fife at £8 per acre.—*Ord. Surv.*, sh. 85, 1876.

Craigarden, a place on the western shore of Loch Lomond, about 4 miles below Ardlui, on the West Highland Railway, with a whinstone viaduct of 8 spans, each averaging 36 feet. Within 300 yards of the viaduct there is the only tunnel on this railway—150 feet long, cut through solid whin.

Craigencat, a hill on the N border of Dunfermline parish, Fife, ¾ mile E by S of Loch Glow, and 1½ SSE of Cleish village. Rising to an altitude of 921 feet above sea-level, it mainly consists of basaltic rock, which is quarried for dykes and road-metal, and it exhibits very regular basaltic columns with many horizontal divisions.

Craigend, a farm on the N border of Newabbey parish, Kirkcudbrightshire, 3½ miles NW of Newabbey village. A rocking-stone on it, 15 tons in weight, may be put in motion by a child.

Craigend, an estate, with a mansion, in Strathblane parish, Stirlingshire, 3½ miles N by W of Milngavie. The mansion, Craigend Castle, was built in 1812, and is a splendid edifice, standing amid fine grounds. Its owner, Sir James Buchanan, second Bart. since 1878 (b. 1840), succeeded his father, the diplomatist, the Right Hon. Sir Andrew Buchanan, G.C.B. (1807-82).

Craigend, a hamlet and a moor in Campsie parish, Stirlingshire. The hamlet lies on Powburn, adjacent to the Blane Valley railway, 2 miles E by S of Strathblane station. The moor extends from the southern vicinity of the hamlet to the boundary with Baldernock, and attains an altitude of 634 feet above sea-level.

Craigend, a village in Perth East Church parish, Perthshire, 2 miles S of Perth. At it are a public school and a U.P. church (1780; 413 sittings).

Craigend, a mansion in Liberton parish, Edinburghshire, near Craignillar Castle, 2½ miles SSE of Edinburgh. Built in 1869, it is a large edifice in the Gothic style, and has a circular tower 60 feet high.

Craigendarroch. See BALLATER.

Craigendoran, the terminus, so far as coast traffic is concerned, of the Helensburgh section of the North British Railway, and about a mile E of that town. Erected in 1880-82, the station and piers cost £50,000.

Craigends, an estate, with an old mansion, in Kilbarchan parish, Renfrewshire, on the right bank of the Gryfe, 3 miles NNW of Johnstone.

Craigengelt, an estate in the SW of St Ninians parish, Stirlingshire, W of Loch Coulter, and 5½ miles WNW of Denny. It includes a considerable mass of the Lennox Hills, and contains a circular cairn or mound called the Ghost's Knowe, which, 300 feet in circumference, is engirt by twelve very large stones. This is one only out of several artificial mounds, clothed with fine grass, and called the Sunny Hills; and Craigengelt

is believed to have been, in olden times, the scene of many tragical events.

Craigengower, a hill in Straiton parish, Ayrshire, 9 furlongs SE of Straiton village. Rising to a height of 1160 feet above sea-level, it is crowned with a handsome monument to Colonel Blair, who fell in the Crimea; and it commands an extensive view.

Craigemputtoch, a lonely farm at the head of Dunscore parish, in Nithsdale, Dumfriesshire, lying, 700 feet above sea-level, at the SW base of Craigenputtoch Moor (1038 feet), 10 miles WSW of Auldirth station, and 15 WNW of Dumfries. From May 1828 to May 1834 it was the home of Thomas Carlyle (1795-1881) and his wife, Jane Welsh (1801-66), she having inherited it from her father, whose ancestors owned it for many long generations, going back, it may be, to great John Welsh of Ayr (1570-1623). Here he wrote *Sartor Resartus*, here received two visits from Lord Jeffrey, and hence sent Goethe a description of his residence as 'not in Dumfries itself, but 15 miles to the NW, among the granite hills and the black morasses which stretch westward through Galloway, almost to the Irish Sea. In this wilderness of heath and rock our estate stands forth a green oasis, a tract of ploughed, partly enclosed, and planted ground, where corn ripens and trees afford a shade, although surrounded by sea-mews and rough-woolled sheep. Here, with no small effort, have we built and furnished a neat substantial dwelling; here, in the absence of professional or other office, we live to cultivate literature according to our strength, and in our own peculiar way.' In 1867, the year succeeding the death of Mrs Carlyle, he bequeathed the estate—773 acres, valued at £250 per annum—to Edinburgh University, to found ten equal competitive 'John Welsh bursaries,' five of them classical, five mathematical.—*Ord. Surv.*, sh. 9, 1863. See Carlyle's *Reminiscences* (1881), and his *Life* by J. A. Froude (1882).

Craigenscore, a mountain in the N of Glenbucket parish, W Aberdeenshire, 2½ miles N of the church. It has an altitude of 2000 feet above sea-level.

Craigentinny (Gael. *creag-an-tèine*, 'rock of fire'), an estate, with a mansion, in South Leith parish, Midlothian, lying between Edinburgh and the Firth of Forth, 2½ miles ENE of the city. The property extends over only 652 acres, yet is valued at £5739 per annum. This high rental is due to the fact that here are the most extensive meadows in Scotland, all of which have been under regular sewage irrigation for upwards of 45 years. The produce is annually sold to cow-keepers at £16 to £28 (in one year £44) an acre, and the grass per acre is estimated at from 50 to 70 tons. It is cut five times a year; and two men suffice to keep the ditches in order.

Craigenvoach, a mansion in Old Luce parish, Wigtownshire, on the N side of Whitefield Loch, 3½ miles ESE of Glenuce. Built in 1876, it has a splendid Scottish baronial pile, the seat of Admiral Right Hon. Sir John Chs. Dalrymple Hay, third Bart. since 1793 (b. 1821; suc. 1861), who, having previously represented Wakefield and Stamford, was for some years member for the Wigtown burghs.

Craigflower, an estate, with a mansion, in Torryburn parish, SW Fife, 3½ miles E of Culross. It was the property of the Right Hon. Sir Jas. Wm. Colville of Ochiltree (1810-80), Indian jurist and privy councillor, and is at present owned by Eden Colville, Esq.

Craigfoodie, a hill and a mansion in the N of Dairsie parish, Fife. The hill, culminating 3½ miles NE of Cupar, at 554 feet above sea-level, presents to the SW a mural front, partly consisting of columnar basalt. The mansion stands on the SE slope of the hill, 1½ mile NW of Dairsie station.

Craigford, a village in St Ninians parish, Stirlingshire, distant 1 mile from Bannockburn.

Craigforth, an estate, with a mansion, in Stirling parish, Stirlingshire. The mansion stands on the right bank of the river Forth, 2 miles WNW of the town; and, together with the estate, takes name from a bold and wooded crag. It is a seat of George Fred. Wil Callander, Esq. of ARDKINGLASS (b. 1848; suc. 1851),

Here lived and died the antiquary, John Callander (1710-89).

Craig-Gibbon, a summit in Auchtergaven parish, Perthshire, $3\frac{1}{2}$ miles SSW of Dunkeld. One of the Lower Grampians, it rises to a height of 1263 feet above sea-level, and is surmounted by an obelisk.

Craig-Gowan, a wooded height (1437 feet) in Crathie and Braemar parish, SW Aberdeenshire, 9 furlongs S by E of Balmoral. On it are Prince Albert's Cairn (1863), and others, the first of which was reared on 11 Oct. 1852, by the Queen, the Prince Consort, and all the royal children, according to age. See BALMORAL and p. 101 of the Queen's *Journal* (ed. 1877).

Craighall, a village in the NW of Coylton parish, Ayrshire, on the left bank of the river Ayr, and 4 miles E by N of Ayr town.

Craighall, an estate, with a ruined, castellated mansion, in Ceres parish, Fife. The ruined mansion stands on the N side of a deep wooded den, traversed by a burn, $3\frac{1}{2}$ miles SE of Cupar; and, built by Sir Thomas Hope, King's Advocate to Charles I., still presents a grand appearance. See PINKIE.

Craighall, an estate, with a mansion, in Rattray parish, Perthshire, 3 miles N of Blairgowrie. 'A modernised ancient edifice, on a peninsulated rock, rising 214 feet sheer from the Erich, and formerly defended on the land side by a fosse and two towers,' the mansion was visited by Scott in the summer of 1793, and was one of the prototypes of 'Tully-Veolan' in *Waverley*. The Rattrays of Craighall-Rattray are said to date back to the reign of Malcolm Ceanmor (1057-93); and the present proprietor, Lieut.-Gen. Clerk Rattray, C.B. (b. 1832; suc. 1851), holds 3256 acres in the shire, valued at £2928 per annum.

Craighall, New, a collier village on the mutual border of Liberton and Inveresk parishes, Edinburghshire, near New Hailes station on the North British, and 2 miles WSW of Musselburgh. At it are a *quoad sacra* parish church (1878), built, like the houses, of brick, and the Benhar Coal Co.'s school, which, with accommodation for 448 children, had (1891) an average attendance of 263, and a grant of £256, 6s. Pop. (1861) 336, (1881) 1482, (1891) 1550.

Craighall, Old, a collier village, with a school, in Inveresk parish, Edinburghshire, $1\frac{1}{2}$ mile SSW of Musselburgh.

Craighhead. See CAMPSIE.

Craighead, a village in Redgorton parish, Perthshire, on the left bank of the Almond, 1 mile N by W of Almondbank station.

Craighead, an estate, with a mansion, in Blantyre parish, Lanarkshire, on the left bank of the Clyde, 1 mile S of Bothwell village.

Craighead, a place where Caaf Water forms a fine cascade in a narrow wooded dell, on the mutual boundary of Dalry and Kilwinning parishes, Ayrshire.

Craigheads, a village connected with Barrhead town, in Renfrewshire.

Craighurst, one of the Kilpatrick Hills in Old Kilpatrick parish, Dumbartonshire, $2\frac{1}{2}$ miles N of Duntocher. It has an altitude of 1074 feet above sea-level.

Craigholm, a residence in the vicinity of Burntisland, Fife. It was occupied for several summers by the Rev. Dr. Chalmers.

Craighorn. See ALVA, Stirlingshire.

Craighouse, a place on Jura Island, Argyllshire. It has a post office, with money order and savings bank departments.

Craighouse, a fine old, many-gabled Scottish mansion (1565), on the north-eastern slope of wooded Craighlockhart Hill, $2\frac{1}{2}$ miles SW of Edinburgh. It belonged to Sir William Dick, Knight, of Braid, who, from being Lord Provost of Edinburgh, and possessor of £226,000, equal to £2,000,000 of our present money, died in the King's Bench a pauper in 1655. Long after, it was the residence of the historian, John Hill Burton (1809-51), and now forms an adjunct of the great outlying addition for better-class patients to Morningside Lunatic Asylum.

Craigie, a village and a parish in Kyle district, Ayrshire. The village stands 4 miles S of Kilmarnock, under which it has a post office.

The parish, including part of the ancient parish of Barnweill, was itself united to Riccarton till 1647. It is bounded N by Riccarton, NE by Galston, E by Mauchline, SE by Tarbolton, SW by Monkton, and NW by Symington. Rudely resembling a triangle, with south-westward apex, it has an utmost length from NE to SW of $5\frac{1}{2}$ miles, an utmost breadth of $4\frac{1}{2}$ miles, and an area of $6579\frac{1}{2}$ acres, of which 3 are water. CESSNOCK Water winds 1 mile along the Galston border; but the drainage is mostly carried southward or south-westward by the Water of FAIL and the Pow Burn. The surface is undulating, attaining 507 feet above sea-level near Harelaw in the NW, and 458 near Piggah in the S, heights that command a brilliant panoramic view, away to Ben Lomond, Jura, and the Irish coast. Coal, both bituminous and anthracitic, has here been mined in several places and at different times, though never with much success; whilst the working of limestone of the finest quality has lately been abandoned, chiefly on account of the distance from railway. Great attention is paid to dairy-farming, more than half of the entire area being in pasture, whilst about 170 acres are under wood. William Roxburgh (1759-1815), physician and botanist, was born at Underwood in this parish. Its chief antiquities are artificial mounds, which either were seats of justice or military encampments, and the ruins of Craigie Castle, $1\frac{1}{2}$ mile WSW of the church. A very ancient structure, this was the seat, first of the Lindsays, and then of the Wallaces of Craigie. (See LOCHRAN HOUSE, Wigtownshire.) Mansions are Cairnhill, Barnweill, and Underwood. Craigie is in the presbytery of Ayr and synod of Glasgow and Ayr; the living is worth £300. The church, erected in 1776, stands at the village, as also does a public school, which, with accommodation for 146 children, had (1891) an average attendance of 37, and a grant of £42, 19s. 6d. Valuation £10,724, 5s. 2d. Pop. (1801) 786, (1831) 824, (1861) 730, (1871) 618, (1881) 590, (1891) 552.—*Ord. Sur.*, sh. 22, 1865.

Craigie, an estate, with a mansion, in St Quivox parish, Ayrshire, on the right bank of the river Ayr, and $1\frac{1}{2}$ mile E by S of Ayr town. Wallacetown lies on the estate, whose owner, J. A. Campbell, Esq., holds 2099 acres in the shire, valued at £3770 per annum.

Craigie, an estate, with a mansion, in Dundee parish, Forfarshire, near the Firth of Tay, 2 miles E by N of Dundee town.

Craigie, a hamlet in Belhelvie parish, Aberdeenshire. It has a public school, with accommodation for 80 children.

Craigie, a village in Clunie parish, Perthshire, transferred by the Boundary Commissioners in 1891 from the parish of Caputh. It is $4\frac{1}{2}$ miles WSW of Blairgowrie, under which it has a post office.

Craigie, a village and the site of an old castle in East Church parish, Perth.

Craigie or Creagach, Loch. See BORGIE.

Craigiebarns. See DUNKELD.

Craigiebuckler. See BANCHORY-DEVENICK.

Craigieburn, an estate, with a mansion, in Moffat parish, Dumfriesshire, on the right bank of Moffat Water, $2\frac{3}{4}$ miles E of Moffat town. Craigieburn Wood was a favourite haunt of the poet Burns about 1789, the birthplace of Jean Lorimer, his 'Chloris.'

Craigiehall, an estate, with a mansion, in the SE of Dalmeny parish, Linlithgowshire, on the left bank of the Almond, 7 furlongs W of Cramond Bridge, and $3\frac{1}{2}$ miles W by S of Davidson's Mains. Its owner, James Charles Hope Vere (b. 1858; suc. 1872), holds 2217 acres in Mid and West Lothian, valued at £5433 per annum. (See also BLACKWOOD, Lanarkshire.) The park around the mansion is finely wooded; and the Almond, where skirting it, forms a picturesque cascade beneath a rustic bridge. See DALMENY.

Craigielands, a neat modern village in Kilpatrick-Jnxta parish, Dumfriesshire, near Beattock station, on

the Caledonian Railway, and 2½ miles SSW of Moffat. Craigielands House, a modern mansion, is in its southern vicinity.

Craigievar (Gael. *creagach-bharr*, 'the rocky point'), a hamlet and an estate, with a mansion, in Lumphanan and Leochel-Cushnie parishes, central Aberdeenshire, 3½ and 4½ miles NNW of Lumphanan station, this being 27 miles W by S of Aberdeen, under which there is a post office of Craigievar. The hamlet has a public school; and fairs for cattle, sheep, and horses are held at it on the Friday before the third Wednesday of April, the Friday before 26 May (or 26th, if Friday), the Thursday after the last Tuesday of June *o.s.*, the day of July after St Sairs, the Thursday after the second Tuesday of August *o.s.*, and the Friday after the first Tuesday of September *o.s.* The estate belonged to the Mortimers from 1457 and earlier down to 1610, when it was purchased by William Forbes of Menie (1566-1627), a cadet of the Forbeses of Corse, who, 'by his diligent merchandising in Denmark and other parts, had become extraordinary rich.' His son and namesake (1593-1648), a zealous Covenanter, and the breaker up of the freebooter Gilderoy's band, was created a baronet in 1630; his sixth descendant, the present and eighth baronet, Sir William Forbes (b. 1836, suc. 1846), holds 9347 acres in the shire, valued at £8539 per annum. In 1884 he succeeded his cousin, Baroness Sempill, as fifteenth Baron Sempill in the peerage of Scotland (cre. 1489). The castle, begun by the Mortimers, and finished by William Forbes in 1626, is a narrow clustered tower of granite, seven stories high. One of the most perfect specimens extant of Flemish castellated architecture, it is figured in five of Billings' plates.—*Ord. Sur.*, sh. 76, 1874. See vol. i. of Billings' *Baronial Antiquities* (1845).

Craiglaw, an estate, with a handsome modern mansion, engirt by well-wooded policies, in Kirkcowan parish, Wigtownshire, 1½ mile W by N of Kirkcowan village.

Craiglea, a hill (1737 feet), with a slate quarry, in the parish of Monzie, Perthshire, on the Logiealmond estate, 6½ miles NW of Methven Junction. The slate vein is of excellent quality; yields two kinds of slates, the one dark blue, the other of a sea-green hue; and has long been extensively worked.

Craigleith, an islet of North Berwick parish, Haddingtonshire, 1 mile N of North Berwick town. Measuring 1½ by 1 furlong, it rises to a height of 80 feet; consists of greenstone, bare and barren; and is inhabited only by rabbits, jackdaws, and sea-fowl. In 1814 Sir Hew Dalrymple bought it from the Town Council for £400.

Craigleith, an extensive sandstone quarry near the W border of St Cuthberts parish, Edinburghshire, ¼ mile E of Blackhall village, and 2 miles W by N of Edinburgh; close to it is Craigleith station on the Leith branch of the Caledonian. Belonging to the upper group of the Calciferous Sandstone series, it presents a deep excavation 12 acres in area, and long supplied most of the stone with which the New Town of Edinburgh was built, its original rental of only £50 rising to £5500 during the great building period in Edinburgh, from 1820 till 1826. The Craigleith stone is of two kinds—the one of a fine cream colour, called liver rock; the other of a greyish white, called feak rock. Three trunks of great fossil coniferous trees have been here discovered.

Craigleoch, a cliff on the western verge of Rattray parish, Perthshire, at a very romantic gorge in the channel of the river Erich, a little above CRAIGHALL.

Craiglockhart, an ancient baronial fortalice in Lanark parish, Lanarkshire, on the right bank of Mouse Water, opposite Jarviswood. It probably was erected by some remote ancestor of the Lockharts of Lee; but it figures very slightly in either records or tradition; and it now is a ruined, lofty, picturesque tower.

Craiglockhart, a wooded basaltic hill in Colinton parish, Midlothian, ½ mile ESE of Slateford, and 2½ miles SW by W of Edinburgh. Attaining a height of 550 feet above sea-level, it commands a wide westward view, away to the frontier Grampians; at its base is a

skating-pond, formed in 1873 by Mr Cox of the Edinburgh Gymnasium. It got its name from the neighbouring square tower or keep, built by an ancestor of the Lockharts of Lee about the middle of the 13th century, and now represented by only the basement arched story; and in turn it has given name to a mansion, a poorhouse, an Established mission church, and a hydropathic establishment, in its vicinity. The mansion, built about 1823, stands between the hill and Slateford, on the verge of a wooded bank, sloping down to the Water of Leith. The Edinburgh Poorhouse, at the back or SE of the hill, was built in 1869, and, as enlarged in 1878, has accommodation for 811 inmates. The church, an iron one, opened in 1880, is near the old tower, as this again is near the hydropathic establishment, which occupies a commanding site to the SW of the hill, and which, designed by Messrs Peddie & Kinnear, was erected during 1878-80.

Craigluscar, a hill (744 feet) in Dunfermline parish, Fife, 3 miles NW of Dunfermline town. A limestone quarry near its summit exhibits a bed of trap interposed between two of limestone.

Craiglush, a loch (½ × ¼ mile) in Caputh parish, E Perthshire, traversed by Lunan Burn, which runs from it 1 furlong SSE to the beautiful Loch of Lows.

Craigmaddie, an estate in Baldernock and Strathblau parishes, Stirlingshire, 2 miles NE of Milngavie. It contains a stately modern mansion; a fragmentary ruin of the moated tower of the Galbraiths, dating from 1238 or earlier; a group of cairns, alleged to mark the scene of a battle between the Danes and the Picts; that singular cromlech known as the AULD WIVES' LIFT; a fine expanse of park and wood; and an extensive moor, rising to an altitude of 633 feet, and going into junction with Craigmend Moor. At Craigmaddie an immense reservoir is being prepared in connection with the Loch Katrine water supply for Glasgow, to be fed by a new aqueduct from the loch. It is to have a water surface of over 86 acres, and a maximum depth of 90 feet, and will contain 700,000,000 gallons, equal to a fifteen days' supply, the other reservoir at Mugdock containing only a ten days' supply.

Craigmark, a mining village in Dalmellington parish, Ayrshire, 1½ mile NNW of Dalmellington town. Pop. (1861) 543, (1871) 616, (1881) 383, (1891) 371.

Craigmarloch, a small village on the mutual border of Kilsyth parish, Stirlingshire, and Cubbernauld parish, Dumbartonshire.

Craigmile, an estate, with a mansion, in Kincardine O'Neil parish, S Aberdeenshire, 1½ mile E of Torphins station.

Craigmill, a small village in Logie parish, Stirlingshire, at the southern base of Abbey Craig. It formerly was notorious for the smuggling of whisky.

Craigmill. See RATTRAY.

Craigmillar Castle, a grand old ruin in Liberton parish, Midlothian, 3 miles SE of Edinburgh. Crowning the brow of a gentle eminence, it commands from its topmost roof a magnificent view of Arthur's Seat, the S side of the city, the firth and the shores of Fife, Aberlady Bay, and the Pentlands; and itself consists of a lofty square keep or tower, an inner ivy-clad court, and a quadrangular embattled wall, 30 feet high, with circular corner towers—the whole engirt by an outer rampart or else, in places, by a moat. The 'new part,' to the W, was added so late as 1661; the keep must be older than 1427 (the earliest date preserved); but much of the building, as it stands to-day, was reared most likely after its burning by Hertford in 1544. 'On the boundary wall,' says Sir Walter Scott, 'may be seen the arms of Cockburn of Ormiston, Congalton of Congalton, Moubray of Barnbogle, and Otterburn of Redford, allies of the Prestons of Craigmillar; whilst in one corner of the outer court, over a portal arch, are the arms of the family, three unicorns' heads couped, with a cheese-press and barrel or tun, a wretched rebus to express their name'—this sculptured fragment bearing date 1510. Within are the noisome dungeons, in whose partition wall a skeleton was found bricked up (1813);

the kitchen, with mighty oven; Queen Mary's bower, with two or three dubious relics; her bedchamber, measuring but 7 by 5 feet, yet having two windows and a fireplace; and the great banqueting hall, 36 feet long, and 22 feet broad, with walls 10 feet in thickness, chimney 11 feet wide, a barrel-vaulted roof, and deep embrasured windows, on the stone seat of one of which may be faintly traced a diagram of the old game of the 'Walls of Troy.' The name of this place occurs pretty early in the national records, in a charter of mortification granted in 1212 by William, son of Henry de Craigmillar, whereby he gives, 'in pure and perpetual alms,' to the church and monastery of Dunfermline, a certain toft of land in Craigmillar, in the southern part leading from the town of Nidreif to the church of Liberton, which Henry de Edmonton holds of him. Later, Craigmillar belonged to one John de Capella, and from him it was purchased in 1374 by Sir Simon Preston, whose descendants retained it for nearly three centuries, and, during that period held the highest offices in the magistracy of Edinburgh. In 1478 John, Earl of Mar, 'ane fair and lustie man,' was here imprisoned by James III., his brother, and only removed to meet his doom by treacherous lance in the Canon-gate; and James V., with Gawin Douglas, his tutor, was sent here during his minority, when the pest was raging in Edinburgh. Queen Mary, after her return in 1561, made Craigmillar so frequent a residence, that a neighbouring hamlet, where her French retinue lodged, retains to this day the name of Little France; in December 1566 we read of her lying here sick, and ever repeating these words, 'I could wish to be dead.' Here, too, in the same month, her divorce from Darnley was mooted by Bothwell, Murray, Lethington, Argyll, and Huntly, in the so-called 'Conference of Craigmillar,' and propounded to Mary herself; and to Craigmillar it was at first proposed to have Darnley conveyed, instead of to Kirk of Field. Mary's son, James VI., is said to have planned at Craigmillar his matrimonial excursion to Denmark; and Mary's descendant, Queen Victoria, in 1842 drove by its ruins, which have been sketched and written of by 'fat, fodge' Grose, Sir Walter Scott, Thomson of Duddingston, Sir Thomas Dick Lauder, Hill Burton, and many others.—*Ord. Sur.*, sh. 32, 1857. See vol. I. of Billings' *Baronial Antiquities* (1845), and Tom Speedy's *Craigmillar and its Environs* (1892).

Craigmore, a precipitous hill, 1271 feet high, in Aberfoyle parish, Perthshire, flanking the Laggan's northern bank, and culminating 1 mile NW of Aberfoyle hamlet.

Craigmore. See BEN-AN-ARMUINN and ROTHESAY.

Craig-na-Ban, a rounded, granitic, fir-clad hill (1736 feet), in Crathie and Braemar parish, SW Aberdeenshire, 1½ mile SE of Aberfeldie. On it, to save his own life, a wizard is said to have hunted down a witch and handed her over to justice; and on it Prince Frederick William of Prussia (afterwards Emperor of Germany) gave the piece of white heather (emblem of good luck) to the Princess Royal on the day of their betrothal, 29 Sept. 1855.

Craig-na-Facillinn, a stupendous crag, 934 feet high, in Durness parish, Sutherland, overhanging the public road at the head of Loch Eriboll, near the mouth of Strath Beg.

Craignafeile, a stack or rocky tower-like islet off the NE coast of the Isle of Skye, Inverness-shire, near a cascade falling to the sea, in the vicinity of Loch Staffin. It presents some resemblance to a statue in Highland costume; hence the name *creag-na-fheildh*, 'the rock of the kilt.'

Craignaiolar or **Creag na h-Iolaire** (Gael. 'eagle's crag'), a rocky hill (1750 feet) projecting from a mountain range, in Duthill parish, Elginshire, 3¼ miles NNW of the parish church. It has several fissures, one of which, near the western extremity, cuts it sharply from top to bottom. See also BEN-AN-ARMUINN.

Craignair. See BUTTLE.

Craigneil, an ancient fortalice in Colmonell parish, SW Ayrshire, near the left bank of the Stinchar, 7 furlongs S of Colmonell village. Built in the 13th century,

it was a hiding-place of Robert Bruce; and afterwards a feudal prison and place of execution; and is now a picturesque ruin, crowning a rocky mount, and commanding a view of the Stiuchar's valley from Penmore to Knockdolian.

Craignethan, a ruined castle or, rather, fortified manor-house, in Lesmahagow parish, Lanarkshire, ½ mile ENE of Tillietudlem station on the Lesmahagow branch of the Caledonian, and 5½ miles WNW of Lanark. It stands on the left bank of the river Nethan, 1¼ mile above its influx near Crossford village to the Clyde; and is said to have been rebuilt by the celebrated architect, Sir James Hamilton of Fynnart, commonly known as the Bastard of Arran. He was beheaded in 1540, but three years later the family estates were restored to his son, Sir James Hamilton of Evandale. Popularly identified with the 'Tillietudlem' of *Old Mortality*, Craignethan, to quote James Hunnewell's *Lands of Scott* (1871), 'is a mere shell and wreck of its former self; yet, like most ruined castles, it is not wanting in picturesqueness and romance. It is approached by a road like that described in the novel—steep, winding, and stony, and leading through a ford of the Nethan. This is a shallow stream, flowing over a rocky bed, and bending around a point that rises, with grey crags and steep, grass or tree clad banks, to a commanding elevation, on which is the castle, built of sandstone, now faded and weather-worn. The extent of Craignethan once was great; even now there is a large garden within its walls. The keep, at the outer or river side, is very ruinous; and indeed the whole structure is much dilapidated, large quantities of materials having been taken from it for the construction of ignoble buildings. But there can still be found in it many picturesque combinations of wall and tower, of stone-arched ceiling, or of broken vaulting, streaming with graceful ivy-sprays, or of shattered battlements, garlanded with shrubbery. A story told of many old residences is told of this: Queen Mary is said to have occupied, during several days before the battle of Langside, a large hall, yet partly existing, and called the Queen's Room. Craignethan has been an important fortress, held by Hamiltons, by Hays, and by Douglasses. The scenery around it has some degree of grandeur as well as beauty; and Sir Walter, on his visit in 1799, was so much pleased with the place, that the proprietor offered him use for life of a small house within the walls. I was told that the novel is commemorated here by quite a large periodical festivity, held by the families of farmers and others, and called the Tillietudlem Ball.'—*Ord. Sur.*, sh. 23, 1865. See also J. B. Greenfield's *Annals of the Parish of Lesmahagow* (Edinb. 1864).

Craigneuk, a mining village in Dalziel parish, Lanarkshire, 1½ mile WNW of Wishaw, and 1¾ ESE of Motherwell. Forming since 1874 part of Wishaw police burgh, it has an Established church (1893), a Free church, a Roman Catholic school, and a public school. Pop. (1861) 716, (1871) 1377, (1881) 2330, (1891) 2735.

Craignish, a South Argyll parish on the W coast of Argyllshire, adjoining the steamboat route from Glasgow, via the Crinan Canal, to Oban, and containing the hamlet of Ardfern, which has a post office with telegraph department. It anciently was called indiscriminately Kilmorie and Craignish, and it retains a burial-ground and a ruined chapel, still bearing the name of Kilmhori. The south-south-western half of the parish is peninsular, and its entire outline approaches in form that of a scalene triangle, with south-south-westward vertex. The detached Lagaloan part of the parish (529 acres) was transferred by the Boundary Commissioners in 1891 to the united parishes of Kilinver and Kilmelfort. Its greatest length, from NNE to SSW, is 11 miles, and its average breadth is about 2 miles. The extent of coast is fully 16 miles. Loch Craignish, opening from the lower part of the NE side of Loch Crinan, penetrates 6 miles to the NNE, and diminishes in width from 3 miles at the mouth to 7 furlongs near the head, where it forms a commodious harbour, with good anchorage. Craignish Point flanks the W side of the loch's month,

and terminates the parish's peninsula; and both that point and the small neighbouring island of Garbhreisa are faced with cliffs. A strait, called Dorasmore or the Great Door, between Craignish Point and Garbhreisa, is swept by a rapid tidal current, but has a deep channel, and is usually traversed by the steamers from Port Crinan to Oban. Abreast of the mainland, chiefly in the S and within Loch Craignish, are upwards of twenty islands and numerous islets and rocks, serried round with romantic cliffs. The peninsula commences, in the south-south-western extremity, in a near point; extends to a length of about 6 miles; widens gradually to 2½ miles; swells, on the eastern side, into numerous green eminences of 300 feet and less in elevation; has, along Loch Craignish shore, a narrow strip of land; and is cut there into numerous little headlands and winding baylets. A flat tract, less than ¼ mile broad, and very slightly elevated above the sea, extends from the western shore across the head of the peninsula to a rivulet in the E, running along the boundary with Kilmartin. The district N of that tract is partly a section of the valley of Barbreck, extending upward from the head of Loch Craignish, and mainly a rugged, heathy, hilly region, attaining an extreme altitude of 700 feet above sea-level, and commanding, from its higher points, extensive and diversified views. There are twelve lakes, many rills, and numerous perennial springs. The prevailing rock is clay-slate. The soil of the arable grounds is principally a loamy mould, less fertile than it looks to be. Much good land, or land which might be profitably reclaimed, lies waste. Remains of a large, strong, mediæval fortalice are near the north-western boundary; and vestiges of rude forts, supposed to be Scandinavian, are in eleven places. Craignish Castle, standing on the peninsula, 2¼ miles from the point, includes a strong old fortalice, which withstood a six weeks' siege by Colkitto, but is mostly a good modern mansion, rebuilt about 1832; its owner, Fred. Chs. Trench-Gascoigne (b. 1814), holds 5591 acres in the shire, valued at £1013 per annum. Other mansions are BARBRECK and Dail; and the property is divided among 6 landowners, 3 holding each an annual value of £500 and upwards, 2 of between £100 and £500, and 1 of from £50 to £100. Craignish is in the presbytery of Inverary and synod of Argyll; the living is worth £180. The church, 8 miles NW of Kilmartin, was erected in 1826, is a neat edifice, and contains 500 sittings. There is also a Free Church preaching station. Craignish public and Barbreck girls' schools, with respective accommodation for 85 and 39 children, had (1891) an average attendance of 26 and 22, and grants of £36, 10s. 6d. and £34, 9s. 6d. Valuation £3839, 12s. 1d. Pop. (1881) 451, (1891) 394.

Craignook. See CRAIGNEUK.

Craignure, a hamlet in Torosay parish, Mull island, Argyllshire, on a small bay of its own name, at the SE end of the Sound of Mull, 2¼ miles NW of Achnacraig. It has an inn, a telegraph post office, and a steamboat pier.

Craigo, a village, with a public school, in Logiepert parish, Forfarshire, on the North Esk's right bank, with a station on the Aberdeen section of the Caledonian, 3¼ miles NNW of Dubton Junction, and 6½ NNW of Montrose. Craigo House, 1½ miles S by E of Craigo station, was the property of Thomas Macpherson-Grant, Esq., WS. (1815-81; suc. his cousin, Thomas Carnegie, Esq., 1856), and is now owned by Miss Carnegie, who holds 4713 acres in the shire, valued at £7082 per annum. The population has fallen off lately, owing to the stoppage of a flax spinning-mill and a bleachfield. See LOGIEPERT.

Craigoch, a burn in Portpatrick parish, Wigtownshire, running 4 miles west-south-westward to the North Channel at Dunskey Castle, 5 furlongs SSE of Portpatrick town. It supplies a small artificial lake, stocked with trout, in the vicinity of Dunskey House.

Craigowl. See GLAMIS.

Craigphadrick, a wooded hill in Inverness parish, Inverness-shire, between Beaully Firth and the valley of

the Ness, 1¾ mile W of Inverness town. Terminating the north-western hill-flank of the Great Glen of Scotland, it rises to an altitude of 430 feet above sea-level; and its rocky tabular summit is crowned with a double-walled, rectangular vitrified fort, 240 feet long and 90 wide, which commands an extensive view. The palace of King Brude, near the river Ness, which Columba visited in 565, was by Dr Reeves identified with Craigphadrick; but Skene observes that 'it seems unlikely that in the 6th century a royal palace should have been in a vitrified fort, on the top of a rocky hill nearly 500 feet high, and it is certainly inconsistent with Adamnan's narrative that the Saint should have had to ascend such an eminence to reach it' (*Celtic Scotland*, ii. 106, note, 1877).

Craigrie, a village in the parish and 5 furlongs WSW of the town of Clackmannan.

Craig Rossie, a green hill on the mutual border of Auchterarder and Dunning parishes, Perthshire, 2½ miles E by S of Auchterarder town. It is one of the most conspicuous of the Ochils, rising to an altitude of 1250 feet above sea-level.

Craigrostan. See CRAIGROYSTON.

Craigrothie, a village, with a public school in Ceres parish, Fife, 1½ mile WSW of Ceres town. It is a burgh of barony, governed by a bailie and councillors, and has a post office under Cupar.

Craigrownie, a *quoad sacra* parish in Roseneath parish, Dumbartonshire, comprising the police burgh of Cove and Kilcreggan. It is in the presbytery of Dumbarton and synod of Glasgow and Ayr; the stipend is £290. The church, enlarged in 1891, and a memorial window inserted, stands at the E side of the entrance to Loch Long, near Barons Point; in its vicinity is Craigrownie Castle. Pop. (1871) 1103, (1881) 1136, (1891) 1164. See COVE and KILCREGGAN.

Craigroy, an eminence in the W centre of Ross-shire, 5 miles ESE of the head of Loch Maree.

Craigroyston or Rob Roy's Cave, a cavern in Buchanan parish, Stirlingshire, at the E side of Loch Lomond, 7 furlongs N by W of Invernaid. It occurs, within a steep rugged rock, a little above the water's edge; is wild and deep; and has a narrow entrance, partly concealed by fallen blocks. Robert Bruce spent a night in it after the battle of Dalry; and Rob Roy frequented it as a place of consultation with his subalterns for planning his raids.

Craigs, a hamlet in Liberton parish, Edinburghshire, 5 furlongs NE of Liberton village.

Craigs, a mansion in the parish and 2 miles ESE of the town of Dumfries.

Craigs, Stirlingshire. See RUMFORD.

Craigskean, an old baronial fortalice, now reduced to a ruinous fragment, in Maybole parish, Ayrshire.

Craigs of Elebo. See BLEBO CRAIGS.

Craigs of Coyle. See COYLTON.

Craigs of Ness, a rocky gorge on the mutual border of Straiton and Dalmellington parishes, Ayrshire, in the course of the river Doon, immediately below its efflux from Loch Doon. Cliffs on each side, 230 feet high, are richly clothed with shrubs and trees, and form so close a gorge as to leave a width of not more than 4 or 5 yards for the fretting current of the river.

Craigsparrow, a hilly section of Newburgh parish, Fife, projecting southward from the main body of the parish, and rising to an altitude of about 600 feet above sea-level.

Craigston. See BARRA.

Craigston Castle, a mansion in King-Edward parish, NW Aberdeenshire, 4¼ miles NNE of Turriff. Founded in 1604-7 by John Urquhart, Tutor of Cromarty, it consisted originally of a central tower and two projecting wings, but was so altered by connecting archwork as to be made quadrangular, and is now an interesting edifice, with beautiful grounds and plantations; among its portraits are three by Jameson and four of the dethroned Stuarts. The present owner, Major F. Edward Romulus Pollard-Urquhart (b. 1848; suc. 1871), holds 3998 acres in the shire, valued at £2356 per annum.

Craighthornhill, an estate, with a mansion, in Glasgow parish, Lanarkshire, 5 miles S by E of Hamilton.

Craigton. See PETERCULFER.

Craigton, a village in Monikie parish, Forfarshire, 5 miles WNW of Carnoustie, under which it has a post office.

Craigton, an estate, with an old mansion and a bleachfield, in New Kilpatrick parish, Dumbartonshire. The mansion stands near the eastern base of the Kilpatrick Hills, 3½ miles NE of Duntocher; is a large edifice of 1635; and has been converted into domiciles for the operatives of the bleachfield. The bleachfield lies on Craigton Burn, a rivulet rising on the Kilpatrick Hills, and running 3½ miles south-eastward to the Allander; and contains all appliances for the best treatment of yarns. A public school adjoins it.

Craigton, a village in Airlie parish, W Forfarshire, 4 miles SW by W of Kirriemuir. See AIRLIE.

Craigton, an estate, with a mansion, in Abercorn parish, Linlithgowshire, 2 miles NW of Winchburgh station.

Craigullian, a loch in Strathblane parish, SW Stirlingshire, 1½ mile WSW of Strathblane village. With an utmost length and breadth of 3¾ and 1¾ furlongs, it lies 380 feet above sea-level, on a plateau that terminates in an imposing range of basaltic columns, popularly called the Pillar Craig.

Craig Vinean, a long, wild, wooded ridge of hill in Little Dunkeld parish, Perthshire, between the confluent Tay and Bran, culminating 1½ mile W of Inver village, at 1247 feet above sea-level. Diversified all over with rocky protuberances, sharp undulations, and deep hollows, it both contains charming close views within its own recesses, and commands wide prospects from its vantage-grounds; and it forms a romantic feature in the environs of Dunkeld.

Craigwood, a pyramidal hill (558 feet), with a terrace around it, in Dunkeld parish, Perthshire, a little to the E of Dunkeld town. It commands a very fine view of Dunkeld, and of the mountain-passes diverging thence.

Crail, a seaport town and a parish of the East Neuk of Fife. A royal and parliamentary burgh, the town is picturesquely situated in a gully, beyond which the red-roofed houses rise again. It is 2½ miles WSW of Fife Ness, 10 SE of St Andrews, 4 NE of Anstruther station, and 54 NE of Edinburgh *via* the Forth Bridge and East Fife railway (constructed in 1882), on which section of the North British system it has a station. It dates from remote times, figuring so far back as the first half of the 9th century as a seat of commerce with the Netherlands, and still retains an old-world character; still down towards the sea rise massive, antique dwelling-houses. The name is thought to be from *Caer*, a town, and *ayle*, an angle—'town at the corner.' A royal castle or palace, the occasional residence of David I. (1124-53), surmounted the low cliff a little E of the harbour, but, excepting the merest fragment of a wall, has wholly disappeared. So old, however, is the parish church, that many have fancied the 'sair Sanct' himself may have prayed within its walls—a fancy forbidden by the style (Second Pointed) of its architecture. As repaired in 1828, it contains 900 sittings, and consists of an aisled nave, 80 feet long; a chancel, reduced from 55 to 22½ feet; and a western tower, with stunted octagonal spire. The SW porch has been destroyed, but the dedication cross is yet decipherable on the walls, into which has been built a far more ancient cross, sculptured with animals and other emblems. Till 1517 this church of St Macrubha was held by Haddington Cistercian nunnery, whose prioress, with Sir William Myreton, then made it collegiate, for a provost, ten prebendaries, a sacrist, and choristers. On 9 June 1559, John Knox, attended by a 'rascal multitude,' preached from its pulpit his Perth 'idolatrous sermon,' with the usual outcome of pillage and demolition; and to it in 1648 the Earl of Crawford presented James Sharp, archbishop that was to be. The castle had a chapel dedicated to St Rufus; and the site of another, at the beach to the E of the town, is known as the Prior Walls. A

Free church and a U.P. church are in the town, which further has a neat town-hall, a post office, with money order, savings bank, and telegraph departments, a branch of the Commercial Bank, a local savings bank, insurance agencies, a public library, two hotels, two public schools, a brewery, and gas-works. A new water supply has recently been introduced. The neighbouring golf links are small and uneven, greatly inferior to those of Balcomie, 1½ mile further to the eastward. The harbour is hard to enter, and neither the oldest nor the best; for the ancient haven, Roome Bay, ½ mile eastward, is naturally larger and better sheltered, and could, at comparatively trifling cost, be converted into a deep, safe, and accessible anchorage for fully 200 vessels. But at present Crail's commerce comprises little more than import of coals, and the export of grain and potatoes, for a small surrounding district; and the harbour revenue was only £82 in 1867, £134 in 1874, £190 in 1880, and £197 in 1891. Fishing is carried on to a noticeable extent, but to an extent much less than at some other towns and villages of Fife, or indeed at Crail itself in the days when its sun-dried haddocks were widely famous as 'Crail capons.' It now

provides lobsters, crabs, and whelks for the London market, and of late has become a favourite resort of summer visitors. The burgh, first chartered by Robert the Bruce in 1310, is governed by a provost, 2 bailies, a treasurer, and 6 other councillors; with St Andrews, Cupar, Kilrenny, the two Anstruthers, and Pittenweem, it returns a member to parliament; the parliamentary constituency numbering 202 in 1891, when the corporation revenue and burgh valuation amounted to £256 and £4191. Pop. (1891) 1119.

The parish is bounded N by St Leonards and Kingsbarns, NE by the German Ocean, SE by the Firth of Forth, S by Kilrenny, SW by Carnbee, and NW by Dunino. The parish of Dunino was represented on the Ordnance Survey maps as having a detached part surrounded by the parish of Crail, while the boundary recognized in practice included not only this detached part, but a considerable portion of what was shown as belonging to Crail parish. The Boundary Commissioners in 1891 gave effect to the boundary known in practice. At the same time the Randerston portion of the detached part of Kingsbarns parish was united with the main portion by annexing to that parish the intervening portion of Crail parish, while the Grassmiston portion of the detached part and Lochton semi-detached part of Kingsbarns parish were transferred to Crail parish. The coast, 6 miles in extent, is bold and rocky, and little diversified by creek or headland. Its most marked features are FIFE NESS and the skerries of Carr and Balcomie. The land rises gently WNW to 400 feet, has little wood, and not a lake or hill or any considerable stream to relieve its monotony. The prevailing rocks are of the Carboniferous formation. Sandstone, of good quality for all ordinary purposes, occurs in almost every quarter; and limestone abounds, but lies too deep to be easily worked. Coal and ironstone have both been mined; and clays have been dug for local brickyards. The soil varies in character, from the richest black loam on the immediate seaboard, to thin wet clay in the NW; and the rent has varied accordingly, from £1, 10s. to £8 an acre. Between Balcomie and Fife Ness is an ancient stone work, supposed to date from the 9th century, and popularly known as the Danes' Dyke; other antiquities are the ruined fortalices of Barns, Balcomie, and Airdrie. These are all separately noticed, as likewise are the mansions

Seal of Crail.

of Kingsmuir, Kirkmay, and Wormistone. Eight proprietors hold each an annual value of £500 and upwards, 6 of between £100 and £500, 11 of from £50 to £100, and 14 of from £20 to £50. Crail is in the presbytery of St Andrews and synod of Fifie; the living is worth £332. The public school, with accommodation for 352 children, had (1891) an average attendance of 239, and a grant of £247, 7s. 6d. Valuation (1892) £3748, 9s. 8d. Pop. (1801) 1652, (1831) 1824, (1861) 1931, (1871) 1847, (1881) 1740, (1891) 1704; of *q. s.* parish, 1119.—*Ord. Sur.*, sh. 41, 1857. See the *Rev. C. Rogers' Register of the Collegiate Church of Crail* (Grampian Club, 1877).

Crailing, a village and a parish of Teviotdale, in Roxburghshire. The village stands on Oxnam Water, $\frac{1}{2}$ mile ESE of Nisbet station on the Jedburgh branch of the North British, $\frac{4}{5}$ miles NE of Jedburgh, and 7 SSW of Kelso. It has a post office under Jedburgh.

The parish, containing also the village and station of Nisbet, comprises the ancient parishes of Crailing, Nisbet, and Spittal. It is bounded NW and NE by Roxburgh, E by Eckford, SE by Oxnam, SW by Jedburgh, and W by Anerum. Its greatest length, from N by W to S by E, is $4\frac{1}{2}$ miles; its greatest breadth, from E to W, is 4 miles; and its area is $6043\frac{1}{2}$ acres, of which 78 are water. The **TEVIOT**, winding $4\frac{1}{2}$ miles east-north-eastward on the Jedburgh border and through the interior, here from the S receives **OXNAM** Water, whose last $2\frac{3}{4}$ miles belong to Crailing. The surface, where the Teviot quits the parish, sinks to 150 feet above sea-level, thence rising to 619 feet near Littlelonley, on the S side of the river; on the N, to 774 at Peniel Heugh and 527 near Blackrig plantation. On Peniel Heugh is the Waterloo Column, 150 feet high, whose top is gained by a spiral staircase, and which bears inscription, 'To the Duke of Wellington and the British Army, William Kerr, sixth Marquis of Lothian, and his tenantry dedicate this monument, 30 June 1815.' These heights excepted, most of the parish consists of parts of the lowest, warmest, richest, and most lovely region of the Teviot's basin. The rocks of the hills are eruptive, those of the valley Devonian; and sandstone, of fine building quality, has been quarried in two places. The soil in general is a light loam. About 300 acres are under wood, less than 1000 are in permanent pasture, and nearly all the rest is under the plough. A Roman road may still be traced in the west; and two camps, supposed to be Roman, have left some vestiges on Peniel Heugh. David Calderwood, the Church historian, here entered on the ministry about 1604; and Samuel Rutherford (1600-61), the eminent Covenanted divine, was the son of a Nisbet farmer. **MOUNTTEVIOT**, a seat of the Marquis of Lothian, is one of the three chief mansions, the others being **PALACE** and **CRAILING** House, a plain modern mansion, which crowns a gentle eminence above the wooded banks of Oxnam Water. Its owner, Colonel James Paton, holds 1493 acres in the shire, valued at £2323 per annum, and shares nearly all this parish with the Marquis, the latter owning its northern, and the former its southern division. Crailing is in the presbytery of Jedburgh and synod of Merse and Teviotdale; the living is worth £359. The church, rebuilt about the middle of last century, is a very plain structure containing 300 sittings. A Free church contains 262 sittings; and a public school, with accommodation for 125 children, had (1891) an average attendance of 97, and a grant of £93, 0s. 6d. Valuation £9374, 19s. 6d. Pop. (1801) 669, (1831) 733, (1861) 673, (1871) 657, (1881) 633, (1891) 600.—*Ord. Sur.*, shs. 17, 25, 1864-65.

Crammag or **Crummag**, a precipitous headland on the W coast of Kirkmaiden parish, Wigtownshire, 5 miles NW of the Mull of Galloway. It is cut off from the neighbouring moor by remains of a trench and a vitrified rampart.

Cramond, a village in the NW corner of Edinburghshire, and a parish until 1891 partly also in Linlithgowshire. The village is situated on the Firth of Forth, at the E side of the mouth of the river Almond, 5 miles S of Aberdour, and $1\frac{1}{4}$ mile NNE of Cramond Bridge

station, the terminus of the Barnton railway connecting with the capital, a little to the west of Craigeleith station. Its name in Celtic signifies 'the fort upon the Almond;' and it occupies the site of an important Roman station, which was connected by a fine military way with the great English Watling Street and with Antoninus' Wall, and which has yielded coins of eleven emperors, three altars, a pavement, and other Roman remains. From 1628 to 1730 it gave the title of Baron to the family of Richardson. At it are a post office under Cramond Bridge, a public school, and the parish church.

The parish, containing also the seaport of GRANTON, the villages of **DAVIDSON'S MAINS** and **CRAMOND BRIDGE**, and a small part of Leith burgh, gave up a considerable portion of its area in 1891 to the Linlithgowshire parish of Dalmeny, receiving a very small portion of the latter in return. The Boundary Commissioners in that year transferred the Linlithgowshire portion of the parish, on the left bank of the Almond, to the parish of Dalmeny, and placed the small Edinburghshire portion of Dalmeny parish, on the right bank of the river, in the parish of Cramond. The Almond is thus both county and parish boundary at this point. Cramond Island, $\frac{3}{4}$ mile NNE of the village, may be reached at low water on foot, and, measuring 3 by $1\frac{1}{2}$ furlongs, affords pasturage for a few sheep; $1\frac{1}{4}$ mile further is another still smaller basaltic islet, **Inch Mickery**. The shore line, 5 miles long, is fringed at places with low beds of mussel-mantled rocks, and backed by a terrace, marking the former lower level of the land; the walk from Granton to Cramond village is one of the pleasantest round Edinburgh. The **ALMOND** winds $3\frac{3}{4}$ miles ENE and NNE; from Craigeleith onward its banks are finely wooded. The surface, though undulating, nowhere much exceeds 200 feet above sea-level, except in the S, which includes the northern slopes, but not the tower-crowned summit (520 feet) of fir-clad **CORSTORPHINE** Hill. The whole, however, is so richly adorned with mansions and parks, woods and well-cultivated fields, as everywhere to present a charming aspect. The trees include the four splendid sycamores of Braehead, Cammo, Cramond House, and Craigeleith, which, with respective height of 101, 75, 89, and 70 feet, girth $12\frac{3}{4}$, $18\frac{1}{2}$, $18\frac{1}{2}$, and $16\frac{1}{2}$ feet at 1 foot from the ground; and Cramond House has also a beech and an oak, 85 and 60 feet high, and $26\frac{1}{2}$ and 10 feet in circumference. The rocks belong mainly to the Calciferous Limestone series, but diorite intrudes on Corstorphine Hill, and basalt at five different localities—on the coast, at the Almond's mouth, and on its banks higher up. Clay ironstone has been raised here by the Carron Company; and a mineral spring, in the grounds of Barnton, as Marchfield Spa enjoyed once some medicinal celebrity. The soil is various, but on the whole is good. Oyster and other fisheries have greatly declined in value, but employment is given by Granton's industrial establishments, by the ink and chemical works of **CAROLINE PARK**, by the British and Oriental Ship Coating Company, and by Cramond Iron Company, which dates from 1771. Families formerly connected with this parish were those of Hope of Grantoun, Ramsay of Barnton, Howison of Braehead, Adamson of Craigcrook, Inglis of Cramond, Argyll, and Balmerino: amongst its illustrious natives or residents were John Law of Lauristou (1671-1729), projector of the Mississippi scheme; Geo. Cleghorn (1716-89), professor of anatomy in Dublin University; Jas. Hamilton, M.D. (1749-1835); John Philip Wood (1760-1838), antiquary; Archibald Constable (1775-1827), the celebrated publisher; his son and biographer, Thomas Constable (1812-81); Scott's darling, Marjorie Fleming (1803-11); Francis Lord Jeffrey (1773-1850), the famous critic; and Andrew Lord Rutherford (1791-1851), an eminent judge of session. At Marchfield, too, the late William Sharpe of Hoddam bred Martha Lynn, the dam of Voltigeur, from whom all the best racing blood in England is descended. Cramond House, a little eastward from the village, is a handsome and commodious mansion, founded about 1680, and greatly enlarged in 1772; a square three-storied

tower to the NW is the only remains of a 15th century palace of the bishops of Dunkeld. Its present owners are the trustees of Lieut.-Col. John Cornelius Craige-Halkett (successor of the Inglishes), who held 637 acres in Midlothian, valued at £2520 per annum. Other mansions are BARNTON, BRAEHEAD, Broomfield, CRAIG-CROOK, Drylaw, LAURISTON, MUIRHOUSE, Cammo or NEW SAUGHTON, and Silverknowes; and 10 proprietors hold each an annual value of £500 and upwards, 7 of between £100 and £500, 7 of from £50 to £100, and 23 of from £20 to £50. Cramond is in the presbytery of Edinburgh and synod of Lothian and Tweeddale; the living is worth £356. The cruciform parish church, originally dedicated to St Columba, was rebuilt in 1656, and, as enlarged in 1701 and 1811, contains 958 sittings. Other places of worship are noticed under GRANTON and DAVIDSON'S MAINS, and four public schools—Cramond, Davidson's Mains and female, Granton mixed and infant, and Lennie—with respective accommodation for 164, 245, 300, and 53 children, had (1895) an average attendance of 58, 175, 274, and 43, and grants of £53, 12s., £180, 6s. 6d., £241, 18s. 9d., and £42, 10s. 6d. Valuation £38,606, of which £983 belonged to the Linlithgowshire section, and £3600 was for railways, waterworks, etc. Pop. (1801) 1411, (1831) 1984, (1861) 2695, (1871) 3020, (1881) 3004, (1891) 3168, of whom 91 belonged to Linlithgowshire; of *q. s.* parish 1819.—*Ord. Sur.*, sh. 32, 1857. See John P. Wood's *Ancient and Modern State of the Parish of Cramond* (Edinb. 1794).

Cramond Bridge, a hamlet in Dalmeny parish (transferred from Cramond parish in 1891 by the Boundary Commissioners), at the boundary between Edinburgh and Linlithgow shires, on the river Almond, and on the Queensferry highroad, 5 miles WNW of Edinburgh, and 1½ mile SSW of Cramond village. It has a post office, a good inn, and an eight-arched bridge, erected in 1823. It is the terminus of the Barnton railway connecting near Craigeleith station with the capital, and opened in March 1894. See BRAEHEAD.

Cramond Regis. See BARNTON.

Crane, a deep triangular lochlet ($\frac{3}{8} \times \frac{1}{2}$ furl.) in Dunsyre parish, E Lanarkshire, amid the moorish south-western Pentlands, 1100 feet above sea-level, and 3¼ miles NW of Dunsyre village. It abounds with perch and pike.

Cranloch. See ST. ANDREWS, Elginshire.

Cranshaws, a Lammermuir hamlet and parish in the N of Berwickshire. The hamlet lies, 676 feet above sea-level, on the right bank of Whitadder Water, 16 miles SE by E of Haddington, and 9 NW of Duns, under which it has a post office.

The parish formerly consisted of two sections, separated from each other by a strip ($\frac{3}{8}$ mile broad at the narrowest) of Longformacus, and the northernmost of which contained the hamlet. This, with an utmost length and breadth of 2½ and 2⅔ miles, was bounded N by the Gamelshiel section of Steuton in Haddingtonshire, E and S by Longformacus, and W by Whittinghame in Haddingtonshire. The southern and larger division measured 5½ miles from E to W; had a varying width, from N to S, of 1½ and 3¼ miles; and was bounded NW, N, and E by Longformacus, S by Greenlaw and Westruther, and SW by Lauder. The Scarlaw detached portion of the parish was, in 1891, transferred by the Boundary Commissioners to the parish of Longformacus, while the portion of Longformacus north of the river Whitadder was transferred to Cranshaws parish. The WHITADDER runs across the parish and along its SE boundary. The highest points are Cranshaws Hill (1245 feet) and Mainslaughter Law (1381). The surface of the lower division rises from less than 700 feet above sea-level to 1298 on Dunsdale Hill and 1522 on Blyth Edge. The rocks are Silurian; and much of the soil is poor, the arable land along the streams amounting to only some 900 acres. A tumulus crowns Mainslaughter Law, which is said to have got its name from the battle fought in 1402 between Hepburn of Hailes and the Earl of Dunbar. The fine old peel tower called Cranshaws Castle, standing towards the centre of the northern section, measures 40 by 24 feet, and is 65 feet high; a

former stronghold of the Douglasses, and the haunt of a drudging brownie, it now is a seat of the twenty-first Earl of Morton, Sholto-George-Watson-Douglas (b. 1844; suc. 1884), who, holding 2551 acres in the shire, valued at £1050 per annum, divides this parish with 2 other landowners. It is in the presbytery of Duns and synod of Merse and Teviotdale; the living is worth £150. The church, at the hamlet, was built in 1739, and contains 120 sittings; whilst a public school, with accommodation for 55 children, had (1891) an average attendance of 30, and a grant of £44, 7s. 6d. Valuation £2492, 16s. Pop. (1801) 166, (1831) 136, (1861) 134, (1871) 142, (1881) 106, (1891) 85.—*Ord. Sur.*, sh. 33, 1863.

Cranston, a parish on the NE border of Edinburghshire, containing the villages of COUSLAND, Edgehead, and Ford, the last being ½ mile W by N of Pathhead, and 4¼ miles ESE of Dalkeith, under which it has a post office, with money order, savings bank, and telegraph departments. Irregular in outline, Cranston is bounded NW by Inveresk; N by Tranent, and E by Ormiston and Humbie, in Haddingtonshire; SW by Crichton and Borthwick; and W by Newbattle and Dalkeith. Its greatest length, from NNW to SSE, is 4½ miles; its breadth, from E to W, varies between 3½ furlongs and 3¼ miles; and its area is now 4425 acres, of which 2¾ are water. The Cakemuir detached portion of the parish (containing 677 acres) was transferred by the Boundary Commissioners in 1891 to the parish of Crichton, on whose south-west border it was situated. TYNE Water, here a very small stream, bisects the parish north-north-eastward, running chiefly within the beautiful parks of Oxenford and Prestouhall. Where, below Whitehouse mill, it passes into Ormiston the surface sinks to 300 feet above sea-level, thence rising north-westward to 500 feet near Airfield and 637 near Mutton Hole. The formation belongs to the Carboniferous Limestone series; and sandstone, limestone, and coal are largely worked, the last in Edgehead and Prestonhall collieries. About 250 acres are under wood; and nearly all the remaining area is in a state of high cultivation. Cranston Dean Bridge, over the Tyne, on the southern border, with three semicircular arches, each 17 feet in span and 46 high, is a modern structure; as likewise is Lothian Bridge, also over the Tyne, which, 82 feet high, has five semicircular arches, each 50 feet in span, surmounted by ten segment arches of 54 feet in span and 8 feet of rise. The quaint old manse, near Prestonhall, the chief and almost sole antiquity, was demolished fifty or sixty years ago. A hospice formerly, connected with that of Soutra, it bore the monkish inscription—'Diversorium infra, Habitaculum supra.' To the Cranston family this parish gave the title of Baron in the peerage of Scotland from 1609 till the death of the last and eleventh lord in 1869. The mansions are OXENFOORD and PRESTONHALL, 4 proprietors holding each an annual value of more, and one of less, than £500. Cranston is in the presbytery of Dalkeith and synod of Lothian and Tweeddale; the living is worth £325. The parish church, near Ford, the second built within this century, is a good Gothic edifice, with a tower; and at Ford itself is a U.P. church. Two public schools, Cousland and Cranston, with respective accommodation for 95 and 116 children, had (1891) an average attendance of 83 and 107, and grants of £87, 18s. 2d. and £115, 5s. 11d. Valuation £9048, including £19 for a short reach of the Macmerry branch of the North British. Pop. (1881) 998, (1891) 862.—*Ord. Sur.*, shs. 32, 33, 1857-63.

Cranstonhill. See GLASGOW.

Craspln or Craisaphnill, a loch ($4\frac{1}{4} \times 1\frac{1}{2}$ furl.) in Durness parish, NW Sutherland, 1 furlong W of Durness manse, and ¼ mile NE of Loch BORLAY, like which it is fed by subterranean tunnels through limestone rocks, and abounds in excellent trout.

Crathes Castle, a mansion in Banchory-Ternan parish, NW Kincardineshire, ½ mile N of the left bank of the Dee, and 1¼ WNW of Crathes station, this being 14 miles WSW of Aberdeen, and 3 E by N of Banchory. A

fine old chateau-like structure, with a lofty granite tower, square and turreted, it was built partly in 1528, partly of later periods, and is the seat of the Burnetts of Leys, whose founder, Alexander de Burnard, in 1324 obtained a charter of lands in Kincardineshire. His great-grandson, Robert Burnett (fl. 1409), was the first 'Baron o' Leys, a title familiar from an ancient ballad; and Thomas Burnett, twelfth proprietor of Leys, and uncle of Bishop Gilbert Burnett, was in 1626 created a baronet of Nova Scotia. His descendant, Sir Thomas Burnett of Leys, twelfth Bart. (b. 1840; suc. 1894), owns 12,025 and 84 acres in Kincardine and Aberdeen shires, valued at £5007 and £109 per annum. See BANCHORY-TERNAN.

Crathie and Braemar, a large parish of SW Aberdeenshire, whose church stands, 920 feet above sea-level, near the left bank of the Dee, $7\frac{1}{2}$ miles W by S of Ballater, under which Crathie has a post office, with money order, savings bank, and telegraph departments.

The parish, containing also the village of CASTLETON, comprises the ancient parish of BRAEMAR, annexed at a period unknown to record. It is bounded N by Kirkmichael in Banffshire, and by Strathdon; NE by Glenmuick; SE by Glenmuick, and by Glenisla in Forfarshire; S by Kirkmichael and Blair Athole, in Perthshire; W by the Glenfeshie portion of Alvie, in Inverness-shire; and NW by Duthil-Rothiemurchus, also in Inverness-shire. Irregular in outline, it has a varying length from E to W of $8\frac{1}{2}$ and 24 miles, a varying width from N to S of $9\frac{1}{2}$ and $16\frac{1}{2}$ miles, and an area of 183,237 $\frac{1}{2}$ acres, of which 980 $\frac{3}{4}$ are water. The DEE, rising close to the Inverness-shire border, runs 11 miles south-south-eastward to the Geldie's confluence, and thence winds 25 $\frac{1}{2}$ miles east-north-eastward, mostly through the middle of the parish, but for the last 4 $\frac{1}{2}$ miles along the Glenmuick boundary. During this course it descends from 4060 feet above sea-level at its source to 1318 where it receives the Geldie, 1214 at the Linn of Dee, 1108 at Victoria Bridge near Mar Lodge, 872 opposite Crathie manse, and 720 at the Girnock's confluence in the furthest E; its principal affluents here, all of them rising in Crathie and Braemar, and mostly described in separate articles, are Geldie Burn, Lui Water, Ey Burn, Quoich Water, Clunie Water with its tributary Callader Burn, Feardar Burn, Gelder Burn, and Girnock Burn. Lakes, with their utmost length and breadth, and with their altitude above sea-level, are Loch Etchachan ($4 \times 3\frac{1}{2}$ furl.; 3200 feet), Loch BRODICHAN ($2\frac{1}{2} \times 1$ furl.; 2303 feet), Loch CALLADER ($6\frac{1}{2} \times 1\frac{1}{2}$ furl.; 1627 feet), Loch CEANNMOR ($1\frac{1}{4} \times \frac{3}{4}$ furl.; 2196 feet), and LOCHNAGAR ($2\frac{1}{2} \times 1\frac{1}{2}$ furl.; 2570 feet), besides thirteen smaller tarns. From W to E the chief elevations to the left of the Dee are *BRAERIACH (4248 feet), *BEN MACDHUI (4296), Derry Cairngorm (3788), Carn a Mhaim (3329), Carn Crom (2847), Sgor Mor (2666), Carn Mor (2057), *Beinn a' Chaoruinn (3553), Beinn Bhreac (3051), Meall na Guaille (2550), Creag a Bhuilg (2190), *BENABOURD (3924), Carn Elrig Mor (2068), Carn Eas (3556), Carn na Drochaide (2681), *BEN AVON (3843), Carn Liath (2821), Meikle Elrick (2318), *Meikle Geal Charn (2533), *Brown Cow Hill (2721), Culardoch (2933), Craig Leck (2085), Meall Alvie (1841), Leac Ghorm (1946), Tom Bhreac (2276), An Creagan (1857), and Creag Mbor (1643), where asterisks mark those summits that culminate on the borders of the parish. To the right or W and S of the Dee rise CAIRNTOUL (4241 feet), The Devil's Point (3303), *Monadh Mor (3651), Beinn Bhrotain (3795), Carn-Cloich-mhuilinn (3087), Duke's Chair (2010), Carn Geldie (2039), *Carn an Fhilleir (3276), *An Sgarsoch (3300), Napan Garbh (2206), Carn Liath (2676), *Beinn Iutharn Mhor (3424), Mor Shron (2819), Carn Aosda (3003), *The Cairnwell (3059), Sron Dubh (1909), Carn an Tuirc (3340), *Cairn na Glasha (3484), Creag Choinnich (1764), Carn nan Sgliat (2260), Creag nan Leachda (2549), Meall an t-Sluichd (2771), Creag Doineanta (1910), the Princess Royal's Cairn (1479), Ripe Hill (1678), Carn Fiaclan (2703), *LOCHNAGAR (3786), Princess Alice's Cairn (1278), Prince Albert's Cairn (1437), Creag a Ghail (1971), *Conach-

craig Hill (2777), *Meall Gorm (1809), and Creag Ghiubhais (1593). Containing thus parts or the whole of three of the four highest summits in Scotland, Crathie presents a landscape as varied as it is beautiful—its clear-flowing salmon river and sweep of valley with broad plantations, green fields, and stately mansions, its rounded corries and narrow glens, its sombre deer-forests and heathery grouse moors, all set in a ring of trackless, serrated mountains. (See ABERARDER, ALT-NA-GIUTHASACH, CARR, CAIRNAQUEEN, CHARTERS CHEST, CORRIEMULZIE, CRAIG-CLUNY, CRAIG-GOWAN, CRAIG-NA-BAN, GARRAWALT, MONALTRIE, etc.) The prevailing rock is granite, alternating in places with gneiss, limestone, and quartz, near Castleton traversed by a vein of serpentine; the soil of the arable lands is generally a light sandy loam. Woods and natural forests of Scotch firs, larch, and birch must cover an enormous area, acres on acres of rocky hillside having been planted with millions of trees, both native and foreign, within the last hundred years, whilst in Mar Forest are firs from two to three centuries old, and containing 100 or 200 cubic feet of timber. The mansions are BALMORAL Castle, ABERGELDIE Castle, INVERCAULD House, and MAR Lodge; the Queen, the Duke of Fife, and Mr Farquharson of Invercauld are the chief proprietors. Giving off since 1879 the *quoad sacra* parish of Braemar, Crathie is in the presbytery of Kincardine O'Neil and synod of Aberdeen; the living is worth £264. The parish church is a handsome cruciform building opened in 1895. It is built on the site of the former church, and is of Gothic design in the Early Scotch character, and consists of nave, N and S transepts, and a circular apse, containing the choir, the organ, and the communion table. It has a central square tower with spire. The south transept is reserved for the accommodation of Her Majesty and the royal family, and has a separate entrance. At Easter Balmoral, on the opposite bank of the Dee, across a suspension bridge, is Crathie Free church, with a spire; other places of worship are noticed under CASTLETON. The following are the schools:—Crathie public, Aberarder, Braemar, Crathieside, Inverey (church), and two Roman Catholic schools at Inverey and Braemar, with respective accommodation for 91, 92, 145, 66, 40, 39, and 92 children, had (1895) an average attendance of 47, 15, 51, 28, 8, 9, and 37, and grants of £61, 2s. 6d., £28, 18s., £52, 5s. 6d., £37, 11s., £9, 11s. 6d., £11, 1s., and £45, 6s. 6d. Pop. (1801) 1876, (1831) 1808, (1861) 1574, (1891) 1534; of *g. s.* parish, 689.—*Ord. Surv.*, shs. 65, 64, 75, 1870-76.

Crawford, a village and a parish in the upper ward and the south-eastern extremity of Lanarkshire. The village, toward the NW corner of the parish, stands on the left bank of the Clyde (here crossed by a chain bridge of 75 feet span), opposite the influx of Midlock and Camps Waters, and adjacent to the Caledonian railway, 2 $\frac{1}{2}$ miles SE of Abington, under which it has a post office, this being 43 $\frac{1}{2}$ miles SW of Edinburgh. Enjoying anciently the privileges of a burgh of barony, it was, prior to the railway period, an important resting-place for travellers, but now is little more than a rural hamlet, with an hotel, the parish church, and a public school.

The parish, containing also the village of LEADHILLS, is traversed for 12 $\frac{1}{2}$ miles by the main trunk of the Caledonian, which here attains its summit level (1012 feet), and here has the stations of Abington and Elvan-foot. It is bounded N by Lanington; NE by Culter; E by Tweedsmuir, in Peeblesshire; SE by Moffat and Kirkpatrick-Juxta, in Dumfriesshire; S by Closeburn, and SW by Durisdcer and Sanquhar, all three also in Dumfriesshire; W and NW by Crawfordjohn. Its utmost length, from N to S, is 14 $\frac{1}{2}$ miles; its breadth, from E to W, varies between 1 $\frac{1}{2}$ and 11 $\frac{1}{2}$ miles; and its area is 65,712 acres, of which 318 are water. EVAN Water is formed by several head-streams in the E of the parish; otherwise the drainage system has been already sketched under the CLYDE, which here from its source near the southern boundary takes a northerly course of 28 miles, and which here receives, on the left hand, Powtrail, Elvan, and Glengonner Waters, and, on the right, Little Clydes

Burn and Midlock and Camps Waters—all of them rising in Crawford, and all of them separately noticed. Where the Clyde quits the parish, the surface sinks to 800 feet above sea-level, then it rises southward, south-eastward, and eastward to mountain watersheds of the Southern Highlands, which separate Clydesdale from Nithsdale, Annandale, and Tweeddale. The chief elevations from N to S to the W of the Clyde are Ravengill Dod (1753 feet), Wellgrain Dod (1813), Lousie Wood Law (2028), Dun Law (2216), Green LOWTHER (2403), and Balenclouch Law (2267); whilst to the E rise Southwood Rig (1556), the Pinnacle (1819), *Coomb Dod (2082), Yearngill Head (1804), Wintercleuch Fell (1804), *Whiteside Hill (1817), and Earncraig Hill (2000), where asterisks mark those summits that culminate on the borders of the parish. The glens or vales for the most part have considerable breadth of bottom, and are partly dry, partly wet and spongy. The rocks are in places metamorphic, but chiefly Silurian. Roofing slate has been worked in one small quarry; lead ore is extensively mined at LEADHILLS, where also many valuable minerals, as gold, silver, calamine, blende, manganese, malachite, azure copper ore, iron pyrites, etc., have been found. The soil on the banks of the Clyde, and near the mouths of its affluents, is variously alluvial, loamy, sandy, and gravelly; that of nearly all the remaining area is moorish. About 2200 acres are arable, less than 160 are under wood, and all the rest is either pastoral or waste. Crawford Castle, or Tower Lindsay, on the right bank of the Clyde, opposite Crawford village, is a ruined baronial stronghold, once defended by a moat; from the close of the 12th century till 1488 it was the seat of the Lindsays, who in 1398 received the earldom of Crawford. (See BALCARRES.) The parish is traversed by a Roman road, branching off near Elvanfoot to Nithsdale and Annandale, and flanked by two well-preserved Roman camps on Boadsberry Hill and White Camp farm. It also contains three native camps or hill-forts, and the sites of several pre-Reformation chapels. Newton House is the only mansion; but the property is divided among 12 landowners, 8 holding each an annual value of £500 and upwards, 1 of between £100 and £500, 1 of from £50 to £100, and 2 of from £20 to £50. Detached from LEADHILLS for church and school and registration purposes, Crawford is in the presbytery of Lanark and synod of Glasgow and Ayr; the living is worth £348. The church, rebuilt in 1875, contains 280 sittings; and three public schools—Crawford, Daer-Powtrail, and Summit—with respective accommodation for 102, 27, and 53 children, had (1891) an average attendance of 60, 16, and 25, and grants of £81, 4s. 6d., £32, 5s. 6d., and £37, 19s. 6d. Valuation £22,598, 17s. Pop. of civil parish (1801) 1671, (1831) 1850, (1861) 1590, (1891) 1634; of *g. s.* parish (1891) 630.—*Ord. Sur.*, shs. 15, 16, 1864.

Crawfordjohn, a village and a parish in the SW of the upper ward of Lanarkshire. The village stands, 950 feet above sea-level, 6½ miles N by E of Leadhills, and 4 W of its post-town and station, Abington, this being 43¼ miles SW of Edinburgh. At it are a post office, branches of the Commercial and Royal Banks, 2 inns, the parish church, and a public school; and by Dorothy Wordsworth, who, with her brother and Coleridge, drove through it in August 1803, it was described as 'a pretty, cheerful-looking village, but one that must be very cold in winter, for it stands on a hillside, and the vale itself is very high ground, unsheltered by trees.' One speciality has Crawfordjohn, that the curling stones made at it are the best to be found in Scotland.

The parish, containing also ABINGTON village, is bounded N by Douglas, NE by Wiston, E by Lamington, SE by Crawford, SW by Sanquhar and Kirkconnel in Dumfriesshire, W by Auchinleck and Muirkirk in Ayrshire. Its utmost length is 12½ miles from E by N to W by S, viz., from Abington to the Ayrshire boundary; its breadth diminishes from 9½ miles in the E to 7 furlongs in the W; and its area is 26,460¼ acres, of which 103¼ are water. The CLYDE flows 2½ miles northward along all the

eastern boundary, whilst the south-eastern is traced for 2½ miles by its affluent, Glengonnor Water. Snar Water, draining the south-eastern district, runs 6 miles northward to Duneaton Water; and DUNEATON Water itself rises close to the Ayrshire border, and thence winds 19 miles east-by-northward to the Clyde, its first 6½ miles following the Douglas, and its last 1¼ mile the Wiston, boundary. Where the Clyde quits the parish, the surface sinks to 750 feet above sea-level, thence rising to 1130 at Knock Leaven, 1260 at Black Hill, 1400 at Mountherrick, 1584 at Drake Law, 1620 at Rake Law, 1808 at Wanlock Dod (just within Sanquhar), 1616 at Cairn Kinny, and 1843 at Stony Hill (just within Auchinleck). The rocks are mainly metamorphic and Silurian, partly carboniferous; and they include limestone and white sandstone, with traces of coal and of lead and copper ores. The soil of some of the low grounds along the streams is a deep rich loam, of others sandy or gravelly; whilst here and there on the hill-slopes it is a strong red clay, and elsewhere generally moorish. Some 3200 acres are arable, and not more than 50 are under wood. Vestiges of three old castles are at Moss Castle, Glendorch, and Snar; and traces of one large ancient camp crown the SE shoulder of Black Hill; whilst near Shieldholm is another, supposed to be Roman. In 1839, the Eglinton Tournament year, Prince Louis Napoleon, French emperor that was to be, arrived at Abington inn, wet, tired, and hungry, from a day's grouse-shooting on Crawford Muir. He could get no sitting-room, so took his supper by the kitchen fire, slipped away to bed, and early next morning started again on foot. Abington House is the only mansion; and 3 proprietors hold each an annual value of £500 and upwards, 6 of between £100 and £500, and 5 of from £20 to £50. Giving off a small portion to Leadhills *quoad sacra* parish, Crawfordjohn is in the presbytery of Lanark and synod of Glasgow and Ayr; the living is worth £350. The parish church, enlarged and repewed in 1817, contains 310 sittings. At Abington is a Free church; and three schools—Crawfordjohn, Whitecleuch, and Abington—with respective accommodation for 105, 40, and 83 children, had (1891) an average attendance of 53, 11, and 55, and grants of £72, 3s., £23, 9s. 6d., and £64, 12s. 6d. Valuation £11,007, 19s. Pop. (1801) 712, (1831) 991, (1861) 980, (1871) 853, (1881) 843, (1891) 789.—*Ord. Sur.*, sh. 15, 1864.

Crawford Priory, a mansion in the N of Cults parish, central Fife, near the right bank of the Eden, 3 miles SW of Cupar. Built in 1813 by Lady Mary Lindsay Crawford, who in 1808 had succeeded to the Crawford-Lindsay estates on the death of her brother, the twenty-second Earl of Crawford, it was originally a splendid castelated edifice in the Gothic style, but fell into neglect and dilapidation, till in 1871-72 it was thoroughly renovated and enlarged, a carriage porch and vestibule being then erected at the S entrance, and a Gothic tower and spire, 115 feet high, at the E side, whilst a portion of the interior was converted into a private Episcopal chapel. It now is the property of Lady Gertrude Cochrane, daughter of the sixth Earl of Glasgow, and the Hon. Thomas H. A. E. Cochrane, who own 5625 acres in the shire, valued at £9085 per annum.

Crawfordton, an estate, with a modern mansion, in Glencairn parish, W Dumfriesshire, 1¼ mile from Moniaive. Its owner, Col. George Gustavus Walker (b. 1831), was county member 1865-68 and 1869-74; and holds 7660 acres in the shire, valued at £3478 per annum.

Crawfurdlan Castle, a mansion in Kilmarnock parish, Ayrshire, on the left bank of Crawfurdlan Water, 3 miles NE of Kilmarnock town. Comprising a strong, thick-walled, ancient tower, and a fine modern Gothic centre, it has been for upwards of six centuries the seat of a branch of the Craufurds; its present holder, Major W. Reginald Houston-Craufurd, owns 1876 acres in the shire, valued at £1988 per annum. (See also BRAEHEAD.) Crawfurdlan Water, formed by two head-streams in Fenwick parish, close to the Renfrewshire border, winds 8¼ miles south-westward through

Fenwick and Kilmarnock parishes, and, $\frac{1}{2}$ mile NNE of Kilmarnock town, unites with the Fenwick to form KILMARNOCK Water.—*Ord. Sur.*, sh. 22, 1865.

Crawick, a rivulet of NW Dumfriesshire, formed, at 780 feet above sea-level and within a mile of the Lanarkshire border, by the confluence of Wanlock and Spango Waters. Thence it winds 8 miles south-south-westward along the boundary between Sanquhar and Kirkconuel parishes, and falls into the Nith $\frac{3}{4}$ mile WNW of Sanquhar town.—*Ord. Sur.*, sh. 15, 1864.

Crawick Mill, a village in Sanquhar and Kirkconuel parishes, Dumfriesshire, on Crawick Water, 1 mile NW of Sanquhar town. It lies within Sanquhar burgh bounds, and has an extensive carpet and tartan factory.

Cray, a place in Kirkmichael parish, NE Perthshire, on the left bank of Shee Water, 15 miles N by W of Blairgowrie. Here are a Free church and Cray House, whose owner, Rev. H. M. Williamson, holds 437 acres in the shire, valued at £113 per annum.

Craynich, a wooded islet of Kilmarnock parish, Dumbartonshire, in Loch Lomond, $\frac{1}{2}$ mile NE of Inchmurrin. Triangular in shape, it measures 2 by $\frac{1}{2}$ furlongs.

Creack, a village in Auchindoir parish, W Aberdeenshire, $\frac{3}{4}$ miles SW of Rhynie.

Creagach. See CRAGGIE.

Creca. See ANNAN.

Cree, a river of Galloway, issuing from Loch Moan, which lies, 675 feet above sea-level, on the mutual boundary of Ayr and Kirkcudbright shires. Thence it winds 11 miles south-south-westward along that boundary, and next 21 $\frac{1}{2}$ miles south-eastward along all the boundary between Kirkcudbright and Wigtown shires, past Newton-Stewart, till at Creetown it falls into the head of Wigtown Bay, the *Iena Estuarium* of Ptolemy. On its right lie the parishes of Barr, Colmonell, and Penninghame, on its left of Minnigaff and Kirkmabreck; and on its left it receives Minnoch Water, Penkill Burn, and Palmure Burn. Navigable for small craft as high as CARRY, it assumes near Penninghame House a lake-like appearance, widening at intervals to close on a furlong; here were of old the celebrated 'Cruives of Cree,' *i.e.*, salmon-traps in the stone cauls or dam-dykes, which, serving the country-folk for bridges, came to be well-known landmarks. Throughout most of its lower course the 'crystal Cree' flows through flat flowery meadows, its banks being only occasionally adorned with heatbry knolls and lichen or fern-clad rocks; but from Bargrennan upwards its scenery is wild and mountainous, a succession of desolate moorlands. Trout may be caught in considerable quantities in the upper waters; salmon and sea-trout at several good casts about Penninghame House; and smelt or sperling, during March, in the brackish waters of the estuary.—*Ord. Sur.*, shs. 8, 4, 1857-63. See pp. 12-22 of Wm. M'Ilraith's *Wigtownshire* (2d ed., Dumf., 1877).

Creebridge, a village, with a public school, in Minnigaff parish, Kirkcudbrightshire, on the left bank of the Cree, opposite Newton-Stewart, with which it is connected by a five-arch bridge, erected in 1813 at a cost of £6000.

Creed (Gael. *Amhuinn Ghride*), a rivulet in the S of Stornoway parish, Lewis island, Ross-shire. Formed by two head-streams at an altitude of 300 feet above sea-level, it winds 9 $\frac{1}{2}$ miles east-south-eastward to the western side of Stornoway Harbour, $\frac{3}{4}$ mile SSW of Stornoway town. It traverses Loch an Oash and Loch a Chlachain, and makes a fall opposite Sir James Matheson's Grotto, up to which point it abounds in scartrot, grilse, and salmon.—*Ord. Sur.*, sh. 105, 1858.

Creeinch. See CRAYINCH.

Creetown, a small seaport town in Kirkinabreck parish, SW Kirkcudbrightshire, on the estuary of the river Cree or head of Wigtown Bay, $\frac{3}{4}$ miles as the crow flies NE of Wigtown, and 1 mile S of Creetown station on the Portpatrick railway, this being 6 $\frac{1}{2}$ miles SE of Newton-Stewart, and 4 $\frac{3}{4}$ WSW of Dumfriea. A village, called Creth, occupying its site, was in 1300 the rendezvous of an English army; and either that village or a successor to it, bearing the name of Ferrytown of

Cree, became nearly extinct in the 18th century. The present town, founded in 1785, embraced some houses which still remained of the old village, and was made a burgh of barony in 1792, to be governed by a baillie and four councillors, elected triennially by the resident feuars. It stands between Moneypool and Englishman's Burns, amid a great expanse of beautiful scenery; and, chiefly consisting of modern houses, each with its garden and orchard, relies in great measure for support on the neighbouring granite quarries. At it are a post office, with money order, savings' bank, and railway telegraph departments, 2 chief inns, a public school, the Town Hall, Waverley Hall, the parish church (1834; 800 sittings), and a neat U.P. church (300 sittings); whilst in the immediate neighbourhood are the mansions of Barholm and Cassenarie. Capt. Jas. Murray Deniston (1770-1857), author of *Legends of Galloway*, died at Creetown. Pop. (1861) 968, (1871) 805, (1881) 979, (1891) 871.—*Ord. Sur.*, sh. 4, 1857.

Creggans. See STRACHUR.

Creich, a parish of N Fife, extending to within 5 furlongs of the Firth of Tay, and containing the villages of Luthrie and Brunton, each with a post office under, and respectively 5 $\frac{1}{2}$ and 6 $\frac{1}{2}$ miles NW of Cupar-Fife. It is bounded NW by Flisk, NE by Balmerino, E by Kilmany and Moonzie, S by Monimail, SW by Dunbog, and W by the easternmost section of Abdie, having an utmost length from NNE to SSW of 3 $\frac{1}{2}$ miles, a width of 1 $\frac{1}{2}$ mile, and an area of 2341 acres. The surface, sinking in the south-eastern corner to less than 200 feet above sea-level, is elsewhere a congeries of hills, which on the NW border attain 568 feet, and at Black Craig in the NE 665—heights that command a magnificent view of the Tay's basin, away to the Sidlaws and the Grampians. Some of the hills are cultivated to the top; others are partly covered with plantations; and others, again, are rocky and heathy. Several burns, rising here, unite near Luthrie to form Motray Water, a tributary of the Eden. The rocks, eruptive mainly, include greenstone, amygdaloid, clinkstone, and basalt; and a laminar or stratified trap has been worked in one quarry, basaltic clinkstone in another. The soil is variable, ranging from black or thin sharp gravelly loam to clay or moss. On Green Craig is a hill-fort, consisting of two concentric lines of circumvallation; and a little to the SE are the ruins of the old parish church, and of Creich Castle, which, three stories high, and 47 feet long by 39 broad, appears to have been a place of very considerable strength, and was defended on one side by a morass, now drained, on the other by outworks. In 1502 the estate around it was acquired from the Littles or Liddels by Sir David Bethune, whose daughter, Janet, Lady Buccleuch, is the 'Ladye of Branzholm' in Sir Walter's *Lays*, and whose great-granddaughter was one of the 'Queen's four Maries'; it passed by purchase to the Bethunes of Balfour about the middle of the 17th century. Of Parbroath Castle, a seat of the Setons, in the S of the parish, hardly a vestige remains. Natives were the Rev. Alex. Henderson (1683-1646), the zealous Covenanter, and John Sage (1652-1711), nonjuring Archbishop of Glasgow. Creich is in the presbytery of Cupar and synod of Fife; the living is worth £249. The parish church, $\frac{1}{2}$ mile NNW of Luthrie, is a good Gothic structure, built in 1832, and containing 252 sittings. A Free church stands near Brunton. The public school, with accommodation for 104 children, had (1891) an average attendance of 76, and a grant of £75, 19s. 6d. Valuation (1892) £2642, 13s. Pop. (1831) 419, (1861) 377, (1871) 387, (1881) 386, (1891) 325.—*Ord. Sur.*, sh. 48, 1868.

Creich, a very large Highland parish in the S of Sutherland, containing, towards its SE corner, the village of BONAR-BRIDGE, and traversed for 5 $\frac{1}{2}$ miles by the Sutherland railway, with Invershin station thereon, 3 $\frac{1}{2}$ miles NNW of Ardgay, and 17 $\frac{1}{4}$ NW of Tain. It is bounded at its north-western extremity by Assynt and Eddrachillis; along its north-eastern side by Lairg, Rogart, and Dornoch; at its south-eastern corner by the upper waters of Dornoch Firth which separate it from

Edderton in Ross-shire; and along its south-western side by Kincardine, likewise in Ross-shire. From SE to NW its greatest length is $31\frac{1}{2}$ miles; its breadth varies between $1\frac{1}{2}$ and $9\frac{1}{4}$ miles; and its area is $110,736\frac{3}{4}$ acres, of which 735 are forshore and $1911\frac{1}{4}$ water, it thus being nearly half the size of all Midlothian. Lakes of the interior, from SE to NW, with their utmost length and width and their altitude above sea-level, are Loch MILDALD (2 miles \times 3 furl.; 115 feet), Loch a' Ghobhair (4×1 furl.; 742 feet), Loch an Lagain ($7\frac{1}{2} \times 1\frac{1}{2}$ furl.; 446 feet), sending off the EVELIX, Loch Laro ($7\frac{1}{2} \times 1\frac{1}{2}$ furl.; 600 feet), Loch na Claise Moire (7×3 furl.; 774 feet), Loch na Faichde ($4 \times 1\frac{1}{2}$ furl.; 1400 feet), Loch Garn nan Conbhairan ($4 \times 1\frac{1}{2}$ furl.; 1104 feet), and a number of smaller tarns. On the Dornoch border lies Loch BUIE ($1\frac{1}{4} \times \frac{1}{4}$ mile; 527 feet); on the Rogart, Loch Craicail Mor ($6 \times 1\frac{1}{2}$ furl.; 620 feet); on the Kincardine, Loch Ailsh ($7 \times 4\frac{1}{2}$ furl.; 498 feet); and on the Eddrachillis, Gorm Loch Mor (7×4 furl.; 846 feet). The river CASSELY, issuing from the last, hurries $20\frac{1}{2}$ miles south-eastward along the middle of the parish to the OIKELL, which itself winds $35\frac{1}{4}$ miles south-south-eastward and east-south-eastward along all the Kincardine boundary, through Loch Ailsh and the Kyle of Sutherland, to the head of Dornoch Firth, at Bonar-Bridge. At Invershin, lower down than the Cassley, it is joined from the N by the SHIN, whose last $5\frac{1}{2}$ miles lie either on the boundary with Lairg or through the interior of Creich. The surface, hilly everywhere, in the NW is mountainous, attaining 1090 feet on Meall Moraig, 937 on Meall Mor, 1318 on Cnoc a Choire, 1341 on Beinn an Rasail, 1785 on Beinn na Eoin, 2345 on Meall an Aonaich, and 3273 on BENMORE ASSYNT, the loftiest summit of Sutherland. Benmore is made up of Silurian quartzite and trap; lower down are carboniferous and Old Red sandstone rocks. Very hard trap has been worked in two quarries; and a small vein of manganese occurs at Rosehall, which, in common with Flode, Pulrossie, and other places, also yields excellent clay; but coal and shale have been sought for in vain. Woods cover a considerable area round Bonar-Bridge, where the soil of the plough-lands is mostly a light gravelly loam; and there are several good arable and sheep farms. The largest of the latter is Iuvercassley, which, extending to 35,000 acres, comprises much black land, lying high, and so exposed to wind and frost. Prof. Harry Rainy, M.D. (1792-1876), was a native. Antiquities are a 'Pictish tower' and a stone circle near Rosehall, two groups of stone circles near Bonar-Bridge, and, near the church, a vitrified fort on the Dun of Creich and a standing stone, 8 feet long by 4 broad, which is said to have been reared on the grave of a Danish chieftain. ROSEHALL House is the principal mansion. Creich is in the presbytery of Dornoch and synod of Sutherland; the living is worth £310. The parish church, on Dornoch Firth, $3\frac{1}{2}$ miles ESE of Ardgay, was built in 1790, and contains 500 sittings; There are also two Free churches of Creich and Rosehall; and four public schools—Bonar-Bridge, Invershin, Larachan, and Rosehall—with respective accommodation for 198, 40, 190, and 90 children, had (1891) an average attendance of 101, 22, 29, and 64, and grants of £91, 7s. 2d., £36, 18s. 6d., £42, 10s., and £65, 2s. Pop. (1851) 2223, (1891) 2013, of whom 1436 were in Bonar, and 577 in Rosehall, registration district.—*Ord. Sur.*, sh. 102, 1881.

Creid. See CREED.

Creinch. See CRAYINCH.

Creoch, Loch. See CUMNOCK, NEW.

Creeran, a stream and a sea-loch in the N of Argyllshire, separating the district of Appin from the parish of Ardochattan. The stream rises $4\frac{1}{2}$ miles SSE of Ballachulish, on the south-western slope of Sgor na-h-Ulaidh (3258 feet), at 2500 feet above sea-level, and thence winds $11\frac{1}{4}$ miles west-south-westward to the head of the sea-loch. The lower part of its glen is finely wooded, and here it receives the Ure, and traverses Loch FASNACLOICH; its waters are strictly preserved, and the salmon and trout fishing is good.—The sea-loch curves 8 miles west-south-

westward, north-westward, and south-westward to Loch Linnhe, opposite the upper part of Lismore Island, and nowhere is more than $1\frac{1}{2}$ mile broad, whilst narrowing to 2 furlongs at its mouth near Shian Ferry, and to 1 furlong towards its head near Creagan Ferry, being crossed at these two ferries by different routes from Oban to Ballachulish. With an average depth of 15 fathoms, and a spring-tide of 15 feet, it affords good harbourage in all its lower parts.—*Ord. Sur.*, shs. 45, 53, 1876-77. See GLENCRERAN, and W. Anderson Smith's *Loch Creeran* (Paisley, 1887).

Crianlarich, a hamlet in Killin parish, W Perthshire, at the mouth of Strathfillan, with a station on the Callander and Oban and another on the West Highland railway, $5\frac{1}{2}$ miles SE of Tyndrum. In connection with the latter railway there is here a bridge (constructed chiefly of Ben Cruachan granite) across the Fillan Water, having a stretch of over 300 feet in six spans, and a strong V-shaped cutwater to break up the ice floes that follow a thaw. After leaving Crianlarich the two railways run parallel to each other on past Tyndrum, the river running between for a good part of the way at a distance from each of about 100 feet. Lying 522 feet above sea-level, the hamlet has a post office, hotel, and public school.

Crib Law, a hill (1389 feet) in the Selkirkshire portion of Robertson parish, 3 miles ENE of the meeting-point of Selkirk, Roxburgh, and Dumfries shires.

Crichie, a hill (500 feet) in the N of Kintore parish, Aberdeenshire, $1\frac{1}{2}$ mile S by W of Inverurie. Bruce was encamped here in 1308 at the time of his victory over the Comyns in BOURTIE parish.

Crichie House, a mansion in Old Deer parish, NE Aberdeenshire, $\frac{2}{3}$ mile SE of Stuartfield.

Crichepe Linn. See CLOSEBURN.

Crichton, a parish on the E border of Edinburghshire, containing, at its northern extremity, the village of Pathhead, on the road from Edinburgh to Lauder, 5 miles ESE of Dalkeith, and $3\frac{2}{3}$ N of Tynehead station. Tynehead itself and Fala Dam hamlet ($2\frac{1}{2}$ miles SE of Pathhead) also belong to Crichton, which is bounded NE by Cranston and by Humberie in Haddingtonshire, SE by Fala and Soutra and by Heriot, and W by Borthwick. Its length, from N to S, is $4\frac{1}{2}$ miles; its width, from E to W, varies between $3\frac{2}{3}$ furlongs and $3\frac{1}{2}$ miles; and its area was increased by the Boundary Commissioners in 1891 to $5498\frac{1}{2}$ acres by the addition of the Cakemuir detached portion of the parish of Cranston (677 acres). TYNE Water, rising close to Tynehead station, meanders 3 miles north-north-eastward along all the western border; the interior is drained by several subaffluents of Humberie Water. The surface, sinking near Pathhead to close on 400 feet above sea-level, and to 600 at Costertou, attains 804 feet at a point 7 furlongs ESE of the church, and 900 upon Crichton Moss. The rocks belong mainly to the Carboniferous Limestone series, with a patch of basalt on the higher ground; limestone has been largely worked; and coal occurs, though not under conditions to be profitably mined. The soil over fully four-fifths of the area is rich and deep, accessible most of it to the plough, and yielding abundant crops; the high lands are sheltered by belts of thriving plantation. A rising-ground at Longfaugh, commanding a wide and beautiful prospect, is crowned by remains of a fort, supposed to be a Roman camp; but Crichton's chief antiquities are Crichton Castle and Cakemuir Castle, the former a massive ruin, forming the grand feature in the landscape, as it rises from a projecting terreplein within a hundred yards or so of the top of the hill on the Tyne's right bank, $\frac{1}{4}$ mile S of the church. A Turstan de Crichton is one of the witnesses to the charter of foundation of Holyrood Abbey (1128); his most famous descendant was Sir William Crichton, the founder of both castle and church, who, as chancellor of Scotland, was alternately rival and friend of Sir Alexander Livingstone, and who in 1440 at Edinburgh Castle beheaded the young Earl of Douglas and his brother—an act of treachery for which his own fortress was taken and dismantled by the Douglases. (See

DOUGLAS CASTLE.) In 1445 Sir William was made Lord Crichton, the third holder of which title lost his estates in 1484 for joining Albany against James III. After four years' tenure by the minion Ramsay, they were granted in 1488 to Patrick Hepburn, first Earl of BOTHWELL, by whose great-grandson, Darnley's murderer, they were once more forfeited in 1567. Nine years later James VI. bestowed them on his ill-starred cousin, Francis Stewart, fifth Earl of Bothwell; and subsequently they passed through the hands of a dozen proprietors, from one of whom, Hepburn of Humble (c. 1649), the Castle was nicknamed 'Humble's Wa's', till at last they came to the Callendars. Queen Mary feasted in the castle hall, on occasion of the marriage here of her natural brother, Sir John Stewart; but Crichton's chief interest lies, with most readers, in the visit paid to it by 'Marmion.' Scott's lines describe the ruin faithfully:—

'Crichton! though now thy miry court
But pens the lazy steer and sheep;
Thy turrets rude, and totter'd keep,
Have been the minstrel's loved resort.
Oft have I traced within thy fort,
Of mouldering shields the mystic sense,
Scutcheons of honour or pretence,
Quarter'd in old armorial sort,
Remains of rude magnificence.
Nor wholly yet has time defaced
Thy lordly gallery fair;
Nor yet the stony cord unbraced,
Whose twisted knots, with roses laced,
Adorn thy ruin'd etair.
Still rises unimpair'd below
The courtyard's graceful portico.
Above its cornice, row and row
Of fair hewn facets richly show
Their pointed diamond form.'

'Crichton,' he adds in the Notes, 'is a large ruinous castle on the banks of the Tyne, built at different times, and with a very different regard to splendour and accommodation. The oldest part of the building is a narrow keep or tower, such as formed the mansion of a lesser Scottish baron; but so many additions have been made to it, that there is now a large courtyard, surrounded by buildings of different ages. The eastern front of the court is raised above a portico, and decorated with entablatures bearing anchors. All the stones in this front are cut into diamond facets, the angular projections of which have an uncommonly rich appearance. The inside of this part of the building appears to have contained a gallery of great length and uncommon elegance. Access was given to it by a magnificent staircase, now quite destroyed. The soffits are ornamented with twining cordage and rosettes; and the whole seems to have been far more splendid than was usual in Scottish castles.' So that Crichton still offers a signal contrast to its grim square neighbour, Borthwick, even although, since Sir Walter's day, its courtyard has been encumbered by the fall of a huge portion of the massive north-eastern tower. Costerton House, 3½ miles ESE of Pathhead, at the eastern extremity of the parish, is the principal mansion, the seat of David Ainslie, Esq.; and the property is mostly divided among 5 heritors. Crichton is in the presbytery of Dalkeith and synod of Lothian and Tweeddale; the living is worth £289, exclusive of manse and glebe. The collegiate church of SS. Mary and Kentigern, 1½ mile SSW of Pathhead, was founded in 1449 for a provost, 8 prebendaries, a sacrist, and 2 singing boys. Second Pointed in style, it was to have been cruciform, but never received the nave, so now comprises a chancel, with sedilia; transepts, the northern of which is blocked up with an unsightly vault; and a massive, square, saddle-backed tower. The chancel, which, serving for parish church, contains 500 sittings, is disfigured by a gallery, and several of the windows have been blocked up; but the whole might at no great cost be restored to its pristine beauty. A public school, with accommodation for 210 children, had (1891) an average attendance of 165, and a grant of £144, 3s. Valuation £8343, including £532 for railway. Pop. (1801) 923, (1831) 1325, (1861) 1364, (1871) 1223, (1881) 1094, (1891) 943.—*Ord. Sur.*, shs. 32, 33, 1857-63. See Billings' *Baronial*

and *Ecclesiastical Antiquities* (1845); Sir Thos. Dick Lauder's *Scottish Rivers* (new ed. 1874); and J. W. Small's *Leaves from my Sketch Books* (1880).

Crichup Linn. See CLOSEBURN.

Criech. See CRIECH.

Crieff (Gael. *crubha*, 'haunch'), a town and a parish of central Perthshire. The town stands on ground ascending from the Earn's left bank, 100 to 400 feet above sea-level, and has a station on the Crieff and Comrie branch of the Caledonian railway, which was opened for general traffic in June 1893. By road it is 6½ miles E by S of Comrie, and by rail 18 W of Perth, 108 SW of Aberdeen, 38 WSW of Dundee, 9 NNW of Crieff Junction, 26 NNE of Stirling, 62½ NNW of Edinburgh, and 56½ NNE of Glasgow. Boldly resting on a sunny or southward slope, and sheltered from cold winds by pine-clad eminences, this 'Montpelier of Scotland' has long been famous for its pure, dry climate no less than for its exquisite surroundings. 'From every street,' to quote the *Beauties of Upper Strathearn*, 'a landscape of rare sweetness and beauty is disclosed. The valley, here widening to 10 or 15 miles, is studded E, S, and W, as far as the eye can reach, with mansions and villages, embowered in oak or pine woods. Here and there the Earn—no mean stream—is seen gliding along its winding course, now with the dash of a mountain torrent, and anon with the measured tread of a royal pageant, till the eastern view is lost under the receding slopes of the Ochils. On the N and NW the Grampians, with BEN CRONZIE (3043 feet) for centre piece, rear their dark forms against the sky-line, in summer and autumn shining in their natural bloom.'

Charters were dated from Crieff so long ago as 1213, and for centuries it has been recognised as the capital of Strathearn, the seat of the great civil jurisdiction of the Earls Palatine till 1483, and of the criminal courts of the Stewards or Seneschals down to the abolition of heritable jurisdiction in 1748. The 'kind gallows of Crieff,' whence sometimes of a morning a score of plaids had dangled in a row, still stood at the western end of the town, when Scott came hither in 1796; and he notes in *Waverley* how the Highlanders would touch their bonnets to it, with the ejaculation—'God bless her nain sell, and the Teil tann you!' To this day may be seen the ponderous iron stocks, and near them an octagonal stone fleur-de-lis, 10 feet in height, the cross of the burgh of regality of Drummond (1638); whilst further to the eastward is the Cross of Crieff, transferred to its present position little more than a century since from the ancient barony of Trowan, and by some archaeologists pronounced to be of Norman, by others of Runic, character (*Sculptured Stones of Scotland*, 1867). Other antiquities the town has none; for its massy Tolbooth of 1635, with cage and clock-tower and corbie-stepped gables, was demolished in 1842; and, though it gave shelter to the great Montrose, Crieff dwindled into a mere kirktown between 1483 and 1683. Then it began to revive, George Drummond of Milnab, afterwards provost of Edinburgh, giving off pieces of his lands in feu; but on 26 Jan. 1716, it was burned to the last house by 350 of the Chevalier's Highland adherents. For some years it lay in ruins; but from 1731 James Drummond, titular third Duke of Perth, bestirred himself in the work of repair and improvement, laying out James Square and extending the town westward, whilst founding a large linen factory. This was destroyed in the '45, when the loyal town narrowly escaped a second singing, and the Drummond estates were forfeited to the Crown. By the commissioners, however, who managed them from 1752 to 1784,* bleaching, tanning,

* In 1784 the Drummond estates were conferred by George III. on Captain James Drummond, who claimed to be heir-male of Lord John Drummond, brother of the third Duke of Perth, and who, in 1797, was created Baron Perth. They are now held by his great-grandson, Gilbert Henry Heathcote-Drummond-Willoughby, Baron Willoughby de Eresby, and first Earl of Ancaster (see 1892), and Joint Hereditary Great Chamberlain of England, having been unsuccessfully claimed (1893-71) by George Drummond, Earl of Perth and Melfort, as nearest heir-male of the third Duke. See DRUMMOND CASTLE and PERTH.

paper-making, and other industries were fostered to a height that bade fair to make Crieff an important industrial centre; and the woollen manufacture was added in 1812, about which time three whisky distilleries, with eight malting houses, were also started. The last were all closed in 1828; and, generally speaking, Crieff's manufactures received a signal blow from the termination of the great war with France, as well as from changes in fashions, machinery, and modes of transit. Prospects brightened once more with the opening of the railway; and since 1856 Crieff has made rapid progress, so that, while scarcely forty years ago villas and cottages ornées were 'almost totally wanting,' it now comprises three or four principal streets, and numerous other streets running in every direction, ornate cottages, and grand villa residences. It is mostly built on a large elevated natural terrace and on slopes ascending north-east from the Earn, having in its rear a finely wooded hill, the Knock of Crieff, overlooking the finest landscape in Strathearn. Much of the town looks bright and new, and it has long-standing fame as a health-recruiting place for invalids, being also a great summer resort of tourists and sportsmen. The town is surrounded by numerous rich and beautiful estates and many places of interest, has excellent walks in its vicinity, while in summer coaches are run to Lochearnhead, a distance of 20 miles. Wordsworth and his sister Dorothy here passed the night of 9 Sept. 1803; and on 10 Sept. 1842 the Queen drove through the town, which has given birth to the poet David Mallet (1700-65), the chemist Prof. Thomas Thomson (1773-1852), and Prof. James Gibson, D.D. (1799-1871).

The old Drummond Arms, where Prince Charles Edward, after reviewing his forces, held a stormy council of war (3 Feb. 1746), has been feued to the Commercial Bank of Scotland, and premises for the bank and a large hotel have been built. The Royal, too, one of several other hotels, besides three or four temperance ones, has been greatly enlarged; but the chief hospice for tourists and invalids is Strathearn House, the large hydropathic establishment, erected in 1867 at a cost of £30,000, 1 mile NNE of the station. It stands 440 feet above sea-level, on the southern slope of the sheltering Knock, in grounds 70 acres in extent; and is a dignified Elizabethan structure, four stories high, and 345 feet long, with a turreted square tower and 200 apartments, of which the dining and drawing rooms are 84 feet long, 30 wide, and 15 and 30 high. It has Turkish and other baths in great variety; and its water-supply, 20,000 gallons per diem, is brought from springs, gathered in a reservoir an acre in extent and 4 miles distant. At or near the town are a post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland and the British Linen Co., Clydesdale, Commercial, North of Scotland, and Union Banks, a local savings bank, a town-house (1850), containing a mechanics' library, a recreation ground (1880), gas-works, a new and commodious station (opened 1893), a cemetery, a bridge across the Earn (rebuilt 1867-68), manufactories of woollen shirtings, blankets, tweeds, and plaidings, chemical manure works, tanneries, coach works, a distillery, and a preserve work. An abundant water supply from Loch Turret was presented to the town by Sir Patrick Keith Murray, Bart., of Ochertyre. In recognition of this generosity, a handsome memorial fountain was erected in James Square in 1894 by the Town Council. There are two weekly papers published—the Liberal *Strathearn Herald* (1856) and the Liberal Conservative *Crieff Journal* (1857). Tuesday is market-day, and fairs are held on the first Tuesday of every month; but the famous Michaelmas Tryst was removed to Falkirk about 1770. MacKay, in his *Journey through Scotland* (1723), has sketched its humours with a vigorous hand; and Robert Donn's Gaelic poem describes the home-sickness that came over him while counting off doves in its enclosures.

Nowhere is the great building activity of modern Crieff displayed more markedly than in its schools and churches. The ancient parish church of St Michael was

demolished in 1787, when forty gold coins of Robert I. were found in its Gothic walls. On its site arose the plain East church, with an ill-designed bell-tower; but this, in turn, in 1881 gave place to a goodly Gothic edifice in Strathearn Terrace, built at a cost of £4500, and seating 1000 worshippers. The West church, built as a chapel of ease in 1838, and raised to *quoad sacra* status in 1864, also contains 1000 sittings. In 1881 the Free church was rebuilt in Comrie Street, at a cost of £4500, exclusive of site; and, Scotch-Gothic in style, has 860 sittings and a massive tower, whose elated spire rises to 120 feet. The U.P. church (533 sittings) was rebuilt in 1884; St Fillan's Roman Catholic church (200 sittings) in 1871; and St Columba's Episcopal church (600 sittings) in 1877, the last at a cost of £6000, in the Early Decorated style, with a spire 130 feet high. There are, moreover, Baptist and Congregational chapels. Thomas Morison, native of Muthill, and builder in Edinburgh, dying in 1826, left the residue of his fortune to accumulate to the value of £20,000, with which, in 1859, was founded Morison's Academy, a Scottish Baronial structure, standing in grounds 10 acres in extent, just to the N of the town, whilst St Margaret's College, at the E end of Crieff, was afterwards purchased by the trustees for the rector's residence and boarders. As remodelled in 1878, the Academy has a rector, English, mathematical, and modern languages masters, and a lady superintendent, and gives a liberal education to 120 boys and girls of the upper and middle classes. Taylor's Institution, under 6 managers, was founded by William Taylor of Cornton, tallow chandler in Crieff (d. 1841), for the children of the poor of the parish, and in 1859 was enlarged by addition of a female industrial school. It, Monzie, St Columba's (Episcopal), and the public school, with respective accommodation for 303, 132, 126, and 450 children, had (1891) an average attendance of 189, 39, 81, and 292, and grants of £166, 7s. 6d., £54, 6s. 6d., £52, 19s. 6d., and £280.

Having adopted the General Police and Improvement Act in 1864, Crieff is governed by a chief magistrate, a senior and a junior magistrate, and 8 police commissioners. Pop. (1776) 1532, (1792) 2071, (1831) 3835, (1851) 3824, (1861) 3903, (1871) 4027, (1881) 4469, (1891) 4902, of whom 107 were in Muthill parish, and 3 in that of Monzievaird and Strowan.

The parish in 1891 underwent an extensive re-arrangement by the Boundary Commissioners, who transferred all the portion lying on the right bank of the Earn to the parish of Muthill, the detached part of it situated at Glenshervie (1910 acres) to Monzievaird and Strowan parish, and the Auchilanzie detached part (90 acres), as well as the whole of the portion lying in the basin of the river Almond, to the parish of Fowlis-Wester. The effect of the latter transfer was to cut off all that part of the parish which lay north of Fowlis-Wester parish and north of the watershed between Glenalmond and Glenturret, near Stonefield Hill. There were transferred to the parish a detached portion of Monzie parish (1107 acres), and the portion of that parish which contained the village of Monzie. The EARN winds 4½ miles south-eastward, and its tributary, TURRET Water, flows 2 miles southward. The SHAGGIE Burn, one of the Turret's affluents, has here a west-south-westerly run of 1¼ mile, and itself receives KELTIE Burn, flowing 4½ miles south-south-eastward. The surface, sinking at the SE corner to less than 100 feet, thence rises to 911 feet on the Knock of Crieff, 1196 on the Hill of Callander, and 2498 on Stonefield Hill. The rocks are chiefly Old Red Sandstone in the south, and clay-slate in the N; the soil near the town is a pretty rich loam, but elsewhere ranges from sandy or gravelly to stiff, reddish, tilly clay. With the exception of some 560 acres under wood, the whole almost is under cultivation. Antiquities are the Roman camp of FENDOCH, CLACH-NA-OSSIAN, a fort on Dun Mor, and a cairn on the opposite hill. FERN TOWER is the principal mansion, in front of which there are vestiges of a Druidical circle, and 8 proprietors hold each an annual value of £500 and upwards, 11 of between

£100 and £500, 32 of from £50 to £100, and 60 of from £20 to £50. Crieff is in the presbytery of Auchterarder and synod of Perth and Stirling; the living is worth £206. Valuation (1868) £17,926, 13s. 2d., (1882) £30,680, 15s. 8d., (1892) £33,085, 17s. 3d. Pop. (1801) 2876, (1831) 4786, (1861) 4490, (1871) 4598, (1881) 4852, (1891) 5296.—*Ord. Sur.*, sh. 47, 1869. See S. Korner's *Rambles round Crieff and Excursions into the Highlands* (Edinb. 1858); *Beauties of Upper Strathearn* (Crieff, 1854; 3d. ed. 1870); and *Crieff, its Traditions and Characters, with Anecdotes of Strathearn* (Edinb. 1881).

Crieff Junction, a station in Blackford parish, Perthshire, at the deflection of the Crieff Junction railway from the Caledonian, 2½ miles SSW of Auchterarder, and 9 SSE of Crieff.

Criffl, a barren though verdant granitic mountain-group of SE Kirkcudbrightshire, commencing in Newabbey parish near the Nith, and running south-westward across Kirkgunzeon, Urr, and Colvend, down almost to the shore of the Solway Firth. It culminates in conical, peaked Knockendoch (1867 feet), 2½ miles S by W of Newabbey village, and from this 'huge Criffl's hoary top,' as Wordsworth calls it, commands in clear weather a map-like view of the Solway's basin, and the Cumberland mountains beyond, with far-away glimpses of Arran, Ireland, and the Isle of Man. 'Drayton,' says Dorothy Wordsworth, 'has prettily described the connection this neighbourhood has with Cumberland when he makes Skiddaw say—

"Scurfell from the sky,
That Annandale doth crown, with a most amorous eye
Salutes me every day, or at my pride looks grim,
Oft threat'ning me with clouds, as I oft threat'ning him."

According to a prophecy ascribed to Thomas the Rhymer, 'in the evil day coming safety shall nowhere be found except atween Criffl and the sea.'—*Ord. Sur.*, sh. 5, 1867.

Crimond (anc. *Creichmont*, 'clay hill'), a hamlet and a coast parish of Buchan, NE Aberdeenshire. The hamlet, lying 2½ miles inland, is 3 miles ESE of Lonmay station, on the Formartine and Buchan section of the Great North of Scotland railway, 8¾ SE by S of Fraserburgh, and 9 NW of Peterhead, and has a post office.

The parish, containing also the fishing hamlet of Rattray, formerly a royal burgh, 2 miles to the ENE, is bounded SW, NW, and N by Lonmay, NE and E by the German Ocean, and SE by St Fergus (now in Aberdeenshire). Its utmost length is 6½ miles from ENE to WSW, viz., from Rattray Head to a little beyond the Loch of Kininmonth; its width in an opposite direction varies between 1½ and 2¾ miles; and its area is 6281½ acres, of which 243½ are water and 148¾ foreshore. The coast-line, 2¾ miles in extent, includes the low, rocky, shelving promontory of Rattray Head; and elsewhere presents a broad band of flat beach, backed by beautiful sand-hills. The interior rises abruptly from the shore to 106 feet above sea-level near the coastguard station, and thence descending gradually towards the centre, ascends again gently southward and south-westward to 136 feet near South Mosstown, 228 at Upper Ridinghill, and 284 at Lochhills. Loch Strathbeg, 2¾ miles long, and from 2 to 4½ furlongs broad, lies on the northern border, and receives burns and runnels draining the interior; the Loch of Kininmonth (3 × 1 furl.) in the SW, has been recently drained. Streams of pure water are scarce, most being tainted with iron. Dark blue granite prevails in the E; red granite, generally in a crumbling condition, is found in the W; trap rock is also abundant; and limestone was at one time quarried. The soil near the coast is light and sandy; towards the centre is generally of a black loamy nature, resting on a clay bottom; and elsewhere is cold and wet. Nearly five-sevenths of the entire area are arable, less than one-eighth is pastoral, and plantations cover a considerable extent. Crimond estate belonged once to the Earls of Errol, whilst Logie was the seat of a branch of the Gordons; the former belongs now to Ethel (b. 1869), daughter of the late Sir Alex. Banner-

man of CRIMONDMOGATE. Logie was the scene of the fine old Jacobite song, *O Logie o' Buchan*, believed to have been written about 1736 by George Halket, schoolmaster at Rathen; and at a spot called the Battle Fauld, tradition points out the grave of the hero of the famous ballad, *Sir James the Rose*. A circular mound, called Castle Hill, at the E end of Loch Strathbeg, was the site of a castle of Comyn, Earl of Buchan; and near it are the First Pointed ruins of St Mary's chapel of Rattray; whilst on the farm of Netherton of Logie is an ancient Caledonian circle in a high state of preservation. John Farquhar (1751-1826), known as 'the rich Farquhar of Fonthill,' was a native. Rattray House is the principal mansion; and 3 proprietors hold each an annual value of more, 5 of less, than £100. Giving off a south-westerly portion to the *quoad sacra* parish of Kininmonth, Crimond is in the presbytery of Deer and synod of Aberdeen; the living is worth £220. The present church, at the hamlet, was built in 1812, and, containing 500 sittings, has a steeple and clock; its ruined predecessor, near the manse, ¾ mile N by W, is said to have been a prebend of St Machar's at Aberdeen in 1262, and bears date 1576. A public school, with accommodation for 142 children, had (1891) an average attendance of 121, and a grant of £120, 17s. 6d. Valuation £5997, 12s. 7d. Pop. of civil parish (1801) 862, (1821) 900, (1841) 767, (1851) 893, (1871) 887, (1881) 827, (1891) 825; of ecclesiastical parish (1881) 815, (1891) 808.—*Ord. Sur.*, shs. 97, 87, 1876.

Crimondmogate, a mansion in Lonmay parish, Aberdeenshire, 1¾ mile W of Lonmay station. Grecian in style, with a hexastyle granite portico, it was built towards the middle of the present century at a cost of £10,000; in its finely-planted grounds is a granite obelisk to the memory of Patrick Milne, who bequeathed the estate to the Bannermans. The present owner holds 7660 acres in the shire, which were valued at £7745 per annum.

Crinan, a village, a sea-loch, and a canal, in Argyllshire. The village, called sometimes Port-Crinan, stands in Kilmartin parish, on the northern side of the sea-loch, not far from the W end of the canal, 5½ miles WNW of Lochgilphead, under which it has a post-office; at it are an excellent inn, a wharf and slip, and a lighthouse. The steamers, in the line of communication between Glasgow and Oban, call at it; and here the Queen and Prince Albert spent the night of 18 Aug. 1843 on board the royal yacht.—The sea-loch, extending 4½ miles north-westward, opens into the upper part of the Sound of Jura, adjacent to the mouth of Loch Craignish; and leads the way, round Craignish Point, to the passage, between Scarba and Luig islands, to the Firth of Lorn. Its head is narrow and tame; but most of its north-eastern side is rich in interesting features; and its mouth, 3 miles wide, between Craignish and Ardmore Points, with a group of islets in its own waters, and with the northern extremity of Jura in front, is strikingly picturesque.—The canal goes from the middle of the W side of Loch Gilp, 9 miles west-north-westward, to Loch Crinan, in the vicinity of Crinan village, and enables vessels of 200 tons burden, from the upper Firth of Clyde to the Firth of Lorn, to avoid the difficult and circuitous passage of 70 miles round the Mull of Kintyre. Projected by Sir John Reunie in 1793, at an estimated cost of £63,678, it was opened in 1801 at an actual cost of £141,810; and even then other loans had to be obtained, which by 1814 had burdened the Company with a debt of £67,810. It is cut chiefly through chlorite schist, traversed by trap dykes, and showing indications of great geognostic disturbance; and has eight locks between Loch Gilp and the summit-level (59 feet), and seven between that and Loch Crinan, thirteen of these locks being each 96 feet long and 24 wide, and the other two 108 feet long and 27 wide. The average depth of water is only 10 feet, the canal being fed by reservoirs on the hill above, whose bureting (2d Feb. 1859) washed away part of the banks and choked the chauce for upwards of a mile with *débris*. The repairs took a sum of £16,000, which was disbursed

by Government. The canal is used chiefly by small coasting and fishing vessels, by goods steamboats plying between the Clyde and Inverness, and by an elegant, roomy, and well-appointed steamboat conveying passengers between large steamers at Ardrishaig and Port-Crinan. Since 1818 the canal has been managed by the Commissioners of the Caledonian Canal. Its revenues arising from the tolls have, on the average, been barely sufficient to cover the current expenses of maintenance and repair.

Cringletie, an estate, with a mansion, in Eddleston parish, Peeblesshire, 3 miles NNW of Peebles. The mansion, standing on a finely-wooded plateau, to the right of Eddleston Water, was rebuilt in 1863 in the old Scotch manor-house style, and contains some fine family portraits by Gainsborough, Raeburn, and others. For more than two centuries it has been the seat of a branch of the Murrays, which has produced a gallant soldier and an eminent judge—Col. Alex. Murray (d. 1762), and Jas. Wolfe Murray, Lord Cringletie (1760-1836).

Crocach. See CROKACH.

Crocketford, a village on the mutual border of Urr and Kilpatrick-Durham parishes, Kirkcudbrightshire, near Achenreoch and Milton Lochs, 9 miles WSW of Dumfries. Founded by the Buchanites in 1737, it has a post office under Dumfries, and a public school; near it is Crocketford House.

Croce, a clear-flowing river of Glenshiel parish, SW Ross-shire, formed by two head-streams at an altitude of 180 feet above sea-level, and running $5\frac{1}{2}$ miles west-north-westward—latterly along the Kintail border—to the head of Loch Duich. It abounds in salmon and sea-trout, but is preserved.—*Ord. Sur.*, sh. 72, 1880.

Croftanrigh. See DALRY.

Crothead. See NEILSTON.

Crothead, a large mineral village in Whitburn parish, SW Linlithgowshire, $3\frac{1}{2}$ miles S by W of Whitburn village, and $1\frac{1}{2}$ mile ENE of Crothead station on the Morningside section of the North British, this being $6\frac{1}{2}$ miles SSW of Bathgate. It has itself a Free church and a public school; and it practically forms one with Fauldhouse and Greenburn villages, lying 1 mile WSW and $\frac{2}{3}$ mile SW. See FAULDHOUSE.

Croftinloan, an estate, with a mansion, in Logierait parish, Perthshire, near the left bank of the Tay, 2 miles SE of Pitlochrie.

Croftmartaig, a hamlet adjoining the village of ACHARN.

Croftness, a hamlet, with a public school, in Glenlivet *quoad sacra* parish, Banffshire.

Crofts. See CROSSMICHAEL.

Crogo, a hamlet in the SE of Balmaclean parish, NE Kirkcudbrightshire, $1\frac{1}{2}$ mile NNW of Corsock.

Croick, a *quoad sacra* parish in Kincardine parish, Ross-shire, whose church (1827), manse, and school stand in the Black Water's sequestered valley, 10 miles W of its station and post-town, Ardgay. It is in the presbytery of Tain and syuod of Ross; the minister's stipend is £160, with a manse and a glebe. Pop. (1891) 192.—*Ord. Sur.*, sh. 102, 1881. See KINCARDINE.

Crokach, a loch in Assynt parish, Sutherland, 3 miles N of Lochinver. Lying 380 feet above sea-level, it is $1\frac{1}{2}$ mile long, and from $\frac{1}{2}$ furlong to 3 furlongs wide; is studded with thirteen islets; and contains fine, well-shaped trout.

Crokach, a loch in the SW corner of Reay parish, Sutherland, $5\frac{1}{2}$ miles W by N of Forsinard station. Lying 950 feet above sea-level, it contains two islets, and presents an irregular outline, with utmost length and breadth of $5\frac{1}{2}$ and 4 furlongs.

Crolin. See CROULIN.

Crom, a loch on the mutual border of Fodderty and Kincardine parishes, Ross-shire, $7\frac{1}{2}$ miles NW of the head of Loch Glass. Lying 1720 feet above sea-level, it has an utmost length and breadth of $\frac{2}{3}$ mile and $3\frac{1}{2}$ furlongs, and communicates with the river Carron.

Cromack. See CRAMMAG.

Cromal or Cromwell's Mount, a circular elevation in Andersier parish, NE Inverness-shire, on the ridge of hill

behind Campbeltown. It rises about 20 feet above the adjacent level of the ridge; is crowned by an ancient Caledonian fort, with a rampart 5 feet high and 360 feet in circumference; and commands a very extensive view, including parts of seven or eight counties.

Cromar, a sub-district of Aberdeenshire, on the N side of the middle reach of the river Dee. It comprehends the parishes of Coull, Tarland, and Logie-Coldstone, and a small part of Glenmuick.

Cromarty, a parish and the head town of CROMARTY DISTRICT in the united county of Ross and Cromarty. A seaport and parliamentary burgh, the town lies low on the southern shore of the Cromarty Firth, 2 miles W by S of its Sutor-guarded entrance, $4\frac{1}{2}$ miles E by S of Invergordon by water and 8 by the shore-road and Invergordon ferry, $11\frac{1}{2}$ SSE of Tain, 9 NNE of Fortrose, and $19\frac{1}{2}$ NNE of Inverness. For more than three centuries the sea has been steadily gaining on its site, so that where the old burgh stood is covered deep by each returning tide; but at a remote period the sea came higher up than now, and its ancient margin is marked by an eminence that, rising abruptly from the level to a height of 100 feet, next forms a tableland, and thence sweeps gently upward to the Southern Sutor. On the said eminence, right above the town, stood the old castle of the Urquharts, a massy, time-worn building, battlemented, stone-roofed, and six stories high. It was razed to the ground in 1772, and its place is occupied by Cromarty House; hard by, a column, 40 feet high, is surmounted by Handyside Ritchie's life-size statue (1859) of Cromarty's most celebrated son, the stonemason geologist and author, Hugh Miller (1802-56). Even before his day the antique gabled-houses of 'Old Cromarty' had mostly disappeared; but their successors have in turn grown old, and the whole place presents an appearance of picturesque decay and desolation, 19 out of its 279 domiciles standing untenanted in 1891. The Bay of Cromarty forms one of the finest natural harbours in the world, and during the winter storms ship after ship comes pressing into it for shelter. Thither they are guided by a lighthouse, whose fixed red light is visible for 13 nautical miles, and which was built on the Point in 1846 at a cost of £3203. From a commodious quay, constructed in 1785, and repaired and extended in 1880, goods valued at £25,000 were shipped to London in 1807. But by the railway the commerce of Easter Ross has been diverted to Invergordon; and fishing and fish-curing are now the only industries of Cromarty. It still is head of the fishery district between Findhorn and Helmsdale Loch, in which during 1894 there were cured 2253 barrels of white herrings, not to mention cod, ling, and hake,—taken by 286 boats; the persons employed being 998 fishermen and boys, 3 fishcurers, 11 coopers, and some 155 others, and the total value of boats, nets, and lines being estimated at £33,528. A brewery, a hemp and cloth factory, and one or two timber-yards have all been closed; two fairs have become extinct; but a weekly market is held, in name at least, on Tuesday. There are three churches—the 16th century parish church, described as 'a true Presbyterian edifice'; an Established Gaelic church, built about 1785; and a Free church: and Cromarty has besides a post office, with money order, savings bank, and telegraph departments, branches of the Caledonian and Commercial Banks, hotels, a neat town-hall (1782) with cupola and clock, a masonic lodge, and a geological museum (Hugh Miller's house). A royal burgh once, it was reduced in 1672 to the rank of a burgh of barony, but by the Reform Act of 1833 unites with the other five Wick burghs in returning a member to Parliament; and, having adopted the General Police and Improvement Act of 1862, is governed by a provost, 2 bailies and 6 councillors, who act also as police commissioners. Its parliamentary constituency numbered 150, and its municipal constituency 178, in 1891, when its valuation amounted to £1936. Pop. (1861) 1491, (1871) 1476, (1881) 1338, (1891) 1360.

The parish, forming the north-eastern extremity of the Black Isle peninsula, is bounded N. by Cromarty

Firth, SE by the Moray Firth and Rosemarkie, SW by Rosemarkie, and W by Resolis. Its utmost length, from NE to SW, is $7\frac{3}{4}$ miles; its width, from NW to SE, varies between $1\frac{1}{2}$ and $2\frac{1}{2}$ miles; and its area is 8017 acres. The coast-line, $9\frac{1}{2}$ miles long, presents for 3 miles to the Moray Firth a huge brown wall of beetling precipice, rising to 225 feet near M'Farquhar's Bed, and 463 at the Southern Sutor, whose highest knoll is termed the Gallow Hill, from its having been the place of execution. The northern shore, on the other hand, all along Cromarty Bay, is fringed by the level strip already noticed, behind which the green bank slopes upwards to a height in places of 100 feet; further inland the surface ascends to the broad ARDMEANACH ridge, attaining 241 feet near Newton, 477 near Bannan, and 548 near Glenurquhart. The Sutor, or 'Hill of Cromarty,' to quote Hugh Miller, 'is one of a chain belonging to the great Ben Nevis line of elevation; and, though it occurs in an Old Red sandstone district, is itself a huge primary mass, upheaved of old from the abyss, and composed chiefly of granitic gneiss and a red splintery hornstone. It contains also numerous veins and beds of hornblende rock and chlorite schist, and of a peculiar-looking granite, of which the quartz is white as milk, and the felspar red as blood.' In the cliff are two lines of caves—one hollowed by the waves long centuries ago, and another that the surf is still busy scooping out. Many of the former—as the Dooocot or Pigeon Caves, and the inferior though better-known Dropping Cave—are lined with stalactites, deposited by springs that, filtering through the cracks and fissures of the gneiss, find time enough in their passage to acquire what is known as a petrifying, though, in reality, only an incrusting quality.' Garnets are plentiful along the shore, where, too, are the Clach Malloch or Cursed Stone, an enormous granitic boulder, and five vast natural archways in the rocks. But for full exposition of Cromarty's sermons in stones the reader himself must turn to Hugh Miller's *Scenes and Legends of the North of Scotland* (1835) and *My Schools and Schoolmasters* (1854), which further record its memories of Macbeth, Thane of Cromarty; of Wallace's fabled defeat of the English, $4\frac{3}{4}$ miles SW of the town; of the Chaplain's Lair; of the Black Years (1694-1701); of the Meal Mob (1741), etc. Towards the close of the 13th century one William Urquhart of Cromarty was heritable sheriff of the county; among his descendants was the all-but admirable Sir Thomas Urquhart (1613-60), translator of Rabelais, and author of 128 $\frac{1}{2}$ folio quires of MS., wherein he discussed as many or more original inventions. That wily statesman, Sir Geo. Mackenzie of Tarbat (1630-1714), was created Viscount Tarbat in 1685 and Earl of Cromartie in 1703. His second son, Kenneth, who became a baronet in 1704, obtained the extensive estate of Cromarty; but his eldest son, Sir Geo. Mackenzie, member for the shire, was driven by bankruptcy to sell it in 1741 to William Urquhart of MELDRUM. Five years later the earldom was attained in the person of George, third Earl, for his part in the '45; nor was it revived till 1861, and then in favour of his fourth descendant, Anne Hay-Mackenzie, Duchess of Sutherland, with limitation to her second son, Francis, Viscount Tarbat, who succeeded to it on the death of the Duchess in 1838. The largest proprietor in the parish is Capt. Walter C. Ross, of Cromarty House, whose estate extends over 7946 acres. The soil is principally loam, but clay abounds in some parts, and moorish soil in others; and the rent of an acre ranges from 10s. to 60s. The moorish land reclaimed at a cost of £20 per acre was previously under wood; on the other hand, all the available waste has been planted (pp. 107-111 of *Trans. Highl. and Ag. Soc.*, 1877). Cromarty is in the presbytery of Chanonry and synod of Ross; the living is worth £278. Prior to the Reformation there were six chapels within its bounds, three of which were dedicated to SS. Duthac, Bennet, and Regulus; but scarcely a vestige remains of any one of them; whilst a Red or Trinitarian priory, founded about 1271, has vanished utterly. In 1875-76 two new board schools were built at a cost of £6000 in the town and at Peddieston, $4\frac{1}{2}$

miles to the SW. With respective accommodation for 420 and 123 children, these had (1891) an average attendance of 308 and 78, and grants of £363, 18s. 6d. and £94, 9s. Pop. (1801) 2413, (1831) 2901, (1841) 2662, (1861) 2300, (1871) 2180, (1881) 2009, (1891) 2007.—*Ord. Sur.*, sh. 94, 1878. See P. Bayne's *Life of Hugh Miller* (2 vols., 1871), and Sir W. Fraser's *Earls of Cromartie: their Kindred, Country, and Correspondence* (2 vols., 1876).

Cromarty Bay, a southward expansion of Cromarty Firth, $4\frac{3}{4}$ miles wide across a chord drawn west-by-southward from Cromarty to Newhall point, the distance from that chord to the inmost recess of the shore being $1\frac{1}{2}$ mile. Its sandy south-western corner, offering at low-water a broad expanse of foreshore, is known as Udale Bay.

Cromarty District, one of the four districts into which, for the better and more expeditious administration of justice, the united county of Ross and Cromarty is divided—namely, Wester, Easter, Cromarty, and Lewis districts, at the head of which are respectively the towns of Dingwall, Tain, Cromarty, and Stornoway, each having a sheriff court.

Cromarty Firth, the estuary of the river CONAN, in Ross and Cromarty, commencing between Maryburgh and Dingwall, $5\frac{1}{2}$ miles N of the head of Beaully Firth, and thence extending $19\frac{3}{4}$ north-eastward and eastward to the Moray Firth, where its entrance, 7 furlongs broad, is guarded by the North and South Sutors, 400 and 463 feet high. Its width is $1\frac{3}{4}$ mile near Kinnaird House, $1\frac{1}{2}$ at Kiltearn manse, 1 at Balconie Point, $1\frac{1}{2}$ at Alness Bay, $\frac{3}{4}$ at Invergordon, and $7\frac{3}{4}$ miles from the head of Udale Bay north-eastward to the head of Nigg Bay; but that of its channel nowhere exceeds 9 furlongs above Invergordon. On its right lie the parishes of Urquhart, Resolis, and Cromarty, on its left of Dingwall, Kiltearn, Alness, Rosskeen, Kilmuir Easter, Logie Easter, and Nigg; and it receives the Peffery, Ault-grande, and Alness rivers on its left side, which is closely followed by the Highland railway. Again we must turn to Hugh Miller for a description of the broad and deep lowest reach, as viewed from the Moray Firth in a clear morning of summer:—'The foreground is occupied by a gigantic wall of brown precipices, beetling for many miles over the edge of the firth, and crested by dark thickets of furze and pine. A multitude of shapeless crags lie scattered along the base, and we hear the noise of the waves breaking against them, and see the reflected gleam of the foam flashing at intervals into the darker recesses of the rock. The waters find entrance, as described by Buchanan, through a natural postern scooped out of the middle of this immense wall. The huge projections of cliff on either hand, with their alternate masses of light and shadow, remind us of the out-jets and buttresses of an ancient fortress; and the two Sutors, towering over the opening, of turrets built to command a gateway. The scenery within is of a softer and more gentle character. We see hanging woods, sloping promontories, a little quiet town, and an undulating line of blue mountains, swelling as they retire into a bolder outline and a loftier altitude, until they terminate, some 20 miles away, in snow-streaked, cloud-capped Ben Wyvis.'—*Ord. Sur.*, shs. 83, 93, 94, 1871-78.

Cromartyshire, a former independent county, interlaced with Ross-shire, in the N of Scotland. It comprehended an ancient sheriffdom, hereditary in the family of Urquhart of Cromarty, and detached districts annexed in the latter part of the 17th century, at the instance of Viscount Tarbat, afterwards Earl of Cromartie. The result of the Local Government (Scotland) Act, 1889 (Section 39), by which the counties of Ross and Cromarty are 'united for all purposes whatsoever under the name of the county of Ross and Cromarty,' is to dispose of the various scattered portions of the old county of Cromarty by placing them entirely in the new county of Ross and Cromarty. The ancient sheriffdom, or old shire, comprised Cromarty parish, the greater part of Resolis parish, and an undefined portion of the Mull-bu; and was usually stated to have a length of about

16 miles, a breadth of about $6\frac{1}{2}$ or 7 miles, and an area of about 39,690 acres. The detached districts were—a district surrounding Tarbat House, on the NE seaboard of Cromarty Firth; a district commencing on the Dornoch Firth a little E of Tain, and extending eastward to the Moray Firth in the vicinity of Geanis; two small tracts in Kincardine parish, adjacent to the river Carron; a district extending west-north-westward from the vicinity of Dingwall, and including Castle-Leod and part of Ben Wyvis; two tracts on the N of respectively Loch Fannich and Loch Nid; a tract along the S side of the middle and upper parts of Little Loch Broom; the large district of Coigach, lying between Loch Broom and Sutherland, and extending to Loch Enard and Rhu More promontory; and the Summer islands, lying in the N side of the mouth of Loch Broom. These eight were estimated to measure aggregately about 344 square miles, or 220,586 acres. The ancient valuation of the property was £12,896; but the modern valuation of the property, and all the other modern statistics, are merged into those of the united county. For the alterations effected by the Boundary Commissioners in the county and parish boundaries see ROSS AND CROMARTY. As to its fiscal affairs, its parliamentary representation, and even its parochial distribution and its territorial character, with the exception only of Cromarty parish, it was always practically treated as simply a component part of Ross-shire.

Crombie, a small village and an ancient parish in the SW extremity of Fife. The village stands $1\frac{1}{2}$ mile S of Cairneyhill, and $3\frac{1}{2}$ miles SW of Dunfermline. The parish is now incorporated with Torryburn, comprising that part of it to the S of the Burn of Torry, and also certain detached lands, which, distant $7\frac{1}{2}$ miles, are annexed *quoad sacra* to Saline. Its church stood on a commanding site, overlooking the Firth of Forth, and is now represented by some ruins.

Crombie, a burn in Kingoldrum parish, Forfarshire. It rises 2 miles N of Kingoldrum village; runs past that village; describes a semicircle towards the E; proceeds $1\frac{1}{2}$ mile west-south-westward; and falls into the river Melgum.

Crombie, a burn in the S of Inveraven parish, Banffshire, rising close to the Aberdeenshire border, at 2400 feet above sea-level, and running $7\frac{1}{2}$ miles north-north-westward to Livet Water at Tombae.

Crombie, a burn and an old castle in Marnoch parish, Banffshire. The burn, rising near Ordiqhull border, runs 3 miles southward to the Deveron at Marnoch manse; and the castle stands on the right side of the burn, $1\frac{1}{2}$ mile N of the said manse. Supposed to be very ancient, and looking to have been a place of some strength, it now consists of three stories, but formerly was much higher; and belongs now to the Countess-Dowager of Seafield.

Crombie Point, a small headland, a small harbour, and a hamlet in Torryburn parish, SW Fife, on the Firth of Forth, $1\frac{1}{2}$ mile SE of Torryburn village, and $1\frac{1}{2}$ W by N of Charlestown.

Cromdale, a parish, chiefly in Elginshire, but partly also in Inverness-shire until 1891, when the Boundary Commissioners placed it entirely in one county by restricting its area to that of the Elginshire portion—the Inverness-shire portion being transferred to the Inverness-shire parish of Duthil and Rothiemurchus. On the right bank of the Spey is Cromdale station on the Strathapey section of the Great North of Scotland, 3 miles NE of Grantown station and 21 SW of Craigellachie Junction; near it are a post office, a public school (1877), the parish church (1809; 900 sittings), and a wire suspension foot bridge (1881) over the Spey, 195 feet in span.

The parish, till 1870 mainly in Inverness-shire, contains also the town of GRANTOWN; the station of Dava, at the NW border, $8\frac{1}{2}$ miles NNW of Grantown; the station of ADVIE; and the station of Broomhill, $3\frac{1}{2}$ miles SSW of Grantown. It is bounded NW by Edinkillie; NE by Knockando; E by Inveraven, and SE by Kirkmichael, in Banffshire; S and SW by the former Inverness-shire portion; and W by Ardclach, in Nairn-

shire. The SPEY winds $20\frac{1}{2}$ miles north-eastward along the border and through the interior, descending in this course from about 680 to 480 feet above sea-level; and the DIVIE and DORBOCK, feeders of the Findhorn, rise in the NW corner of the parish, the Dorbock issuing from LOCHINDORB, which, $2\frac{1}{2}$ miles long and from $1\frac{1}{2}$ to 5 furlongs broad, lies at an altitude of 769 feet on the Edinkillie boundary. To the S of it lie Loch an t-Sithein ($2\frac{3}{4} \times 1$ furl.), Lochan Dubh ($1 \times \frac{1}{2}$ furl.), and Loch Ruigh a' Bhuair (2×1 furl.) Chief elevations to the left or W of the Spey, from NE to SW, are Gallow Hill (1210 feet), Geal Charn (1487), Carn na h-Eige (1673), Larig Hill (1783), Creag a' Bharrain (1824), Carn an Loin (1798), Carn na Doire (1294), Carn Bad na Caorach (1557), Craig Tiribeg (1586), and Beinn Mhor (1545); whilst to the right, on the Banffshire and Inverness-shire border, rise Tom a' Chait (1646 feet), Creag an Tarmachain (2121), Carn Eachie (2329), and Tom Biath (1163), these latter belonging to the heathy Cromdale Hills. Granite is a predominant rock; and limestone of prime quality abounds in places, and has been largely worked for both building and manure. The soil of the haughs along the Spey is very fertile; that of the other arable lands is generally thin and dry. Barely a tenth of the entire area is under the plough, and woods and plantations cover at least as much, the country round Grantown, and indeed the whole strath of the Spey, being finely adorned with trees. On May 1, 1690, the war in Scotland between James VII. and William of Orange was virtually ended by the affair of the Haughs of Cromdale, when, at a spot $2\frac{1}{2}$ miles E by S of Cromdale station, the dragoons of Sir Thomas Livingstone surprised Buchan's sleeping Highlanders, 800 in number, slaying more than 300, and taking 100 prisoners. The ruined castle of Muckerach is separately noticed, as likewise is Castle-Grant, whose owner, the Countess-Dowager of Seafield, is almost the sole proprietor. In the presbytery of Abernethy and synod of Moray, Cromdale comprises the ancient parishes of Inverallan and Advie, and is now divided into the *quoad sacra* parishes of Inverallan and Cromdale, the latter being worth £350, with manse and glebe. Besides the school in Grantown, four public schools—Achanarrow, Advie, Cromdale, and Dava—with respective accommodation for 70, 90, 100, and 50 children, had (1891) an average attendance of 27, 33, 70, and 18, and grants of £42, 7s. 6d., £46, 19s. 6d., £75, 1s., and £30, 13s. 6d. Valuation, £13,554, 2s., of which £1627, 18s. was in the Inverness-shire section. Pop. (1801) 2187, (1831) 3234, (1861) 3943, (1871) 3817, (1881) 3642, (1891) 3463, of whom 659 were in Cromdale *quoad sacra* parish; of the registration district of Cromdale and Advie, 1016.—*Ord. Sur.*, sh. 74, 75, 84, 85, 1876-77.

Cromlix, a barony in Dunblane parish, Perthshire, around Dunblane town. Cromlix Cottage, 4 miles N of Dunblane, is a seat of the Hon. Arthur Hay Drummond, the tenth Earl of Kinnoull's third son (b. 1833; suc. 1866), who owns 7465 acres in the shire, valued at £4240 per annum. The mineral wells of Cromlix are noticed in connection with DUNBLANE Hydropathic Establishment.

Cromwell Park, a village, with bleach-works, in Redgorton parish, Perthshire, on the left bank of the Almond, $1\frac{1}{2}$ mile NW of Almondbank.

Cromwell's Fort. See AYR and INVERNESS.

Cromwell's Mount. See BROXMOUTH.

Crona, two small flat islets of Assynt parish, Sutherland, 5 furlongs SW of Oldany island.

Cronberry, a village of recent origin in Auchinleck parish, Ayrshire, 2 miles NE by N of Lugar. It owes its origin to iron-works of the Eglinton Iron Co., and has a school and a railway station. Pop. (1871) 997, (1881) 799, (1891) 632.

Crook or **Creuch**, a summit (1446 feet) on the western border of Kilmalcolm parish, Renfrewshire, $\frac{3}{4}$ mile from the Ayrshire border, and 5 miles S by W of Greenock.

Crook, a place in the N border of St Ninians parish, Stirlingshire, on the Bannock rivulet, $1\frac{1}{2}$ mile ESE of Stirling. Miss Elizabeth Hamilton (1758-1816) resided at it whilst writing her *Cottagers of Glenburnie*.

Crook, an inn on the mutual border of Tweedsmuir and Drummelzier parishes, S Peeblesshire, standing 746 feet above sea-level, near the left bank of the Tweed, 1½ mile NNE of Tweedsmuir church and 12 miles SSE of Biggar, under which it has a post office. A well-known hothery in the old coaching days, it now is only a resort of anglers for the head-waters of the Tweed. Nether Oliver Dod (1673 feet) culminates ¾ mile to the WSW.

Crook, Forfarshire. See CRUICK.

Crookedholm, a suburb (in Kilmarnock parish) of Hurlford, in Riccarton parish, Ayrshire, on the right bank of the Irvine, 1½ mile ESE of Kilmarnock town, and ¾ mile N of Hurlford Junction. At it are a public school and a worsted spinning-mill, in connection with carpet factories in Kilmarnock. Pop. (1891) 568.

Crook of Alves, a hamlet in Alves parish, Elginshire, 3½ furlongs N of Alves station.

Crook of Devon, a small old village in Fossoy and Tulliebole parish, Kinross-shire, on the left bank of the Devon, at its sharp westward bend or crook, with a station on the Devon Valley section of the North British, 1½ mile ENE of Rumbling-Bridge, and 6 miles WSW of Kinross. It is a burgh of barony.

Crookston, an estate, with a ruined castle, on the E border of Abbey parish, Renfrewshire. The estate belonged in the 12th century to Robert de Croc, a gentleman of Norman ancestry, and passing by marriage in the 13th to the illustrious family of Stewart, was then united to the estates of Darnley, Neilston, Inchinnan, and Tarbolton. It was held by Henry, Lord Darnley (1546-67), who became the husband of Queen Mary; and in 1572 was granted to his younger brother Charles Stewart, fifth Earl of Lennox. Afterwards it passed through many hands to the Duke of Montrose, and was purchased from the second Duke in 1757 by Sir John Maxwell of Pollok. The castle stands on the summit of a wooded slope, overhanging the left bank of Levern Water, 3 furlongs above its influx to the White Cart, and ¾ miles ESE of Paisley. Once a massive edifice, with centre, two lofty towers, and battlemented wings, surrounded by a rampart and a moat, it now consists of only one shattered tower, 50 feet high. John Wilson, Tannahill, Mortherwell, Burns, and many anonymous poets have celebrated Crookston in verse; and most persons, though on little better authority than loose tradition, believe that it, not Wemyss, was the scene of Lord Darnley's betrothal to Queen Mary in 1565; at any rate, here they spent the days immediately after their marriage. A stately yew, known as 'the Crookston Tree,' stood a little to the E, which popularly regarded as having been a favourite haunt of the royal lovers, became eventually blasted and leafless, less from natural decay than in consequence of being hacked and hewn by relic-hunters for pieces to be converted into snuff-boxes and small ornamental articles, till it was eventually rooted up by Sir John Maxwell in 1817. An interesting memento of the tree is to be seen in Pollok House, in the form of a complete model of the castle made from small square blocks of the yew wood, every stone in the ruin being represented with astonishing minuteness. Common tradition, too, asserts that Queen Mary from Crookston Castle viewed the battle of Langside,—a tradition adopted by Wilson in his poem of the *Clyde*, and by Sir Walter Scott, both in his novel of *The Abbot* and in his *History of Scotland*; but the castle is 2½ miles W by N of the battlefield, is completely hid from it by intervening heights, and, moreover, was in the rear, not of the Queen's army, but of the enemy.—*Ord. Sur.*, sh. 30, 1866.

Crookston, an estate in Borthwick and Stow parishes, Edinburghshire. Its mansion, in the NE of Stow, stands on the left bank of Gala Water, 1½ mile N of Fountainhall station, and is the seat of John Borthwick, Esq. (b. 1825; suc. 1846), who holds 9723 acres in Edinburgh and Berwick shires, valued at £5851 per annum. See BORTHWICK.

Crook, a loch (1¼ × ¾ furl.) in Kirkmiehael parish, Ayrshire, near Barnshean Loch, and 3¼ miles NE of Kirkmiehael village.

Crosbol. See CRASPUL.

Cross. See LUCE.

Cross. See BARVAS, Lewis.

Crossall, a small eminence in Dalmeny parish, Linlithgowshire, 1½ mile ESE of Queensferry. It is surmounted by remains of an ancient stone cross, and, in pre-Reformation times, was a station of devotees on pilgrimage to Dunfermline.

Cross and Burness, a united parish in the N of Orkney, comprising the south-western and north-western limbs of Sanday island, and also, in its *quoad civilia* estate, the island of North Ronaldshay. It contains a post office of the name of Sanday, with money order, savings bank, and telegraph departments under Kirkwall; and, bordered on the E for 1½ mile by Lady parish, is on all other sides surrounded by the sea. Cross, the south-western section, terminates in a dismal moor of 200 acres, separating it from BURNESS. Well sheltered by Eday from westerly winds, it presents a diversified surface, which rises at two points to more than 160 feet above sea-level, and breaks down at one of its heights, in a coast precipice perforated by curious caverns; a considerable lake is occasionally visited by flocks of wild swans. Burness, separated on the E from the greater part of Lady parish by Otterswick Bay, has flat shores and a verdant fertile surface. The rocks are sandstone, sandstone flag, and a little limestone. The neighbouring sea-waters produce enormous quantities of shell-fish. This parish is in the presbytery of North Isles and synod of Orkney; the living is worth £308. There are two parish churches, Cross, with 248 sittings, and Burness with 262. In May, 1880, in making excavations for the foundations of an addition to the manse, it was discovered that the old building, lately demolished, had been standing on the ruins of an ancient broch. For schools and population see SANDAY.

Crossbasket, an estate, with a mansion, in the NE corner of East Kilbride parish, Lanarkshire, ¾ mile W by S of High Blantyre station.

Crossbost, a hamlet in Lochs parish, Lewis island, Outer Hebrides, Ross-shire, on the northern shore of salt-water Loch Luirbost, 9 miles SSW of Stornoway, under which it has a post office. Near it are a Free church and Luirbost public school. Pop. (1891) 349.

Crossfield Hill. See UNST.

Crossford, a village in the N of Lesmahagow parish, Lanarkshire, near the left bank of the Clyde, immediately above the Nethan's influx, 4½ miles NW by W of Lanark. Under Carluke it has a post office, with money order, savings bank, and telegraph departments. At it are Free and U.P. churches; and near it are the ruins of CRAIGNETHAN. 'In 1686,' says honest Patrick Walker, 'many people gathered together about Crossford, where there were showers of bonnets, hats, guns, and swords, which covered the trees and ground; companies of men in arms marching along the water side; companies meeting companies all through other, and then all falling to the ground, and disappearing, and other companies appearing the same way. I went there three afternoons together, and, as I could observe, there were two of the people that were together saw, and a third that saw not; and though I could see nothing, yet there was such a fright and trembling upon those that did see, that was discernible to all from those that saw not,' etc. (Chambers's *Domestic Annals*, ii. 485). Pop. (1841) 431, (1861) 530, (1871) 543, (1881) 816, (1891) 918.—*Ord. Sur.*, sh. 23, 1865.

Crossford, a village, with a public school, 1½ mile WSW of Dunfermline, under which it has a post office.

Crossford. See GLENCAIRN, Dumfriesshire.

Crossgatehall, a hamlet in Inveresk parish, Edinburghshire, 2 miles SSE of Inveresk station.

Crossgates, a village on the mutual border of Dunfermline and Dalgety parishes, Fife, with a station on the North British railway, 8½ miles ENE of Dunfermline. Inhabited chiefly by colliers, it is surrounded at near distances by extensive coal mines; adjoins lines of mineral railway, communicating with St David's harbour on Inverkeithing Bay; and has a post office, with

money order, savings bank, and telegraph departments, 2 hotels, a U.P. church (1802; 531 sittings), and a public school, which, with accommodation for 342 children, had (1891) an average attendance of 218, and a grant of £189, 0s. 6d. Pop. (1841) 646, (1861) 1115, (1871) 1181, (1881) 1057, (1891) 1165.

Crossgates, a hamlet on the W border of Cults parish, Fife, 3 furlongs SW of Pitlessie.

Crossgelloch, a wild mossy moor in Carsphairn parish, N Kirkcudbrightshire. Three Covenanters, plain country men, when returning from a conventicle in the vicinity, in the winter of 1684, were met here by Claverhouse and a party of his men, and were summarily shot. Their bodies were buried on the moor; and, at a recent period, were found embalmed in the moss, 'shrouded in their hosen, in their coats, and in their bonnets, exactly as they fell.'

Crossgills, a hamlet in Ruthwell parish, S Dumfriesshire, 3 furlongs NW of Ruthwell station.

Crosshall, a colliery village in the SW of Polmont parish, Stirlingshire, 2½ miles SSE of Falkirk.

Crosshall, an ancient monument in Eccles parish, Berwickshire, 1 mile N of Eccles village. It comprises a monolithic sandstone pedestal, 9 feet square and 2½ high, and a monolithic sandstone column, rising fully 10 feet from the pedestal, through which it passes deep into the ground, and carved in its N and S faces with curious sculptures. It is thought by some antiquaries to have been raised to the memory of a Percy of Northumberland, by others to have been erected after the second crusade, in the latter half of the 12th century, to the memory of the father of Sir John de Soules. The place where it stands was formerly called Deadriggs, and is traditionally said to have been the scene of a bloody battle.

Crosshands, a village, with a public school, in Mauchline parish, Ayrshire, 2 miles NNW of Mauchline village.

Crosshill, a village in Kirkmichael parish, Ayrshire, and a *quoad sacra* parish partly also in Kirkoswald and Maybole parishes. The village stands on the left bank of Girvan Water, 3 miles SE of Maybole, and 2¾ NE of Kilkerran station. Chiefly consisting of a long regular street of one-story houses, running at right angles from the river, it has a post office under Maybole, with money order and savings bank departments, a principal inn, an Established church (1838), a Free church, and a school. The *quoad sacra* parish, constituted in 1853, is in the presbytery of Ayr and synod of Glasgow and Ayr; its two public schools, Crosshill and Kilkerran Hillside, with respective accommodation for 275 and 82 children, had (1891) an average attendance of 180 and 45, and grants of £190, 7s. and £43, 3s. Pop. of village (1841) 1163, (1861) 1107, (1871) 835, (1881) 740, (1891) 716; of *q. s.* parish (1871) 1372, (1881) 1284, (1891) 1178, of whom 970 were in Kirkmichael.—*Ord. Sur.*, sh. 14, 1863.

Crosshill. See GLASGOW.

Crosshill. See STRATHAVEN.

Crosshouse, a village in Kilmarnock parish, Ayrshire, on Carmel Water, 2½ miles W of Kilmarnock, and 1 mile SSW of Crosshouse station. At it is the handsome Established church (1882; 450 sittings) of a *quoad sacra* parish, formed out of Kilmarnock and Dreghorn, a public school, and a post office under Kilmarnock. Coal has long been wrought in the vicinity, and ironstone during the last 12 or 13 years. Pop. of village (1861) 468, (1871) 713, (1881) 740, (1891) 846; of *q. s.* parish (1881) 2424, (1891) 2772.

Crosshouses, a hamlet in Kettle parish, Fife, 2 miles SE by E of Kettle village.

Cross Isle, a small island in Dunrossness parish, Shetland, off the mouth of Quendal Bay, 3½ miles WNW of Sunburgh Head.

Crosskirk, a place on the SW coast of Westray Island, Orkney, distant 1 mile from Westray manse. A pre-Reformation church here was used by Presbyterians till about 1776, and then became ruinous; its ancient burying-ground is still in use.

Crosslee, a hamlet in Stow parish, Edinburghshire,

on the south-eastern verge of the county, near Gala Water and Bowland station, 3 miles S of Stow village, under which it has a post office.

Crosslee, a village in Houston parish, Renfrewshire, on the left bank of the Gryfe, 2½ miles NW of Johnstone station. A cotton mill, built here in 1793, was burned down about 1853; and the villagers were afterwards mainly employed in the neighbouring oil-works of Clippens, now, however, closed. Pop. (1881) 406, (1891) 379.

Crossmichael, a village and a parish of central Kirkcudbrightshire. The village, pleasantly seated on the left bank of the lake-like Dee, with a station upon the Glasgow and South-Western, 3¾ miles NW of Castle-Douglas, has an inn and a post office; but its cross, St Michael's, round which was held a Michaelmas fair, has long since disappeared.

Containing also Clarebrand hamlet and a north-western outskirt of Castle-Douglas, the parish is bounded NE by Kirkpatrick-Durham and Urr, SE by Buittle, S by Kelton, SW by Balmaghie, and NW by Parton. Its utmost length, from NW to SE, is 5½ miles; its breadth, from NE to SW, varies between 2¾ to 4½ miles; and its area is 10,148½ acres, of which 220½ are water. The DEE winds 4½ miles south-south-eastward along all the boundary with Balmaghie, URR Water 4½ along that with Kirkpatrick-Durham and Urr; and in the interior are Lochs Culgruft (2 × 1 furl.), Ernerogo (3 × 1½), Roan (8½ × 2¾), and Smaddy (1 × ¾), with three or four tinier lakelets. The surface, which sinks along the Dee to less than 200, and along Urr Water to less than 100 feet above sea-level, has a general north-north-westerly rise, being studded by a number of low eminences, and culminating at 711 feet on the western shore of Loch Roan. The rocks are chiefly Silurian; and the soils of the arable lands, along the streams and among the hills, which in places are cultivated up to the top, are extremely various, including fine alluvium and rich loam, with some tilly clay, but chiefly presenting a sandy character. Near Glenlochiar Bridge stood an abbey, whose history is utterly lost; and of six moats, the largest and best-defined is that of Crofts, which rises in several stages to a round grassy plat, 280 feet in diameter, and commands a beautiful prospect. Weapons and urns, supposed to be Roman, have been found; and a cairn at Blackerne yielded in 1756 a silver ring and an amber bead, now in the Edinburgh Antiquarian Museum. Mansions are Greenlaw, Glenlochiar Lodge, Danevale Park, Mollance, and Ernespie; and 10 proprietors hold each an annual value of £500 and upwards, 17 of between £100 and £500, 2 of from £50 to £100, and 7 of from £20 to £50. Crossmichael is in the presbytery of Kirkcudbright and synod of Galloway; the living is worth £300. The parish church, at the hamlet, was built in 1751, and contains 650 sittings; in the graveyard is a tombstone to 'William Graham, shot dead by a party of Claverhouse's troop, for his adherence to Scotland's Reformation Covenants, 1682.' There is also a U.P. church, near Castle-Douglas; and two public schools, Crossmichael and Clarebrand, with respective accommodation for 200 and 109 children, had (1891) an average attendance of 89 and 112, and grants of £91, 14s. 6d. and £126, 17s. Valuation £13,876, 16s. 6d. Pop. (1801) 1084, (1831) 1325, (1861) 1536, (1871) 1492, (1881) 1343, (1891) 1248.—*Ord. Sur.*, sh. 5, 1857.

Crossmill. See CORSEMILL.

Crossmyloof, a former village in the NW corner of Cathcart parish, Renfrewshire, 1 mile NE of Pollokshaws, but included in 1891 in the extended city of Glasgow, with a branch post and telegraph office. At it are a public school, an Established church (Shawlands), and a bakery. At a council of war here, according to a popular myth, Queen Mary, on the morning of the battle of Langside, laid a small crucifix on her hand, saying, 'As surely as that cross lies on my loof, I will this day fight the Regent,'—hence the name *Crossmyloof*.

Crosspol, a bay in the S of Coll island, Argyllshire. It measures 2 miles across, but lies exposed to the S and

the SW, and is profusely studded with sunken rocks. A sandy beach, about a mile long, fringes it on the N, and is the chief feature of its kind in Coll.

Crossraguel, a ruined Cluniac abbey in Kirkoswald parish, Ayrshire, 2 miles SW of Maybole. It seems to have derived its name (Lat. *Cruis Regalis*, 'king's cross') from a cross of St Oswald, King of Northumbria (ob. 643), but itself was dedicated to the Virgin Mary, and was founded about 1240 by Duncan, first Earl of Carrick, for the Cluniacs of PAISLEY, from which it was made exempt in 1244. The last of its abbots, Quentin Kennedy, in 1562 held a famous dispute with John Knox at Maybole; he died in 1564, when a pension of £500 a year was conferred upon George Buchanan out of the abbey's revenues. Their bulk was granted to Allan Stewart, who, as commendator visiting the bounds of Crossraguel in 1570, was pounced on by Quentin's nephew, Gilbert, fourth Earl of Cassilis, and carried off to the sea-castle of DUNURE, there, in the Black Vault, to be 'roasted in sop' until he consented to subscribe 'a five-year tack and a nineteen-year tack and a charter of feu of all the lands of Crossraguel, with all the clauses necessary for the great King of Carrick to haste him to hell' (Chambers's *Dom. Ann.*, i. 65-67). To the Earl's desire, however, to turn it to his own account we probably owe the partial preservation of the abbey. Its ruins, Second Pointed in style, comprise some portions of the domestic buildings on the S side, the walls of the church, and the square chapter-house, with high arched roof upborne by a clustered pillar. The roofless church is a narrow aisleless oblong, measuring internally 160 by 25 feet, and divided nearly midway by a gabled wall, containing a doorway. The choir ends in a three-sided apse, and retains an aumbry, sedilia, and an altar tomb. See vol. ii. of Grose's *Antiquities of Scotland* (1791), vol. i. of Billings' *Baronial and Ecclesiastical Antiquities* (1845), F. C. Hunter Blair's *Charters of Crossraguel* (2 vols. 1886), and *Church of Scotland, Past and Present* (1892).

Crossroads. See DREGHORN and GRANGE.

Croulin Isles, a group of islets in Applecross parish, Ross-shire, off the N side of the entrance of Loch Carron. Croulinmore, the largest of them, is 1 mile long.

Crovie, a fishing village in Gamrie parish, NE Banffshire, on the E side of Gamrie Bay, 1 mile NE of Gardentown. Supposed to have been founded early in the 18th century, it stands in a rocky ravine, which is traversed by a brook; and it presents the gable end of its houses to the sea, the other end to a bank of the ravine.

Crowbutt, a hamlet in Chirnside parish, Berwickshire, 1 mile NE of Chirnside station on the Berwickshire section of the North British railway.

Croy, a station in the W of Cumbernauld parish, Dumbartonshire, on the Edinburgh and Glasgow section of the North British, 1½ mile SSE of Kilsyth, and 11½ miles NE of Glasgow.

Croy, a hamlet in the NE border of Inverness-shire, and a parish partly also in Nairnshire. The hamlet lies 8 miles SW of Nairn and 3 S of Fort George station, which is 10½ miles NE of Inverness, under which it has a post office.

The parish, containing also Clephanton village, 6¼ miles SW of Nairn, comprises the ancient parishes of Croy and Dalcross, united in the latter part of the 15th century. Previous to 1891 it was divided between the two counties in which it is placed by a most irregular boundary line. In that year, however, the Boundary Commissioners redivided it between the two counties in such a way as to avoid the inconveniences caused by the former boundary, with the result of leaving the parish pretty equally divided between the counties of Inverness and Nairn. The detached Leye portion of the parish (4820 acres) was at the same time transferred to the parish of Inverness. The river NAIRN winds 12¾ miles north-eastward from just below Daviot House to just above Rosefield; the Loch of the Clane (2 × 1 furl.) lies in the northern extremity, and on the Petty boundary is Loch Flemington (4½ × 1½ furl.). The beautiful strath of the Nairn here sinks from 400 to 100 feet above

sea-level; but the surface generally is flat and forbidding in aspect, including the wide bleak moors of Clava and Culloden, and only in the south-eastern corner rising steeply to 1000 feet on Saddle Hill, 1027 on Creagan Glas, and 1787 on Beinn Buidhe Mhor. The rocks are variously granite, gneiss, Old Red sandstone, unconsolidated drift, and liassic limestone, the last of which has been calcined for economic purposes. The soil in the eastern division is of all descriptions, so interspersed with one another that scarcely two continuous acres can be found of the same quality; that of the western is also various, but forms, on the whole, a fine mixture of clay black land and sandy or gravelly material. Great improvements have been effected since 1845, hundreds of acres that once were barren moor having either been planted or brought under the plough. A remarkable ancient Caledonian monument, comprising two concentric circles of large stones, two large slabs within the inner circle, and a huge upright of conglomerate a few feet W of the outer, crowns a round gravel mound on the NW border of the parish; and remains of crannoges or ancient lake-dwellings, formed of alternate strata of stones, earth, and oak, and resting on oaken piles strongly fixed by transverse beams, were discovered at the draining of a lake in the eastern end of the parish. The stones of Clava are separately noticed, as likewise are the battlefield of Culloden, the ruins of Dalcross Castle, and the four mansions, Cantray House, Holme Rose, Kilsravock Castle, and Leys Castle. Croy is in the presbytery of Nairn and synod of Moray; the living is worth £332. The parish church, at the hamlet, was built in 1767, and contains 527 sittings; a Free church stands 1 mile to the SSW. Three schools, Balcroy, Clava, and Croy, with respective accommodation for 44, 112, and 197 children, had (1895) an average attendance of 29, 36, and 101, and grants of £25, 3s. 6d., £47, 17s. 6d., and £114, 16s. Valuation, £10,399, 19s. 2d., of which £3699, 1s. 6d. was in Nairnshire. Pop. (1801) 1601, (1831) 1664, (1861) 1873, (1871) 1841, (1881) 1709, (1891) 1516.—*Ordn. Surv.*, sh. 84, 1876.

Cruach or **Stob na Cruaich**, a mountain (2420 feet) on the NW border of Perthshire, culminating 1½ mile NW of Loch Laidon.

Cruachan. See BEN CRUACHAN.

Cruach-Luessach (Gael. 'mountain of plants'). See KNAPDALE, NORTH.

Crucifield, a hill in Unst, Shetland, with ancient concentric circles.

Cruden (*croju* or *crush Dane*, according to the popular etymology), a coast parish of Buchan, NE Aberdeenshire, with a post office of its own name at Auchiries hamlet, 8¼ miles SSW of Peterhead, and 9¾ NE of its station and post-town, Ellon, with which it communicates daily by coach. It is bounded NW by Longside, NE by Peterhead, E by the German Ocean, S by Slains and Logie-Buchan, SW and W by Ellon. Its utmost length, from E to W, is 7½ miles; its breadth, from N to S, varies between 2½ and 6½ miles; and its area is 18,444½ acres, of which 164½ are foreshore and 14 water. Except for 2 miles of sands at Cruden Bay, the coast-line, 7½ miles long, is fringed with a range of stupendous cliffs, projecting the headlands of Hare Craig, Murdoch Head, and Wardhill, and indented by Long Haven, Yoag's Haven, North Haven, the BULLERS OF BUCHAN, Robie's Haven, and Twa Havens, whilst off them lie Dunbuy islet and a long sunken reef, the Scares of Cruden. The cliffs to the S, 100 feet high, consist of greenstone or basalt; and those to the N, at points attaining 200 feet, of reddish granite, with trap-dykes on the Blackhill. Inland the general surface sinks little below 100, and little exceeds 200, feet above sea-level; but rises to 281 at the Hill of Ardiferly, 354 at the Hill of Auquharney, 447 at the Corse of Balloch, 346 at Hill-side of Aldie, and 374 near Newtown, the three last close to the Longside border. Cruden Water, rising just within Longside, winds 11 miles east-by-southward to the northern corner of Cruden Bay, dividing the parish into two nearly equal parts, and receiving the burns of

Lacca and Gask; its current has been utilised to drive a wool-mill at Auquharney and several meal-mills lower down. Great quantities of peat-moss lie along the northern boundary; and forests of oak and other hardwood trees anciently occupied much of the area, but now are represented only by a few old trees, dwarfed by the sea-breeze that has stunted the clumps and plantations of Slains and Auquharney. Granite and trap are the prevailing rocks; and the former has been quarried along the northern cliffs, under great disadvantages of both working and transport. The neighbouring waters teem with fish; and at a cost of £8000 a new harbour has been formed at the village of PORT ERROLL, where Cruden Water falls into the bay; it consists of an outer and an inner basin, the latter 5400 square yards in area. On the plain skirting Cruden Bay Malcolm II. of Scotland is said to have defeated Canute, afterwards King of England, in 1014; but the battle is one of those which, in Dr Hill Burton's words, 'only find a local habitation and a name, along with the usual details, from late and questionable authority.' A mound, evidently artificial, and popularly called the Battery, crowns a height to the N of the Hawklaw, and to the SE of that mound are remains of what seems to have been a vitrified wall. Another artificial mound, the Moathill, a seat most probably of feudal justice, and an eminence, called Gallowhill, where criminals were executed, are on Ardifferry farm; whilst Highlaw, 1 mile from the coast, is crowned by a tumulus, said to have been used for beacon fires, and commanding a fine view over the low surrounding country, away to the Grampians. A 'Druidical circle,' $\frac{1}{2}$ mile W of the parish church, was demolished in 1831; a necklace of jet and amber, three stone cists, flint implements, a rude old granite font, and other relics of antiquity, have been from time to time discovered; and the Bishop's Bridge over Cruden Water, near the church, was built in 1697 by the Right Rev. Dr Jas. Drummond of Brechin, and widened by the Earl of Erroll in 1763. SLAINS CASTLE, however, is the chief artificial feature in the parish, where 8 proprietors hold each an annual value of £500 and upwards, 4 of between £100 and £500, and 3 of from £20 to £50. Giving off portions to Ardallie, Blackhill, and Boddam *quoad sacra* parishes, Cruden is in the presbytery of Ellon and synod of Aberdeen; the living is worth £260. The parish church, on the right bank of Cruden Water, 1 mile SSW of Auchiries, was built in 1776, and enlarged in 1834, when two round towers were added; it contains 820 sittings, and has a church-hall beside it. At Hatton, $\frac{1}{2}$ mile WNW, stands the Free church (1844); and $\frac{3}{4}$ mile SSW is St James's Episcopal church (1843; 440 sittings), which, Early English in style, has a nave and chancel, a spire 90 feet high, an organ, and three stained-glass windows. Of St Olave's or Olaus's chapel, near the New Bridge, said to have been founded by Canute, the last remains were carried away for road-metal in 1837. Errol Episcopal school and the public schools of Auchiries, Bogbrae, Celdwells, and Hatton, with respective accommodation for 127, 101, 104, 120, and 150 children, had (1891) an average attendance of 83, 100, 75, 109, and 172, and grants of £90, 10s. 6d., £95, 18s. 6d., £68, 16s. 6d., £86, 8s., and £170, 7s. 8d.; also an infant school at Port Erroll. Valuation £16,072, 13s. 6d. Pop. (1881) 3444, (1891) 3593.—*Ord. Sur.*, sh. 87, 1876.

Cruggleton, an ancient coast parish of SE Wigtonshire, united in the middle of the 17th century to Kirk-madrine and Sorbie, and now forming the south-eastern section of the present Sorbie. Its ruined Norman church, 3 miles S of Garliestown, belonged to Whithorn priory, and, consisting of nave and chancel, measures $67\frac{1}{2}$ by 30 feet. Cruggleton Castle, 3 furlongs to the E, stood on a bold rocky headland, over 100 feet high, mid-way between Rigg or Cruggleton Bay and Port Allan. Supposed to have been built by Norsemen, it was long the seat of the Irish M'Kerlies; is said to have been captured by both Edward I. and Wallace; and after passing through many hands, came eventually to the Agnews. It is now represented by only an arch, the

foundations of some walls, and distinct traces of a fosse.

Cruicksfield, an estate, with a mansion, in the S of Bunkle parish, Berwickshire, 4 miles NE of Duns.

Cruick Water, a stream of NE Forfarshire, rising at the northern extremity of Fearn parish, and running $15\frac{3}{4}$ miles south-south-eastward and east-north-eastward through Fearn, Menmuir, and Stracathro, till it falls into the North Esk, 5 furlongs E of Stracathro church. A capital trouting stream, but possessed of little beauty, it descends from 1480 to 113 feet above sea-level, and becomes after heavy rains a voluminous and furious torrent, though dwindling to a mere rill in time of drought.—*Ord. Sur.*, sh. 57, 1868.

Cruikston. See CROOKSTON.

Cruin. See INCHCRUIN.

Cruister, a hamlet near Sandwick, in Dunrossness parish, Shetland.

Cruivie, a ruined square tower on the lands of Straiton, in Logie parish, NE Fife, $2\frac{1}{2}$ miles NNE of Logie church.

Crummag Head. See CRAMMAG.

Crutherland, an estate, with a mansion, in Glasford parish, Lanarkshire, on the right bank of Calder Water, $2\frac{3}{4}$ miles SE of East Kilbride.

Cryston. See CHRYSTON.

Cuan, a narrow sound separating Luing island from Seil island, in Kilbrandon and Kilchattan parish, Argyllshire. It has a very strong current, running at the rate of 7 or 8 miles an hour; and, in consequence of the church standing near it, gives name popularly to the parish.

Cuchullins or Coolins, a group of savagely picturesque mountains in Braecadale and Strath parishes, Isle of Skye, Inverness-shire. Rising from the sea-shore to the E of Loch Brittle and N of Loch Scavaig, and extending north-eastward to Glen Sligachan, eastward to the valley of Strath, they occupy an area of about 35 square miles, and are a confused assemblage of barren heights, from 2000 to 3000 feet high, distinguishable, by striking differences in outline, feature, and colouring, into two great sections. The southern and larger of these consists of smooth, conoidal masses, that rise from a labyrinth of low ground—each separate from its fellow, nearly all streaked from summit to base with broad reddish sheets of *débris*, and many of them abrupt, acclivitous, and rounded like vast bare cones. The northern section, on the other hand, consists of singularly rugged and serrated ranges and masses of mountains, intersected by wild ravines, and shooting up in sharp and jagged peaks. It is mainly formed of hypersthene, whose dark metallic aspect is relieved by scarce one blade of vegetation; and, strongly attracting rain-clouds from the ocean, it often is lashed with storms. Always, even amid the blaze of summer sunshine, a region of desolation, without any play of colours, it looks under a wreathing of clouds to be little else than an assemblage of deep and horrible abysses, which the eye vainly endeavours to penetrate; dark Loch CORUIK lies in its very core. The loftiest peak is Scur-na-Gillean (3167 feet), $4\frac{1}{2}$ miles S of Sligachan inn; and six other summits are estimated to exceed 3000 feet above sea-level. See chaps. v. and vi. of Alexander Smith's *Summer in Skye* (1865).

Cuckold-Le-Roi. See COCKLERUE.

Cuen or Loch nan Cuinne. See BADEN.

Cuff Hill. See BEITH, Ayrshire.

Cuil, a bay in Appin, Argyllshire, opening from Loch Linnhe, $4\frac{1}{2}$ miles NE of Shuna island. With a semi-circular outline, on a chord of $1\frac{1}{2}$ mile, it is engirt with a fine sandy beach, receives the river Duror, and is often frequented by large shoals of herrings.—*Ord. Sur.*, sh. 53, 1877.

Cuilhill, a village in Old Monkland parish, Lanarkshire, 2 miles W of Coatbridge.

Cullie or Culaidh, a loch in the upper part of Kildonan parish, Sutherland, $2\frac{1}{2}$ miles SSW of Forsinard station. Rudely triangular in shape, it has an utmost length of 3 and 2 furlongs, and teems with trout.

Cultrannich, a hamlet in Kenmore parish, Perthshire, near the north-western shore of Loch Tay, 9 miles NE of Killin.

Culturnum Moss, a hamlet in Port of Monteith parish, SW Perthshire, $1\frac{1}{2}$ mile WNW of Port of Monteith station.

Culag, a rivulet of Assynt parish, SW Sutherland, issuing from a lochlet 2 miles SE of the summit of Canisp, and thence running 8 miles west-north-westward to the head of Loch Inver, at Culag Hotel. It expands in its course into a series of eight or nine small lakes, which teem with trout, and in which, too, sea-trout and grilse are sometimes taken.—*Ord. Sur.*, sh. 107, 1881.

Culbin, a sandy desert on the southern coast of the Moray Firth, extending across the entire breadth of Dyke and Moy parish, Elginshire, into Kinloss parish, Elginshire, and Auldearn parish, Nairnshire. Comprising some 9500 acres of what was once the very garden of Moray, it began to be overwhelmed with sand as far back as 1100, according to Boece; but the barony itself of Culbin was not destroyed till 1670-95, 'the which was mainly occasioned by the pulling up by the roots of bent, juniper, and broom bushes, which did loose and break the surface and scroof of the sand-hills.' Now all is covered with sand or sand-hills, to a depth in places of 100 feet. The worst parts lie immediately west of the lagoon and mouth of the Findhorn river, and these underwent so great a change as to shift the river's mouth nearly 2 miles eastward, and to overwhelm the ancient town and harbour of Findhorn.—*Ord. Sur.*, shs. 84, 94, 1876-78. See vol. iii., pp. 119, 120, of Chambers's *Domestic Annals of Scotland* (1861).

Culblean, a hill range in the E of the Tullich section of Glenmuick parish, SW Aberdeenshire, 4 miles NE of Ballater. Extending about 5 miles south-by-eastward from Morven Hill to the vicinity of the Dee, it has an altitude of 1750 feet above sea-level, and at its southern end contains the curious natural excavation called the Vat. Here, on 30 Nov. 1335, the Scottish regent, Andrew Murray of Bothwell, defeated David, thirteenth Earl of Athole, who, setting his back to a rock, said it should flee as soon as he, and so fell, with many of his 3000 followers.

Culbockie, a village in Urquhart and Logie-Wester parish, Ross-shire, 9 miles ENE of Dingwall. It has a post office under Conon Bridge. At it stands a public school; and fairs are held here on the fourth Wednesday of April, the first Wednesday of July, the last Wednesday of October, and the second Wednesday of December.

Culburnie. See KILTARLITY.

Culcabock, a village about a mile SE of the town of Inverness.

Culcreuch, an estate, with a mansion, in Fintry parish, Stirlingshire. The mansion, standing $1\frac{1}{4}$ mile NNW of Fintry village and 5 miles E by S of Balfroon, is a fine edifice, with beautiful grounds. Its present owner is J. C. Dun Waters, Esq. A large cotton factory, 5 furlongs SW of the mansion, near Newtown village, was erected by the proprietor of the estate about 1796.

Culdeee Castle, a mansion in Muthill parish, Perthshire, standing on a commanding site, amid a fine park near the left bank of Machany Water, $\frac{3}{4}$ mile WSW of Muthill station, and $4\frac{1}{2}$ miles SSE of Crieff. Its owner, Rt. Thos. Napier Speir of BURNRAE, holds 1619 acres in Perthshire, valued at £1972 per annum.

Culduthel, a hamlet, with a public school, in the parish of Inverness, 3 miles S by E of Inverness town, under which it has a post office.

Culfargie, an estate in the parish of Abernethy, Perthshire.

Culfreich, a lake in Assynt parish, Sutherlandshire.

Culhorn House, a seat of the Earl of Stair in Stranraer parish, Wigtonshire, $1\frac{3}{4}$ mile SE of Stranraer town. Built for a barracks, it is a large clumsy brick edifice, but etands amid finely-wooded polices.

Culkein. See ASSYNT.

Cullalo Hille. See ABERDOUR and AUCHTERTOOL, Fife.

Cullean. See COLZEAN.

Cullen, a coast town and parish of Banffshire. A seaport and royal and parliamentary burgh, the town is situated on Cullen Bay, at the mouth of the Burn of Deskford, with a station on the Great North of Scotland railway, $5\frac{1}{2}$ miles W by N of Portsoy, $8\frac{1}{2}$ NNW of Tillynaught Junction, 13 W by N of Banff, $23\frac{1}{2}$ N of Grange Junction, and $67\frac{1}{2}$ NW of Aberdeen. Its mean-looking Old Town, standing a little inland, about the year 1822 was utterly demolished, to make way for improvements at Cullen House; a somewhat ancient part, called Fishertown or Seatown, on the shore, has a very irregular appearance, and is inhabited chiefly by fisher-folk. Close to the eastern extremity of Seatown, but on much higher ground, is the New Town, which, built in 1822 and subsequent years in lieu of the demolished Old Town, presents a regular and pleasant aspect, with its open market-place and its three streets, respectively 300, 400, and 550 yards long, and which at first was planned to be larger than its existing size. It enjoys the most charming environs, in the sweep of its crescent bay, in the rocky grandeur of the neighbouring coast, and in the lawns and woods of Cullen House (which dates from the 14th century), away to the conical BIN HILL of Cullen (1050 feet), $2\frac{3}{4}$ miles to the SW. At the town itself are a post office, with money order, savings bank, and telegraph departments, branches of the Union and North of Scotland Banks, several insurance agencies, a gas-work, a public library, a news-room, a golf club, and 2 hotels, to one of which, built in 1829, a town-hall is conjoined, with council and court rooms. The cruciform parish church, St Mary's, 5 furlongs SSW of the town, was made collegiate in 1543 for a provost, 6 prebendaries, and 2 singiu boys, by Alexander Ogilvie of Deskford, whose recumbent effigy surmounts a large and richly-ornamented tomb in a mural recess; as enlarged by an aisle about 1798, it contains 800 sittings. It was completely renovated in 1885. Other places of worship are Seafield *quoad sacra* church (1839; 450 sittings), a Free church and a United Presbyterian church; whilst a public school, with accommodation for 609 children, had (1891) an average attendance of 376, and a grant of £329. In the cemetery is a grey granite obelisk, 14 feet high, erected in 1876 to the memory of Provost Smith. The Castlehill, an eminence overhanging the sea, is crowned by remains of an ancient fort, whence vitrified stones have been extracted; but the royal castle where died Elizabeth, the Bruce's queen, stood nearer Cullen House. The eminent physician, Sir James Clark, Bart. (1788-1870), was a native of Cullen. Its harbour was formed in 1817, and enlarged in 1834, by the Earl of Seafield, at a cost of more than £10,000, and was once more extended in 1886-87. With a depth at the pier-head of $8\frac{1}{2}$ feet at neap, and of 12 at spring tides, it is one of the best artificial havens in the Moray Firth. The chief imports are coals, salt, and staves; and exports are herrings, dried fish, oats, and potatoes. The catching and curing of fish are the staple industries, there being engaged in connection with the former 58 large boats and 16 small ones; and there are also a boat-building yard, rope and sail works, and a brewery. Fairs for cattle and horses are held on the third Friday of May and the first Friday of November. Cullen is governed by a provost, 2 bailies, a dean of guild, a treasurer, and 7 other councillors; with ELGIN, Banff, Peterhead, Kintore, and Inverurie, it returns a member

Seal of Cullen.

to parliament. Its parliamentary constituency numbered 260 in 1891, when the burgh valuation amounted to £4262, whilst the corporation revenue was £76. Pop. (1841) 1423, (1851) 1697, (1861) 1821, (1871) 2056, (1881) 2033, (1891) 2100.

The parish of Cullen, triangular in shape, is bounded N by the Moray Firth, E by Fordyce, and SW by Rathven. Its utmost length, from N to S, is 1½ mile; its utmost width, from E to W, is 1¼ mile; and its area is 925 acres, of which 38½ are foreshore and 15 water. The coast-line, 1¼ mile long, presents a bold rocky front to the Bay of Cullen, which is 2½ miles wide across a chord drawn from Scar Nose to Logie Head, and which from that chord measures 7 furlongs to its innermost recess. Three singular masses of rock here have been named the Three Kings of Cullen, most likely after the Magi, or Three Kings of Cologne—Caspar, Melchior, and Balthazar—whose skulls are shown in the cathedral there. The deep-channelled Burn of Deskford, otherwise known as Cullen Water (Gael. *cul-an*, 'back-lying water'), flows 2½ miles NNW along all the Rathven border, and is spanned by a railway viaduct, of eight arches, and between 70 and 80 feet high; the surface attains 211 feet towards the centre. A bed of stratified quartz, reposing conformably on a thick stratum of compact greywacke, underlies all the parish; Old Red sandstone forms two of the Three Kings, ½ mile W of which are two patches of New Red sandstone, on disrupted greywacke and beneath beds of drift; and in the S is fine lias clay. The soil near the shore is a mixture of sand and gravel, and elsewhere ranges from strong clay or light loam to a fine rich loam incumbent on a soft clay bottom. Cullen House, near the parish church, is a huge pile erected at various periods; the whole, as remodelled and enlarged in 1861 by the late Mr David Bryce, is a noble specimen of Scottish Baronial architecture. It crowns a steep rock on the right bank of the Burn of Deskford, across which a one-arch bridge of 82 feet span leads to the grounds and park, which, beautiful with streams and lakelets, trim lawns and stately groves, extend far into Rathven parish, and among whose adornments is a graceful temple, commanding a splendid view over the neighboring sea. The house itself is rich in works of art; and its charter-room contains a valuable series of documents, extending back three centuries from 1705. Sir Walter Ogilvie, Knight, of Auchleven, younger brother of that Sir John Ogilvie who received a grant of the castle of AIRLIE, towards the middle of the 15th century married Margaret, sole daughter and heiress of Sir John Sinclair of Deskford and Findlater, and thereby acquired the said estates. His seventh descendant was in 1638 created Earl of FINDLATER. That title expired with James, seventh Earl, in 1811; and Cullen came to Ian Charles Grant-Ogilvie, eighth Earl of Seafield since 1701 (b. 1851; suc. 1881; d. 1884), who owned 48,946 acres in Banffshire, valued at £34,260 per annum. (See also CASTLE-GRANT.) Three lesser proprietors hold each an annual value of from £50 to £100, and 23 of from £20 to £50. Cullen is in the presbytery of Fordyce and synod of Aberdeen; the living is worth £190. Valuation, exclusive of burgh, (1891) £1364, 1s. 2d. Pop. of entire parish (1801) 1076, (1831) 1593, (1861) 1975, (1871) 2215, (1881) 2236, (1891) 2319.—*Ord. Surv.*, sh. 96, 1876.

Cullenoch, the ancient name of Laurieston, a village in Balmaghie parish, Kirkcudbrightshire, 6 miles WNW of Castle-Douglas. It was the meeting-place of the Kirkcudbrightshire war committee of the Covenanters, constituted in 1640.

Cullen of Buchan. See GAMRIE.

Cullen Park, a mansion in Avondale parish, Lanarkshire, close to Strathaven.

Cullen Water. See DESKFORD, BURN OF.

Cullerley. See ECHT.

Cullicudden, a hamlet and an ancient parish in Resolis parish, Ross-shire. The hamlet lies on the SE shore of Cromarty Firth, 4½ miles WSW of Invergordon, and 2½ N of Inverness; at it are a public school and a post office, with money order and savings' bank departments.

The parish, united to Kirkmichael subsequent to 1688, now forms the western district of Resolis. A fragment of its church is still standing. A quarry of sandstone suited for many kinds of public buildings, and varying in colour from red to deep yellow, has long been worked in the vicinity of the hamlet.

Cullins. See CUCHULLINS.

Cullisaid or Cuil na Sith, a loch in the SE of Tongue parish, in the county of Sutherland. Lying 390 feet above sea-level, it measures 7½ furlongs by 1, and sends off a stream 1½ mile east-north-eastward to the head of Loch Loyal.

Cullivoe, a hamlet and a bay in North Yell parish, Shetland, 40 miles N of Lerwick, under which the hamlet has a post office with money order, savings bank, and telegraph departments.

Culloden (Gael. *cul-oitir*, 'back-lying coast-ridge'), an estate and a battlefield on the NE verge of Inverness-shire, in the parishes of Inverness, Croy, Daviot-Dunlichity, and Petty. The new line of the Highland railway passes through the battlefield, where there is to be a station. Culloden House stands 1¼ mile SE by S of Culloden station on the Highland railway, this being close to the Firth of Beaulie and 3¼ miles ENE of Inverness. Within it hangs portraits of 'Grey' Duncan Forbes (1572-1654), M.P. and provost of Inverness, who bought the estate from the laird of M'Intosh in 1626; of his great-grandson and namesake, the celebrated Lord President of the Court of Session (1685-1747); and of many others of the line—'a cluster,' Hill Burton observes, 'of open, handsome, and ingenious countenances.' The present and tenth laird, also a Duncan Forbes (b. 1851; suc. 1879), holds 5655 acres, valued at £4553 per annum.

About 1¼ mile ESE of the mansion is the battlefield, Culloden or Drummosie Muir, a broad, flat, sandstone ridge that from 500 feet above sea-level sinks gently to 300 feet along the left bank of the river Nairn, across which rise the steeper heights of Croy and Dalcoron parish—Saddle Hill (1000 feet), Creagan Glas (1027), and Beinn Bhuidhe Mhor (1797). Planting and culture have somewhat changed its aspect, so that now it is but an opening in a wood,—an opening the size of a park of 6 or 8 acres,—traversed by a carriage road from Inverness to Nairn, and studded with grassy mounds that mark the graves of the slain. In the summer of 1881 these graves were cared for by the present proprietor, one stone being inscribed with the names of the clans M'Gillivray, M'Lean, and M'Lauchlan, whilst there are separate stones for Clan Stewart of Appin, Clan Cameron, and Clan M'Intosh, and two graves are marked 'Clans mixed.' Then on a new 'Great Cairn,' 20 feet in height, a slab has been placed, with this legend:—'The Battle of Culloden was fought on this moor, 16th April 1746. The graves of the gallant Highlanders who fought for Scotland and Prince Charlie are marked by the names of their clans.'

The invasion of England over and the battle of Falkirk won, the Highland army, from besieging Stirling Castle, retired to Inverness, where, on 12 April 1746, news reached them, scattered and disorganised, that the Duke of Cumberland had marched from Aberdeen. Fording the deep and rapid Spey, he on the 14th entered Nairn, where the Prince's outposts halted till he was within a mile of the town, beginning their retreat in sight of the British army. Next day, the Duke's birthday, the royal camp was a scene of festivity, provisions being plentifully supplied by a fleet of storeships that had followed along the coast; but the Prince, enjoying no such advantage, found himself forced to hasten the issue of the contest by a third appeal to arms. It was therefore resolved in a council of war to attack the enemy's camp in the night, and thus to compensate, so far as might be, for inferiority of numbers, and yet more for the want of cavalry and cannon. But as a surprise, to be successful, must be effected with speed and concert, it is manifest that prompt obedience and accurate calculation are indispensable. The Highlanders did not finish their preparations till the evening was far advanced,

and, the night being very dark, they could not complete their march until it was too late to hazard an onset with any prospect of advantage. Orders were therefore given for a retreat, and the wearied clansmen, retracing their steps under a load of melancholy and suspicion, resumed their original ground on Culloden Muir. In the opinion of the wisest among Charles's officers, his army, after a march at once so harassing and discouraging, should have taken up a position beyond the river Nairn, where the bank was high and inaccessible to cavalry. But to such reasonable proposals he turned a deaf ear, being moved by a romantic notion that it was unworthy of him to retire in the presence of an enemy, or even to avail himself of any superiority that might be attained by the judicious choice of a field of battle. He would rather await the onset of the Duke of Cumberland, who, profiting by the experience of Cope and Hawley, made his dispositions with much more skill and foresight than had been shown at Prestonpans or Falkirk.

Before commencing the march, written instructions, which had been communicated to the commanders of the different regiments, were read at the head of every company in the line. They ran, that if those to whom the charge of the train or baggage horses was entrusted should abscond or leave them, they should be punished with instant death; and that if any officer or soldier misconducted himself during the action, he should be sentenced. The infantry marched in three parallel divisions or columns, of five regiments each, headed by General Huske on the left, Lord Sempill on the right, and General Mordaunt in the centre. The artillery and baggage followed the first column on the right; and the dragoons and horse, led by Generals Hawley and Bland, were on the left, forming a fourth column. Forty of Kingstou's horse and Argyllshire men led the van.

The charge of ranging the Highland army in line of battle on this important occasion was entrusted to O'Sullivan, who acted in the double capacity of adjutant and quartermaster-general. This officer, in the opinion of Lord George Murray, a high authority certainly, was utterly unfit for such a task, and committed gross blunders on every occasion of moment. In the present instance, he did not even visit the ground where the army was to be drawn up, and committed a 'fatal error' in omitting to throw down some park walls on the left of the English army, which being afterwards taken possession of by the Duke of Cumberland, it was found impossible to break the English lines from the destructive flank-fire opened therefrom on the right of the Highland army, as it advanced to the attack. While the Duke of Cumberland was forming his line of battle, Lord George Murray was very desirous to advance and demolish these walls; but as such a movement would have broken the line, the officers about him considered that the attempt would be dangerous, and he therefore did not make it.

The Highland army was drawn up in three lines. The first, or front line, consisted of the Athole brigade, which had the right, the Camerons, Stewarts of Appin, Frasers, M'Intoshes, M'Lauchlans, M'Leans, John Roy Stewart's regiment, and Farquharsons, united into one regiment; the M'Leods, Chisholms, M'Donalds of Clanranald, Keppoch, and Glengarry. The three M'Donald regiments formed the left. Lord George Murray commanded on the right, Lord John Drummond in the centre, and the Duke of Perth on the left, of the first line. There had been, a day or two before, a violent contention among the chiefs about precedence of rank. The M'Donalds claimed the right as their due, in support of which claim they stated, that as a reward for the fidelity of Angus M'Donald, Lord of the Isles, in protecting Robert the Bruce for upwards of nine months in his dominions, that prince, at the battle of Bannockburn, conferred the post of honour, the right, on the M'Donalds,—that this post had ever since been held by them, unless when yielded from courtesy, as to the chief of the M'Leans at the battle of Harlaw. Lord George Murray, however, maintained that, under the

Marquis of Montrose, the right had been assigned to the Athole men, and he insisted that that post should now be conferred upon them. In this unseasonable demand, Lord George is said to have been supported by Lochiel and his friends. Charles refused to decide a question with the merits of which he was imperfectly acquainted; but, as it was necessary to adjust the difference immediately, he prevailed upon the commanders of the M'Donald regiments to waive their pretensions in the present instance. The M'Donalds in general were far from being satisfied with the complaisance of their commanders, and, as they had occupied the post of honour at Prestonpans and Falkirk, they considered their deprivation of it on the present occasion ominous. The Duke of Perth, while he stood at the head of the Glengarry regiment, hearing the murmurs of the M'Donalds, said, that if they behaved with their wonted valour they would make a right of the left, and that he would change his name to M'Donald; but the haughty clansmen paid no heed to him.

The second line of the Highland army consisted of the Gordons under Lord Lewis Gordon, formed in column on the right, the French Royal Scots, the Irish piquets or brigade, Lord Kilmarnock's foot guards, Lord John Drummond's regiment, and Glenbucket's regiment in column on the left, flanked on the right by Fitz-James's dragoons, and Lord Elcho's horse-guards, and on the left by the Perth squadron, under Lords Strathallan and Pitsligo, and the Prince's body-guards under Lord Balmerino. General Stapleton had the command of this line. The third line, or reserve, consisted of the Duke of Perth's and Lord Ogilvy's regiments, under the last-mentioned nobleman. The Prince himself, surrounded by a troop of Fitz-James's horse, took his station on a very small eminence behind the centre of the first line, from which he had a complete view of the whole field of battle. The extremities of the front line and the centre were each protected by four pieces of cannon.

The English army continued steadily to advance in the order already described, and, after a march of eight miles, formed in line of battle, in consequence of the advance guard reporting that they perceived the Highland army at some distance making a motion towards them on the left. Finding, however, that the Highlanders were still at a considerable distance, and that the whole body did not move forward, the Duke of Cumberland resumed his march, and continued to advance till within a mile of the enemy, when he ordered a halt, and, after reconnoitring the position of the Highlanders, re-formed his army for battle in three lines, and in the following order.

The first line consisted of six regiments, viz., the Royals (the 1st), Cholmondeley's (the 34th), Price's (the 14th), the Scots Fusileers (the 21st), Monro's (the 37th), and Barrel's (the 4th). The Earl of Albemarle had the command of this line. In the intermediate spaces between each of these regiments were placed two pieces of cannon, making ten in all. The second line consisted of five regiments, viz., those of Pulteney (the 13th), Bligh (the 20th), Sempill (the 25th), Ligonier (the 45th), and Wolfe's (the 8th), and was under the command of General Huske. Three pieces of cannon were placed between the exterior regiments of this line and those next them. The third line or *corps de reserve*, under Brigadier Mordaunt, consisted of four regiments, viz., Battercau's (the 62d), Howard's (the 3d), Fleming's (the 36th), and Blakeney's (the 27th), flanked by Kingston's dragoons (the 3d). The order in which the regiments of the different lines are enumerated is that in which they stood from right to left. The flanks of the front line were protected on the left by Kerr's dragoons (the 11th), consisting of three squadrons, commanded by Lord Ancrum, and on the right by Cobham's dragoons (the 10th), consisting also of three squadrons, under General Bland, with the additional security of a moræe, extending towards the sea; but, thinking himself quite safe on the right, the Duke afterwards ordered these last to the left, to aid in

an intended attack upon the right flank of the Highlanders. The Argyll men, with the exception of 140, who were upon the left of the reserve, remained in charge of the baggage.

The dispositions of both armies are considered to have been well arranged; but both were better calculated for defence than for attack. The arrangement of the English army is generally considered to have been superior to that of the Highlanders; as, from the regiments in the second and third lines being placed directly behind the vacant spaces between the regiments in the lines before them, the Duke of Cumberland, in the event of one regiment in the front line being broken, could immediately bring up two to supply its place. But this opinion is questionable, as the Highlanders had a column on the flanks of the second line, which might have been used either for extension or *échelon* movement towards any point to the centre, to support either the first or the second line.

In the dispositions described, and about the distance of a mile from one another, did the two armies stand for some time, each expecting the other to advance. Whatever may have been the feelings of Prince Charles on this occasion, those of the Duke of Cumberland appear to have been far from enviable. The thoughts of Prestonpans and Falkirk could not but raise in him direful apprehensions for the result of a battle affecting the very existence of his father's crown; and that he placed but a doubtful reliance upon his troops is evident from a speech which he now made to his army. He said that they were about to fight in defence of their king, religion, liberties, and property, and that if only they stood firm he had no doubt he should lead them on to certain victory; but that as he would much rather be at the head of one thousand brave and resolute men than of ten thousand mixed with cowards, if there were any amongst them, who, through timidity, were diffident of their courage, or others, who, from conscience or inclination, felt a repugnance to perform their duty, he begged them to retire immediately, and promised them free pardon for so doing, since by remaining they might dispirit or disorder the other troops, and bring dishonour and disgrace on the army under his command.

As the Highlanders remained in their position, the Duke of Cumberland again put his army in marching order, and, after it had advanced, with fixed bayonets, within half a mile of the front line of the Highlanders, it again formed as before. In this last movement the English army had to pass a piece of hollow ground, which was so soft and swampy, that the horses which drew the cannon sank; and some of the soldiers, after slinging their firelocks and unyoking the horses, had to drag the cannon across the bog. As by this last movement the army advanced beyond the morass which protected the right flank, the Duke immediately ordered up Kingston's horse from the reserve, and a small squadron of Cobham's dragoons, which had been patrolling, to cover it; and to extend his line, and prevent his being outflanked on the right, he also at the same time ordered up Pulteney's regiment (the 13th), from the second line to the right of the Royals; and Fleming's (the 36th), Howard's (the 3d), and Batareau's (the 62d), to the right of Bligh's (the 20th) in the second line, leaving Blakeney's (the 27th) as a reserve.

During an interval of about half an hour some manœuvring took place, in attempts by each army to outflank the other. Meanwhile a heavy shower of sleet came on, which, though discouraging to the Duke's army, from the recollection of the untoward occurrence at Falkirk, was not considered very dangerous, as they had now the wind at their backs. To encourage his men, the Duke of Cumberland rode along the lines addressing himself hurriedly to every regiment as he passed. He exhorted his men to rely chiefly upon their bayonets, and to allow the Highlanders to mingle with them, that they might make them 'know the men they had to deal with.' After the changes mentioned had been executed, His Highness took his station behind the

Royals, between the first and the second line, and almost in front of the left of Howard's regiment, waiting for the expected attack. Meanwhile, a singular occurrence took place, characteristic of the self-devotion which the Highlanders were ready on all occasions to manifest towards the Prince and his cause. Conceiving that by assassinating the Duke of Cumberland he would confer an essential service on the Prince, a Highlander resolved, at the certain sacrifice of his own life, to make the attempt. With this intention he entered the English lines as a deserter, and, being granted quarter, was allowed to go through the ranks. He wandered about with apparent indifference, eyeing the different officers as he passed along, and it was not long till an opportunity occurred, as he conceived, for executing his fell purpose. The Duke having ordered Lord Bury, one of his aides-de-camp, to reconnoitre, his lordship crossed the path of the Highlander, who, mistaking him, from his dress, for the Duke (the regimentals of both being similar), instantly seized a musket from the ground, and discharged it at his lordship. He missed his aim, and a soldier, who was standing by, shot him dead on the spot.

The advance of Lord Bury to within a hundred yards of the insurgents appears to have been considered by the Highlanders as the proper occasion for beginning the battle. Taking off their bonnets, they set up a loud shout, which being answered by the royal troops with a huzza, the Highlanders about one o'clock commenced a cannonade on the right, which was followed by the cannon on the left; but the fire from the latter, owing to the want of cannoneers, was, after one round, discontinued. The first volley from the right seemed to create some confusion on the left of the royal army, but so badly were the cannon served and pointed, that though the cannonade was continued upwards of half an hour, only one man in Bligh's regiment, who had a leg carried off by a cannon-ball, received any injury. After the Highlanders had continued firing for a short time, Colonel Belford, who directed the cannon of the Duke's army, opened fire from the cannon in the front line, at first aiming chiefly at the horse, probably either because from their conspicuous situation they offered a better mark than the infantry, or because it was supposed that Charles was among them. Such was the accuracy of the aim taken by the royal artillery, that several balls entered the ground among the horses' legs and bespattered the Prince with the mud that they raised; and one of them struck the horse on which he rode two inches above the knee. The animal became so unmanageable, that Charles was obliged to change him for another, and one of his servants, who stood behind with a led horse in his hand, was killed on the spot. Observing that the wall on the right flank of the Highland army prevented him from attacking on that point, the Duke ordered Colonel Belford to continue the cannonade, with the view of provoking the Highlanders and drawing them on to attack. They, on the other hand, endeavoured to lure the royal army forward, and sent down several parties by way of defiance. Some of these approached three several times within a hundred yards of the right of the enemy, firing their pistols and brandishing their swords; but with the exception of the small squadron of horse on the right, which advanced a little, the line remained immovable.

Meanwhile, Lord George Murray, observing that a squadron of the English dragoons and a party of foot, consisting of two companies of the Argyllshire men, and one of Lord Loudon's Highlanders, had detached themselves from the left of the royal army, and were marching down towards the river Nairn, conceived that it was their intention to flank the Highlanders, or to come upon their rear when engaged in front, so directed Gordon of Avochy to advance with his battalion, and prevent the foot from entering the enclosure. But before this battalion could reach them, they had broken into it, and throwing down part of the east wall, and afterwards a piece of the west wall in the rear of the second line, made a free passage for the dragoons, who formed in the

rear of the Prince's army. Upon this, Lord George ordered the guards and Fitz-James's horse to form opposite to the dragoons to keep them in check. Each party stood upon one side of a ravine, the ascent to which was so steep, that neither could venture across in presence of the other with safety. The foot remained within the enclosure, and Avochy's battalion was ordered to watch their motions.

It was now high time for the Highlanders to come to a close engagement. Lord George had sent Colonel Kerr to the Prince, to know if he should begin the attack; the Prince ordered him to do so, but his lordship, for some reason or other, delayed advancing: It is probable he expected that the Duke would come forward, and that by remaining where he was, and retaining the wall and a small farmhouse on his right, he would avoid the risk of being flanked. Perhaps he waited for the advance of the left wing, which, being not so far forward as the right, was directed to begin the attack, and orders had been sent to the Duke of Perth to that effect; but the left remained motionless. Anxious for the attack, Charles sent a fresh order by an aide-de-camp to Lord George Murray, but his Lordship never received it, as the bearer was killed by a cannon-ball while on his way to the right. He sent a message about the same time to Lochiel, desiring him to urge upon Lord George the necessity of an immediate attack.

Galled beyond endurance by the fire of the English, which carried destruction among the clans, the Highlanders grew clamorous, and called aloud to be led forward without further delay. Unable any longer to restrain their impatience, Lord George had just resolved upon an immediate advance; but before he had time to issue the order along the line, the M'Intoshes, with a heroism worthy of that brave clan, rushed forward enveloped in the smoke of the enemy's cannon. The fire of the centre field-pieces, and a discharge of musketry from the Scotch Fusileers, forced them to incline a little to the right; but all the regiments to their right, led on by Lord George Murray in person, and the united regiment of the M'Lauchlans and M'Leans on their left, coming down close after them, the whole moved forward together at a pretty quick pace. When within pistol-shot of the English line, they received a murderous fire, not only in front from some field-pieces, which for the first time were loaded now with grape, but in flank from a side battery supported by the Campbells, and Lord Loudon's Highlanders. Whole ranks were swept away by the terrible fire of the English. Yet, notwithstanding the carnage in their ranks, the Highlanders continued to advance, and, after giving their fire close to the English line, which, from the density of the smoke, was scarcely visible even within pistol-shot, the right wing, consisting of the Athole Highlanders and the Camerons, rushed onward sword in hand, and broke through Barrel's and Monroe's regiments, which stood on the left of the first line. These regiments bravely defended themselves with their epontoons and bayonets; but such was the impetuosity of the onset, that they would have been cut to pieces had they not been supported by two regiments from the second line, on whose approach they retired behind the regiments on their right, after sustaining a loss in killed and wounded of upwards of 200 men. After breaking through these two regiments, the Highlanders hurried forward to attack the left of the second line. They were met by a tremendous fire of grape from the three field-pieces on the left of the second line, and by a discharge of musketry from Bligh's and Sempill's regiments, which carried havoc through their ranks, and made them at first recoil; but, maddened by despair, and utterly regardless of their lives, they rushed upon an enemy whom they felt but could not see amid the cloud of smoke in which the assailants were wrapped. By the Stewarts of Appin, the Frasers, the M'Intoshes, and the other centre regiments, a charge as fierce was made on the foe before them, driving them back upon the second line, which they also attempted to break; but,

finding themselves unable, they gave up the contest, not, however, until numbers had been cut down at the cannon's mouth. While advancing towards the second line, Lord George Murray, in attempting to dismount from his horse, which had become unmanageable, was thrown; but, recovering himself, he ran to the rear and brought up two or three regiments from the second line to support the first; but though they gave their fire, nothing could be done,—all was lost. Unable to break the second line, and terribly cut up by the fire of Wolfe's regiment, and by Cobham's and Kerr's dragoons, who had formed *en potence* on their right flank, the right wing also gave up the contest, and, turning about, cut their way back, sword in hand, through those who had advanced and formed on the ground they had passed over in charging to their front.

In consequence of the unwillingness of the left to advance first as directed, Lord George Murray had sent the order to attack from right to left; but, hurried by the impetuosity of the M'Intoshes, the right and centre did not wait till the order, which required some minutes in the delivery, had been communicated along the line. Thus the right and centre had considerably the start, and, quickening their pace as they went along, had closed with the front line of the English army before the left had got half way over the ground that separated the two armies. The difference between the right and centre and the left was rendered still more considerable from the circumstance, as noted by an eye-witness, that the two armies were not exactly parallel to one another, the right of the Prince's army being nearer the Duke's than the left. Nothing could be more unfortunate for the Prince than this isolated attack, as it was only by a general shock on the whole of the English line that he had any chance of victory.

The clan regiments on the left of the line, fearful that they would be flanked by Pulteney's regiment and the horse which had been brought up from the *corps de reserve*, held back. After receiving the fire of the regiments opposite to them, they answered it by a general discharge, and drew their swords for the attack; but, observing that the right and centre had given way, they turned their backs and fled without striking a blow. Stung to the quick by the misconduct of the M'Donalds, the gallant Keppoch advanced with drawn sword in one hand and pistol in the other; but he had not gone far when a musket-shot brought him down. He was followed by Donald Roy M'Donald, formerly a lieutenant in his own regiment, and now a captain in Clanranald's, who, on Keppoch's falling, entreated him not to throw away his life, assuring him that his wound was not mortal, and that he might easily join his regiment in the retreat; but—with the exclamation, 'My God! have the children of my tribe forsaken me?'—Keppoch refused to listen to the solicitations of his clansman, and, after recommending him to look to himself, and receiving another shot, he fell to rise no more.

Fortunately for the Highlanders, the English army did not follow up the advantage it had gained by an immediate pursuit. Kingston's horse at first chased the M'Donalds, some of whom were almost surrounded by them; but they were kept in check by the French piquets. The dragoons on the left of the English line were in like manner kept at bay by Ogilvy's regiment, which faced about upon them several times. After these ineffectual attempts, the English cavalry on the right and left met in the centre; and, the front line having dressed its ranks, orders were issued for the whole to advance in pursuit.

Charles, who, from the small eminence on which he stood, had observed with the deepest concern the defeat and flight of the clans, was about to advance to rally them, contrary to the earnest entreaties of Sir Thomas Sheridan and others, who assured him that he would not succeed. All their expostulations would, it is said, have failed, had not General O'Sullivan laid hold of the bridle of Charles's horse, and led him off the field. It was, indeed, full time to retire, as the whole army was now in full retreat, followed by Cumberland's forces.

To protect the Prince and secure his escape, most of his horse assembled about his person; but there was little danger, as the victors advanced very leisurely, and confined themselves to cutting down defenceless stragglers who fell in their way. After leaving the field, Charles put himself at the head of the right wing, which retired in such order that the cavalry sent to pursue could make no impression on it.

At a short distance from the field of battle, Charles separated his army into two parts. One of these divisions, consisting, with the exception of the Frasers, of the whole of the Highlanders and the low country regiments, crossed the river Nairn, and proceeded towards Badenoch; the other, comprising the Frasers, Lord John Drummond's regiment, and the French piquets, took the road to Inverness. The first division passed within pistol-shot of the body of English cavalry which, before the action, had formed in the rear of the Highland army, without the least interruption. An English officer, who had the temerity to advance a few paces to seize a Highlander, was instantly cut down by him and killed on the spot. The Highlander, instead of running away, deliberately stooped down, and, pulling out a watch from the pocket of his victim, rejoined his companions. From the evenness of the ground over which it had to pass, the smaller body of the Prince's army was less fortunate, as it suffered considerably from the attacks of the Duke's light horse before it reached Inverness. Numerous small parties, which had detached themselves from the main body, fell under the sabres of the cavalry; and many of the inhabitants of the town and neighbourhood, who, from motives of curiosity, had come out to witness the battle, were slaughtered without mercy by the ferocious soldiery, who, from the similarity of garb, were perhaps unable to distinguish them from Charles's troops. This indiscriminate massacre continued all the way from the field of battle to a place called Mill-burn, within a mile of Inverness. Not content with the profusion of bloodshed in the heat of action and during the pursuit, the infuriated soldiery, provoked by their disgraces at Prestonpans and Falkirk, traversed the field of battle, and massacred in cold blood the maimed and dying. Even some officers, whose station in society, apart altogether from feelings of humanity, to which they were utter strangers, should have made them superior to this vulgar triumph of base and illiberal minds, joined in the work of assassination. To extenuate the atrocities committed in the battle, and the subsequent slaughters, a forged regimental order, bearing to be signed by Lord George Murray, by which the Highlanders were enjoined to refuse quarter to the royal troops, was afterwards published, it is said under the auspices of the Duke of Cumberland; but the deception was easily seen through. As no such order was alluded to in the official accounts of the battle, and as, at the interview which took place between the Earl of Kilmarnock and Lord Balmerino, on the morning of their execution, both these noblemen stated their entire ignorance of it, no doubt whatever can exist of the forgery. The conduct of Charles and his followers, who never indulged in any triumph over their vanquished foes, but always treated them with humanity and kindness, high as it is, stands higher still in contrast with that of the royal troops and their commander.

From the characteristic bravery of the Highlanders, and their contempt of death, it is likely that some of those who perished, as well on the field after the battle as in the flight, did not yield their lives without a desperate struggle; and history has preserved one case of individual prowess, in the person of Golice Macbane, that deserves to be recorded. This man, who is represented to have been of the gigantic stature of 6 feet 4½ inches, was beset by a party of dragoons. Assailed, he set his back against a wall, and, although covered with wounds, defended himself with target and claymore against the onset. Some officers, who observed the unequal conflict, were so struck with the desperate bravery of Macbane, that they gave orders to save him;

but the dragoons, exasperated by his resistance, and the dreadful havoc he had made among their companions, thirteen of whom lay dead at his feet, would not desist till they had cut him down.

According to the official accounts published by the government, the royal army had only 50 men killed, and 259 wounded, including 18 officers, 4 of whom were killed. Lord Robert Kerr, second son of the Marquis of Lothian, and captain of grenadiers in Barrel's regiment, was the only person of distinction killed; he fell covered with wounds, at the head of his company, when the Highlanders attacked his regiment. The loss on the opposite side was never ascertained with any degree of precision. The number of the slain is stated, in some publications of the period, to have amounted to upwards of 2000 men, but these accounts are exaggerated. The loss could not, however, be much short of 1200 men. The Athole brigade alone lost more than the half of its officers and men, and some of the centre battalions came off with scarcely a third of their men. The M'Intoshes, who were the first to attack, suffered most. With the exception of three only, all the officers of this brave regiment, including M'Gillivray of Drumnaglass, its colonel, the lieutenant-colonel, and major, were killed in the attack. All the other centre regiments also lost several officers. M'Lauchlan, colonel of the united regiment of M'Lauchlan and M'Lean, was killed by a cannon-ball in the beginning of the action, and M'Lean of Drimmin, who, as lieutenant-colonel, succeeded to the command, met a similar fate from a random shot. He had three sons in the regiment, one of whom fell in the attack, and, when leading off the shattered remains of his forces, he missed the other two, and, in returning to look after them, received the fatal bullet. Charles Fraser, younger of Inverallochie, lieutenant-colonel of the Fraser regiment, and, in the absence of the Master of Lovat, commander of it on this occasion, was also killed. When riding over the field after the battle, the Duke of Cumberland observed this brave youth lying wounded. Raising himself upon his elbow, he looked at the Duke, who, offended at him, said to one of his officers: 'Wolfe, shoot me that Highland scoundrel who thus dares to look on us with so insolent a stare.' Wolfe, horrified at the inhuman order, replied that his commission was at his royal highness's disposal, but that he would never consent to become an executioner. Other officers refusing to commit this act of butchery, a private soldier, at the command of the Duke, shot the hapless youth before his eyes. The Appin regiment had 17 officers and gentlemen slain, and 10 wounded; and the Athole brigade, which lost fully half its men, had 19 officers killed and 4 wounded. The fate of the heroic Keppoch has been already mentioned. Among the wounded, the principal was Lochiel, who was shot in both ankles with grape-shot at the head of his regiment, after discharging his pistol, and while in the act of drawing his sword. On falling, his two brothers, between whom he was advancing, raised him up, and carried him off the field in their arms. To add to his misfortunes, Charles also lost a considerable number of gentlemen, his most devoted adherents, who had charged on foot in the first rank.

Lord Strathallan was the only person of distinction that fell among the low country regiments. Lord Kilmarnock and Sir John Wedderburn were taken prisoners. The former, in the confusion of the battle, mistook, amidst the smoke, a party of English dragoons for Fitz-James's horse, and was taken. Having lost his hat, he was led bare-headed to the front line of the English infantry. His son, Lord Boyd, who held a commission in the English army, unable to restrain his feelings, left the ranks, and, going up to his unfortunate parent, took off his own hat, placed it on his father's head, and returned to his place without uttering a word.

At other times, and under different circumstances, a battle like that of Culloden would have been regarded as an ordinary occurrence, of which, when all matters were duly considered, the victors could make small boast. The Highland army did not exceed 5000 fight-

ing men; and when it is considered that they had been two days without sleep, were exhausted by the march of the preceding night, and had scarcely tasted food for forty-eight hours, the wonder is that they fought so well as they did, against an army almost double in point of numbers, and labouring under none of the disadvantages to which, in a more especial manner, the overthrow of the Highlanders is to be ascribed. Nevertheless, as the spirits of the great majority of the nation had been sunk to the lowest state of despondency by the reverses of the royal arms at Prestonpans and Falkirk, this unlooked-for event was hailed as one of the greatest military achievements of ancient or modern times; and the Duke of Cumberland, who had, in consequence, an addition of £25,000 per annum made to his income by parliament, was regarded as the greatest hero of ancient or modern times. In its consequences, as entirely and for ever destructive of the claims of the unfortunate house of Stuart, the battle was one of the most important ever fought. Though vanquished, the Highlanders retired from the field with honour, and free from that foul reproach which has fixed an indelible stain upon the memories of the victors.

After the carnage of the day had ceased, the brutal soldiery, who, from the fiendish delight which they took in sprinkling one another with the blood of the slain, 'looked,' as stated by one of themselves, 'like so many butchers rather than an army of Christian soldiers,' dined on the field of battle. After his men had finished their repast, the Duke of Cumberland marched forward to take possession of Inverness, and on his way received a letter, which had been addressed to General Bland, signed by six of the French officers in the insurgent army, offering in behalf of themselves and their men to surrender unconditionally to His Royal Highness. As he was about to enter the town he was met by a drummer, who brought him a message from General Stapleton, offering to surrender and asking quarter. On receiving this communication, the Duke ordered Sir Joseph Yorke, one of his officers, to alight from his horse, and pencil a note to General Stapleton, assuring him of fair quarter and honourable treatment. The town was then taken possession of by Captain Campbell, of Sempill's regiment, with his company of grenadiers.

Notwithstanding the massacres which were committed immediately after the battle, a considerable number of wounded Highlanders still survived, some of whom had taken refuge in a few cottages adjoining the field of battle, while others lay scattered among the neighbouring inclosures. Many of these men might have recovered if ordinary attention had been paid to them; but the stern Duke, considering that those who had risen in rebellion against his father were not entitled to the rights of humanity, entirely neglected them. But, barbarous as such conduct was, it was only the prelude to enormities of a still more revolting description. At first the victors conceived that they had completed the work of death by killing all the wounded they could discover; but when they were informed that some still survived, they resolved to despatch them. A Mr Hossack, who had filled the situation of provost of Inverness, and who had, under the direction of President Forbes, performed important services to the government, having gone to pay his respects to the Duke of Cumberland, found Generals Hawley and Musko deliberating on this inhuman design. Observing them intent upon their object, and actually proceeding to make out orders for killing the wounded Highlanders, he ventured to remonstrate against such a barbarous step. 'As his majesty's troops have been happily successful against the rebels, I hope,' he said, 'your excellencies will be so good as to mingle mercy with judgment.' Hawley, in a rage, cried out, 'D—n the puppy! does he pretend to dictate here? Carry him away!' Another officer ordered Hossack to be kicked out, and the order was obeyed with such instantaneous precision, that the ex-provost found himself at the bottom of two flights of steps almost in a twinkling.

In terms of the cruel instructions alluded to, a party

was despatched from Inverness the day after the battle to put to death all the wounded they might find in the inclosures adjoining the field of Culloden. These orders were fulfilled with a punctuality and deliberation that is sickening to read of. Instead of despatching their unfortunate victims on the spot where they found them, the soldiers dragged them from the places where they lay weltering in their gore, and, having ranged them on some spots of rising ground, poured in volleys of musketry upon them. Next day parties were sent to search all the houses in the neighbourhood of the field of battle, with instructions to carry thither all the wounded Highlanders they could find and despatch them. Many were in consequence murdered; and the young laird of M'Leod was heard frankly to declare, that on this occasion he himself saw seventy-two persons killed in cold blood. The feelings of humanity were not, however, altogether obliterated in the hearts of some of the officers, who spared a few of the wounded. In one instance the almost incredible cruelty of the soldiery was strikingly exemplified. At a short distance from the field of battle there stood a small hut, used for sheltering sheep and goats in cold and stormy weather, into which some of the wounded had crawled. On discovering them the soldiers immediately secured the door, to prevent egress, and thereupon set fire to the hut in several places, and all the persons within, to the number of between thirty and forty, perished in the flames.

Another instance of fiendish cruelty occurred the same day. Almost immediately after the battle, nineteen wounded officers of the Highland army, unable to follow their retiring companions, secreted themselves in a small plantation near Culloden House. Thence they were afterwards carried to the courtyard of the mansion, where they remained two days in great torture weltering in their blood, and without the least medical aid or attention but such as they received from the President's steward, who, at the hazard of his own life, alleviated the sufferings of his unhappy countrymen by several acts of kindness. These wretched sufferers were now tied with ropes by the brutal soldiery, thrown into carts, and carried out to a park wall at a short distance from Culloden House. Dragged out of the carts, they were ranged in order along the wall, and were told by the officer in command of the party to prepare for death. Such of them as retained the use of their limbs fell down upon their knees in prayer; but they had little time allowed them to invoke mercy, for in a minute the soldiers received orders to fire, and, from a distance of only two or three yards, the unfortunate gentlemen were almost all instantly shot dead. To complete the butchery, the soldiers were ordered to club their muskets and dash out the brains of such as showed any symptoms of life, an order which, horrible to tell, was actually fulfilled. A gentleman named John Fraser, who had been an officer in the Master of Lovat's regiment, alone survived. He had received a ball, and, being observed to be still alive, was struck on the face by a soldier with the butt end of his musket. Though one of his cheek-bones and the upper part of his nose were broken, and one of his eyes dashed out by the blow, he still lived, but the party, thinking they had killed him, left him for dead. He would probably have expired, had not the attention of Lord Boyd, son of the Earl of Kilmarnock, when riding past, been fortunately attracted by the number of dead bodies lying together. Espying, at a little distance from the heap, one body stirring, his lordship went up, and having ascertained from the mouth of the sufferer who he was, ordered his servant to carry Mr Fraser to a cottage near at hand, where he lay concealed for three months. He lived several years afterwards, but was a cripple for life.

Cullow, a farm in the parish and near the hamlet of

Cortachy, NW Forfarshire, 5 miles N of Kirriemuir. A sheep fair is held here on the last Friday of April.

Cully. See CALLY.

Cullykhan, a romantic ravine in the E of Gamrie parish, Banffshire, traversed by a brook, and descending to the sea, near Troup House.

Culmallie. See GOLSPIE.

Culquhanny. See COLQUHONY.

Culrain, a station in Kincardine parish, N Ross-shire, on the Highland railway, 3 miles NW of Ardgay, with a post office. Near it is Culrain Lodge.

Culross, a small town and a parish in the detached district of Perthshire until 1891, when the Boundary Commissioners transferred them wholly to the county of Fife. A royal and parliamentary burgh, the town

Seal of Culross.

stands on the Firth of Forth, 2½ miles SSE of East Grange station, this being 6 miles W by N of Dunfermline, and 7¾ ESE of Alloa. It occupies the face of a brae, amid gardens and fruit-trees, and, as seen from the Firth, has a pleasing and picturesque aspect; but, once a place of importance, it has fallen into great decay. It had a Cistercian abbey which possessed much wealth, and worked large neighbouring coal mines; it conducted so great a trade in salt and coal that sometimes as many as 170 foreign vessels lay off it simultaneously in the Firth, to receive the produce of its salt-pans and its mines; it carried on a great manufacture of the round iron baking-plates called girdles, which, as noticed in Scott's *Heart of Midlothian*, rendered its hammermen pre-eminently famous; and it acquired, towards the close of the 18th century, extensive works for the extraction of tar, naphtha, and volatile salt from coal. It lost, however, all these sources of prosperity, and with them its proper characteristics as a town; and it now is an old-world, sequestered place, whose chief attractions are its beautiful surroundings and various architectural antiquities, of which the 'Palace,' a house near the west end of the burgh, bearing dates 1597 and 1611, is one of the most interesting. Its abbey, dedicated to SS. Mary, Andrew, and Serf, was founded in 1217 by Malcolm, Earl of Fife, and, with the lands belonging to it, was granted to Sir James Colville, who, in 1609, was created Lord Colville of Culross. The aisleless choir, First Pointed in style, remains of the abbey church, together with a fine, lofty, and very perfect western tower, originally central, of early Second Pointed character; and the former, as modernised about 1824, serves as the parish church, containing nearly 700 sittings. The rest of the abbey is in ruins. A recess on the N side of the church is the burial-place of the Bruce family, and shows white alabaster effigies of Sir George Bruce (*ob.* 1625), his lady, and their eight children, and a niche for the silver casket in which was enshrined the heart of Edward, Lord Bruce, who fell in a dnel near Bergen-op-Zoom in

1613. Culross Abbey House, in the near vicinity of the church, was built in 1608 by Edward, Lord Bruce of Kinloss; and, bought from the Earl of Dundonald by Sir Robert Preston, by him was nearly demolished, and afterwards rebuilt in 1830, being now a spacious edifice, delightfully situated, commanding an extensive prospect of the basin of the Forth, and having in its policies a medlar tree and a noble Spanish chestnut, 80 feet high, and 19½ in girth at 1 foot from the ground. It again belongs to the Bruces in the person of the Honourable Robert Preston Bruce, brother of the Earl of Elgin. (See BROOMHALL.) The ancient parish church, ¼ mile W by N of the abbey, was formally superseded by the abbey church in 1633, and is now represented by some ruins of Norman or First Pointed origin, with several interesting tombstones. At the E end of the town are vestiges of a chapel, built in 1503 by Robert Blackadder, Archbishop of Glasgow, and dedicated to St Mungo or Kentigern, who is commonly stated to have been educated by St Serf at the monastery of Culross, against which Skene maintains that Kentigern died in extreme old age in 603, and that Servanus did not found the church of Culross till between the years 697 and 706 (*Celt. Scotland*, ii. 31, 184, 257). Anyhow an Episcopal church, Transition Norman in style, with nave, apse, N organ chamber, and bell-gable, containing a chime of three bells, was dedicated to St Serf in 1876. There are also a Free church and an endowed school, called Geddes' Institution, which, rebuilt by the late Miss Davidson at a cost of £1500, gives education to twenty boys and girls, and possesses one free Edinburgh bursary. There is a public school, with accommodation for 137 children. To the E of the town are remains of a hospital founded for twelve poor aged persons in 1637 by the first Earl of Elgin, but the revenue has been alienated. Charities of considerable value were instituted also by Dr Bill, Sir R. Preston, and Miss Halkerston of Carskerdo. The town has a post office under Dunfermline, with money order, savings bank, and telegraph departments, 2 inns, a plain town-house, a public library, a free reading-room, and a harbour for small craft. A new water supply was recently introduced from Glensherup in the Ochils. Only the basement of the Cross of Culross is ancient, the upper portion modern (1819). Erected into a burgh of barony in 1434, and into a royal burgh in 1588, it is governed by a provost, 2 bailies, a dean of guild, a treasurer, and 4 councillors; and unites with STIRLING, Dunfermline, Inverkeithing, and Queensferry in returning a member to parliament. The parliamentary constituency numbered 51 in 1892, when the annual value of real property amounted to £1559, while the corporation revenue for 1891 was £51. Pop. (1881) 373, (1891) 370.

The parish, containing also the villages of Blairburn, Comrie, and Low Valleyfield, is bounded NW by Clackmannan, NE and E by Saline, Carnock, and Torryburn, S by the Firth of Forth, SW and W by Tulliallan. Its utmost length, from N to S, is 4 miles; its breadth, from E to W, varies between 1½ and 3¼ miles; and its area is 8949 acres, of which 1311½ are foreshore and 54 water. The surface rises abruptly from the shore to 250 feet above sea-level behind Low Valleyfield, and undulates thence, in gentle inequalities, throughout most of the parish, attaining 317 feet near Mountclaret in the N, but nowhere forming anything that deserves to be called a hill. Bluther and Grange Burns are the chief streams. The rocks are mainly carboniferous; but, with the exception of Blairhall, the once extensive collieries are now too much exhausted to afford a profitable return. One pit near Culross Abbey House was carried almost a mile beneath the Firth, communicating there by a sea-shaft with an insulated wharf for the shipping of its coal; and was reckoned one of the greatest wonders in Scotland, but was drowned by the great storm of March 1625. Tradition relates that James VI., revisiting his native country in 1617, and dining at the Abbey House, expressed a desire to see this mine; that he was brought by his host, Sir George Bruce, to the said wharf; and that, on seeing himself surrounded by the waves, he raised his customary cry of

'Treason.' Whereon Sir George, pointing to an elegant pinnace moored at the wharf, offered him the choice of going ashore in it, or of returning by the way he came; and the King, preferring the shortest way, was taken directly ashore, expressing much satisfaction at what he had beheld (Forsyth's *Beauties of Scotland*, 1805). Ironstone occurs in thin seams between beds of clay slate, in different places, though not plentifully enough to defray the expense of working; and a bed of limestone 18 feet thick is found in one place at an awkward inclination. Fire-clay also occurs, and has been used for pottery. The soil, for the most part argillaceous, is mixed in many places with sand, and rests commonly on masses of sandstone or shale. Natives were Robert Pont (1529-1606), churchman and senator of the College of Justice; Henry Hunter, D.D. (1741-1802), a distinguished divine; and Thomas Cochrane, tenth Earl of Dundonald (1775-1860), author of *Autobiography of a Seaman*. The principal mansions are Culross Abbey (originally built in 1608 by Edward Lord Bruce of Kinloss), Culross Park, Valleyfield, Comrie Castle, Blair Castle, Brankston Grange, Balgowrie Lodge (old but modernised), and DUNIMARLE Castle, whose predecessor was till lately the supposed scene of the murder of Lady Macduff and her children. Seven proprietors hold each an annual value of £500 and upwards, 5 of between £100 and £500, and 16 of from £20 to £50. In the presbytery of Dunfermline and synod of Fife, Culross has been a collegiate charge since about 1640, when the town was at the height of its prosperity; the stipend of each minister is on an average £200. Valuation (1891) £6645. Pop. (1801) 1502, (1831) 1488, (1861) 1423, (1871) 1354, (1881) 1130, (1891) 1096.—*Ord. Sur.*, sh. 39, 1869. See *The Legends and Commemorative Celebrations of St Kentigern* (Edinb. 1872); the Rev. A. W. Hallen's 'Notes on the Secular and Ecclesiastical Antiquities of Culross,' in vol. xii. of *Procs. Soc. Ants. Scotl.* (1878); and D. Beveridge's *Culross and Tulliallan* (Edinb. 1885).

Culroy, a hamlet in Maybole parish, Ayrshire, 3 miles N of Maybole town.

Culsalmond, a hamlet and a parish in Garioch district, Aberdeenshire. The hamlet—a farm-house, the church, and the manse—stands at 600 feet above sea-level, near the left bank of the Ury, $4\frac{1}{2}$ miles NNE of its post-town and station, Insch, this being $27\frac{1}{2}$ miles NW of Aberdeen.

Containing also Colpy post-office hamlet, and bounded N by Fargue, NE by Auchterless, E by Rayne, S by Oyne, SW and W by Insch, the parish has an utmost length from N to S of 5 miles, a varying width from E to W of $1\frac{1}{2}$ and $3\frac{1}{2}$ miles, and an area of 6995 acres, of which 1 is water. The drainage is carried south-south-eastward by the upper URY; and the surface, sinking in the S to 310 feet above sea-level, thence rises northward to 431 feet at Little Ledikin, 521 near Mellenside, 607 at Fallow Hill, 1078 at the wooded Hill of Skares, and 1249 at the Hill of Tillymorgan. A fine blue slate was quarried prior to 1860; and a vein of ironstone, extending across the parish from Rayne to Insch, was proved, by specimens sent to Carron works, to contain a large proportion of good iron. A subterranean moss, in some parts more than 8 feet deep, occurs on Pulquhite farm; and a strong mineral spring, said to be beneficial in scrofulous complaints, is at Sauchen-loan. The soil is mainly a yellowish clay loam, lighter and mixed with fragments of slate on the uplands, and at Tillymorgan giving place to moss and inferior clay. Plantations cover a considerable area. Cairns were at one time numerous; two stone circles have left some traces on Colpy farm; two sculptured standing-stones are on the lands of Newton; and stone coffins, flint implements, etc., have been from time to time discovered. Newton and Williamston are the principal mansions; and 5 proprietors hold each an annual value of more, 3 of less, than £100. Culsalmond is in the presbytery of Garioch and synod of Aberdeen; the living is worth £172. The parish church, an old building, was the scene of one of those contests that led to the Disruption; and the neighbouring Free church, Early English in style, with

a tower, was erected in 1866 at a cost of £2000, its predecessor, from 1843, having been a mere wooden shed, in the 'deep hollow of Caden.' There are also a Congregational church and Tillymorgan Episcopal chapel (1851); whilst Culsalmond public school (rebuilt 1876) and Tillymorgan Episcopal school, with respective accommodation for 160 and 63 children, had (1891) an average attendance of 94 and 62, and grants of £83, 3s. and £54, 5s. Valuation £6415, 16s. 5d. Pop. (1801) 730, (1831) 1138, (1861) 1165, (1871) 896, (1881) 828, (1891) 791.—*Ord. Sur.*, sh. 86, 1876.

Culsh. See DEER, NEW.

Culter, a village, an estate, and a rivulet, Aberdeenshire. The village has a station on the Deeside railway, within Peterculter parish, near the influx of Culter rivulet to the Dee, $7\frac{1}{2}$ miles WSW of Aberdeen. Pop. (1891) 346. The estate is mainly in Peterculter parish, partly in Drumoak, and from the 13th century till 1726 belonged to a branch of the Cummings. Culter House here, 1 mile NE of the station, is a large old mansion, said to have been built by Sir Alexander Cumming, who, in 1695, was created a Baronet, and whose son, Sir Archibald (1700-75), for a time was ruler of the Cherokees. It belongs to the trustees of the late Right Hon. Sir Robert Wm. Duff, of Fetteresso and Glassaugh, who, born in 1835, died in 1895 at Sydney, New South Wales, over which he had been appointed governor in 1893. The rivulet rising on the W border of Cluny parish, meanders 10 miles eastward, through Cluny and on Cluny's boundaries with Midmar and Echt; expands into Loch Skene, on the mutual boundary of Echt and Skene; and proceeds thence 4 miles south-eastward, partly on the same boundary, partly through Peterculter, to the Dee. Its lower reaches, with features of lake and linn, steep banks and wooded cliffs, bridges and mills, present a series of romantic scenes. See PETEROULTER.

Culter, a village in the upper ward and the E of Lanarkshire, and a parish formerly also in Peebleshire. The village stands upon Culter Water, $2\frac{1}{2}$ miles SSW of Biggar, and $1\frac{1}{2}$ mile SSE of Culter station on the Peebles branch of the Caledonian, this being $1\frac{1}{2}$ mile W by N of Symington Junction, and $17\frac{1}{2}$ miles W by S of Peebles. It chiefly consists of neat houses, embowered among shrubs and trees; at it are the parish church, a public school, and a post office under Biggar; whilst a Free church stands 1 mile to the N.

The parish is bounded N by Biggar and Skirling, E by the Kilbucho and Glenholm portions of Broughton, SE by Drummelzier, SW by Crawford and Lamington, and NW by Symington. In shape resembling a rude triangle, it has an utmost length from N by W to S by E of $7\frac{1}{2}$ miles, an utmost breadth from E to W of $3\frac{1}{2}$ miles, and, until 1891, had an area of 11,932 $\frac{1}{2}$ acres. In that year 1708 acres that were in Peebleshire were transferred by the Boundary Commissioners to the Peebleshire parish of BROUGHTON. The CLYDE winds $2\frac{1}{2}$ miles north-north-eastward along all the Symington border; and its affluent Culter Water, formed by three head-streams in the southern extremity of the parish, runs $6\frac{1}{2}$ miles northward and north-westward, first through a narrow glen, where it makes some romantic falls, and next across a finely-wooded, cultivated plain. The surface sinks near Culter station, at the NW corner of the parish, to 665 feet above sea-level, thence rising eastward to 1345 feet on the Hartree Hills, and southward to 820 near Cornhill, 745 at Highfield, 939 at Nether Hangingshaw, 1187 on Snaiþ Hill, 1596 on Turkey Hill, 1880 on *Scaudmans Hill, 2087 on *King Bank Head, 1578 on Ward Law, 2454 on *Culter Fell, 1769 on Woodycleuch Dod, 1679 on Knock Hill, 1874 on Snowgill Hill, and 2141 on *Hillshaw Head, where asterisks mark those summits that culminate on the Peebleshire border. The northern district comprises a considerable portion of the broad dingle extending from the Clyde in the neighbourhood of Symington eastward to the lower reach of Biggar Water; with its mansions, lawns, and groves, it presents an aspect more like that of a rich English level than like that of a Scottish hill region. The southern district exhibits a striking con-

trast to the northern, a long range of green hills, partly planted and parked, rising steeply from the plains and gradually merging into heathy mountains, the 'divide' between Clydesdale and Tweeddale. The rocks include some Devonian conglomerate, but are mainly Silurian; whilst the soil over most of the lower grounds is a sandy loam, and on the braes and hills is light and dry. About one-third of the area is either regularly or occasionally in tillage, and upwards of 400 acres are under wood. The antiquities include five circular camps, two tumuli, and the remains of Cow Castle near the eastern border. Culter Allers House, near the village, a fine Scottish Baronial edifice built in 1882, is the seat of Robert G. Baillie, Esq. of Culter Allers; and other mansions, separately noticed, are Birthwood, Cornhill, Culter Mains, and Hartree. Culter is in the presbytery of Biggar and synod of Lothian and Tweeddale; the living is worth £252. The parish church, built in 1810, contains 300 sittings; and the Free church, dating from 1843, was restored in 1874 at a cost exceeding £900. The public school, with accommodation for 88 children, had (1891) an average attendance of 51, and a grant of £60, 0s. 6d. Valuation £8941, 7s. 6d., of which £2141, 14s. 6d. was in Peebleshire. Pop. (1801) 369, (1831) 497, (1861) 665, (1871) 593, (1881) 574, (1891) 559.—*Ord. Sur.*, sh. 24, 1864.

Culterculen, a village, with a public school, in Foveran parish, Aberdeenshire, $1\frac{1}{2}$ mile E by S of Udney station, and 15 miles N by W of Aberdeen, under which it has a post office.

Culter Mains, an estate, with a mansion, in Culter parish, Lanarkshire, $3\frac{3}{4}$ miles SW of Biggar. The mansion, finely embowered amid luxuriant plantations, dating from 1838, is in the Elizabethan style of architecture, and is situated a short distance from the right bank of the Clyde. Adam Sim, Esq., a former proprietor, gathered together here a fine collection of objects, rare, curious, and antique, which was, however, dispersed at his death.

Cultoquhey, an estate, with a mansion, on the W border of Fowllis-Wester parish, Perthshire. The mansion stands $2\frac{1}{2}$ miles NE of Crieff, and is a graceful edifice in the Tudor style, after designs by Smirke. The property of the Maxtones since 1410 and earlier, the estate is now held by Jas. Maxtone Graham, Esq. (b. 1819; suc. 1846), the thirteenth in unbroken male descent, who assumed the name of Graham on succeeding in 1859 to the lands of Redgorton.

Cults, a parish of central Fife, containing to the W the post-office village of Pitlessie, $4\frac{1}{2}$ miles SW of Cupar and $2\frac{1}{2}$ E of its station and post-town, Ladybank. Bounded N by Monimail and Cupar, E by Ceres, S by Kettle, and W by Kettle and Collesie, it has an utmost length from N to S of $2\frac{1}{4}$ miles, a varying width from E to W of 9 furlongs and $2\frac{3}{4}$ miles, and had an area of 2925 acres until 1891, when the Sweethome detached portion (93 acres) was transferred by the Boundary Commissioners to the parish of Collesie. The EDEN winds 3 miles north-eastward along the Collesie and Cupar borders and through the interior; where it quits the parish in the furthest N, the surface sinks to close on 100 feet above sea-level, thence rising to 698 feet near Brotus in the SW and 622 at Walton Hill, which latter, however, culminates just within Ceres. The rocks are chiefly carboniferous; and sandstone, limestone, and coal are extensively worked. The soil, in the N, is a light brownish sand; in the centre, is chiefly a soft black loam; on the sides and tops of the hills, is a strong fertile clay. A fort on the western slope of Walton Hill is the only antiquity of Cults, whose greatest son was Scotland's greatest painter, Sir David Wilkie (1785-1841), born in the simple manse. His father was parish minister, and at the school here Davie is said to have liked best 'to lie agroupe on the grun wi' his slate and pencil,' at the church to have sketched the portraits for 'Pitlessie Fair' (1804) and the 'Village Politicians' (1806). CRAWFORD PRIORY is the chief mansion, and Lady Gertrude Cochran chief proprietor. Giving off a portion to Springfield *quoad sacra* parish, Cults is in the presbytery of Cupar and synod of Fife; the living is worth £175. The

church, 1 mile ENE of Pitlessie, was built in 1793, and, as enlarged in 1835, contains 430 sittings; the interior is adorned with a noble piece of sculpture by Chantrey, erected by Wilkie in memory of his parents. At Pitlessie also are a U.P. church and Cults public school, which, with accommodation for 150 children, had (1891) an average attendance of 107, and a grant of £96, 5s. Valuation (1892) £5366, 10s. Pop. (1801) 699, (1831) 903, (1861) 800, (1871) 767, (1881) 704, (1891) 700.—*Ord. Sur.*, sh. 40, 1867.

Cults, a hamlet in the former Aberdeenshire section of Banchory-Devenick parish, but transferred by the Boundary Commissioners in 1891, with this section, to the Aberdeenshire parish of Peterculter. It stands near the left bank of the Dee, with a station on the Deeside railway, 4 miles WSW of Aberdeen, under which it has a post office, with money order, savings bank, and telegraph departments. At it are a Free church and an endowed school; and near it stands Cults House. Two stone coffins, containing human remains, were found a little to the N of this mansion in 1850; and three large cairns are still on the estate.

Culvain, a summit, 3224 feet high, in Kilmallie parish, Inverness-shire, $2\frac{1}{2}$ miles SSE of the head of Loch Archaig.

Culzean. See COLZEAN.

Cumbernauld, an ancient town and a parish in the detached section of Dumbartonshire. The town is situated on the high road from Glasgow to Edinburgh through Falkirk, $1\frac{1}{2}$ mile N of Cumbernauld station on the Caledonian, and 2 miles SW of Castlecary station on the North British, this being $15\frac{1}{2}$ miles NE of Glasgow, $6\frac{1}{2}$ W by S of Falkirk, and $31\frac{1}{2}$ W by N of Edinburgh. A picturesque old place, sheltered to E and SE by the grounds of Cumbernauld House, it was created a burgh of barony in 1649, and has a post office under Glasgow, a branch of the Royal Bank, a local savings bank, several inns, gas-works, newsroom and public library, many new handsome villas, and a cattle-fair on the second Thursday of May. The parish church here is an old building, containing 660 sittings; the Free church dates from 1826, having belonged to the Original Secession, but has been lately almost rebuilt; and there is also a U.P. church. Handloom weaving of checks and other striped fabrics is still carried on, but mining and quarrying are the staple industries. Pop. (1861) 1561, (1871) 1193, (1881) 1064, (1891) 960.

The parish, containing also the village of CONDORRAT, was disjoined from Kirkintilloch in 1649, under the name of Easter Lenzie. It is bounded NW by Kilsyth, NE by Denny, and E by Falkirk, all three in Stirlingshire; S by New Monkland, in Lanarkshire; and W by Kirkintilloch. Its utmost length, from E to W, is $7\frac{1}{4}$ miles; its utmost breadth, from N to S, is 4 miles; and its area is 11,804 acres, of which 168 $\frac{1}{2}$ are water. Fannyside Loch, $2\frac{3}{4}$ miles SE of the town, is the only one that has not been drained of several lakes; it is $6\frac{3}{4}$ furlongs long and from 1 to 2 furlongs broad. The new-born KELVIN traces $3\frac{1}{4}$ miles of the north-western, and LUGGIE Water $4\frac{1}{2}$ miles of the southern border; whilst the former throughout is also closely followed by $4\frac{1}{2}$ miles of the Forth and Clyde Canal. The surface is prettily diversified with gentle acclivities and fertile vales, sinking in the W to close on 200 feet above sea-level, and rising eastward to 482 feet at Croy Hill, 513 near Carrickstone, 528 near West Forest, and 580 near Garbet on Fannyside Muir, which, yielding now nothing but gorse and heather, was, down to a comparatively recent period, occupied by a remnant of the ancient Caledonian Forest. Here, till at least 1571, the savage white cattle still ran wild, since in that year a writer complains of the havoc committed by the King's party on the deer in the forest of Cumbernauld and its 'quhit ky and bullis, to the gryt destructione of polecie and hinder of the commonweil. For that kynd of ky and bullis hes bein keptit this money yeiris in the said forest; and the like was not mentenit in any uther partis of the Ile of Albion.' The rocks are partly eruptive, partly belong to the Carboniferous Limestone

series. A colliery is at Netherwood; ironstone has been mined to a small extent by the Carron Company; and limestone, brick-clay, sandstone, and trap are all of them largely worked, the sandstone for building, the trap for road-metal, paving, and rough masonry. The soil varies in quality, but is chiefly a deep clay of tolerable fertility. Fully eleven-sixteenths of the entire area are under the plough; woods may cover one-sixteenth more; and the rest is pastoral or waste. ANTONINUS' WALL, traversing all the northern border, nearly in the line of the canal, has left some scanty remains; and a Roman road, leading southward from Castlecary, is partially traceable on Fannyside Muir. On the standing-stone of Carrickstone Bruce is said by tradition to have planted his standard, when marshalling his forces on the eve of the battle of Bannockburn; and pre-Reformation chapels are thought to have existed at Achenbee, Achenkill, Chapelton, Kildrum, Kilmuir, and Croy. Cumbernauld House, standing amid an extensive park, $\frac{1}{2}$ mile ESE of the town, superseded an ancient castle, which, with its barony, passed about 1306 from the Comyns to Sir Robert Fleming, whose grandson, Sir Malcolm, was lord of both BIRGAR and Cumbernauld; it is now a seat of John William Burns, Esq. of Kilmahew (b. 1837; suc. 1871), owner of 1670 acres in the shire, valued at £3394 per annum. Other mansions are Dullatur House, Nether Croy, and Greenfaulds. Taking in *quoad sacra* a small portion of Falkirk parish, Cumbernauld is in the presbytery of Glasgow and synod of Glasgow and Ayr; the living is worth £340. Four public schools—Cumbernauld, Drumglass, Southern District, and South Muirhead (Arns)—with respective accommodation for 361, 195, 52, and 50 children, had (1891) an average attendance of 226, 137, 54, and 22, and grants of £251, 4s. 6d., £139, 11s. 6d., £47, 19s. 6d., and £32, 7s. Valuation £25,098, 15s. Pop. (1801) 1795, (1831) 3080, (1861) 3513, (1871) 3602, (1881) 4270, (1891) 4283.—*Ord. Sur.*, sh. 31, 1867.

Cumbræ, Great, Big, or Meikle, an island of Buteshire in the Firth of Clyde, $2\frac{1}{2}$ miles E of Bute at the narrowest, and $1\frac{1}{2}$ mile WSW of Largs in Ayrshire. Resembling a pointed tooth in outline, with Farland and Portachur Point for fangs, and between them the town of MILLPORT on islet Millport Bay, it has an utmost length of $3\frac{3}{4}$ miles from NNE to SSW, viz., from Tomont End to Portachur Point; an utmost width, from E to W, of 2 miles; a circumference of $10\frac{1}{2}$ miles; and an area of $3120\frac{1}{2}$ acres. A road has been lately formed right round the island, whose immediate seaboard is a low, flat beach, backed generally by steepish slopes, and, to the SE, by bolder but verdure-clad cliffs that rise to 302 feet within 3 furlongs of the shore, and present in the Lion Rock a quasi-miniature of Arthur's Seat. The interior is hilly, culminating at 417 feet towards the centre of the island, to the W of three little lochs, one of which sends off a rivulet southward to Millport Bay. The principal rock is Old Red sandstone, disrupted and overlaid by various traps. The sandstone is similar to that of the mainland, from which it appears to have been severed by sea erosion; the traps are chiefly greenstone, and in the form of dykes have strangely altered the sandstone strata, fusing and recouolidating them into a dark quartz-like substance. Many of the dykes, having better withstood the denudating influence of air and water, stand out boldly from the sandstone; and two especially, to the SE, look like Cyclopean walls, 100 and 205 feet long, and 40 and 75 feet high. These are deemed, in the island folklore, to be remains of a huge bridge, reared by witchcraft and devilry to link Cumbræ to the Ayrshire coast. The soil is varied. On the higher parts of the island it is light, gravelly, and thin, bedded on moss, and covered with heath; in some of the valleys is a fertile loam, and produces excellent crops; along the E coast is light and sandy; and in the S abounds in marl. Draining, seaweed manuring, and liming have effected great improvements; and wheat, early potatoes, and turnips are very extensively grown. Most of the farms carry stocks of from 20 to 40 dairy cows. The climate is both

healthy and pleasant, less moist than that of Arran or the mainland. Included once in the Hebrides, Cumbræ was held by the Norsemen; and, after its cession to Scotland, belonged for some time to the Stuarts, who later mounted the throne. A cairn on the NE coast and the remains of BILLIKELLET are the only antiquities, as no traces are left of the camp that Haco is said to have formed on the eve of the battle of Largs. In 1609 we find the captain of Dumbarton Castle complaining that 'Robert Hunter of Hunterston and Thomas Boyd, provost of Irwiny, had gone to the Isle of Comra, and tane away all the hawks thereon,' which hawks, it appears, were a famous breed belonging to the king. The GARRISON is the only mansion, and together with the entire island belongs to the Marquis of Bute. By itself Great Cumbræ is a parish in the presbytery of Greenock and synod of Glasgow and Ayr; the living is worth £265. Places of worship are noticed under MILLPORT; and a public school, with accommodation for 312 children, had (1891) an average attendance of 239, and a grant of £206, 12s. Valuation (1892) £13,073, 12s. Pop. (1801) 506, (1831) 912, (1861) 1236, (1871) 1613, (1881) 1856, (1891) 1784.—*Ord. Sur.*, sh. 21, 1870. See D. Landsborough's *Excursions to Arran and the two Cumbræes* (Edinb. 1851), and Arch. McNeillage, 'On the Agriculture of Buteshire' in *Trans. Highl. and Ag. Soc.*, 1881.

Cumbræ, Little, an island of Buteshire, until 1891 in the parish of Ardrrossan and registration district of West Kilbride, but in that year transferred by the Boundary Commissioners to the parish and registration district of Cumbræ. It is $1\frac{1}{2}$ mile SSW of Millport, and about the same distance E of the southern extremity of Bute and W of the Ayrshire coast. Triangular in shape, with base to SW and apex to NNE, it has an utmost length and breadth of $1\frac{3}{4}$ mile and $7\frac{3}{4}$ furlongs, whilst its area is estimated at 723 acres. The surface rises, in a series of terraces, to 409 feet above sea-level toward the middle of the island, and, with the exception of a few patches of potatoes and ordinary garden produce, is all wild moorland, burrowed by rabbits, and grazed by scattered sheep. The geological formation is Secondary trap, resting on a substratum of Old Red sandstone. A circular lighthouse, 30 feet high, the earliest but one in Scotland, was built on the highest point about 1750, and commands a magnificent panoramic view; but has been superseded by another lighthouse on the western coast, which was built in 1826, raises its lantern 115 feet above high water, and shows a fixed white light, visible at a distance of 16 miles. A fog trumpet gives blasts of five seconds' duration, with intervals of 18 to 20 seconds between. A strong old tower, on an islet off the E coast, believed to have been erected as a watch-post against the Scandinavian rovers, was surrounded by a rampart and a fosse, and accessible only by a draw-bridge. It belonged to the Eglinton family, who still are proprietors of the island; gave refuge, in times of trouble, to that family's friends; was surprised and burned by the troops of Oliver Cromwell; and now is roofless and dilapidated. On the NE slope of the hill are the tomb and ruined chapel of St Voy. Valuation £308. Pop. (1831) 17, (1861) 20, (1871) 11, (1881) 23, (1891) 17.

Cuminestown, a straggling village in Monquhitter parish, N Aberdeenshire, 6 miles E by N of Turriff, under which it has a post office, with money order and savings bank departments. Founded in 1763 by Cumine of Anchry, it contains a branch of the Town and County Bank and the plain Episcopal chapel of St Luke (1844; 130 sittings), whilst adjoining the parish church is the Free church of Monquhitter. A fair is held at it on the Thursday after 27 April. Pop. (1841) 477, (1861) 459, (1871) 572, (1881) 565, (1891) 428.

Cumlodden, a *quoad sacra* parish in Glassary and Inverary parishes, Argyllshire, on the NW side of Loch Fyne, its church (1841; 300 sittings) standing 1 mile WSW of Furnace and 8 miles SW of its post-town, Inverary. Constituted in 1853, it is in the presbytery

of Inverary and synod of Argyll; the minister's stipend is £160. A public school, Furnace, with accommodation for 110 children, had (1891) an average attendance of 73, and a grant of £82, 11s. 6d. Pop. of *q. s.* parish (1871) 826, (1881) 837, (1891) 688; of registration district of Cumlodden and Minard (1881) 1142, (1891) 912.

Cumlodden, a summer residence of the Earl of Galloway in Minnigaff parish, Kirkcudbrightshire, picturesquely seated upon Penkill Water, 2 miles NE of Newton-Stewart.

Cummertrees, a village and a coast parish of Annandale, Dumfriesshire. The village stands, $\frac{3}{4}$ mile inland, on Pow Water, near Cummertrees station on the Glasgow and South-Western railway, $1\frac{1}{2}$ miles ESE of the town of Dumfries, and $3\frac{1}{2}$ W of Annan, under which it has a post-office. A public hall was erected in 1893.

The parish, containing also the village of Powfoot, and comprising, since 1609, the ancient parish or chapelry of Trailtrow, is bounded N by St Mungo and Hoddam, E by Annan, S by the Solway Firth, and W by Ruthwell and Dalton. Its utmost length, from N to S, is $5\frac{1}{2}$ miles; its breadth, from E to W, varies between $2\frac{1}{4}$ and $4\frac{1}{2}$ miles; and its area is 11,747 $\frac{1}{2}$ acres, of which 2206 $\frac{1}{2}$ are foreshore and 75 $\frac{1}{2}$ water. The river ANNAN winds $2\frac{1}{2}$ miles E by S along all the northern boundary; and Pow Water, entering from Ruthwell, flows through the interior south-eastward to the Firth, which here at high water has a breadth of 4 to 6 miles, at low of only 3 to 7 furlongs. At flow of tide, its waste of level sand is swept by the Solway's celebrated 'bore,' which, rushing upwards at the speed of 8 or 10 miles an hour, roars with a tumult heard over all the parish, and sometimes 12 or 15 miles further northward. The seaboard, $3\frac{3}{4}$ miles long, is low and sandy, in the E alone attaining to 65 feet above sea-level; but, however featureless by nature, it has its interest as one of the scenes in Scott's novel of *Redgauntlet*. Inland the ground rises slowly northward to 87 feet near Hurlkedale, 160 at Muirhouse, 183 at Upper Mains, 242 near Norwood, and 350 on Repentance Hill, from which again it descends rather rapidly to less than 100 feet along the Annan. The rocks are mainly Devonian. Limestone, 30 feet thick and containing 96 per cent. of carbonate of lime, is extensively worked at Kelhead; and sandstone has been got from two quarries. The soil is sandy along the coast; in some of the central parts is a fertile loam incumbent on limestone; and northward is loam incumbent on sandstone, whilst elsewhere it ranges from a thin wet clay incumbent on hard till, and requiring much manure and labour, to reclaimed bog, drained and improved at great expense. In a field called Bruce's Acres, on the farm of Broom, Robert Bruce is said to have sustained a severe repulse from the English. Hoddam Castle and the Tower of Repentance, the chief antiquities, are separately noticed, as also are the mansions of Kinmount and Murraythwaite. The Marquis of Queensberry is much the largest proprietor. Giving off a small portion to Bridekirk *quoad sacra* parish, Cummertrees is in the presbytery of Annan and synod of Dumfries; the living is worth £182. The church, which was founded by Robert Bruce, has been repeatedly rebuilt and enlarged, and now contains 450 sittings. Two public schools, Cummertrees and Trailtrow, with respective accommodation for 130 and 58 children, had (1891) an average attendance of 84 and 33, and grants of £87, 4s. 6d. and £37, 17s. Pop. of civil parish, (1801) 1633, (1831) 1407, (1861) 1232, (1871) 1116, (1881) 1092, (1891) 1105; of *quoad sacra* parish (1881) 1068, (1891) 1079.—*Ord. Surv.*, shs. 6, 10, 1863-64.

Cumming's or Cumine's Camp. See BOURTIE.

Cumming's or Comyn's Castle. See DALSWINTON.

Cummingstown, a straggling coast village in Duffus parish, Elginshire, $\frac{1}{4}$ mile E of Burghead, on the Burghead and Hopeman extension of the Highland railway.

Cumminstown. See CUMINESTOWN.

Cumnock (Celt. *cumar*, 'meeting,' and *oich*, 'water'), a town of Ayrshire, chiefly in Old Cumnock parish, but partly also in Auchinleck. It lies in a sheltered hollow, 362 feet above sea-level, on the left bank of winding

Lugar Water, joined here by Glaisnock Burn, 5 furlongs WSW of one station on the main line of the Glasgow and South-Western, and $\frac{1}{2}$ mile N by W of another on its Ayr and Cumnock section, by rail being $15\frac{3}{4}$ miles SE of Kilmarnock, $49\frac{1}{2}$ S of Glasgow ($39\frac{1}{2}$ *via* Barrhead), 33 SW of Carstairs, $61\frac{1}{2}$ SW by W of Edinburgh, $42\frac{1}{2}$ NW of Dumfries, and $17\frac{1}{4}$ E by S of Ayr. With central square, three spacious streets, and a number of narrow lanes, it presents a pleasant, well-to-do appearance, and has a post office, with money order, savings bank, and telegraph departments, branches of the Bank of Scotland, the Clydesdale Bank, and the Royal Bank, hotels, a gas work, an atheneum (1792), a public library, a fine cemetery, 2 weekly papers—the *Cumnock Express* and the *Liberal Cumnock News*—and the Marchioness of Bute's hospital. Thursday is market-day, and fairs are held on the Thursday in February after Old Candlemas (cattle and horses), the Thursday after 6 March (race and hiring), the Wednesday after 6 June (cattle), the Wednesday after 13 July (cattle and hiring), and the Wednesday after 27 October (fat stock). The snuff-box manufacture, so famous 60 years ago, is wholly extinct, transferred to Mauchline; and though there are several establishments for the weaving of tweeds and other woollen stuffs, a pottery, and two dairy and agricultural machine works, mining is now the staple industry, the neighbourhood abounding in coal and blackband ironstone. The central square was formerly the churchyard, and the present churchyard was once the place of execution; it contains the graves of two Covenanted worthies, shot here in 1685, and also the ashes of the Prophet Peden (1626-86), which, buried in Auchinleck kirkyard, were forty days after lifted by dragons, and reinterred at the foot of the Cumnock gallows. A granite monument, 20 feet high, was in 1891 erected here to his memory. The parish church, rebuilt in 1867, is a good Second Pointed structure, with 1100 sittings, stained-glass windows, a turret clock, and a fine organ (1881). There are also a Free church, a U.P. church, a Congregational church (1882), a Baptist chapel, an E. U. church, and a handsome Roman Catholic church (1881-82). The public school, too, built since the passing of the Education Act, is a very elegant and commodious edifice, among the finest in the South of Scotland. A town hall, costing £3000, was opened 7 Jan. 1885. It is an Italian edifice of Ballochmyle red sandstone, with a dome and a great hall, accommodating 900 persons. Having adopted the Lindsay Act in 1868, Cumnock is governed by a senior magistrate and 8 other police commissioners. Pop. (1801) 1798, (1851) 2395, (1861) 2316, (1871) 2903, (1881) 3345, (1891) 3104, of whom 99 were in Auchinleck parish.—*Ord. Surv.*, sh. 14, 1863.

Cumnock, New, a village and a parish of Kyle district, E Ayrshire. Comprising Afton-Bridgend, Castle, Pathhead, and Mansfield, the village stands, 600 feet above sea-level, on the right bank of the Nith, at the influx of Afton Water, and has a station on the Glasgow and South-Western railway, $5\frac{1}{2}$ miles SE of Cumnock, and $21\frac{1}{2}$ SE of Kilmarnock. A town hall, with lecture room, etc., was erected in 1888. It has also a post office, with money order, savings bank, and telegraph departments, a branch of the Bank of Scotland, several inns, a parish library (1828), and a fair on Thursday before Whitsunday. Pop. (1871) 1392, (1881) 1265, (1891) 1514.

The parish, containing also the villages or hamlets of Afton-Bridgend, Pathhead, Mansfield, Castle, Connell Park, Craigbank, and Dalleagles, formed till 1650 part of Old Cumnock. It is bounded N by Old Cumnock and Auchinleck; E by Kirkconnel and Sanquhar, in Dumfriesshire; SE and S by Dalry and Carsphairn, in Kirkcudbrightshire; SW by Dalmellington; and NW by Ochiltree. Its greatest length is 15 miles from ENE to WSW, viz., from the Dumfriesshire border near Glengaber Hill, to the Dalmellington boundary near Benbain; its breadth varies between $3\frac{1}{2}$ furlongs and $10\frac{3}{4}$ miles; and its area is 48,357 $\frac{1}{2}$ acres, of which 261 $\frac{1}{2}$ are water. The NITH, rising in the SW corner, winds $15\frac{3}{4}$ miles northward, north-eastward, and eastward

through the interior, its left bank being closely followed, from the village downwards, by the Glasgow and South-Western railway; of its numerous feeders here, the principal is AFTON Water, flowing 9 miles northward from the southern extremity of the parish. The drainage goes thus mainly to the Solway, but partly also to the Firth of Clyde, as Black and Guelt Waters, sub-affluents of the river Ayr, trace most of the Ochiltree and Auchinleck boundaries. North-westward of the village are three little lakes in a row, Meiklo Creech Loch ($3 \times 2\frac{3}{4}$ furl.), Little Creech Loch ($3 \times 1\frac{1}{4}$ furl.), and Black Loch (2×1 furl.) The surface sinking along the shallow and sluggish Nith to less than 600 feet above sea-level, is everywhere hilly, mountainous in the S. Chief elevations to the left of the Nith from its source are Prickeny Hill (1676 feet), Black Hill (1076), Carsgailoch Hill (1176), Carnivan Hill (1061), High Polquheys (1027), *Craigdully Hill (1352), CORSANCONE Hill (1547), Clocklowie Hill (1441), and *Niviston Hill (1507), where asterisks mark those summits that culminate on the confines of the parish; to the right rise Enoch Hill (1865), Benty Cowan (1560), Milray Hill (1724), Ashmark Hill (1218), Auchinically Hill (1662), Struthers Brae (1778), Wedder Hill (1961), Dalhanna Hill (1177), Blackwood Hill (898), Hare Hill or the Knipe (1950), BLACKCRAG Hill (2229), *Blacklurg Hill (2231), *Alwhat (2063), and *Albang (2100). The rocks in the S are chiefly Silurian, in the N carboniferous. Limestone and sandstone, the latter coarse-grained and yellowish-white in hue, have both been worked in several quarries; and coal, partly cannel, partly splint, is mined at Afton, Bank, Knockshinnock, Lanemark, Patthead, and South Boig. Galena has been got in considerable quantities on the Afton estate; and ironstone occurs plentifully in bands and balls. The soil of the Silurian tracts is chiefly of a gravelly nature, and that of the Carboniferous tracts is generally argillaceous. Fully 6000 acres have been reclaimed from a waste or almost unprofitable condition since 1818; and now about 9300 acres are either regularly or occasionally in tillage, whilst some 270 are under wood. An ancient tumulus on Polquhaise farm was found, on removal, to contain a sarcophagus and fragments of human bones. One baronial fortalice stood near the village, another at Blackeraig, and a third near the source of the Nith; but all have disappeared and left no vestige. In March 1882, at Craigs, near the foot of Blackeraig, in lonely Glen Afton, a shepherd found 40 gold and over 140 silver coins of James V. Mansfield House, Lochside House, Craighdarroch, and Bank House are the principal mansions. New Cumnock is in the presbytery of Ayr and synod of Glasgow and Ayr; the living is worth £268. The parish church, between Afton-Bridgend and New Cumnock villages, was built in 1832, and is a handsome edifice, containing 1000 sittings. There are also three Free churches—New Cumnock, Afton, and Bank; and three public schools—Bank, Dallegles, and New Cumnock—and a Roman Catholic school, with respective accommodation for 176, 150, 478, and 98 children, had (1891) an average attendance of 179, 92, 407, and 15, and grants of £156, 6s. 6d., £67, 4s., £356, 2s. 6d., and £12, 14s. Valuation £34,592, 13s. 6d., including £2934 for railway. Pop. (1801) 1381, (1831) 2184, (1861) 2891, (1871) 3434, (1881) 3781, (1891) 4419.—*Ord. Sur.*, shs. 15, 14, 1864-63.

Cumnock, Old, a parish in the E of Kyle territorial district, Ayrshire. It contains the station and most of the town of CUMNOCK, besides a small part of LUGAR, and formed one parish with New Cumnock till 1650, when, being curtailed by the separation of New Cumnock, it changed its name from Cumnock to Old Cumnock. It is bounded N and NE by Auchinleck, E and S by New Cumnock, and W by Ochiltree. Its utmost length, from E to W, is $9\frac{1}{2}$ miles; its breadth, from N to S, varies between 9 furlongs and $4\frac{1}{2}$ miles; and its area is $14,209\frac{1}{2}$ acres, of which $69\frac{1}{2}$ are water. All the Auchinleck border is traced, first, by Guelt Water, running $2\frac{3}{4}$ miles north-westward to Glenmore Water; next, by Glenmore Water, running $4\frac{3}{4}$ miles west-north-westward to

form LUGAR Water; lastly, by the LUGAR itself, winding $7\frac{1}{2}$ miles west-by-southward; and a number of burns flow northward through the interior to these three streams. In the NW, near Pennyfadzeoch, where the LUGAR quits the parish, the surface sinks to close on 300 feet above sea-level, thence rising to 693 near Whitehill, 1198 at Hough Mount, 764 near Shield, 1081 at Avisyard Hill, 1034 at Airds Hill, and 1352 at Craigdollyheart Hill in the SE. The scenery, tame in places, in most presents a pleasing, finely cultivated aspect, and along the LUGAR is often highly picturesque. The rocks are chiefly carboniferous. Limestone and sandstone, both of excellent quality, are worked; and bituminous and anthracitic coal is mined. The soil by the LUGAR is frequently a fine alluvium, and elsewhere is mostly of a clayey nature, incumbent on strong till; but on the higher lands is mossy. About 2000 acres are moorland, 500 or so are planted, and the rest are all under the plough. The chief antiquities are ruins of Terringzean Castle (the ancient seat of the Loudon family) within the policies of Dumfries House (the seat of the Marquis of Bute), traces of Boreland Castle on the S side of the parish, vestiges of a small pro-Reformation chapel on the farm of Chapelhouse, and graves or memorials of several martyrs of the Solemn League and Covenant. Hugh Logan, 'the Laird of Logau' and celebrated wit of Ayrshire, resided on Logau estate; and James Taylor, the associate of Miller of Dalswinton in the invention of steam-navigation, superintended the mines on that of Dumfries House about the close of the 18th century; while adjoining the station of Old Cumnock is the cottage in which William Murdoch, the inventor of lighting by gas, was born. Mansions, all separately noticed, are Dumfries House, Garrallan, and Logan. Old Cumnock is in the presbytery of Ayr and synod of Glasgow and Ayr; the living is worth £244. Garrallan public, Old Cumnock public, and Old Cumnock Roman Catholic school, with respective accommodation for 159, 755, and 100 children, had (1891) an average attendance of 129, 556, and 74, and grants of £119, 5s., £623, 4s. 6d., and £54, 12s. Valuation £27,225, 12s. 9d., including £4899 for railways. Pop. (1801) 1991, (1831) 2763, (1861) 3721, (1871) 4041, (1881) 4860, (1891) 4712.—*Ord. Sur.*, shs. 14, 15, 1863-64.

Cumrue, Loch. See KIRKMICHAEL, Dumfriesshire.

Cumston. See COMPSTONE.

Cunner, a hill with a fine view, on the west border of Carnbee parish, Fife.

Cunnigar, an artificial mound in Midcalder parish, Edinburghshire, between Midcalder village and the river Almond. On it witches are said to have been burned in bygone days.

Cunningham, a poor-law combination and a territorial district in Ayrshire. The combination includes only part of the district, yet extends southward into Kyle, comprising the parishes of Ardrossan, Beith, Dalry, Dreghorn, Dundonald, Dunlop, Galston, Irvine, Kilbirnie, West Kilbride, Kilmarnock, Kilwinning, Loudon, Stevenston, Stewarton, and Symington. The poorhouse contains accommodation for 479 inmates. Pop. (1871) 102,015, (1891) 114,468.—The territorial district is the northern one of the three districts into which Ayrshire is divided. It comprises the parishes of Ardrossan, Beith, Dalry, Dreghorn, part of Dunlop, Fenwick, Irvine, Kilbirnie, West Kilbride, Kilmarnock, Kilmours, Kilwinning, Largs, Loudon, Stevenston, and Stewarton; and contains the towns and villages of Ardrossan, Saltcoats, Beith, Dalry, Dunlop, Fenwick, Irvine, Kilbirnie, Gleggarnock, West Kilbride, Kilmarnock, Kilmours, Crosshouse, Kilwinning, Largs, Fairlie, Newmilns, Darvel, Stevenston, and Stewarton. It is bounded N and NE by Renfrewshire, E by Lanarkshire, S by the river Irvine, which separates it from Kyle, SW and W by the Firth of Clyde. Its greatest length from NW to SE is $29\frac{1}{2}$ miles, and its greatest breadth in the opposite direction $12\frac{3}{4}$ miles. The surface is pleasantly diversified with hill and dale, and rises, in the NW, into considerable heights, but cannot be said to have any mountains. The chief streams, besides the Irvine, are

the Rye, the Caaf, the Garnock, the Dusk, the Lugton, the Annick, the Fenwick, and the Craufurdland or Kilmarnock. The only considerable sheet of fresh water is Kilhirnie Loch. Trap rocks constitute most of the hills, but carboniferous rocks prevail elsewhere, and are rich in sandstone, limestone, ironstone, and coal. Extensive iron-works are at Dalry and Glengarnock, and very productive coal mines are in various places. The dairy husbandry rose to high perfection in Dunlop, Beith, and Stewarton in the latter part of last century, and it has ever since maintained a high character throughout most of the district. The ancient family of De Morville, the constables of Scotland, were in the 12th and 13th centuries proprietors of almost all the land, and they are supposed to have had their residence at either Glengarnock or Southannan. Many other families subsequently became proprietors; and not a few of them, particularly those of Eglinton, Glencairn, and Loudon, took a leading part in the affairs of the kingdom during its most agitated times. The district appears to have been at one time under the control of the corporation of Irvine, and, for a long period prior to the abolition of feudal jurisdictions, it formed a haliwick under the Earls of Eglinton. Pop. (1831) 63,453, (1861) 95,593, (1881) 105,231, (1891) 110,824. See AYRSHIRE and *Cunningham Topographised by Timothy Pont, A.M., 1604-8, with Continuations and illustrative Notices by the late James Dobie of Crummock* (1876).

Cunninghamhead, a mansion in Dreghorn parish, Ayrshire, near Cunninghamhead station on the Glasgow and South-Western railway, this being 4 miles WNW of Kilmarnock.

Cunninghar. See TILLOCKCOUNTRY.

Cunning or Cunnan, a holm of about 50 acres at the right side of the mouth of the river Doon, in Ayrshire. It formerly lay on the left side of the river, but came to be on the right side in consequence of the river altering its course; and, though now in Kyle district, it belonged to the Carrick parish of Mayhole until 1891, when the Boundary Commissioners transferred it to the parish of Ayr.

Cunningsburgh. See CONNINGSBURGH and DUNROSSNESS.

Cunnoquhie, an estate, with a handsome modern mansion, in Monimail parish, Fife, 1 mile NE of Monimail church, and $4\frac{1}{2}$ miles W by N of Cupar.

Cunzierton, a hill (1100 feet) in Oxnam parish, Roxburghshire, $6\frac{1}{2}$ miles ESE of Jedburgh. It is crowned with a large, double-trenched, ancient Caledonian camp; and is engirt, at about 150 feet from the summit, with a defensive mound.

Cupar, the north-western of the four divisions of Fife, consisting chiefly of the upper and middle basin of the Eden, and of the parts of the seaboard of the Firth of Tay from the boundary with Perthshire to a point a few hundred yards W of the original Tay Bridge, and nearly opposite Dundee. It comprises the parishes of Ahdie, Auchtermuchty, Balmerino, Ceres, Collessie, Creich, Cults, Cupar, Dairsie, Dunbog, Falkland, Flisk, Kettle, Kilmany, Logie, Monimail, Moonzie, Newburgh, and Strathmiglo, with parts of Aherneithy and Arngask. Its length north-eastward is about $17\frac{1}{2}$ miles; and its breadth is about 10 miles. See FIFE.

Cupar or Cupar-Fife, a town and a parish of central Fife. A royal, parliamentary, and municipal burgh, the capital of the county, and a seat of considerable trade, the town stands 100 feet above sea-level, amid undulating and richly-wooded environs, mainly on the left bank of the Eden. By road it is $12\frac{3}{4}$ miles S of Dundee, 10 W by S of St Andrews, and 30 NNE of Edinburgh; whilst by the various sections of the North British it is $5\frac{1}{2}$ miles NE of Ladybank Junction, $25\frac{3}{4}$ ESE of Perth, 44 ENE of Stirling, $13\frac{3}{4}$ NNE of Thornton Junction, 29 NE of Dunfermline, 45 NNE of Edinburgh *via* the Forth Bridge, $11\frac{3}{4}$ SSW of Tayport, and $16\frac{1}{2}$ S of Dundee *via* the Tay Bridge. It had a royal charter from David II. in 1356, but prior to that appears to have been a royal burgh, and has made some figure in history. A castle which stood on the eminence now called School

Hill, but which has utterly disappeared, was the seat of the Macduffs, Earls of Fife, who are first heard of in the reign of David I. (1124-53). Almost a hundred years earlier, according to Leighton's *Fife Illustrated*, 'when the castle of Cupar was the residence of Macduff, the lord or Maormore of Fife, it was the scene of that horrid tragedy, the murder of his wife and children by Macbeth, of which Shakespeare has made such a beautiful use in his play of *Macbeth*.' But Skene has shown that the whole well-known tale of Macduff, 'Thane of Fife'—a title unknown to history—appears first in the Chronicle of Fordun and his interpolator Bower, *i.e.*, belongs to the 14th and 15th centuries (*Celtic Scotland*, iii. 303-306, 1380). The court of the Stewartry of Fife was held at this castle till the forfeiture of Albany, Earl of Fife, in 1425, when it was transferred to Falkland. The proverbial expression, 'He that will to Cupar maun to Cupar,' alludes to the times when Cupar was the seat of the ancient courts of justice for Fife, and signifies much the same as 'A wilful man must have his own way.' Theatrical representations, called *Mysteries* or *Moralities*, professing to serve purposes such as now are served by at once the pulpit and the press, were exhibited on the northern slopes of the School Hill, then called the Playfield, for many ages till the Reformation—among them Sir David Lindsay's *Satyre of the Thrie Estaitis* (1535), that scathing attack on the priests, which has been termed 'by far the greatest interlude in English literature.' Whether Sir David was born in Monimail at the Mount or in East Lothian is a moot question, but there is no doubt that the Mount was his property and frequent residence, and that he sat for Cupar in the parliaments of 1542 and 1543. Many of the kings and princes of Scotland, including nearly all the Jameses, Mary of Guise, Queen Mary, and Charles II., visited the town, and were entertained by its magistrates, Charles getting 'some desert to his foure houres in the Tolhooth, and a musicke song or two from Mr Andro Andersone, scholemaster ther for the tyme,' 6 July 1650. John Knox, in 1560, preached here to the Lords of the Congregation; and a noted conference was held in the previous year, on Tarvit or Wemysshall Hill, $1\frac{1}{2}$ mile to the S, between the Congregation and Mary of Guise, the Queen Regent. The Rev. William Scott, who wrote the *Apologetical Narration of the State of the Kirk of Scotland*, was minister of Cupar from 1595 till 1642, and at his own expense erected the spire of the parish church, which still exists. A curious mural tombstone to his memory is still to be seen in the churchyard, though its Latin inscription is quite illegible. In the churchyard, too, is a plain upright stone inscribed:—'Here lies interred the heads of Laur. Hay and Andrew Pitulloch, who suffered martyrdom at Edinburgh, July 13th, 1681, for adhering to the Word of God and Scotland's covenanted work of reformation; and also one of the hands of David Hackston of Rathillet, who was most cruelly murdered at Edinburgh, July 30th, 1680, for the same cause.' Which Hackston was one of the twelve murderers of Archhishop Sharp on MAGUS MUIR in 1679. At Cupar, in 1718, the Archhishop's descendant, Sir James Sharp, Lord George Murray, and Sir David Threipland of Fingask were arraigned for their share in the '15, but the proceedings against them proved abortive. John, Lord Campbell (1781-1861), Chancellor of England, was born in a house still standing in the Crossgate, his father being parish minister. Another native was the portrait and landscape painter, Charles Lees, R.S.A. (1800-80).

Old Cupar lay all on the left or N side of the Eden; and had six gates or ports at thoroughfares which mostly retain their ancient names. The West Port stood at the W end of Bonnygate; the Lady Port towards the northern extremity of Lady Wynd; the East Port almost opposite the Town Hall; the Bridge Port at a point where the Eden now is crossed by the South Bridge leading to the North British station; the Mill Port at Millgate; and the Kirkgate Port at the W end of Kirkgate. The present town comprises three principal streets, several lanes and alleys, some suburbs on the N

and E and W, and a considerable suburb on the S side of the Eden; containing many new houses, it presents a well-built, cleanly, thriving appearance. It has been lighted with gas since 1830; and there is a splendid gravitation water supply from the town's works at Clatto, about 4 miles SSW of the town. There is likewise an

Seal of Cupar.

excellent system of drainage. Cupar, it may here be mentioned, is the seat of the Fife County Council. The Town Hall stands at the junction of St Catherine Street and Crossgate, and is a plain, neat structure, surmounted by a cupola and belfry. The County Buildings, St Catherine Street, were enlarged in 1836, in 1872, and 1892-93, have a neat though

plain façade, and contain the county hall, the sheriff's and justice of peace court-rooms, and offices for the public clerks. In the county hall are a fine portrait of John, Earl of Hopetoun, by Sir Henry Raeburn; a very valuable portrait of Lord Kellie in his official robes, by Sir David Wilkie; portraits of George II., George III., and Queen Charlotte, by Ramsay, son of the 'Gentle Shepherd'; besides a copy of a good portrait of Lord Elgin, Viceroy of India, and marble busts of his lordship and of the lats J. H. E. Wemyss of Wemyss and Torrie, M.P. The old county prison, on the S side of the Eden, has been converted into barracks for the Fife Artillery Militia. The new prison occupies a conspicuous site a little to the NE of this town, and built, at a cost of over £3000, on a greatly improved plan, is now under Government management. Opposite the Town Hall stood an ancient cross, which, comprising an octagonal base and a round pillar surmounted by a unicorn, was taken down in 1817. Its pillar was procured by the lats Colonel Wemyss of Wemyss Hall, and re-erected on the top of Wemyss Hill (about an hour's walk from the town), at the very spot on which, it is believed, the treaty between the queen-regent and the Lords of the Congregation was subscribed. The Corn Exchange, built in 1862 at a cost of £4000, is an edifice in the Gothic style, with a spire 136 feet high; it contains 46 stalls for market business, and was designed to serve also as a music and lecture hall, but has not good acoustic qualities. The railway station stands on the S side of the Eden, and is handsome and commodious; near it, on the Kirkealdy road, is a statue by Mr Howie of Edinburgh, of the Disruption worthy, David Maitland Makgill Crichton, Esq. of Rankellour (1801-51), in recognition of public services. One piece of ground for a public park was gifted to the town in 1871 by Provost Hood, another, adjoining, in 1872, by Provost Nicholson. The Lady Burn, intervening, was then arched over, and the two gifts, with the original Cart-haugh, now form a continuous park, comprising some 15 acres of green meadow, and forming one of the most valuable amenities of the burgh. The heavy cannon on the steps at the entrance to the park is a trophy from Sebastopol. Bonvil Park, a finely sheltered field to the west of the town, has been laid out as a recreation ground, with a cricket pitch, three tennis courts, and a commodious pavilion.

The original parish church stood 3 furlongs NW of the town, but within the old walls, on a rising ground near Springfield House; became a ruin in the early part of the 15th century; and was completely obliterated in 1752. Its successor, in Kirkgate Street, built in 1415, is said to have been a beautiful Gothic structure of polished sandstone, measuring 133 feet in length by 54 in width; but it, too, fell into decay, and was taken down in 1785. The present church, then erected, partly on the same

site, is a plain unattractive building, containing 1150 sittings. The church of 1415 had a tower, to which the spire already mentioned was added by Mr Scott in the beginning of the 17th century; and this tower and spire are separated from the present church by an intervening vestry or session-house, into which part of one of the aisles of the former church was converted. The ancient church of St Michael, on the S side of the Eden, crowned a small conical eminence, St Michael's Hill, now mostly covered with the plantation that shelters the NE entrance to Tarvit House. The present church of St Michael stands in the town, was erected in 1837 at a cost of £1800, and, altered and improved in 1871, contains 600 sittings. With a legacy of £7500, bequeathed by the lats Sir David Baxter of Kilmaron, a fine new Free church, mixed Gothic in style, with tower and spire 135 feet high, was built (1877-78) on the N side of the Bonnygate. Other places of worship are Bonnygate U.P. church (1866; a handsome structure), Boston U.P. church (1850), a Baptist chapel, a Roman Catholic meeting-place, Salvation Army quarters, and St James's Episcopal church. The last stands on or very near the site of St Mary's Dominican friary, which, founded by one of the Earls of Fife, was by James V. annexed to St Andrews, and the last remnant of which, a part of its church, consisting of fine sandstone masonry, was removed at the forming of St Catherine's Street. The Episcopal church, as rebuilt about 1870, is a neat Gothic structure of white freestone, with nave and one side aisle, and has a fine organ. Two burgh schools, dating back to the reign of Charles I., were in 1823 superseded by an academy, which in turn gave place, in 1831, to a Madras academy, founded and endowed by the late Dr Andrew Bell. As Sir David Baxter added considerably to the foundation, this is now called the Bell-Baxter School. New buildings were erected in this year named, but the old ones also were retained. In the middle of the original playground there stood till about 1860 an old one-story building, occupied as a sewing school at one end, and at the other as a class-room for pupils whose fees were provided by the parochial board or other local charity. This was superseded by the erection in Kirkgate of a modern suite of class-rooms, which in 1881 were greatly enlarged, mostly out of accumulations of an annual sum of £40 bequeathed by the lats Alexander Bogie of Balass and Newmill 'for the education of poor children' in Cupar parish. This school and the Bell-Baxter school are both under the management of the Cupar Educational Trust, in whom is vested the estate of Egmore in Galloway. The Bell-Baxter school gives instruction in English, classical and modern languages, mathematics, drawing, etc. Castlehill and South Side or Kirkgate schools, with respective accommodation for about 700 and 400 children, have an average attendance of nearly 450 and 240, and grants of over £430 and £200. Bonvil House, situated in Bonvil Park, and converted into an attractive school for young ladies, is an excellent institution, conducted by a lady from Girton College. The Duncan Institute (1870), in Crossgate, founded for the working classes of Cupar, Dairsie, and Kileonquhar by the lats Miss Duncan of Edengrove, is a handsome edifice in the Scotch baronial style, with a spire 114 feet high; and contains 2 reading-rooms, a library, a recreation room, a lecturers hall, a museum, and a billiard room. A handsome and commodious Parish Sabbath School Hall, erected at a cost of over £2000, contains a memorial window to its founder, the lats John Pitcairn, Esq. of Pitcullo. The Knox Cottages, with two apartments each and a garden attached, provide comfortable homes for six indigent ladies above fifty years of age, and were founded in terms of a deed by the lats Mr David Knox, London, and his sister, Miss Catherine Knox, who left £3000 for this purpose. The endowment yields also a modest annual allowance to each of the inmates. Other institutions are a Young Men's Christian Association, a floral and horticultural society, chess, curling, golf, and bowling clubs, masonic lodges, friendly societies, etc. Towards the west of the town is a large gymnasium, for the special benefit,

however, of the Fife and Forfar Light Horse; and further west is the racecourse. There are three cemeteries—the Old Churchyard, behind the parish church; St James's Burying Ground, adjoining the former; and the New Cemetery, an ornamental burying ground on the road to Ceres Muir.

The town has a head post office, with money order, savings' bank, insurance, and railway telegraph departments, offices of the Royal, National, Commercial, Clydesdale, and British Linen Co.'s banks, a national security savings bank, hotels, and 3 weekly newspapers—the Wednesday Liberal *Fife Herald* (1822), the Thursday Conservative *Fife Journal* (1833), and the Saturday *Fife News* (1870). A weekly corn market is held on Tuesday; a horse and cattle market on the first, and an auction mart for cattle on the first and third Tuesdays of every month; fairs and feeing markets on the first Tuesday of August and either on 11th November or the following Tuesday. Large trade is done in the selling and grinding of corn; and other industries are malting, dyeing, tanning, flax-spinning, the weaving of coarse linens, and the manufacture of bricks and earthenware; whilst much business accrues from the town's position and character as the political capital of the county. It was distinguished, too, at one time for the production of beautiful specimens of typography and the publication of many useful books, Cupar being then the seat of publication for St Andrews University. The earliest extant charter constituting Cupar a royal burgh is David II.'s of 1356. The burgh is governed by a provost, 3 bailies, a dean of guild, a treasurer, and 12 councillors, who also act as police commissioners; and it unites with St ANDREWS, CRAIL, KILRENNY, the ANSTRUTHERS, and PITTENWEEM in sending a member to parliament. A guildry exists apart from the dean of guild court, a shadowy relic of the olden times of monopoly. Five incorporated trades—hammermen, wrights, weavers, tailors, and fleshers—also prolong a formal existence from the past. The municipal constituency numbered 963 and the parliamentary 695 in 1892, when the annual value of real property within the burgh amounted to £21,506, 2s. 4d., whilst the corporation revenue for 1891 was £216. Pop. of parliamentary burgh (1881) 5010, (1891) 4729. Houses inhabited (1891) 1128; uninhabited, 62.

The parish, containing also the villages of Brighton, Springfield, and Gladney, comprises the ancient parish of St Michael-Tarvit, annexed in 1618. It is bounded N by Kilmarny and Dairsie, E by Dairsie and Kemback, S by Ceres and Cults, W by Monimail, and NW by Moonzie. Its greatest length, from N to S, is 3½ miles; its greatest breadth, from E to W, is 3¼ miles; and its area is 5737 acres, of which 1½ are water. The river EDEN winds 4½ miles north-eastward and east-north-eastward along the Ceres border and through the interior; it originally traced all the boundary between Cupar proper and St Michael-Tarvit, but, in consequence of an artificial straightening of its course at the town, has now a small portion of St Michael's on its N bank. Lady Burn, coming in from Monimail, and receiving an affluent from the confines of Dairsie, drains most of the northern district, and falls into the Eden at the E end of the town. The surface is beautifully diversified by undulations or rising-grounds, and makes a rich display of culture and wood. In the extreme E the Howe of Fife or Stratheden declines to less than 80 feet above sea-level, thence rising to 313 feet at Hawklaw and 400 at Kilmarnon Hill on the left, and to 600 at Tarvit Hill on the right, side of the Eden. A ridgy mound of fresh-water gravel, commencing on the School Hill, the site of the ancient castle of Cupar, strikes northward up the flank of Lady Burn, and runs in a serpentine direction till it culminates in a sort of peak—the Mote or Moat Hill, traditionally said to have been the meeting-place of councils of war and courts of justice under the 'Thanes of Fife.' Sandstone conglomerate prevails along the Lady Burn, and elsewhere white sandstone of excellent building quality; whilst trap rocks, chiefly greenstone

and clinkstone, form most of the rising-grounds. The sandstone and greenstone are worked in several quarries. The soil, in the N and the E, is chiefly a friable loam on a gravelly subsoil; in the S and the W, is more inclined to sand; but, almost everywhere, has been highly improved, and produces the finest crops. The mansions are Kilmarnon, Tarvit, Springfield, Wemyss Hall, Dalgairn (formerly Dalryell Lodge), Hilton, Cairnie, Pitbladdo, Prestonhall, Foxton, Ferrybank, Belmore, Bellfield, Bonville, Blalowan, and Westfield, and most of them are separately noticed. On the Mount, about three miles NW of the town, and stoutly claimed by Cupar as the birthplace of Sir David Lindsay, stands a monument to the gallant Earl of Hopetoun, who took up the command at Corunna when Sir John Moore fell, and before embarking, sword in hand, searched Corunna through and through for British prisoners. Cupar is the seat of a presbytery in the synod of Fife; and it includes the greater part of the *quoad sacra* parish of SPRINGFIELD. The charge is collegiate, the two ministers officiating alternately in the parish church and St Michael's, and the living of the first charge being worth £345, of the second £320. An ancient chapel stood on the lands of Kilmarnon. Brighton public school, with accommodation for 67 children, had (1891) an average attendance of 29, and a grant £19, 8s. 6d. Valuation (1892) £12,972, 13s. 10d. Pop. (1891) 6990.—*Ord. Sur.*, shs. 48, 40, 1868-67.

The presbytery of Cupar comprehends the *quoad civilia* parishes of Abdie, Auchtermuchty, Balmerino, Ceres, Collessie, Creich, Cults, Cupar, Dairsie, Dunbog, Falkland, Flisk, Kettle, Kilmarny, Logie, Monimail, Moonzie, Newburgh, and Strathmiglo, and the *quoad sacra* parishes of Freuchie, Ladybank, and Springfield. Pop. (1881) 26,693, (1891) 26,196, of whom 7561 were communicants of the Church of Scotland.—The Free Church also has a presbytery of Cupar, with churches at Abdie and Newburgh, Auchtermuchty, Ceres, Collessie, Cupar, Dairsie, Falkland, Flisk and Creich, Kettle and Cults, Logie and Gauldry, and Monimail, which together had 1982 communicants in 1891.—Lastly the United Presbyterian Synod has a presbytery of Cupar, with 2 churches in Auchtermuchty, 2 in Cupar, and 8 in respectively Ceres, Freuchie, Guardbridge, Kettle, Lathones, Pitlessie, Rathillet, and St Andrews, the 12 having 2457 members in 1890.

Cupar-Angus. See COUPAR-ANGUS.

Cuparmuir, a village in Cupar parish, Fife, 1½ mile W of Cupar town. It consists of a few scattered cottages, with a tile-work and a sandstone quarry.

Cupinshay. See COPENSHAY.

Cur, a stream of Strachur parish, Cowal, Argyllshire, formed by two head-streams at an altitude of 380 feet, and running 6½ miles south-westward and south-eastward to the head of Loch Eck. Its course, for the first 2 miles, is rough and rapid, and forms several fine cascades; but lower down becomes smoother, and makes a number of beautiful turns.—*Ord. Sur.*, sh. 37, 1876.

Curate's Steps, a small pass at the side of the river Ayr, near Sorn Castle, in Sorn parish, Ayrshire. It got its name from a tradition that an obnoxious Episcopalian minister fled by it from his enraged flock, in the times of forced Episcopacy prior to 1688.

Curate's Well, a copious intermittent spring on the glebe of Dunsyre, in Dunsyre parish, Lanarkshire. It issues from two circular patches of soft sand, engirt with very hard clay and gravel; and at intervals of five or ten minutes it bubbles up as if emitting air.

Curgarff. See CORGARF.

Curgie, a small bay in Kirkmalden parish, Wigtownshire, on the W side of Luce bay, 3 miles N of the Mull of Galloway.

Curlee or Caerlee. See INNERLEITHEN.

Curling Hall, an estate, with a mansion, in Largs parish, Ayrshire, near the shore, a little S of the town. It includes part of the battlefield of LARGS, and contains a memorial of the battle, in the form of a sculptured stone, with an inscribed copper plate affixed to it by Dr John Cairnie in 1823.

Curr, a hill (1849 feet) in Morebattle parish, Roxburghshire, $5\frac{1}{4}$ miles E by S of Morebattle village, and $\frac{1}{2}$ mile from the English Border.

Curreath, an estate, with a modern mansion, in Donald parish, Ayrshire, 3 miles ENE of Troon.

Currie, a village and a parish of W central Edinburghshire. The village, a pleasant little place, stands on the steep left bank of the Water of Leith, here spanned by a 14th century bridge, 6 miles SW of Edinburgh, having one station (Curriehill) on the main line of the Caledonian, and another (Currie) on its Balerno loop; at it is a post office, with money order, savings bank, insurance, and telegraph departments. Pop. (1861) 345, (1871) 329, (1881) 255, (1891) 313.

The parish, containing also the villages of BALERNO and Hermiston, is bounded N by Corstorphine, E by Corstorphine and Colinton, SE by Penicuik, SW by Midcaldor, W by Kirknewton, and NW by Ratho. The parish was increased in area in 1891 by the Boundary Commissioners adding to it the South Gyle detached portion of the parish of Corstorphine (34 acres) and the Listonshiels detached portion of the parish of Kirkliston (1892 acres), its area now being 13,162 acres, of which $132\frac{3}{4}$ are water. The Water of LEITH winds $1\frac{1}{4}$ mile NNW along the Kirknewton border, next 6 miles east-north-eastward across the middle of the parish, receiving by the way Dean, Cock, and BAVELAW Burns, and other still smaller tributaries. Near the Colinton and Penicuik boundaries lie Clubbidean, Harelaw, and Threipmuir reservoirs, supplying the EDINBURGH water-works; and the Union Canal runs $2\frac{3}{4}$ miles through the northern interior in the vicinity of Hermiston. The surface, in the N forming part of the Corstorphine plain, has a general southerly rise to the Pentland Hills from less than 200 feet above sea-level to 800 on Warlaw Hill, 1250 near Craigenterry, and 800 at East Rig. The rocks belong mainly to the Calciferous Limestone series, traversed at Ravelrig by a mass of diorite; whilst just to the SE of Threipmuir reservoir is one of three separate localities among the Pentlands where rocks of Upper Silurian age are so surrounded and covered unconformably by the Lower Old Red sandstone, that their relations to the Lower Silurian series can nowhere be ascertained. Excellent sandstone abounds along the left bank of the Water of Leith, especially in the neighbourhood of Balerno, and has been largely quarried; while limestone, but of inferior quality, has been worked on the Malleny estate. The soil of the uplands is moorish; but that of the low tracts is rich and highly cultivated, the rental of one or two farms here having increased 700 per cent. within the last 160 years. Dairy-farming and sheep-farming are also carried on; and within the parish are 2 large paper-mills and 2 snuff manufactories. Sibbald and other antiquaries identified Currie with 'Coria,' the chief seat of the Damnonii in the 2d century, A.D., which Skene, however, places at Carstairs. Among its antiquities are a supposed Roman station on Ravelrig Hill; the ruins of Lennox Tower, rising above the banks of the Leith, on the estate of Malleny, and the ancient residence of the family of Lennox, as well as the occasional one of Mary Queen of Scots; and Curriehill Castle, a short distance from the latter, on the opposite bank of the stream. Illustrious natives or residents were Sir Thomas Craig (1538-1608), author of *Jus Feudale*; the Lord Clerk Register, Sir John Skene of Curriehill (1549-1612), legal antiquary; his son, Lord President Sir James Skene (1580-1633); Sir Archibald

Johnston, Lord Warriston (1610-63), lawyer and statesman; Jas. Anderson, LL.D. (1739-1808), writer on agriculture; General Thomas Scott of Malleny (1745-1841); John Marshall, Lord Curriehill (1794-1868); and his son and namesake (1827-81), also an eminent judge. The principal mansions are Baberton, Curriehill, Hermiston, Lennox Lea, Lymphoy, Malleny, Ravelrig, and Riccarton. Currie is in the presbytery of Edinburgh and synod of Lothian and Twccddale; the living is worth £250. The parish church, at the village, successor to one that down to the reign of Charles I. appears to have been subordinate to the collegiate church of Corstorphine, was built about 1785, and contains 800 sittings. A Free church for Currie and Colinton stand at Juniper Green; at Balerno are a U.P. church and St Mungo's Episcopal chapel; and three public schools, Balerno, Currie, and Hermiston, and Balerno Episcopal school, with respective accommodation for 176, 178, 51, and 126 children, have an average attendance of about 130, 140, 40, and 90, and grants of nearly £125, £130, £37, and £80. Pop. (1801) 1112, (1831) 1883, (1861) 2248, (1881) 2390, (1891) 2574.—*Ord. Sur.*, sh. 32, 1857.

Currie, an estate, with a mansion, in Borthwick parish, Edinburghshire. The mansion, standing on a head-stream of Gore Water, $2\frac{1}{4}$ miles SE of Gorebridge, consists partly of a former inn, partly of excellent additions, and reposes among sheltering wood under the shadow of Borthwick Castle. A previous mansion, demolished about 1809, stood on a rising-ground overlooking the old church and valley of Borthwick.

Curriehill, an estate, with a mansion, in Currie parish Edinburghshire, 1 mile SW of Curriehill station on the Caledonian, this being $5\frac{1}{2}$ miles SW of Edinburgh. A castle, a little W of the mansion, figured as a place of strength in the time of Queen Mary, being held by the Queen's opponents. See CURRIE.

Cushieville. See COSHIEVILLE.

Cushnie, an ancient parish in Alford district, Aberdeenshire, annexed in 1798 to Leochel, and now forming the western section of that parish. Cushnie or Sockaugh Hill, at the meeting-point with Towie, Logie-Coldstone, and Tarland, 7 miles SW of Alford village, has an altitude of 2032 feet above sea-level, and commands a very extensive view. Cushnie Burn, rising on the north-western shoulder of the hill, runs $4\frac{1}{2}$ miles east-north-eastward along Cushnie Glen and the Howe of Cushnie to a confluence with Leochel Water at Brighton of Ininteer. Cushnie barony, originally called Cusenin (Gael. *ch'oisinn*, 'corner'), belonged, in the 12th century, to a family of its own name; went by marriage, in the early part of the 14th century, to the Leslies, ancestors of the Earls of Rothes; and passed, in 1628, to the Lumsdens. The old House of Cushnie, built in 1707, has long been uninhabited; but near it a small neat mansion was erected by a former proprietor, the late Rev. Henry T. Lumsden, whose uncle, Matthew Lumsden, LL.D. (1788-1856) was an eminent Orientalist. It now belongs to Sir William S. Scton, Bart., of Pitmedden.—*Ord. Sur.*, sh. 76, 1874. See LEOCHEL-CUSHNIE.

Cuthill or **Cuttle**, a suburb of Prestonpans town, Haddingtonshire. Separated from the W end of that town by a rill, it is a dingy unpleasant place; and formerly had a salt work, a magnesia manufactory, and an extensive pottery.

Cuttlehill, a mausion in Aberdour parish, Fife, $\frac{1}{2}$ mile E by S of Crossgates station.

D

DAAN, a burn of Edderton parish, Ross-shire, formed by two head-streams, and running 2½ miles north-north-eastward to the inner Dornoch Firth, at Ardmore Point, 1¾ mile W by N of Meikle Ferry.

Daer Water, the principal head-stream of the Clyde, rising in the extreme S of the parish of Crawford and of the shire of Lanark, at 2000 feet above sea-level, on the NE slope of Gana Hill (2190 feet), within ¼ mile of the Dumfriesshire border and of a sub-affluent of the Annan. Thence it runs 10½ miles northward to a confluence with Powtrail Water, at a point 2¾ miles S of Elvanfoot; and their united waters thenceforward bear the name of the river Clyde. Traversing a dreary region of bleak mountains and moorish uplands, and joined by sixteen little affluents, it has a rapid, noisy, and frolicsome current; enjoys high repute as a trouting stream; and gives the title of Baron (cre. 1646) to the Earl of Selkirk, both titles merging (1885) into that of the Duke of Hamilton.—*Ord. Sur.*, sh. 15, 1864.

Daharick, a moor in Midmar parish, Aberdeenshire, said to have been the scene of a battle between Wallace and Comyn.

Daiglen, a burn in Tillicoultry parish, Clackmannanshire, rising at an altitude of 1750 feet, and running 1½ mile south-eastward to form with Gannel Burn the Burn of Tillicoultry.

Dailly, a village and a parish in Carrick district, Ayrshire. The village of New Dailly stands on the left bank of Girvan Water, 7 furlongs SSE of Dailly station, on the Ayr and Girvan railway, this being 5½ miles ENE of Girvan, and 7¾ SSW of Maybole, under which it has a post office, with money order, savings bank, and telegraph departments. Greatly improved and enlarged since 1825, it is substantially built and regularly aligned; at it are 2 inns, the parish and Free churches, a public school, and saw and grain mills. Pop. (1841) 591, (1861) 650, (1871) 554, (1881) 696, (1891) 566.

The parish, called anciently *Dalmoalkeran* ('dale of St Keiran'), had its church till 1691 at Old Dailly, 3½ miles to the WSW; in 1653 it was shorn of a large tract to form Barr parish, but acquired a small annexation from Kirkoswald. It includes AILSA CRAIG; yet itself at no point touches the sea, being bounded NW and N by Kirkoswald, NE by Kirkmichael, E by Kirkmichael and Straiton, S by Barr, SW and W by Girvan. Its utmost length, from E to W, is 7¾ miles; its breadth, from N to S, varies between 1½ and 6 miles; and its area is 18,078½ acres, of which 82½ are water. GIRVAN Water, followed pretty closely by the railway, winds 9½ miles west-south-westward through the north-western interior or along the northern and western borders; and several burns run to it from the interior. In the SW, where it passes off into Girvan, the surface sinks to close upon 50 feet above sea-level, thence rising north-eastward to 500 feet at High Craighead, 329 near Kilgrammie, 700 at Quarrel Hill, and 850 at Kirk Hill; south-eastward and eastward to 908 at Green Hill, 1059 at Hadyard Hill, 981 at Peat Rig, 1049 at Barony Hill, 1007 at Cairn Hill, and 1385 at Garleffin Fell. The rocks belong partly to the Calciferous Sandstone series, partly to the Carboniferous Limestone; and coal is worked at Bargany and Dalquharran, limestone at Craighead, while sandstone also is plentiful. The tract along Girvan Water is a pleasant vale, fertile, richly wooded, and well cultivated; the soil is here partly alluvial, and elsewhere ranges from argillaceous or light and dry, incumbent on gravel, to thin, wet, and spongy on the hills, which, naturally heathy or mossy, have been in places reclaimed, and almost everywhere afford good pasturage. Baronial fortalices stood at Old Kilkerran, Dalquharran, Brunston, and Penkill; a chapel of St Macarius* stood at *Machrykill*, another of Our

Lady in *Ladyglen*, and a third at *Altichapel*; whilst on the western shoulder of Hadyard Hill, which commands a magnificent view, is a doubly-entrenched camp, possibly formed in the days of Robert Bruce, and measuring 300 feet by 195. Natives of Dailly were the poet, Hew Ainslie (1792-1878); Thos. Thomson (1768-1852), lawyer and antiquary; and his painter brother, the Rev. Jn. Thomson of Duddingston (1778-1840); and Prof. Alex. Hill, D.D. (1785-1867), was minister from 1816 to 1840. Mansions, all separately noticed, are Bargany, Dalquharran Castle, Kilkerran, Killochan Castle, and Penkill Castle. Dailly is in the presbytery of Ayr and synod of Glasgow and Ayr; the living is worth £379. The parish church dates from 1766, and has 600 sittings. Four schools—Dailly public, Kilgrammie public, Old Dailly public, and Wallace town Works—with respective accommodation for 227, 102, 88, and 133 children, had (1891) an average attendance of 139, 51, 36, and 79, and grants of £135, 1s., £49, 3s. 6d., £43, 7s., and £69, 19s. 6d. Pop. (1861) 2050, (1871) 1932, (1881) 2226, (1891) 1830.—*Ord. Sur.*, shs. 14, 8, 1863.

Dairsie, a parish in the NE of Fife, containing at its eastern border the village of Dairsiemuir or Osnaburgh, 5 furlongs NNW of Dairsie station, this being 3¼ miles SSW of Leuchars Junction, and 3 ENE of Cupar, under which it has a post office, with money order, savings bank, and railway telegraph departments. Bounded NW by Kilmany and Logie, N and E by Leuchars, SE by Kemback, SW and W by Cupar, the parish has an utmost length from N to S of 2½ miles, a varying breadth from N to E of 5 furlongs and 2½ miles, and an area of 2560½ acres, of which 5¼ are water. The EDEN winds 2½ miles north-eastward along all the Kemback border; and where, close to Dairsie station, it quits this parish, the surface declines to less than 100 feet above sea-level, thence rising westward and north-westward to 505 feet on Foodie Hill, and 554 on CRAIGFOODIE, which, presenting to the SW a precipitous and quasi-columnar front, commands a very extensive view. Sandstone abounds in the S; and trap-rock is quarried in two places. The soil, in most parts fertile, in many is rich and deep; and little or nothing is waste. At Dairsie it is intended (1893) to connect with the main line the proposed East Fife Central railway from Leven by a northern branch line from Bonnyton—another branch going direct east and joining the Anstruther and St Andrews railway. Dairsie Castle, a ruin on a rising-ground near the Eden, was the meeting-place of a parliament in 1335, and was occupied by John Spottiswood, Archbishop of St Andrews, when writing his *History of the Church and State of Scotland*. Craigfoodie is the chief mansion. Dairsie is in the presbytery of Cupar and synod of Fife; the living is worth £291. The parish church containing 313 sittings, was 'built and adorned after the decent English fashion' by Archbishop Spottiswood in 1621. A squat, four-bayed oblong, with octagonal bell-turret and dwarf-spire, it 'only shows,' says Hill Burton, 'that the hand of the builder had lost its cunning, and that neither the prelate nor his biographer had an eye for mediæval art; it is a piece of cold mimicry, like the work of the cabinetmaker rather than of the architect,' etc. (*Hist. Scot.*, vii. 102, ed. 1876). There is also a Free church; and a public school, with accommodation for 135 children, had (1891) an average attendance of 116, and a grant of £104, 9s. Valuation (1892) £5071, 13s. 10d. Pop. (1801) 550, (1831) 605, (1861) 638, (1871) 687, (1881) 693, (1891) 606.—*Ord. Sur.*, shs. 48, 49, 1868-65. See vol. i. of Billings' *Antiquities* (1845).

Dairsiemuir. See DAIRSIE.

Dalarossie (Gael. *dail-a-rois*, 'field of the point'), an ancient parish of NE Inverness-shire, now annexed to Moy. More populous than Moy, it lies along the Findhorn river, and on its left bank, 3¾ miles SW of Findhorn bridge and 20¼ SE of Inverness, has a church (1790; 450 sittings) and a public school.

* In *Procs. Ayr and Wigtown Archæol. Soc.* (1882) is a notice of the sole relic of this chapel—a stone supposed to have been a baptismal font of high antiquity.

Dalavich, an ancient parish and a registration district in Lorn, Argyllshire. The parish, now annexed to Kilchrenan, lies along the loch and river of Avich, onward to Loch Awe, on whose western shore, 14 miles WNW of Inverary, stand its church and its public school. Pop. of district (1871) 217, (1881) 226, (1891) 158. See **KILCHRENAN**.

Dalbarber, a village on the E border of Fowllis-Wester parish, Perthshire, 2 miles WSW of Methven village.

Dalbeattie, a thriving police burgh in Urr parish, SE Kirkcudbrightshire, standing, 80 feet above sea-level, on Dalbeattie Burn, 7 furlongs from its influx to Urr Water, with a station on the Glasgow and South-Western railway, 5½ miles ESE of Castle-Douglas, 15½ NE by E of Kirkcudbright, 14½ SW of Dumfries, 108½ SSW of Edinburgh, and 106½ S by E of Glasgow. Founded as a mere village in 1780, this 'Granite City of the South' owes its quick recent extension to the neighbouring quarries of Craignair in **BUTTLE**, to the opening of the railway in 1860, and to its situation near the Urr, which is navigable to Dalbeattie Port. The Dalbeattie Burn runs through the town, and supplies motive power for numerous works. It consists of a main street with others diverging, and has a post office, with money order, savings bank, and telegraph departments, branches of the Union and Commercial Banks, insurance agencies, hotels, a gaswork, a town-hall with illuminated clock, a mechanics' institute (1877), a literary association, bowling and quoiting greens, masonic, oddfellows', and foresters' lodges, etc. In 1877 Mr Maxwell of Munches erected a club-room for working men, now known as the Church Hall, and used for public meetings, etc. There are extensive bone, paper, bobbin, saw, and flour mills, dye-works, brick and tile works, an iron-forge, and concrete works; but Dalbeattie's chief industrial establishments are its large steam granite-polishing works, which employ several hundreds of workmen as quarriers, hewers, and polishers; have furnished granite for the Liverpool and Chatham docks, the Thames Embankment, light-houses in Ceylon, etc., and the paving of many large cities at home and abroad; and, besides other monuments, supplied that at Hughenden to Viscountess and Viscount Beaconsfield. Dalbeattie forms a *quoad sacra* parish in the presbytery and synod of Dumfries, its minister's stipend being £230. A new parish church, Early English in style, with 900 sittings and a spire 130 feet high, was built in 1880 at a cost of £5000; and, at a cost of nearly £2000, a Free church, Romanesque in style, was built in 1881. Other places of worship are a U.P. church (1818; 350 sittings), an Evangelical Union church, St Peter's Roman Catholic church (1814; 300 sittings), and Christ Church Episcopal (1875), another Early English edifice, with tower unfinished. A public, a female public, and a Roman Catholic school, with respective accommodation for 722, 60, and 150 children, had (1891) an average attendance of 465, 47, and 66, and grants of £465, 16s. 1d., £48, 19s., and £59, 13s. 6d. Under the General Police and Improvement Act of 1862, the burgh is governed by a senior and two junior magistrates and six other police commissioners. Dalbeattie Loch, a mile and a half from the town, abounds with trout. Pop. of burgh (1841) 1430, (1861) 1736, (1871) 2937, (1881) 3865, (1891) 3149; of *quoad sacra* parish (1881) 4132, (1891) 3348. —*Ord. Sur.*, sh. 5, 1857.

Dalbeth, a seat and a Roman Catholic convent on the Clyde, in the eastern environs of Glasgow. Connected with the convent is a female reformatory, and adjoining it on the west is a large and beautiful cemetery, west of which is Westthorn reformatory for boys.

Dalblair. See **GLENMUIR**.

Dalcairn Linn. See **BERBETH**.

Dalcapon. See **DUNKELD AND DOWALLY**.

Dalchally, a glen in Glenisla parish, Forfarshire, traversed by Cally Water to the river Isla at a point 6 miles N of Glenisla church.

Dalchonzie, an estate, with a modern mansion, in Comrie parish, Perthshire, on the right bank of the Earn, 2½ miles W of Comrie village.

Dalchosnie, an estate, with a mansion, in Fortingall parish, NW Perthshire, near the right bank of the Tummel, 1¼ mile ESE of Kinloch Rannoch.

Dalcreichard, a hamlet, with a public school, in Urquhart and Glenmoriston parish, Inverness-shire, on the left bank of the Moriston, 1 mile W of Torgyle Bridge. It has a post office under Inverness.

Dalcross, a ruined castle in the united parish of Croy and Dalcross, NE Inverness-shire, 2 miles SE of Dalcross station on the Highland railway, this being 6½ miles NE of Inverness. Built by the eighth Lord Lovat in 1620, it afterwards passed to the M'Intoshes, whose nineteenth chief, Lachlan, lay here in state from 9 Dec. 1703 till 18 Jan. 1704, when 2000 of the Clan Chattan followed his remains—scanty enough, one would fancy—to their last resting-place in Petty church. Here, too, the Royal troops were put in array immediately before the battle of Culloden. Dalcross stands high, and commands a continuous view from Mealfourvie to the Ord of Caithness; it consists of two square, lofty, corbie-gabled blocks, joined to each other at right angles. In 1893 measures were taken for its restoration. See **CROY**.

Dalcrue or **Dalcrue**, a place in Methven parish, Perthshire, 2 miles NE of Methven village, on the right bank of the Almond, which here is crossed by a fine bridge, erected in 1836-37, with one semicircular arch of 80 feet span.

Daldawn or **Dildawn**, an estate, with a modern mansion in Kelton parish, Kirkcudbrightshire, on the left bank of the Dee, 3 miles SW of Castle-Douglas.

Dalduff, an ancient baronial fortalice in Maybole parish, Ayrshire, now represented by only ruinous walls, 3 miles SE of Maybole town.

Dale, a village of Shetland, 3½ miles from its post-town, Lerwick.

Dalgain. See **SORN**.

Dalgarno, an old parish, now united to that of Closeburn, Dumfriesshire.

Dalgarnock, an ancient parish in Nithsdale, Dumfriesshire, annexed to Closeburn in 1697. It nearly surrounded the original parish of Closeburn; and its beautiful churchyard, 1½ mile S of Thornhill, contains the grave and tombstone of the persecuted Covenanter James Harkness. Here stood a village, a burgh of barony, where a famous market-tryst was held, that seems to have been continued after most or all of the houses had disappeared, and is alluded to in Burns's lines:

'But a' the next week, as I fretted w' care,
I gaed to the tryst o' Dalgarnock;
And wha but my fine fickle lover was there!
I glow'd as I'd seen a warlock, a warlock;
I glow'd as I'd seen a warlock.'

Dalgarven, a village in Kilwinning parish, Ayrshire, on the right bank of the Garnock, contiguous to the Glasgow and South-Western railway, 2 miles N by W of Kilwinning town.

Dalgenross. See **DALGINROSS**.

Dalgety or **Delgaty**, an estate, with a mansion, in Turriff parish, N Aberdeenshire, 2 miles ENE of Turriff town. For three centuries and a half the property of the Hays of Erroll, it was sold in 1762 to Peter Garden, Esq. of Troup, and by his son resold in 1798 to James, second Earl of Fife, whose nephew, Gen. the Hon. Sir Aloxander Duff (1778-1851), long made it his residence. Finally it was purchased by a younger brother of the Right Hon. Sir M. E. Grant-Duff, Ainslie Douglas Ainslie, Esq., who, born in 1838, changed in 1866 his name to that of Ainslie. The oldest part of Dalgety Castle, with walls more than 7 feet thick, is older perhaps than its earliest extant date (1579); and, added to at various periods down to the present century, the whole is now a stately square, winged pile, its battlements—66 feet from the ground—commanding a beautiful view. The grounds are finely wooded, and contain a lake (2½ × ¾ furl.)—*Ord. Sur.*, sh. 86, 1876.

Dalgety, a coast parish of SW Fife, containing the villages of St Davids, Fordel, and Mossgreen, with part of **CROSSGATES**, and traversed down to the coast at St Davids

by the Fordel mineral railway; whilst the church stands $1\frac{1}{2}$ mile W by S of the post-town Aberdour, and $4\frac{1}{2}$ miles W by S of Burntisland. It is bounded W and N by Dunfermline, NE by Aberdour, and SE by the Firth of Forth, here from $1\frac{3}{4}$ to $4\frac{3}{4}$ miles broad. Its utmost length, from N to S, is $4\frac{1}{2}$ miles; its breadth, from E to W, varies between $4\frac{1}{2}$ furlongs and $2\frac{3}{4}$ miles; and its area is $3710\frac{3}{4}$ acres, of which $357\frac{3}{4}$ are foreshore and $12\frac{3}{4}$ water. The coast-line is fully $5\frac{1}{2}$ miles long, if one follows the bends of Barnhill, Braefoot, Dalgety, and Donibristle Bays, the largest of which, Dalgety Bay, measures $6\frac{1}{2}$ furlongs across the entrance, and $3\frac{1}{2}$ thence to its inmost recess. From the shore, which in places is beautifully wooded right down to the water's edge, the surface here and there rises steeply to 100 feet and more above sea-level, thence gently ascending throughout the interior, till close to the northern border, $\frac{1}{4}$ mile E of Crossgates, it attains 426 feet. A darkly-wooded glen, clearing the grounds of Fordel, is traversed by a brook which makes a fine waterfall of 50 feet; and a beautiful little loch is at Otterston, which still boasts some magnificent trees. Among them are a beech and an ash, 90 and 80 feet high, and $15\frac{1}{2}$ in girth at 5 feet from the ground; but a gale of January 1882 laid low two venerable walnut-trees, the largest of which girthed $15\frac{3}{8}$ feet at 16 from the ground. The rocks are chiefly of the Carboniferous formation, and include great abundance of sandstone, limestone, and coal; the last, of very superior quality, is mined at Fordel. The arable soil is loam, partly light and dry, more generally deep and strong. A village of Dalgety stood at the head of Dalgety Bay, $\frac{1}{2}$ mile SSE of the present church; but the ivy-clad ruins of St Bridget's kirk, dating from the 12th century, are all that now mark its site. First Pointed in style, these retain a piscina and a number of quaint old epitaphs; whilst Chancellor Seton, first Earl of Dunfermline (1555-1622), is buried in a vault to the W. Almost the last to preach within their walls was Edward Irving. Other antiquities are Fordel Castle and a fragment of Couston Castle, at the E end of Otterston Loch, the retreat this of Charles I.'s persecuted chaplain, the Rev. Robert Blair (1583-1666), whose grave is at Aberdour; of Seton's favourite residence, Dalgety House, not so much as a stone remains. The chief mansions are DONIBRISTLE HOUSE, FORDEL HOUSE, COCKPEN, and Otterston (1539). Giving off its northern portion to the *quoad sacra* parish of MOSSGREEN, Dalgety is in the presbytery of Dunfermline and synod of Fife; the living is worth £298. The present church, built in 1830, is a good Gothic structure, containing 500 sittings; and 2 public schools, Hillend and Mossgreen, with respective accommodation for 118 and 268 children, had (1891) an average attendance of 83 and 190, and grants of £60, 3s. and £175, 10s. Valuation (1892) £6788, 8s. 2d. Pop. (1801) 890, (1831) 1300, (1861) 1569, (1871) 1310, (1881) 1321, (1891) 1341; of *quoad sacra* parish (1891) 389.—*Ord. Sur.*, shs. 32, 40, 1857-67. See pp. 25-54 of J. C. R. Buckner's *Rambles Round Aberdour* (Edinb. 1881).

Dalginch, a quondam castle said to have belonged to Macduff, on the site of Barnside House, near Markinch, Fife.

Dalginross (Gael. *dail-chinn-rois*, 'field at the head of the point'), a village in Comrie parish, Perthshire, on the peninsula between the Water of Ruchill and the river Earn, 3 furlongs S of Comrie town. Dalginross Plain, to the S of the village, contained two Roman camps, one of them occupying an area of 16 acres, supposed by some antiquaries to have been the 'Victoria' of the ninth Legion. See BLAIRINROAR.

Dalguise, a village, with a public school, in Little Dunkeld parish, central Perthshire, on the right bank of the Tay, with a station on the Highland railway, $4\frac{1}{2}$ miles NNW of Dunkeld, under which it has a post and telegraph office. The railway crosses the Tay, $\frac{1}{2}$ mile N of the station, on a latticed iron-girder viaduct 360 feet in span, resting on one stone pier, and terminating at each end in handsome towers and wings of masonry 71 feet long, and there it begins to open on the

beautiful Vale of Athol. Dalguise House, near the village, is a plain edifice, but is rich in interesting relics—the Lamont harp, Queen Mary's harp, Prince Charlie's sword, two ancient targets, portraits, etc. The estate was given by William the Lyon to Dunkeld church, and in 1543 was transferred by Bishop Crichton to John, second son of Steuart of Arntullie, whose descendant, J. N. Durrant Steuart, Esq., twelfth Laird of Dalguise, is the present owner. At Easter Dalguise there is an interesting relic of the former bed of the Tay in the shape of a substantial stone bridge in first-rate repair.

Dalhalvaig. See REAY.

Dalharrold, a place in Strathnaver, Sutherland, with an ancient standing-stone.

Dalhonzie. See DALCHONZIE.

Dalhousie Castle, a noble mansion in Cockpen parish, Midlothian, on the left bank of the river South Esk, $2\frac{1}{2}$ miles S by W of Dalkeith, $1\frac{1}{2}$ mile SE of Bonnyrigg, and $1\frac{1}{2}$ S by W of Dalhousie station on the Waverley route of the North British, this being 9 miles SE of Edinburgh. In the first half of the 12th century Simon de Ramsay received a grant of lands in Midlothian from David I.; in 1296 and 1304 William de Ramsay swore fealty to Edward I. of England for the lands of 'Dalwolie.' His son, Sir Alexander, was one of the great Scotch leaders in the War of Independence, the capturer of Roxburgh, who for reward was starved to death in the Castle of Hermitage (1342); in 1400 his namesake and fourth descendant successfully defended Dalhousie against Henry IV. of England. This Sir Alexander was slain at Homildon (1402), as was another at Flodden (1513). In 1618 George Ramsay, eleventh in descent from the first Sir Alexander, was raised to the peerage as Lord Ramsay of Melrose, a title changed in the following year to that of Lord Ramsay of Dalhousie; and in 1633 his son and successor, William, was created Earl of Dalhousie and Baron Ramsay of Kerington. During his time we find Oliver Cromwell dating his letters from Dalhousie Castle, 8 and 9 Oct. 1648. The fifth, sixth, seventh, and ninth Earls were all of them soldiers, George, the ninth (1770-1838), for service done in the Peninsula being raised in 1815 to the peerage of the United Kingdom as Baron Dalhousie of Dalhousie. His third son and successor, the Indian administrator, James Andrew Broun-Ramsay (1812-60), was born and died at Dalhousie, at Dalhousie received a call from the Queen and Prince Albert on 4 Sept. 1842, was Governor-General of India from 1847 to 1855, and in 1849 was created Marquis of Dalhousie, of Dalhousie Castle and the Punjab. This title died with him, but those of Earl of Dalhousie and Baron Ramsay devolved on his cousin, Fox Maule, second Lord Panmure (1801-74), whose cousin and successor Admiral George Ramsay (1806-80) became a peer of the United Kingdom in 1875 as Baron Ramsay of Glenmark. His grandson, the present and fourteenth Earl, Arthur George Maule Ramsay (b. 1878; suc. 1887), is nineteenth in descent from the first Sir Alexander, and holds large estates in Midlothian and Forfarshire. (See BRECHIN and PANMURE HOUSE.) Dating from the 12th century, Dalhousie is described by the Queen as 'a real old Scottish castle, of reddish stone;' but by the ninth Earl it was so altered and enlarged that it is hard to say how much is old and how much modern. Anyhow it is a stately castellated pile, with lofty tower and a fine collection of family portraits; on 10 Oct. 1867 it narrowly escaped entire destruction by fire, with the loss of the third story and attics of the central portion. The park is finely wooded, and the garden of singular beauty. Less than half a mile to the NW flows Dalhousie Burn, which, rising near Newbigging, runs 5 miles north-eastward along the boundary of Carrington with Lasswade and Cockpen, and through the interior of the latter parish, till near Dalhousie station it joins the South Esk. A pretty streamlet, with steep but wooded banks, it makes a descent from about 700 to less than 200 feet above sea-level.—*Ord. Sur.*, sh. 32, 1857. See Peter Mitchell's *Parish of Cockpen in the Olden Times* (Dalkeith, 1881).

Dalintober, a suburban village in Campbeltown parish,

Argyllshire, on the N side of the head of Campbeltown Loch. Lying within the parliamentary boundaries of Campbeltown burgh, it is a thriving place, with a substantial small pier.

Daljarroch, an estate, with a mansion, in Colmonell parish, S Ayrshire, on the right bank of the Stinchar, near Pinmore station, and 4 miles ENE of Colmonell village. Comprising 1927 acres, it was sold in 1875 for £48,000. There is a post office of Daljarroch.

Dalkairnie Linn. See **BERBETH**.

Dalkeith, a town and a parish in the E of Edinburghshire. The town stands, 182 feet above sea-level, on a peninsula from 3 to 5 furlongs wide between the North and South Esk, and by road is $4\frac{1}{2}$ miles S by W of Musselburgh and 6 SE of Edinburgh, whilst, as terminus of a branch line $3\frac{3}{4}$ furlongs long, it is $8\frac{3}{8}$ miles SE of Edinburgh. It is also accessible from Eskbank station, 5 furlongs to the SW, on the main Waverley route of the North British, this being $8\frac{3}{8}$ miles SE of Edinburgh and $90\frac{1}{2}$ N by W of Carlisle. A low and flat-backed ridge, the peninsula slopes more steeply to the North than the South Esk; of the town's fair surroundings this picture is given in David Moir's *Mansie Wauch*.—'Pleasant Dalkeith! with its bonny river, its gardens full of gooseberry bushes and pear-trees, its grass parks spotted with sheep, and its grand green woods.' The High Street widens north-eastward from 30 to 85 feet, and terminates at a gateway leading up to Dalkeith Palace, the principal seat of the Duke of Buccleuch, which palace, as centring round it all the chief episodes in Dalkeith's history, must here be treated of before Dalkeith itself.

The Anglo-Norman knight, William de Graham, a witness to the foundation charter of Holyrood Abbey (1128), received from David I. the manor of Dalkeith; his seventh descendant, John de Graham, dying without issue about the middle of the 14th century, left two sisters, his heiresses, of whom one, Marjory, conveyed Dalkeith by marriage to the Douglasses. 'In my youth,' says Froissart, 'I, the author of this book, travelled all through Scotland, and was full fifteen days resident with William, Earl of Douglas, at his castle of Dalkeith. Earl James was then very young, but a promising youth,' etc. Doughty Earl James it was who, capturing Hotspur's trophy, cried out that he would set it high on the fower of his castle of Dalkeith—a taunt that led to the battle of Otterburn (1388). In 1452 the town was plundered and burned by the brother of the murdered sixth Earl of Douglas, but the castle held out gallantly under Patrick Cockburn, its governor; in 1458 James II. conferred on James Douglas of Dalkeith the title of Earl of Morton; and at the second Earl's castle James IV. first met his affianced Queen, the Princess Margaret of England, 3 Aug. 1503, when, 'having greeted her with knightly courtesy, and passed the day in her company, he returned to his bed at Edinburgh, very well content of so fair meeting.' In 1543, Cardinal Beaton was committed prisoner to Dalkeith Castle, which in 1547 had to yield to the English victors of Pinkie after a valiant defence. James, fourth Earl of Morton, the cruel and grasping Regent, built at Dalkeith about 1575 a magnificent palace, richly adorned with tapestries and pictures, and fitter for king than subject—the 'Lion's Den' the country people called it. Hither on Sunday, June 11, 1581, just nine days after the Lion's head had fallen beneath the Maiden's axe, James VI. returned from the parish kirk with two pipers playing before him and with the Duke of Lennox, Morton's accuser and successor. The Modern Solomon revisited Dalkeith in 1617, when Archibald Symson, the parish minister, addressed to him a congratulatory poem, *Philomela Dalkethensis*; and in 1633 Charles I. was here magnificently entertained. In the winter of 1637-38, following close on the Liturgy tumults, the Privy Council adjourned from Linlithgow to Dalkeith Palace, whither twelve out of the sixteen 'Tables,' or commissioners, representing the supplicants of every estate, came to present their menacing protestation; and in the spring of 1639 these Tables made themselves

masters of the palace. Within it, besides military stores, were found the regalia—crown, sceptre, and sword—which, with all reverence, were brought back by the nobles to Edinburgh Castle. Francis Scott, second Earl of Buccleuch, purchased Dalkeith from the ninth Earl of Morton in 1642. Dying in 1651, he left two daughters, Mary (1648-61) and Anne (1651-1732), who, successively Countesses of Buccleuch in their own right, married, at the early ages of 11 and 12, Walter Scott of Highchester and the ill-fated Duke of Monmouth, both of them lads of only 14 years. The Countess Mary's custodian was the celebrated General Monk, who as such had a five years' lease of Dalkeith (1654-59), and lived there quietly, busying himself with gardening, but ever regarded jealously by Cromwell. Her mother, who for third husband had taken the Earl of Wemyss, is described by Baillie as a witty, active woman, through whom Monk acted on the Scottish nobles, and through whom the Scottish nobles acted in turn on Monk; and that 'sly fellow' is said to have planned the Restoration in rooms, still extant, overhanging the Esk. Monmouth himself must often have been here; in 1663 he and his child spouse were created Duke and Duchess of Buccleuch and Earl and Countess of Dalkeith. The Duchess of the *Lay of the Last Minstrel*, she, after Monmouth's execution (1685), lived chiefly at NEWARK Castle in princely style, more rarely at Dalkeith Palace, which, as it stands to-day, was mainly built by her. Her grandson and successor, Francis, second Duke of Buccleuch (1695-1751), in whose time Prince Charles Edward passed two nights at Dalkeith (1 and 2 Nov. 1745), married the eldest daughter of James, second Duke of Queensberry; and their grandson Henry, third Duke (1746-1812), inherited the dukedom of Queensberry in 1810. With a younger brother, assassinated at Paris in 1766, he had made the grand tour under the tutelage of Adam Smith; and he did much to improve his tenantry and vast estates. To him Scott owed his appointment (1799) as sheriff-depute of Selkirkshire; and his son and successor, Charles William Henry (1772-1819), is also remembered as a kindly friend to both Sir Walter and the Ettrick Shepherd. His son, Walter-Francis (1806-84), twice entertained royalty in the persons of George IV. (15-29 Aug. 1822) and Queen Victoria and Prince Albert (1-6 and 13-15 Sept. 1842). His son, Wm.-Hy.-Walter Montagu-Douglas-Scott, present and sixth Duke (b. 1831), is the fourth largest landowner in Scotland, holding 432,338 acres, valued at £187,156 per annum, viz., 3536 in Midlothian (£28,408, including sums received for minerals and for Granton harbour), 253,514 in Dumfriesshire (£97,530), 104,461 in Roxburghshire (£39,458), 60,428 in Selkirkshire (£19,828), 9091 in Lanarkshire (£1544), and 1908 in Fife, Kirkcubright, and Peebles shires (£388). See **BOWHILL**, **DRUMLANRIG CASTLE**, and **BRANKHOLM**. Dalkeith Palace, crowning a steep, rocky knoll above the North Esk's right bank, was mainly rebuilt by the Duchess of Monmouth in the early years of the 18th century. Her architect, Sir John Vanbrugh, better known for his plays than his buildings, chose as a model Loo Palace in the Netherlands; the result is a heavy-looking Grecian pile of reddish stone, with recessed centre and projecting wings. The interior, however, is rich in treasures of art—six family portraits by Gainsborough and Sir Joshua Reynolds, Wilkie's portrait of George IV., three landscapes by Clande, and other paintings by Holbein, Rembrandt, Annibal Caracci, Van Dyck, etc., with the furniture given to Monmouth by Charles II. The park, extending into Newton and Inveresk parishes, and ringed by a high stone wall, has a total area of 1035 acres, 130 of which are occupied by a remnant of the ancient Caledonian Forest. One kingly oak is 93 feet high, and girths $18\frac{1}{2}$ feet at 1 foot from the ground; whilst an ash and three beeches, with respective girth of $13\frac{3}{4}$, 17, $16\frac{1}{2}$, and $14\frac{1}{2}$ feet, are 95, 110, 103, and 95 feet high. Landscape gardening has done much to enhance the beauties due to an undulating surface and to the windings of the rivers Esk, which unite 7 furlongs below the palace; and the formality in the general disposition of the grounds

and in the planting, that offended both Gilpin and Stoddart, is ever softening with the lapse of years. Sir William Fraser, *The Scotts of Buccleuch* (Edinb. 1878).

Apart from castle and palace, Dalkeith has nothing more notable in its history than Mr Gladstone's electoral campaigns. Connected with it by birth, education, or residence were the poet, John Rolland (fl. 1575); David Calderwood (1575-1650), ecclesiastical historian; Archibald Pitcairne (1652-1713), poet and physician; the judge, William Calderwood, Lord Polton (1661-1733); John Love (1695-1750), Buchanan's vindicator, and rector of the grammar school from 1739 till his death; Alexander Wedderburn, Lord Loughborough and first Earl of Rosslyn (1733-1805), Lord High Chancellor of England; the historian, Principal William Robertson, D.D. (1721-93); Henry Dundas, Viscount Melville (1742-1811); John Kay, the caricaturist (1742-1826), for six years' prentice to a Dalkeith barber; Ralph Wardlaw, D.D. (1779-1853), an eminent divine; Robert Mushet (1782-1828), of the Royal Mint; Norman Macleod, D.D. (1812-72), minister 1843-51; and Prof. P. G. Tait (b. 1831).

Nor, apart from its church, has the town much to show in the way of antiquities—a few old sculptured stones let into modern buildings, 'Cromwell's orderly house' in Chapelwell Close, and a fragment of a piscina in an old house near the palace gate. The market-cross has long since disappeared, but hiring fairs are held on the last Thursday of February, the first Thursday of April, and the second Thursday of October; horse and cattle fairs on the Thursday of May after Rutherglen and the third Tuesday of October, and corn markets on every Thursday in the year.* The Corn Exchange was built in 1854 at a cost of £3800 from designs by D. Cousin of Edinburgh. The great hall is 172 by 50 feet, and 45 feet high, with open-timbered roof and a gable-front to the High Street, adorned by a panel bearing the Duke's arms. The Town-hall, a plain old building, stands also in the High Street; the Foresters' hall, in Buccleuch Street, measuring 80 by 45 feet, seats 800 persons, and was erected in 1877 at a cost of £4700; and the Combination poorhouse, for twelve parishes, at Eskbank, accommodates 120 inmates, and was built at a cost of £4058 in 1849, being the first of such houses in Scotland. Dalkeith has besides a post office, with money order, savings bank, insurance, and telegraph departments, branches of the Commercial (1810), the National (1825), the Royal (1836), and the Clydesdale Banks (1858), a National Security Savings bank (1839), insurance agencies, several hotels, gas-works (1827), a scientific association (1832), an agricultural society (1805), Liberal, Unionist, and Conservative associations, a masonic hall, a town mission (1846), a Royal Infirmary auxiliary society (1841), a total abstinence society (1837), bowling, golf, cricket, football, cycling, and curling clubs, and a newspaper, the *Dalkeith Advertiser* (Thursday). The water supply being defective, in 1878 an arrangement was made with the Edinburgh Water Company to bring in a fresh supply from the Moorfoot Hills, the works being carried out in 1879 at a cost of £6000. This being still insufficient, an ample supply, of excellent quality, was obtained in 1888 within the burgh bounds by boring, the quantity thus secured being 65,000 gallons every twenty-four hours. Ironfounding, brushmaking, carpet-weaving, and market-gardening are the leading industries.

The old or East Parish church is of unknown date; but Pope Sixtus' bull of 1475 refers to the collegiate establishment of St Nicholas of Dalkeith, consisting of a provost, 5 canons, and 5 prebends, as having been 'founded and endowed from ancient times.' Second Pointed in style, it consists of an aisled nave (78 × 53 feet), a choir (44 × 27) with trigonal apse, N and S transepts, and a western clock-tower and octagonal spire 85 feet high. The choir, however, which, with its canopied niches, is much more highly decorated than the rest of

the fabric, has long been roofless, cut off from the nave by an unsightly wall; and forty years ago nave and transepts were 'choked with galleries, rising tier above tier behind and around the pulpit—a curious example of Scotch vandalism. There was, however, something of the picturesque in the confused cramming of these "lofts" into every nook and corner, in the quaint shields, devices, and texts emblazoned in front of the seats allotted to different guilds. The weavers reminded the congregation of how life was passing "swiftly as the weaver's shuttle," and the hammermen of how the Word of God smote the rocky heart in pieces' (*Life of Norman Macleod*, 1876). Now, as restored by the late David Bryce, R.S.A., in 1852, the church contains 760 sittings, and presents a goodly appearance, but for the lack of the choir, in which are two recumbent effigies, probably of James, first Earl of Morton, and his dame, as also the graves of the young Countess Mary and her sister, the Duchess of Monmouth. The West Church, on a commanding site above the North Esk, was erected in 1840 at the cost of the Duke of Buccleuch, and is a cruciform Early English structure, with 950 sittings, and a spire of 167 feet high. King's Park U.P. church, also Early English in style, with 700 sittings and a spire of 140 feet, was built in 1869-70 at a cost of £3300; and Buccleuch Street U.P. church, a Lombardo-Venetian edifice, in 1879, at a cost of £2767. Other places of worship are a Free church, a Congregational church (300 sittings), Wesleyan, Baptist, and Evangelical Union chapels, St David's Roman Catholic church (1854; 500 sittings), and St Mary's Scotch Episcopal church (1845; 250 sittings). The last, situated just within the gateway of the ducal park, is a beautiful Early English building, comprising a nave with open roof, a chancel elaborately groined in stone, and a S vestry. Back Street public school, the Burgh public school, and St David's Roman Catholic school, with respective accommodation for 265, 500, and 282 children, have an average attendance of over 200, 480, and 160, and grants of about £200, £485, and £143.

Under the successive holders of castle and palace, Dalkeith was for centuries a burgh of barony; on the abolition of hereditary jurisdictions, in 1747, the Duke claimed £4000 for the regality, and was allowed £3400. In terms of Acts passed between 1759 and 1825 twelve trustees were appointed, of whom the baron-bailie was always one; but in 1878 the General Police Act was adopted after repeated rejection, and the town is now governed by a chief magistrate, 2 other magistrates, and 9 commissioners. Pop. (1841) 4831, (1851) 5086, (1861) 5396, (1871) 6386, (1881) 6931, (1891) 7035.

The parish, containing also the village of Lugton and the greater part of Whitehill village, is bounded NW by Newton, NE by Inveresk, E by Cranston, SE and S by Newbattle, and SW by Lasswade. Its utmost length, from E to W, is 3½ miles; its utmost breadth, from N to S, is 1½ mile; and its area is 2345½ acres, of which 1½ are water. The North Esk winds 2½ miles, mostly through the interior, but partly along the Lasswade and Newton borders, till, near the northern extremity of the parish, it is joined by the South Esk, which, entering from Newbattle, has a northerly course here of 2 miles. As the river Esk, their united waters flow on 1 furlong north-eastward along the Newton boundary; and, at the point where they pass into Inveresk, the surface declines to 100 feet above sea-level, thence rising gently south-south-westward and south-eastward to 182 feet at Dalkeith High Street, 300 at Longside, and 400 near Easter Cowden. The rocks belong to the coal-measures of the Carboniferous formation, and coal is largely worked, whilst an extensive bed of brick and tile clay occurs at Newfarm and near Galloshall. The soil is generally a good deep loam, with subsoil of clay and gravel; and the rent of the land is high, particularly that occupied by gardens. The Duke of Buccleuch holds about seven-eighths of the entire parish. Though not within the parish, yet just about a mile SW of the town, there is Newbattle Abbey, the seat of the Marquis of Lothian; and within easy distance

* The weekly corn market was changed from Sunday (on which it had been held 'past memory of man') to Thursday by an Act of the Scottish Parliament of 1651, which also appointed the yearly October fair.

of it are the classic house and grounds of HAWTHORN-DEX, and the glen, the castle, and the chapel of ROSLIN. Part of Restalrig deanery till 1592, and now the seat of a presbytery in the synod of Lothian and Tweeddale, Dalkeith is divided ecclesiastically into East and West parishes, the former a living worth £527. Two schools under the landward board, Dalkeith public and Whitehill colliery, with respective accommodation for 178 and 121 children, had (1891) an average attendance of 166 and 83, and grants of £175, 13s. 6d. and £72, 10s. Pop. (1801) 3906, (1821) 5169, (1841) 5830, (1861) 7114, (1871) 7667, (1881) 7707, (1891) 7704.—*Ord. Sur.*, sh. 32, 1857.

The presbytery of Dalkeith, established in 1581, comprises the ancient parishes of Borthwick, Carrington, Cockpen, Cranston, Crichton, Dalkeith, Fala and Soutra, Glencorse, Heriot, Inveresk, Lasswade, Newbattle, Newton, Ormiston, Penicuik, and Temple; the *quoad sacra* parishes of West Dalkeith, Loanhead, New Craighall, North Esk, Rosewell, Roslin, and Stobhill. Pop. (1871) 45,099, (1881) 50,932, (1891) 54,389, of whom 11,131 were communicants of the Church of Scotland. The Free Church also has a presbytery of Dalkeith, comprising the churches of Carlops, Cockenzie, Cockpen, Dalkeith, Gorebridge, Loanhead, Musselburgh, Newbattle, Ormiston, Penicuik, Roslin, Temple, and Carrington, which together had 2935 members in 1891.

Dallachy. See BELLIE.

Dallas, a village and a parish of central Elginshire. The village stands on the left bank of the Lossie, 11 miles SW of Elgin, and 8½ SE of Forres, under which it has a post office.

The parish, containing also Kellas village, 3½ miles to the ENE, is bounded N by Elgin, E by Birnie, SE by Rothies and Knockando, W by Edinkillie, and NW by Rafford. Rudely triangular in outline, it has an utmost length of 10½ miles from its north-eastern angle, near Lennocside, to Carn Kitty, at its south-western apex; an utmost breadth from E to W of 7½ miles; and an area of 23,024½ acres, of which 122 are water. The Lossie, issuing from Loch Trevie, near the south-western corner of the parish, winds 15½ miles north-north-eastward and east-north-eastward through the interior, descending in this course from 1300 to 300 feet above sea-level; near Lennocside, at the north-eastern corner, it is joined by Lennoc Burn, flowing 4 miles northward along all the Birnie border, and forming a waterfall, the Ess of GLENLATTERACH; whilst Black Burn, another of the Lossie's affluents, runs 3¾ miles north-eastward along all the boundary with Rafford, thence passing off into Elgin. Lochs Dallas (3¼ × 1¼ furl.) and Trevie (1 × ¾ furl.) lie right upon the Edinkillie border; Loch COULATT (1½ × 1 furl.) falls just within Knockando; and fifteen lochlets, tinier still, are dotted over the south-western interior. From NE to SW the chief elevations to the right of the Lossie are Mill Buie (1100 feet), Cairn Uisb (1197), Meikle Hill (932), Cas na Smorrach (1146), and Carn Kitty (1711); to the left rise wooded Mulundy Hill (768), another Mill Buie (1216), and Carnache (1179). These hills are variously arable, planted, and heathy; the strathes are well cultivated, and exhibit much natural beauty. Granite is the prevailing rock, but sandstone and grey slate have both been quarried; the soil is generally light loam on a gravelly bottom along the Lossie, a vegetable mould incumbent on till in parts of the uplands, and moor or moss along the southern border. Tor Castle, ½ mile N by E of the village, was built in 1400 by Sir Thomas Cumming of AULTRE, and, long the Cummings' stronghold, consists now only of ruined outworks and a moat. The property is mostly divided among three. Dallas is in the presbytery of Forres and eynod of Moray; the living is worth £176. The present church, near the village, was built in 1794, and contains 250 sittings; its ancient, heather-thatched predecessor was dedicated to St Michael; and a stonoe shaft, 12 feet high, in the kirkyard, surmounted by a fleur-de-lis, is the old market-cross. A Free church stands ¾ mile NE of the village; and two public schools, Dallas and Kellas female, with respective accommodation for 135 and 78 children, had (1891) an average

attendance of 88 and 38, and grants of £96, 13s. and £39, 5s. 6d. Pop. (1881) 915, (1891) 860.—*Ord. Sur.*, sh. 85, 1876.

Dallintober. See DALINTOBER.

Dalmahoy (Gael. *dail-ma-thuath*, 'field to the north'), a mansion in Ratho parish, Edinburghshire, 1½ mile S by E of Ratho village, and 2½ miles W by N of Curriehill station. Built partly in the early years of last century, partly at subsequent periods, it has grounds of great beauty, commanding fine distant views, and open to strangers. The estate, having belonged from 1296 and earlier to the family of Dalmahoy, passed in the middle of the 17th century to the Dalrymples, from whom it was purchased about 1750 by the seventeenth Earl of Morton; and Dalmahoy is now the chief seat of Sholto-G.-W. Douglas, twenty-first Earl of Morton since 1458 (b. 1844; suc. 1884). (See also ABERDOUR and CONA.) Dalmahoy Crag, overlooking the Caledonian railway 1¼ mile SSW of Dalmahoy House, rise to an altitude of 800 feet above sea-level, stoop precipitously to the W, and constitute a grand feature in the general landscape of the Western Lothians. Dalmahoy has an Episcopal chapel, St Mary's.

Dalmally, a village in Glenorchy parish, Argyllshire, on the left bank of the Orchy, near the north-eastern extremity of Loch Awe, with a station on the Callander and Oban railway, 2¼ miles E of Oban, 62¼ WNW of Stirling, and 16 by road NNE of Inverary. Nestling among trees, and at the same time commanding magnificent views of the basin and mountain screens of Loch Awe, it is a favourite resort of anglers, and has a post office, with money order, savings bank, and telegraph departments, a branch of the Commercial Bank, a hotel, a Free church, a public school, and a fair on the Wednesday of March and the Friday of October after Kil-michael; whilst on an islet in the Orchy here stands Glenorchy parish church (1811; 507 sittings), an octagonal Gothic structure with a spire.

Dalmarnock. See GLASGOW.

Dalmory. See GARTMORE.

Dalmelling. See DALMULLIN.

Dalmellington, a small town and a parish on the S border of Kyle district, Ayrshire. The town stands, 600 feet above sea-level, in a recess sheltered by hills, at the terminus of a branch (1856) of the Glasgow and South-Western, ¾ mile NE of the Bogton Loch expansion of the river Doon, and 9 miles SE of Hollybush, 15 SE of Ayr, 56 SSW of Glasgow, and 72 SW of Edinburgh. Dating from the 11th century, and a burgh of barony, it was long little else than a stagnating village, but in recent times has become a centre of traffic in connection with the neighbouring iron-works; at it are a post office, with money order, savings bank, and telegraph departments, a branch of the Royal Bank, insurance agencies, hotels, gas-works, a reading-room and library, and a public school, erected in 1875 at a cost of £3000, whilst fairs are held here on the last Thursday of February and the day after Moniaive, *i.e.*, on the second or third Saturday of August. The parish church, built in 1846, is a handsome edifice in the Saxon style, with a lofty tower and 640 sittings; and other places of worship are a Free church (400 sittings), an Evangelical Union chapel, and the Roman Catholic church of Our Lady of the Rosary (1860; 170 sittings). Pop. (1861) 1299, (1871) 1514, (1881) 1437, (1891) 1395.

The parish, containing also the mining village of Benqubat, Burnfoothill, Craigmark, Lethanhill, and Water-side, is bounded N by Coylton and Ochiltree, E by New Cumnock, SE by Carsphairn in Kirkcudbrightshire, SW by Loch Doon and Straiton. Its greatest length, from NW to SE, is 9½ miles; its breadth, from NE to SW, varies between 1½ and 4½ miles; and its area is 17,926½ acres, of which 144 are water. Loch DOON, with utmost length and width of 5½ miles and 6½ furlongs, lies just within Straiton, 680 feet above the level of the sea; and, issuing from it, the river Doon winds 10½ miles north-westward along all the rest of the Straiton border, near the town expanding into BOOTON Loch (6 × 2¼ furl.), and receiving Muck Water and other burns from the interior. On the

Kirkcudbrightshire border, 4 miles SSE of the town, is Loch Muck ($5 \times 1\frac{1}{2}$ furl.) Below Dalharo, where the Doon quits Dalmellington, the surface sinks to 500 feet above sea-level, thence rising eastward and south-eastward to 1103 feet near Hillend, 986 on Green Hill, 1426 on Benquhat, 925 on Craigmark Hill, 1521 on BENEBOCH, 1333 on Benbain, 1107 on Knockskae, 1621 on BENBRACK, 1760 on Windy Standard, 1484 on Campbell's Hill, and 1071 on Muckle Eriff Hill. A plain or very gentle slope lies along the Doon over a length of about 3 miles in the vicinity of the town, and, measuring 1 mile in extreme width at the middle, has nearly the figure of a crescent, narrowed to a point at both extremities. The surface everywhere beyond that plain rises into continuous eminences or mountain ridges, of which that nearest the Doon almost blocks its course at the NW angle of the parish, and extends away eastward as a flank to the plain, till it terminates abruptly, to the NE of the town, in a splendid basaltic colonnade 300 feet high and 600 feet long. Two other ridges run south-eastward and southward, and to the N are adjoined by a ridge extending into New Cumnock. The hills, in general, have easy acclivities, and in only three places, over short distances, are precipitous; yet they form mountain passes of picturesque character, in one or two instances of high grandeur. Two of the ridges, on the way from the town to Kirkcudbrightshire, approach each other so nearly for upwards of a mile, as to leave between them barely sufficient space for the public road and the bed of a mountain-brook; two others which flank the Doon at its egress from mountain-cradled Loch Doon, are rocky perpendicular elevations, and stand so close to each other for about a mile, as to seem cleft asunder by some powerful agency from above, or torn apart by some convulsive stroke from below. The gorge between these heights, a narrow, lofty-faced pass, bears the name of the Ness Glen, and opens at its north-western extremity into the crescent-shaped plain. The springs of the parish are pure, limpid, and perennial, and issue, for the most part, from beds of sand and gravel. The rocks are partly eruptive, partly Silurian, partly Carboniferous. Sandstone, limestone, coal, and ironstone abound. The coal belongs to the most southerly part of the Ayrshire coalfield, and is of excellent quality. The ironstone also is of good quality, and has been extensively worked since 1847. Iron-works were erected in that year at the villages of Waterside and Craigmark, these villages and many other houses having been built by the company. The soil, along the river side, is chiefly a deep loam; on the north-western acclivities, is a wet argillaceous loam, resting on sandstone; on the hills of the NE and E is moss; and on those of the S is party peat but chiefly light dry earth, incumbent on Silurian rock. About 1310 acres are regularly or occasionally in tillage, 750 under wood, and 275 in a state of commonage, whilst about 1150, now pastoral or waste, are capable of reclamation for the plough; and 150 at a spot $\frac{1}{2}$ mile below the town are morass, resting on a spongy bed, and embosoming some oaks of considerable size. An ancient moat, surrounded with a deep dry fosse, and supposed to have been a seat of feudal justice courts, rises on the SE of the town; and within the town itself an edifice lately stood, which, known by the name of Castle House, is said to have borne date 1003 (?), and supposed to have been constructed with materials from a previous strong castle beyond the moat. Another ancient structure, believed to have been a place of considerable strength, and traditionally associated with a shadowy King Alpin, surmounted a cliff in a deep glen, and was protected on three sides by mural precipices, on the fourth side by a fosse. The Roman road from Ayr to Galloway passed through the parish, and was not entirely obliterated till 1830. Three very large cairns, one of them more than 300 feet in circumference, was formerly on the hills. Dalmellington figured largely in the Stuart persecution of the Covenanters, and is rich in traditions respecting their sufferings. Dalmellington is in the presbytery of Ayr and synod of Glasgow and Ayr; the living is worth £186.

There is an Established mission station at Waterside. Dalmellington, Benquhat, Craigmark, Lethanhill, and Waterside schools, and Dalmellington R.C. school, with respective accommodation for 323, 265, 221, 404, 584, and 70 children, had (1891) an average attendance of 187, 145, 165, 213, 194, and 61, and grants of £201, 16s., £138, 16s. 6d., £182, 13s. 6d., £202, 14s., £195, 1s., and £44, 14s. Pop. (1801) 787, (1841) 1099, (1851) 2910, (1861) 4194, (1871) 6165, (1881) 6384, (1891) 5034, of whom 523 belonged to Benquhat, 332 to Burnfoothill, 371 to Craigmark, 736 to Lethanhill, and 1473 to Waterside.—*Ord. Sur.*, shs. 14, 8, 1863.

Dalmenoch, a small bay in Inch parish, Wigtownshire, on the E side of Loch Ryan, $3\frac{1}{2}$ miles NNE of Stranraer. It has excellent anchorage.

Dalmeny, a village and a coast parish of NE Linlithgowshire. The village stands 3 furlongs N by E of Dalmeny station. The $\frac{3}{4}$ mile of railway from the village to the Bridge belongs to the Forth Bridge Railway Co., and from Dalmeny a branch turns off to Winchburgh connecting with Glasgow and the west, and another to Corstorphine connecting with Edinburgh and the east. Dalmeny has a post office under Edinburgh, and is a pretty little place; it commands from its rising-ground a fine view over the neighbouring Firth.

The parish, containing also the hamlet of Craigie, since 1636 has excluded the royal burgh of South QUEENSFERRY, which it surrounds on all the landward sides. It is bounded N by the Firth of Forth (here from 9 furlongs to $3\frac{1}{2}$ miles broad), E by Cramond, S by Corstorphine in Midlothian and by Kirkliston, and W by Abercorn. Its utmost length, from E to W, is $4\frac{1}{2}$ miles; its width, from N to S, varies between $1\frac{1}{2}$ and 3 miles. The western portion of the Aldeathie detached part (656 acres) of the parish was transferred by the Boundary Commissioners in 1891 to the parish of Ecclesmachan, and the eastern portion to the parish of Kirkliston, while the small portion of the parish situated on the right bank of the river Almond was transferred to Cramond parish (and to the county of Edinburgh). The Linlithgowshire portion of Cramond parish, however, was transferred to Dalmeny parish. The river ALMOND winds $2\frac{1}{2}$ miles east-north-eastward, roughly tracing all the Midlothian border; and Dolphinton Burn runs to the Firth through the interior, whose surface nowhere exceeds 200 feet above sea-level. It is, however, charmingly diversified by the three rocky and well-wooded ridges of Dundas, Mons, and Craigie, and falls rather rapidly northward to the Firth, where the shore-line, $4\frac{1}{2}$ miles long, is backed by a steepish bank. The rocks belong to the Calciferous Sandstone series, with patches of basalt intruding at South Queensferry, Dundas Castle, Craigiehall, and Hound Point, and a larger one of diorite over much of Dalmeny Park. The soil of the higher grounds is generally a shallow clay, on a cold bottom; but that of the slopes and low grounds is a fertile loam, whereon thrive first-rate crops of wheat, potatoes, and turnips, as also the luxuriant and picturesque plantations of the Earl of Rosebery. Noteworthy are two ash-trees at Craigiehall, which, 80 and 90 feet high, girth $10\frac{1}{2}$ and 16 feet at 1 foot from the ground. John Durie, a learned divine and would-be uniter of divided churches, was minister from 1648 to 1656; and William Wilkie, D.D. (1721-72), eccentric author of the forgotten *Epigoniad*, was born at Echline farm. In 1662 Sir Archibald Primrose, Bart., lord-clerk-register of Scotland, a lord of session, and lord-justice-general, purchased from the fourth Earl of Haddington the barony of BARNOUGLE and Dalmeny; his third son, Archibald, was, in 1700, created Baron Primrose and Dalmeny and Viscount Rosebery, in 1703 Earl of Rosebery; and his fifth descendant, Archibald Philip Primrose (b. 1847; suc. 1863), holds large estates in Mid and West Lothian, whose rental is increased by the minerals. (See ROSEBERY and DALMENY.) On 3 Sept. 1842, a very wet day, the Queen and Prince Albert drove over to lunch at Dalmeny. The park is described in her Journal as 'beautiful, with trees growing down to the sea. It commands a very fine view of the Firth,

the Isle of May, the Bass Rock, and of Edinburgh. The grounds are very extensive, being hill and dale and wood. The house is quite modern; Lord Rosebery built it, and it is very pretty and comfortable.' On 16 Aug. 1877 Her Majesty again visited Dalmeny Park. Other mansions, both separately noticed, are Dundas Castle and Craigiehall. Dalmeny is in the presbytery of Linlithgow and synod of Lothian and Tweeddale; the living is worth £326. The church, at the village, contains 350 sittings, and, consisting of nave and chancel, is the most perfect specimen of Norman architecture to be found in Scotland. Without, the chief feature is 'the main entrance door in a porch projecting to the S, the archway of which is supported on two plain pillars with Norman capitals. There are over this door the remains of a line, concentric with the arch, of sculptured figures and animals, many of which are fabulous, and bear a considerable resemblance to those which appear on the ancient sculptured stones. . . . The interior has a fine massive simple effect. The small chancel, lower than the rest of the church, is in the form of an apse, consisting of a semicircle with the arch outwards, under a groined arch, the ribs of which are deeply moulded and ornamented with tooth-work.' So wrote Dr John Hill Burton in Billings' *Antiquities* (1845); and at Dalmeny that able antiquary and historian was fitly buried, 13 Aug. 1881. Two public schools, under a common school-board, Dalmeny and South Queensferry, with respective accommodation for 228 and 374 children, had (1891) an average attendance of 176 and 306, and grants of £138, 18s. and £255, 13s. Pop. of parish (1801) 765, (1831) 1291, (1861) 1274, (1871) 1492, (1881) 1660, (1891) 2091, of whom 763 were in South Queensferry parliamentary burgh; of registration district (1881) 1048, (1891) 1328.—*Ord. Sur.*, sh. 32, 1857.

Dalmigavie, an estate, with a mansion, in Moy and Dalarossie parish, NE Inverness-shire, on the right bank of the upper Findhorn, 19 miles SSW of Tomatin. Its owner is Campbell Keir Mackintosh, Esq.

Dalmonach. See BONHILL.

Dalmore, an estate, with a mansion, in Stair parish, Ayrshire, on the left bank of the river Ayr, 3 miles S of Tarbolton.

Dalmore, a seaport village in Rosskeen parish, Ross-shire, on the Cromarty Firth, $\frac{3}{4}$ mile SE of Alness station, and $2\frac{3}{4}$ miles W of Invergordon. From Belleport pier, $\frac{1}{2}$ mile to the E, considerable quantities of timber are shipped for the N of England; and there are also a distillery, a flour-mill, and a steam saw-mill. The farm of Dalmore is well known for its herd of Aberdeen-Angus cattle. The property of Dalmore was in 1892 bought by the proprietor of the distillery, Mr A. Mackenzie. It includes the farm, distillery, mills, Belleport, and the salmon fishings.

Dalmuir, a burn and a village in Old Kilpatrick parish, Dumbartonshire. The burn rises among the Kilpatrick Hills in Cochno and other head-streams, collecting which in the north-eastern vicinity of Duntocher it thence runs $2\frac{1}{2}$ miles south-westward to the Clyde. The village stands on the burn, 3 furlongs above its mouth, and now forms part of the burgh of Clydebank, with a station on the Dumbarton section of the North British, $2\frac{1}{2}$ miles NW by W of Glasgow, under which it has a post office, with money order, savings bank, and telegraph departments. Near it are chemical works and the CLYDEBANK shipbuilding yard and engineering works, which cover 30 acres, and employ over 4000 men. The Clyde Navigation Trust established works here in 1867 comprising a tidal basin of $1\frac{1}{2}$ acre, a patent hauling-up slip, cranes, wharfage, and workshops.

Dalmullin or **Dalmelling**, a place in St Quivox parish, Ayrshire, $1\frac{1}{2}$ mile E by N of Ayr. A Gilbertine priory was founded here in 1230 by Walter, Lord High Steward of Scotland; but in 1238 it became a cell of Paisley Abbey.

Dalmuyot. See DUNMYAT.

Dalnacardoch, a shooting-lodge (erst a stage-coach hostelry) in Blair Athole parish, Perthshire, on the great Highland road from Perth to Inverness, and on the

left bank of the Garry, $6\frac{1}{2}$ miles WNW of Struan station. Here Prince Charles Edward passed the night of 29 Aug. 1745; and here on 9 Oct. 1861 the Queen and Prince Consort, travelling incognito, had 'a shabby pair of horses put in, with a shabby driver driving from the box.'

Dalnaspidal (Gael. *dail-an-spidéal*, 'field of the hospice'), a station on the Highland railway in Blair Athole parish, Perthshire, within 5 furlongs of the foot of Loch Garry, and $15\frac{3}{4}$ miles WNW of Blair Athole village. Near it is a shooting-lodge of the Duke of Athole; and, named after an ancient hospitium or small inn, it lies amid a wild, bleak, alpine tract, where numerous standing stones and cairns mark the graves of persons who fell in battle or perished in the snow.

Dalnavert, an estate, with a mansion, in Alvie parish, Inverness-shire, near the right bank of the Spey, $1\frac{1}{2}$ mile ENE of Kincaig station.

Dalness, a shooting-lodge in Ardchattan parish, Argyllshire, on the right bank of the Etive, $5\frac{1}{2}$ miles NNE of the head of Loch Etivo, and 18 NE of Taynuilt. The Etive here makes a very fine waterfall.

Dalnotter House, a mansion in Old Kilpatrick parish, Dumbartonshire, adjacent to the Clyde, $\frac{3}{4}$ mile SE of Old Kilpatrick village.

Dalpersie or **Terpersie**, a small old castellated mansion (now a farmhouse) in Tullynessle parish, Aberdeenshire, 1 mile NW of Tullynessle church.

Dalquharran Castle, a fine mansion in Dailly parish, Ayrshire, on the right bank of Girvan Water, 5 furlongs E of Dailly station, this being $7\frac{3}{8}$ miles SSW of Maybole. Built about 1790, it was the seat of the Right Hon. Thos. Fran. Kennedy (1788-1879), who sat for the Ayr burghs from 1818 till 1834.

Dalquhurn. See RENTON.

Dalree. See DALRY.

Dalreoch, a *quoad sacra* parish in Cardross parish, Dumbartonshire, with a station on the North British railway, at the junction of the Helensburgh and Balloch sections, $\frac{1}{4}$ mile N by W of Dumbarton. Constituted in 1873, it includes the Dumbarton suburb of West Bridgend, and is in the presbytery of Dumbarton and synod of Glasgow and Ayr. Stipend £231. The church, in West Bridgend, was erected in 1871, and is a handsome edifice. Pop. (1881) 3634, (1891) 3979.

Dalrigh. See DALRY.

Dalruadhain. See CAMPBELTOWN.

Dalry, a town and a parish in Cunninghame district, Ayrshire. The town stands on a rising-ground between Rye and Caaf Waters, and at the right side of the river Garnock, 3 furlongs W by N of Dalry Junction on the main line of the Glasgow and South-Western railway, this being $15\frac{1}{2}$ miles SW of Paisley, $22\frac{1}{2}$ SW of Glasgow, $70\frac{1}{2}$ WSW of Edinburgh, $11\frac{1}{2}$ N W of Kilmarnock, 9 NE of Ardrossan, $6\frac{1}{2}$ N by W of Irvine, and $17\frac{1}{2}$ N by W of Ayr. A tract of country around it was anciently under special royal jurisdiction, and bore the name of the King's District or Valley (Gael. *dail-righ*); and a field on which its first houses were built was called the King's Field (Gael. *croftanrigh*), a name that it still retains in the slightly modified form of *Croftanrighy*. The parish church, St Margaret's, dependent once upon Kilwinning Abbey, and originally occupying a different site, was rebuilt on that field about the year 1608, and gave origin to the town. The site is eligible enough for a seat of traffic and industry, and commands an extensive southward and north-eastward view; but, owing to great freshets in the Garnock, the Rye, and the Caaf, it sometimes has almost the aspect of an island. The town was long no more than a pretty hamlet, in 1700 comprising but six dwelling-houses, and about the beginning of this century numbering barely 800 inhabitants; afterwards it rose somewhat speedily to the dimensions of a smallish town, with a population of about 2000 in 1835. Some nine years later it started into sudden importance as a seat of business for the great neighbouring iron-works of BLAIR and GLENGARNOCK; and then assumed, along with its environs, an appearance so different from what it had borne before, that a visitor acquainted with it only in its former con-

dition would hardly have known it for the same place. It contains great numbers of well-built modern houses and not a few excellent shops, and has a central square, a post office, with money order, savings bank, insurance, and telegraph departments, branches of the British Linen Co. and the Clydesdale banks, hotels, gas-works, town buildings, library and reading-room, public hall, assembly rooms, woollen factories, a worsted mill, an oil and stearine factory, etc. The manufacture of wool may be said to be the principal trade of the town. Thursday is market-day, and a fair is held on 31 July and 1 August. A gravitation water-supply, capable of affording 130,000 gallons per diem, was introduced in 1876 at a cost of £9000; and in the centre of the town is a handsome granite fountain. A new public park, the gift of Mr John Blair, W.S., was in 1893 presented to the town. The parish church was rebuilt in 1771, and again in 1871-73, the present being a cruciform Gothic edifice, with over 1100 sittings, stained windows of Munich glass, and a tower and spire 159 feet high. Other places of worship are the West, Kersland Barony, and Blair mission churches, a Free church, a U.P. church, an Episcopal church, and St Palladius' Roman Catholic church (1851; 500 sittings). A memorial mission hall was erected in 1888, the cost of which, between £3000 and £4000, was defrayed by the Rev Dr Stevensou. Besides Kersland Barony school at DEN, the 3 public schools of Blairnains, Townend, and West End (enlarged at a cost of £3000), and Dalry female industrial Church of Scotland school, with respective accommodation for 100, 360, 625, and 192 children, had (1891) an average attendance of 37, 205, 537, and 153, and grants of £30, 10s. 6d., £186, 10s. 3d., £527, 13s. 6d., and £133, 17s. 6d. Dalry gives the title of Baron to the eldest son of the Earl of Glasgow. Pop. (1861) 4232, (1871) 4133, (1881) 5010, (1891) 4572.

The parish contains also the villages of Blair Works, Burnside, Den, and Drakemyre, with part of Glougarnock. Very irregular in outline, it is bounded N by Kilbirnie, NE by Beith, SE by Kilwinning, S by Kilwinning and Ardrossan, W by West Kilbride, and NW by Largs. Its utmost length, from NNW to SSE, is 9 miles; its breadth, from ENE to WSW, varies between $\frac{1}{2}$ mile and $6\frac{1}{2}$ miles; and its area is 19,361 acres, of which 77 are water. The river GARNOCK, coming in from Kilbirnie, flows $6\frac{1}{2}$ miles south-by-westward through the interior and along the Kilbirnie and Kilwinning borders; it is followed throughout this course by the Glasgow and South-Western railway, and receives on the right hand RYE and CAAF Waters, and Bombo Burn and Dusk Water on the left. The surface, sinking in the extreme S to 85 feet above sea-level, thence rises north-eastward to 239 feet at Muirhead, 334 at Bowertrapping, and 357 near East Middlebank—north-north-westward and northward to 302 near Linn House, 869 at Gill Hill, 1099 at BAIDLAND Hill, 1216 at Cock Law, 1261 at Green Hill, 652 at CARWINNING Hill, and 1378 at Rough Hill, whose summit, however, falls just within Largs. The rocks are partly eruptive, partly carboniferous. Limestone has long been largely worked; and coal is mined of excellent quality, partly in seams from $2\frac{1}{2}$ to 5 feet thick. Ironstone, of very rich quality, began to be worked about 1845, when two farms which had been sold to the Glengarnock Iron Company for £18,000 were shortly afterwards resold to the Blair Iron Company for £35,000. Agates have been found in the bed of the Rye. The soil along the Garnock is deep alluvial loam, and to the E of it is chiefly thin, cold, retentive clay. In some parts to the W of the Garnock, it is an adhesive clay; along the base of the hills, has generally a light dry character, incumbent on either limestone or trap; and elsewhere is often reclaimed moss. Antiquities, other than those of Blair and Carwinning, are cairns and a moat near the town—the Courthill Mound, which, excavated in the winter of 1872, was found to contain large deposits of human bones and ashes. The Blairs have been lairds of Blair for well-nigh seven centuries; one of the line, Sir Bryce, was foully murdered at Ayr by the English in 1296. Another of

Dalry's worthies was Sir Robert Cunningham, physician to Charles II.; and Captain Thomas Craufurd of Jordanhill (1530-1603), who gallantly took DUMBARTON Castle in 1571, spent the close of his life at Kersland. The chief mansions are BLAIR, GIFFEN, KIRKLAND, LINN, Maulside, Ryefield, Swindridgemuir, Swinlees, and Waterside. Dalry is in the presbytery of Irvine and synod of Glasgow and Ayr; the living is worth £469. West and Kersland Barony churches are chapels of ease. Valuation (1892) £38,872, 18s. plus £5388 for railways. Pop. (1891) 8164.—*Ord. Sur.*, sh. 22, 1865.

Dalry, a village and a parish of N Kirkcudbrightshire. The village stands, 200 feet above sea-level, on the left bank of the Ken, near the southern extremity of the parish, $3\frac{1}{2}$ miles NNW of New Galloway, and $9\frac{1}{2}$ NW by N of Parton station, with which it communicates twice a day by omnibus. Called variously Dalry, Claghan of Dalry, and St John's Town of Dalry, it offers a picturesque assemblage of houses, irregularly scattered over a considerable space of ground, with gardens, hedges, and rows of trees; at it are a post and telegraph office, a branch of the Union Bank, 2 hotels, and a public hall (1858). Pop. (1891) 560.

The parish was anciently one with Kells, Balmaclellan, and Carsphairn, comprising the entire district of Glenkens, and had several chapels, all subordinate to a mother church. It is bounded NW by New Cumnock, in Ayrshire; N by Sanquhar and NE by Penpont, in Dumfriesshire; E by Tynnar and Glencairn also in Dumfriesshire; SE by Balmaclellan; SW by Kells; and W by Kells and Carsphairn. Its utmost length, from N by E to S by W, is $15\frac{1}{2}$ miles; its breadth, from E to W, varies between $1\frac{1}{4}$ and $7\frac{1}{4}$ miles; and its area is $34,729\frac{1}{2}$ acres, of which 194 are water. In the extreme N, close to the meeting-point of Kirkcudbright, Ayr, and Dumfries shires, the Water of KEN rises at 1870 feet above sea-level, and thence winds $21\frac{1}{2}$ miles south-south-westward and south-south-eastward, mainly along the Carsphairn and Kells borders; it is joined by Carroch Burn, BLACK WATER, EARLSTON Burn, and other streams from the interior, and by GARPEL Burn, which runs south-westward along the boundary with Balmaclellan. That with Glencairn is traced for $2\frac{1}{4}$ miles by CASTLEFERN Burn; and in the interior are these four lakes, with utmost length and breadth and altitude—LOCHINVAR ($4\frac{1}{2} \times 2\frac{1}{2}$ furl.; 770 feet), Knocksting ($1\frac{1}{2} \times 1\frac{1}{2}$ furl.; 980 feet), Regland ($1\frac{1}{2} \times \frac{1}{3}$ furl.; 900 feet), and Knockman ($1\frac{1}{2} \times \frac{1}{2}$ furl.; 875 feet). At the southern extremity, where the Ken quits the parish, the surface sinks to 165 feet above sea-level, thence rising northward and north-eastward to 559 feet near Kirkland, 825 near Gordonston, 700 at Ardoch Hill, 1062 at Corse Hill, 1127 at Stroau Hill, 1262 at Wether Hill, 950 at Mackilston Hill, 1127 at Glenshimeroch Hill, 1154 at Lochlee Hill, 1183 at Fingland Hill, 1300 near Cornharrow, 1376 at Manwhill, 1900 at *Benbrack, 1750 at Coranbac Hill, 1900 at *Ewe Hill, 2063 at *Alwhat, and 2100 at Lorg Hill, where asterisks mark those summits that culminate on the borders of the parish. Granite and trap are the prevailing rocks; but blue slate occurs, and has been quarried. The southern district consists in great measure of rich arable land and fertile holms, interspersed with wood; the northern is all an assemblage of swelling hills and heathy mountains. A pavement, found at Chapelyards, on Bogue farm, in 1868, is thought to mark the site of a religious house; and besides several moats, cairns, and hill-forts, there are remains of a stronghold on an islet in Lochinvar, a trench—the 'Whighole'—near the top of a hill on Altrye farm, the Gordons' old tower of Earlston, and, at the village, a large stone, known as St John's Chair. David Landsborough, D.D. (1782-1854), poet and naturalist, was a native; so, too, was John Gordon Barbour (1775-1843), author of several works, and a friend of Hogg and 'Christopher North.' He is buried in the churchyard, where also rest three martyred Covenanters. The old church was associated with a Tam-o'-Shanter-like legend, and in it Grierson of Lag stabled his troopers' horses; whilst at this vil-

lage originated the great Covenanters' rising that ended at Rullion Green. Dalry is in the presbytery of Kirkcudbright and synod of Galloway; the living is worth £279. The present parish church was built in 1832 at a cost of £1400, and contains 700 sittings. In 1891 it was thoroughly repaired and heating apparatus introduced. At the village is also a U.P. church (1826; 200 sittings); and Glenkens Free church stands at Bogue, $1\frac{1}{2}$ mile to the E. Three public schools—Corseglass, Dalry, and Stroan-freggan—with respective accommodation for 36, 125, and 30 children, had (1891) an average attendance of 4, 108, and 13, and grants of £18, 4s., £111, 17s., and £26, 17s. 6d. Pop. (1801) 832, (1831) 1246, (1861) 1149, (1871) 1074, (1881) 988, (1891) 925.—*Ord. Sur.*, sh. 9, 1863.

Dalry. See EDINBURGH.

Dalry, Dalrigh, or Dalree, a place in the W of Killin parish, W Perthshire, near Strathfillan Free church, and $\frac{1}{2}$ mile SE of Tyndrum station on the Callander and Oban railway. It was the scene in 1306, of a sharp skirmish between Robert Bruce and Macdougall of Lorn, when the famous Brooch of Lorn, graphically described in Scott's *Lord of the Isles*, and said to be still in possession of the Macdougalls of Dunolly, was torn from Bruce.

Dalrymple, a village and a parish on the SW border of Kyle district, Ayrshire. The village, a pleasant little place, stands on the right bank of the Doon, 9 furlongs SE of Dalrymple station on the Ayr and Girvan section of the Glasgow and South-Western, this being $4\frac{1}{2}$ miles SSE of Ayr. Dalrymple has a post office. Near it is a pinn mill.

The parish, containing also Skeldon Mills, is bounded NW by Ayr, NE and E by Coylton, SE by Dalmellington, S by Straiton and Kirkmichael, and W by Maybole. Its utmost length, from WNW to ESE, is $7\frac{1}{2}$ miles; its breadth, from NE to SW, varies between $1\frac{1}{2}$ and $4\frac{1}{2}$ miles; and its area is 7960 acres, of which $127\frac{1}{2}$ are water. The 'bonny Doon,' running amidst alternations of bold and wooded banks and fertile haughs, winds $10\frac{1}{2}$ miles west-north-westward along all the Kirkmichael and Maybole boundary; and Loch MARTNAHAM, with utmost length and breadth of $1\frac{1}{2}$ and $\frac{1}{2}$ mile, lies on the Coylton border 290 feet above sea-level, and sends off a rivulet south-westward to the Doon. In the interior are Lochs Snipe ($1\frac{1}{2} \times \frac{1}{2}$ furl.) and Kerse (3×1 furl.) Where the Doon quits the parish, near Macmannieston, the surface sinks to 120 feet above sea-level, thence rising to 305 near Balsarroch, 379 near Merkland, 417 near Benston, 533 at Laurieston, 545 at Knockshinnoch, 1112 at Bow Hill, and 1406 at Kilmein Hill—little rounded eminences that command extensive and varied views over land and frith to Arran, Ben Lomond, and the Grampians. The rocks are partly eruptive, but chiefly Devonian and Carboniferous; and limestone and ironstone are worked. The soil on a few of the eminences is barren clay, on most is argillaceous loam, and on the lands along the streams and lochs is a sandy or gravelly loam. Some 1900 acres are hill pasture or meadow, about 500 are under wood, and all the rest of the land is arable. The chief antiquities are remains of three Caledonian forts and traces of the Roman road to Ayr. Dalrymple barony, belonging in the 13th century to a family of its own name, from which are descended the Earls of STAIR, passed in 1371-77 to John Kennedy of Dunure, ancestor of the Marquis of Ailsa and Earl of CASSILLIS, who is at present chief proprietor. Mansions are Skeldon and Hollybush. Dalrymple is in the presbytery of Ayr and synod of Glasgow and Ayr; the living is worth £287. The church, near the village, was built in 1849. There is also a Free church (1863); and Dalrymple and Hollybush Infant public schools, and the Dalmellington Ironworks school at Kerse, with respective accommodation for 212, 63, and 165 children, have an average attendance of about 150, 40, and 80, and grants of over £150, £27, and £72. Pop. (1801) 514, (1831) 964, (1861) 1325, (1871) 1412, (1881) 1362, (1891) 1338.—*Ord. Sur.*, sh. 14, 1863.

Dalsersf, a Clydesdale village and parish in the Middle

Ward of Lanarkshire. The village, standing on the left bank of the Clyde, 1 mile E of Ayr-Road station on the Caledonian railway, 3 miles ESE of Larkhall, and 7 SE of Hamilton, was formerly a place of some size and importance, but has long been going steadily into decay, and now consists of only a few low-roofed cottages, situated among gardens.

The parish, which also contains the villages of Millheugh and Rosebank, and most of the town of LARKHALL, formed anciently the chapelry of Machan under Cadzow or Hamilton, itself being known as Machanshire. It was for many ages the property of the Crown. The powerful family of the Comyns at one period had possession of it, but during the contested reign of John Baliol it again became part of the royal demesnes, and continued as such till the year 1312, when King Robert Bruce made a grant of it to Walter, the son of Gilbert, the ancestor of the Duke of Hamilton. It was afterwards divided among junior branches of the Hamilton family, and probably about the era of the Reformation was constituted a parish, taking name from Dalsersf village. It is bounded NW by Hamilton, NE by Cambusnethan and Carluke, SE by Lesmahagow, and SW by Stonehouse. Kite-shaped in outline, it has an utmost length from N by W to S by E of $5\frac{3}{8}$ miles, an utmost breadth from E to W of $3\frac{1}{2}$ miles, and an area of 7035 $\frac{3}{8}$ acres, of which 79 $\frac{1}{2}$ are water. The CLYDE winds $4\frac{3}{8}$ miles north-westward along all the the Carluke and Cambusnethan border; CANDER Water $2\frac{1}{4}$ miles north-north-westward to the Avon along the Stonehouse border; and AVON Water itself $3\frac{3}{8}$ miles, also north-north-westward along the Stonehouse and Hamilton border. Where the Clyde quits the parish, opposite Lower Carnbar, the surface sinks to less than 100 feet above sea-level, thence rising to 345 feet beyond Larkhall, 477 at Strutherhill, 576 at Canderdikehead, and 623 at Cander Moss, in the southern corner of the parish, whose interior forms a sort of plateau between the Clyde and the Avon. The rocks are chiefly of the Carboniferous formation. Coal abounds and is extensively mined at Ashgill, Broomhill, Canderside, Cornsillock, Skellyton, etc.; ironstone is known to be plentiful; and sandstone, of quality to furnish excellent building blocks, is largely quarried. The soil along the Clyde is rich alluvium; on the banks, rising steeply from the Clyde, is of various quality; and, on the higher grounds, is mostly strong heavy clay. All the land except a small patch or two of moss, is either regularly or occasionally cultivated. The tract adjacent to the Clyde lies almost in the heart of the luxuriant range of the Clydesdale orchards, and was famed for its fruit from very early times; but, owing to frequent failure of crops and increasing importation of fruit from England, Ireland, and foreign countries, has ceased to be exclusively devoted to orchard purposes. The dairy, on the other hand, for butter, cheese, and fatted calves, has much attention paid to it. The Rev. John Macmillan, founder of the Reformed Presbyterians in 1743, lived for some time near Millheugh, and lies in Dalsersf churchyard; and the Rev. James Hog, one of the twelve vindicators of the famous *Marrow of Modern Divinity* (1721), was parish minister. The principal mansions are BROOMHILL, Dalsersf House, which is finely situated west of the village, and Millburn House; and much of the property is divided between the Hamiltons of Raploch and the Hamiltons of Dalsersf. In the presbytery of Hamilton and synod of Glasgow and Ayr, this parish is divided into the *quoad sacra* parishes of LARKHALL and Dalsersf, the latter being worth £326. The church, at the village, was built in 1655, and contains 500 sittings. Two public schools, Dalsersf and Shawsburn, with respective accommodation for 201 and 300 children, had (1891) an average attendance of 182 and 245 day and 37 evening scholars, and grants amounting to £195, 5s. and £244, 1s. and £18, 9s. Pop. (1801) 1660, (1831) 2680, (1861) 4876, (1871) 7341, (1881) 9378, (1891) 11,325, of whom 2965 were in Dalsersf *quoad sacra* parish.—*Ord. Sur.*, sh. 23, 1865.

Dalsetter, a hamlet in Yell Island, Shetland. It has a post office under Lerwick.

Dalsholm or **Dawsholm**, a village in New Kilpatrick parish, SE Dumbartonshire, on the right bank of the Kelvin, in the outskirts of Glasgow. It has a paper mill and a colliery, and the extensive gasworks of the Glasgow Corporation are in its immediate vicinity; while near it is an ancient artificial mound, the Courthill, supposed to have been a seat of feudal courts of justice.

Dalskaith, an estate, with a mansion, in Troqueer parish, Kirkcudbrightshire, 3 miles SW of the town of Dumfries.

Dalswinton, a small village, with a public school, in Kirkmahoe parish, Dumfriesshire, 2 miles SE by E of Auldgrith station, and $7\frac{1}{2}$ NNW of Dumfries, under which it has a post office. Dalswinton House, 1 mile SSE, and within $\frac{1}{2}$ mile of the Nith's right bank, is an elegant and commodious mansion, erected by Mr Patrick Millar (1731-1815), Burns's landlord, on the site of an ancient castle of the Comyns. This self-made genius launched on an isleted loch (2×1 furl.) one of the earliest steamboats, with the most perfect success, 14 Oct. 1788. 'He spent,' says Carlyle, 'his life and his estate in that adventure, and is not now to be heard of in those parts, having had to sell Dalswinton and die quasi-bankrupt, and, I should think, broken-hearted' (*Reminiscences*, i. 129, 130). The estate, which was held formerly by Comyns, Stewarts, and Maxwells, is now the property of William Macalpine-Leny, Esq. (b. 1839; suc. 1867).

Dalton, a village and a parish of Annandale, Dumfriesshire. The village stands on Dalton Burn, 6 miles SSW of Lockerbie, under which it has a post office.

The parish, comprising the ancient parishes of Meikle and Little Dalton, and annexed to Mouswald from 1609 till 1633, is bounded N by Lochmaben, NE by Dryfesdale and St Mungo, SE by Cummertrees, S by Ruthwell, and W by Mouswald. With a very irregular outline, it has an utmost length from NNW to SSE of $5\frac{3}{8}$ miles, an utmost breadth from E to W of $3\frac{3}{8}$ miles, and an area of 6941 acres, of which 55 are water. The river ANNAN winds $4\frac{1}{2}$ miles south-eastward along all the Dryfesdale and St Mungo border, and its tributary, Dalton Burn, twists and turns $5\frac{3}{8}$ miles SSE, ENE, and N, through the interior; whilst Pow Water, rising in the S, passes off direct to the Solway Firth through Ruthwell and Cummertrees. The surface, nowhere lower than 150 feet above sea-level, is flat or but gently undulated over all the S and E of the parish, but in the NW attains 604 feet at Butterwhat, 720 at ALMAGILL, and 800 at Holmains. The rocks are partly eruptive, partly Devonian, and largely Silurian. The soil, in most of the low tracts, is light alluvial loam; in most of the higher ground is sand and gravel; and in some parts is a cold clay on a till bottom, with a few patches of reclaimed bog. About 600 acres are pastoral or waste, 500 or so are under wood, and all the rest of the land is arable. Wm. Beattie, M.D. (1793-1875), biographer of the poet Campbell, was a native. DORMONT and RAMMERSCALES are the chief mansions. Dalton is in the presbytery of Lochmaben and synod of Dumfries; the living is worth £251. The parish church, built in 1704, contains 300 sittings; and a public school, with accommodation for 121 children, had (1891) an average attendance of 66, and a grant of £79, 9s. 6d. Valuation £7077, 6s. 3d. Pop. (1801) 691, (1831) 730, (1861) 679, (1871) 577, (1881) 579, (1891) 563.—*Ord. Sur.*, sh. 10, 1864.

Daltonhook, a place on the SW border of Dryfesdale parish, Dumfriesshire. It has lime-works and vestiges of an ancient strong tower.

Dalvaddy, a hamlet in Campbeltown parish, Argyllshire, 3 miles W of Campbeltown. Coal of an inferior quality is mined adjacent to it, and is conveyed by a canal to Campbeltown.

Dalveen, a wild pass (1200 feet) over the Lowther Mountains, from the head-streams of Powtrail Water in Crawford parish, Lanarkshire, to those of Carron Water in Durisdeer, Dumfriesshire.

Dalvey, a place in Cromdale parish, S Elginshire, on the right bank of the Spey, 6 miles NE of Grantown.

Dalvey House, a handsome modern mansion in Dyke and Moy parish, Elginshire, crowning a knoll, on the left bank of the Muckle Burn, $2\frac{1}{2}$ miles W by S of Forres.

Dalvourne, a place in Daviot parish, Inverness-shire, with a public school.

Dalwhat Water, a stream of Glencairn parish, W Dumfriesshire, rising at an altitude of 1680 feet within $\frac{1}{4}$ mile of the Kirkcudbrightshire border, and running 10 miles east-south-eastward, till, $\frac{3}{4}$ mile below Moniaive, it unites with Craigdarroch and Castlefern Waters to form CAIRN Water.—*Ord. Sur.*, sh. 9, 1863.

Dalwhinnie, a station on the Highland railway in Kingussie parish, Inverness-shire, on the Truim's left bank, 1 mile NE of the head of Loch Erich, 13 miles SSW of Kingussie, and $58\frac{3}{4}$ NW of Perth. Here are a post and telegraph office and the Loch Erich Hotel, successor to an inn which, built by Government, was an important stage in the old coaching days, from its vicinity to the Pass of DRUMOCHTER. At Dalwhinnie, Cope held a council of war on 27 Aug. 1745, and two days later Prince Charles Edward was joined by Dr Cameron, bringing Cluny Macpherson; at Dalwhinnie inn, too, the Queen and Prince Consort, during their 'Third Great Expedition' *incognito*, passed the night of 8 Oct. 1861, supping off two miserable starved Highland chickens, with only tea, and without any potatoes, and on the morrow receiving a visit from Cluny Macpherson (pp. 165, 166, of the *Queen's Journal*, ed. 1877).

Dalwick. See DAWICK.

Dalyell Lodge. See CUPAR.

Dalziel, a central parish of the middle ward of Lanarkshire, containing the village of CRAIGNEUK, and, at its western border, the greater part of the police burgh of MOTHERWELL, this being $2\frac{1}{2}$ miles NE of Hamilton, $12\frac{1}{2}$ ESE of Glasgow, and $5\frac{1}{2}$ SSE of Coatbridge. Bounded NW and N by Bothwell, NE by Shotts, SE by Cambusnethan, and SW by Hamilton, it has an utmost length from NW to SE of $3\frac{1}{2}$ miles, and an utmost breadth from NE to SW of $2\frac{3}{8}$ miles. The Boundary Commissioners in 1891 transferred to this parish from that of Hamilton a detached part extending to 85 acres, and gave back to Hamilton so much of the parish of Dalziel as was situated on the left bank of the CLYDE. South CALDER Water traces all the Shotts and most of the Bothwell boundary as it meanders westward to the Clyde, which itself flows north-westward for $2\frac{1}{2}$ miles, and again for $3\frac{3}{4}$ furlongs, along the Hamilton border. Sinking beside the Clyde to less than 100 feet above sea-level, the surface thence rises eastward to 259 feet near North Motherwell, 308 near Windmillhill Street, and 322 near Middle Johnston, and forms in the centre and towards the SE a flattish ridge or low plateau. The rocks, belonging to the Carboniferous formation, abound in coal, ironstone, and sandstone flag, whose working, conjointly with the establishment of iron and steel works at Motherwell, has led to the abnormal growth of population. The soil on the low grounds along the Clyde is fertile alluvial loam, and elsewhere is mostly a heavy yellow clay. About 50 acres are disposed in orchards, and woods and plantations cover 400 more. The Roman Watling Street ran through this parish from ESE to WNW; and a bartizaned summer-house in the grounds of Dalzell House, commanding a brilliant view, was built in 1736 on the site of a Roman camp. This Dalzell House, $\frac{1}{4}$ mile from the Clyde's right bank, and $1\frac{1}{2}$ SSE of Motherwell, was built in 1649 by Hamilton of Boggs, two years after his purchase of the estate from the Earl of Carnwath, whose ancestors, the Dalzells, had held it from time immemorial. Described by Hamilton of Wishaw as 'a great and substantial house,' it adjoins a much older peel-tower, 50 feet high, with walls 8 feet in thickness; its owner is John Glencairn Carter Hamilton, first Baron Hamilton of Dalzell (b. 1829; cre. 1836). In the presbytery of Hamilton and synod of Glasgow and Ayr, this parish is divided ecclesiastically into Dalziel and South Dalziel, the latter

a *quoad sacra* parish constituted in 1880, its church the old parish church (1789; enlarged 1860; 658 sittings) in Windmillhill Street. Dalziel itself (a living worth £230) has now its church in Merry Street, MOTHERWELL, under which and Craigneuk other places of worship are noticed. Seven schools—Craigneuk, Dalziel, Merry Street, Milton Street, Muir Street, and Craigneuk and Motherwell Roman Catholic—with respective accommodation for 621, 868, 769, 693, 684, 413, and 682 children, have an average attendance of about 350, 840 day and 70 evening, 670 day and 100 evening, 420, 480 day and 30 evening, 370 day and 200 evening, 500 day and 150 evening scholars, and grants of nearly £510, £780 and £52, £720 and £83, £420, £720 and £20, £370 and £170, £530 and £136. Pop. (1881) 13,853, (1891) 19,204.—*Ord. Sur.*, shs. 23, 31, 1865-67.

Damff. See DAMPH.

Damhead, a village in Arngask parish, in the county of Perth, with a station (Glenfarg) on the N.B.R., 3 miles NNW of Mawcarse station, and 4½ N by E of Milnathort.

Damhead, a hamlet midway between St Ninians town and Airth village, Stirlingshire.

Damph or **Loch an Daimh**, a lake of Lochbroom parish, in the Coigach district of Cromartyshire, 10 miles E of Ullapool. Hill-girt, and fringed with birch woods along its south-eastern shore, it lies at an altitude of 672 feet above sea-level, is 1½ mile long from SW to NE, and has an utmost width of 1½ furlong. It sends off a streamlet to the Oykel, and its waters are well stocked with trout.—*Ord. Sur.*, sh. 101, 1882.

Damph, a lake in Applecross parish, W Ross-shire, 3 miles E of Shieldaig. Lying among high mountains, it measures 3½ miles in length by ½ mile in width; abounds in trout; and sends off the Balgay to Upper Loch Torridon.

Dams, a village in Kettle parish, Fife, 1½ mile S of Kettle village.

Damsay, an island of Firth parish, Orkney, in Firth Bay, 4 miles WNW of Kirkwall. Measuring scarcely a mile in circumference, it is so beautiful as to have been sometimes styled the Tempe of the Orkneys; it anciently had a strong castle and a famous church, which have entirely disappeared; and it now is used for the pasturing of a few hundreds of sheep.

Damsburn, a hamlet in Logie parish, Stirlingshire, 1½ mile W of Alva.

Damside, an estate, with a mansion, in Auchterarder parish, Perthshire, 1¾ mile NE of the town. It has several leech-ponds.

Damyat. See DUNMYAT.

Dandaleith, a beautiful haugh in Rothes parish, Elginshire, on the left bank of the Spey, with a station on the Morayshire branch of the Great North of Scotland railway, 2¼ miles SSE of Rothes village, and ¾ mile NW of Craigellachie Junction.

Dane's Dyke. See CRAIL.

Daneshalt or **Dunshelt**, a village in Auchtermuchty parish, Fife, 1¼ mile SE of Auchtermuchty town. It is said to have got its name from the Danes' first halting here in their flight from Falkland Moor; and at it are gas-works, a linen factory, farina works, and a public school, which, with accommodation for 83 children, had (1891) an average attendance of 43, and a grant of £35, 14s. Pop. (1861) 567, (1871) 483, (1881) 414, (1891) 328.

Danevale Park, a mansion in Crossmichael parish, Kirkcudbrightshire, on the left bank of the Dee, 2¾ miles NW of Castle-Douglas.

Dankeith, an estate, with a mansion, in Symington parish, Ayrshire, 4¾ miles SE of Kilmarnock.

Danna, an inhabited island in North Knapdale parish, Argyllshire. Pop. (1891) 42.

Danskine, an inn in Garvald parish, Haddingtonshire, 5½ miles SE by S of Haddington.

Dara, a rivulet in the NW of Aberdeenshire. It rises on the southern confines of Aberdour parish, and, bearing for some distance the name of Idoch Water, runs 10 miles south-westward, past Newbyth and Cumines-town, till, making a bend near the middle of Turriff

parish, it thence runs 3 miles north-westward to the Deveron, a little below Turriff town.—*Ord. Sur.*, sh. 86, 1876.

Dara Den. See DURA DEN.

Dardar, a ravine in Aberdour parish, Aberdeenshire, traversed by an impetuous brook to the Moray Firth. A cascade of three successive leaps occurs in the brook's course, and in times of freshet makes a somewhat grand and striking appearance.

Dargavel, an estate, with a mansion, in Erskine parish, Renfrewshire. The mansion, 1 mile SSW of Bishopton station, was built partly in 1574, partly at a recent period; and is in the French style of Queen Mary's reign.

Dargie, a village in Liff and Benvie parish, Forfarshire, near Mylnefield, and 4 miles W of Dundee.

Dark Mile. See ARCHAIG.

Darleith, an estate, with a mansion, in the SW of Bonhill parish, Dumbartonshire, 3 miles N by W of Cardross.

Darlingshaugh, a suburb and section of Galashiels, at verge of Roxburghshire.

Darlington, a suburb of Stewarton, Ayrshire.

Darmead Linn. See CAMBUSNETHAN.

Darnaway Castle, a noble mansion in Dyke and Moy parish, Elginshire, in the valley of the Findhorn, 1½ mile W of that river's left bank, and 2½ miles SSE of Brodie station, this being 3½ miles W by S of Forres, under which there is a post office of Darnaway. Crowning a gentle eminence, and overtopping a vast extent of forest, it commands a magnificent view, and was built about 1810, being a large, oblong, castellated pile of rather an imposing appearance—a seat of the Earl of Moray. Of the castle founded here by Randolph, Earl of Moray, early in the 14th century, nothing is left but the banqueting hall, which, forming a back wing to the modern mansion, measures 89 feet in length by 35 in width, and has an arched oaken roof, somewhat similar to that of the Parliament House in Edinburgh. It contains a portrait of the 'Bonny Earl of Moray' who was murdered at Donibristle; and in it Queen Mary held her court in 1564. The park is finely wooded, upwards of ten millions of trees having been planted towards the close of last century, to fill up gaps in Darnaway Forest, which extends into Edinkillie. See MORAY, DYKE, DONIBRISTLE, DOUNE, and CASTLE-STUART.—*Ord. Sur.*, sh. 84, 1876.

Darnconner. See DERNCONNER.

Darngeber, a village in Hamilton parish, Lanarkshire, near Quarter Road station, and 3 miles S of Hamilton town. Pop. including Quarter (1891) 1179.

Darnhall, a seat of Lord Elibank in Eddlestone parish, Peeblesshire, on a rising-ground, ½ mile WNW of Eddlestone station. Originally a Border tower, from 1412 the seat of the Murrays of Haltoun or Blackbarony, it was greatly added to in the first half of the 17th century, and now is a massive square chateau-like edifice, with beautiful grounds and a fine old limetree avenue. Montolieu Fox Oliphant-Murray, tenth Baron Elibank since 1643 (b. 1840; suc. 1871), holds large estates in the shire. See ELIBANK, BALENCRIEFF, and PITTHEADLES.

Darnick, a village in Melrose parish, Roxburghshire, near the right bank of the Tweed, 7 furlongs W of Melrose town, under which it has a post office, with money order, savings bank, and telegraph departments. Darnick Tower, the chief of three peels that once stood clustered here, and the finest specimen extant of its kind, was founded by the Heitons about 1425, but, razed and cast down by the English in 1545, appears to have been repaired or rebuilt in 1569—the date of the crest (a bull's head) above the entrance door. A massive square tower, battlemented and corbie-gabled, with side stair-turret, it still is habitable, and still is held by a descendant of its founder, Andrew Heiton, Esq., F.S.A. (b. 1827; suc. 1870), whose cousin and predecessor converted it into a kind of Border antiquarian museum. Scott coveted it sorely, to make an armoury of it, and from it was jestingly dubbed, by his familiar friends,

the Duke of Darnick. Pop. of village (1841) 280, (1871) 435, (1881) 448, (1891) 307. See James Wade's *History of Melrose Abbey* (Edinb. 1861).

Darnley, an ancient barony in Eastwood parish, Renfrewshire, $1\frac{1}{2}$ mile E of Barrhead. It belonged for ages to a branch of the house of Stewart, and in 1460 gave the title of Baron to Sir John Stewart, who in 1488 became Earl of Lennox, and whose fourth descendant was Henry Lord Darnley (1546-67), the husband of Queen Mary. It still gives the title of Earl (cre. 1675) to the Duke of Richmond and Lennox, but by the first of his line was sold in the beginning of the 18th century to the Duke of Montrose; and, passing again by sale in 1757 to Sir John Maxwell of Pollok, belongs now to Sir John Stirling-Maxwell of Pollok and Keir. It gives a prefix name to several seats of manufacture and other localities within its limits.

Darnow, a hamlet, with a public school, in Kirkcowan parish, Wigtownshire, 4 miles NW of the village of Kirkcowan.

Darwick. See DARNICK.

Darra, a hill in the S of Turriff parish, Aberdeenshire.

Darrach, a conspicuous hill in the W of Denny parish, Stirlingshire, an eastward abutment of the Kilsyth Hills that culminates, at an altitude of 1170 feet above sea-level, $2\frac{3}{4}$ miles W of Denny town.

Daruel. See GLENDARUEL.

Darvel or **Dervall**, a police burgh chiefly in Loudon parish, and partly in Galston parish, Ayrshire, on the river Irvine, with a station on the Newmilns and Darvel branch of the Glasgow and South-Western railway. Regularly built and fairly prosperous, it mainly depends on lace-making (first introduced in 1875) and the manufacture of curtains, carpets, etc.; and has a post office, with money order, savings bank, and telegraph departments, under Kilmarnock, a branch of the Union Bank, gas-works, a Free church, a U.P. church (1884), an E.U., Original Seceders', and a *quoad sacra* church, a public school, a working men's institute, and a subscription library. The working men's institute was erected in 1872 at the instance of Miss Brown of Lanfine, and contains an amusement room, a reading room, and a committee room, capable of transmutation into a hall. The lands of Darvel belonged anciently to the Knights Templars, and were independent of tenure, not even holding of the Crown. Pop. (1841) 1362, (1861) 1544, (1871) 1729, (1881) 1701, (1891) 2024.—*Ord. Sur.*, sh. 22, 1865.

Dava, a station on the Highland railway at the mutual border of Cromdale and Edinkillie parishes, Elginshire, $8\frac{1}{2}$ miles NNW of Grantown, under which it has a post and telegraph office. Here, too, is a public school. See CROMDALE.

Davarr or **Devar**, a small island in the mouth of Campbeltown Loch, Campbeltown parish, Argyllshire. Rising 300 feet above sea-level, it has an utmost length and breadth of 5 and $4\frac{1}{2}$ furlongs, and serves as a natural breakwater to Campbeltown harbour, protecting it from wind and wave. To the S side of the loch's mouth it is joined by a sand-bar $\frac{1}{2}$ mile long, bare at low water; and its north-eastern point is crowned with a lighthouse, that shows a bright white light every half minute, visible at the distance of 17 nautical miles.

Daven, a triangular loch on the mutual border of Logie-Coldstone and Glenmuick parishes, Aberdeenshire, within $\frac{1}{4}$ mile of Loch Kinord, and $1\frac{1}{2}$ mile NW of Dinnet station. Lying 480 feet above sea-level, it has an utmost length and breadth of 6 and $4\frac{1}{4}$ furlongs, contains pike and perch, and sends off Dinnet Burn running $2\frac{1}{4}$ miles SE to the Dee at Mill of Dinnet. Close to it are to be seen the remains of a native town, which Skene identifies with 'Devana,' a name preserved in that of the loch itself. See ABERDEEN.—*Ord. Sur.*, sh. 76, 1874.

Davids, St. a seaport village in Dalgety parish, Fife, on the NE horn of Inverkeithing Bay, at the terminus of the Fordel mineral railway, $1\frac{1}{2}$ mile E by S of Inverkeithing. It has a good harbour, and exports immense quantities of coal.

Davids, St. a village in Madderty parish, Perthshire, on the estate of Craig of Madderty, $1\frac{1}{4}$ mile S by W of Madderty station. Founded by the late Lady Baird Preston of Fern Tower, it superseded a decayed old burgh of barony, and is a beautiful place, with a handsome endowed schoolhouse.

Davidson's Mains or **Muttonhole**, a well-built village in Cramond parish, Edinburghshire, $1\frac{1}{2}$ mile WNW of Craigeleith station, and $3\frac{1}{2}$ miles WNW of Edinburgh. It has a post office, with money order, savings bank, insurance, and telegraph departments, a station of the Edinburghshire police, the Free church of Cramond, and a public school. Pop. (1841) 470, (1861) 599, (1871) 736, (1881) 744, (1891) 719.

Davington, a hamlet, with a public school and a Free church, in Eskdalemuir parish, Dumfriesshire, near the right bank of the White Esk, $16\frac{1}{2}$ miles NNW of Langholm.

Daviot, a hamlet and a parish in Garioch district, central Aberdeenshire. The hamlet stands 5 miles NNW of Inverurie, this being $16\frac{1}{2}$ miles NW of Aberdeen, with a post office under Old Meldrum.

The parish is bounded N and NE by Fyvie, E by Old Meldrum, SE by Bourtie, SW and W by Chapel of Garioch, and NW by Rayne. Its utmost length, from NNW to SSE, is $3\frac{3}{4}$ miles; its breadth, from E to W, varies between $2\frac{1}{2}$ furlongs and $3\frac{3}{4}$ miles; and its land area is 4454 acres. Lochter Burn traces all the Bourtie border; and, where it quits this parish, the surface sinks to 200 feet above sea-level, thence rising with gentle undulations to 401 feet near Lumphart, 415 at the church, 513 near Wicketslap, 529 near Loanhead, and 434 at Knowhead. The prevailing rock is trap in the central higher grounds, coarse gneiss in the S and E. The soil, on the lower grounds, is generally peat humus on bluish clay; on the slopes, is commonly a rich loam or a strong clay; on the higher grounds, is gravelly and thin. About 3700 acres are in tillage, 180 under wood, 100 moss, and 150 either waste or very slightly reclaimed. Three stone circles and two pre-Reformation chapels stand or have stood within the parish. GLACK, with its lofty tower, is a conspicuous object; and other mansions are Mounie and FINGASK. Daviot is in the presbytery of Garioch and synod of Aberdeen; the living is worth £197. The church, built in 1798, contains 400 sittings; and a public school, with accommodation for 150 children, had (1891) an average attendance of 83, and a grant of £80, 13s. Pop. (1801) 644, (1831) 691, (1861) 614, (1871) 597, (1881) 515, (1891) 520; of *q. s.* parish, 614.—*Ord. Sur.*, shs. 76, 86, 1874-76.

Daviot and Dunlichity, a united parish of NE Inverness-shire, but formerly partly also of Nairnshire, 388 acres at its north-eastern extremity having belonged to the main body, and 12,600 towards the S having formed a detached portion of the latter county until 1891, when the Boundary Commissioners transferred both portions to Inverness-shire, which now therefore includes the entire parish. The parishes of Daviot and Dunlichity were united in 1618, but still are so far distinct as each to have its church, that of Daviot standing near the Nairn's left bank, $6\frac{3}{4}$ miles SE of Inverness, under which there is a post office of Daviot, whilst that of Dunlichity stands 1 mile ENE of the foot of Loch Dundelchack and $6\frac{3}{4}$ miles SW by S of Daviot church. The united parish, then, is bounded N and NE by Croydalcross, SE and S by Moy-Dalarossie, SW by Boleskine-Abertariff, and NW by Dores and Inverness. Its utmost length is $22\frac{3}{4}$ miles from NE by N to SW by S; and its breadth varies between $4\frac{1}{2}$ furlongs and $7\frac{1}{4}$ miles. The river NAIRN, rising towards the S of the parish, winds $22\frac{1}{4}$ miles north-north-westward and north-north-eastward, chiefly through the interior, but for the last $3\frac{3}{4}$ miles along the Croy and Dalcross border; during this course it descends from 2480 to close on 300 feet above sea-level. The southern portion of the parish is drained to Loch Ness by the FARIGAI, formed by two head-streams near Dunmaglass Lodge, and running 2 miles north-north-westward till it passes into Dores.

Besides twenty-six tiny lakelets—eighteen of them dotted over Drummoisie Muir—there are, in the interior, Lochs COIRE ($5 \times 2\frac{3}{4}$ furl.; altitude, 865 feet) and CLACHAN ($\frac{1}{2} \times \frac{1}{4}$ mile; 683 feet), and, on the Dores border, Lochs BUNACHTON ($\frac{1}{2} \times \frac{1}{2}$ mile; 701 feet), DUNDELCHACH ($3\frac{3}{8}$ miles \times 1 mile; 702 feet), and Ruthven ($9 \times 2\frac{1}{2}$ furl.; 700 feet). The surface sinks, as we have said, to close on 300 feet along the Nairn, and thence south-south-westward the chief elevations to the right or E of its course are *Beinn na Buchanich (1312 feet), *Beinn a' Bheurlaich (1575), Meall na Fuar-ghlaic (1552), *Carn nan Uisgean (2017), Beinn Bhreac (1797), *Carn Glac an Eich (2066), Carn Mor (1222), *Carn na Saobhaidh (2321), Carn Doire na h-Achlais (2066), and *Carn Ghriogair (2637); to the left or W of the Nairn are Drummoisie Muir (874), *Creag a' Chlachain (1000), Creag Dhubb (1450), Stac na Cathaig (1463), Garbh-bheinn Bheag (1711), Beinn Bhuidhe (2329), *Carn Odhar (2618), Beinn Dubh-choire (2261), *Meall Donn (1560), Beinn Bhuraich (2560), and *Carn na Saobhaidhe (2658), where asterisks mark those summits that culminate on the borders of the parish. Gneiss, granite, Old Red sandstone conglomerate, and black and blue bituminous shale are the chief rocks. Numerous low sand-hills, seemingly formed by flux and reflux of some great body of water, are on both sides of the Nairn, extending from Daviot Bridge, 2 miles higher up. Marl, to a depth of from 5 to 6 feet, formed an extensive bed in Tordarroch Moss, at a depth of from 5 to 7 feet below the surface; and was largely and effectively used for improving the lighter arable lands. The soil, in some places, is light and sandy; in others, wet and spongy, on a clay bottom; in others, a black mossy humus; and in many, a compound of two or more of these. Daviot Castle, near Daviot House, was built in the beginning of the 15th century by David, Earl of Crawford; a square three-story structure, surmounted by round turrets at the angles, and girt by a wall enclosing an extensive area, and by a fosse with a drawbridge, it seems to have been a place of great strength, but is now represented by only fragmentary ruins. Dun-Davioit Hill, in the vicinity of the church, appears to have been used, in times of danger, as a signal station. Remains of ancient Caledonian stone circles are at Daviot, Gask, Farr, and Tordarroch; and several ancient tumuli on the hills have been found to contain funeral relics. Daviot House and Farr House both stand on the left bank of the Nairn. The former, 7 furlongs NNE of Daviot church, is a commodious modern mansion; the latter, $6\frac{1}{2}$ miles SSW, is partly old, partly modern. Other estates are Brin, Flichty, and DUNMAGLASS. This parish is in the presbytery of Inverness and synod of Moray; the living is worth £311. Daviot church (500 sittings) was rebuilt in 1826, Dunlichty (300) in 1758; and service is performed in them alternately. A Free church stands $4\frac{3}{4}$ miles SSW of Daviot church; and $5\frac{1}{2}$ miles further SSW is St Paul's Episcopal church of Strathnairn, which, originally erected in 1817, was rebuilt in 1869 at a cost of £900, and contains 200 sittings. The four schools of Brin, Daviot, Dunmaglass, and Farr, with respective accommodation for 88, 80, 50, and 90 children, had (1891) an average attendance of 35, 37, 22, and 45, and grants of £64, 7s. 5d., £53, 18s. 6d., £39, 0s. 6d., and £58, 9s. Pop. (1801) 1813, (1831) 1738, (1861) 1741, (1871) 1598, (1881) 1252, (1891) 1106.—*Ord. Sur.*, shs. 84, 73, 74, 83, 1876-81.

Davo, a romantic wooded ravine in Garvock parish, Kincardineshire. It contains a quarry of excellent building red sandstone.

Davoch. See HALF-DAVACH.

Dawan. See DAVEN.

Dawick House, a modern castellated mansion, standing amid finely-wooded grounds, in the NE corner of Drummelzier parish, Peeblesshire, $2\frac{1}{2}$ furlongs S of the Tweed's right bank, and $\frac{3}{4}$ mile SSW of Stobo station, this being $6\frac{1}{2}$ miles WSW of Peebles. Held by the Veitches from the 13th to the close of the 17th century, the estate then passed to the lawyer, James Naesmyth

(d. 1706), who was known as the 'Deil o' Dawick.' His grandson and namesake, the second baronet (suc. 1720; d. 1779), was the eminent botanist, Linnaeus' pupil, who planted in 1735 the Dawick avenue of silver firs, and to whom Scotland owes the introduction of the larch in 1725. His great-grandson is the present Sir James Naesmyth of Posso, fifth Bart. since 1706 (b. 1827; suc. 1876). On a knoll, $1\frac{1}{2}$ furlong S by W of the house, still stands the old church of Dawick parish (suppressed 1742), which serves now as the family mausoleum.—*Ord. Sur.*, sh. 24, 1864.

Dawsholm. See DALSHOLM.

Dead Burn, a burn in Newlands parish, Peeblesshire, running 3 miles south-south-westward to Lyne Water, at a point $2\frac{1}{2}$ miles SSE of Linton.

Deadman's Gill, a burn in the E of Mouswald parish, Dumfriesshire, whose bank is traditionally alleged to have been a place of execution.

Deadmen's Holm, a piece of alluvial flat in Tarbolton parish, Ayrshire, opposite the mouth of Bloody Burn. It and the burn are alleged to have got their name from being the scene of some ancient massacre or tragedy.

Deadriggs. See CROSSHALL, Berwickshire.

Dead Water. See CASTLETON, Roxburghshire.

Dean. See EDINBURGH.

Dean, the ancient seat of the Boyds, Earls of Kilmarnock from 1661 to 1746, in Kilmarnock parish, Ayrshire, on a gentle rising-ground above the right bank of Kilmarnock Water, 1 mile NNE of Kilmarnock town. Dating from some very early period unknown to record, it was destroyed by accidental fire in 1735, and is now a massive picturesque ruin.

Deanburnhaugh, a hamlet in Robertson parish, Roxburghshire, on Borthwick Water, $7\frac{3}{4}$ miles WSW of Hawick, under which it has a post office. By Order of the Boundary Commissioners the parish of Robertson, that formerly was situated partly in the county of Roxburgh and partly in that of Selkirk, was in 1891 placed wholly in Roxburghshire.

Dean Park. See GLASGOW.

Deanston, a manufacturing village in Kilmadock parish, Perthshire, on the swift Teith's right bank, 1 mile W of Doune. It presents an appearance greatly superior to that of most seats of manufacture, consisting chiefly of extensive cotton mills founded in 1785, and of dwelling-houses for the workpeople, but including Deanston House, the residence of Sir John Muir, Bart. (cre. 1892); and has a post office under Doune, a public school, a circulating library, and a savings bank. James Smith (1789-1850), as manager of its mills from 1807, made great displays of genius, and stands on the roll of fame, among the Watts and Arkwrights as a mechanic, among the Youngs and the Sinclairs as the inventor of thorough drainage, and among the Howards and the Clarksons as a philanthropist. Pop. (1841) 982, (1861) 727, (1871) 627, (1881) 679, (1891) 723.

Dean Water, a small, deep, sluggish river of W Forfarshire, issuing from FORFAR LOCH (171 feet), and running $13\frac{3}{4}$ miles west-south-westward, through or along the borders of Kinnetties, Kirriemuir, Glamis, Airlie, Eassie, and Meigle in Perthshire, till it falls into the Isla 1 mile N of Meigle village, after a total descent of barely 50 feet. It is a capital fishing stream, and abounds in pike, perch, and prime trout.—*Ord. Sur.*, shs. 57, 56, 1868-70.

Deathack, or Amhuinn Deabhacdh, a burn in Kiltarlity parish, Inverness-shire.

Dechmont, a hill-summit on the SW border of Cambuslang parish, Lanarkshire, $5\frac{1}{2}$ miles SSE of Glasgow. The highest point of the hill-range that terminates north-westward in Carmunnock, it has an altitude of 602 feet above sea-level, and commands a magnificent view, whose beauties form the theme of a descriptive poem by John Struthers. The Beltane fires long blazed from its summit; and on its slopes were formerly many Caledonian cairns and suchlike structures, now almost totally obliterated.

Dechmont House, a mansion in Livingstone parish, Linlithgowshire, $3\frac{1}{2}$ miles WSW of Uphall station. A

little to the NE are Dechmont village and Dechmont Hill, the latter 686 feet high, and commanding a very extensive prospect.

Dee, a river chiefly of S Aberdeenshire, but partly also of Kincardineshire. It rises from the very bosom of the Cairngorm Mountains, in the SW corner of Aberdeenshire, close to the boundary with Banff, Inverness, and Perth shires; and runs first south-south-eastward, but generally east-by-northward along the Braemar and Deeside districts of Aberdeenshire, across a wing of Kincardineshire, and along the boundary between Aberdeenshire and Kincardineshire, to the sea at Aberdeen. Its length, if one follows its windings, is $87\frac{1}{2}$ miles, viz., $2\frac{3}{4}$ thence from the source of Garchary Burn to its confluence with Larig Burn, $11\frac{1}{2}$ thence to the Linn of Dee, $6\frac{3}{4}$ thence to the Clunie's influx near Castleton, 9 thence to Balmoral, $9\frac{3}{4}$ thence to Ballater Bridge, $13\frac{1}{2}$ thence to Aboyne Bridge, $15\frac{1}{2}$ thence to Banchory Bridge, $17\frac{1}{2}$ thence to the old Bridge of Dee, and $1\frac{1}{2}$ thence to its mouth in the North Sea. Its drainage area is estimated at 700 square miles; and from 4060 feet above sea-level at the Garchary's source it descends to 1976 at the Larig's confluence, 1640 at the Geusachan's influx, 1214 at the Linn of Dee, 1066 near Castleton, 872 near Balmoral, 663 at Ballater, 397 at Aboyne, 296 at the Bridge of Potarch, 102 at Drumoak ferry, and 72 at Peterculter. Its velocity, above Castleton, is fitful and various, ranging from cascade to current, from torrent to pool; but, below Castleton, averages $3\frac{1}{2}$ miles per hour, with a mean depth of 4 feet, and is so regular as nowhere to furnish water-power to a mill. Its tributaries partake of its own character, being mountain-torrents in the upper part of the basin, and, in the lower, gently gliding streams; or, in some instances, are impetuous first, next slow. Its waters are remarkable for both perennial flow and limpid purity; continue, a long way down its course, to be almost wholly unaffected by any such circumstances as pollute most other rivers; and, even in its lower reaches where the drainage of farms and villages runs into them, are comparatively well protected from defilement by skilful methods of land drainage.

The Dee has been almost universally identified with the *Deva* of Ptolemy, but the Latin editions prior to 1525 all read *Leva*, and Skene observes that 'the distance both from the Firth of Tay and from Kinnairds Head corresponds more closely with the mouth of the North Esk than with that of the river Dee.' By Celtic scholars *Dee* itself has been variously interpreted by 'dark' or 'smooth' or 'double water,' the last signification referring to the river's two-fold source, in the Larig and Garchary Burns. The Garchary, issuing from Well Dee (4060 feet) between Cairntoul and Braeriach, hurries $2\frac{3}{4}$ miles east-south-eastward to a confluence with the Larig, which, itself rising from the Wells of Dee (2700 feet) between Braeriach and Ben Macdhuì, runs $1\frac{1}{2}$ mile southward, and midway is joined by a half subterranean torrent rushing 1 mile westward from its source (4200 feet) upon Ben Macdhuì. And which, then, is the veritable head-stream? Dr Hill Burton elects in favour of the Larig, as less desperately flighty, more voluminous, and more in the line of the glen, than the Garchary; but, on the whole, the latter carries the day, by its longer descent and very much higher birth. The scenery of the meeting of the two streams is terrible, wilder even than that of Glen Sannox, Glencoe, or Coruisk; and serves to explain how the influence of alpine landscape has darkened the imagination of the Highlanders, and given aspects of gloom and superstition to their traditions. Hogg, speaking of Ben Macdhuì, exaggerates nothing, but fails to give due force and fulness to his picture, when he says—

'Beyond the grizzly cliffs that guard
The infant rills of Highland Dee,
Where hunter's born was never beard,
Nor bugle of the forest-bee,
'Mid wastes that dem and dreary lie,
One mountain rears its mighty form,
Disturbs the moon in passing by,
And smiles above the thunder-storm'

A barren and desolate region, of which, as a boy, Hill Burton was told by Douald that it was 'a fery fulgar place, not fit for a young shentleman to go to at all;' and of which, some forty years later, Hill Burton wrote that, 'if we compare this defile to another of the grandest mountain-passes in Scotland—to Glencoe—we find a marked difference between them. The scene of the great tragedy, grand and impressive as it is, has no such narrow walled defiles. The mountains are high, but they are of the sugar-loaf shape—abrupt but never one mass of precipice from top to bottom. Cairntoul resembles those hills, though it is considerably more precipitous; but Braeriach is as much unlike them as a tower is distinct from a dome.' Through this narrow glen, then, that begins to widen below the Geusachan's influx, the united waters of Garchary and Larig flow, as the Dee, over a broken rocky bed in alternate sweeps, rapids, and cascades, till, at a place $6\frac{3}{4}$ miles above Castleton of Braemar, it forms a remarkable series of small falls—the Linn of Dee. The Linn is a natural sluice of rock, with rugged sides, and jagged, shelving bottom, 300 yards long, and at one point barely 4 feet wide—an easy jump. Through it the river shoots in small cascades; and it is spanned by a handsome white granite bridge, opened in 1857 by Queen Victoria. The river, about $1\frac{1}{2}$ mile below the Linn, begins to touch some marks of cultivation; but it soon afterwards enters Mar Forest, through which it flows to some distance beyond Castleton, receiving in it the Lui and the Quoich from the N, and the Ey and the Clunie from the S. It next traverses Invercauld Forest; proceeds thence past Balmoral and Abergeldie; receives two small tributaries, from respectively the N and the S, in the vicinity of Balmoral; passes on to Ballater; and receives, in the neighbourhood of that village, the Gairn or Gairden from the N, and the Muick from the S. Its scenery between the Linn and Ballater is noticed in our articles on BRAEMAR and BALMORAL, and its scenery around Ballater and for some miles further on is described as follows by William Howitt: 'The hills are lofty, grey, and freckled; they are, in fact, bare and tempest-tinted granite, having an air of majestic desolation. Some rise peaked and splintered, and their sides covered with *débris*, yet, as it were, bristled with black and sharp-looking pine forests. Some of the hills run along the side of the Dee, covered with these woods, exactly as the steep Black Forest hills in the neighbourhood of Wildbad.' Meadow, cornfield, and garden, however, begin to show themselves as one approaches Ballater, ever more and more as the river rolls on towards the sea.

The Dee, from a point about $3\frac{1}{2}$ miles E of Ballater, flows through a gradually widening valley, still narrow, but with less and less of its former Highland character; and it forces its way through a conminuted compound of granite, gneiss, porphyry, greenstone, and hornblende *débris*, and receives on both banks numerous small tributaries. It enters Kincardineshire at a point $3\frac{1}{2}$ miles SE of Kincardine O'Neil, and, traversing that county over a run of $9\frac{3}{4}$ miles, receives in it, on the right bank, the tribute of the Feugh. Retouching Aberdeenshire at the SW corner of Drumoak parish, it thence runs $14\frac{1}{2}$ miles along the boundary between the two counties to the sea at Aberdeen; and, from the point of its entering Kincardineshire onward to its mouth, offers alternations of tame hill scenery and beautiful lowland landscape. From source to mouth it traverses or bounds the parishes of Crathie, Glenmuick, Aboyne, Birse, Kincardine O'Neil, Strachan, Banchory-Ternan, Durris, Drumoak, Peterculter, Maryculter, Banchory-Devenick, Nigg, and Old Machar; and in our articles on these fourteen parishes full details are given as to the villages, mansions, and other features of its course.

The Dee was once the most finely wooded and the best fishing river in Scotland; and, though much damaged by entails, manufactories, and stake-nets, it still, for wood and fish, has scarce a rival among British rivers. Salmon contrive to force their way, up all its currents and obstructions, to points above the Linn

and, though not now caught in any such quantity as in bygone days, are still taken in great numbers. About 20,000 salmon and 40,000 grilse are caught in an average season; but these numbers include those taken by stake-nets and on the beach adjacent to the river's mouth. The finest reach of the river for rod-fishing extends from Banchory to Ballater. Clean-run salmon have often been taken by the rod so early as the 1st February, in the waters above Ballater, at a distance of 50 miles from the sea; but they rarely ascend the Linn till after the middle of May. A new hatchery, capable of accommodating one million ova, was erected at Drum in 1892 by the Dee Fishery Board, to displace the old one at Durris. The connections of the river with the water-supply and commerce of Aberdeen, as also the diversion of its channel, are noticed in our article on that city.—*Ord. Sur.*, shs. 64, 65, 66, 76, 67, 77, 1870-74. See chaps. xxiii.-xxv. of Sir Thomas Dick Lauder's *Moray Floods* (Elgin, 1830; 3d ed. 1873); James Brown's *New Deeside Guide* (Ab., 1843); and Dr John Hill Burton's *Cairngorm Mountains* (Edinb. 1864).

Dee, a river of W Kirkcudbrightshire, issuing from Loch Dee, a lonely lake that lies among the heathery heights of Minnigaff—Lamachan Hill (2349 feet), Curleywee (2212), Craiglee (1741), and Cairngarroch (1800). Itself 750 feet above sea-level, Loch Dee is 2 miles long and from 1½ to 6 furlongs wide; its waters are still well stocked with trout, which have, however, been sadly thinned by pike, and which average about 1 lb. in weight. The best months of the year for trout fishing are April, May, and June. Leaving this mountain lake, the Dee, or Black Water of Dee, winds 18½ miles east-south-eastward till, after traversing STROAN Loch, it is joined, just opposite to Parton station, by the Water of KEN, a stream of much larger volume than its own. For the next 5 miles, on to Glenlochiar Lodge, their united waters assume the aspect of a long narrow lake—called, indeed, sometimes a second Loch Dee—that widens here to half a mile, and there contracts to barely a hundred yards. From Glenlochiar, on past the islets of Threave Castle and Lodge, the river sweeps, through a rocky channel, 11½ miles southward and south-south-westward to Kirkcudbright town, thence 3 miles southward through a broadening estuary to its mouth in Kirkcudbright Bay. It thus has a total course of 33½ miles, during which it traverses or bounds the parishes of Minnigaff, Kells, Girthon, Balmaghie, Parton, Crossmichael, Kelton, Tongueland, Kirkcudbright, Twynholm, and Borgue, and during which it receives Cooran Lane, the Ken, and Tarf Water, with a number of lesser tributaries. It is navigable to Tongueland, or about 7 miles from the Solway; and it sometimes rises in freshets to 8 feet above its ordinary level. Its waters, particularly before their confluence with the Ken, are so mossy and dark-hued as to render its name of Dee or 'dark stream,' and specially its duplicate name of Black Dee, entirely appropriate. Its salmon, too, are of a darker colour and much fatter than those of most rivers in the S of Scotland, and are held in high estimation; its waters contain also sea-trout, river-trout, pike, perch, and large quantities of pearl-mussels.—*Ord. Sur.*, shs. 8, 9, 5, 1863-54.

Dee, Bridge of, a south-western suburb of Aberdeen, on the river Dee, 2 miles from the centre of the city. It has a post office under Aberdeen.

Dee, Bridge of, a village on the SE border of Balmaghie parish, Kirkcudbrightshire, on the right bank of the Dee, with a station on the Kirkcudbright railway, 3 miles SW of Castle-Douglas.

Deeheid or Death Choimhead, a hill (1255 feet in height) in Muckairn parish, Argyllshire, 5½ miles E by S of Oban.

Deer, a place in Morton parish, Dumfriesshire, near Morton Castle, and 2½ miles N by W of Thornhill. It has remains of an entrenched strong fortification, supposed to have been a Roman castellum.

Deer, an ancient parish and a presbytery, partly in Banffshire, but chiefly in Aberdeenshire. The ancient parish was divided, about the year 1649, into the present

parishes of New Deer and Old Deer. The presbytery, meeting at Maud, is in the synod of Aberdeen, and comprises the old parishes of Aberdour, Crimond, New Deer, Old Deer, St Fergus, Fraserburgh, Longside, Lomay, Peterhead, Pitsligo, Rathen, Strichen, and Tyrie; the *quoad sacra* parishes of Ardallie, Blackhill, Boddam, Fraserburgh West Church, Inverallochy, Kininmonth, Maud, New Pitsligo, Peterhead East Church, and Savoch; the chapelries of Auchmedden and Sandhaven; and the mission churches of Fetterangus, Technmuiry and Broadsea, and Tortonston. Pop. (1871) 49,199, (1881) 54,420, (1891) 54,384, of whom 13,892 were communicants of the Church of Scotland.—The Free Church also has a presbytery of Deer, with 2 churches each at Fraserburgh and Peterhead, and 11 at respectively New Aberdour, Boddam, Clola, Longside, New Deer, New Pitsligo, Old Deer, Pitsligo, Rathen, Strichen, and St Fergus, which together had 3088 communicants in 1891.

Deer or South Ugie Water. See UGIE.

Deer-Dike, a substantial earthen fence along the mutual boundary of Garvock and Laurencekirk parishes, Kincardineshire. Probably part of an enclosure round a deer-forest, comprising most or all of Garvock parish, it continued till last century to be tolerably entire, and still has left distinct traces.

Deer-Law, a hill (2065 feet) on the mutual border of Yarrow parish, Selkirkshire, and Lyne parish, Peeblesshire, 2 miles NW of St Mary's Loch.

Deerness, a parish of Orkney, comprising a peninsula in the extreme E of Pomona and the islands of Copenhay, Cornholm, and Horse. Its kirktown stands on the E coast of the peninsula, 12 miles ESE of Kirkwall, under which it has a post office. Extending from Moul Head south-westward to the isthmus that connects it with St Andrews parish, and measuring 5 miles in length by 3 in extreme breadth, the said peninsula is bounded W and NW by Deer Sound, E by the North Sea, and SE by Newark Bay; the islands lie from 1½ mile to 3 miles to the E. From the shores, which are haunted by myriads of sea-birds, the surface of the peninsula rises to a somewhat tabular summit. The soil consists mostly of loam, resting on red clay, and is highly susceptible of improvements, such as draining and a liberal application of shell sand, of which there is an inexhaustible supply. From 50 to 60 boats are employed in the herring fishery; kelp is manufactured; and very strong ropes, fitted for various economic purposes of the farmer, are made from the shoots of *Empetrum nigrum*, from the roots of *Arundo arenaria*, and from the herbage of *Holcus lanatus*. Several tumuli are on the higher grounds; and remains of a large Pict's house, called Dinky's Howe or Duncan's Height, stand near the end of the isthmus. The parish is united *quoad civilia* to Sr ANDREWS, from which, however, it was separated *quoad sacra* in 1845; Deerness itself being a living in the presbytery of Kirkwall and synod of Orkney, with stipend of £120, a manse, and 3 acres of glebe. The church was originally a parliamentary one. There is also a Free church; and three public schools—Deerness, St Andrews, and Thankerness—with respective accommodation for 155, 55, and 83 children, had (1891) an average attendance of 122, 31, and 49, and grants of £160, 16s., £31, 7s. 6d., and £58, 5s. Valuation (1892) £2001, 4s. Pop. of *q. s.* parish (1891) 844.

Deer, New, a village and a parish in Buchan district, NE Aberdeenshire. The village stands towards the middle of the parish, 2½ miles WSW of Maud Junction, this being 13 miles W by N of Peterhead, 16 SSW of Fraserburgh, and 31¼ N by E of Aberdeen, under which New Deer has a post office, with money order, savings bank, and telegraph departments. A coach runs between New Deer and Maud station (3 miles) in connection with the trains. Anciently called Auchreddie, it includes at its south-eastern outskirts a suburb retaining that name; and it straggles for over a mile along the ascending ridge of a steepish hill. Within recent years it has undergone great improvement, good new dwelling-houses having taken the place of low old huts; and it has branches of the North of Scotland and

Town and County banks, insurance agencies, local savings bank, a hotel, a market-place, a public hall (1864), agricultural and horticultural societies, and fairs on the third Tuesday of January, the Tuesday after 12 April, 26 May if Thursday, if not the Thursday before, the Tuesday after 19 June, the day before the second Wednesday of August, the Tuesday after 19 October, and the Thursday before 26 November, or 26 if a Thursday. A public school, with accommodation for 224 children, had (1891) an average attendance of 176, and a grant of £180, 5s. 6d. Pop. (1861) 475, (1871) 643, (1881) 753, (1891) 746.

The parish, containing also part of New Maud, is bounded N by Tyrie, NE by Strichen, E by Old Deer, SE and S by Ellon, SW by Tarves and Methlick, W by Fyvie and Monquhitter, and NW by King-Edward. In outline rudely resembling a triangle with south-south-eastward apex, it has an utmost length from NNW to SSE of 12½ miles, an utmost breadth from E to W of 5½ miles, and an area of 26,750 acres. The drainage is mainly carried eastward by head-streams of South Ugie Water; but the Burns of Elrick or Nethermuir and Allathan or Aslead, flowing southward to the Ythan, trace much of the eastern and western borders. The surface, sinking to 197 feet above sea-level near Tillysnaught at the south-eastern angle of the parish, and to 196 near New Maud on the eastern boundary, thence rises gently north-north-westward and north-westward to 440 near Muckle Clofrickford, 540 near Barrack, 503 at the Hill of Culsh, 529 near Corschill, 619 at the Hill of Corsegight, 487 at Whin Hill, and 630 at Bonnykelly; of which the Hill of Culsh, ¼ mile beyond the Free church, so far overlooks the surrounding country as on a clear day to command a view to Peterhead, Bennochie, the Bin of Cullen, and Ben Rinnes. The district toward the NE and the SE, to the extent of 7 or 8 miles, looks almost like one continuous cornfield, dotted with green crops, and terminated by a gentle rising-ground in the form of an amphitheatre. Granite is the prevailing rock; but limestone, of coarse quality, has been worked on the lands of Barrack. Moss covers an inconsiderable area, which yearly grows less and less, owing to planting, reclamation, or consumption as fuel. The soil, with few exceptions, is light and shallow, and over a great proportion of the land rests on an iron-bound pan from 6 inches to 2 feet thick. Remains in the mosses indicate the existence of a primeval forest; but now, except at Brucklay, Artamford, and Nethermuir, the parish is rather poorly off for trees. Fedderat Castle, 2½ miles NNE of the village, was anciently a strong six-storied structure, surrounded partly by a morass, partly by a fosse, and approachable only by a causeway and a draw-bridge; but is now an utter ruin. Ancient Caledonian standing stones, a rocking-stone, and stone circles, in various places, have nearly all been destroyed; some tumuli have yielded urns and sarcophagi. At Brucehill, 2 miles W of the village, Edward Bruce is said to have encamped, before he defeated the Comyns at AIXEY BRAE (1308). BRUCKLAY Castle, a fine castellated mansion dating from the latter half of the 17th century, and NETHERMUIR House are the chief mansions. In the presbytery of Deer and synod of Aberdeen, New Deer gives off portions to the *quoad sacra* parishes of Savoeh, Newbyth, and New Pitligo; the living is worth £335. The parish church, built at the village in 1838, in place of an earlier one of 1622, is a Third Pointed edifice, with 1500 sittings, and a tower, completed in 1865. A neat Free church stands 3 furlongs NNW of the parish church, and Artamford U.P. church ½ mile NE; the latter, rebuilt in 1876 at a cost of £1400, is Gothic in style, and contains 420 sittings. There are also another U.P. church at Whitehill (¾ mile N), and a Congregational chapel. Eight schools—Brucklay, Cairnbanno, New Deer, Knavein, Oldwhat, Whitehill, Bonnykelly, and Mitchell's—with total accommodation for 1036 children, had (1891) an average attendance of 697, and grants amounting to £658, 1s. 4d. Pop. of parish (1881) 4875, (1891) 4434; of registration district

(1871) 4147, (1881) 4097, (1891) 3732.—*Ord. Sur.*, sh. 87, 1876.

Deer, Old, a village and a parish of Buchan, NE Aberdeenshire. The village stands, 134 feet above sea-level, on the right bank of South Ugie Water, 1½ mile SW by W of Mintlaw station, this being 9¼ miles W by N of Peterhead, 3¾ E by N of Maud Junction, and 35 N by E of Aberdeen. An ancient place, it has been mostly rebuilt within the past half century, and has a post office under Mintlaw, a branch of the North of Scotland Bank, a savings bank (1825), a hotel, a fair (St Drostan's) on the Wednesday after 19 Dec., and two public schools, which, with respective accommodation for 167 scholars and 81 girls, had (1891) an average attendance of 86 and 73, and grants of £98, 8s. 6d. and £61, 5s. 6d.

The parish also contains the villages of Stuartfield, Clola, and Fetterangus, 1½ mile S by W, 3½ miles SSE, and 2½ miles NNE, of Old Deer village. Its north-easterly portion until 1891 formed a detached section of Banffshire, but the Boundary Commissioners in that year transferred this detached section (2812 acres) to the county of Aberdeen, thus placing the whole of Old Deer parish in Aberdeenshire. It is bounded NW and N by Strichen, NE by Lonmay, E by Longside, SE by Cruden, S by Cruden and Ellon, and W by New Deer. Its utmost length, from N to S, is 9½ miles; its breadth, from E to W, varies between 4 and 6½ miles; and its area is 27,439½ acres. South Ugie Water has here an east-south-easterly course of 6½ miles; North Ugie Water winds 7 miles east-south-eastward along all the northern and north-eastern border; and before Pitfour House is an artificial lake of 45 acres (3¾ × 1 furl.); whilst springs, either pure or chalybeate, are numerous, and some of them bear such names as Grinie's, Lady, Abbey, Chapel, and Annie's Well. The surface, everywhere undulating, presents an assemblage of low rounded hills, most of them cultivated to the very top; at Baluss Bridge, on the eastern border, it sinks to 100 feet above sea-level, and rises thence north-westward to 397 feet at Drinnies Wood, 410 at Knapperty Hill, 432 at Braeside, and 466 at White Cow Wood—westward and south-westward to 292 at Wuddyhill, 460 at Wind Hill, 551 at the Hill of Dens, 465 near Bulwark, 423 near Little Elrick, 407 near Littlemill, 420 at Slampton Hill, and 392 at Windy Hill—south-south-westward and south-south-eastward to 474 at Skelmuir Hill, 478 near Wester Craighead, and 469 at Smallburn Hill. The prevailing rocks are granite, syenite, and limestone, which have been largely worked at AIXEY BRAE and other places; and blocks occur of gneiss and pure white quartz. The soil is very diversified, ranging from argillaceous to loamy, sandy, or gravelly. The woods and plantations of Aden, Pitfour, and Kinmudy cover a large extent, the first two comprising some very fine hard-wood trees. There is a woollen mill at Millbreck, a brewery at Biffie, and a distillery at Glenaden. About 580 Columba and Drostan, his nephew, came from Foua unto ABERDOUR, and thence to the other town, which pleased Columba, because it was full of God's grace; and he asked of the Mormaer Bede to give it him, and he would not. But, his son falling sick, the Mormaer went to the clerics to ask a prayer of them, and gave them in offering from *Cloch in tiprat* to *Cloch petite mic Garnait*. They made the prayer and health returned. Then Columba gave Drostan that *cathair*, and blessed it, and left as his word, 'Whosoever come against it, let him not be many-yeared victorious.' Drostan weeping as they parted, said Columba, 'Let Deer* be its name henceforward.' Down to the reign of David I. (1124-53) this Columban monastery retained unimpaired its clerical element and Celtic character, according to the priceless testimony of certain Gaelic notices written during that reign on the blank pages of the *Book of Deer*, a Latin MS of the 9th century containing St John's and parts of the other three gospels, the Apostles' Creed, and a fragment of an office for the visitation of the sick, which MS, discovered by

* *I.e.*, Gael. *der*, now *deur*, 'a tear.' *Dair*, 'an oak,' has been suggested as a more likely etymon.

Mr H. Bradshaw in 1860 in the library of Cambridge University, was ably edited for the Spalding Club by the late Dr John Stuart in 1869 (Skene's *Celtic Scotland*, vols. ii., iii., 1877-80). St Mary's Abbey of Deer, on the left bank of South Ugie Water, $\frac{3}{4}$ mile WNW of the village, was founded, either in 1218 or 1219, by William Comyn, Earl of Buchan, for monks of the Cistercian order, being colonised by three brethren from Kynloss; the last of its abbots, Robert Keith, second son of the fourth Earl Marischal, obtained the erection of its lands into the temporal lordship of Altrie (1587). Early English in style, red sandstone in material, the ruins were inclosed and cleared of rubbish in 1809, when it appeared that the cruciform church must have consisted of chancel, transept, and five-bayed nave with N aisle, the whole measuring 150 by from 27 to 38 $\frac{1}{2}$ feet, or 90 across the transept. Here has been localised the ballad of 'Sir James the Rose,' whose grave is also shown at Haddo in Crimond; on Aikey Brae the Comyns were finally routed by Edward Bruce; and by Aikey-side one of their line, an Earl of Buchan, is said, by his death whilst hunting, to have verified Thomas the Rhymer's prediction. Vestiges remain of six stone circles; the one at Biffie is the most conspicuous, and is an object of great attraction to the antiquarian and traveller. Several cairns have yielded stone cists and urns; flint implements have been found in great abundance; and other antiquities are the ruinous manor-house of Clachriach and remains of the small old parish church of Fetterangus. The Stone of Deer, a syenite block standing 6 feet out of the ground at the NW corner of the old Abbey church, is figured in the *Sculptured Stones of Scotland* (1867), but was demolished about 1854. Near the village of Old Deer there is a cemetery, which was opened in 1875. The principal mansions are PIRFOUR, KINMUNDY, and Aden, the last a good modern building, 3 furlongs ENE of the village. In the presbytery of Deer and synod of Aberdeen, Old Deer gives off portions to the *q. s.* parishes of Ardallie, Kininmonth, and Savochof Deer; the living is worth £302. The parish church, with over 1000 sittings, stands at the village, and, built in 1788, was greatly improved (1880-81) at a cost of £2811, the walls being raised, an entrance porch added, a memorial window inserted, and a clock-tower and spire, 103 feet high, erected of Aikey Brae granite, with a library room on its basement floor. At the village also is St Drostan's Episcopal church (1851; 300 sittings), Early English in style, and rich in painted glass; other places of worship are noticed under Stuartfield, Maud, and Clola. Six schools, all public, are at Bank, Clochean, Bulwark, Fetterangus, Shannas, and Stuartfield (girls'); and these, with respective accommodation for 100, 110, 62, 110, 110, and 140 children, had (1891) an average attendance of 84, 99, 56, 101, 104, and 144, and grants of £72, 11s., £77, 15s. 8d., £46, 5s., £91, 17s. 11d., £93, 3s., and £130, 16s. Pop. of civil parish (1801) 3552, (1821) 3841, (1841) 4453, (1861) 5174, (1871) 5085, (1881) 5104, (1891) 4694; of registration district (1881) 4274, (1891) 3882.—*Ord. Sur.*, sh. 87, 1876.

Deer, Savochof. See DEER, OLD.

Deershaw, a village in the N of Banffshire, distant 6 miles from Banff.

Deer Sound, a natural harbour on the Eside of the Mainland of Orkney, entering from Stronsay Firth, and separating the Deerness and St Andrews portions of St Andrews and Deerness parish. Lying nearly due SW and NE, and measuring 4 miles in length, by from 1 mile to 2 $\frac{1}{2}$ miles in breadth, it has beautifully winding shores, a clean sandy bottom mixed with clay, and a depth of 6 or 7 fathoms. It is well sheltered from all winds, and affords in many parts good anchorage. Any number of vessels might here find refuge; and it was formerly frequented by whaling ships on their way to the Arctic seas, but is now very little used.

Deeside, the valley of the Aberdeenshire DEE, or, more specially, the part of that valley downward from Braemar to the sea.

Deil's Beef-Tub. See ANNANDALE'S BEEF-STAND.

Deil's Cauldron. See DEVIL'S CAULDRON.

Deil's or Picts' Dyke, a long line of ancient fortification in Galloway and Dumfriesshire, commencing at Loch Ryan near Innermessan, the site of the ancient Rerigonium, a town of the Novantæ, and extending, by way of Minnigaff, Glencairn, Penpont, and Lochmaben, to the upper part of the Solway Firth at a point opposite the western extremity of the Roman wall of Hadrian across the N of England. It is now quite obliterated in many parts, and more or less obscure in many others, but still in some is very distinct. It appears to have been invariably 8 feet broad at the base, to have had a fosse along its N or inland side, and to have been built, in most places, of unchiselled blocks of common moorstone; in others, of stone and earth commingled; and in a few, as at Hightæ Flow in Lochmaben parish, entirely of earth. It separates the fertile lands of the seaboard districts from the irreclaimable wastes and wild fastnesses of the mountains, and may be presumed to have been built by an industrious or comparatively settled people on its southern, as a defence against a warlike or comparatively roving people on its northern, side. All facts respecting it, however, even all trustworthy traditions, have been lost. Chalmers, the author of *Caledonia*, says, in a letter to Mr Joseph Train, who traced the Deil's Dyke from end to end:—'Considering all its circumstances, it is extremely difficult to assign its age, its object, or its builders. In Ireland there is nothing like the Deil's Dyke; the inference is that it was not made by Irish hands. I am disposed to think that this work is several centuries older than the arrival of the Irish Cruithne in Galloway.' And again:—'It is obviously a very ancient work, and was probably formed by the Romanised Britons after the departure of the Roman armies.'—*Ord. Sur.*, shs. 3, 4, 8, 9, 10, 6, 1856-64.

Deil's Dyke, a denuded trap dyke projecting from the general line of the SE coast of Big Cumbrae island in Buteshire. See CUMBRAE.

Deil's Mill. See DEVIL'S MILL.

Delfour, a place, with ancient Caledonian monuments, in Alvie parish, Inverness-shire, $\frac{1}{4}$ mile WSW of Alvie church. The monuments are a central cairn, two concentric circles of standing stones around the cairn, and an obelisk, 8 $\frac{1}{2}$ feet high, 25 feet to the W.

Delgaty Castle. See DALGETY.

Delnadamph, an extensive and excellent moor in Strathdon, Aberdeenshire, yielding first-rate grouse shooting.

Delney, a station on the Highland railway, in Kilmuir Easter parish, Ross-shire, on the western shore of Nigg Bay, in the Firth of Cromarty, 3 $\frac{1}{2}$ miles NE of Invergordon. There is a post and telegraph office.

Delnies. See NAIRN.

Deloraine, two pasture farms in Kirkhope parish, Selkirkshire, 13 miles SW of Selkirk. The title of Earl of Deloraine in the peerage of Scotland was conferred in 1706 on Henry Scott, second surviving son of the Duke of Monmouth, and became extinct at the death of his grandson, the fourth Earl, in 1807.

Delting, a parish in the Mainland of Shetland, including the islands of Bigga, Fishholm, Brother Isle, Little Roe, and Muckle Roe, only the last of which is inhabited. It is bounded N by Yell Sound, separating it from Yell; E by Lunnasting and Nesting; S by Weesdale and Sandsting; and W by St Magnus Bay and Sulem Voe. Joined to Northmaven by a narrow neck of land, less than 100 feet broad, that separates the German from the Atlantic Ocean, it has an utmost length of 20 miles, and varies in breadth from 3 to 6 miles, being much intersected by voes or arms of the sea. The surface is, for the most part, hilly, bleak, and barren; but along the banks of the voes and in the valleys are patches of good arable land. The chief harbours are St Magnus Bay, Sulem Voe, Olmafirth Voe, Busta Voe, and Goufirth Voe. In the island of Muckle Roe there is some fine rock scenery; and the sea washes into several large caves—the haunts of numerous wild birds. There are remains of an ancient artificial harbour at Burravoe, and some vestiges of a Pictish house at Brough, on Yell Sound. The

principal residences are Busta, Garth, Udhouse, Mossbank, and Voe. There are large stores and fish-curing establishments at Voe, Brae, and Mossbank. Delting is in the presbytery of Olmefirth and synod of Shetland; the stipend is £172. There are two parish churches, distant about 10 miles from one another, viz., Scatsta, built in 1811, and Olmefirth in 1868. There are also a Free church at Brae and a U.P. church at Mossbank; and the five schools of Brae, Gonfirth, Firth, Muckle Roe, and Olmefirth, with total accommodation for 228 children, had (1891) an average attendance of 108, and grants amounting to £150, 13s. 6d. Valuation (1892) £1938, 16s. 10d. Pop. (1801) 1449, (1831) 2070, (1861) 1975, (1871) 1862, (1881) 1654, (1891) 1512.

Delvine, an estate, with a mansion, in Caputh parish, Perthshire, near the left bank of the Tay, $\frac{1}{2}$ miles NE of Murthly station, and $\frac{7}{8}$ ESE of Dunkeld. Its owner is Sir Alex. Muir-Mackenzie, third Bart. since 1805 (b. 1840; suc. 1855).

Demyat. See DUNMYAT.

Den, a village in Abdie parish, Fife, near the Ladybank and Perth section of the North British railway, $\frac{1}{2}$ mile SE of Newburgh.

Den, a village of recent and rapid growth in Dalry parish, Ayrshire, $2\frac{1}{2}$ miles NE of Dalry town. At it is Kersland Barony Church of Scotland school, which, with accommodation for 281 children, had (1891) an average attendance of 137, and a grant of £118, 8s. 10d. Pop. (1891) 450.

Denbrae, an estate, with a mansion, in St Andrews parish, Fife, $2\frac{3}{4}$ miles WSW of the town.

Denburn. See ABERDEEN.

Den Fenella, a romantic ravine, traversed by a burn, in Garvock and St Cyrus parishes, Kincardineshire. It commences about $1\frac{1}{2}$ mile E by S of Laurencekirk, and extends $3\frac{1}{2}$ miles south-eastward to the sea, at a point $1\frac{1}{2}$ mile SW of Johnshaven. It took its name from Fenella or Finvela, daughter of the Earl of Angus, in the time of Kenneth III.; and here she is said to have been slain by her pursuers as she fled from Kincardine Castle, after the murder of the king at Fettercairn through her treachery (995). Its beauties of crag and chasm and wooded bank have often been celebrated in prose and verse; near its mouth is a beautiful waterfall, 65 feet in leap; and its stream is spanned by a handsome bridge and by the viaduct of the Bervie railway.

Denfind, a steep winding ravine, traversed by Pitairlie Burn, in Monikie parish, Forfarshire. It bisects a reach of hill in the central part of the parish; and, at a point where its sides are precipitous, is spanned by a massive one-arched bridge.

Denhead, a village, with a public school, in Cameron parish, Fife, 3 miles SW of St Andrews, under which it has a post office.

Denhead and Denmill, a conjoint village, with a spinning-mill, in Liff and Benvie parish, Forfarshire, 2 miles W of Lochee.

Denhead of Auchmacoy, a hamlet in Logie-Buchan parish, E Aberdeenshire, $2\frac{1}{2}$ miles E by N of Ellon, under which it has a post office.

Denholm, a village in Cavers parish, Roxburghshire, on a low plateau above the right bank of the Teviot, 2 miles E of Hassendean station, and 5 NE of Hawick. With a deep wooded dell to the W, called Denholm-Dean, it forms a square round a neatly-fenced public green, and chiefly consists of well-built houses with gardens attached, having been greatly improved by the late James Douglas, Esq. of Cavers. Yet, modern as it looks, the place is old, since we read of its burning by Hertford in 1545. The low, thatched, whitewashed cottage still stands on the N side of the village, in which was born the scholar-poet John Leyden (1775-1811), and in the middle of the village green an obelisk was erected to his memory in 1861. Inhabited mainly by stocking weavers, quarrymen, and farm labourers, Denholm has a post office under Hawick, with money order, savings bank, insurance, and telegraph departments, inns, a stone bridge over the Teviot (1864), a Free church (1844;

364 sittings), a public school, an excellent subscription library, a horticultural society (1849), and public water-works, which, formed in 1874 at a cost of more than £700, draw their supply from a spring nearly 2 miles distant, and afford 50 gallons per day for each inhabitant. Pop. (1861) 766, (1871) 659, (1881) 592, (1891) 475. See CAVERS.

Denino. See DUNINO.

Denmill, Forfarshire. See DENHEAD.

Denmill, a ruined ancient castellated seat, a mile and a half south-east of Newburgh, Fife.

Denmiln Castle. See ABDIE.

Dennisness, a headland in Cross and Burness parish, Sanday island, Orkney.

Dennistoun. See GLASGOW.

Dennistown. See DUMBARTON.

Denny, a town and a parish of SE Stirlingshire. The town stands on the right bank of the Carron, opposite DUNPACE, with which it is connected by a bridge; by road it is $5\frac{1}{2}$ miles WNW of Falkirk, $5\frac{1}{2}$ NNE of Cumbarauld, and $7\frac{1}{2}$ S by E of Stirling, whilst, as terminus of a branch of the Scottish Central section of the Caledonian, opened in 1859, it is $3\frac{3}{4}$ miles WNW of Larbert Junction, $32\frac{1}{4}$ WNW of Edinburgh, and $25\frac{1}{4}$ NE of Glasgow. Only a small village down to the close of last century, it is almost entirely modern, and has a post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland and Clydesdale Bank, a cottage hospital, hotels, a gas company, a people's hall, library, and reading-room, an Oddfellows' hall, a cemetery, and fairs on the Wednesdays before 12 May and after 11 November. It gives employment to numbers of the inhabitants in its paper, chemical, and engine works, and its ironfoundries. Large public schools were built in 1875 at a cost of £5000; and places of worship are the parish church (1813; 768 sittings) with a turreted steeple 75 feet high, a Free church (1843), a U.P. church (1796; reconstructed 1881), and the Roman Catholic church of St Patrick (1861). In 1876 Denny and Dunpace were formed into a police burgh, which, governed by 9 commissioners, had a municipal constituency of 602 in 1891. Pop. of Denny alone (1841) 1881, (1851) 2446, (1861) 2428, (1871) 2433, (1881) 2823, (1891) 3083; of police burgh (1876) 3595, (1881) 4081, (1891) 4161.

Besides part of BONNYBRIDGE, $2\frac{1}{2}$ miles to the SSE, the parish contains also the villages of Denny-Loanhead, Parkfoot, Longcroft, and Haggis, which extend continuously along the Glasgow highroad, Denny-Loanhead being $1\frac{3}{4}$ mile S, and Haggis $3\frac{1}{2}$ miles SSW, of Denny town. It is bounded NW by St Ninians, NE and E by Dunpace, SE by Falkirk, SW by Cumbarauld in Dumbartonshire (detached) and Kilsyth, and W by Kilsyth. From E to W its utmost length is $5\frac{1}{2}$ miles; its width, from N to S, varies between $5\frac{1}{2}$ furlongs and $3\frac{1}{2}$ miles; and its area is 8356 $\frac{1}{2}$ acres, of which 48 are water. The CARRON winds $7\frac{1}{2}$ miles east-north-eastward and east-south-eastward on or close to all the boundary with St Ninians and Dunpace; BONNY Burn runs $4\frac{3}{4}$ miles east-south-eastward and east-north-eastward along all the Dumbartonshire and Falkirk border; and three others of the Carron's affluents flow east-north-eastward through the interior. At the eastern extremity of the parish the surface declines along the Carron to 100 feet above sea-level, thence rising westward to 234 feet near Hillend, 400 near Banknock, 696 at conical Myot Hill, 563 near Leysbent, 460 at Cowden Hill, 965 at Tarduff Hill, and 1170 at Darrach Hill upon Denny Muir. The rocks are partly eruptive, partly carboniferous; and the soil is loamy along the Bonny and the lower reaches of the Carron, gravelly throughout the central district, and marshy or moorish over most of the uplands. Of the entire area, 5840 acres are in tillage, 789 pasture, 1499 waste, and only 181 under wood. Coal and ironstone are mined, and employment is further afforded by paper, chemical, and engine works at Denny town, by Carronbank Foundry (1860) and Denny iron-works (1870), by Bonnybridge Columbian stove works (1860), foundry (1860), and malleable iron-works (1877), and by Bankier

distillery. **BANKNOCK** House is the chief mansion. In the presbytery of Stirling and synod of Perth and Stirling, this parish was detached from Falkirk in 1618, and is now divided ecclesiastically among the *quoad sacra* parishes of HAGGS, Bonnybridge, and Denny, the two first formed in 1875 and 1878, and the last a living worth £339. Denny public and Roman Catholic and Lawhill and Longcroft public schools, have respective accommodation for 600, 187, 50, and 452 children. The **Russell Memorial Hall**, at Longcroft, Bonnybridge, was erected in 1893, at a cost of £500, raised by subscription. Valuation (1892) £28,339, 16s. 8d., including £2485 for railway. Pop. of parish (1801) 2033, (1831) 3843, (1861) 4988, (1871) 4993, (1881) 5728, (1891) 6373; of Denny registration district (1881) 4228, (1891) 4813.—*Ord. Sur.*, sh. 31, 1867.

Dennybridge, a former suburb, but now a section of Denny, Stirlingshire.

Dennyfern, the remains of an ancient castle in Lethnot parish, Forfarshire.

Denny-Loanhead, a village in Denny parish, Stirlingshire, with a post office, and a station on the Kelvin Valley section of the North British railway, $1\frac{3}{4}$ mile S of Denny. It has a U.P. church which, succeeding one of 1735, was built in 1815 at a cost of £1400.

Dennystown. See DUMBARTON.

Denoon, a glen, traversed by a burn, in Glamis and Eassie parishes, W Forfarshire. Rising on the north-eastern slope of Auchterhouse Hill (1399 feet), the burn winds $6\frac{1}{4}$ miles north-by-westward, till it falls into Deau Water, at a point $2\frac{3}{4}$ miles WNW of Glamis village. The Sidlaws at its head and along its course have altitudes of from 1200 to 600 feet above sea-level; and the tracts flanking its lower parts subside into the plain of Strathmore. Vestiges of an ancient fortification, crowning isolated Denoon Law (689 feet) within the glen, $2\frac{1}{2}$ miles SW of Glamis village, comprise foundations of a circular wall 1020 feet in circumference and faint traces of interior buildings, and bear the name of Denoon Castle. The circular wall is believed to have been 30 feet broad and 27 feet high, and the entire fortification is supposed to have been designed as a place of retreat in times of danger.—*Ord. Sur.*, shs. 48, 56, 1868-70.

Denovan, an estate, with a mansion, in Dunipace parish, Stirlingshire, and comprising about one-fourth of the parish.

Denside, a hamlet, with a public school, in Tannadice parish, Forfarshire.

Derclach, a loch in Straiton parish, S Ayrshire. Lying 870 feet above sea-level, it has an utmost length and width of $4\frac{1}{2}$ and $1\frac{1}{4}$ furlongs, and sends off a rivulet 1 furlong eastward to the head of Loch FINLAS.—*Ord. Sur.*, sh. 8, 1863.

Derculich, an estate, with a mansion, in Weem parish, Perthshire, near the left bank of the Tay, $3\frac{1}{2}$ miles NE of Aberfeldy. Loch Derculich, 2 miles to the NNW, lying about 1200 feet above sea-level, has an utmost length of $4\frac{3}{4}$ furlongs, with a varying width of $1\frac{3}{4}$ and 4 furlongs. It contains some pike and abundance of fine trout, which will not, however, always rise to the fly; and it sends off Derculich Burn, running $2\frac{1}{2}$ miles south-south-eastward to the Tay.—*Ord. Sur.*, sh. 55, 1869.

Dergan (Gael. *dearg-abhainn*, 'red river'), a rivulet in Ardochattan parish, Argyllshire, rising at an altitude of 1100 feet, and running $4\frac{1}{4}$ miles north-north-westward along Glen Salloch and through the woods of BARCALDINE, to Loch Creran.—*Ord. Sur.*, sh. 45, 1876.

Dernaglar, a lake about 4 miles to the east of Glenluce, Wigtonshire.

Dernconner, a large village of recent growth in Auchinleck parish, Ayrshire. At it are a Church of Scotland mission station (1874) and a public school. Pop. (1871) 928, (1881) 550, (1891) 1198.

Dernock. See DARNICK.

Derry or **Loch an Dithreibh**, a lake in the S of Tongue parish, Sutherland, $6\frac{1}{4}$ miles SSW of Tongue church. Lying 268 feet above sea-level, it is $1\frac{1}{2}$ mile long and 5

furlongs wide, sends off the Kinloch to the head of the Kyle of Tongue, and abounds in yellow trout.—*Ord. Sur.*, shs. 114, 108, 1880.

Derry, a burn of Crathie and Braemar parish, SW Aberdeenshire, issuing from Loch Etchachan (1320 feet), on the NE side of Ben Macdhui, and running $6\frac{1}{2}$ miles east-south-eastward and southward, till it falls into Lui Water at Derry Lodge (1386 feet), 9 miles WNW of Castleton. The ordinary ascent of Ben Macdhui is up Glen Derry, which the Queen in her Journal describes as 'very fine, with the remnants of a splendid forest, Derry Cairngorm (3788 feet) being to the right, and Derry Water running below.'—*Ord. Sur.*, shs. 64, 65, 1874-70.

Dervaig, a village, with public and girls' schools, in Kilninian parish, Mull island, Argyllshire, at the head of Loch Cuan, $8\frac{3}{4}$ miles WSW of Tobermory, under which it has a telegraph post office.

Derval. See DARVEL.

Deskford, a village and a parish in the N of Banffshire. The village, Kirktown of Deskford, stands on the left bank of the Burn of Deskford, 4 miles S of Cullen, under which it has a post-office.

Bounded NE and E by Fordyce, S by Grange, and NW and N by Rathven, the parish has an utmost length from NNE to SSW of $4\frac{1}{4}$ miles, an utmost breadth of 3 miles, and an area of 8170 acres, of which 15 are water. **DESKFORD BURN**, with a north-north-easterly course here of $5\frac{1}{4}$ miles, divides the parish into two pretty equal halves; and the surface, sinking at the northern extremity to close on 100 feet above sea-level, thence rises southward to 353 feet at the wooded Gallows Knowe, 556 at Cotton Hill, 504 at Weston, 845 at the Hill of Clashmadin, 871 at Black Hill, and 1028 at Lurg Hill, whose summit, however, falls just within Grange. Numerous small cascades occur on the Deskford's affluents, one of them, called the Linn, being a series of leaps with total fall of 30 feet, and with surroundings of high beauty. The rocks, having undergone great geognostic disturbance, include almost vertical strata of mica slate, with fragments of quartz embedded therein, and a rich bed of fine compact limestone, which has been largely worked. The soil, in the strath, is chiefly loam resting on strong deep clay; but, toward the hills, is light, black, mossy humus, overlying clay and gravel. About one-third of the area is either regularly or occasionally in tillage; some 600 acres are under wood, natural or planted; and the rest is either pasture or waste. This parish has long been the property of the Seafields, the Countess-Dowager being sole heritor; and Deskford Tower, demolished within the nineteenth century, was a subsidiary family seat. The House of Skeith is gone. The lands were sold in 1721 by Alexander Abercromby to the Earl of Findlater, to whom Lawtie of Inaltrie also sold his lands. A part of his castle walls, among the oldest in Banffshire, still exists. A curious relic, found about 1816 in a mossy knoll adjacent to that old castle, somewhat in the form and of the size of a swine's head, of brass, with a wooden tongue moved by springs, and with tolerably exact representations of eyes, is now in the Banff Museum. Deskford is in the presbytery of Fordyce and synod of Aberdeen; the living is worth £329. A new parish church, Pointed Gothic in style, and containing 500 sittings, was built in 1872 at a cost of £1000; and a new manse in 1873. There is also a Free church; and a new public school, erected in 1876 at a cost of £1182, with accommodation for 162 children, had (1891) an average attendance of 88, and a grant of £92, 9s. Valuation (1892) £4166, 16s. Pop. (1801) 610, (1831) 828, (1861) 1031, (1871) 972, (1881) 849, (1891) 745.—*Ord. Sur.*, sh. 96, 1876.

Deskford or **Cullen Burn**, a rapid, deep-channelled stream of Banffshire, rising in the S of Deskford parish, and thence winding $7\frac{1}{2}$ miles north-north-eastward, north-westward, and again north-eastward, is spanned by the viaduct (between 70 and 80 feet high) of the Buckie extension of the Great North of Scotland railway, just before it falls into the Moray Firth at Cullen Bay.

Deskry, a rivulet of SW Aberdeenshire, rising, at an altitude of 1800 feet, on the western shoulder of Morven Hill (2862 feet), close to the meeting-point of Glenmuick, Logie-Coldstone, and Strathdon parishes. Thence it winds 10 miles north-eastward and west-south-westward, between Logie-Coldstone and Strathdon parishes, across the Migvie district of Tarland parish, and between that district and Towie parish, till it falls into the Don $\frac{1}{2}$ mile E of Castle-Neve. Its trout are small but excellent.—*Ord. Sur.*, sh. 75, 1876.

Dess, a station in the NE of Aboyne parish, Aberdeenshire, on the Deeside railway, 3 miles NE of Aboyne station.

Denchar, an estate, with a mansion, in Fearn parish, Forfarshire, 8 miles W by N of Brechin.

Deuchar. See YARROW.

Deugh, a stream of Carsphairn parish, N Kirkcubrightshire, rising on the eastern slope (2000 feet) of Windy Standard, and thence curving 5 miles westward along the Ayrshire border, next 15 miles southward, east-south-eastward, and southward again through the interior, till, at the SE angle of the parish, and at a point 7 miles NNW of New Galloway, it falls into the Ken, after a descent of 1620 feet.—*Ord. Sur.*, shs. 15, 14, 8, 9, 1863-64.

Devar. See DAVAR.

Deveron or **Doveran** (Gael. *da-abhuinn*, 'double river'), a river of Aberdeen and Banff shires, rising in two main head-streams—whence the name—among the mountains of Cabrach, the longer of the two having its source on the mutual border of Cabrach and Glenbucket parishes, 3 miles SW of the summit of the Buck of Cabrach (2368 feet). Thence it has a total course of 61 $\frac{1}{2}$ miles, viz., 25 $\frac{1}{4}$ from its source to the Bridge of Gibston near Huntly, 24 thence to Eastside Bridge near Turriff, and 12 $\frac{3}{8}$ thence to its mouth; and during this course it descends from 1847 feet above sea-level at its source to 414 near Huntly and 114 near Turriff. It partly winds along in serpentine folds, but, on the whole, goes north-eastward to the influx of the Bogie below Huntly, northward thence to Rothiemay, eastward or east-north-eastward thence to the vicinity of Turriff, and northward thence to the Moray Firth. Its connections with respectively Aberdeenshire and Banffshire are so fitful, leading it now into the one county, now into the other, now along the boundary between the two, as to render it more a puzzler than an expounder in political topography; yet, in one long sweep, from above Glass church to the vicinity of Rothiemay church, it runs entirely within Aberdeenshire; and over another long sweep, from a point 4 miles WSW of Turriff to its mouth at the Moray Firth, it roughly traces the boundary line between the shires. The parishes immediately watered by it, whether through their interior or along their confines, are Cabrach, Glass, Huntly, Cairnie, Fergue, Rothiemay, Marnoch, Inverkeithny, Turriff, Ferglen, Alva, King-Edward, Banff, and Gamrie. The river, in the upper part of its course, is a mountain stream, careering along a series of glens, always rapid, sometimes impetuous, and occasionally subject to tremendous freshets. All the bridges on it above Huntly were swept away by the great flood of Aug. 1829, when at Huntly it rose 22 feet above its ordinary level. But its march, in the middle and lower parts of its course, is tranquil and beautiful, through fertile plains, amid brilliant embellishments of wood and mansion, with several stretches of close scenery as exquisitely fine, in both nature and art, as almost any in Great Britain. The fertility of its banks, like that of the banks of the Don, is celebrated in both proverb and song. Its chief tributary, besides the Blackwater and Bogie, is the Isla, which joins it a little above Rothiemay. The Deveron, thence to the sea, is about two-thirds the size of the Don. Well stocked with salmon and trout, it is mostly preserved, except about Huntly; and it has bag-net fisheries on either side of its mouth, extending into the sea. A shifting bar here varies with gales of wind, and underwent such change in 1834 as first to close entirely the former mouth, and next to lay open a new one 600

yards further to the E; hence disputes have arisen among the cruite owners as to the line of the river's bed. The salmon fishings up the river belong to the Duke of Richmond and Gordon, the Duke of Fife, and others; those at its mouth belong to the Duke of Fife and the town of Banff.—*Ord. Sur.*, shs. 75, 85, 86, 96, 1876. See chap. xxi. of Sir Thomas Dick Lauder's *Moray Floods* (Elgin, 1830; 3d ed. 1873).

Devil's Cauldron, an ancient circular structure in Kingarth parish, Isle of Bute, a little W of the head of Kilchattan Bay, and 7 miles S of Rothesay. It is situated within a grove, not far from the ruins of St BLANE'S Chapel, of which it was an appendage and with which it probably communicated by a subterranean passage. It consists of a dry-stone wall, 10 feet thick and 7 $\frac{1}{2}$ feet high, enclosing a space 30 feet in diameter, with an entrance from the E; and it is said to have been used, in pre-Reformation times, as a place of penance.

Devil's Cauldron, a wild and very romantic chasm, on the mutual boundary of Comrie and Monzievaird parishes, Perthshire, 1 $\frac{1}{2}$ mile N of Comrie village. Lednock Water traverses it; and 'the stream, after cutting its path through a black crag, the sides of which it has polished to the appearance of ebony, throws itself impetuously into a basin, where it hisses, and foams, and sbrieks, and writhes, like a demon newly plunged into Tartarus.'

Devil's Cowe, a cave in Kincaig Hill, at the southwestern extremity of Kilconquhar parish, Fife.

Devil's Dike. See DEIL'S DIKE.

Devil's Mill, a waterfall on the mutual boundary of Perthshire and Kinross-shire, on the river Devon, about 350 yards ENE of Rumbling-Bridge, and 1 $\frac{1}{2}$ mile WSW of Crook of Devon. The river here, after rushing along a craggy ravine, and passing into a chasm of considerable length but scarcely 6 feet in width, falls over a rock into a deep cavity, where it is tossed round with such great violence as to beat constantly on the rocky sides of the chasm, and cause a clacking noise like that of a mill at work. The waterfall is not seen; but, in ordinary states of the river, when neither too low by draught, nor too high by freshet, the noise is very distinctly heard. A common reason given by the country people for the name Devil's Mill is, that the noise continues on all days alike, paying no regard to Sunday; but another reason given is, that the scene and working of the waterfall are indicative of a grinding to destruction. A cavern, called the Pigeon's Cave, is near the waterfall.

Devil's Staircase, an abruptly declivitous byroad on the N border of Argyllshire, deflecting from the highway at the head of Glencoe, 3 miles W of King's House. It descends northward to the head of Loch Leven, and communicates there with an old road north-north-westward to Fort William.

Devol's Glen, a ravine, traversed by a brook, in Greenock and Port Glasgow parishes, Renfrewshire. Commencing among hills 794 and 682 feet high, and descending 2 $\frac{1}{2}$ miles north-eastward to the E end of Port Glasgow town, it is rocky, wooded, and romantic. It is flanked, near the head, by a precipice, called Wallace's Leap, over which Sir William Wallace is fabled to have leaped on horseback; and it contains two beautiful though tiny waterfalls, respectively about 20 feet and about 100 feet in leap.

Devon, a river of Perth, Kinross, Clackmannan, and Stirling shires, rising among the Ochils in the N of Alva parish, at an altitude of 1800 feet, and 9 furlongs WNW of the summit of Benclench. Thence it winds 14 miles north-eastward, eastward, and south-eastward to the CROOK OF DEVON, and thence again 19 $\frac{3}{4}$ west-south-westward, till, after a total course of 33 $\frac{3}{4}$ miles, it falls into the Forth at Cambus, 2 $\frac{3}{8}$ miles W by N of Alloa, and only 5 $\frac{1}{4}$ miles in a straight line SSW of its source. During this course it traverses or bounds the parishes of Alva, Blackford, Tillicoultry, Glendevon, Fossoy, Muckhart, Dollar, Tillicoultry, Alva, Logie, and Alloa. The last song written by Burns, written as he lay dying at Brow (12 July 1796), was, 'Fairest maid on Devon

banks, Crystal Devon, winding Devon'—the maid, that Charlotte Hamilton of Mauchline, whom he had seen at Harviestoun nine years before, and then had celebrated in another most exquisite lyric—

'How pleasant the banks of the clear winding Devon,
With green spreading bushes, and flowers blooming fair!
But the bonniest flower on the banks of the Devon
Was once a sweet bud from the banks of the Ayr.'

Others than Burns have sung of the beauties of the Devon and its valley, shown at their best in a long reach below the Crook of Devon, where the stream traverses a series of ravines and chasms, and makes the famous falls described in our articles Devil's Mill, Rumbling-Bridge, and Caldron Linn. The cliffs that flank its chasms and ravines are of no great height, nowhere exceeding much 100 feet; but they acquire aspects of sublimity and savageness from the narrowness and gloom of the spaces which they enclose, and aspects of picturesqueness and witchery from copsewood, herbage, and overshadowing woods. The river's aggregate descent, from source to mouth, is close upon 1800 feet, and its basin is so ramified among nearly all the southern and south-western Ochils as sometimes to send down freshets to the plains, with the suddenness and volume of a waterspout. The river is not navigable, yet, according to a survey made by James Watt in 1760, it could be rendered navigable for several miles at a cost of about £2000. It is a capital trouting stream, everywhere open to the public; its trout average rather less than $\frac{1}{2}$ lb. each. The Stirling and Dunfermline railway crosses it, near the mouth, on a viaduct partly supported by piers, partly suspended on strong timber beams; and the Devon Valley railway follows it from its lower waters upward to Crook of Devon.—*Ord. Sur.*, shs. 39, 40, 1869-67.

Devon, Black or South, a small river of Fife and Clackmannanshire, rising on Outh Muir (900 feet) in the N of Dunfermline parish, 7 furlongs WSW of Dunglow, the highest of the Cleish Hills, and thence running $15\frac{1}{2}$ miles westward and south-westward through and along the borders of Saline and Clackmannan parishes, till it falls into the Forth, $1\frac{1}{2}$ mile SE of Alloa. It has very small volume in drougthy seasons, most of its waters being then collected in dams or reservoirs for driving mills; it takes the name of Black Devon from the gloomy appearance of its waters; and it contains some pike and little trout.—*Ord. Sur.*, shs. 40, 39, 1867-69.

Devon, Crook of. See CROOK OF DEVON.

Devon Iron-works, an extensive establishment in the Sauchie section of Alloa parish, Clackmannanshire, near the left bank of the Devon, $2\frac{1}{2}$ miles NNE of Alloa. With several furnaces and a large foundry, it turns out some thousands of tons of pig-iron in the year, and converts a considerable portion thereof into cast-iron goods; and it communicates by one railway with Alloa Harbour, by another with Clackmannan Pow at the mouth of the Black Devon.

Devonshaw, a hill (1275 feet) in Lamington and Wandel parish, Lanarkshire, on the right bank of the Clyde, opposite Robertson village. Its SW shoulder is crowned with an ancient circular camp.

Devonside, a village in Tillicoultry parish, Clackmannanshire, $\frac{3}{4}$ mile SSE of Tillicoultry town. It adjoins a brick and tile work, and is near a coal mine. Pop. (1881) 479, (1891) 687.

Devon Valley Railway, a railway in Clackmannan, Perth, and Kinross shires, partly along the middle reaches of the river Devon, and thence deriving its distinctive name. A reach of $3\frac{1}{2}$ miles north-eastward, from a junction with the Stirling and Dunfermline railway at Alloa to Tillicoultry, is practically a portion of the line, but was opened in 1851, prior to any part of the line proper, as a branch of the Stirling and Dunfermline railway. The Devon Valley line proper, extending from a junction with that branch at Tillicoultry east-north-eastward to a junction with the Fife and Kinross railway, in the vicinity of Kinross, was originally projected in 1857, and authorised in 1858, on a capital of

£90,000 in shares and £30,000 in loans. It was formed, under the original authority, only from Rumbling-Bridge to Kinross Junction; the rest being formed, in two successive reaches, under connection from 1866 with the North British system. The reach from Rumbling-Bridge to Kinross is $6\frac{1}{2}$ miles long, was opened on 1 May 1863, traverses a level district, and has no works of more than ordinary consequence except a rock cutting at Rumbling-Bridge. The reach from Tillicoultry to Dollar is $2\frac{3}{4}$ miles long; was begun to be formed in 1867, and completed in May 1869; and also has no works of more than ordinary consequence. The reach from Dollar to Rumbling-Bridge is $4\frac{1}{2}$ miles long; was begun to be formed in 1869, and opened on 1 May 1871; has several works of very heavy character; and rises to a summit-level of 320 feet above the elevation of its starting-point at Dollar. An embankment on it contiguous to Dollar is 40 feet high and more than 900 yards long. A viaduct over the Devon is 52 feet high and 390 feet long; has six arches, each of from 49 to 55 feet in span; and curves on a radius of 30 chains. A cutting at Arndean is 80 feet deep at the deepest part, and involved the removal of about 180,000 cubic yards of sand. A viaduct in Gairney Glen is 110 feet high and 360 feet long; has six arches each 45 feet in span; and occupies a most picturesque position. Ten other small viaducts and seven overarching bridges occur between Dollar and Rumbling-Bridge. Since 1 Jan. 1875 the Devon Valley has been amalgamated with the North British.

Dewar, a hamlet in Heriot parish, Edinburghshire, $6\frac{1}{2}$ miles S of Middleton. Dewar farm, adjacent to the hamlet, contains a spot called the Piper's Grave, traditionally associated with a foolish and fatal exploit of a Peebles piper; and Dewar Hill, not far therefrom, is crowned with a remarkable large stone, called Lot's Wife.

Dewarton, a village on Vogrie estate, in Borthwick parish, Edinburghshire, $1\frac{1}{2}$ mile W of Ford.

Dews, a small marshy lake in Fetteresso parish, Kincardineshire. It once was of considerable extent, but has become exceedingly reduced, and it is so occupied with aquatic plants as to be sometimes called Lily Loch.

Dheirrig or Eilean Dearg (Gael. 'red island'), an islet of Inverchaolain parish, Argyllshire, the furthest of a small group in the mouth of Loch Riddon, at the elbow of the Kyles of Bute, $2\frac{1}{2}$ miles NW of Colintraive. It is crowned by ruins of a fort, erected by Archibald, ninth Earl of Argyll, in 1685, during his disastrous expedition from the Netherlands.

Dhivach. See DIVACH.

Dhruim, a river-gorge in Kilmorack parish, Invernessshire, extending about 2 or 3 miles south-westward from Kilmorack church, and traversed by the river Beauly. It is flanked by steep mountain acclivities, clothed with birch and pine; is fringed, along the river's brink, by rows of oaks, alders, and weeping birches; is swept, along the bottom, by a series of cascades over shelving masses of red sandstone; and has, altogether, a romantically picturesque character.

Dhu. See BENDHU.

Dhu or Dubh Loch (Gael. 'black lake'), a wild mountain lake in the SW of Glenmuick parish, Aberdeenshire, $1\frac{3}{4}$ mile W of the head of Loch Muick, to which it sends off the Allt an Dubh-loch. Lying 2091 feet above sea-level, it has an utmost length and breadth of $5\frac{1}{2}$ and $1\frac{1}{2}$ furlongs, and is overhung to the S by Cairn Bannoch (3314 feet) and Broad Cairn (3268), which culminate just on the Forfarshire border. Here, on 16 Sept. 1852, the Queen received confirmation of the death of the Duke of Wellington.—*Ord. Sur.*, sh. 65, 1870.

Dhuheartach, a rocky basaltic islet of Argyllshire, $15\frac{1}{2}$ miles SW of Iona. Lying fully exposed to the Atlantic, it is 240 feet long, 130 broad, and 35 high, and was surmounted in 1867-72 by a lighthouse rising 143 feet above high-water level. The lighthouse is a parabolic frustum, and was built of granite quarried and dressed at Carraid, on the shore of the Sound of Iona, and landed with great difficulty on the rock. Only 27 days in 1867, 38 days in 1868, 59 days in 1869, and 62 days

in 1870 were sufficiently calm to permit the landing of the materials. The light, which is visible for 18½ nautical miles, is fixed white, except between S by W ½ W and W ½ N, where it is occulting, showing alternately for about 30 seconds and 10 seconds, with intervals of 10 seconds blackness between.

Dhuisk or **Dusk**, a rivulet of Colmonell parish, in the S of Carrick, Ayrshire. Formed by the Feoch and Poggowan Burns, at a point 1¼ mile ESE of Barrhill village, it thence runs 6 miles north-westward, closely followed by the Girvan and Portpatrick railway, till near Pinwherry station it falls into the Stinchar.—*Ord. Sur.*, shs. 8, 7, 1863.

Dibaig, a hamlet, with a public school, near the mutual boundary of Applecross and Gairloch parishes, Ross-shire.

Dichmont, a hill-summit in St Vigeans parish, Forfarshire, 1 mile NE of St Vigeans village. It rises to an altitude of 323 feet above sea-level, and is crowned with a large hollow cairn or mound, anciently used as a seat of justice, and now clothed with greensward.

Dichty or **Dighty Water**, a stream of S Forfarshire. Rising in four head-streams, among the Sidlaw Hills, in the W of Lundie parish, it runs 15 miles east-south-eastward through Auchterhouse, Mains and Strathmartine, Dundee, and Monifieth parishes; receives, within Dundee parish, the tribute of Fithie Water; and falls into the Firth of Tay 1¼ mile ENE of Broughty Ferry. It drives several mills in the middle and lower parts of its course, and is well stocked with trout.—*Ord. Sur.*, shs. 48, 49, 1868-65.

Digmore, a small harbour in North Uist island, Outer Hebrides, Inverness-shire, on Balranald farm, towards the middle of the island.

Dildawn. See DALDAWN.

Dillarburn, a village in Lesmahagow parish, Lanarkshire, 1¼ mile NNE of Abbeygreen.

Dilty, a morass in Carmyllie and Guthrie parishes, Forfarshire, 1¼ mile ESE of Kirkbuddo station. Measuring about ½ mile either way, it sends off two streamlets in opposite directions—the head-stream of the Elliot running eastward directly to the sea, and a tributary streamlet running westward to the river Dean.

Dinart, a lake and rivulet in the NW of Sutherlandshire—the former about 3 miles in circumference.

Dingwall (Scand. 'hill of justice'), a parish and the head town of Wester District in the united county of Ross and Cromarty. A royal and parliamentary burgh, the town stands on the north-western shore, and a little below the head of Cromarty Firth, which here is joined by the Peffer; by road it is 13½ miles NW of Inverness *viâ* Kessock Ferry, and by rail, as junction of the Dingwall and Skye railway (1870) with the main Highland line (1862), 53 ENE of Strome Ferry, 82¾ SW by S of Helmsdale, 18½ NW of Inverness, 210¼ NNW of Edinburgh, and 226¾ N by W of Glasgow. The beautifully-wooded plain on which it stands was once a swampy marsh, but since 1817 thorough drainage and spirited agriculture have made it one of the loveliest valleys in the N of Scotland. The burgh, lying snugly among rich clumps of trees, at the entrance of Strath Peffer, chiefly consists of one main street, a mile in length; and, while the majority of its houses are irregularly disposed and unpretentious architecturally, still there are several very handsome modern residences. Yet Dingwall is a place of hoar antiquity, the county town, having arisen under the shelter of the neighbouring castle of the Earls of Ross, which, built close beside the Firth, was almost surrounded by water, but now has left hardly a vestige, its site being partly occupied by a modern mansion. The Town-house is a curious old-fashioned edifice, with a spire; the County Buildings, a handsome castellated pile a little way E of the town, were erected in 1845 at a cost of £5000, and contains a court-house, county rooms, and a prison with eighteen cells. A public hall was built in 1871; and a cottage hospital, H-shaped in plan, in 1872-73, as a memorial to the late Dr William Ross. Near the church is a plain and simple obelisk, 6 feet square at the base, and

57 feet high, but thrown slightly off the perpendicular by an earthquake of 1816; in 1875 it proved upon exploration to mark the resting-place of its founder, George Mackenzie, the celebrated first Earl of Cromartie (1630-1714). The parish church itself, with a steeple and 800 sittings, was built in 1801; the present handsome Free church in 1869; and the Episcopal church of St James, an Early Decorated structure with 120 sittings, in 1872, its predecessor having been destroyed by fire the year before. In 1874 a public park, adjoining the Beauly road, was gifted to the burgh by the late Sir James Matheson, Bart. of the Lews, who had at one time been provost; and Dingwall besides has a post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland and the Caledonian and National banks, a distillery, several hotels, gas-works, a masonic lodge, a literary association, militia barracks, a public reading-room, and a Friday paper, the *Ross-shire Journal* (1875). A corn market is held on every Wednesday from 26 September to 30 May, and the fairs throughout the year are:—Candlemas (cattle and produce), third Wednesday of February; Janet's, first Wednesday of June; Colin's (cattle, etc.), first Tuesday of July; Feil Maree, first Wednesday of September; Martha's, do. of November; and Peffer, Tuesday before Christmas. After the forfeiture of the Earls of Ross in 1476 Dingwall seems to have gone down in the world; and its petition of 1724 to the Convention of Burghs sets forth that 'the town is almost turned desolate, as is well known to all our neighbours, and there is hardly anything to be seen but the ruins of old houses, and the few inhabitants that are left, having now no manner of trade, live only by labouring the neighbouring lands, and our inhabitants are still daily deserting us.' Accordingly, in 1733, Inverness sent a deputation, which brought back word that Dingwall had no trade, though one or two were inclined to carry on trade if they had a harbour, also that it had no prison, and that for want of a bridge across an adjacent lake the people were kept from both kirk and market. Now, though its trade is still not very great, and though manufactures are conspicuous by their absence, Dingwall at least has a harbour. A mile below the bridge coasters had once to load and unload on the mud at low-water, their cargoes being carried along a bad road to and from the E end of the town. This inconvenience was remedied by shaping the lower reach of the Peffer into a regular canal, 2000 yards long, with two wharfs at which vessels of 9 feet draught can lie—such improvements being carried out in 1815-17 at a cost of £4365, of which £1786 was furnished by the Highland road commissioners and £600 by the Convention of Burghs. Erected

Seal of Dingwall.

into a royal burgh by Alexander II. in 1226, and having adopted the General Police and Improvement Act of 1862, Dingwall is governed by a provost, a senior and a junior bailie, a dean of guild, a treasurer, and 10 councillors, who also act as police commissioners. With

WICK and four other burghs, it returns a member to parliament, its parliamentary constituency numbering 306 in 1891, when the annual value of real property, inclusive of railway, was £9847, whilst the corporation revenue was £158, and the harbour revenue £144. Pop. (1851) 1966, (1861) 2099, (1871) 2125, (1881) 1932, (1891) 2300. Inhabited houses (1891) 421.

The parish is bounded N and NE by Kiltearn, SE by the head of Cromarty Firth and by the river Conan, separating it from the Nairnshire district of Ferintosh, S by the Tollie section of Fodderty and by Urray, and SW by the main body of Fodderty. That part of the parish that lay to the west of the centre of the road from Keithtown to Coill-an-Righe, where that road divides the lands of Seaforth from those of Tulloch, was in 1891 transferred by the Boundary Commissioners to the parish of Fodderty. It has an utmost length of 6½ miles from NNW to SSE, and its width varies between 9½ furlongs and 4¾ miles, whilst tapering north-westward to a point. The PEPPER winds 2½ miles east-south-eastward, partly through the interior, to the Firth; the Skiach runs 1½ mile north-eastward across the northern interior; and Loch Ussie (6½ × 4¾ furl.) lies at an altitude of 419 feet, partly within a western projecting wing. Except for the low level strip, 3 furlongs wide, between the Firth and the Inverness highroad, and for a portion of Strath Peffer, the surface is everywhere hilly, even mountainous, from S to N attaining 259 feet near Blackwells, *628 near Croftandrum, *882 at Cnoc Mor, *450 at Knockbain, 1109 at Cnoc a' Bhreac, and *2000 at Meall na Spireig, those heights that culminate on the parish's borders being marked with asterisks, and one and all being dominated by BEN WYVIS (3429 feet). The rocks are gneiss and mica slate in the northern uplands, and in the S conglomerate and Old Red sandstone. Around the town there is a deep deposit of loam with a large admixture of clay, very suitable for the growth of wheat, but demanding great care in the cultivation; the soil on the lower slopes of the rising-grounds is also clayey; and the higher cultivated land is mountain clay or moorish soil, the former becoming very fertile with long-continued good treatment, the latter very difficult to improve (Mr James Macdonald in *Trans. Highl. and Ag. Soc.*, 1877). In the N are remains of an ancient Caledonian stone circle. TULLOCH Castle is the chief mansion. Dingwall is the seat of a presbytery in the synod of Ross; the living is worth £338. A public school, Dingwall Academy, with accommodation for 680 children, had an average attendance of about 450, and a grant of £600. Pop. (1831) 2124, (1861) 2412, (1881) 2220, (1891) 1607.—*Ord. Sur.*, shs. 83, 93, 1881.

The presbytery of Dingwall comprises the old parishes of Alness, Contin, Dingwall, Fodderty, Kilmorack, Kiltearn, Urquhart, and Urray and Kilchrist, and the *quoad sacra* parishes of Carnoch and Kinlochluichart. Pop. (1871) 16,562, (1881) 15,517, (1891) 14,573, of whom 437 were communicants of the Church of Scotland.—The Free Church also has a presbytery of Dingwall, with churches at Alness, Contin, Dingwall, Fodderty, Kilmorack, Kiltearn, Maryburgh, Strathconan, Strathgarve, Urquhart, and Urray, which together had 4876 members and adherents in 1891.

Dingwall and Skye Railway, The, designed to open up to railway facilities the western coasts of Ross and Inverness, and by means of steamers to afford access to the principal islands of the Outer and Inner Hebrides, was originally projected to reach Kyle Akin (the Strait of Haco), where the island of Skye is separated from the mainland by a narrow channel. A bill for a line to this point was obtained in 1864, but the difficulty of raising the capital caused the adoption of a modified scheme, carrying the line to its present western terminus on Loch Carron. The railway, leaving the Highland line at Dingwall, rises a short distance therefrom upon a steep incline, a branch to Strathpeffer (4¼ miles) forking off to the left. This station occupies a remarkably elevated position, the famous spa that gives it name being situated 1½ mile away in the deep valley below. The view from this portion of the line is magnificent; prominent amongst

the objects of interest being Castle-Leod, belonging to the Earl of Cromartie, which is seen in the midst of fine trees. Returning to the main line, the first station reached is Auchterneed, the line passing through a cutting close under *Craig-an-Fhithich*, the 'Raven's Rock,' whose precipitous face, 250 feet high, beetles ominously over the railway. Half-a-mile further the line enters Ross-shire, and passes Loch Garve, the first of a series of fine lochs which skirt the route. The shores are nicely wooded. The station of Garve (11¾ miles) forms the starting-point for Lochbroom and Ullapool by a wild coach road over the DIRIE MORE. The line afterwards passes Loch Lnishart, where there is a station (17 miles), and the Grudie, Loch Cullin, and Strathbran afford varying aspects of Highland scenery. Achanalt station (21¼ miles) is a favourite starting-point for the ascent of a number of the giant mountains of Ross-shire. Auchnasheen station (27¾ miles) is the starting-point for the coach to Gairloch, the road passing along the whole length of Loch Maree, and forming one of the finest drives in Scotland. Beyond Auchnasheen the line, after crossing the Bran on a fine lattice bridge, reaches its summit-level, and immediately begins to descend to the western coast. There is here some remarkably wild and bleak scenery; and at Auchnashel-lach, the shooting-lodge of Lord Wimborne, surrounded by fine grounds, appears like an oasis in the desert. The line then skirts Loch Dungal, 4 miles in length, with vast precipitous hills rising from it. Strathcarron station (45¾ miles), at the head of Loch Carron, is next reached, forming the station for Janetown on the opposite side of the loch, and for the wild region of Loch Torridon. From Attadale station the line skirts the upper waters of Loch Carron, and reaches its terminus at Strome Ferry (53 miles), though it is still intended to carry it on to a point, near Kyle Inn, opposite Kyle Akin village in Skye. The line was cheaply constructed, the principal works being the cutting above Strathpeffer and a few large bridges. The total capital expenditure amounted to £330,000. In 1881 the line was amalgamated with the Highland railway. In December 1892 Government agreed to contribute £45,000 towards the cost of extending the line to the terminus originally contemplated, whence communication can be established with Skye by means of a steam ferry.

Dingy's How, an ancient tumulus 36 feet high on the isthmus at the southern extremity of St Andrews parish, Orkney.

Dinlabyre, an ancient chapelry in Castleton parish, Roxburghshire, on the left bank of Liddel Water, 1 mile SSE of Steele Road station. An old-fashioned mansion, now a farm-house, occupies the site of its chapel.

Dinmurchie. See BARR.

Dinnet, a station, a burn, and a moor of S Aberdeen-shire. The station is on the Deeside section of the Great North of Scotland railway, 4½ miles W of Aboyne. The burn, issuing from Loch Daven, and receiving also the effluence of Loch Kinord, runs 2¼ miles south-eastward along the boundary between Aboyne and Glenmick parishes, falls into the Dee in the vicinity of the station, and may be regarded as the line of demarcation between the Lowlands and Highlands of Deeside. The moor flanks the W bank of the burn, is a bleak dismal tract, and contains several cairns and several vestiges of ancient warfare. Near the station is a Gothic church, built in 1875 at a cost of £700 as a chapel of ease to Aboyne, and raised to *quoad sacra* status in 1881. There is a post office.

Dinwoodie, a station in Applegarth parish, Annandale, Dumfriesshire, on the Caledonian railway, 6 miles NNW of Lockerbie. Dinwoodie Hill (871 feet), 1½ mile to the ENE, is crowned with two hill-forts; and on its SE slope is the graveyard of a chapel, said to have belonged to the Knights Templars.

Dionard. See DURNES.

Dippen, an estate, with a mansion, in Saddell parish, E Kintyre, Argyllshire, close to Carradale village.

Dippin, a grandly mural headland on the SE coast of Arran island, Bnteshire, 1¼ mile NE of Kildonan Castle,

and 4 miles S by W of the southern entrance of Lamash Bay. A range of precipice 300 feet high, it rises sheer from the water's edge; is leapt by a brook, in a curve of spray, to the sea; and forms a very conspicuous landmark to mariners.

Dipple, an ancient parish of NE Elginshire, on the left bank of the river Spey, opposite Fochabers. It was united with Essil in 1731 to form Speymouth parish. Its church was dedicated to the Holy Ghost; and at its lychgate stood a small building known as 'The House of the Holy Ghost.' Around this building funeral parties would always bear the corpse, following the course of the sun; nor could they be driven from that practice till the house was demolished.

Dippool Water, a rivulet of Carnwath parish, E Lanarkshire, rising near the Edinburghshire border at an altitude of 1050 feet above sea-level, and running 7½ miles south-south-westward, till it falls into Mouse Water, 2 miles NNW of Carstairs Junction. Its waters contain good store of fine large trout.—*Ord. Sur.*, sh. 23, 1865.

Dirie or **Dirrie More**, a desolate mountain pass in Lochbroom parish, central Ross-shire, on the road from Dingwall to Ullapool. On the watershed between the Atlantic and German Oceans, it attains its maximum altitude (909 feet) near the head of Loch Droma, 16½ miles NW of Garve station, and 3¾ miles SSE of the summit of Ben Dearg (3547 feet).—*Ord. Sur.*, sh. 92, 1881.

Dirleton, a village and a coast parish of N Haddingtonshire. The village stands, towards the middle of the parish, 2¾ miles WSW of North Berwick, and 1½ mile NW of Dirleton station, this being 2½ miles NNE of Drem, under which Dirleton has a post office. One of the prettiest villages in Scotland, it chiefly consists of neat modern cottages, each with its plot of flowers and shrubs, arranged along two sides of a large triangular green, on whose third or south-eastern side the ivy-clad ruins of Dirleton Castle stand amidst gardens of singular beauty, their bowling-green adorned with grand old evergreen oaks. This seems to be the identical stronghold that in 1293 offered a stubborn though fruitless resistance to Anthony Bek, the fighting Bishop of Durham; its ruinous state is due in great measure to the ordnance of Monk and Lambert, who, in 1650, captured it from a garrison of mossstroopers, hanging their captain and two of his followers. The parish church, at the N end of the village, bears date 1661, and, altered and enlarged in 1825, contains 600 sittings. There are also a Free church, an inn, a library, and a public school. Pop. (1861) 354, (1871) 323, (1881) 343, (1891) 313.

The parish, containing also the villages of GULLANE, KINGSTON, and FENTON, is bounded NW and N by the Firth of Forth (here 8¼ miles broad at the narrowest), E by North Berwick, and S by Athelstaneford and Aberlady. Its length, from E to W, varies between 2¼ and 5½ miles; its utmost breadth, from N to S, is 3¾ miles; and its area is 10,798½ acres, of which 1620½ are foreshore and 2 water. The coast-line, 9 miles long, rises almost boldly to 100 feet above sea-level at Eldbottle Wood, but elsewhere is mostly fringed by the flat sandy East, West, and Gullane Links; to the W it is indented by Gullane and Aberlady Bays; and off it to the N lie the three islets, composed of greenstone rock, of Eyebroughy, Fidora, and Lamb. The sluggish PEPPER BURN, tracing the southern boundary, is the only noteworthy rivulet; and inland the surface is very slightly undulated, its highest point (118 feet) occurring on the road to Drem, ¾ mile SSW of the village. The rocks are partly eruptive, partly carboniferous, and including dark-red jasper veins, excellent building sandstone, some coal, and considerable quantities of ironstone. The soil is extremely various—in one part a deep, stiff, alluvial clay, and near the coast stretches of the lightest sand, burrowed by hundreds of rabbits; whilst there is also much deep, free loam, the product of which in summer and autumn presents an appearance of almost unrivalled luxuriance. Fenton Barns, 1¾ mile N by E of Drem, is famous in agricultural annals as the home, till 1873, of George

Hope, Esq. (1811-76), an interesting *Life* of whom, by his daughter, was published in 1881. Sir John Halyburton, slain at the battle of Nisbet in 1355, had wedded the daughter and co-heiress of William De Vaux, lord of Dirleton, and got with her that estate: his grandson, Sir Walter, Lord Treasurer of Scotland, founded a collegiate church at Dirleton in 1446, and six years earlier was created Lord Halyburton of Dirleton—a title forfeited in 1600 by John, third Earl of Gowrie and sixth Lord Ruthven and Dirleton, who won over Logan of Restalrig to his plot by the proffered bribe of the lands and castle of Dirleton. 'I care not,' wrote Logan, 'for all else I have in this kingdom, in case I get grip of Dirleton, for I esteem it the pleasantest dwelling in Scotland.' (See PERTH and FAST Castle.) To-day the Earl of Mar and Kellie bears the title of Baron Dirleton and Viscount Fentoun, conferred in 1603 and 1606 on Sir Thomas Erskine, afterward Earl of Kellie, who with his own hand had slain the Earl of Gowrie; that of Earl of Dirleton was held, from 1646 till his death before 1653, by Sir James Maxwell, who seems, in 1631, to have bought the estate. In 1663 it was once more sold to Sir John Nisbet, who as Lord Advocate bore the title Lord Dirleton, and whose descendant, Mrs Ogilvy, of ARCHERFIELD and BIEL, owns two-thirds of the parish. The extensive common called Gullane Links is well known as a piece of excellent golfing ground. Dirleton is in the presbytery of Haddington and synod of Lothian and Tweeddale; the living is worth £373. Three public schools—Dirleton, Gullane, and Kingston—with respective accommodation for 142, 81, and 120 children, had (1891) an average attendance of 87, 54, and 54, and grants of £75, 2s., £56, 12s. 6d., and £45, 2s. 6d. Valuation (1892) £14,385, 13s. Pop. (1801) 1115, (1831) 1384, (1861) 1540, (1871) 1419, (1881) 1506, (1891) 1445.—*Ord. Sur.*, shs. 33, 41, 1863-57. See vol. ii. of *Billings' Baronial and Ecclesiastical Antiquities (1852)*; also, Ferrier's *Guide to North Ercwick and Vicinity*.

Dirlet Castle, an ancient fortalice in Halkirk parish, Caithness, on a rugged crag above the river Thurso, 15 miles S of Thurso town. It is said to have been the stronghold of a daring freebooter, a kinsman of the Dunrobin Sutherlands, and to have been accessible only by a drawbridge, but is now represented by slight remains.

Dirrie. See DIRIE.

Dirrington, Great and Little, two of the Lammernuir Hills in Longformacus parish, Berwickshire. Great Dirrington culminates 1½ mile SSE of Longformacus hamlet, and has an altitude of 1309 feet above sea-level; and Little Dirrington culminates nearly 1¼ mile further SSW on the boundary with Greenlaw parish, and has an altitude of 1191 feet.

Diru, Loch. See DERRY.

Disblair, an estate, with a mansion, in Fintray parish, Aberdeenshire, 2½ miles WSW of New Machar station.

Distinkhorn, a hill in Galston parish, Ayrshire, 5 furlongs from the Lanarkshire border, and 5¼ miles ESE of Galston village. It has an altitude of 1259 feet above sea-level, and commands a magnificent view.

Ditch Hall, an ancient structure of earth and turf on Inverchadain farm, in Fortingal parish, Perthshire. It is described by Blind Harry; is said to have been Sir William Wallace's resting-place for a few days, and the place where he was joined by the men of Rannoch, on the eve of his march against the English at Dunkeld and Perth; and is still represented by some remains.

Divach, a shooting-lodge in Urquhart and Glenmoriston parish, Inverness-shire, 2½ miles SW of Drumadrochit hotel. Romantically situated between the Coiltie and its affluent, the Allt Coire na Ruighe, with the lofty Divach Falls, it was a favourite residence of John Phillip, R.A. (1817-67), and figures in Shirley Brooks' *Sooner or Later*.

Divie, a rivulet of Cromdale and Edinkillie parishes, Elginshire, rising, at an altitude of 1400 feet, on the E slope of Caru Bad na Caorach (1557 feet), 3 miles SE of Dava station, and thence running 12¼ miles north-north-westward, till, after receiving Dorbock Burn, it

falls, near Relugas, into the river Findhorn. A capital trout stream, strictly preserved, it almost vies with the Findhorn in the wild and varied beauty of its scenery, and is subject to terrific freshets, that of Aug. 1829 doing damage at Dunphail to the extent of £5000. Near Edinkillie church the Divie is spanned by a viaduct of the Highland railway, which, measuring 500 feet in length of masonry, and comprising 315 feet of arching, rises to a maximum height of 170 feet above the ordinary level of the stream. Four battlemented towers command the approaches, which are gained by embankments containing 190,000 cubic yards of material.—*Ord. Sur.*, sh. 84, 1876. See chaps. v.-vii. of Sir Thomas Dick Lauder's *Moray Floods* (Elgin, 1830; 3d ed. 1873).

Dobson's Well, a weak chalybeate spring in Haddington parish, $\frac{1}{2}$ mile W of Haddington town.

Dochart, a loch, a river, and a glen in Killin parish, Perthshire. Lying at the head of the glen, 1 mile E of Crianlarich station, and 512 feet above sea-level, the loch measures 6 by $1\frac{1}{4}$ furlongs, is overhung to the SE by conical BENMORE (3843 feet), and contains a small wooded islet, on which stand the ruins of a castle of the Campbells of Lochawe. At its head it receives the FILLAN, and from its foot sends off the river Dochart, which flows $13\frac{1}{2}$ miles east-north-eastward to the head of Loch Tay (290 feet), in the first $\frac{1}{2}$ mile of its course expanding into Loch Tubhair ($1\frac{1}{2}$ mile \times $2\frac{1}{2}$ furl.; 512 feet), and $\frac{1}{2}$ mile from its mouth being joined by the Lochy. Just above KILLIN, it 'takes up a roaring voice, and beats its way over a rocky descent among large black stones; islands in the middle turning the stream this way and that; the whole course of the river very wide.' Stream and lochs contain salmon and trout, also—unluckily—pike. Glen Dochart, at a point $2\frac{1}{2}$ miles SW of Killin, is joined at right angles from the S by Glen Ogle, and takes up thence, past Loch Dochart, the Callander and Oban railway; along it from W to E are Lochdochart Lodge, LUIB station and hotel, Auchlyne House, and Ardchyle hamlet. For an exquisite picture of loch and river and glen we must recur to Dorothy Wordsworth, who, with her brother, drove from King's House to Luib on Sunday, 4 Sept. 1803:—'We had about eleven miles to travel before we came to our lodging, and had gone five or six, almost always descending, and still in the same vale (Strath Fillan), when we saw a small lake before us, after the vale had made a bending to the left. It was about sunset when we came up to the lake; the afternoon breezes had died away, and the water was in perfect stillness. One grove-like island, with a ruin that stood upon it overshadowed by the trees, was reflected on the water. This building, which, on that beautiful evening, seemed to be wrapped up in religious quiet, we were informed had been raised for defence by some Highland chieftain. All traces of strength, or war, or danger are passed away, and in the mood in which we were we could only look upon it as a place of retirement and peace. The lake is called Loch Dochart. We passed by two others of inferior beauty, and continued to travel along the side of the same river, the Dochart, through an irregular, undetermined vale—poor soil and much waste laud. . . . On Monday we set off again a little after six o'clock—a fine morning—eight miles to Killin—the river Dochart always on our left. The face of the country not very interesting, though not unpleasing, reminding us of some of the vales of the north of England, though meagre, nipped-up, or shrivelled compared with them. Within a mile or two of Killin the land was better cultivated, and, looking down the vale, we had a view of Loch Tay.

. . . We crossed the Dochart by means of three bridges, which make one continued bridge of great length. On an island below the bridge is a gateway with tall pillars, leading to an old burying-ground belonging to some noble family' (pp. 185-187 of *Recollections of a Tour in Scotland*, ed. by Princ. Shairp, 1874). This burying-ground is that of the Macnabs, from whom Glen Dochart was named the Macnab country. It now

is included in the Breadalbane territory, the clan having emigrated to Canada in the first two decades of the present century. Francis, twelfth laird (1734-1816), was an eccentric character, who, in company once with some English gentlemen connected with the Excise, answered a query respecting the state of Glen Dochart with: 'Ther was once a crater callt exciseman sent up to my country, but—they kilt him.'—*Ord. Sur.*, sh. 46, 1872.

Dochfour, a lake in Inverness parish, Inverness-shire, in the Great Glen, 5 miles SW of Inverness town. An expansion of the river Ness, separated by a run of only $\frac{1}{4}$ mile of that river from the foot of Loch Ness, it measures $1\frac{1}{4}$ by $\frac{1}{2}$ mile, and is sometimes called Little Loch Ness. The hills around are beautifully wooded, and a burn that runs into it makes some pretty cascades. Dochfour House, on its western shore, is a mansion in the Venetian style, described by Prince Albert as 'new and very elegant, with a fine garden,' on occasion of his visit here, 16 Sept. 1847. Its owner is James Evan Bruce Baillie, Esq. (b. 1855; suc. 1833).—*Ord. Sur.*, sh. 83, 1881.

Dochgarroch, a hamlet in Inverness parish, Inverness-shire, on the Caledonian Canal, at the foot of Loch Dochfour, $4\frac{1}{2}$ miles SW of Inverness, under which it has a post office. It has a regulating lock on the canal, for averting winter floods of Loch Ness whenever these rise above the standard-level of the navigation; and has also a public school.

Dodburn. See ALLAN, Roxburghshire.

Dod Hill. See WANLOCKHEAN.

Dods-Corse Stone, an ancient cross on Boon farm, in Legerwood parish, Berwickshire, 4 miles ESE of Lauder. It is a sandstone shaft, sunk into a square sandstone block, and is said to have been a market-cross.

Dodside, a hamlet in Mearns parish, SE Renfrewshire, near Newton-Mearns.

Doecleugh, a place on Skelfhill farm, in Teviothead parish, Roxburghshire, 7 miles SSW of Hawick. It has an ancient Caledonian hill-fort, and it adjoins the line of the Catrail.

Dogden, an extensive moss on the mutual border of Greenlaw and Westruther parishes, Berwickshire.

Dogs, Isle of, a tiny wooded island in Loch Laggan, Laggan parish, Inverness-shire, nearly opposite Ardverrick. It is said to have contained the kennel of ancient Scottish kings for their huntings in Lochaber.

Dog's Stone (Gael. *Clach-a-Choin*), a huge isolated conglomerate block on the shore of Oban Bay, Argyllshire, $\frac{2}{3}$ mile NNW of Oban town. With a deeply water-worn base, and an outline somewhat similar to that of an inverted cone, it embeds large fragments and boulders, and seems at one time to have formed part of a high precipitous sea beach. Curious legends are attached to it—that Fingal here tethered his 'blue-eyed hunter' Bran, and that the Lords of Lorn kennelled their hounds beside it at their hunting expeditions with the Lords of the Isles.

Dogton, a farm in Kinglassie parish, Fife, $4\frac{3}{4}$ miles NW of Kirkealdy. It contains an ancient hewn standing stone, $4\frac{3}{4}$ feet high above the socket, and 11 inches thick.

Doine, a lake in Balquhiddier parish, Perthshire, in the upper part of the Balquhiddier vale, $4\frac{1}{2}$ miles W by S of Balquhiddier hamlet. Lying 420 feet above sea-level, it has an utmost length and breadth of $7\frac{1}{2}$ and $2\frac{1}{2}$ furlongs; is overhung steeply to the N by Meall Monachyle (2123 feet); and, by a reach of the river Balvag, $1\frac{1}{2}$ furlong in length, communicates eastward with Loch VOIL, from which it is separated by only a low patch of haugh, that in times of freshet is sometimes overflowed.—*Ord. Sur.*, sh. 46, 1872.

Doll, a glen in the NW of Cortachy and Clova parish, Forfarshire, near the meeting-point with Perth and Aberdeen shires. It is traversed by the White Water, running $6\frac{1}{2}$ miles east-south-eastward to the river South Esk, at a point 3 miles WNW of Clova hamlet; and it is remarkable for the variety of its flora and for an overhanging rock, the Scorie of the Doll.—*Ord. Sur.*, sh. 65, 1870.

Dollar (Celt. *dal-aird*, 'vale amid the hills'), a police burgh and a parish of Clackmannanshire. The town stands at the foot of the Ochils, 180 feet above sea-level, and 5 furlongs N of the right bank of the Devon; and by the Devon Valley section (1851-71) of the North British it is $6\frac{1}{2}$ miles NE by E of Alloa, 9 NE of Clackmannan, $12\frac{3}{4}$ ENE of Stirling, and $10\frac{1}{2}$ WSW of Kinross. Traversed by Dollar Burn, whose glen, followed upwards, leads to the noble ruins of **CASTLE-CAMPELL**, it has been greatly improved and extended in recent years, and presents a pleasant picturesque appearance; at it are a post office, with money order, savings bank, and telegraph departments, a branch of the Clydesdale Bank, the Castle-Campbell hotel, gas-works, the Dollar club, a working men's reading-room, a bleachfield (1787), brick and tile works, a cemetery, a literary and scientific society, a musical association, Young Men's and Young Women's Christian Associations, Athenæum, Academy Club, a water-supply association, bowling and curling clubs, etc. Fairs are held on the second Monday in May and the third Monday in October. The town is governed by a chief magistrate and 8 commissioners. It is thoroughly drained, the sewage being utilized on the fields to the south of the town. Places of worship are the parish church (1841; 700 sittings), an imposing Gothic structure, with a conspicuous tower; a neat Free church (1858; 600 sittings); a U.P. church (1876; 360 sittings), built at a cost of £4500, and adorned with a spire 70 feet high; and the new Episcopal church of St James the Greater (1882), Early English in style, with apsidal chancel, 7 rose windows, 8 lancets, etc. John M'Nab (1732-1802), a Dollar herd-boy, who as a sea-captain had risen to wealth and settled at Mile-end, London, left one-half (£90,000) of his fortune, 'for the endowment of a charity or school for the poor of the parish of Dollar.' With this bequest was founded in 1818 Dollar Institution or Academy, which is now administered by 12 governors under a scheme issued by the Commissioners appointed under the Educational Endowments (Scotland) Act, 1882. It has a principal, a lady superintendent, and 20 other teachers, and gives instruction in classics, French, German, English, history, mathematics, mechanics, science, drawing, singing, and other branches of a liberal education. There are 32 school bursaries of £5 each, tenable for four years, and 3 university or technical school bursaries of £30 each, tenable for three years. The building, erected in 1819 after designs by W. Playfair, of Edinburgh, and greatly extended in 1867, is a Grecian edifice, 186 feet long and 63 wide, with a hexastyle portico; a dome, upborne by fluted columns; a library, 45 feet square and 45 high, containing over 6000 volumes; a splendid upper hall, 60 feet long, 42 wide, and 24 high; and a well-kept garden of 5 acres. The Institution has drawn, on the one hand, many families to Dollar; and, on the other, a number of its scholars board with the principal or under masters: its former *alumni* include a goodly list of distinguished ministers, engineers, merchants, and others. A public school, with accommodation for 414 children, had (1891) an average attendance of 198, and a grant of £200, 8s. 6d. Pop. of town (1841) 1131, (1851) 1079, (1861) 1540, (1871) 2090, (1881) 2114, (1891) 1807.

The parish, containing also Sheardale village, $1\frac{1}{2}$ mile to the SSW, is bounded NW by Blackford, and N by Glendevon, in Perthshire; E by Muckhart and Fossoway; S by Clackmannan; and W by Tillicoultry. Its utmost length, from N to S, is $3\frac{3}{4}$ miles; its breadth, from E to W, varies between $1\frac{3}{4}$ and $3\frac{1}{4}$ miles; and its area is $4795\frac{1}{2}$ acres, of which 22 are water. The DEVON, entering from Muckhart, winds $3\frac{3}{4}$ miles westward, across the southern interior and on or close to the Tillicoultry border, and receives on the way Dollar Burn, which, itself hurrying $1\frac{1}{2}$ mile south-by-eastward past the town, is formed just below Castle-Campbell by the Burns of Sorrow and Care, running $2\frac{1}{2}$ miles east-south-eastward, and $1\frac{1}{4}$ mile south-south-eastward and southward, from the northern confines of the parish. Westward along the Devon the surface declines to close

upon 50 feet above sea-level, thence rising southward to 353 feet near Sheardale, and northward to 538 near Hillfoot House, 2111 at KINGSEAT on the western border, and 2110 at Whitewisp Hill in the N—smooth summits these of the green pastoral Ochils, that command magnificent views. A spongy morass, Maddy Moss, on the NW border, lying at an altitude of from 1500 to 1750 feet, and covering upwards of 150 acres, occasionally bursts its barrier, and sends down a muddy torrent, by the Burn of Sorrow, to the Devon. The rocks of the hills are eruptive, those of the valley carboniferous. Coal, iron, and sandstone are plentiful; copper and lead were formerly wrought in the Ochils, a little above the town; and beautiful agates have been found on the top of Whitewisp; whilst a chalybeate spring, powerfully astringent and of medicinal efficacy both externally and internally, was discovered in 1830 at Vicar's Bridge. The soil is argillaceous along the Devon, and on the lands thence to the hills is light and gravelly—about 1740 acres being either arable or grass land, 230 under wood, and all the rest either hill-pasture or waste. In 877 the Danes, expelled by the Norwegians from Ireland, entered the Firth of Clyde, and, passing through the region watered by the Teith and Forth, attacked the province of Fife. A battle fought by them at Dollar went against the Scots, who, fleeing north-eastward to Inverdovet in Forgan, were there a second time routed, King Constantin mac Kenneth being among the multitude of the slain (Skene's *Celtic Scotland*, i. 327, 1876). The other chief episode in Dollar's history is the burning of its vicar, Thomas Forres, for heresy, at Edinburgh, in 1538. Previous to 1807 the greater part of the parish was held by the Argyll family, but in that year all that belonged to Argyll passed into other hands. Dollar is in the presbytery of Stirling and synod of Perth and Stirling; the living is worth £185. Valuation (1892) £12,107, 8s. 4d. Pop. (1871) 2524, (1881) 2500, (1891) 2221; of *g.s.* parish (1891) 2176.—*Ord. Sur.*, sh. 39, 1867.

Dollar Law, a mountain on the mutual border of Manor and Drummelzier parishes, Peeblesshire, $4\frac{1}{2}$ miles SE of Drummelzier village, and $9\frac{1}{2}$ miles SW by S of Peebles. Rising 2680 feet above sea-level, it commands a view over the Lothians, and away over Berwickshire, to Northumberland.

Dollars, an estate, with a mansion, in Riccarton parish, Ayrshire, on the left bank of Cessnock Water, $4\frac{1}{4}$ miles SE of Kilmarnock.

Dollas. See DALLAS.

Dollerie, a mansion in Madderty parish, Perthshire, $2\frac{1}{2}$ miles E by S of Crieff.

Dolls. See GLENCHIL.

Dolphingston, a hamlet in Prestonpans parish, Haddingtonshire, $1\frac{1}{2}$ mile W of Tranent. It contains several broken walls and gables, evidently of great antiquity, and probably monastic.

Dolphinton, a post-office hamlet and a parish on the eastern border of the upper ward of Lanarkshire. The hamlet stands 7 furlongs SSW of Dolphinton station, which, as the junction of two branches of the Caledonian and North British, is 11 miles E by N of Carstairs, 10 WSW of Leadburn, and $27\frac{1}{2}$ SW of Edinburgh.

The parish is bounded NE and E by Linton, and SE by Kirkurd, in Peeblesshire, SW by Walston; and NW by Dunsyre. In shape a triangle, with southward apex, it has an utmost length from N by E to S by W of $3\frac{3}{4}$ miles, an utmost breadth from E to W of $2\frac{1}{4}$ miles, and an area of $3581\frac{1}{2}$ acres, of which $7\frac{1}{2}$ are water. The drainage belongs partly to the Clyde, partly to the Tweed, inasmuch as South MEDWIN Water runs $2\frac{1}{2}$ miles south-westward along all the boundary with Dunsyre, TARTH Water 1 mile southward along that with Linton; and Black Burn, rising in the S of the parish, flows 3 miles north-eastward to the TARTH through the interior. In the W along the Medwin the surface declines to a little more, in the E along the TARTH to a little less, than 700 feet above sea-level; and the 'divide' between the two river systems is marked by White Hill (1437 feet) and BLACK MOUNT (1689). The rocks, over nine-tenths of the entire area, are eruptive; the soil, in most parts, is

a dry friable earth or sandy loam. More than 300 acres are under wood, and about 250 acres of the uplands might be profitably reclaimed. The manor belonged in the former half of the 12th century to Dolfine, elder brother of the first Earl of Dunbar, after whom it received its name; subsequently it became a pertinent of BOTHWELL, and shared long in the fortunes of that barony. Major Learmont, who commanded the Covenanting horse at the battle of Rullion Green (1666), and long lay in hiding from pursuit by the authorities, held the property of Newholm, and was interred in Dolphinton churchyard; William Leechman, D.D. (1706-85), professor of theology in Glasgow university, was son of a Dolphinton farmer; and Dr Aiton, author of interesting works on Palestine, was minister, and wrote the article 'Dolphinton' for the *New Statistical Account*. Dolphinton House, a little W of the village, is the seat of John Ord Mackenzie, Esq., W.S. (b. 1811; suc. 1850), who owns 3027 acres, valued at £2262 per annum. This parish is in the presbytery of Biggar and synod of Lothian and Tweeddale; the living is worth £178. The church is old, and contains 140 sittings; whilst a public school, with accommodation for 83 children, had (1891) an average attendance of 57, and a grant of £66, 19s. 6d. Valuation £3464, 4s. Pop. (1801) 231, (1831) 302, (1861) 260, (1871) 231, (1881) 292, (1891) 248.—*Ord. Sur.*, sh. 24, 1864.

Dolphinston, a farm in Oxnam parish, Roxburghshire, near the right bank of Jed Water, $4\frac{3}{4}$ miles SSE of Jedburgh. Its curious old Border fortalice, now demolished, was the haunt of a brownie, till, hurt by the offer of a coarse linen shirt, he departed, and in departing sang—

'Sin' ye've gien me a harden ramp,
Nae mair o' your corn I will tramp.'

Don, a river of S Aberdeenshire, that forms a sort of twin stream to the Dee, ranking next thereto among Aberdeenshire rivers as regards at once basin, magnitude, and notability, and possessing like it much volume of water and much fine scenery, with very little commercial importance. Yet the Don differs essentially from the Dee in some great characters and even presents some striking contrasts. It rises, as a small mossy stream, $1\frac{1}{2}$ mile SSW of Meikle Geal Charn (2333 feet), close to the Banffshire border, and within a mile of the river Aven; and thence winds eastward in a direction somewhat parallel to the Dee, at a mean distance of about 9 miles to the N, but through a country much less mountainous, and abounding far more in plains and meadows. With little or none of the impetuosity or fitfulness of the Dee, it displays a prevailing current of gentleness, calmness, and regularity, and, making great loops and bends now to the right, now to the left, it falls at last into the German Ocean, 1 mile NE of Old Aberdeen, and $2\frac{1}{2}$ miles N of the mouth of the Dee. From source to mouth it has a total length, following its windings, of $82\frac{1}{4}$ miles, viz., $20\frac{1}{2}$ to Castle-Newe bridge, $42\frac{3}{8}$ thence to the Ury's influx, and $19\frac{1}{4}$ thence to the sea. And from 1980 feet above sea-level at its source, it descends to 1320 at Cock Bridge near Corgariff Castle, 900 near Castle-Newe, 450 near Alford, and 170 at the mouth of the Ury. Its chief tributaries are the Conrie, the Carvie, and the Leochel on the right bank, and the Ernan, the Nocht, the Buckat, the Kindy, and the Ury on the left. The parishes traversed or bounded by it are Strathdon, Tarland, Glenbucket, Kildrumny, Towie, Leochel, Auchindoir, Alford, Tullynessle, Keig, Tough, Monymusk, Oyne, Chapel of Garioch, Kemnay, Inverurie, Kiutore, Keithhall, Fintray, Kinnellar, Dyce, New Machar, Newhills, and Old Machar; and in our articles on these parishes details will be found as to the villages, seats, etc., along its banks.

The river's course, from the head of Strathdon to the upper part of Alford, lies chiefly along a series of glens; contracts then, for a short distance, into a narrow gullet; but opens presently into a considerable vale, with great expanses of meadowland on the immediate banks; and lastly, from the New Bridge of Old Aberdeen to the sea, is a narrow artificial channel. Its original mouth is

presumed to have been identical with that of the Dee; was afterwards at a point nearly midway between the Dee's and its own present mouth; and was diverted to its present situation by the cutting of an artificial channel for its lower reach, about the year 1750, under the direction of Professor James Gregory. The river is subject to great freshets; swept away, in the autumn of 1768, the greater part of the crops on the haughs and level lands adjacent to its bed; made similar devastation in Aug. 1799; rose, on 4 Aug. 1829, to a height of 14 feet above its ordinary level; and is now prevented from working similar havoc only by extensive embankments in the parts of its course most subject to inundation. It is one of the best trouting streams in Scotland (especially in its upper waters), and has some valuable salmon fishings. Pike are fortunately few. Trout, ranging from 5 to 10 lbs. in weight, are frequently got in the stake nets along the coast, but are rarely captured in the river. In the upper part of the water good sport with salmon is sometimes enjoyed in the autumn. Finnocks or whiting are very plentiful in spring and autumn. Almost every season grilse enter the Don somewhat earlier than the Dee, but they are all, or nearly all, netted. The net fishings of the Don are valuable, though not to the same extent as those of the Dee. The length of the fishery is about a mile and a quarter, and the city of Aberdeen from the further end is nearly a similar distance.—*Ord. Sur.*, shs. 75, 76, 77, 1876-78. See chap. xxii. of Sir Thomas Dick Lauder's *Moray Floods* (Elgin, 1830; 3d ed. 1873).

Don, a sea-loch in the E of Mull island, Argyllshire, opposite the middle of Kerrera. Striking $2\frac{1}{2}$ miles north-westward, and nowhere exceeding 1 mile in width, it has, at the E side of its mouth, the hamlet of ACHNACRAIG.

Donald's Cleuch, a *cul de sac* in the SE of Tweedsmuir parish, Peeblesshire, striking off from Gameshope Buru to Donald's Cleuch Head (2616 feet) on the Dumfriesshire border. It is thought to have got its name from being a retreat of the famous Covenanter, Donald Cargill.

Donan, a small island at the SW corner of Ross-shire, in Loch Alsh, at the point where that sea-loch forks into Lochs Long and Duich.

Donan Castle. See CASTLE-DONNAN.

Donavoured, an estate, with a mansion, in Logierait parish, Perthshire, near the left bank of the Tay, 2 miles SE of Pitlochry.

Don, Bridge of, a suburb of Aberdeen, in Old Machar parish, Aberdeenshire, on the river Don, a little to the N of Aberdeen, under which it has a post office.

Donibristle, an estate, with a mansion, in Dalgety parish, Fife, on the Firth of Forth, 3 miles WSW of Aberdour. Long the property of the abbots of INCHCOLM, it was granted along with the other possessions of that abbey to Sir James Stuart, Lord Doune, whose son and namesake, the 'Bonny Earl of Moray,' was slain here by Gordon of Cluny and the Earl of Huntly on 7 Feb. 1592—an episode that forms the theme of a fine old ballad. The mansion of Donibristle has thrice been burned, on the last occasion in 1858, when a number of valuable portraits perished in the flames.

Donibristle Colliery, a village, with a public school, in Aberdour parish, Fife, 2 miles ESE of Crossgates, under which it has a post office, with money order, savings bank, and telegraph departments. Pop. (1881) 502, (1891) 618.

Doon, a steep round hill (945 feet) in Tynron parish, Dumfriesshire, terminating the SE end of a hill-range between Scar and Shinnel Waters, 4 miles WSW of Thornhill. It seems anciently to have been thickly clothed with forest, and was crowned at an early period by some kind of fortalice or habitation, which is said to have been a retreat of Robert Bruce, after his slaying the Red Comyn at Dumfries.

Doon, a long hill of considerable height (582 feet), the outmost spur of the Lammermuirs, in Spott parish, Haddingtonshire, $2\frac{1}{2}$ miles S by E of Dunbar. On its top and slope lay David Leslie's Scotch army, 23,000 strong, the two first days of September 1650, the third being that of the Battle of DUNBAR.

Doon, a loch partly in Kirkcudbrightshire, but chiefly in Ayrshire, and a river dividing the Ayrshire districts of Carrick and Kyle. Lying 680 feet above sea-level, the loch extends 5½ miles north-by-eastward and north-westward to within 3 miles of Dalmellington town, and varies in width between 2 and 6½ furlongs. It receives, at its head, Gala and Carrick Lanes, discharging the effluence of Lochs Enoch, Macaterick, and Riecaur; on its western side, is joined by Garpel Burn, flowing out of Loch Finlas; and, at its foot, sends off the river Doon. Its surface is studded with five little islands or groups of islands, viz., from S to N, Pickinaw Isles, Castle Island, Saugh Island, Garpel Islands, and Gordon's Island, on the second of which is a ruined octagonal tower—'Balliol's Castle.' By Chalmers this was identified with Laignt Alpin, the scene of the death of King Alpin of Dalriada in 741, which Skene, however, places on the eastern shore of Loch Ryan; by Tytler it is said to have been basely yielded to the English in 1306, when Seaton, its lord, who had married a sister of Bruce, was carried to Dumfries and executed. In 1826, nine ancient canoes, hollowed each from a single oak tree, and from 16½ to 22½ feet long, were found sunk in the loch near this islet. Boats are kept, and trout and char are fairly plentiful. 'Viewed from a distant eminence,' says Mr Harper, 'Loch Doon has more the appearance of a river than a lake. It is surrounded by lofty hills (1000 to 2000 feet in height) on both the Carsphairn or Galloway and the Straiton or Carrick side, the Gallowegian being green and grassy, excellent for sheep pasture, to which they are almost entirely devoted. Those on the Carrick side are wild and solitary, with nought but rocks and heather. By tunnels, which have been formed to prevent the lake, when swollen by heavy rains, from overflowing the extensive tracts of meadow-land along the banks of the river, its waters have been lowered considerably from their original level, and the exposure of tracts of barren sand, gravel, and stone on its banks, detracts considerably from its beauty' (*Rambles in Galloway*, 1876).

The river Doon, emerging by these two tunnels, cut out of the solid rock, rushes impetuously into Ness Glen, a romantic wooded gorge some 30 feet wide, 300 deep, and 1 mile long; expands next into Bogton Loch (6 × 2½ furl.), in the vicinity of Dalmellington; and thence winds north-westward, past Waterside, Patna, Dalrymple, Cassillis House, Auchendrane House, and Alloway, till, after a total course of 26½ miles, it falls into the Firth of Clyde, 1½ mile S by W of Ayr. Its tributaries are numerous, but small. The parishes, on its left bank, are Straiton, Kirkmichael, and Maybole; on its right, Dalmellington, Dalrymple, and Ayr or Alloway. For the first 3 miles below Bogton Loch the Doon's right bank is fringed by the crescent-shaped vale of Dalmellington; for the next 5, on either side rise treeless, heathy knolls, or tame, uninteresting hills; but thence, right onward to the sea, the stream has channelled out a mighty furrow, 10 to 200 feet deep, and 30 to 150 yards wide at the top, its bosky sides—

'the bonnie winding banks
Where Doon rins, wimplin, clear.'

'Naebody sings the Doon,' thus Burns complained in 1785; but Burns himself atoned for the neglect, so that its 'Banks and Braes,' the Downans of Cassillis, and auld Kirk-Alloway 'shine wi' the best' now, even with Tweed and Yarrow. Its waters contain good store of trout, sea-trout, and salmon; and large pike lurk in its more sluggish pools.—*Ord. Sur.*, shs. 8, 14, 1863.

Doon Hill. See DOON.

Doonholm, a mansion in Ayr parish, Ayrshire, on the right bank of the Doon, 3 miles S of the town of Ayr. It is the seat of the judge, Colin Blackburn, P.C. (b. 1813), who in 1876 received a life-peerage as Baron Blackburn of Killearn, and who holds 154 acres in the shire, valued at £344 per annum.

Doonside, an estate, with a mansion, and with vestiges of an ancient castle, in Maybole parish, Ayrshire, on the left bank of the Doon, 3 miles S of Ayr.

Dorary, an isolated hilly pendicle of Halkirk parish, Caithness (transferred from Thurso parish in 1891), 4½ miles SSW of the main body of Thurso parish. It belonged to the Bishops of Caithness; it has remains of an ancient chapel, called Gavin's Kirk or Temple Gavin; and it commands a very grand and extensive view.

Dorback Burn. See ABERNETTY, Inverness-shire.

Dorbock, a picturesque rivulet of Edinkillie parish, Elginshire, issuing from LOCHINDORB (969 feet), and running 8½ miles north-north-eastward along the Cromdale border and through the interior, till, ½ mile S of Dunphail House, it falls into the DIVIE, like which it wrought great havoc in the August floods of 1829.—*Ord. Sur.*, sh. 84, 1876.

Doreholm, an islet of Northmaven parish, Shetland, on the N side of St Magnus Bay, 1½ mile ESE of the south-western extremity of Northmaven mainland. It rises rockily and massively from the water, and is pierced by a natural arch or tunnel, 54 feet high, lighted by an opening at the top, and permitting boatmen to fish under it.

Dores. See KETTINS.

Dores, a village and a parish of NE Inverness-shire. The village stands on the eastern shore of Loch Ness, towards its foot, 7 miles SSW of Inverness, under which it has a post office; at it are a small inn and a steam-boat pier.

The parish is bounded NE by Inverness, SE by Daviot-Dunlichity, SW by Boleskine-Abertarf, and NW by Loch Ness and Inverness. Its land area is now 24,697 acres, as in 1891 the Boundary Commissioners transferred to it the Farraline detached part of Boleskine-Abertarf (1369 acres), and gave to that parish the Dell and Killin detached parts of Dores parish (1927 and 438 acres respectively). The river FARRIGAIG, entering from Daviot, and winding 6½ miles north-north-westward and south-westward to Loch Ness at the south-western corner of the parish, is the only considerable stream; and the eastern half of the lower 10½ miles of Loch Ness belong to Dores. Other lakes, with utmost length and breadth and altitude, are Lochs BUNACHTON (½ × ½ mile, 701 feet), DUNDELCHACK (3¾ miles × 1 mile, 702 feet), and RUTHVEN (2½ miles × 4½ furl., 700 feet), on the Daviot border; Loch FARRALINE (9 × 2½ furl., 650 feet), on the Boleskine-Abertarf border; and, in the interior, Loch ASHEY (1½ mile × 3½ furl., 716 feet), Lochan nan cun Ruadha (3¾ × 2 furl., 750 feet), Loch Ceo-Glas (7 × 1 furl., 760 feet), and eight smaller ones. Except for the narrow strip along Loch Ness, traversed by Wade's military road, which ranges in altitude between 56 and 106 feet above sea-level, for Strath Dores, and for a portion of Stratherrick, the surface everywhere is hilly or mountainous, elevations from NNE to SSW being Drumashie Moor (776 feet), Creag a' Chlachain (1000), Ashie Moor (790), Tom Baigean (1514), Carn an Fheadain (1445), and Cairn Ardochy (1116). Most of the land is suited only for sheep-pasture, the light arable soils lying chiefly along the bottom of the valleys, but with patches here and there among the hills. The rocks are mainly granitic; and woods and plantations cover a considerable area, especially along the shore of Loch Ness. Vestiges of an ancient fort, supposed to be Scandinavian, and called Dun-Richnan or the Castle of the King of the Ocean, are at the head of Loch Ashey, 1½ mile SE of the village; and several cairns a little to the E, one of them almost equal in size to all the rest, are fabled to commemorate a victory won by Fingal over Ashi, the son of a Norwegian king, and give the name of Drumashie ('Ashi's ridge') to their site. ALDOURIE Castle is the principal mansion; and 3 proprietors hold each an annual value of £500 and upwards, 4 of between £100 and £500. Dores is in the presbytery of Inverness and synod of Moray; the living is worth £170. The parish church, at the village, was built in 1828, and contains 500 sittings. A preaching-station is at Torness, in Stratherrick, 6 miles S of the village; and a Free church for Dores and Bona stands 1½ mile NNE of the same; whilst three public schools—Aldourie, Bunchrbin, and Stratherrick—with respective accom-

modation for 125, 80, and 110 children, had (1891) an average attendance of 62, 25, and 47, and grants of £88, 7s., £40, 2s., and £64, 10s. 6d. Pop. (1801) 1313, (1831) 1736, (1861) 1506, (1871) 1401, (1881) 1148, (1891) 932.—*Ord. Sur.*, shs. 73, 83, 1873-81.

Dormont, an estate, with a mansion, in Dalton parish, Dumfriesshire. The mansion, standing on the right bank of the Annan, 6 miles SSW of Lockerbie, was built in 1823, and is an elegant edifice, amid charming grounds; its owner, F. J. Carruthers, Esq. (b. 1868; suc. 1878), holds 6355 acres in the shire, valued at £4698 per annum.

Dormont, a small vale in Hounam parish, Roxburghshire.

Dornadilla, an ancient 'dun' or tower in Durness parish, Sutherland, in Strathmore, near the S base of Ben Hope. Traditionally said to have been built by a Scottish king, to serve as a hunting seat, it is now reduced to a fragment, which, 16 feet high and 150 feet in circumference, consists of two concentric walls of slaty stones.

Dornal, a loch on the mutual border of Colmonell parish, S Ayrshire, and Penninghame parish, NE Wigtownshire, 5½ miles SE of Barrhill station. Lying 380 feet above sea-level, it is 5 furlongs long from E to W; varies in width between 1 and 4½ furlongs; is studded with six or seven tiny islets; contains pike and trout, the latter of from ½ lb. to 5 or 6 lbs. weight; and sends off Carrick Burn, running 2¼ miles eastward to the Cree, at a point 2 miles W by S of Bargrennan.—*Ord. Sur.*, sh. 8, 1863.

Dornie, a fishing village in Kintail parish, Ross-shire, at the head of Loch Alsh, where it branches into Lochs Long and Duich, 7½ miles S of Stromie Ferry, under which it has a post office. It contains some good houses, a mission church, a R.C. chapel, public and R.C. schools, and a ferry across the outlet of Loch Long.

Dornoch, a coast town and parish of SE Sutherland. The capital of the county, and a royal and parliamentary burgh, the town is 8½ miles N by E of Tain *viâ* Meikle Ferry, 14½ E of Bonar-Bridge station, and 7 SSE of the Mound station, with which it communicates daily by mail gig, and which itself is 20½ miles SW of Helmsdale, 23 ENE of Bonar-Bridge, 80½ NNE of Inverness, 272½ NNW of Edinburgh, and 289 NNE of Glasgow. 'Close outside the town,' says Worsaae, 'there stands the Earl's Cross, a stone pillar in an open field, which is simply the remains of one of those market-crosses, so often erected in pre-Reformation times. As a matter of course, the arms of the Earls of Sutherland are carved on one side of the stone, and on the other are the arms of the town—a horseshoe. Tradition, however, will

been adopted in the arms of the town in memory of this feat;' and the name *Dornoch* is popularly derived from the Gaelic *dorn-eich*, 'a horse's hoof,' though *dor-n-ach*, 'field between two waters,' is a far more probable etymon. Be this as it may, Dornoch, to quote Professor J. S. Blackie, who wandered hither in the autumn of 1881, is 'an old-fashioned, outlying, outlandish grey nest, to which no stranger ever thinks of going except the sheriff of the county, and he only half a stranger; . . . an interesting old town, with a splendid

beach for bathing, a fresh, breezy, and dry atmosphere, and a golfing ground second to none in Scotland.' Of the last, indeed, Sir Robert Gordon wrote in 1630 that 'about this town, along the sea coast, there are the fairest and largest liukes or green fields of any part of Scotland, fitt for archery, goffing, ryding, and all other exercise; they doe surpass the feilds of Montrose or St Andrews.' The town itself—no more than a village really—consists of wide regular streets, and has a post office, with money order, savings' bank, and telegraph departments, branches of the Caledonian and Town and County Banks, hotels, a newsroom, a public library, and a lifeboat. The see of Caithness, first heard of about 1130, had here its principal church, dedicated to St Bar or Finbar; by Bishop Gilbert de Moravia (1222-45) this church was organised as the cathedral of the Virgin Mary, with a chapter of ten canons, a dean, precentor, chancellor, treasurer, and archdeacon; and, as rebuilt by him, in the First Pointed style, it consisted of an aisled nave, transept, choir, and massive central tower, topped with a dwarfish spire. The tower is all that remains of St Gilbert's work, since in 1570 the cathedral was burned by John Sinclair, Master of Caithness, and Iye Mackay of Strathnaver, who, taking advantage of the minority of Alexander, twelfth Earl of Sutherland, besieged and plundered Dornoch with a small army from Caithness. Fortunately the tower escaped, and with it some fine Gothic arches, which latter, however, fell before the terrific gale of 5 Nov. 1605—the day on which the Gunpowder Plot was discovered. In 1614 the thirteenth Earl of Sutherland partially repaired the cathedral, to make it available for parish church; and in 1835-37 it was rebuilt by the Duchess of Sutherland at a cost of £6000. The present fabric, containing 1000 sittings, is a mixture of Gothic and Vandalism, and measures 126 feet by 92 across the transepts. In the southern transept lie sixteen of the Earls of Sutherland; in the northern is a stone sarcophagus, removed from the choir, and surmounted by a cross-legged effigy of either the founder or the founder's brother, Sir Richard de Moravia; and the choir, now mausoleum of the Sutherland family, is graced by a fine marble full-length statue of the first Duke (1758-1833) by Chantrey, with a large tablet behind, recording the lineage and virtues of his Duchess-Countess (1765-1839). An old tower, fronting the cathedral, represents the Bishop's Palace, which, also burned in 1570, lay in ruins till 1813, when part of it was fitted up as the county courthouse and gaol. Subsequently the whole was removed, excepting this western tower, lofty and picturesque; and on the site thus cleared were built the large and handsome County Buildings, comprising courthouse, prison, record-room, and county meeting-room. The prison was discontinued in 1880, that of Dingwall taking its place; and in 1831 the ancient tower was refitted and refurbished as a quaint dwelling-place for English sportsmen. Of a monastery of Trinity Friars, alleged by Gordon to have been founded here between 1270 and 1280, not even a vestige remains. Besides the Cathedral, now used as the parish church, there is also a Free church; and a public school, with accommodation for 184 children, had (1891) an average attendance of 132, and a grant of £201, 12s. 6d. Erected into a free royal burgh and port by Charles I. in 1623, Dornoch is governed by a provost, 2 bailies, a dean of guild, a treasurer, and 4 councillors; with Wick, Tain, Dingwall, Cromarty, and Kirkwall it returns one member to parliament. The parliamentary constituency numbered 92 and the municipal 125 in 1891, when the annual value of real property was £1684.

Seal of Dornoch.

have it that the pillar was reared in memory of a battle, fought towards the middle of the 13th century by an Earl of Sutherland against the Danes. In the heat of the fray, while the Earl was engaged in hand-to-hand combat with the Danish chief, his sword broke; but in this desperate strait, he was lucky enough to lay hold of a horseshoe (the whole leg of a horse, say some) that accidentally lay near him, with which he succeeded in killing his antagonist. The horseshoe is said to have

Pop. (1831) 504, (1841) 451, (1851) 599, (1861) 647, (1871) 625, (1881) 497, (1891) 514.

The parish contains also the villages of Clashmore and Embo, $3\frac{3}{4}$ miles W, and $2\frac{1}{2}$ NNE, of the town. It had a detached part lying to the N of the parish. This part, situated at Kinnauld, immediately to the E of Rogart railway station, contained 725 acres, and was bounded on the E by the parish of Golspie and elsewhere by the parish of Rogart. The Boundary Commissioners in 1891 transferred this detached part of Dornoch parish to the parish of Rogart, but gave to Dornoch in return an area which embraces nearly the whole of that part of Rogart which lies to the S of the watershed between Strath Fleet on the N and Strath Carnach (including Strath Tollie) on the S. The FLEET flows 2 miles east-south-eastward along the Golspie border to the head of salt-water Loch Fleet, which, $3\frac{1}{4}$ miles long and from $1\frac{1}{4}$ furlong to $1\frac{1}{2}$ mile wide, opens beyond Little Ferry to Dornoch Firth; the CAIRNAIG, issuing from Loch Buie, runs $6\frac{1}{2}$ miles east-by-northward to the Fleet through the north-western interior; and the EVELIX winds $5\frac{1}{2}$ miles east-south-eastward along the boundary with Creich, then $7\frac{1}{2}$ miles east-south-eastward and west-south-westward to Dornoch Firth at Meikle Ferry. The seaboard, 12 miles long, is low and flat, fringed to the S by Cuthill and Dornoch sands and links, to the E by Embo and Coul links; inland the surface rises west-north-westward to 261 feet near Asdale, 700 at Creag Asdale, 290 near Poles, 326 near Achavandra, 700 at Creag Amall, 930 at Creag Liath, 1000 at Meall nan Eun, 898 at Cnoc na Feadaige, 1048 at Meall a' Chaorunn, and 1144 at Beinn Donuill. The rocks are Secondary—for the most part sandstone, which has been largely quarried; and coal occurs at Clashmore. The soil is clayey inland and sandy near the sea, with an irregular belt of black loam intervening. In Littleton, within the burgh, is the spot where in 1722 an old woman was burned for transforming her daughter into a pony and getting her shod by the devil—the last judicial execution this for witchcraft in Scotland. Modern SKIBO Castle, successor to that in which the great Marquis of Montrose was temporarily confined after his capture in ASSYNT, is the principal mansion. Dornoch is the seat of a presbytery in the synod of Sutherland and Caithness; the living is worth £336. Balvraid, Embo, Rearquhar, and Skibo schools, all of them public but the last, with respective accommodation for 80, 110, 100, and 82 children, had (1891) an average attendance of 40, 115, 45, and 24, and grants of £60, 9s., £108, 13s., £44, 6s. 6d., and £36, 5s. 6d. Pop. (1801) 2362, (1831) 3380, (1861) 2885, (1871) 2764, (1881) 2525, (1891) 2404.—*Ord. Sur.*, shs. 103, 94, 102, 1878-81.

The presbytery of Dornoch comprehends the old parishes of Assynt, Clyne, Creich, Dornoch, Golspie, Kildonan, Lairg, Loth, and Rogart, and the *quoad sacra* parish of Stoer. Pop. (1881) 15,998, (1891) 14,852, of whom 316 were communicants of the Church of Scotland. The Free Church also has a presbytery of Dornoch, with churches at Assynt, Clyne, Creich, Dornoch, Golspie, Helmsdale, Lairg, Rogart, Rosehall, and Stoer, and preaching-stations at Kildonan and Shinness, of which the ten first had together 4808 members and adherents in 1891.

Dornoch, Firth of, the estuary of the river Oikel. Commencing at Bonar-Bridge, at the SE end of the Kyle of Sutherland, it extends $9\frac{1}{4}$ miles east-south-eastward to Meikle Ferry, and thence 13 miles east-north-eastward till it merges with the North Sea at a line between Tarbat Ness and Brora. It has a varying width of $7\frac{1}{2}$ furlongs above Wester Fearn Point, $2\frac{1}{4}$ furlongs at the Point itself, $1\frac{1}{4}$ mile below Easter Fearn, $3\frac{1}{2}$ furlongs at Ardmore point, $2\frac{1}{4}$ miles at Edderton, $5\frac{1}{2}$ furlongs at Meikle Ferry, $3\frac{3}{4}$ miles at Tain, $1\frac{1}{2}$ mile at the SE corner of Dornoch parish, and $10\frac{1}{2}$ miles from Brora to Tarbat Ness. A shoal across it 3 miles below Tain, called Geyzen Briggs from occasioning a tumultuous roar of breakers, forms a great obstruction to navigation, yet is not so continuous as to hinder vessels, under direction of a pilot, from safely passing. The N side of the firth,

between that bar and Meikle Ferry, offers some harbourage for small vessels in calm weather; and Cambuscurrie Bay, immediately above Meikle Ferry, forms an excellent roadstead, where vessels of considerable burden can lie at anchor, and where good harbour accommodation could easily be provided. The Great North Road, with nexus at Meikle Ferry, was formerly the main line of communication between the southern and the northern shores, but always was subject to delay at the ferry, so that the road round by Bonar-Bridge, though very circuitous, came to be generally preferred; and now the railway, consisting of the Highland line and its Sutherland section, takes the same roundabout route. The waters of the firth abound in shellfish, cod, and haddocks, but never have been vigorously fished.—*Ord. Sur.*, shs. 102, 93, 94, 1881-78.

Dornock, a village and a coast parish of Annandale, Dumfriesshire. Standing $\frac{1}{2}$ mile inland, the village has a station on the Glasgow and South-Western railway 14 miles NW of Carlisle and 3 E of Annan, under which it has a post office. A church hall, called the Anderson Hall, was opened in 1888.

The parish, containing also Lowtherton village, 1 mile E by N of Dornock village, is bounded N and NE by Kirkpatrick-Fleming, E by Gretna, S by the Solway Firth, and W and NW by Annan. The Robgill detached portion, half a mile to the N, was united to the main portion by the Boundary Commissioners in 1891, by transferring to Dornock the intervening portion of Kirkpatrick-Fleming parish, that to the west of the road forming the eastern boundary of Scotsfield estate. The SOLWAY here is $1\frac{1}{2}$ mile wide, but its channel, barely $\frac{1}{2}$ mile across, may be forded at low tide, by those at least who know the perils of their path. The shore-line, $2\frac{1}{4}$ miles long, is low and sandy; and from it the surface very gradually rises to 59 feet at Muirhouse, 135 near Stapleton, 200 beyond Halton, and 265 at Broadlea in the Robgill portion, whose NE border is traced for 7 furlongs by KITTLE Water, the only stream of any consequence. The land is all low; and, excepting some 40 acres of wood and 750 either pastoral or waste, is all under the plough. Neither coal nor limestone has been found, but sandstone is plentiful. The soil, in general, is loam on a clayey bottom. The antiquities comprise remains of an ancient Caledonian stone circle, traces of a Roman military road, the towers of Robgill and Stapleton, and several curious old tombstones in the parish graveyard, where are also three sculptured stones. Swordwellrig, 7 furlongs WNW of the village, is said to have been the scene in the 15th century of a victory over the English, in which Sir William Broun of Coalston defeated and slew Sir Marmaduke Langdale and Lord Crosby. ROBGILL, Stapleton, and Blackyett are the chief mansions. Dornock is in the presbytery of Annan and synod of Dumfries; the living is worth £262. The church, built in 1793, contains 300 sittings. A public school, with accommodation for 180 children, had (1891) an average attendance of 122, and a grant of £123, 9s. Pop. (1881) 814, (1891) 810.—*Ord. Sur.*, shs. 6, 10, 1863-64.

Dorral, a burn that winds through Dallas parish, Elginshire.

Dorrington. See DIRRINGTON.

Dorror. See DORAY.

Dorusmore. See CRAIGNISH.

Dosk, an ancient parish on the W border of Kincardineshire, forming the south-eastern portion of Edzell parish until 1891, when the Boundary Commissioners transferred it to Fettercairn parish, in the same county.

Double-Dykes, the only remaining portion of an extensive ancient fortification in Stonehouse parish, Lanarkshire.

Double-Hill, a hill with two summits in Rescobie parish, Forfarshire. From the top of the highest peak a magnificent view may be had.

Douchfour. See DOCHFUR.

Dougalston, an estate, with a mansion, on the SE border of New Kilpatrick parish, Dumbartonshire, $1\frac{1}{2}$ mile ESE of Milngavie. Its owner, Thomas R. Ker, Esq.,

holds 1800 acres, valued at £3575 per annum. Douglston Loch ($4\frac{1}{2} \times 1$ furl.), on the Stirlingshire border, contains an islet, and abounds in water plants, some of them of rare species.

Douglas, a burn in Yarrow parish, Selkirkshire, rising, at an altitude of 2000 feet above sea-level, on Blackhouse Heights, contiguous to the Peeblesshire border, and running 6 miles east-south-eastward and south-south-eastward, till, 2 miles below BLACKHOUSE Tower, it falls into Yarrow Water, at a point $1\frac{1}{2}$ mile E by N of the foot of St Mary's Loch. With a fall of 1200 feet, it traverses a deep and gloomy glen (hence its name *dubh-ghlas*, 'dark grey'), and teems with capital trout of about $\frac{1}{2}$ lb. weight.—*Ord. Sur.*, shs. 24, 16, 1864.

Douglas, a town and a parish in the Upper Ward of Lanarkshire. The town stands on the right bank of Douglas Water, $3\frac{1}{2}$ miles SSW of Douglas station on a branch of the Caledonian, this being $7\frac{1}{2}$ miles SSW of Lanark, 11 SW of Carstairs Junction, $39\frac{1}{2}$ SW of Edinburgh, and $13\frac{1}{2}$ ENE of Muirkirk. Formerly a place of much political importance, a burgh of barony with high magisterial powers, and a seat of considerable trade and marketing, it has fallen into great decadence, and now presents an antique and irregular appearance. Its streets are narrow, some of the houses look as if they still belonged to the Middle Ages; and the townsfolk, with few exceptions, are weavers, mechanics, or labourers. A cotton factory, established in 1792, continued in operation only a few years; and a connection with Glasgow in handloom-weaving is now, too, all but extinct. The town, nevertheless, is still a place of some provincial consideration, possesses a fair amount of local business, and is replete with much of antiquarian interest. It has a post office, with money order, savings' bank, insurance, and telegraph departments, branches of the Commercial and Royal Banks, the Douglas Arms inn, gas-works, the parish church, 2 Free churches, a U.P. church, a public school, a cottage hospital, and fairs on the third Friday of March and October. The kirk of St Bride, founded in the 13th century, but Second Pointed in style, was a prebend of Glasgow cathedral, and seems to have been a large and stately edifice, now represented by only a small spire and the choir, which latter was always till 1761 the burial-place of the Douglas family. In 1879-81 it underwent an extensive restoration, the vault beneath the High Altar being entirely renewed and much enlarged. The old coffins have been removed, and in the new vault are now interred the late Earl and Countess of Home. In the centre of the floor of the choir above is a beautiful marble and alabaster monument of the Countess, which presents a striking contrast to the faded and mutilated effigies around it; and the E window is filled with stained glass in memory of the Earl. 'Here,' says Sir Walter Scott, 'a silver case, containing the dust of what was once the brave heart of Good Sir James, is still pointed out; and in the dilapidated choir above appears, though in a sorely ruinous state, the once magnificent tomb of the warrior himself. This monument is supposed to have been wantonly mutilated and defaced by a detachment of Cromwell's troops, who, as was their custom, converted the kirk of St Bride of Douglas into a stable for their horses. Enough, however, remains to identify the resting-place of the great Sir James. The effigy, of dark stone, is cross-legged, and in its original state must have been not inferior in any respect to the best of the same period in Westminster Abbey.'* The Covenanters, in the times of the persecution, had

close connection with the town, and in April 1689 the Cameronian regiment was here embodied in defiance of the Protestant government of William and Mary, to commemorate the 200th anniversary of which, a statue of the Earl of Angus, its first colonel-in-chief and the raiser of the regiment, was erected here in 1892. Pop. (1891) 1013.

The parish, containing also the villages of Uddington and Rigside, $2\frac{3}{4}$ and 4 miles NE of the town, as likewise Inches station, $6\frac{3}{8}$ miles SW of Douglas station, is bounded NW by Lesmahagow, NE by Carmichael, E by Wiston-Roberton, SE and S by Crawfordjohn, and W by Muirkirk in Ayrshire. Its utmost length is $11\frac{1}{4}$ miles from NE to SW, viz., from the confluence of Poniel and Douglas Waters to Cairntable; its utmost breadth, from NW to SE, is $6\frac{5}{8}$ miles; and its area is $34,317\frac{1}{2}$ acres, of which $180\frac{3}{8}$ are water. DOUGLAS WATER, rising 1500 feet above sea-level, in the south-western corner of the parish, winds $16\frac{1}{2}$ miles north-eastward through all the interior, on the way receiving Monks and Keunox Waters, Glespin and Parkhall Burns, and Poniel Water, which last, running $9\frac{1}{2}$ miles east-north-eastward, traces nearly all the boundary with Lesmahagow; whilst DUNEATON Water flows $6\frac{3}{8}$ miles east-by-southward, along all the southern border, on its way to the Clyde. The surface, declines to less than 600 feet above sea-level at the north-eastern corner, where Douglas Water passes from the parish; and elevations to the left or N of its course, from NE to SW, are Poniel Hill (842 feet), Arkney Hill (1225), Windrow Hill (1297), Hagshaw Hill (1540), Shiel Hill (1122), *Hareshaw Hill (1527), *Brack Hill (1306), and *Little Cairntable (1693), asterisks marking those summits that culminate on the Ayrshire border. To the right or S of the Douglas rise Robert Law (1329), Scaur Hill (1249), Parkhead Hill (1241), Pagie Hill (1273), AUCHENSAUGH Hill (1286), Pinkstone Rig (1255), Hartwood Hill (1311), Douglas Rig (1535), and CAIRNTABLE (1944). The rocks of the valley belong to the Carboniferous formation, and comprise very fine coal (including valuable gas coal), some ironstone, limestone, and beautiful white sandstone. The coal is extensively mined, both for home use and for exportation, and the limestone and sandstone are quarried. There are several pretty strong chalybeate springs. The soil in most parts of the strath is a free black mould, in some is lighter and gravelly, and in others is clay; on the moors it is mostly humus or moss, but even here in places a deep loam. Fully three-sevenths of the rental are from arable land, nearly one-half is from pasture, and the rest is from minerals. Cairns are on Auchensaugh and Kirkton hills; and a large one, found to contain a sarcophagus, stood formerly on Poniel farm. Ancient churches or chapels were at Andershaw, Glentaggart, Parishholm, and Chapel Hill. The chief residences are DOUGLAS CASTLE, Carmacoup, Springhill, and Crossburn. Douglas is in the presbytery of Lanark and synod of Glasgow and Ayr; the living is worth £491. Douglas Water, a chapel of ease in the parish of Lesmahagow, was disjoined and erected into a *quoad sacra* parish in Nov. 1892. Three public schools—Douglas, Rigside, and Stablestone, with respective accommodation for 280, 157, and 130 children, have an average attendance of about 240 day and 30 evening, 120, and 70 day and 20 evening scholars, and grants amounting to nearly £260 and £21, £121, and £80 and £14. Pop. (1801) 1730, (1831) 2542, (1861) 2490, (1871) 2624, (1881) 2641, (1891) 2266.—*Ord. Sur.*, shs. 23, 15, 1865-64.

Douglas Castle, an ancient ruin and a modern seat in Douglas parish, Lanarkshire, near the right bank of Douglas Water, $\frac{1}{2}$ mile NNE of Douglas town. The Douglases, 'whose coronet so often counterpoised the crown,' and who so closely linked the district of Douglasdale to Scottish story, 'were,' says Hill Burton, 'children of the soil, who could not be traced back to the race of the enemy or stranger, as, whatever may have been their actual origin, they were known as rooted in Scotland at the time when the Norman adventurers crowded in.' The first great man of the

* Thus Sir Walter, but the minister of Douglas, the Rev. W. Smith, writes: 'As to the silver heart-case, I am not sure. There are two enclosed in a modern box; but they are neglected, as it is not known whose hearts they are; and as to being silver, most people would say they were lead. Last century the school stood in the churchyard. There was no door on the choir, and the boys had full liberty to do as they liked, which liberty they undoubtedly took. So that the mutilation of statues attributed to Cromwell was performed by inferior destructionists. The lead cases in the shape of hearts are much broken, having had the same treatment as the monuments. I may mention that, though the body of the Good Sir James was brought to Douglas according to tradition or history, no bones were found when recently the space under the stone effigy was opened.'

house was the Good Sir James, the friend and companion of Robert the Bruce in his valorous efforts to achieve the independence of Scotland. His own castle of Douglas had been taken and garrisoned by the troops of Edward I.; and he resolved to recapture it, and at the same time inflict signal chastisement on the intruders. Tradition tells us that a beautiful English maiden, the Lady Augusta de Berkely, had replied to her numerous suitors that her hand should be given to him who should have the courage and ability to hold the perilous castle of Douglas for a year and a day; and Sir John de Walton, anxious to win by his valour so lovely a prize, with Edward's consent, undertook the defence of the castle. For several months he discharged his duty with honour and bravery, and the lady now deeming his probation accomplished, and not unwilling perhaps to unite her fortunes to one who had proved himself a true and valiant knight, wrote him a letter of recall. By this time, however, he had received a defiance from Douglas, who declared that, for all Sir John's valour, bravery, and vigilance, the castle should be his own by the Palm Sunday of 1307; and De Walton deemed it a point of honour to keep possession till the threatened day should be past. On the day named Douglas, assembling his followers, assailed the English as they returned from the church, and, having overpowered them, took the castle. Sir John de Walton was slain in the conflict, and the letter of his lady-love, being found on his person, afflicted the generous and good Sir James 'full sorely.' The account of this capture of the Castle of Douglas, taken from Barbour's *Brus* by Hume of Godscroft, is somewhat different. 'The manner of his taking it is said to have beene thus—Sir James, taking with him only two of his servants, went to Thomas Dickson, of whom he was received with tears, after he had revealed himself to him, for the good old man knew him not at first, being in mean and homely apparel. There he kept him secretly, in a quiet chamber, and brought unto him such as had been trusty servants to his father, not all at once, but apart, by one and one, for fear of discoverie. Their advice was, that on Palm Sunday, when the English would come forth to the church, and his partners were conveyed, that then he should give the word, and cry "the Douglas slogan," and presently set upon them that should happen to be there, who being despatched the castle might be taken easily. This being concluded, and they come, as soon as the English were entred into the church with palms in their hands (according to the custom of that day), little suspecting or fearing any such thing, Sir James, according to their appointment, cried too soon, "A Douglas, a Douglas!" which being heard in the church (this was St Bride's church of Douglas), Thomas Dickson, supposing he had beene hard at hand, drew out his sword and ran upon them, having none to second him but another man, so that, oppressed by the number of his enemies, he was beaten downe and slaine. In the meantime, Sir James being come, the English that were in the chancel kept off the Scots, and having the advantage of the strait and narrow entrie, defended themselves manfully. But Sir James, encouraging his men, not so much by words as by deeds and good example, and having slain the boldest resisters, prevailed at last, and entring the place, slew some twenty-six of their number, and tooke the rest, about ten or twelve persons, intending by them to get the castle upon composition, or to enter with them when the gates should be opened to let them in. But it needed not, for they of the castle were so secure that there was none left to keep it, save the porter and the cooke, who knowing nothing of what had hapned at the church, which stood a large quarter of a mile from thence, had left the gate wide open, the porter standing without, and the cooke dressing the dinner within. They entred without resistance, and meat being ready, and the cloth laid, they shut the gates and took their refection at good leisure. Now that he had gotten the castle into his hands, considering with himself (as he was a man no lesse advised than valiant) that it was hard for him to keep it, the English being as yet the stronger in that countrey, who if they should

besiege him, he knewe of no reliefe, he thought it better to carry away such things as be most easily transported, gold, silver, and apparell, with ammunition and armour, whereof he had greatest use and need, and to destroy the rest of the provision, together with the castle itselfe, than to diminish the number of his followers there where it could do no good. And so he caused carry the meale and meat, and other cornes and grain into the cellar, and laid all together in one heape: then he took the prisoners and slew them, to revenge the death of his trustie and valiant servant, Thomas Dickson, mingling the victuals with their blood, and burying their carkasses in the heap of corne: after that he struck out the heads of the barells, and puncheons, and let the drink run through all; and then he cast the carkasses of dead horses and other carrion amongst it, throwing the salt above all, so to make all together unuseful to the enemy; and this cellar is called yet the Douglas laider. Last of all he set the house on fire, and burnt all the timber, and what else the fire could overcome, leaving nothing but the scorched walls behind him.'

In 1313, Sir James took the castle of Roxburgh, and in the following year commanded the centre of the Scottish van at BANNOCKBURN. In 1317 he defeated the English under the Earl of Arundel; and in 1319, in conjunction with Randolph, Earl of Moray, he entered England by the west marches with 1500 men, routed the English under the Archbishop of York at the so-called Chapter of Mitton, and, eluding Edward II., returned with honour to Scotland. When Robert the Bruce was on his deathbed, in 1329, he sent for his true friend and companion in arms the Good Sir James, and requested him, that so soon as his spirit had departed to Him who gave it, he should take his heart and 'bear it in battle against the Saracens.' Douglas resolved to carry the request of the dying king into execution, and for this purpose obtained a passport from Edward III., dated 1 Sept. 1329. He set sail in the following year with the heart of his honoured master, accompanied by a splendid retinue. Having anchored off Sluys, he was informed that Alphonso XI., the King of Leon and Castile, was engaged in hostilities in Grenada with the Moorish commander Osmyn; and this determined him to pass into Spain, and assist the Christians to combat the Saracens. Douglas and his friends were warmly received by Alphonso, and encountering the Moslems at Theba, on the frontiers of Andalusia, on Aug. 25, 1330, put them to rout. Douglas eagerly followed in the pursuit, and, taking the casket which contained the heart of Bruce, he flung it before him, exclaiming, 'Onward, as thou wert wont, thou noble heart, Douglas will follow thee!' The Saracens rallied, and the Good Sir James was slain. His companions found his body upon the field along with the casket, and sorrowfully bore them back to Scotland, where the heart of the Bruce was deposited at Melrose, though his body was interred in the royal tomb at Dunfermline, whilst Sir James was buried at Douglas, and a monument erected to him by his brother Archibald. The old poet Barbour, after reciting the circumstances of Sir James's fall in Spain, tells how—

'Quhen his men lang had mad murnyn,
Thai debowlyt him, and syne
Gert secher him swa, that mycht be tane
The flesch all haly fra the bane,
And the carloune thar in haly place
Erdyt, with rycht gret worschip, was.
The banys have thai with them tane
And syne ar to thair schippis gane
Syne towart Scotland held thair way,
And thar ar cummyn in full gret by
And the banys honorably
In till the kirk off Douglas war
Erdyt, with dull and mekill car.
Schyr Archebald has some gert syn
Off alabastre, bath fair and fyne,
Or save a tumbse sa richly
As it behowyt to swa worthy.'

Sir James's nephew was raised to the earldom of Douglas in 1357 by David II.; and during this reign and the two which succeeded the house of Douglas attained a degree of power scarcely inferior to that of royalty itself;

so that, as has been remarked by an old historian, it became a saying that 'nae man was safe in the country, unless he were either a Douglas or a Douglas man.' The Earl went abroad with a train of 2000 men, kept a sort of court, and even created knights. In 1424, Archibald, the fourth Earl, became possessed of the dukedom of Touraine, for services rendered to Charles VII. of France. William, the sixth Earl, a stripling not yet 15, succeeded to the family power at a stage when it had attained a most formidable height. Their estates in Galloway—where they possessed the stronghold of *THREAVE*—and those of *Annandale* and *Douglas*, comprised two-thirds of Scotland to the S of *Edinburgh*; the people viewed them as the champions of Scotland, especially after the victory of *Otterburn*, and since single-handed they had won back the border lands ceded to England by *Edward Baliol*; lastly, through the marriage of the Good Sir James's brother and heir with *Dornagilla*, the Red Comyn's sister and *Baliol's* niece, the *Douglases* could find a most plausible claim to the Scottish throne, and, but for *Baliol's* unpopularity, might have contested the accession of *Robert II.* It was at this time, however, the policy of *Crichton*—one of the ablest of those who had the direction of affairs during the minority of *James II.*—to humble the overgrown power of the nobles; and accordingly *Earl William*, having been decoyed into the castle of *Edinburgh*, was subjected to a mock trial for treason, and beheaded 24 Nov. 1440. 'This noble youth and his brother and a few other principal friends,' says *Hume of Godscroft*, 'on their arrival in *Edinburgh*, went directly to the castle, being led as it were and drawn by a fatal destiny, and so came in the power of their deadly enemies and feigned friends. At the very instant comes the Governor, as was before appointed betwixt them, to play his part of the tragedy, and both he and the chancellor might be alike embarked in the action, and bear the envy of so ugly a fact, that the weight thereof might not be on one alone. Yet to play out their treacherous parts, they welcome him most courteously, set him to dinner with the king at the same table, feast him royally, entertain him cheerfully, and that for a long time. At last, about the end of dinner, they compass him about with armed men, and cause present a bull's head before him on the board. The bull's head was in those days a token of death, say our histories; but how it hath come in use to be taken and signify, neither do they nor any else tell us; neither is it to be found, that I remember, anywhere in history, save in this one place; neither can we conjecture what affinity it can have therewith, unless to exprobrate grossness, according to the French and our own reproaching dull and gross wits, by calling him calf's-head (*tête de veau*) but not bull's head. The young nobleman, either understanding the sign as an ordinary thing, or astonished with it as an uncouth thing, upon the sight of the bull's head, offering to rise, was laid hold of by their armed men, in the king's presence, at the king's table, which should have been a sanctuary to him. And so without regard of king, or any duty, and without any further process, without order, assize, or jury, without law, no crime objected, he not being convicted at all, a young man of that age, that was not liable to the law in regard of his youth, a nobleman of that place, a worthy young gentleman of such expectation, a guest of that acceptance, one who had reposed upon their credit, who had committed himself to them, a friend in mind, who looked for friendship, to whom all friendship was promised, against duty, law, friendship, faith, honesty, humanity, hospitality, against nature, against human society, against God's law, against man's law, and the law of nature, is cruelly executed and put to death. *David Douglas*, his younger brother, was also put to death with him, and *Malcolm Fleming* of *Cumbernauld*; they were all three beheaded in the back court of the castle that lieth to the west.'

¹ When Earl Douglas to the Castle came
The courts there were fu' grim to see;
And he lik'd na the feast as they sat at dine,
The tables were served sae silentlie.

'And full twenty feet fro the table he sprang
When the grisly bull's head met his e'e,
But the Crichtouns a' eam' troupin in,
An' he eoudna fight an' wadna fle.
'O, when the news to Hermitage came,
The Douglases were brim and wud;
They swore to set Embro' in a bleeze,
An' slochen't wi' auld Crichtoun's blood.

The dukedom of *Touraine* reverted to the French king; but, after three years of depressed fortune, the *Douglases* rose to a greater degree of power than ever in the person of *William*, the eighth Earl, who, professing to be in favour with the young king, *James II.*, appointed himself Lieutenant-General of the kingdom. Having fallen, however, into partial disgrace, he went abroad (1450), and his castle of *Douglas* was demolished during his absence by order of the king, on account of his vassals' insolence. On the return of the Earl, he made submission to the king, a submission never meant to be sincere. He sought to assassinate *Crichton* the chancellor, hanged *Herries* of *Terregles* in despite of the king's mandate to the contrary, and in obedience to a royal warrant delivered up the Tutor of *Bombie*—headless. By leaguings, moreover, with the Earls of *Crawford* and *Ross*, he united against his sovereign almost one-half of the kingdom. But his credulity led him into the selfsame snare that had proved fatal to the former Earl. Relying on the promise of the king, who had now attained to the years of manhood, and having obtained a safe-conduct under the great seal, he ventured to meet him in *Stirling Castle*, 13 Jan. 1452. *James* urged him to dissolve the Bands, the Earl refused. 'If you will not,' said the enraged monarch, drawing his dagger, 'then this shall!' and stabbed him to the heart. The Earl's four brothers and vassals ran to arms with the utmost fury; and, dragging the safe-conduct, which the king had granted and violated, at a horse's tail, they marched to *Stirling*, burned the town, and threatened to besiege the castle. An accommodation ensued, on what terms is not known; but the king's jealousy, and the new Earl's power and resentment, prevented its long continuance. Both took the field, and met near *Abercorn* (1454), at the head of their armies. That of the Earl, composed chiefly of Borderers, was far superior to the king's, in both numbers and valour; and a single battle must in all probability have decided whether the house of *Stewart* or the house of *Douglas* was henceforth to sit upon the throne of Scotland. But while his troops impatiently expected the signal to engage, the Earl ordered them to retire to their camp; and *Sir James Hamilton* of *Cadzow*, in whom he placed the greatest confidence, convinced of his lack of genius to improve an opportunity, or of his want of courage to seize a crown, deserted him that very night. This example was followed by many; and the Earl, despised or forsaken by all, was soon driven out of the kingdom, and obliged to depend for his subsistence on the King of England. The overgrown strength of this family was destroyed in 1455; and the Earl, after enduring many vicissitudes, retired in his old age to *Lindores Abbey* in *Fife*, and died there in 1488.

The title of *Earl of Douglas*, of this the first branch of the family, existed for 98 years, giving an average of 11 years to each possessor. The lands of the family reverted to the Crown, but shortly afterwards were bestowed on the Earl of *Angus*, the head of a younger branch of the old family, descended from *George Douglas*, the only son of *William*, first Earl of *Douglas*, by his third wife, *Margaret*, Countess of *Angus*, who in 1389, on his mother's resignation of her right, received her title. This family assisted in the destruction of the parent-house; and it became a saying, in allusion to the complexion of the two races, that the red *Douglas* had put down the black. Among its members were several who figured prominently in Scottish story, such as *Archibald*, fifth Earl, known by the soubriquet of 'Bell-the-Cat;' and *Archibald*, sixth Earl, who, marrying *Margaret* of England, widow of *James IV.*, was grandfather of the unfortunate *Henry Lord Darnley*, the husband of *Queen Mary* and father of *James VI.*

This Archibald, during the minority of his step-son James V., had all the authority of a regent. William, eleventh Earl of Angus, was raised to the marquise of Douglas, in 1633, by Charles I. This nobleman was a Catholic and a royalist, and inclined to hold out his castle against the Covenanters, in favour of the king; but he was surprised by them, and the castle taken (1639). He was one of the best of the family, and kept up to its fullest extent the olden princely Scottish hospitality. The king constituted him his lieutenant on the Borders, and he joined Montrose after his victory at Kilsyth (1645), escaped from the rout at the battle of Philiphaugh, and soon after made terms with the ruling powers. The first Marquis of Douglas was the father of three peers of different titles—Archibald, his eldest son, who succeeded him as second Marquis; William, his eldest son by a second marriage, who became third Duke of Hamilton; and George, his second son, by the same marriage, who was created Earl of Dumbarton. Archibald, third Marquis, succeeded in 1700, and was created Duke of Douglas in 1703. In the '15 he adhered to the ruling family of Hanover, and fought as a volunteer in the battle of Sheriffmuir. He died childless at Queensberry House, Edinburgh, in 1761, when the ducal title became extinct, the Marquise of Douglas devolving on the Duke of Hamilton, on account of his descent from the first Marquis. The real and personal estate of the Duke of Douglas was inherited by his nephew, Archibald Stewart, Esq., who assumed the surname of Douglas, and in 1790 was created Baron Douglas of Douglas—a title re-granted in 1875 to the eleventh Earl of Home (1799-1881), who had married the granddaughter of the above-named Archibald Stewart, and now borne by his son and successor, Chs. Alex. Douglas Home (b. 1834), the present Earl, who holds in Lanarkshire 61,943 acres, valued at £24,764 per annum, besides a large and increasing revenue from minerals. (See also BOTHWELL and The HIRSEL.)

Such are some of the memories of this time-worn ruin, interesting also as the 'Castle Dangerous' of Sir Walter Scott's last romance, and the last place to which he made a pilgrimage in Scotland. His preface, transmitted from Naples in 1832, contains the following passage:—'The author, before he had made much progress in this, probably the last of his novels, undertook a journey to Douglasdale, for the purpose of examining the remains of the famous castle, the Kirk of St Bride of Douglas, the patron-saint of that great family, and the various localities alluded to by Godscroft, in his account of the early adventures of Good Sir James. But though he was fortunate enough to find a zealous and well-informed cicerone in Mr Thomas Haddow, and had every assistance from the kindness of Mr Alexander Finlay, the resident chamberlain of his friend Lord Douglas, the state of his health at the time was so feeble that he found himself incapable of pursuing his researches, as in better days he would have delighted to do, and was obliged to be contented with such a cursory view of scenes, in themselves most interesting, as could be snatched in a single morning, when any bodily exertion was painful. Mr Haddow was attentive enough to forward subsequently some notes on the points which the author had seemed desirous of investigating; but these did not reach him until, being obliged to prepare matters for a foreign excursion in quest of health and strength, he had been compelled to bring his work, such as it is, to a conclusion. The remains of the old castle of Douglas are inconsiderable. They consist, indeed, of but one ruined tower, standing at a short distance from the modern mansion, which itself is only one wing of the design on which the Duke of Douglas meant to reconstruct the edifice, after its last accidental destruction by fire. His grace had kept in view the ancient prophecy that, as often as Douglas Castle might be destroyed it should rise again in enlarged dimensions and improved splendour, and projected a pile of building, which, if it had been completed, would have much exceeded any nobleman's residence then existing in Scotland; as, indeed, what has been finished, amounting

to about one-eighth of the plan, is sufficiently extensive for the accommodation of a large establishment, and contains some apartments the extent of which is magnificent. The situation is commanding; and though the Duke's successors have allowed the mansion to continue as he left it, great expense has been lavished on the environs, which now present a vast sweep of richly undulated woodland when viewed from the Cairntable mountains, repeatedly mentioned as the favourite retreat of the great ancestor of the family in the days of his hardships and persecution.' See David Hume of Godscroft, *History of the House and Race of Douglas and Angus* (1644; new ed. by Ruddiman, 1743); and Sir W. Fraser's *Douglas Book*, 2 vols. (1885).

Douglasdale. See DOUGLAS WATER.

Douglas-Mill, a quondam inn (well known in old coaching days) in Douglas parish, Lanarkshire, 2½ miles NE of Douglas town. Coleridge and Wordsworth and his sister Dorothy dined here 20 Aug. 1803.

Douglas-Park, an estate, with a mansion, in Bothwell parish, Lanarkshire, on the right bank of South Calder Water, 1½ mile E of Bothwell village.

Douglastown, a village in Kinnettles parish, Forfarshire, on the right bank of Arity Water, at the western verge of the parish, 3½ miles SW of Forfar, under which it has a post office. At it stand the handsome new parish school and a large flax-spinning mill, founded, like the village, in 1792.

Douglas Water, a burn of Arrochar and Luss parishes, Dumbartonshire, formed by two head-streams, within ¾ mile of Loch Long, and running 4¾ miles east-by-southward, chiefly along the mutual boundary of the two parishes, to Loch Lomond at Inveruglas, opposite Rowardennan. Its basin is a grand glen, flanked on the N side by Tullich Hill (2075 feet), Ben Vreac (2233), and Stob Gobhlach (1413), and on the S by Doune Hill (2409), Mid Hill (2149), and Ben Dubh (2106).—*Ord. Sur.*, sh. 38, 1871.

Douglas Water, a burn in Inverary parish, Argyllshire, issuing from Loch Dubh-ghlas (4 × ¾ furl.; 1050 feet), and curving 6¾ miles eastward to Loch Fyne, at a point 2¾ miles SSW of Inverary town. It contains salmon, sea-trout, and yellow trout. A section of rock in its channel, 100 feet high, shows alternate strata of mica slate and limestone.—*Ord. Sur.*, sh. 37, 1876.

Douglas Water, a stream of SW Lanarkshire, rising, 1500 feet above sea-level, between Cairntable (1944 feet) and Little Cairntable (1693), at the SW corner of Douglas parish, within a furlong of the Ayrshire border. Thence it winds 16½ miles north-eastward through Douglas parish, and 3¾ miles north-north-eastward along the mutual boundary of Carmichael and Lesmahagow parishes, till, after a total descent of fully 900 feet, it falls into the Clyde at a point nearly 1½ mile above Bonnington Linn, and 2¾ miles SSE of Lanark. It receives, on its left bank, Monks and Poniel Waters, and, on its right bank, Kennox Water and Glespin, Parkhall, Craig, Ponfeigh, Shiels, and Drumalbin Burns; contains good store of trout; and gives the name of Douglasdale to its basin or valley, which, comprising nearly all Douglas parish and considerable portions of Carmichael and Lesmahagow, is so overhung by a conspicuous part of a great range of watershed catching the rain clouds from the S and W, as to render the volume of the Douglas nearly equal to that of the Clyde at the point of confluence, and has such a configuration as to impart some peculiarity to the climate. 'The district,' says the *New Statist*, 'is exposed to high winds, particularly from the SW and W, which, being confined as in a funnel by the high grounds on each side, sweep down the strath with tremendous violence.'—*Ord. Sur.*, shs. 15, 23, 1864-65.

Doulas or Dulaich, a loch in Lairg parish, Sutherland, 2½ miles NE of Lairg village. Lying 480 feet above sea-level, it measures 3 by 1½ furlongs, sends off a rivulet to Loch Shin at Lairg village, and itself receives one, running ¾ mile eastward from Loch Craggie, like which it abounds in very fine trout, running about ½ lb. each.—*Ord. Sur.*, sh. 102, 1881.

Doule, a lake in Lochcarron parish, Ross-shire, adjacent to the Dingwall and Skye railway, 6 miles NE of the head of Loch Carron. It is an expansion of the river Carron, measures 11 by 3 furlongs, contains two islets, and is well stocked with trout.—*Ord. Sur.*, sh. 82, 1882.

Douloch or **Dubh Loch**, a lake in Inverary parish, Argyllshire, at the foot of Glen Shira, 2 miles NE of Inverary town. An expansion of the Shira rivulet, measuring $\frac{3}{4}$ mile by $1\frac{1}{2}$ furlong, it lies only 25 feet above the level of Loch Fyne, extends to within 5 furlongs of the Shira's mouth, and in spring-tides receives some small portion of Loch Fyne's sea-water. It yields trout and salmon, sometimes in the same net with herrings and other sea fish; and takes the name of Douloch, signifying 'the black lake,' from the sombreness and depth of its waters. A baronial fortalice of the Lairds of Macnaughton stood on its southern shore, and is now a ruin.—*Ord. Sur.*, sh. 37, 1876.

Doune or **Dun of Creich**. See CREICH, Sutherland.

Doune, a modern mansion, in the Rothiemurchus portion of Duthil parish, E Inverness-shire, on the left bank of the Spey, $2\frac{1}{2}$ miles SSW of Aviemore station. Its owner, John Peter Grant of Rothiemurchus (b. 1860; suc. 1893) is a Captain 1st. V.B. Queen's Own Cameron Highlanders, and sheriff substitute of Banffshire; he holds 24,457 acres in the shire, valued at £2291 per annum.

Doune, an oval, flat-topped mound in Strathdon parish, W Aberdeenshire, at the W side of the Water of Nocht, just above its influx to the Don. Mainly (it would seem) of drift or diluvial formation, artificially altered and fortified, it was surrounded by a moat 26 feet wide and 16 deep, and measures 970 feet in circumference at the base, 60 in vertical height, and 562 in circumference at the top, which, about half an acre in area, shows foundations of buildings. According to vague tradition, it was the site of Invernocht church.

Doune, a mountain in Luss parish, Dumbartonshire, at the head of Glenmalloch, $5\frac{1}{4}$ miles NW by W of Luss village. It has an altitude of 2409 feet above sea-level.

Doune or **Down Law**, a hill (663 feet) in the SW of Roxburgh parish, Roxburghshire, adjoining Peniel Heugh in Crailling.

Doune (Gael. 'the hill'), a village in Kilmadock parish, S Perthshire, with a station on the Dunblane and Callander section of the Caledonian, 73 miles ESE of Oban, $7\frac{1}{2}$ SE of Callander, $3\frac{3}{4}$ W by N of Dunblane, $8\frac{3}{4}$ NW of Stirling, 45 NW of Edinburgh, and $38\frac{1}{4}$ NNE of Glasgow. It stands near the left bank of the swift river Teith, which here receives Ardoch Burn, and here is spanned by a noble two-arched bridge, founded in 1535 by Robert Spittal, tailor to the Most Noble Princess Margaret, the Queen of James IV., and widened 3 feet in 1866. The village of Bridge of Teith adjoins it, and on the opposite side of the river, 1 mile to the W, stands that of DEANSTON; whilst just to the S from the hoary ruins of DOUNE CASTLE, and behind rise the heathery Braes of Doune, which culminate in Uamh Bheag (2179 feet), $6\frac{3}{4}$ miles to the NW. Itself, Doune mainly consists of a larger and two smaller well-built streets, radiating from an old central market-cross; and has a post office, with money order, savings' bank, and telegraph departments, branches of the Royal and Union Banks, a hotel and 2 inns, the Moray Park, Union Hall, a gaswork, a public library, a volunteer corps, curling and bowling clubs, a masonic lodge, etc. Thursday is market-day; and fairs are held on the second Wednesday of May, the last Wednesday of July (hiring), the Tuesday before the first Wednesday of November (sheep), the first Wednesday of November (cattle and horses), and the fourth Wednesday of November (sheep and cattle), four of these fairs having been authorised by Act of Parliament in 1665. Doune was constituted a police burgh in 1890. Once famous for its manufacture of Highland pistols and sporans, Doune now depends chiefly upon Deanston cotton-mill, which was started in 1785. Places of worship are the parish church (1822; 1151 sittings), a Gothic edifice, with

handsome tower and beautiful pulpit; a Free church; a U.P. church at Bridge of Teith, of which Dr John M'Kerrow, historian of the Secession, was minister from 1813 till his death in 1867; a Methodist chapel; the Roman Catholic church of SS. Fillan and Alphonus (1875; 300 sittings); and St Modoc's Episcopal church (1878; 120 sittings), which, Early English in style, consists of a four-bayed nave barrel-vaulted in oak, a three-bayed chancel groined in stone, a N organ transept, and a N sacristy, with beautiful stained-glass E and W windows and wooden triptych reredos. A public school, with accommodation for 367 children, had (1891) an average attendance of 164, and a grant of £148, 9s. 6d. The superior of the village is the Earl of Moray, whose Perthshire seat is DOUNE LODGE. Pop. (1841) 1559, (1851) 1459, (1861) 1256, (1871) 1262, (1881) 997, (1891) 940.—*Ord. Sur.*, sh. 39, 1869.

Doune Castle, a stately baronial stronghold, at the SE end of Doune village, on the steep, woody, green-sward peninsula, formed by the river Teith and Ardoch Burn. Roofless and ruinous, though still a majestic pile, it has been said to date from the 11th century, but probably was either founded or enlarged by Murdoch Stewart, second Duke of Albany, and Governor of Scotland from 1419 to 1424. At his execution (25 May 1425) on the heading-hill of Stirling, it went to the Crown, and, given by James IV. to Margaret, his queen, passed in 1525 to her third husband, Henry Stewart, a lineal descendant of the first Duke of Albany. To his brother, Sir James, the custody of it was afterwards granted by James V.; and his son and namesake, created Lord Doune in 1581, coming into full possession, transmitted the same to his posterity, the Earls of Moray. From time to time a residence of royalty, including of course Queen Mary, it was garrisoned in the '45 for Prince Charles Edward by a nephew of the celebrated Rob Roy, and then was mounted with a twelve-pounder and several swivels. Scott brings his hero 'Waverley' within its walls; and it was really the six days' prison of Home, the author of *Douglas*, who, with five fellow-captives from the field of Falkirk, escaped by means of a blanket-twisted rope. This noble specimen of Scottish baronial architecture measures 96 feet each way, and, with walls 10 feet in thickness and 40 in height, comprises a massive north-eastern keep-tower, which, 80 feet high, commands a most lovely view; within are the court-yard, guardhouse, kitchen, great hall (63 by 25 feet), the Baron's Hall, and Queen Mary's Room. Of late years different parts of the building have been restored. The court room or baron's hall has been completely restored in the most tasteful manner. 'The mass of buildings,' says Dr Hill Burton, 'forms altogether a compact quadrangle, the towers and curtains serving as the extensive fortifications, and embracing a court-yard nearly surrounded by the buildings. The bastioned square tower of the 15th century is the ruling feature of the place; but the edifice is of various ages, and includes round staircase towers and remains of the angular turrets of the beginning of the 17th century. Winding stairs, lounge ranging corridors and passages, and an abundance of mysterious vaults, strong, deep, and gloomy, reward the investigator who has leisure enough to pass an hour or two within its hoary walls.' See Billings' *Baronial Antiquities* (1852).

Doune Lodge, a mansion in Kilmadock parish, Perthshire, $1\frac{1}{2}$ mile NW of Doune village. Till some time into the present century it bore the name of Cambuswallace, and as such is remembered as the house where, on 13 Sept. 1745, Prince Charlie 'preed the mou' of Miss Robina Edmondstone. From the Edmondstones it has come to the Earls of Moray, the tenth of whom, about 1852, did much to improve the estate, building new lodges and extensive offices, crowned by a conspicuous steeple; and is now owned by Edmund Archibald Stuart Gray, the present and fifteenth Earl (b. 1840; suc. 1895). (See MORAY, DONIBRISTLE, DARNAWAY, and CASTLE-STUART.)

Dounies. See DOWNIES.

Dounreay. See REAY.

Dour, a burn in Aberdour parish, Aberdeenshire, running $3\frac{1}{2}$ miles north-by-eastward to the Moray Firth at a point 1 mile N of New Aberdour village.

Doura, a village in Kilwinning parish, Ayrshire, $3\frac{1}{4}$ miles ESE of the town. Extensive coal-works are in its vicinity, and are connected with the Ardrossan branch of the Glasgow and South-Western railway by a single-line railroad.

Dourie, a burn of Marykirk parish, Kincardineshire, formed, 5 furlongs SE of Fettercairn village, by Balnakettle, Crichtie, and Garrol Burns, and thence running $3\frac{1}{2}$ miles south-south-eastward along the Fettercairn border and through the interior, till, 9 furlongs NNW of Marykirk station, it falls into Luther Water.—*Ord. Sur.*, shs. 66, 57, 1871-63.

Dovan. See DEVON.

Dovecot Hall, a village on the S border of Abbey parish, Renfrewshire, on the river Levern, conjoint with Barrhead. It contains the oldest of the cotton mills in the Barrhead district, and shares largely in the bleachfield and printfield business of Barrhead.

Dovecotwood, a fragmentary portion of an old castle in Kilsyth parish, Stirlingshire. Judging from the remains the castle has been very strong.

Doveran. See DEVERON.

Dovesland, a suburb in Abbey parish, Renfrewshire, on the S side of Paisley. It forms part of Charleston district, was mainly built after the year 1830, and has a large population, chiefly weavers.

Dow. See GLENDOW.

Dowal. See DOULE.

Dowally, a village in the united parish of DUNKELD AND DOWALLY, central Perthshire, 5 furlongs SSE of Guay station on the Highland railway, this being $5\frac{1}{2}$ miles NNW of Dunkeld station. It stands on the left bank of the Tay, which here is joined by Dowally Burn, and, $\frac{1}{2}$ mile higher up, is spanned by DALGUISSE viaduct. Dowally Burn issues from Lochan Oisinnach Bheag ($1\frac{1}{4} \times \frac{3}{4}$ furl.) in Logierait parish, and runs $7\frac{1}{2}$ miles south-south-westward, traversing Lochan Oisinnach Mhor ($4 \times 2\frac{1}{2}$ furl.) and Loch Ordie ($5 \times 3\frac{1}{4}$ furl.), whilst receiving a streamlet that runs $\frac{1}{2}$ mile north-westward from Dowally Loch ($1\frac{1}{2} \times \frac{3}{4}$ furl.). At the village are a public school and an Established church (1818; 220 sittings), which retains the old jogs of the church of St Anne, built here by Bishop George Brown of Dunkeld in 1500, when Dowally, till then a chapelry of Caputh, was constituted a separate parish. It now is united to Dunkeld, but stands so far distinct, that it is a Gaelic, while Dunkeld is an English, district. Pop. of Dowally registration division (1861) 486, (1871) 461, (1881) 431, (1891) 393.—*Ord. Sur.*, sh. 55, 1869.

Dowalton Loch, a former lake on the mutual border of Sorbie, Kirkinner, and Glasserton parishes, SE Wigtonshire, 6 miles SSW of Wigtown. With a length of $1\frac{1}{2}$ mile from WSW to ENE, a varying breadth of 1 and $5\frac{1}{4}$ furlongs, and a depth of from 6 to 20 feet, it covered 212 acres, but was entirely drained in 1862-63 by its three proprietors Sir W. Maxwell of Monreith, Vans Agnew, and Lord Stair, its bottom now forming excellent meadow-land. Of its eight little islets two near the north-western or Kirkinner shore were then discovered to be artificial crannoges or pile-built lake-dwellings. These yielded bones of the ox, pig, and deer, bronze vessels (one of them of Roman workmanship), iron axe and hammer heads, glass and amber beads, and part of a leather shoe, with finely-stamped pattern, twenty-six of which relics are now in the Edinburgh Antiquarian Museum; and in the neighbouring waters of the loch five canoes were found, from 21 to 26 feet long. On the shore of a western inlet stood Longcastle, the ancient keep of the M'Doualls, from whom the loch got its name; its site is now marked by fragments of crumbling wall.—*Ord. Sur.*, sh. 4, 1857. See Dr John Stuart's 'Notices of a Group of Artificial Islands in the Loch of Dowalton' in vol. vi. of *Proc. Soc. Ants. Scot.*, and Munro's *Ancient Scottish Lake-dwellings* (1882).

Dowie Dens. See YARROW.

Downloch. See DOULOCH.

Down. See DOUNE.

Downan, a quondam ancient chapelry in Glenlivet, Inveraven parish, Banffshire, near the Livet's confluence with the Avon. A bridge over the Livet at Upper Downan being almost entirely destroyed by the flood of 1829, a new one, on a better site lower down the stream, was built in 1835.

Downans. See CASTLE-DONNAN.

Downess. See DOWNIES.

Downfield, a village, with a public school, in Mains and Strathmartin parish, Forfarshire, 2 miles N by W of Dundee, under which it has a post office, with money order and savings bank departments. A new Established church, capable of accommodating 560 persons, was erected in 1893, at a cost of £2000.

Downie Park, an estate, with an elegant modern mansion, in Tannadice parish, Forfarshire, on the left bank of the South Esk, 1 mile SE of Cortachy Castle, like which it belongs to the Earl of Airlie.

Downies, a fishing hamlet, with a small harbour, in the extreme SE of Banchory-Devenick parish, Kincardineshire, 1 mile S by E of Portlethen station.

Downreay. See REAY.

Draffan Castle. See DUNINO.

Dragon-Hole, a cave in the rocky face of Kinnoull Hill, near the mutual boundary of Kinnoull and Kinfauns parishes, Perthshire. It is difficult of access; has capacity for about twelve men; is traditionally said to have been a hiding-place of Sir William Wallace; and, till after the era of the Reformation, was a scene of superstitious observances.

Drainie, a coast parish of Elginshire, comprising the ancient parishes of Kinneddar and Ogstoun, and containing the villages of BRANDERBURGH and STOFFIELD, and the post-town and station of LOSSIEMOUTH, $5\frac{1}{2}$ miles N by E of Elgin. It is bounded N by the Moray Firth, NE and E by Urquhart, SE by St Andrews-Lhanbryd, S by Spynie, and SW by Duffus. Its length, from E to W, varies between $3\frac{1}{2}$ and $4\frac{1}{2}$ miles; its utmost breadth, from N to S, is $3\frac{1}{2}$ miles; and its area is 7254 $\frac{1}{2}$ acres, of which 273 $\frac{2}{3}$ are foreshore and 16 $\frac{1}{2}$ water. The coast-line, 5 miles long, is partly low and flat, partly an intricate series of cavernous rocks, noticed under COVESEA. On the Duffus border, $\frac{1}{4}$ mile inland, the surface attains 241 feet above sea-level, at Covesea 195, near Lossiemouth 124; but to the S it everywhere is low and flat, ranging between 43 feet at the parish church and only 9 at Watery Mains. The river LOSSIE curves $2\frac{1}{2}$ miles northward, north-westward, and north-eastward, along all the Urquhart border, and just above its mouth receives the Spynie Canal, bending $3\frac{1}{2}$ miles northward from the former bed of Loch SPYNE, which, lying upon the southern boundary, was originally about 3 miles long and 1 mile broad, but by drainage operations, carried out about 1807, and again in 1860-70, has been reduced to a sheet of water in St Andrews-Lhanbryd parish of only 5 by $1\frac{1}{2}$ furlongs. Low tracts along the Lossie were formerly subject to inundation, and suffered much damage from the flood of 1829, but now are protected by embankments. A white and yellow sandstone quarried here is in great request, both for local building and for exportation; and a vein of limestone lies between Lossiemouth and Stoffield, where surface lead ore also has thrice been the object of fruitless operations—during last century, in 1853, and in 1879-81. The soil is so various that scarcely 20 acres of any one same quality can be found together, and it often passes with sudden transition from good to bad. Rich loam or marly clay lies on the low drained fields, elsewhere is mostly a lighter soil, incumbent on gravel or on pure white sand; and about a square mile of thin heathy earth, in the middle of the parish, having resisted every effort to render it arable, was at last converted into a small pine forest. Kinneddar Castle, a strong occasional residence of the Bishops of Moray, stood by Kinneddar churchyard, whilst the first church of Drainie (1673) exists still in a state of ruin. Gerardine's Cave or Holy-Manhead, near Lossiemouth, was

probably the abode of a hermit, and, measuring 12 feet square, had a Gothic doorway and window, which commanded a long view of the eastern coast, but in the course of working the quarries it was totally destroyed. GORDONSTOWN is the only mansion. Drainie is in the presbytery of Elgin and synod of Moray; the living is worth £230. The parish church, 2½ miles SW of Lossiemouth, was built in 1823, and contains 700 sittings. A chapel of ease, a Free, and a U.P. church are at Lossiemouth; a Baptist church at Brandenburgh; and three public schools—Drainie, Kinneddar, and Lossiemouth—with respective accommodation for 85, —, and 322 children, had (1891) an average attendance of 55, —, and 556, and grants of £64, 14s. 6d., —, and £486, 10s. Pop. (1801) 1057, (1831) 1206, (1861) 3023, (1871) 3293, (1881) 3991, (1891) 3922.—*Ord. Sur.*, sh. 95, 1876.

Drakemyre, a village in Dalry parish, Ayrshire, ½ mile N of Dalry town. Pop. (1831) 126, (1861) 426, (1871) 536, (1881) 325, (1891) 311.

Dreambeg, a place in the west of Sutherlandshire, on the coast, near the mouth of Loch Kylesku, a sea loch opening from the Minch in Loch Chairn Bhain.

Dreel, a burn in the East Neuk of Fife, rising in the NW of Carnbee parish, at an altitude of 580 feet above sea-level, and running 6 miles southward, south-eastward, and eastward, through Carnbee and along the boundary between Abercromby and Pittenweem on the right, and Carnbee, Anstruther-Wester, and Anstruther-Easter on the left, till it falls into the Firth of Forth at Anstruther old harbour.

Dreghorn, a village and a parish on the southern border of Cunningham district, Ayrshire. The village, standing 3 furlongs from the right bank of the river Irvine, is 2½ miles ESE of Irvine and 5 W of Kilmarnock, having a station on the branch of the Glasgow and South-Western between those towns; at it is a post office, with money order, savings bank, and railway telegraph departments. There are also two hotels and a bowling club. It chiefly consists of irregular lines of whitewashed houses, interspersed with trees; occupying a gentle acclivity above adjacent flats, it commands a fine view of the waters and screens of the Firth of Clyde, and is lighted with gas. Pop. (1861) 901, (1871) 821, (1881) 923, (1891) 1069.

The parish comprises the ancient parishes of Dreghorn and Perceton, united in 1668, and contains the greater part of Bankhead and Perceton villages. It is bounded NW and N by Stewarton, E by Fenwick, SE by Kilmaurs, S by Dundonald, and W by Irvine. Its utmost length, from NE to SW, is 6 miles; its breadth, from NW to SE, varies between ½ mile and 2½ miles; and its area is 5661½ acres, of which 36 are water. The river IRVINE glides 2½ miles westward along all the southern border; Garrier Burn, running 6½ miles south-westward to Carmel Water, and CARMEL Water, running 4½ furlongs westward to the Irvine, trace nearly all the boundary with Kilmaurs; whilst ANNICK Water, another of the Irvine's affluents, winds 10½ miles south-westward on or near to all the boundary with Stewarton and Irvine. Sinking at the south-western corner of the parish to 30 feet above sea-level, the surface thence rises gently north-westward to 97 feet beyond Dreghorn village, 150 near Warwickdale, 226 near Albonhead, and 258 near Whiterig. The rocks are mainly carboniferous. Coal is largely worked, and ironstone, limestone, and sandstone abound. The soil, in the SW ranging from loam to gravel, is elsewhere mostly a deep rich loam; and all the land, excepting some acres of wood and meadow, is under cultivation. Though now much subdivided, the entire parish belonged in the 12th century to the De Morvilles, lord high constables of Scotland, from whom it passed in 1196 to Roland, Lord of Galloway. Mansions are Annick Lodge, CUNNINGHAMHEAD, PERCETON, Springside, and Warwickhill. In the presbytery of Irvine and synod of Glasgow and Ayr, Dreghorn gives off about 450 acres, with 312 inhabitants, to the *quoad sacra* parish of CROSSHOUSE; the living is worth £330. The parish church (1780;

re-seated 1876 for 500) stands at the village, where also are a Free Church mission station and an Evangelical Union chapel; and Dreghorn Free church is at Perceton village. A working-men's institute, the gift of Misses Finnie of Kilmarnock, consisting of reading-room, billiard-room, gymnasium, and bowling alley, was opened at Springhill in 1894. Three public schools—Crossroads, Dreghorn, and Springside—with respective accommodation for 100, 300, and 300 children, have an average attendance of about 60, 320, and 300. Pop. (1881) 3949, (1891) 4057.—*Ord. Sur.*, sh. 22, 1865.

Dreghorn Castle, a 17th century mansion, twice enlarged within the last 90 years, in Colinton parish, Edinburghshire, at the northern base of the Pentlands, ½ mile SE of Colinton village. The estate, whence John Maclaurin (1734-96) assumed the title of Lord Dreghorn on his elevation to the bench, belonged in 1671 to Sir William Murray, Master of Works to Charles II., and in 1720 to the Homes, whose tutor, the poet David Mallet, here wrote the famous ballad of *William and Margaret*. Latterly it passed into other hands.

Drem, a village and a barony in Athelstaneford parish, Haddingtonshire, 4¼ mile N by W of Haddington. The village stands on the North British railway at the junction of the branch to North Berwick, being 4¾ miles SSW of that town, and 17¾ E by N of Edinburgh; at it is a post office, with money order, savings bank, and telegraph departments. The barony, comprising more than 800 acres of fine land, belonged once to the Knights Templars, and is now the property of the Earl of Hope-toun. A small Roman station seems to have been on it, and ½ mile distant therefrom was a Caledonian or Romano-British town, which appears to have been strongly fortified, and has left distinct traces on the crown of a conical eminence to the extent of about 2 acres. The priest's house of the Knights Templars' establishment is still standing, as also are a holly hedge that fenced the priest's garden and the greater part of a little chapel, served by the priest; but the graveyard attached to the chapel has been converted into a fruitful garden. About 100 yards from the old chapel a very perfect specimen was discovered in April 1882 of an ancient sepulchre, formed of six red sandstone flags, and containing a skull and a clay urn.

Druhim, See DRUM.

Drimachtor. See DRUMOCHTER.

Drimadoon, a small bay on the SW side of the Isle of Arran, Buteshire, opening from Kilbrannan Sound, nearly opposite Saddle Castle. It is a mere encurvature, measuring 2 miles along the chord, and 4½ furlongs thence to its inmost recess; receives the Black Water; and is flanked on the N side by Drimadoon Point, surmounted by remains of an extensive doon or fort and by a standing stone.

Drimarbane, a village in Kilmallie parish, Invernesshire, on the E shore of lower Loch Eil, 2¼ miles SW of Fort William.

Drimdrissaig, a seat in the parish of South Knapdale, Argyllshire, near the small town of Ardrishaig. The shooting extends over 3000 acres, and consists of grouse, black-game, woodcock, etc.

Driminish, a headland on the north coast of Ardnarechan peninsula, Argyllshire.

Drimmashie. See DRUMMOSSIE.

Drimmie, an estate in the W of Longforgan parish, SE Perthshire. The mansion on it was the residence of the Kinnaird family after the destruction of Moncur Castle by fire in the beginning of last century; but it was taken down about the year 1830. The Snabs of Drimmie (177 feet) are an abrupt termination of a beautiful bank, extending north-westward from the bold rocky point of Kingoodie; and they command a fine view of the Carse of Gowrie.

Drimmie, an extensive heathy tract, formerly forest, in Blairgowrie parish, Perthshire.

Drimmieburn. See PERSIE.

Drimnin, an estate, with a mansion, in Morvern parish, Argyllshire, on the Sound of Mull, opposite

Tobermory, 12½ miles NW of Morvern hamlet. St Columba's Romau Catholic church here, with 80 sittings, was built in 1838 by the late Sir Charles Gordon of Drimnin; and, overlooking the Sound, occupies the site of an old castle, of no great importance, which was demolished to give place to the church. There is a post and money order office.

Drimree, a place in Craignish parish, Argyllshire, with several rude monuments of an ancient battle.

Drimsynie, an estate, with a mansion, in Lochgoilhead parish, Argyllshire. The mansion stands in the mouth of a romantic ravine, ½ mile W of Lochgoilhead village, and has finely wooded grounds.

Drimyeonbeg, a bay (7×6 furl.) on the E side of Gigha island, Argyllshire, to the N of Ardmintish Point. It is capacious enough for local trade, and has good anchoring ground.

Drochil Castle, a ruin in Newlands parish, Peeblesshire, on the brow of a rising-ground between the confluent Tarth and Lyne Waters, 7 miles WNW of Peebles. A noble pile, mantled in ivy and crusted with yellow lichens, its basement story converted into byres, it was, says Pennicuik, 'designed for a palace more than a castle of defence, and is of mighty bulk; founded, and more than half built, but never finished, by the then great and powerful regent, James Douglas, Earl of Morton. Upon the front of the S entry of this castle was J. E. O. M., James, Earl of Morton, in raised letters, with the fetter-lock, as Warden of the Borders. This mighty Earl, for the pleasure of the place, and the salubrity of the air, designed here a noble recess and retirement from worldly business; but was prevented by his unfortunate and inexorable death three years after, anno 1581; being accused, condemned, and execute by the Maiden, at the Cross of Edinburgh, as act and part of the murder of our King Henry, Earl of Darnley, father to King James the Sixth' (*Description of Tweeddale*, 1715). See also vol. ii. of Billings' *Baronial Antiquities* (1852).—*Ord. Sur.*, sh. 24, 1864.

Droma, a troutful loch in Lochbroom parish, central Ross-shire, 6 miles WNW of Aultguish inn, and 16½ NW of Garve station. Lying 905 feet above sea-level, it has an utmost length and breadth of 1¼ and ¼ mile, and sends off the Droma rivulet 5¼ miles west-north-westward, to form, with the Cuileig, the river BROOM.—*Ord. Sur.*, sh. 92, 1881.

Dromore. See DRUMORE.

Dron, a hill in Lougforan parish, Perthshire, adjacent to the boundary with Forfarshire, 2 miles NW of Longforan village. It rises to an altitude of 684 feet above sea-level; and it has, within a dell on its southern slope, some remains of a chapel of the 12th century, belonging to Coupar-Angus Abbey.

Dron, a parish of SE Perthshire, whose church stands 2 miles SSE of its station and post-village, Bridge of Earn, that being 3¾ miles SSE of Perth. It is bounded N by Dunbarny, NE and E by Abernethy, SE and S by Arngask, SW and W by Forgandenny. Its utmost length, from E to W, is 3¼ miles; its breadth, from N to S, varies between 1¼ and 2½ miles. The Boundary Commissioners in 1891 united the detached part on the west to the main portion of the parish by annexing the greater portion of the intervening strip of Dunbarny parish, which measured from 1 to 4 furlongs across. The FARE winds 3½ miles along the south-eastern and eastern border; and in the NE, where it passes off into Abernethy, the surface sinks to 45 feet above sea-level, thence rising to 751 on Balmanno Hill and 950 on Dron Hill—grassy, copse-decked summits of the Ochils these. The rocks are mostly eruptive, but include some sandstone, and show appearances of coal. The soil on the low grounds is chiefly clay and loam, and on the uplands is comparatively light and shallow. About five-eighths of the entire area are in tillage, nearly one-tenth is under wood, and the remainder is pasture. The quoadam detached district is called Ecclesiamagirdle, and probably got its name from an ancient chapel of which some fragments still exist. Here and in Dron churchyard are two Martyrs' graves; on Balmanno Hill is a large boulder

rocking-stone. **BALMANNO Castle**, once a seat of the Murrays, is now a farm-house. Drou is in the presbytery of Perth and synod of Perth and Stirling; the living is worth £208. The church is a good Gothic edifice, built about 1826, and containing 350 sittings; the public school, with accommodation for 62 children, had (1891) an average attendance of 69, and a grant of £43, 5s. 6d. Valuation (1891) £3355, 9s. Pop. (1801) 428, (1831) 464, (1861) 376, (1871) 343, (1881) 335, (1891) 298.—*Ord. Sur.*, sh. 48, 1868.

Dronach, a haugh in Methven parish, Perthshire, on the left bank of the Almond, ½ mile WNW of Lynedoch Cottage, and 4 miles NW of Almondbank. Here, overshadowed by yew-trees, and enclosed by an iron railing, is the grave of 'Bessie Bell and Mary Gray,' who died of the plague in 1666. Their gravestone bears the inscription: 'They lived—they loved—they died.' See LYNEDOCH.

Drongan, a station on the Ayr and Cumnock section of the Glasgow and South-Western railway, 9½ miles ESE of Ayr, under which there is a post office with railway telegraph. In its vicinity are Drongan House, Drongan colliery, and a tolerably entire but ruined tower, once the residence of a branch of the Crawford family.

Drongs, a curious insulated rock in Northmaven parish, Shetland, at the back of Hillswick Ness. Rising almost sheer from the water to a height of 100 feet, it is cleft in three places nearly to the bottom, and, seen through a fog or at a distance, resembles a ship under sail.

Dronley, a village in the S of Auchterhouse parish, SW Forfarshire, 1¼ mile WSW of Dronley station on the Newtyle branch of the Caledonian, this being 11 miles NNW of Dundee. See AUCHTERHOUSE.

Dronochy, a broken, ancient, sculptured cross in Forteviot parish, SE Perthshire, on a rising-ground to the S of Forteviot Halyhill. It is one of several crosses or pillars that mark the precincts of the ancient Pictavian palace of Forteviot.

Dropping Cave, a stalactite cavern in the coast cliffs of Slains parish, Aberdeenshire, 3 furlongs E by N of the parish church. Its entrance is low, but its interior is lofty and capacious, and is encrusted, less richly now than once, with numerous beautiful stalactites.

Druidhm. See DHRUIM.

Druidibeg, an islet loch in South Uist island, Inverness-shire, 16 miles N of Loch Boisdale hotel. It measures 3 miles in length and 1 mile in width; abounds in trout; and sends off a copious streamlet, which drives the chief mill of the island.

Druids' Bridge, a series of huge submerged blocks of stone in Glenorchy parish, Argyllshire, extending a considerable distance into Loch Awe, a little to the N of Cladich. They are traditionally said to be part of the foundation of an intended ancient bridge across the lake.

Druids' Hill. See DUNDREICH.

Druie. See DUTHIL.

Druim. See DHRUIM.

Drum, an estate, with a mansion, in Liberton parish, Edinburghshire, ½ mile SE of Gilmerton. Long held by the Lords Somerville, the thirteenth of whom built the present house towards the middle of last century, it now is the property of John More Nisbett, Esq. of CAIRNHILL.

Drumachargan, a conical, copse-clad hill (512 feet) in Monzievaird and Strowan parish, Perthshire, near the left bank of the Tay, 1½ mile WNW of Crieff.

Drumadoon. See DRIMADOON.

Drumalban, the Central Grampians, under an ancient mistaken notion of their being a continuous range.

Drumbaig. See ASSYNT.

Drumbeg. See DRYMEN.

Drumblade, a parish of NW Aberdeenshire, whose church stands 4¾ miles E by N of Huntly, under which there is a post office of Drumblade.

The parish, containing also Huntly station, is bounded NE and E by Forgue, SE by Insch, SW by Gartly, W

and NW by Huntly. Its greatest length, from N to S, is 5½ miles; its greatest breadth, from E to W, is 5¼ miles; and its area is 9332½ acres. The BOGIE winds 3½ miles northward along the Gartly and Huntly border; and Glen Water, a head-stream of the Ury, 1½ mile east-north-eastward along all the boundary with Inch; whilst several burns either traverse the interior or trace the remaining boundaries. The surface, sinking in the NE along the Burn of Fergie to 306 feet above sea-level, thence rises to 671 feet near Garrieswell, 637 at Boghead, 700 at BA HILL, 716 at Woodbank, and 906 near Upper Stonyfield, the southern division of the parish being occupied by a series of gently-rounded hills. Clay-slate, grey granite, and trap are the prevailing rocks; and masses of limestone occur to the E of Lessendrum. The soil, in the valleys, is chiefly a deep rich loam; on the higher grounds, it is thin and gravelly, but fairly fertile. Fully three-fourths of the entire area are arable, extensive reclamations having been carried out within the last fifty years; woods cover about one-sixteenth; and the rest is either pastoral or waste. The chief historic event is Bruce's encampment at Sliach in 1307, when, sick though he was, he held Comyn's forces in check; and Robin's Height and the Meet Hill-lock are supposed to have been occupied by his troops. A Roman road is said to have run past Meikletown; and antiquities are two prehistoric tumuli, a few remaining stones of a 'Druidical' circle, and the Well of St Hilary, the patron saint, which was formerly resorted to by pilgrims. LESSENDRUM, the only mansion, was enlarged and repaired about 1837. Drumblade is in the presbytery of Turriff and synod of Aberdeen; the living is worth £167. The parish church, built in 1773, contains 550 sittings; and 1 mile SW stands a Free church. A public school, with accommodation for 113 children, had (1891) an average attendance of 105, and a grant of £105, 15s. Pop. (1801) 821, (1831) 973, (1861) 926, (1871) 931, (1881) 943, (1891) 956.—*Ord. Sur.*, sh. 86, 1876.

Drumblair, an estate, with a modern mansion, in Fergie parish, W Aberdeenshire, 10 miles ENE of Huntly.

Drumburn, a hamlet in Newabbey parish, Kirkcudbrightshire.

Drumcarrow. See CAMERON.

Drum Castle, a mansion in Drumoak parish, Aberdeenshire, 1 mile NW of Drum station on the Deeside railway, this being 10 miles WSW of Aberdeen. The house itself is a large Elizabethan edifice, built in 1619, and adjoins a three-story, massive granite keep, the Tower of Drum, which, dating from the 12th or 13th century, measures 60 by 40 feet, and is 63 feet high, with walls 12 feet in thickness. This was the royal fortalice conferred, with the Forest of Drum, in 1323, by Robert Bruce, on his armour-bearer, Sir William de Irvine, whose grandson, Sir Alexander, commanded and fell at HARLAW (1411), whilst his thirteenth descendant, also a Sir Alexander (d. 1687), has been identified with the 'Laird o' Drum' of a good old ballad. The present and twenty-second laird, Francis H. Forbes Irvine, Esq. (b. 1854; suc. 1892), holds 7689 acres in the shire, valued at £5210 per annum. The Hill of Drum, extending west-south-westward from the mansion, rises gradually, on all sides, from gently undulated low ground to an elevation of 414 feet above sea-level, and from its SE shoulder commands an extensive view. At its south-western base, 1½ mile W of Park station, lies the shallow, weedy Loch of Drum (6 × 2½ furl.; 225 feet), which, receiving a streamlet from Banchory-Ternan, sends off its effluence southward to the Dee.—*Ord. Sur.*, shs. 76, 66, 1874-71.

Drumcharry, a hamlet in Fortingal parish, Perthshire, on the left bank of the Lyon, 7½ miles W of Aberfeldy.

Drumclog, a wide boggy moorland tract in Avondale parish, Lanarkshire, near the Ayrshire border, and 6 miles SW of Stratbatven. Here stands a somewhat showy monument, inscribed, 'In commemoration of the victory obtained on this battlefield, on Sabbath the

1st of June 1679, by our Covenanted forefathers over Graham of Claverhouse and his dragoons.' On 29 May 1679, eighty horsemen had affixed to Rutherglen market-cross the 'Declaration and Testimony of the True Presbyterian Party in Scotland,' and, following up this public defiance, an armed conventicle met on 1st June on the boggy slope of conical Loudon Hill, where Bruce, 370 years before, had defeated the English invader. Service was scarce begun, when the watchers brought word that Claverhouse was at hand, and, the congregation breaking up, the armed men moved off to the farm of Drumclog, 2½ miles to the eastward. Two hundred or more in number, all well armed with fusils and pitchforks, and forty of them mounted, they were officered by Hall of Haughhead, Robert Fleming, Balfour of Burley, and Hackston of Rathillet, who wisely took up position behind a cleft, where lay the water of a ditch or 'stank.' Across this cleft the skirmishers of either side kept firing; the question appeared to be, which would cross first, or which hold longest out; when suddenly two parties of the Covenanters, one headed by young William Cleland the poet, swept round both ends of the stank with so much fury that the dragoons could not sustain the shock, but broke and fled, leaving thirty-six dead on the field, where only three of their antagonists were killed. Such was Drumclog, preceded by Magus Muir, followed by Bothwell Brig, an episode immortalised by Scott in *Old Mortality*, sung too by Allan Cunningham, and thus alluded to by Carlyle, under date April 1820:—'Drumclog Moss is the next object I remember, and Irving and I sitting by ourselves under the silent bright skies among the "peat-hags," with a world all silent around us. These peat-hags are still pictured in me; brown bog all pitted and broken into heathy remnants and bare abrupt wide holes, 4 or 5 feet deep, mostly dry at present; a flat wilderness of broken bog, of quagmire not to be trusted (probably wetter in old days there, and wet still in rainy seasons). Clearly a good place for Cameronian preaching, and dangerously difficult for Claverhouse and horse soldiery if the suffering remnant had a few old muskets. . . . I remember us sitting on the brow of a peat-hag, the sun shining, our own voices the one sound. Far, far away to the westward over our brown horizon, towers up white and visible at the many miles of distance a high irregular pyramid. "Ailsa Craig," we at once guessed, and thought of the seas and oceans away yonder.'—*Ord. Sur.*, shs. 22, 23, 1865. See W. Aiton's *History of the Rencounter at Drumclog* (Hamilton, 1821); vol. vii., pp. 221-226, of Hill Burton's *History of Scotland* (ed. 1876); and vol. i., p. 178, of Carlyle's *Reminiscences* (1881).

Drumcoltran, an old, strong, square tower in Kirkcunzeon parish, Kirkcudbrightshire.

Drumderfit, a ridge of hill (482 feet) in Kilmuir-Wester parish, Ross-shire, 4 miles N by W of Inverness. The ridge, which projects from the N side of Ord Hill, was the scene about 1400 of the destruction of an army of the Lord of the Isles, by a stratagem and a night attack on the part of the men of Inverness; and is extensively studded with cairns.

Drumderg, a prominent hill (1250 feet) in Loth parish, Sutherland, flanking the head of Glen Loth, and forming the southern shoulder of Beinn Dobhrain (2060 feet). The glen at its foot was the scene in the 16th century of a bloody conflict between the inhabitants of Loth and the men of Strathnaver.

Drumellie or Marlee Loch, a lake in Lethendy parish, Perthshire, 2½ miles W by S of Blairgowrie. An expansion of the river LUNAN, it lies 190 feet above sea-level, has an utmost length and width of 1 mile and 3¼ furlongs, and teems with perch and pike, the latter running up to 30 lbs. Its trout, of from 2 to 5 lbs., are very shy.—*Ord. Sur.*, sh. 56, 1870.

Drumelzier. See DRUMMELZIER.

Drumgeith, a village, with a public school, in Dundee parish, Forfarshire, 3 miles ENE of Dundee.

Drumgelloch, a village in New Monkland parish, Lanarkshire, 7 furlongs E of Airdrie.

Drumglow or **Dumglow**. See **CLEISH**.

Drumgray, a village in New Monkland parish, Lanarkshire, 4 miles ENE of Airdrie.

Drumin, a mansion in Inveraven parish, Banffshire, between the confluent Livet and Aven, 5 miles S of Baldinalloch. Close to it are the ruins of **CASTLE-DRUMIN**.

Druminnor House. See **AUCHINDOIR AND KEARN**.

Drumkilbo, an estate, with a mansion, in Meikle parish, E Perthshire, 9 furlongs E by N of Meikle village.

Drumlamford, an estate, with a mansion of 1838, in Colmonell parish, S Ayrshire, 5½ miles SE of Barrhill station. Near it is **Drumlamford Loch** (2 × 1¼ furl.).

Drumlanrig Castle, a seat of the Duke of Buccleuch in Durisdeer parish, Upper Nithsdale, Dumfriesshire, 17 miles NW of Dumfries, and 3½ NNW of Thornhill. It crowns the last spur of a *drum* or *long ridge* of hill, on the right bank of the Nith; and, visible from afar, stately, embowered in trees, itself has a view down all the Nith's rich valley, away to the heights of Criffel. It forms a hollow square, four stories high, surmounted with corner turrets, and presenting such an array of windows, that, say the dalesfolk, there are as many as the year has days. From the inner quadrangle staircases ascend at the angles in semicircular towers; without, the architraves of windows and doors are profusely adorned with hearts and stars, the armorial bearings of the Douglasses. The castle fronts N, but has also a noble façade to the E, combining on either side aspects of strength and beauty, the lineaments of a mansion and a fortress; herein, too, that it is nightly secured, not only by a thick door of oak, but by a ponderous gate of iron. Falsely ascribed to Inigo Jones, like Heriot's Hospital, which it no little resembles, the present castle took ten years in building, and was finished in 1689, the year after the Revolution. William, first Duke of Queensberry—celebrated in civil history as a statesman, and in the annals of the Covenanters as an abettor of persecution—planned and completed it; and he expended upon it such enormous sums of money, and during the only night that he passed within its walls, was so 'exacerbated by the inaccessibility of medical advice to relieve him from a temporary fit of illness,' that he quitted it in disgust, and afterwards wrote on the bills for its erection, 'The Deil pike out his een wha looks herein!' Among seventeen portraits, by Lely and Kneller mostly, one of William III. bears marks of claymore wounds—a memorial of the Highlanders' brief sojourn in the castle on their retreat from Derby (1745). The barony of Drumlanrig belonged to the Douglasses as early at least as 1356, and for four centuries passed from father to son with only a single break (1578), and then from grandsire to grandson. In 1338 James, second Earl of Douglas, conferred it on the elder of his two natural sons, Sir William de Douglas, first Baron of Drumlanrig, whose namesake and ninth descendant was created Viscount of Drumlanrig in 1628 and Earl of Queensberry in 1633. William, third Earl (1637-95) was created Duke of Queensberry and Earl of Drumlanrig in 1634; and Charles, third Duke (1693-1778), was succeeded by his first cousin, William, third Earl of March and Ruglen (1725-1810). 'Old Q,' that spoiler of woods and patron of the turf, the 'degenerate Douglas' of Wordsworth's indignant sonnet, was in turn succeeded by Henry, third Duke of Buccleuch, great-grandson of the second Duke of Queensberry; and his great-grandson, the sixth and present Duke, is eighteenth in descent from Sir William, the first baron, and owns in Dumfriesshire 253,514 acres, valued at £97,530 per annum. (See **DALKEITH**.) Among the episodes in Drumlanrig's history are its pillage by the English under Lord Wharton (1549), an entertainment given at it to James VI. (1 Aug. 1617), its capture by the Parliamentarians (1650), and Burns's frequent visits to its chamberlain, John M'Murdo (1788-96). From 1795 till his death 'Old Q,' wrought hideous havoc in the woods, here as at Neidpath; so that the hills which Burns had known clad with forest, Wordsworth in 1803 found bleak and naked. The castle, too, unoccupied by its lords for upwards of forty years, fell into disrepair, but

the fifth Duke, on attaining his majority in 1827, at once took in hand the work of restoration and replanting, so that the castle, woods, and gardens of Drumlanrig are now once more the glory of Upper Nithsdale—the woods, which retain a few survivors from the past (finest among these, two oaks, two beeches, a sycamore, and the limetree avenue of 1754); and the gardens and policies, which were thus described by Pennant (1772): 'The beauties of Drumlanrig are not confined to the highest part of the grounds; the walks, for a very considerable way by the sides of the Nith, abound with most picturesque and various scenery. Below the bridge the sides are prettily wooded, but not remarkably lofty; above, the views become wildly magnificent. The river runs through a deep and rocky channel, bounded by vast wooded cliffs that rise suddenly from its margin; and the prospect down from the summit is of a terrific depth, increased by the rolling of the black waters beneath. Two views are particularly fine—one of quick repeated but extensive meanders amidst broken sharp-pointed rocks, which often divide the river into several channels, interrupted by a short and foaming rapids coloured with a moory taint; the other is of a long strait, narrowed by the sides, precipitous and wooded, approaching each other equidistant, horrible from the blackness and fury of the river, and the fiery-red and black colours of the rocks, that have all the appearance of having sustained a change by the rage of another element.' The Glasgow and South-Western railway, a little N of Carronbridge station, traverses a stupendous tunnel on the Drumlanrig grounds, 4200 feet in length, and nearly 200 feet beneath the surface, with an archway measuring 27 feet by 29.—*Ord. Sur.*, shs. 15, 9, 1864-63. See **Dr Craufurd Tait Ramage's Drumlanrig Castle and the Douglasses** (Dumf. 1876).

Drumlean, a hamlet in Aberfoyle parish, Perthshire, near the NE shore of Loch Ard, 3 miles WNW of Aberfoyle hamlet.

Drumlemble. See **CAMPBELTOWN**.

Drumlithie, a village in Glenberrie parish, Kincardineshire, with a station on the Caledonian railway, 7¼ miles SW of Stonehaven. At it are a post and money order office, with railway telegraph, a school, Glenberrie Free church, and St John's Episcopal church (1863), a Gothic edifice, with organ and two stained-glass windows.

Drummachloy, Glenmore, or Etrick Burn. See **BUTE**.

Drummellan, an estate, with a mansion, in Maybole parish, Ayrshire, 1¼ mile NE of Maybole town.

Drummellie. See **DRUMELLIE**.

Drummelzier, a decayed village and a parish of SW Peeblesshire. The village, standing upon Powsail Burn, ¼ mile above its influx to the Tweed, is 2½ miles SE of Broughton station, 8 ESE of its post-town Biggar, 3 WSW of Stobo station, and 9¼ WSW of Peebles.

The parish included Tweedsmuir till 1643, and since 1742 has comprehended the southern and larger portion of the old parish of Dawick. It is bounded N by Stobo, E by Manor, SE by the Megget section of Lyne, S by Tweedsmuir, and W by Crawford and Culter in Lanarkshire and by Broughton. In outline rudely resembling a boot, with heel at SE and toe at SW, it has an utmost length of 11½ miles from its north-eastern angle near Stobo station to its south-western near Coomb Dod, an utmost breadth from E to W of 6½ miles, and an area of 18,029½ acres, of which 81 are water. For 5½ miles the silver **TWEED**, entering from Tweedsmuir 3 furlongs below Crook inn, meanders north-by-eastward across the south-western interior and on or close to the boundary with Broughton, next for 3½ miles east-by-northward along most of the Stobo border. During this course it falls from about 740 to 590 feet above sea-level, and is joined by five streams that rise in Drummelzier—Polmood Burn (running 4 miles WNW, mostly along the Tweedsmuir border), Kingleedors Burn (5¾ miles NE), Stanhope Burn (4½ miles WNW), Carton Burn (2¼ miles W by N), and Powsail Burn (1½ mile NW), this last being formed by Drummelzier Burn (2¾ miles NW) and

Scrape Burn (2½ miles WNW). The surface sinks, then, to 590 feet at the north-eastern angle of the parish, and rises thence southward and south-westward to *Breach Law (1684 feet), Scawd Law (1658), Den Knowes (1479), Finglen Rig (1295), Dulyard Brae (1609), the *Scrape (2347), *Pykestone Hill (2414), Drummelzier Law (2191), Glenstivon Dod (2256), Craig Head (1550), *Long Grain Knowe (2306), Taberon Law (2088), *DOLLAR LAW (2680), Lairside Knowe (1635), Polmoed Hill (1548), Birkside Law (1951), Hunt Law (2096), Dun Rig (2149), *Dun Law (2584), *Cramalt Craig (2723), and *BROAD LAW (2723), on the right or E side of the Tweed; and, on the left, to Quilt Hill (1087), *Glenlood Hill (1856), Nether Oliver Dod (1673), *Coomb Hill (2096), *Glenwhappen Rig (2262), Hillshaw Head (2141), and *Coomb Dod (2082), where asterisks mark those summits that culminate on the borders of the parish. These big brown hills fill nearly all the parish; only to the NW the Plain of Drummelzier, a fertile alluvial haugh, extends for about 2 miles along the Tweed, being, it is said, the largest level space on the river above Kelso. The rocks are mainly Lower Silurian, and include some workable slate and a mass of compact and very white limestone. The soil is rich loam on the haughs, and elsewhere is generally sharp and strong. The entire area is either pastoral or waste, with the exception of barely 700 acres in tillage and a little over 400 under wood, the latter chiefly on the Dawick estate. Drummelzier Castle, crowning a rocky knoll on the Tweed, 1 mile SW of the church, is a sheltered fragment of the 16th century fortalice of the head of the Tweedie sept; and on the top of a high pyramidal mount, 3½ furlongs E by N of the church, are vestiges of the more ancient Tinnies or Thanes Castle, demolished by order of James VI. in 1592. 'At the side of the Powsail Burn,' to quote from Pennicuk's *Description of Tweeddale* (1715), 'a little below the churchyard, the famous prophet Merlin is said to be buried. The particular place of his grave, at the foot of a thorn tree, was shown me, many years ago, by the old and reverend minister of the place, Mr Richard Brown; and here was the old prophecy fulfilled, delivered in Scotch rhyme to this purpose:

"When Tweed and Powsail meet at Merlin's grave,
Scotland and England shall one monarch have;"

for the same day that our King James the Sixth was crowned King of England, the river Tweed, by an extraordinary flood, so far overflowed the banks, that it met and joined with Powsail at the said grave, which was never before observed to fall out, nor since that time.' DAWICK House is the chief mansion; and the property is divided among five. Drummelzier is in the presbytery of Peebles and synod of Lothian and Tweeddale; the living is worth £272. St Cuthbert's chapel, in the upper part of the strath of Kingledoors, has disappeared; the present church, at the village, contains nearly 200 sittings; and a public school, with accommodation for 58 children, had (1891) an average attendance of 31, and a grant of £44, 18s. 6d. Pop. (1801) 278, (1831) 223, (1861) 209, (1871) 221, (1881) 208, (1891) 187.—*Ord. Sur.*, sh. 24, 1864.

Drummidoon. See DRIMADOON.

Drumminging, an estate in West Kilbride parish, Ayrshire, near the village.

Drummin. See DRUMIN and CASTLE-DRUMIN.

Drummochy, a village on the seaboard of Largo parish, Fife, a little W of Largo station.

Drummond Castle, the Scottish seat of the Earl of Ancaster, in Muthill parish, Perthshire, on a picturesque rocky site, 3¼ miles SSW of Crieff, and 3½ WNW of Muthill station. It was founded in 1491 by the first Lord Drummond, on his removal from STOBHALL; and was the seat of that nobleman's descendants, the Earls of Perth. The founder of the Drummond family is said to have been one Maurice, a Hungarian noble, who in 1067 arrived with Eadgar Ætheling and St Margaret at the court of Malcolm Ceannmor, and who from that king received the lands of Drymen or Drummond in Stirlingshire. His sixth descendant, Sir

Malcolm Drummond, was rewarded by Bruce with lands in Perthshire for services done at Bannockburn (1314), where he advised the use of caltrops against the enemy's horse—advice referred to in the family motto, 'Gang warily.' Annabella Drummond (1340-1403), his great-grand-daughter, was queen to Robert III., and so the ancestress of Queen Victoria; and Sir John Drummond (1446-1519), twelfth in descent from the founder, was father to fair Mistress Margret, the wife but not queen of James IV., who, with her sisters Euphemia and Sybilla, was poisoned at Drummond Castle in 1502. The same Sir John was created Lord Drummond in 1487; and James, fourth Lord Drummond, was created Earl of Perth in 1605. James, fourth Earl (1648-1716), was, like his predecessors, a zealous Royalist, and followed James II. into exile, from him receiving the title of Duke of Perth. His grandson, James, third titular Duke of Perth (1713-46), played a prominent part in the '45, commanding at Prestonpans, Carlisle, Falkirk, and Culloden. The Drummond estates, forfeited to the Crown, were conferred by George III. in 1784 on Captain James Drummond, who claimed to be heir-male of Lord John Drummond, this third Duke's brother, and who in 1797 was created Baron Perth and Drummond of Stobhall. At his death in 1800 they passed to his daughter, Clementina-Sarah, who in 1807 married the Hon. Peter Burrell, afterwards nineteenth Baron Willoughby de Eresby; and their grandson, Gilbert Henry Heathcote-Drummond-Willoughby (b. 1830), the twenty-third Baron Willoughby de Eresby and first Earl of Ancaster, and Joint Hereditary Great Chamberlain of England, in 1888 succeeded his mother in the Drummond estates, which from 1868 to 1871 were unsuccessfully claimed by George Drummond, Earl of Perth and Melfort, as nearest heir-male of the third Duke. His Lordship is the owner of large estates in Perthshire.

Drummond Castle is twofold, old and modern. The old edifice was visited often by James IV., and twice by Queen Mary in July and the Christmas week of 1566. It suffered great damage from the troops of Cromwell, and fell into neglect and dilapidation after the Revolution of 1688; but was strengthened and garrisoned by the royal troops in 1715, and, that this might not happen again, was mostly levelled to the foundation by the Jacobite Duchess of Perth in 1745. Partially rebuilt about 1822, it was put into good habitable condition, preparatory to a visit of Queen Victoria and Prince Albert in Sept. 1842; and now is partly fitted up as an armoury, well stored with Celtic claymores, battle-axes, and targets. The modern edifice, standing a little E of the old, forms two sides of a quadrangle, facing N and W; and is of plain construction, comparatively poor in architectural character; but contains some interesting portraits of the Stuarts. A temporary wooden pavilion, within the quadrangle, served as a banqueting hall during the visit of the Queen and Prince Albert; and an apartment in which Prince Charles Edward had slept, served as Prince Albert's dressing-room. A beautiful garden, often pronounced the finest in Great Britain, lies in three successive terraces, on a steep slope, under the S side of the castle rock; comprises about 10 acres; and exhibits the three great styles of European horticulture—the Italian, the Dutch, and the French. A nobly-wooded park* about 2 miles in diameter, with many a feature of both natural beauty and artificial embellishment, spreads all round the castle, as from a centre. Within it are the conical hill of Torlum (1291 feet), 1½ mile to the WNW; and the Pond of Drummond (5 × 2½ furl.), ½ mile to the ENE. The exquisite scenery of Strathearn lies under the eye and away to the E; and a sublime sweep of the Grampians fills all the view to the N.—*Ord. Sur.*, sh. 47, 1869. See *Beauties of Upper Strathearn* (3d ed., Crieff, 1870).

Drummore. See DRUMORE.

* The *Transactions of the Highland and Agricultural Society* for 1880-81 give the dimensions of twelve magnificent beeches here and seven oaks, according to which the tallest of the beeches is 101 feet high and 16 feet in girth at 1 foot from the ground, the thickest being 29 feet in girth and 71 feet high; whilst of the oaks the largest is 70 feet high and 19½ in girth.

Drummoosie Muir, a bleak, broad-backed, sandstone ridge on the mutual border of Dores, Inverness, Daviot, and Croy parishes, NE Inverness-shire. Forming the north-eastern and declining portion of the continuous south-eastern hill-screen of the Great Glen of Scotland, it presents to the view, from the neighbourhood of Inverness, an almost straight sky-line; has an average summit elevation of 800 feet above sea-level; and includes, at the NE end, the battlefield of CULLODEN.

Drummuir. See **BOTRIPHNE**.

Drumnadrochit, a hamlet, with a hotel, in Urquhart and Glenmoriston parish, Inverness-shire, in the mouth of Glen Urquhart, 1½ mile W by S of Temple Pier, on the W shore of Loch Ness, and 14 miles SW of Inverness, under which it has a post office, with money order, savings bank, and telegraph departments. Cattle fairs are held here on the Tuesdays of October and November before Beauly.

Drumnetermont or **Drummietermon**, a village in Dunnichen parish, Forfarshire.

Drumnarnurg, an estate in the parish of Killearn, Ross-shire.

Drumoak, a parish until 1891 partly in Kincardineshire and partly in Aberdeenshire, but placed by the Boundary Commissioners in that year wholly in the latter county. It is traversed by the Deeside section of the Great North of Scotland, with Drum and Park stations thereon, 10 and 11 miles WSW of Aberdeen. Drumoak has a post and money order office. It is bounded N by Echt and Peterculter, SE by Peterculter, S by Durris, and SW by Banchory-Ternan; and has an utmost length from E to W of 5½ miles, an utmost breadth from N to S of 3½ miles, and an area of 7401¼ acres, of which 164¼ are water. The broadening DEE flows 4½ miles east-north-eastward along all the boundary with Durris; and Gormack Burn 5½ miles eastward along that with Echt and Peterculter, to form with Leuchar Burn the Burn of Culter, which itself for ½ mile continues to separate Drumoak and Peterculter. Towards the SW the shallow, weedy Loch of Drum (6 × 2½ furl.) lies at an altitude of 225 feet. Sinking along the Burn of Culter to 123, and along the Dee to 82, feet above sea-level, the surface rises to 350 feet on Ord Hill, 414 on the central ridge of the Hill of Drum, and 254 at the parish church. Gneiss and granite are the prevailing rocks; and the soil, light and sandy along the Dee, elsewhere ranges from good black loamy on the higher southern slope to gravelly and moorish overlying moorland or retentive blue stony clay. Nearly a fourth of the entire area is under wood, over a sixth is pastoral or waste, and the rest is in cultivation. James Gregory (1638-75), the greatest philosopher of his age but one, that one being Newton, was born in Drumoak, his father being parish minister; and so perhaps was his brother David (1627-1720), who himself had a singular turn for mechanics and mathematics. Arrow-heads, three stone coffins, and silver coins have been found; a curious sculptured stone was transferred in 1822 from Keith's Muir to the top of Hawk Hillock in the policies of Park; but the chief antiquity is the tower of Drum, noticed under DRUM CASTLE, the mansion of PARK being separately noticed. Drumoak is in the presbytery and synod of Aberdeenshire; the living is worth £194. The church, ½ mile N of Park station, is a good Gothic edifice of 1836 (650 sittings), and had a new choir seat and two new windows added in 1891; and a Free church, erected at a cost of £1500, was opened at Park in January, 1880. Two public schools, Drumoak and Glashmore, with respective accommodation for 155 and 44 children, had (1891) an average attendance of 84 and 25, and grants of £85, 12s. and £22, 7s. 6d. Pop. (1801) 648, (1831) 804, (1861) 996, (1871) 1032, (1881) 930, (1891) 869.—*Ord. Sur.*, shs. 76, 77, 66, 1871-76.

Drumochter (Gael. *drùm-uachdar*, 'upper ridge'), a mountain pass (1500 feet) over the Central Grampians, on the mutual border of Perth and Inverness shires, 5½ miles S of Dalwhinnie station, and 2 NNW of Dalnaspidal. Flanked to the W by the Boar of Badenoch (2452 feet), Bruach nan Iomalrean (3175), and BEN UDLAMAN (3306), to the E by Creagan Doire an Donaidh

(2367) and Chaoruinn (3004), it is traversed both by the Great North Road from Perth to Inverness and by the Highland railway, being the highest point reached by any railway in the United Kingdom. Snow often drifts here to a great extent, lying 30 feet deep in some storms.—*Ord. Sur.*, sh. 63, 1873.

Drumochy. See **DRUMMOCHY**.

Drumore, a lochlet (1 × ½ furl.) on the mutual border of Kirkmichael and Maybole parishes, Ayrshire, ½ mile NNW of Kirkmichael village.

Drumore, a seaport village in Kirkmaiden parish, SW Wigtownshire, on a small bay of its own name, at the W side of Luce Bay, 5 miles N by W of the Mull of Galloway, and 17½ S by E of Stranraer, with which it communicates daily by coach. It has a post office, with money order and savings bank departments, 4 inns, a public school, a small harbour with quay and good anchorage, and ruins of a castle, which was habitable in 1684; and it carries on some small commerce in the export of agricultural produce, and the import of coals and lime.

Drumore, an estate, with a mansion, in Prestonpans parish, Haddingtonshire, on the coast, 1½ mile ENE of Musselburgh. Its owner is Col. William Aitchison (b. 1827; suc 1846).

Drumore, a station at the mutual boundary of Anwoth and Kirkmabreck parishes, SW Kirkcudbrightshire, on the Castle-Douglas and Portpatrick railway, 4¾ miles ENE of Creetown.

Drumour. See **DUNKELD, LITTLE**.

Drumpellier, extensive iron-works and mineral pits of Old Monkland parish, Lanarkshire, in the western vicinity of Coatbridge. Drumpellier House, 1¼ mile W of the town, is the property of Col. Sir D. C. R. C. Buchanan, K.C.B., of CARRADALE.

Drumrack, a hill in Crail parish, Fife.

Drumry, an estate on the W border of New Kilpatrick parish, Dumbartonshire, 2¼ miles ESE of Duntocher. From the Callender family it passed in 1346 to the Livingstones, and from Sir James Hamilton of Fynart in 1528 to Laurence Crawford of Kilhinnie, ancestor of the Crawford-Polloks of POLLOK. Some ruins on it have been thought to be those of a chapel which he founded, but more probably are a remnant of Drumry Castle.

Drumsargard or **Drumsharg**, an ancient barony in Cambuslang parish, Lanarkshire. Comprising nearly two-thirds of the parish, it belonged successively to the Oliphants, Murrays, Douglasses, and Hamiltons, and changed its name in the 17th century to Cambuslang. Its stately castle, crowning a round flat-topped mound, 20 feet high, 1¾ mile ESE of Cambuslang church, has left scarcely a vestige.

Drumsharg. See **DRUMSARGARD**.

Drumshoreland, a station and a moor in Uphall parish, Linlithgowshire. The station is on the Edinburgh and Bathgate section of the North British, 1 mile S of Broxhurn, 7¾ miles E by N of Bathgate, and 11½ W of Edinburgh. The moor, extending from the southern vicinity of the station to the Almond or Edinburghshire border, comprises some 200 acres of uncultivated land, one-half of which is covered with natural wood. Here is a fever hospital.

Drumsleet. See **TROQUEER**.

Drumsturdy, a straggling village in Monifieth parish, Forfarshire, at the N base of Laws Hill, 6 miles ENE of Dundee.

Drumtochty Castle, a mansion in Fordoun parish, Kincardineshire, on the left bank of Luther Water near its source, 1 mile NNE of Strathfinella Hill (1358 feet), 2 miles WNW of Auchencblae village, and 4½ NW of Fordoun station. A splendid Gothic edifice, built at a cost of £30,000 from designs by Gillespie Graham, and standing in finely-wooded grounds, it is the seat of the Rev. J. S. Gammell of COUNTESSWELLS.

Drumvaich, a hamlet in Kilmadock parish, Perthshire, on the left bank of the Teith, 4 miles WNW of Doune.

Drunkie, a loch on the mutual border of Aherfoyle

and Port of Monteith parishes, Perthshire, 3 miles NNE of Aberfoyle hamlet, and 3 SE of the Trosachs Hotel. Lying 450 feet above sea-level, it extends 9 furlongs north-north-eastward to within $\frac{1}{4}$ mile of Loch Venachar, and varies in width between 1 and $7\frac{1}{2}$ furlongs, the latter measured along a narrow westward arm. Its shores are prettily wooded, and it contains fine red-fleshed trout, running from $\frac{3}{4}$ to 1 lb.—*Ord. Sur.*, sh. 38, 1871.

Drybridge, a village in Whitburn parish, Linlithgowshire, 1 mile NE of the meeting-point of Linlithgow, Edinburgh, and Lanark shires, and within $\frac{1}{4}$ mile of Fauldhouse and Crofthead stations.

Drybridge, a station in Dundonald parish, Ayrshire, on the Kilmarnock and Troon railway, 5 miles W by S of Kilmarnock.

Dryburgh Abbey, a noble monastic ruin in Merton parish, SW Berwickshire, $1\frac{1}{4}$ mile E of Newtown St Boswell's station, and $4\frac{1}{2}$ miles ESE of Melrose, or 6 by way of Bemersyde Hill. It stands, 200 feet above sea-level, in the midst of a low green haugh, that, measuring $3\frac{1}{2}$ by $2\frac{1}{2}$ furlongs, is sheltered northward by a woody hill (588 feet), and on the other three sides is washed by a horseshoe bend of 'chiming Tweed,' whose right or opposite bank is steep and copse-clad—beyond it the triple Eildons (1385 feet). The haugh itself is an orchard, dedicated by 'David, Earl of Buchan, to his most excellent Parents;' and the ruins, of reddish-brown sandstone, bewn from the quarry of Dryburgh, are so overgrown with foliage that 'everywhere you behold the usurpation of nature over art. In one roofless apartment a fine spruce and holly are to be seen flourishing in the rubbish; in others, the walls are completely covered with ivy; and, even on the top of some of the arches, trees have sprung up to a considerable growth, and, clustering with the aspiring pinnacles, add character to the Gothic pile. These aged trees on the summit of the walls are the surest records we have of the antiquity of its destruction' (*Monastic Annals of Teviotdale*). The site is uneven, the chapter-house standing ten steps below, and the church ten steps above, the cloisters, which, grassy and open now, were 93 feet square. To the N of them stood the church; to the S the refectory (100 x 30 feet), with beautiful W rose-window of twelve lights; and to the E, the abbot's parlour, library (23 x 23 feet), dormitory (45 x 23 feet), chapter-house (47 x 23 feet; 20 high), St Modan's chapel or sacristy (24 x 13 feet), etc. All the conventual buildings are in the Transition style from Romanesque to First Pointed; and the most perfect of them all is the chapter-house, which still retains its barrel-vaulted roof and arched sedilia along its eastern wall, whilst a double circle on the floor marks, it is said, the founder's sepulchre. Nearly opposite this chapter-house is a goodly yew-tree, as old as, if not older than, the abbey. The church was cruciform, and comprised a six-bayed nave (98 x 55 feet), a shallow transept (75 x 20 feet) with eastern aisles, and a two-bayed choir with a presbytery beyond, in place of a lady chapel—the whole building measuring 190 feet from end to end. Transept and choir are First Pointed in style; but the nave, restored in the first half of the 14th century, is altogether Second Pointed. 'Are' and 'is,' we say, though little remains of this great monument of former piety save the nave's western gable, the gable of the S transept with its large and fine five-light window, and St Mary's Aisle—a fragment of choir and N transept, containing the tombs of the Haigs of Bemersyde, of the Erskines, and of Sir Walter and Sir Walter's kinsfolk. St Mary's Aisle, whereof wrote Alexander Smith, that 'when the swollen Tweed raves as it sweeps, red and broad, round the ruins of Dryburgh, you think of him who rests there—the magician asleep in the lap of legends old, the sorcerer buried in the heart of the land he has made enchanted.'

The eleventh Earl of Buchan, we are told by Allan Cunningham, waited on Lady Scott in 1819, when the illustrious author of *Waverley* was brought nigh to the grave by a grievous illness, and begged her to intercede

with her husband to do him the honour of being buried in Dryburgh. 'The place,' said the Earl, 'is very beautiful,—just such a place as the poet loves; and as he has a fine taste that way, he is sure of being gratified with my offer.' Scott, it is said, good-humouredly promised to give Lord Buchan the refusal, since he seemed so solicitous. The peer himself, however, was buried in Dryburgh three years before the bard. The last resting-place of Sir Walter Scott is a small spot of ground in an area formed by four pillars, in one of the ruined aisles that belonged to his boasted forbears—the Haliburtons of Merton, an ancient baronial family, of which Sir Walter's paternal grandmother was a member, and of which Sir Walter himself was the lineal representative. On a side wall is the following inscription:—'Sub hoc tumulo jacet Joannes Haliburtonus, Baro de Merton, vir religione et virtute clarus, qui obiit 17 die Augusti, 1640.' Beneath there is a coat-of-arms. On the back wall the later history of the spot is expressed on a tablet as follows:—'Hunc locum sepultura D. Seneschallus Buchanæ Comes Gualtero, Thomæ et Roberto Scott, Halihurtoni nepotibus, concessit, 1791;'—that is to say, the Earl of Buchan granted this place of sepulture in 1791, to Walter, Thomas, and Robert Scott, descendants of the Laird of Haliburton. The persons indicated were the father and uncles of Sir Walter. The second of these uncles, however, and his own wife, were the only members of his family there interred before him. Lady Scott was buried there in May 1826; Sir Walter himself on 26 Sept. 1832; his son, Colonel Sir Walter Scott, in Feb. 1847; and John Gibson Lockhart, 'his son-in-law, biographer, and friend,' in Nov. 1854. So small is the space that the body of 'the mighty minstrel' had to be laid in a direction north and south, instead of eastward, facing the Advent dawn.

'So there, in solemn solitude,
In that sequester'd spot
Lies mingling with its kindred clay
The dust of Walter Scott!
Ah! where is now the flashing eye
That kindled up at Flodden field,
That saw, in fancy, onsets fierce,
And clashing spear and shield,—

'The eager and untiring step,
That urged the search for Border lore,
To make old Scotland's heroes known
On every peopled shore,—
The wondrous spell that summon'd up
The charging squadrons fierce and fast,
And garnish'd every cottage wall
With pictures of the past,—

'The graphic pen that drew at once
The traits alike so truly shown
In Bertram's faithful pedagogue,
And haughty Marmion,—
The hand that equally could paint,
And give to each proportion fair,
The stern, the wild Meg Merrilies,
And lovely Lady Clare,—

'The glowing dreams of bright romance
That teeming fill'd his ample brow,—
Where is his daring chivalry,
Where are his visions now?
The open hand, the generous heart
That joy'd to soothe a neighbour's pains!
Naught, naught, we see, save grass and weeds
And solemn silence reigns.

'The flashing eye is dimm'd for aye;
The stalwart limb is stiff and cold;
No longer pours his trumpet-note
To wake the jousts of old.
The generous heart, the open hand,
The ruddy cheek, the silver hair,
Are mouldering in the silent dust—
All, all is lonely there!'

The same eleventh Earl of Buchan was devotedly attached to Dryburgh. At a short distance from the abbey he constructed, in 1817, an elegant wire suspension-bridge over the Tweed, 260 feet in length, and 4 feet 7 inches between the rails, which was blown down about 1850. His Lordship also erected on his grounds here an Ionic temple, with a statue of Apollo in the inside, and

a bust of the bard of *The Seasons* surmounting the dome. He raised, too, a colossal statue of Sir William Wallace on the summit of a steep and thickly-planted hill; which, placed on its pedestal 22 Sept. 1814, was the anniversary of the victory at Stirling Bridge in 1297, was the first Wallace monument in Scotland. 'It occupies so eminent a situation,' says Mr Chambers, 'that Wallace, frowning towards England, is visible even from Berwick, a distance of more than 30 miles.' The statue is 21½ feet high, and is formed of red sandstone, painted white. It was designed by Mr John Smith, a self-taught sculptor, from a supposed authentic portrait, which was purchased in France by the father of the late Sir Philip Ainslie of Pilton. The hero is represented in the ancient Scottish dress and armour, with a shield hanging from his left hand, and leaning lightly on his spear with his right. A tablet below bears an appropriate inscription.

Burns visited the ruins on 10 May 1787, Wordsworth and his sister Dorothy on 20 Sept. 1803; and Sir Walter Scott, in his *Minstrelsy of the Scottish Border*, gives an interesting account of one who actually dwelt amongst them—the Nun of Dryburgh. This was a poor wanderer, who took up her abode, about the middle of last century, in a vault which during the day she never quitted. It was supposed, from an account she gave of a spirit who used to arrange her habitation at night, during her absence in search of food or charity at the residences of gentlemen in the neighbourhood, that the vault was haunted; and it was long, on this account, regarded with terror by the country folk. She never could be prevailed upon to relate to her friends the reason why she adopted so singular a course of life. 'But it was believed,' says Sir Walter, 'that it was occasioned by a vow that, during the absence of a man to whom she was attached, she would never look upon the sun. Her lover never returned. He fell during the civil war of 1745-6, and she never more beheld the light of day.'

The name Dryburgh has been derived by followers of Stukely from the Celtic *darach-bruaich*, 'bank of the grove of oaks;' and vestiges, we are told, of Pagan worship have been found in the Bass Hill, a neighbouring eminence, among which was an instrument used for killing the victims in sacrifice. St Modan, a champion of the Roman party, came hither from Ireland in the first half of the 8th century; but it is something worse than guesswork to suppose, with Mr Morton, that he founded a monastery which 'was probably destroyed by the ferocious Saxon invaders under Ida, the flame-bearer, who landed on the coast of Yorkshire in 547, and, after subduing Northumberland, added this part of Scotland to his dominions by his victory over the Scoto-Britons at Cattraeth.' St Mary's Abbey was founded by Hugh de Morville, Lord of Lauderdale and Constable of Scotland, in 1150.* According to the Chronicle of Melrose, Beatrix de Beauchamp, wife of De Morville, obtained a charter of confirmation for the new foundation from David I.; and the cemetery was consecrated on St Martin's Day, 1150, 'that no demons might haunt it'; but the community did not come into residence till 13 Dec. 1152. The monks or canons regular (to give them their proper title) were Premonstratensians from Alnwick; and their garb was a coarse black cassock, covered by a white woollen cope, 'in imitation of the angels of heaven, who are clothed in white garments,' hence their familiar designation—White Friars. Tradition says, that the English, under Edward II., in their retreat in 1322, provoked by the imprudent triumph of the monks in ringing the church bells at their departure, returned and burned the abbey in revenge. Bower, however, as Dr Hill Burton remarks, 'cannot be quite correct in saying that Dryburgh was entirely reduced to powder, since

part of the building yet remaining is of older date than the invasion.' King Robert the Bruce contributed liberally towards its repair; but it has been doubted whether it ever was fully restored to its original magnificence. Certain flagrant disorders, which occurred here in the latter half of the 14th century, drew down the severe censure of Pope Gregory XI. upon the inmates. An *alumnus* of Dryburgh about this period has been claimed in the 'Philosophical Strophe,' to whom and the 'moral Gower' Chaucer inscribed his *Troilus and Cresside*; nay, Chaucer himself is said to have paid a visit to Dryburgh. Alas! the claim is ruthlessly demolished by Dr Hill Burton in Billings' *Antiquities*. Within 20 miles of the Border, the abbey was ever exposed to hostile assaults; and we hear of its burning by Richard II. in 1385, by Sir Robert Bowes and Sir Bryan Latoun in 1544, and again by the Earl of Hertford in 1545, in which last year, some months before, James Stewart, the abbot commendator, had with other chieftains crossed the Tweed into Northumberland, and burned the village of Horncliffe, but by the garrisons of Norham and Berwick had been attacked and driven back with heavy loss, before he could effect more damage. This same James Stewart was, through a natural daughter, the ancestor of the Rev. Henry Erskine of Chirside (1624-96) and his two sons, the founders of the Secession, Ebenezer (1680-1754) and Ralph (1685-1752). Of these Henry and Ebenezer were both of them born at Dryburgh, and the former is buried here.

Annexed to the Crown in 1587, the lands of Dryburgh were by a charter of 1604 granted to John Erskine, Earl of Mar, and erected into the lordship and barony of Cardross. From the Earl's great-grandson, Henry, third Lord Cardross, they passed by purchase in 1682 to Sir Patrick Scott, younger of Ancrum, in 1700 to Thomas Haliburton of Newmains, in 1767 to Lieut.-Col. Charles Tod, and finally in 1786 to David Stewart Erskine, eleventh Earl of Buchan. Their present holder is his great-great-grandson, George Oswald Harry Erskine Biber-Erskine, Esq. (b. 1857; suc. 1870), who owns 359 acres in the shire, valued at £977 per annum. His seat, called Dryburgh Abbey, adjoins the ruins, as also does Dryburgh House. The latter, a Scottish Baronial edifice, enlarged by Messrs Peddie & Kinnear in 1877, was for some time the residence of the Right Hon. Charles Baillie, Lord Jerviswoode (1804-79).—*Ord. Sur.*, sh. 25, 1865. See James Morton's *Monastic Annals of Teviotdale* (Edinb. 1832); Sir D. Erskine's *Annals and Antiquities of Dryburgh* (Kelso, 1836); J. Spottiswoode's *Liber S. Marie de Dryburgh* (Bannatyne Club, Edinb., 1847); *Dryburgh Abbey: its Monks and its Lords* (3d ed., Lond., 1864); vol. ii., p. 321, of the Rev. J. F. Gordon's *Monasticon* (Glasg. 1868); and Jas. F. Hunnewell's *Lands of Scott* (Edinb. 1871).

Dry Burn, a rivulet in the E of Haddingtonshire, issuing from little Black Loch (500 feet), in Spott parish, on the northern slope of the Eastern Lammermuirs, and running 5½ miles east-north-eastward, chiefly along the boundary between Innerwick and Dunbar parishes, to the sea in the vicinity of Skalcraw, 4 miles ESE of Dunbar town.

Dryfe, a small river of Annandale, Dumfriesshire, rising in the northern extremity of Hutton parish, at an altitude of 1900 feet, on the southern slope of Loch Fell (2256 feet), within 1½ mile of the Selkirkshire border, and 5½ miles E by S of Moffat. Thence it runs 18½ miles southward and south-south-westward, through the northern half of Hutton, across the eastern wing of Applegarth, and through the W of Dryfesdale, till it falls into the Annan at a point 2 miles W of Lockerbie, and 140 feet above sea-level. Its basin, above Hutton church, is hilly moorland; but, in the middle and lower parts, is champaign country, nearly all under the plough. Open to the public, its waters contain abundance of trout, herlings, and a few salmon. In fair weather small and singularly limpid, it swells after heavy rain into rapid and roaring freshet, and occasionally, over breadths of rich loamy soil, cuts out a new channel.

* On p. 166 of his *History and Poetry of the Scottish Border* (1878), Prof. Veitch remarks that 'Dryburgh was founded a little later (than 1136) by Hugh de Morville, who succeeded his father in 1159, and died in 1162. Some hold that Morville was implicated in the murder of Thomas à Becket. If so, the founding and rich endowment of Dryburgh was probably an expiation for this early deed of his life.' But, surely, Becket was murdered in 1170.

The ancient parish church of Dryfesdale stood on Kirkhill, on the SE of the Dryfe. In 1670, both it and part of its graveyard were swept away, and their site converted into a sand-bed, by one of the Dryfe's impetuous inundations. Next year, a new church was built near the former site, on what was thought a more secure spot; yet even this was, in a few years, so menaced by the encroachments of the river, which tore away piece after piece of the graveyard, that, along with its site, it was finally abandoned. These disasters were regarded as the verification of an old saying of Thomas the Rhymer, which a less astute observer of the furiously devastating power of the Dryfe than he might very safely have uttered—

'Let spades and shools do what they may,
Dryfe shall tak Drysdale kirk away.'

The church of 1670, and even greater part of the cemetery, have now wholly disappeared. A story has long been current in Annandale, that 'a Dryfesdale man once buried a wife and married a wife in ae day,' which fell out thus. A widower, after mourning for a reasonable time the spouse whom he had buried in Dryfesdale, was proceeding, on a wet and stormy day, to take to himself a second helpmate, when, crossing the bridge at the head of the bridal party, he saw the coffin of his former wife falling from 'the scaur' into the torrent, and gliding towards the spot on which he stood. To rescue it from the water, and re-commit it to the earth was no long task, after which the wedding proceeded merrily. The tract along the lowermost reach of the Dryfe is a stretch of low level land, consisting of silt and detritus brought down by the freshets, and called Dryfe Sands. The spot is memorable as the scene of a sanguinary conflict, in Dec. 1593, between the Maxwells and the Johnstones. The former, though much superior in numbers, were routed and pursued with the loss of 700 men, including their commander, Lord Maxwell. Many, on reaching Lockerbie, were there cut down in a manner so ruthless as to give rise to the proverbial phrase for a severe wound, 'a Lockerbie lick.' Two very aged thorn-trees, the 'Maxwell Thorns,' stood on the field of conflict, $\frac{1}{2}$ mile below the old churchyard of Dryfesdale, but about 1845 were swept away by a freshet.—*Ord. Sur.*, shs. 16, 10, 1864. See pp. 232-234 of Robert Chambers' *Popular Rhymes of Scotland* (ed. 1870).

Dryfe Sands. See DRYFE.

Dryfesdale (popularly *Drysdale*), a parish in the middle of Annandale, Dumfriesshire, containing in the S the village of BENGALL, and towards the centre the town of LOCKERBIE, whose station on the main line of the Caledonian is 25 $\frac{3}{4}$ miles NW of Carlisle, and 75 $\frac{1}{4}$ S by W of Edinburgh. It is bounded N and NE by Applegarth, E by Hutton, SE by Tundergarth, S by St Mungo, SW by Dalton, and W by Lochmaben. Its utmost length, from NNE to SSW, is 7 $\frac{1}{2}$ miles; its breadth, from E to W, varies between 1 mile and 4 $\frac{1}{2}$ miles; and its area is 10,372 acres, of which 140 $\frac{3}{4}$ are water. From below Applegarth church to just below Daltonhook the ANNAN winds 9 miles south-by-eastward, tracing, roughly or closely, the Lochmaben and Dalton boundaries; and DRYFE Water, its affluent, flows 4 miles south-westward on the Applegarth border and through the north-western interior. Along the Hutton border CORRIE Water runs 1 $\frac{1}{2}$ mile southward to the Water of MILK, which itself meanders 2 $\frac{3}{4}$ miles south-westward along all the Tundergarth boundary. In the flat S, the surface, where the Annan quits this parish, sinks to less than 140 feet above sea-level, thence rising north-north-eastward to 234 feet at Bengall Hill, 391 near Lockerbie Hill, 733 at Whitewoolen Hill, 708 at Sloda Hill, 734 at Croft-head Hill, and 774 on Newfield Moor—heights that command a very extensive view. The rocks of the hills are eruptive and Silurian; those of the plains include a very soft sandstone and a dark-coloured limestone. The soil, on most of the hills, is rich enough to be arable; on much of the low flat grounds, is light and dry; and along the stream, is deep, fertile, alluvial loam. About

350 acres are pastoral or waste, 250 are under wood, and all the rest of the land is either regularly or occasionally in tillage. Vestiges of strong old towers are at Nether-place, Old Walls, Kirkton Mains, Myrehead, and Daltonhook. Remains of eight camps, some square or Roman, others circular or Caledonian, occur in different places, chiefly on eminences; and two of them, Roman and Caledonian, confront each other on hills to the NE of Bengall village. Traces exist, too, of a Roman road, running northward from England by way of Brunswark Hill, and sending off a westward branch to Nithsdale. Mansions are Lockerbie House and Dryfeholm; and 6 proprietors hold each an annual value of £500 and upwards, and 15 of between £100 and £500. The estate of Underwood, extending to 420 acres, was sold in 1892 for £11,500. Dryfesdale is in the presbytery of Lochmaben and synod of Dumfries; the living is worth £222. The churches are all at LOCKERBIE, where Dryfesdale public school, a Gothic building erected in 1875 at a cost of £4500, with accommodation for 728 children, had (1891) an average attendance of 466, and a grant of £495, 7s. 4d. Pop. (1801) 1893, (1831) 2283, (1861) 2509, (1871) 2825, (1881) 2971, (1891) 3233.—*Ord. Sur.*, sh. 10, 1864.

Drygate. See GLASGOW.

Drygrange, an estate, with a mansion, in Melrose parish, Roxburghshire, on the right bank of Leader Water, $\frac{2}{3}$ mile above its influx to the Tweed, and 2 $\frac{1}{2}$ miles ENE of Melrose. The mansion, a fine old building, amid ancestral trees, occupies the site of the chief granary of Melrose Abbey. Granted by the Abbey to David Lithgow in the reign of James V., the estate has come, through several hands, to Sir George Hector Leith-Buchanan, seventh Bart. since 1775 (b. 1833; suc. 1842), who married in 1861 the only daughter of the late Thomas Tod, Esq. of Drygrange, and who holds 1315 acres in the shire, valued at £172 $\frac{1}{2}$ per annum. Drygrange Bridge, across the Tweed near the Leader's confluence, takes over the road from Melrose and St Boswells to Lauder, and commands a beautiful view of—

'Ercildoune and Cowdenknowes,
Where Homes had ance commanding;
And Drygrange w' the milk-white ewes,
'Twixt Tweed and Leader standing.'

Dryhope, a burn, a hill, and a Border peel-tower in the W of Yarrow parish, Selkirkshire. The burn rises on Deepslake Knowe (1717 feet), and runs 2 $\frac{1}{2}$ miles south-south-eastward to Yarrow Water, at a point 2 $\frac{1}{2}$ furlongs NE of the foot of St Mary's Loch. The hill, called Dryhope Rig, flanks the right side of the upper course of the burn, and has an altitude of 1712 feet above sea-level. Dryhope Tower, crowning a slight eminence on the right bank of the burn, 5 furlongs N of the Loch, and 15 $\frac{1}{2}$ miles WSW of Selkirk, was one of the strongest peel-houses in Etrick Forest—square and lofty, commanding a glorious view up the vale of the Yarrow and over the Loch of the Lowes away to the Moffatdale Hills. Here, about 1550, was born the 'Flower of Yarrow,' Mary Scott, the bride of Wat Scott of HARDEN, whom her father engaged to find in man's and horse meat at his tower of Dryhope for a year and a day, in return for the profits of the first Michaelmas moon. Five barons pledged themselves for the observance of the contract, which was signed for all parties by a notary public, none of the seven being able to write his name. Wat either succeeded or ousted his father-in-law, for on 13 July 1592, James VI. issued at Peebles a warrant to demolish the fortalice of Dryhope, 'pertaining to Walter Scott of Harden, who was art and part of the late treasonable fact perpetrate against his highness' own person at Falkland.' Demolished, however, Dryhope was certainly not, for the tower, though roofless, is still in good preservation—the property still of a Scott, the Duke of Buccleuch.—*Ord. Sur.*, sh. 16, 1864.

Drymen, a village and a parish of SW Stirlingshire. The village stands 1 $\frac{1}{2}$ mile N by W of Drymen station, on the Forth and Clyde Junction section of the North British, this being 6 $\frac{3}{4}$ miles ENE of Balloch and 23 $\frac{1}{2}$ WSW of Stirling; and, forming a good centre for visit-

ing some of the fine scenery in the W of Stirlingshire; it has a post office under Glasgow, with all departments, a branch of the Royal Bank, a public hall, a reading room, a curling club, and fairs for cattle, sheep, and horses on the last Wednesday of April, 17 May, and the Friday before the first Doune November market; for hiring on 21 May and the first Friday of November.

The parish is bounded N by Aberfoyle and Port of Monteith, in Perthshire; E and SE by Kippen, Balforn, and Killearn; S and SW by Dumbarton and Kilmarnock, in Dumbartonshire; and W by Buchanan. Its utmost length, from N by E to S by W, is 11 miles; its breadth varies between $6\frac{1}{2}$ furlongs and $10\frac{3}{4}$ miles; and its area is $30,973\frac{1}{4}$ acres, of which 123 are water. **ENDRICK** Water, entering from Killearn, flows $7\frac{3}{4}$ miles southward and west-north-westward 'in many a loop and link' along the Killearn and Kilmarnock borders and across the southern interior; from the N it is joined here by Altquhar, from the SW by Catter Burn. **Duchray** and **Kelty** Waters, again, both head-streams of the Forth, trace 4 and $2\frac{1}{2}$ miles of the Aberfoyle border; and the **FORTH** itself winds $3\frac{3}{4}$ miles eastward along all the boundary with Port of Monteith. The drainage belongs thus partly to the Clyde and partly to the Forth; but the 'divide' between the two river systems is marked by no lofty height. Along the Endrick the surface sinks to about 30 feet above sea-level, along the Forth to 40; and the highest point in Drymen between is **Bat a' Charchel** (750 feet), whilst the road from Drymen village to Bucklyvie nowhere exceeds 310 feet. In the southern wing of the parish are **Meikle Caldou** (602 feet) and **Cameron Muir** (530); in the north-western, **Drum of Clasmore** (577), **Maol Ruadh** (624), ***Gualann** (1514), **Elrig** (683), **Maol an Iarairne** (720), and the *south-eastern shoulder (1750) of **BENVRAICK**, where asterisks mark those heights that rise on the Buchanan boundary. The tract along the Endrick, a narrow vale, in places scarcely a mile in width, contrasts strongly with the wide desolate moorlands on either side of it, and presents in some parts very beautiful scenery. A stretch of about 3 miles by $2\frac{1}{2}$, to the S of this valley, mainly consists of **Cameron Muir**, which passes into junction with the western skirts of the **Lennox Hills**; and the region to the N of the valley, measuring about $8\frac{1}{2}$ miles by 9, and bisected by the watershed between the Clyde and Forth, is almost all either moss or moor or mountain, its north-eastern portion forming part of **Flanders Moss**, which, lying along the Forth, has been in recent years extensively reclaimed. The greater portion of the arable land lies at elevations of from 40 to 250 feet above sea-level; but here and there cultivation has been carried as high as 450 feet. The soil ranges from fertile clay and rich brown loam, through nearly all gradations, to moorish earth and spongy moss; but the commonest soil is poor and tilly, over a cold retentive bottom. About 9944 acres are in tillage, 1350 pasture, 556 under wood, and 21,700 waste. **DUCHRAY** Castle is an interesting antiquity. A large cairn, in which sarcophagi and human bones were found, was on **East Cameron** farm; and remains of a Roman fort, known as **Garfarran Peel**, are on **Garfarran** farm, at the western extremity of **Flanders Moss**. **Drumbeg**, near the parish church, was long but falsely believed to be the birthplace of **John Napier of Merchiston** (1550-1617), whose patrimonial inheritance was partly situate here, and who at the house of **Gartness**, on the **Endrick**, close to a waterfall, the **Pot of Gartness**, worked out much of his famous treatise on logarithms. **Drymen** parish gives name to the noble family of **Drunmond**. Mansions are **Endrickbank** and **Park House**. The Duke of Montrose and R. B. Cunningham Graham, Esq. of **Gartmore**, are the chief proprietors. **Drymen** is in the presbytery of **Dumbarton** and synod of **Glasgow and Ayr**; the living is worth £275. The parish church (1771; 400 sittings) stands near the village, where also is a U.P. church (1819). Three public schools, **ATCHINTROIG**, **Drymen**, and **Finnich**, with respective accommodation for 59, 150, and 51 children, had (1891) an average attendance of 18, 34, and 34, and grants of £32, 3s., £24, 3s., and

£40, 15s. 6d. Valuation (1892) £29,194, 2s. 6d., including £13,416 for railways. Pop. (1801) 1607, (1831) 1690, (1861) 1619, (1871) 1405, (1881) 1431, (1891) 1512.—*Ord. Sur.*, shs. 33, 30, 1871-66.

Drynie, an estate, with a mansiou, in **Kilmuir-Wester** parish, **Ross-shire**, near the W shore of the **Moray Firth**, 4 miles N by E of **Inverness**.

Drynoch, a burn in **Bracadale** parish, **Isle of Skye**, **Inverness-shire**, running $4\frac{1}{2}$ miles westward to the head of **Loch Harport**.

Drysdale. See **DRYFESDALE**.

Duag, an alpine streamlet in the W of **Blair Athole** parish, **Perthshire**, rising near the watershed of the central **Grampians**, and running impetuously $2\frac{3}{4}$ miles south-south-eastward to the **Garry** in the vicinity of **Dalnaspidal**.

Duait, a burn of **Strathblane** and **Killearn** parishes, **Stirlingshire**, rising on **Auchineden Hill**, at an altitude of 830 feet, and running 3 miles north-north-eastward, chiefly along the mutual boundary of the parishes, till, near **Killearn House**, it falls into the **Carnock**, a sub-affluent of the **Endrick**. In a deep, wooded glen a little above its mouth, it forms, with several smaller falls, one beautiful cascade of 60 feet.—*Ord. Sur.*, sh. 30, 1866.

Duard or **Rudha Dubh Ard**, a headland (91 feet) to the N of the entrance of **Loch Broom**, **NW Ross-shire**, opposite **Horse island**, and 3 miles NW of **Ullapool**.

Duart, a small bay and a ruined castle in **Torosay** parish, **Mull island**, **Argyllshire**. The bay, opening at the north-eastern extremity of **Mull**, opposite the SW end of **Lismore**, measures 1 by $\frac{3}{4}$ mile. The castle, $4\frac{1}{2}$ miles N of **Achnacraig**, stands on a bold headland at the E side of the bay, and commands one of the grandest prospects in the **Western Highlands**. Dating from some unknown period of the **Norman**'s invasion, and first coming into record in 1390, as the stronghold of the **Macleans** of **Mull**, it comprises a massive square tower (75×72 feet) of seemingly the 14th century, and a range of less ancient buildings. In 1523 **Lachlan Maclean** of **Duart** exposed his wife, the **Earl of Argyll**'s daughter, on a tide-swept islet between **Lismore** and **Mull**, the '**Lady's Rock**,' whence she was rescued by a passing boat—an episode dramatised in **Joanna Baillie's** *Family Legend*, and only one out of the many tragedies witnessed by **Duart's** walls in the endless feud between the **Macdonalds** and the **Macleans**, from whom the estate passed to the **Argyll** family in the latter half of the 17th century. Modern **Duart House** is $1\frac{1}{4}$ mile NNW of **Achnacraig**.

Dubbieside or **Innerleven**, a coast village on the E border of **Wemyss** parish, **Fife**, at the right side of the **river Leven**. It communicates with **Leven** town by a suspension bridge, and forms part of the police burgh of **Buckhaven**, **Methil**, and **Innerleven**.

Dubbs Cauldron, a pretty cascade on **Wamphray** Water, in **Wamphray** parish, **NE Dumfriesshire**.

Dubbs Water, a rivulet running from **Kilbirnie Loch** to **Castle-Semple Loch**, **Ayrshire** and **Renfrewshire**.

Dubcapon or **Dalcapon**, a former detached part of the parish of **Dunkeld** and **Dowally**, **Strathitay**, **Perthshire**, comprising 1284 acres, and lying mainly on the left bank of the **Tummel**, but transferred by the **Boundary Commissioners** in 1891 to the parish of **Logierait**, in the same county.

Dubford, a hamlet in **Gamrie** parish, **NE Banffshire**, 1 mile S of **Gardenstown**, and $7\frac{1}{2}$ miles E of **Banff**, under which it has a post office.

Dubh Loch. See **DOULOCH**.

Dublin Row, a village on the N border of **Lesmahagow** parish, **Lanarkshire**, almost continuous with **Kirkfield-bank**, $1\frac{3}{4}$ mile W of **Lanark**.

Dubston, a hamlet in **Gamrie** parish, **Banffshire**, near **DUBFORD**.

Dubton, a railway junction in the NW corner of **Montrose** parish, **Forfarshire**, on the **Scottish North-Eastern** section of the **Caledonian**, at the deflection of the branch line to **Montrose**, near **Hillside** village, 3 miles NNW of **Montrose**. **Dubton House** is in the vicinity.

Duchall, an estate, with a mansion of 1768, in Kilmalcolm parish, Renfrewshire, on the right bank of the Gryfe, 1½ mile SSW of Kilmalcolm village. From the 13th century the estate, with a castle standing 1¼ mile to the WNW, belonged to the Lyles, the seventh of whose line was created Lord Lyle about 1446. The fourth and last Lord sold it a century later to John Porterfield of Porterfield, whose descendants held it for fully 300 years. It is now the property of Sir Michael Shaw-Stewart of ARDGOWAN.

Duchal Law, the eastern summit (725 feet) of the Braes of Gleniffer in Abbey parish, Renfrewshire, 3½ miles S of Paisley. It commands an extensive and very lovely view.

Duchray, an estate, with an old castle, in Drymen parish, Stirlingshire. The castle, on the right bank of Duchray Water, 3 miles WSW of Aberfoyle hamlet, and 10 NW of Bucklyvie station, was formerly a stronghold of those Grahams who in 1671 fought the Earl of Airth upon ABERFOYLE bridge, and is now beautifully mantled with ivy. Its orchard contains some aged filbert trees, producing a peculiarly large and fine-flavoured nut.

Duchray Water, the southern head-stream of the river Forth, in Stirling and Perth shires, rises, at an altitude of 3000 feet, on the N side of Ben Lomond (3192), and thence winds 13½ miles north-north-eastward, south-eastward, and east-north-eastward through the interior or along the borders of Buchanan, Drymen, and Aberfoyle parishes, till, at a point 1 mile W of Aberfoyle hamlet, it unites with the Avonduh to form the Laggan. See FORTH.—*Ord. Sur.*, sh. 38, 1871.

Ducraig, a rocky islet of Dunfermline parish, Fife, in the Firth of Forth, ½ mile SW of Rosyth Castle, and 2½ miles NW of Queeuferry. The depth of water adjacent to it, at the lowest ebb tide, is 21 feet.

Duddingston, a village and a coast parish of Midlothian. The village is 1½ mile WSW of Portobello station, ½ mile N of Duddingston station on the Suburban Railway, and 2½ miles SE by E of Edinburgh Post Office through the Queen's Park, and stands at an altitude of 150 feet above sea-level, at the south-eastern base of Arthur's Seat and near the north-eastern shore of Duddingston Loch. With background of hill, and foreground of park and manse and antique kirk and lake, it is itself a pretty little place, with a few good old-fashioned villas. At it are an inn, a post office under Portobello, and a plastered house to the E in which Prince Charles Edward is said to have passed the night before the battle of Prestonpans; whilst at Duddingston Mills, a hamlet ¼ mile nearer Portobello, are a public school and Cauvin's Hospital. A plain white villa-like building this, founded by Louis Cauvin, French teacher in Edinburgh, and afterwards farmer at Duddingston, who, dying in 1826, bequeathed his property for the maintenance and education of the sons of poor but honest teachers and farmers, or, failing such, master-printers, booksellers, and farm servants. It was opened in 1833, and gives instruction to 17 boys in classics, modern languages, mathematics, etc.

The parish, containing also the town of PORTOBELLO and Joppa, and the village of Easter Duddingston, is bounded N by South Leith, NE by the Firth of Forth, S by Liberton, SW by St Cuthberts, and W by Canongate. Its utmost length is 3½ miles from ENE to WSW viz., from the Firth, at the mouth of Burdichouse Burn, to the old Dalkeith road above Echo Bank; its utmost width is 1¼ mile; and its area is 1899½ acres, of which 143 are foreshore and 25½ water. BURDICHOUSE or Brunstane Burn winds 2 miles east-north-eastward to the Firth along the Liberton border, which westwards, near Peffermill, is traced for ½ mile by the straightened Burn of BRAID; and the Burn of Braid, or Figgate, or Jordan (its aliases are many), thereafter flows 2½ miles north-eastward to the Firth at the NW end of Portobello, through Duddingston Park and the wooded dell of Duddingston Mills. Reed-fringed Duddingston Loch, 580 yards long, and from 70 to 267 yards wide, was cleared of its weeds, and thereby greatly improved, in the summer of 1881. It is truly a beautiful little sheet

of water, in summer with its swans and waterfowl, in winter with its crowds of skaters and curlers, and always with the church, the boathouse tower, and the bold Hangman's Craig. The coast-line is low, though rocky to the E, whose boulder-clay mussel-beds gave name to Musselburgh; and the shore is fringed with a terrace or raised sea-beach that marks the former margin of the Firth. Inland the surface is gently undulating but nowhere hilly, attaining its highest point (300 feet) at the eastern shoulder of Dunsapie Rock, and everywhere so dominated by ARTHUR'S SEAT (822 feet) as to look flatter than it really is. The rocks are mainly carboniferous, in the W belonging to the Calciferous Sandstone series, next to the Carboniferous Limestone series, and to the coal-measures in the furthest E, and yielding coal, sandstone, limestone, and brick clay. The soil is loamy, resting on strong clay, towards the SE; light and sandy along the coast; and elsewhere a brownish earth of no great natural fertility. Less than two centuries since the entire parish was an unreclaimed moor, covered with sand, and diversified only by the stunted growth of the Figgate Whins, that forest where Wallace is said to have mustered his forces for the siege of Berwick, and Gibson of Durie to have been pounced upon by Christie's Will.* But about 1688, the owner of Prestonfield, Sir James Dick, became Lord Provost of Edinburgh; and, better acquainted than his contemporaries with the fertilising powers of city manure, availed himself of ready and thankful permission to enrich therewith the sterile soil of his estate. So successful were his policy and example that, arid and worthless as Duddingston had been, it ranks now among the most highly-rented land in the United Kingdom, with its lush grass-meadows and steam-tilled cornfields. In 1745, James Hamilton, eighth Earl of ABERCORN (1712-89), bought from the Duke of Argyll the barony of Duddingston, and here, in 1768, built Duddingston House. A Grecian pile designed by Sir William Chambers, this cost, with its grounds, £30,000, and now stands in a finely-wooded park, part of which was in 1892 leased by Government as a cavalry exercise ground. Its present holder is the second Duke and eleventh Earl of Abercorn (b. 1833; suc. 1885). PRESTONFIELD is the other chief mansion. The parish derives its name from one *Dodrin*, and in the reigns of David I. and Malcolm IV. the barony of *Dodrinestoun* was gifted to Kelso Abbey. The Fishwives' Causey, an obscure by-road near Portobello brickworks, is an undoubted fragment of the Roman road between Inveresk and Cramond; and over Burdichouse Burn, leading up to Brunstane House, is a beautiful old bridge, Roman so-called; whilst from the bed or shores of Duddingston Loch bronze implements have been dredged or dug up in such numbers as to suggest that in the Age of Bronze an extensive manufacture of weapons must have been carried on at its margin. In Duddingston died Sir John Hay (1600-54), a senator of the College of Justice; in Duddingston was educated William Smellie (1740-95), the printer-naturalist; and in Duddingston, son of a farmer at Clearburn, was born the Rev. Thomas Gillespie (1708-74), founder of the Relief body. But the name associated most closely with the parish is that of the great landscape painter, its minister from 1805, the Rev. John Thomson (1778-1840)—'Thomson of Duddingston, heavy and strong,' as Dr John Brown calls him—who at the manse here was visited by Sir Walter Scott, John Clerk of Eldin, Sir Thomas Dick Lauder, Turner, Wilkie, etc. In the presbytery of Edinburgh and synod of Lothian and Tweeddale, this parish is divided ecclesiastically into Portobello and Duddingston, the latter a living worth £260. The church, with chancel, nave, N transept, low square tower, 350 sittings, and organ, dates from the Norman era of church architecture, and under William the Lyon (1166-1214) was acquired by the monks of Kelso Abbey. It has been grievously knocked about and added to at various periods, a window of the transept bearing date 1621, but it still retains a

* Falsely, since the seizure took place near his own seat in Fife (Hill Burton, *Hist. Scot.*, vi. 17, ed. 1876). See DURIE.

beautiful chancel arch and S doorway of Romanesque workmanship; and at the churchyard gate the old 'loupin'-on-stane' is still to be seen, with the iron joughs hanging beside. The public school, with accommodation for 120 children, had (1891) an average attendance of 68, and a grant of £39, 0s. 5d. Pop. (1801) 1003, (1831) 3862, (1861) 5159, (1871) 6369, (1881) 7830, (1891) 9643, of whom 4202 were in Duddingston ecclesiastical parish.—*Ord. Sur.*, sh. 32, 1857. See J. W. Small's *Leaves from my Sketch-Books* (Edinb. 1880).

Duddingston, Easter, a village in the parish of Duddingston, Midlothian, 1½ mile ESE of Portobello station.

Dudhope. See DUNDEE.

Dudwick, an estate in Ellon parish, Aberdeenshire, 4 miles NNE of Ellon village. The semi-castellated mansion on it was the seat of General James King (1589-1652), the Swedish veteran, who, by Charles I., was created Lord Eythin or Ythan in 1642. Having long been occupied as a farmhouse, it was demolished within the last thirty years, and there is now no trace of it left. **Dudwick Hill** (572 feet) is one of the highest points in Buchan.

Duff House, a seat of the Duke of Fife in Banff parish, Banffshire, near the middle of an extensive plain, on the left bank of the river Deveron, 3 furlongs S by E of the town of Banff. Built in 1740-45 by William Lord Braco, after designs by the elder Adam, at a cost of £70,000, it is a large quadrangular four-storied edifice, in the Roman style, with balustrades and domical tower-like projections at the four angles, and is adorned externally with statues and vases. Two wings, that would have given it an oblong shape, were never added. Within is a fine collection of paintings, comprising portraits of the Constable de Bourbon by Titian, of Charles I., Henrietta Maria, Strafford, Lord Herbert, and the Countess of Pembroke by Van Dyck, of Mrs Abingdon and the Duchess of Gordon by Sir Joshua Reynolds, of the fourth Earl of Fife by Raeburn, and of the late Countess by Sir Francis Grant, besides pictures by Quentin Matsys, Murillo, Cuypp, Ruysdael, Snyders, Wouvermans, Domenichino, Holbein, Velasquez, etc. The Library, 70 feet long, contains over 15,000 volumes, and is rich in 17th century pamphlets and Spanish works, collected mostly by James, fourth Earl (1776-1851), during his Peninsular campaign. The Armoury, among other relics, contains three Andrea Ferraras, and the reputed target and two-handed sword of the free-booter M'Pherson, who was hanged at BANFF in 1700. In 1787 William Nicol and Burns went over Duff House, where the latter was greatly taken with portraits of the exiled Stuarts. The finely-wooded park, extending nearly 3 miles along the Deveron from Banff to Alvah Bridge, comprises parts of two counties and four parishes, and measures 14 miles in circumference; abounds in drives and walks of singular beauty; and includes the site of St Mary's Carmelite friary, founded before 1824, which site is now occupied by the Gothic mausoleum of the Fife family. Alexander-William-George Duff, sixth Earl of Fife since 1759 (b. 1849; suc. 1879), the present peer, was created Marquis of Macduff and Duke of Fife in 1889, on his marriage with Princess Louise, eldest daughter of the Prince of Wales.—*Ord. Sur.*, sh. 96, 1876. See Imlach's *History of Banff* (1868) and Cra mond's *Annals of Banff* (1891).

Duff-Kinnel, a rivulet in the NW of Annandale, Dumfriesshire. It rises in Kirkpatrick-Juxta parish, and runs about 4 miles south-eastward, chiefly along the boundary between that parish and Johnstone, to a confluence with the Kinnel, a little above Raehills.

Dufftown, a small police burgh in Mortlach parish, Banffshire, 1 mile S of a station on the Great North of Scotland railway, this being 4 miles SE of Craigellachie Junction, 10½ SW of Keith, and 64 NW of Aberdeen. With Conval and Ben Rinnes to the SW, Auchendoun Castle to the SE, and Balvenie Castle to the N, it stands, 600 feet above sea-level, within ½ mile of the Fiddich's left bank; and founded in 1817 by James Duff, fourth Earl of Fife, it is laid out in the form of a crooked-

armed cross, with a square and a tower in the centre. At it are a post office, with money order, savings bank, and telegraph departments, branches of the North of Scotland and the Town and County Banks (the latter rebuilt in 1880), insurance agencies, hotels, distilleries, limeworks, and wool mills. Steven Cottage Hospital was opened in 1890. There are a literary association, a horticultural society, and a Young Men's Christian Association. Cattle fairs are held on the fourth Thursday of each month; feeling fairs on the Wednesday before 28 May, the second Wednesday of July, and the Wednesday before 28 November. **MORTLACH** parish church stands 3½ furlongs to the S; and at the village itself are a Free church, the Roman Catholic church of Our Lady of the Assumption (1825; 200 sittings), and St Michael's Episcopal church (1880; 130 sittings), a pretty little Gothic building this. Queen Victoria drove through Dufftown in the summer of 1867. The annual value of real property in 1891 was £3808. Pop. (1871) 1250, (1881) 1252, (1891) 1469.—*Ord. Sur.*, sh. 85, 1876.

Duffus, a village and a coast parish of Elginshire. A neat clean place, lying 1 mile inland, the village of New Duffus is 4¾ miles E by S of Burghead station, 2 ESE of Hopeman station, and 5¼ NW of Elgin, under which it has a post office.

The parish, containing also the small towns and villages of **BURGHEAD**, **HOPEMAN**, **CUMMINGSTON**, and **Roseisle**, is bounded W and NW by the Moray Firth, NE by Drainie, SE by New Spynie, and SW by Alves. Its length, from E to W, varies between 3¼ and 6½ miles; its utmost breadth, from N to S, is 3½ miles; and its area is 9865½ acres, of which 1 is water, and 386¾ are foreshore. The coast-line, 7¼ miles long, is fringed to the W, along Burghead Bay, by low sandy links; elsewhere, at Burghead and along the north-western shore, it is almost everywhere rocky, in places precipitous, to the E being pierced by some large and remarkable caves. Inland, the flat-looking surface attains 225 feet at Clarkly Hill, 235 near Inverugie, 241 near Burnside, and 287 at Roseisle, thence again gently declining southward and south-eastward to only 32 feet at Bridgend and 11 at Unthank. The seaboard, to the breadth of ½ mile, was once a rich cultivated plain; but having been desolated by sand drift, in a similar manner to the Culbin Sands, was afterwards reclaimed for either pasture or the plough, and now presents an appearance of meagre fertility. The rest of the land is all arable. No river touches the parish, scarcely even a rivulet; and springs are few and scanty. Sandstone and limestone occur, and are quarried. The soil, in the E, is a deep and fertile clay, like that of the Carse of Gowrie; in the W, is a rich black earth, occasionally mixed with sand, but generally yielding first-rate crops. So that, not from its situation, but from its great fertility, this parish has been called the Heart of Morayshire. Fully five-eighths of the entire area are in tillage, about one-third is pasture, and some 350 acres are under wood. **Duffus Castle**, 1¾ mile SE of the village, was built in the time of David II., and, crowning a mound near the NW shore of Spynie Loch, was surrounded with a moat, and approached by a drawbridge; its walls, 5 feet in thickness, consisted of rough, cemented stones. Belonging originally to the family of De Moravia, it afterwards was long the seat of the family of Sutherland, who bore the title of Lords Duffus from 1650 till 1843; and it is now a picturesque ruin. An obelisk, falsely thought to have been erected by Malcolm II. in commemoration of a victory over the Danes under Camus, stood till within the present century near Kaim; and several tumuli are on the heights at the shore, whilst sarcophagi have been exhumed on the estate of Inverugie. **Duffus House**, 3 furlongs ESE of the village, is the seat of Sir Archibald Dunbar of Northfield, sixth Bart. since 1698 (b. 1803; suc. 1847), who owns 1828 acres in the shire, valued at £3414 per annum. Another mansion is **INVERUGIE**; and the whole parish is divided among 27 proprietors, 7 holding each an annual value of £500 and upwards, 1 of from £50 to £100, and 19 of from £20 to £50. In the presbytery of Elgin and

synod of Moray, this parish is divided ecclesiastically into Duffus and Burghhead, the former worth £323. Its church is a handsome edifice of 1868, with a spire. Four public schools—Burghhead, Duffus, Hopeman, and Roseisle—with respective accommodation for 595, 232, 501, and 44 children, had (1891) an average attendance of 334, 143, 278, and 36, and grants of £332, 11s. 6d., £137, 16s., £301, 9s., and £41, 10s. Pop. (1801) 1339, (1831) 2308, (1861) 3308, (1881) 3991, (1891) 3922.—*Ord. Sur.*, sh. 95, 1876.

Dugalstone. See DOUGALSTON.

Dugden. See DOGDEN.

Duich, a beautiful sea-loch in the SW corner of Ross-shire, deflecting from the head of Loch Alsh, and striking 5½ miles south-eastward along the SW side of Kintail parish. From a width of ½ mile at its entrance it expands to 1¼ at the head; and it takes up roads from the coast, along its northern and southern shores, to respectively Strathaffric and Glenshiel. Its screens consist of mountains, rising right from its margin, partly in bold acclivities, and partly in gentle undulating ascents, clothed with verdure or variegated with rocks and trees. Within 6 miles of its head stand Ben Attow (3383 feet) and Scur na Cairan (3771).

Duirinish or Durinish, a parish in the W of Skye, Inverness-shire, containing the village of Dunvegan, on Loch Follart, 23½ miles W by N of Portree, under which it has a post office, with money order, savings bank, and telegraph departments. Extending from the Grishinish branch of Loch Snizort on the N to Loch Bracadale on the S, it is bounded on its E or landward side by the parishes of Snizort and Bracadale; its length is 19, and its breadth 16 miles; whilst its coastline, measured along the bays and headlands, is about 80 miles; and its area must be fully 100 square miles. Sea-lochs run far up into the interior, cutting it into an assemblage of peninsulas; and are flanked with grounds rising in some places rapidly, in other places gently, from their shores. The headlands are mostly huge lofty masses of rocks, which rest on bases descending sheer into deep water; and the coast of the northern district is a continuous alternation of vertical cliffs and low shores, striking enough when first beheld, but wearying the eye by its monotony. The shores and islets of Loch Follart or Dunvegan Loch, with Dunvegan Castle for centre-piece, form a grandly picturesque landscape; and the coast, from Dunvegan Head to Loch Bracadale, consists for the most part of cliffs, very various in height and slope, many of them lofty and almost perpendicular, and nearly all of such geological composition as to present a singular striped appearance. Some isolated pyramidal masses of rock, similar to the 'stacks' of Caithness and Shetland, stand off the coast, and figure wildly in the surrounding waters, the most striking and romantic of these being known as MACLEOD'S MAIDENS. The northern district consists of Vaternish peninsula, and constitutes the *quoad sacra* parish of Halen; the other districts may be comprised in three—Glendale, extending westward from a line near the head of Dunvegan Loch; Kilmuir, extending southward from Dunvegan Loch to Loch Bay, and containing the parish church; and Arnisort, extending eastward from Kilmuir to the boundaries with Snizort and Bracadale. The only mountains are the Greater and Lesser Helvel or Hezlaval, in the western peninsula, which, rising to an altitude of 1538 and 1601 feet, and ascending in regular gradient, with verdant surface, are truncated at the top into level summits, and to seamen are familiar as Macleod's Tables. Hills occur in two series, but are neither very high nor in any other way conspicuous. Numerous caverns, natural arches, and deep crevices are in the cliffs of the coast. ISSAY Island is nearly 2 miles long, and has a fertile soil and a considerable population; but all the other islands are small and uninhabited. The rocks are chiefly trap; but they include beds of fossiliferous limestone, thin strata of very soft sandstone, and thin seams of hard brittle coal. Zeolites of every variety are very plentiful; steatite abounds, especially about Dunvegan; and augite and

olivine are found. The soil in a few tracts is clayey; and in still fewer is gravelly, in most parts being either peat moss or a mixture of peat moss and disintegrated trap. DUNVEGAN Castle is at once the chief mansion and antiquity. Other mansions are Vaternish, Orvost, and Grieshernish; and other antiquities are fifteen Danish forts, several tumuli, and a number of subterranean hiding-places. Macleod of Macleod is owner of about half the parish. In the presbytery of Skye and synod of Glenelg, this parish is divided ecclesiastically into HALEN and Duirinish, the latter being a living worth £178. Its church, built in 1832, contains nearly 600 sittings; and there is also a Free church of Duirinish. The eight public schools of Borreraig, Borrodale, Colbost, Dunvegan, Edinbain, Knockbreck, Lockbeag, and Vattin Bridge, with total accommodation for 800 children, had (1891) an average attendance of 595, and grants amounting to £658, 2s. 9d. Valuation (1892) £7197. Pop. (1801) 3327, (1831) 4765, (1861) 4775, (1871) 4422, (1881) 4319, (1891) 3933.

Duirinnis or Duirnish, a grassy islet (3 × 1½ furl.) of Ardochattan parish, Argyllshire, in Loch Etive, opposite Bunawe. It contains a dwelling-house, and is connected with the mainland by a stone bulwark.

Duiskey, a village in Kilmallie parish, Argyllshire, on the southern shore of Upper Loch Eil, 7 miles W by N of Fort William.

Duke's Bowling-Green. See ARGYLL'S BOWLING-GREEN.

Dulaich, Loch. See DOULAS.

Dulcapon or Dalcapon. See DUNKELD AND DOWALLY.

Dulcie-Bridge. See DULSIE-BRIDGE.

Dull, a village and a parish of central Perthshire. The village stands in the Strath of Appin, ¾ mile from the Tay's left bank, 2 miles W of Castle-Menzies, and 3½ miles W of Aberfeldy. It is an ancient place, but now decayed and small, and was at one time the seat of a monastery, of which no trace now remains. It retains in its centre a ponderous cruciform pillar, one of four that marked the limits of the ancient sanctuary of Dull. Two of them, removed to form an ornamental gateway to the house of the local factor, have been recently placed for preservation in the old church of Weem; the fourth has disappeared. The parish church is so old that its age is unknown, but it was thoroughly repaired in 1840. A stone slab, covered with sculpture, that was dug up close to the church, now rests in the museum of the Antiquarian Society, Edinburgh. Beside the village is St Ninian's well, with a high reputation in pre-Reformation times for miraculous cures.

The parish until 1891 consisted of three distinct portions—the first containing Dull village, the second the greater part of ABERFELDY and also the village of AMULREE, and the third being the Garrow section, much smaller than either of the others. The Boundary Commissioners in 1891 made considerable readjustments in the boundaries of Dull and neighbouring parishes. All that part of the parish of Dull which lay north of the river Tummel and of Loch Tummel was transferred to the parish of Blair Athole; the Grandtully district of the parish, on the right bank of the Tay, was transferred to the parish of Logierait; and the Glassie, Cluny, and Derulich districts of the parish, on the left bank of the Tay, were transferred to the parish of Weem. There were, however, annexed to the parish of Dull the BOLFRACKS detached portion of Fortingall parish (4020 acres); the Shian detached portion of Kenmore parish (2578 acres); the KILLECHASSIE and Aberfeldy detached portion of Logierait parish (1583 acres), by the annexation of which, and the above Fortingall portion the whole burgh of Aberfeldy is placed within the parish of Dull; and the Comrie Castle, Newhall, Styx, Leachan, and Coalvellich detached portions of Weem parish—these portions being Weem detached Nos. 5, 6, 7, 8, and 11 of the Ordnance Survey maps. By these changes the formerly detached Aberfeldy and Garrow portions of Dull parish were united with the main portion. The Tay cuts the parish now into two nearly equal portions—a northern and a southern. It is separated from

Blair Athole parish along all its northern boundary by the river Tummel and Loch Tummel, and is bounded on the E by Moulin, Weem, Logierait, and Little Dunkeld; on the S by Fowllis-Wester and Monzievairst and Strowan; and on the W by Kenmore and Fortingal. The LYON flows $1\frac{1}{2}$ mile east-south-eastward in the northern half of the parish to the Tay; and the Tay itself has a total east-north-easterly course of about 6 miles across the middle and narrowest part of the parish, and along the southern boundary of Weem parish and the northern border of the Aberfeldy portion of Dull—descending during that course from 280 to 210 feet above sea-level. The TUMMEL winds 13 miles eastward along the northern border of the parish—its expansion, Loch Tummel ($2\frac{3}{4} \times \frac{1}{2}$ mile), belonging half to Blair Athole and half to Dull parishes. Lakes in the northern half of the parish, other than Loch Tummel, are Loch Kinardochy (3×2 furl.), Lochan a' Chait ($2\frac{1}{2} \times \frac{3}{4}$ furl.), and several smaller ones dotted over the interior. The surface sinks to about 210 feet above sea-level along the Tay, and 360 along the Tummel; and the chief elevations are *Beinn Eagach (2259), *Farragon Hill (2559), Weem Hill (1638), the Rock of Dull (1557), Craig Odhar (1710), Meall Tarruin Chon (2559), Dun Coiloch (1866), the "north-eastern shoulder (3100) of SCHIEHALLION, *Meall Dubh, and Craig Kynachan (1358), between the Tay and the Tummel, where asterisks mark those summits that culminate on the borders of the parish. In the southern half of the parish the QUACH has an east-south-easterly course of $3\frac{3}{4}$ miles, traversing Loch FRECHIE ($1\frac{3}{4}$ mile \times $3\frac{3}{4}$ furl.), other lakes being Loch Hiol ($3 \times 2\frac{1}{2}$ furl.), Lochs na Craig (4×1 furl.) and Fender ($2\frac{3}{4} \times 2$ furl.), on the eastern border, Lochan a'Mhuilinn ($1\frac{1}{2} \times \frac{3}{4}$ furl.), and Loch Uaine ($2\frac{1}{2} \times \frac{1}{2}$ furl.). The surface here sinks at Amulree to close on 900 feet, and the chief elevations to the S of the Quach are *Geal Charn (2000 feet), *Beinn na Gainmh (2367), and *Meall nam Fuaran (2631), whilst to the N of it rise *Creag an Loch (1760), Meall Dubh (2021), Craig Forinal (1676), *Garrow Hill (2402), *Oarn Bad an Fhraoich (2619), and Carn nan Gahhar (2790), where asterisks again indicate those heights which culminate on the borders of this half of the parish. Mica slate, occasionally interspersed with quartz, granite, chlorite, and hornblende slate, is the predominant rock; limestone forms a considerable bed, and is quarried at Tomphobuil; a bluish building stone, similar to chlorite and talc slate, occurs on the Aird of Appin; and marl, in small quantities, is found in several places. The soil, in some parts, is a thin mould or a brownish loam, mixed with sand; in others, is a mixture of clay and loam; in others, is light and gravelly; and in others, is of a wet mossy nature. The Weem added portion gives to the parish Comrie Castle, a ruined fortalice on the river Lyon, a little above its influx to the Tay. Between 651 and 661 St Cuthbert, coming to a town called Dull, forsook the world, and became a solitary. On the summit of Doilweme, or Weem Hill, $1\frac{1}{2}$ mile to the NE, he brought from the hard rock a fountain of running water, erected a large stone cross, built an oratory of wood, and hewed a bath out of a single stone. At Dull, within seventeen years of St Cuthbert's death in 687, Adamnan founded a monastery, which was dedicated to himself, and to which a very extensive territory was annexed—the 'athbanrie' or abhacy of Dull. Embracing a large portion of the western part of the earldom of Athole, and containing the two thanages of Dull and Fortingal, this was possessed in the first half of the 11th century by Crinan, lay abbot of Dunkeld, and ancestor both of the royal dynasty that terminated with Alexander III. and of the ancient Earls of Athole (Skene's *Celtic Scotland*, vols. ii., iii., 1877-80). The antiquities include a number of forts, cairns, and standing stones, a stone circle, and three moat-hills. Mansions, separately noticed, are Foss, Moness, Bolfracks, and Killiechassie; and the chief proprietors are the Marquis of Breadalbane and Sir Robert Menzies, Bart., of Castle-Menzies. In the presbytery of Weem and synod of Perth and

Stirling, this parish is divided ecclesiastically among Foss, Tenandry, Amulree, and Dull, the last a living worth £308. Dull parish church, a pre-Reformation edifice, consisting of nave and chancel, and, as recently renovated, containing 330 sittings, stands at the village; it was dedicated to St Adamnan, under his Celtic name of Eonan. Other places of worship are noticed under Aberfeldy, Amulree, and Tummel-Bridge. The public schools of Aberfeldy, Dull, Foss, and Styx, with respective accommodation for 328, 95, 44, and 23 children, had (1891) an average attendance of 265, 60, 32, 18, and 13, and grants of £257, 7s., £68, 5s., £42, £30, 16s., and £25, 3s. Valuation (1892) £18,634, 19s. 10d. Pop. of parish (1881) 2565, (1891) 2393; of registration district (1871) 677, (1881) 618, (1891) 548.—*Ord. Sur.*, shs. 55, 47, 1869.

Dullan Water, a stream of Mortlach parish, Banffshire, formed by the confluence of Tavat and Corryhabbie Burns at the head of Glen Rinnes, and thence running $5\frac{3}{4}$ miles north-eastward, till it falls into the Fiddich, $\frac{1}{2}$ mile E of the centre of Dufftown. All open to the public, it contains abundance of trout, running 4 or 6 to the lb.—*Ord. Sur.*, sh. 85, 1876.

Dullatur, a tract of low land on the northern border of Cumbernauld parish, Dumbartonshire, traversed by the Forth and Clyde Canal, the line of Antonius' Wall, and the Edinburgh and Glasgow section of the North British railway, $1\frac{1}{2}$ mile WNW of Cumbernauld town, and 2 miles ESE of Kilsyth. Lying almost on a level with the canal, it was all till a recent period a deep and spongy, almost impassable morass, immediately N of what is supposed to have been Bruce's mustering-ground on the eve of his march to Bannockburn (1314), and S of the Kilsyth battle-field (1645). At the cutting of the canal through it in 1769-70, swords, pistols, and other weapons were found in it, supposed to have been lost or thrown away in the rout from Kilsyth; bodies of men and horses, including a mounted trooper completely armed, were also brought to light; and myriads of small toads, each much the size of a nut or Turkey bean, issuing from it, hopped over all the fields northward for several miles, and could be counted from 10 to 30 in the space of 1 square yard. Dullatur Villas here, on a plot of 164 acres, round the old mansions of Dykehead and Dullatur, were erected in 1875-76; and Dullatur station, opened in the latter year, is $12\frac{3}{4}$ miles NE of Glasgow.—*Ord. Sur.*, sh. 31, 1867.

Dulnain, a river of Badenoch, NE Inverness-shire, rising at an altitude of 2600 feet among the Monadhliath Mountains, 8 miles W by N of Kincaig station, and running 28 miles north-east-by-eastward, till it falls into the Spey at Ballintomb, 3 miles SSW of Grantown, after a descent of 1900 feet. It traverses or bounds the parishes of Kingussie, Alvie, Duthil, and Cromdale, and forms the boundary between Inverness-shire and Elginshire in the last 9 furlongs of its course; and just above its mouth it is crossed by an iron-trellised viaduct of the Highland railway. It has generally a small volume, yet is very rapid; and, when swollen with rain or melted snow, it often does much damage to the corn lands on its banks. The tract traversed by it in Duthil parish is called Dulnainside; was extensively covered with a forest which was destroyed by a fierce conflagration about the beginning of last century; and was, till then, a haunt of wolves. Its waters contain good store of trout, some pike, and occasional salmon and grilse.—*Ord. Sur.*, sh. 74, 1877.

Dulnain-Bridge, a hamlet in the Inverallan section of Cromdale parish, Elginshire, with a bridge (1791) over Dulnain river, 3 miles SW of Grantown, under which it has a post office.

Dulsie-Bridge, a hamlet in Ardcloch parish, Nairnshire, on the river Findhorn, 5 miles above Ardcloch church, and 12 SSE of Nairn. The river here traverses a rocky and wooded gorge of singular beauty, and is crossed by a bridge, which, carrying over Wade's military road from Grantown to Fort George, has a bold main arch of 46 feet in span, with a subsidiary smaller arch.

Dumbarnie. See DUNBARNY.

Dumbarrow. See DUNBARROW.

Dumbarton, a town and parish of Dumbartonshire. A seaport, a royal and parliamentary burgh, and the capital of the county, the town stands on the left bank of the Leven, $\frac{3}{4}$ mile above its influx to the Clyde, and at the junction of the Glasgow and Helensburgh and Vale of Leven sections of the North British railway, by water being $4\frac{3}{4}$ miles E by N of Port Glasgow and $7\frac{1}{2}$ E of Greenock, by rail $4\frac{1}{2}$ S of Balloch Junction, $34\frac{3}{4}$ WSW of Stirling, $8\frac{1}{4}$ ESE of Helensburgh, 16 WNW of Glasgow, and $63\frac{1}{2}$ W of Edinburgh. Its site is a low flat plain, skirted to the W by an east-south-easterly curve of the Leven, and screened to the E by the Kilpatrick Hills (1313 feet), whilst south-south-eastward, between the town and the Clyde, stands the castle-crowned Rock of Dumbarton. From the crescent-shaped High Street, running 5 furlongs concentric with and near the course of the Leven, Cross Vennel and Church Street strike north-north-eastward to Broad Meadow; and a stone five-arch bridge, 300 feet long, built towards the middle of last century, leads over the Leven to the western suburbs, in Cardross parish, of Bridgend and Dennystoun—the latter founded in 1853, and named in honour of its projector, William Denny. Within and without, Dumbarton, it must be owned, presents an irregular and unattractive appearance, little in keeping with its fine surroundings; and, as seen from the Clyde, it looks a mere aggregate of huddled houses, chequered in front by the timbers of shipyards, and overtopped by more chimneys than steeples. Yet few Scotch towns have made more rapid progress than has Dumbarton since 1852, in point of dwellers rather than of dwellings, whence overcrowding; but in 1882 Messrs Denny planned a new suburb at the eastern extremity of the town, called Knoxland, which is well laid out and provides comfortable accommodation for a large number of workmen's families. Amongst the improvements of the last forty years are the opening of a large and beautiful cemetery (1854); the embanking of the Broad Meadow (1855); the introduction of water from Garshake Reservoir, and later extensions, the present supply exceeding 330,000,000 gallons; the taking over of the gas-works, which date from 1832, by the corporation (1874); and the adoption of the Free Libraries Act (1881). A public park, at Levensgrove, 32 acres in extent, was gifted to the town in 1835; while part of the Broad Meadow, to the north of the town, has been laid out as a public recreation ground.

The Burgh Hall and Academy, built in 1865-66 at a cost of £7000, and restored since the fire of 11 Dec. 1882, is in the French Gothic style of the 13th century, with a central tower 140 feet high. The Academy, in front, comprises four large class-rooms; and the Hall, to the rear, is 80 feet long, 40 wide, and 37 high, having accommodation for nearly 1000 persons. The County Buildings and Prison, built in 1824 at a cost of over £5000, were in 1863 enlarged by two wings and otherwise reconstructed, and again greatly extended in 1895; but the prison was closed in 1883. A Combination Poor-house, with accommodation for 182 paupers and 60 lunatics, was erected at a cost of £7000 in 1865; and an epidemic hospital in 1874. St John's Masonic Hall (1874-75) has accommodation for 200 persons; the Philosophical and Literary Society (1867) occupies the lower portion of the Town Mission House (1873); and there are also a Mechanics' Institute (1844), the Denny Memorial Institute (opened 1892), a curling club (1815), a bowling club (1839), a Burns club (1859), a benevolent, an agricultural, and a co-operative society, etc. Dumbarton has a post office, with money order, savings bank, and telegraph departments, branches of the Commercial, Clydesdale, British Linen, and Union Banks, hotels, and 3 newspapers—the Wednesday (Liberal) *Dumbarton Herald* (1851), the Saturday (also Liberal) *Lennox Herald* (1862), and the *Dumbarton Observer*. Monday is market-day, and fairs are held on the third Tuesday in March (St Patrick's) for seeds and horses, the first Wednesday in June (Carman) for cattle and horses, and the

second Tuesday in August (Lammas) for cattle and hay.

Extensive glass and chemical works, established in 1777, and employing 300 men, were closed about two years after the death in 1831 of Provost Dixon and his son, then for a time reopened, and finally discontinued in 1850, when their three prominent brick cones were taken down. The stoppage of these works seemed likely to deal a great blow to Dumbarton's well-being; but their place has been more than supplied by shipbuilding, which now employs upwards of 4000 hands. The two great shipbuilding firms are those of Messrs M'Millan (1834) and Messrs Wm. Denny & Bros. (1844). While the yard of the former firm is not so large as that of the latter, it is a well-equipped establishment, and boasts the only graving dock in Dumbarton. The dock is 300 feet long, and 41 feet wide at the entrance. Messrs Denny removed in 1857 from the Wood Yard, on the Cardross side, to the Leven Shipyard, on the Dumbarton side, which now covers 42 acres, and includes a wet dock of 5 acres, shearlegs for 100 tons, and cranes for tonnage of the very highest class. There has been also added an experimental tank similar to that owned by the Admiralty, wherein many interesting experiments on the hulls of vessels are being constantly carried out. Dumbarton's first iron steamer was launched in 1844, its first screw in 1845, and its first steel steamer in 1879. The other industrial establishments of Dumbarton comprise Denny & Co.'s engineering works (1851); Paul & Co.'s engine and boiler works (1847); Ure & Co.'s iron foundry (1835); the Denny-stoun Forge (1854); saw-mills; a rope and sail yard; brass-founding, boat-building, tanning, and ship-painting works, etc.

In 1658 the magistrates of Glasgow made overtures to their brethren of Dumbarton for the purchase of ground for an extensive harbour, which the latter rejected on the ground that 'the influx of mariners would tend to raise the price of butter and eggs to the inhabitants.' Port Glasgow was thereupon founded, and Dumbarton thus lost the chance of becoming a seaport second to few in the world. Down to 1700 the burgh retained its chartered privilege of levying customs and dues on all ships navigating the Clyde between the mouth of the Kelvin and the head of Loch Long, but in that year it sold this privilege to Glasgow for 4500 merks, or £260 sterling. This and the deepening of the CLYDE to Glasgow have done much to lower Dumbarton's commercial prestige, and it now ranks merely as a sub-port. Nor are its harbour accommodations great, the improvements carried on since 1852—such as the deepening of the Leven's channel—having generally had less regard to shipping than to shipbuilding. An excellent quay, however, and a capacious dock have been constructed, mainly at the expense of the late James Lang; and in 1874-75 a splendid pier of pitch pine was built at a cost of £8000. Extending from the Castle Rock into the Clyde, it consists of gangway (640 × 15 feet) and pier-head (90 × 25 feet), the depth of the river at the extremity of the pier-head being 10 feet at low water, so that steamers can touch at any state of the tide, and most of the river steamers now call on their up and down runs.

St Patrick's collegiate church, founded in 1450 by Isabella, Duchess of Albany, at the end of the Broad Meadow, fell into disuse at the Reformation, and now is represented by a single tower arch, removed to Church Street in 1850 to make room for the railway station. The old parish church, at the foot of High Street, a quaint, begalliered, cruciform structure, with western spire, was built about 1565, and demolished in 1810. Its successor, completed in 1811 at a cost of £6000, is a handsome edifice, with spire and clock, 1500 sittings, and three stained-glass windows, two of them geometrical designs, and the third (1876) depicting Christ's Sermon on the Mount. A second Established church was built at Knoxland in 1835, and erected *q. s.* in 1886; and on the Cardross side is Dalreoch *quoad sacra* church (1873; 620 sittings). Free churches are the North

(1844; rebuilt 1877) and the High (1864; cost £5000; 850 sittings), a fine Gothic building, with a spire of 140 feet. The U.P. church of West Bridgend (1861) has a good organ; another in High Street (1826) was enlarged and decorated in 1874 at a cost of nearly £2700. Other places of worship are a Wesleyan Methodist chapel (1862), a Baptist chapel (1876), an Evangelical Union chapel (1882), St Patrick's Roman Catholic church (1830; 500 sittings), and St Augustine's Episcopal church (1872-73; 650 sittings), an Early Geometric Pointed edifice, with nave, side-aisles, lofty clerestory, chancel, and 'sticket' steeple, whose cost, inclusive of a parsonage, came to close on £9000. The Academy, College Street, Knoxland, and West Bridgend public schools, and a Roman Catholic school, with respective accommodation for 688, 1033, 618, 706, and 591 children, have an average attendance of about 350, 870, 700, 550, and 540, and grants amounting to nearly £440, £900, £750, £590, and £520. *Appropos* of the schools, the famous novelist, Tobias Smollet (1721-74) here learned the 'rudiments' under Buchanan's vindicator, John Love (1695-1750), who was a native of Dumbarton, as also were the judge, Sir James Smollett of BONHILL (1648-1731), its representative in the House of Commons for twenty-one years, and Patrick Colquhoun, LL.D. (1745-1820), the well-known statistic and metropolitan magistrate. One of its ministers was the Rev. James Oliphant (1734-1818), the 'Auld Licht professor' of Burns's *Ordination*.

Constituted a free royal burgh by Alexander II. in 1222, Dumbarton received fresh charters from several of

Seal of Dumbarton.

his successors, all of which were confirmed in 1609 by James VI. It now is governed by a provost, a town-clerk, 3 bailies, a treasurer, a dean of guild, a master of works, and 8 councillors. The General Police and Improvement Act (Scotland) of 1850 was adopted in 1854, and the magistrates and town council are

commissioners of police. An Act was obtained by the magistrates and town council in 1872, empowering them to purchase the old and to erect new gas-works, to improve the water-works, to erect the new pier, and to construct tramways to Alexandria. The police force in 1891 comprised 13 men; and the salary of the superintendent was £175. The sheriff county court is held every Tuesday and Friday during session; the debts recovery court every Friday; the sheriff's ordinary small debt court every Tuesday during session, and occasionally during vacation; and quarter sessions are on the first Tuesday of March, May, and August, and the last Tuesday of October. Dumbarton, along with KILMARNOCK, Renfrew, Rutherglen, and Port Glasgow, returns one member to parliament, its parliamentary constituency numbering 2471 in 1891. The annual value of real property within the parliamentary burgh was £37,532 in 1875, £45,898 in 1881-82, and £62,900 in 1892, when the corporation revenue was £1373, and the harbour revenue £4532. Pop. of royal burgh (1801) 2541, (1811) 3121, (1821) 3481, (1831) 3623, (1841) 4391, (1851) 4590, (1861) 6090, (1881) 10,898, (1891) 14,046; of parl. burgh (1851) 5445, (1861) 8253, (1871) 11,404, (1881) 13,782, (1891) 16,908, of whom 3790 were in Cardross parish. Houses (1891) inhabited 3323, vacant 90, building 23.

The Castle of Dumbarton is situated on an acute peninsula at the left side of the Leven's influx to the Clyde, and consists partly of a mass of rock, partly of superincumbent buildings. The rock appears to over-

hang both rivers—huge, mural, weather-worn—for several hundred yards down to their point of confluence. It culminates at 200 feet above sea-level, measures 1 mile in circumference, and figures picturesquely in most of the views of the upper waters of the Firth of Clyde. The rock is of basalt, like Ailsa Craig, the Bass, Stirling Castle Rock, and other single, sharply-outlined heights, that start abruptly from sea or plain. It rises sheer from the low circumjacent level, and stands by itself, without any hills near it. The basalt tends to the prismatic form, being slightly columnar, and in places magnetic; and is all the more curious for protruding through beds of sandstone, nearly a mile distant from any other eruptive formation. The rock towards the summit is cloven by a narrow deep chasm into a double peak, and presents its cloven sides to S and N. The western peak is equal in height to the eastern, but not so broad, and bears the name of Wallace's Seat. The buildings on the rock have differed in extent and form at different times, and do not seem to have ever had any high architectural merit. The entrance, in old times and till a recent period, was on the N side, by a gradually ascending footpath, through a series of gates, which now might be interesting antiquities had they not been sold for old iron. The present entrance is on the S side, through a gateway in a rampart, whence a long flight of steps leads to a battery and the governor's house—a modern white building utterly out of keeping with the character of the place, and used now as the quarter of the married men of the Coast Brigade stationed here. A second, narrower flight leads from the governor's house to the cleft between the two summits, and at one point is overarched by a small structure, alleged to have been the prison of Wallace, but clearly much later than Wallace's day. The barracks, the armoury, the Duke of York's battery, and the water tank stand in the cleft of the rock, and a steep winding stair conducts thence to the top of the western summit, which is surmounted by a flagstaff, and retains vestiges of a small circular building, variously pronounced a wind-mill, a Roman fort, and a Roman pharos. The barracks contain accommodation for only 150 men, and the armoury has lost its 1500 stand of arms since the Crimean war; while the batteries, though capable of mounting 16 guns, would be of little avail for defensive purposes, and at best could only serve to rake the channel of the Clyde. The castle, too, can be fully commanded by artillery from the brow of Dumbuck (547 feet), 1 mile to the E, so that ever since the invention of gunpowder it has been rendered unavailable for its original purposes, but it is maintained as a national fortress, in terms of the Articles of Union. Nor is it undeserving of good maintenance, for, besides forming a noble feature in a most noble landscape, it commands from its western summit three distinct prospects—each different, and each of singular beauty. The first up the Clyde towards Glasgow—Dunglass Castle on its promontory, Erskine House opposite, with boats, ships, wooded hills, and many buildings; the second down the broadening estuary—Port Glasgow and Greenock, and the mountains that guard the entrance of Loch Long; and the third up the Vale of Leven, away to the dusky summits of Loch Lomond. 'If the grand outline of any one of the views can be seen, it is sufficient recompense for the trouble of climbing the Rock of Dumbarton.' So thought Dorothy Wordsworth, who, with her brother and Coleridge, made that climb, on 24 August, 1803 (pp. 57-62 of her *Tour in Scotland*, edited by Principal Shairp, 1874).

Dumbarton has been identified with the Roman naval station *Theodosia*, with Ossian's *Balclutha* ('town on the Clyde'), and with *Urbs Legionis* ('city of the legion'), the scene of Arthur's ninth battle against the heathen Saxons in the beginning of the 6th century. The third identification slightly confirms the first, and itself is strengthened by the town's title of *Castrum Arthuri* in a record of David II. (1367); of the second we are told that, whilst Ossian says of Balclutha, 'The thistle shakes there its lovely head,' the true Scotch thistle,

though really rare in Scotland, does still grow wild on Dumbarton Rock. On this rock (*in alto montis Dumbretan*) the legend of St Monenna, who died in 519, records that, consecrated a virgin by St Patrick, she founded one of her seven Scotch churches. Be this as it may, from the battle of Ardderyd (573) we find the Cumbrian British kingdom of Strathclyde comprising the present counties of Cumberland, Westmoreland, Dumfriess, Ayr, Lanark, Peebles, Renfrew, and Dumbarton; its northern half occupied by the Damnonii, belonging to the Cornish variety of the British race; its first king Rhydderch Hael, Columba's and Kentigern's friend; and its capital the strongly fortified rock on the Clyde's right bank, termed by the Britons *Alcluiith* ('height on the Clyde'), and by the Gadhelic people *Dumbretan* ('fort of the Britons'). By the victory in 654 of Osuiu or Osway of Northumbria over Penda of Mercia, the ally of these Britons, the latter became Osuiu's tributaries; but Ecgfrid's crushing defeat at Dunneichen in 685 restored them to full independence. This lasted down to 756, when a Northumbrian and Pictish army under Eadberct and Angus mac Fergus pressed so hard upon Alclyde, that the place was surrendered after a four months' siege; and four years later we hear of the burning of its fortress, 'which,' says Hill Burton, 'was probably, after the fashion of that day, a large collection of wooden houses, protected by the height of the rock on which it stood, and, where necessary, by embankments.' In 870 Alclyde sustained a second four months' siege, this time by the Vikings, under Olaf the White, Norwegian King of Dublin, who reduced its defenders by famine. Before which siege, with the disorganisation of Northumbria, the whole of the British territory from the Clyde to the Derwent had once more become united under its line of independent kings, claiming Roman descent, the last of whom, Donald, died in 908. Thereon the Britons elected Donald, brother to Constantin, King of Alban; and thus Alclyde became dependent on Alban, till in 1018 its sub-king Owen or Eugenius the Bald was succeeded by Duncan, Malcolm II.'s grandson—the 'gracious Duncan' of *Macbeth*. Malcolm dying in 1034, Duncan succeeded him as King of Scotia, in which Strathclyde thenceforth becomes absorbed. In 1175 the northern portion of the old Cumbrian kingdom, nearly represented by Dumbar-tonshire, was formed by William the Lyon into the earldom of Levenach or LENNOX, and conferred on his brother David. By 1193 this earldom had come into possession of Aluin, the first of a line of Celtic earls, who, down to their extinction in 1425, frequently figure in Dumbarton's history, but who only retained the castle till 1238, from which year onward it was always a royal fortress. As such, during the competition for the Scottish crown (1292), it was delivered up to Edward I. of England, who gave it over to Baliol, on the adjudication in his favour; but from 1296 to 1309 it was held again by the English, with Sir Alexander Monteith for governor. He it was who on 5 Aug. 1305 took Wallace captive at Glasgow, so that likely enough the hero was really for a week a prisoner here, where, along with old Lochaber axes and skene-dhus, flint pistols, rude pikes, and tattered regimental colours, was preserved for about 600 years his huge two-handed sword until removed in 1888 to the Wallace Monument. In 1313, according to our least veracious chroniclers, Bruce, almost single-handed, achieved the capture of Dumbarton Castle. A sort of Guy Fawkes and Bluebeard episode this, with keys and a cellar figuring largely therein—the cellar first full of armed English soldiery, who are overawed by the monarch, and the traitor Monteith next led to it in fetters, but presently pardoned by the magnanimous hero. Anyhow, by Bruce the castle was committed to the governorship of Sir Malcolm Fleming of Cumbernauld, whose son was one of the few that escaped from Halidon Hill (1333), when Dumbarton became the rallying-point of the remnant adhering to the boy-king, David II. Sir Robert de Erskine was next appointed governor (1357), and after him Sir John de Dennistoun or Danielstoun. He was succeeded by

his son, Sir Robert, on whose death in 1399 Walter, his brother, the parson of Kincardine O'Neil, forcibly seized the castle, as belonging heritably to his family. He held it till 1402, surrendering it then in the hope of obtaining the vacant see of St Andrews—a hope cut short by his death before the end of the year. In 1425 James Stewart, son of the late Regent Albany, and grandson of the eighth and last Celtic Earl of Lennox, assaulted and burned the town of Dumbarton, and murdered the king's uncle, Sir John Stewart, who held the castle with only thirty-two men. Dumbarton was next besieged in 1481 by the fleet of Edward IV., but was bravely and successfully defended by Sir Andrew Wood of Largo. For the next half century the history of Dumbarton is virtually that of the Stewart Earls of Lennox. Their founder, John, having taken up arms against James IV., the castle was twice besieged in 1489—first by the Earl of Argyll without success, and then by the young king himself, who after a six weeks' leaguer compelled the four sons of Lennox to capitulate. The surprise of the castle one stormy night by John, third Earl (1514), the landing here of Albany from France (1515), the establishment of a French garrison (1516), the interception of a large French subsidy (1543) by Matthew, fourth Earl, Lord Darnley's father, and his design of betraying the fortress to England (1544)—these are events that can merely be glanced at in passing. On 7 Aug. 1548 Queen Mary, then six years old, embarked at Dumbarton for France; in July 1563 she paid a second visit to the castle; and hither her army was marching from Hamilton when its progress was barred at Langside, 13 May 1568. For nearly three years the castle held out for her under its governor, John, fifth Lord Fleming; and the story of how it was taken by escalade on the night of 1 April 1571 deserves to be told with some fullness. Captain Thomas Craufurd of Jordanhill, to whom the attack was entrusted, had long been attached to the house of Lennox. He it was whose evidence was so important regarding the death of Darnley, and who afterwards accused Lethington as one of the murderers, since which time he appears to have resumed the profession of arms. In the enterprise he was assisted by Cunningham, commonly called the Laird of Drumwhassel, one of the bravest and most skillful officers of his time, and he had been fortunate in bribing the assistance of a man named Robertson, who, having once been warden in the castle, knew every crag of the rock, 'where it was best to climb, and where fewest ladders would serve.' With him and a hundred picked men Craufurd set out from Glasgow after sunset. He had sent before him a few light horse to prevent intelligence by stopping all wayfarers, and about midnight he arrived at Dumbuck, within a mile of the castle, where he was joined by Drumwhassel and Captain Hume. Here he explained to the soldiers the hazardous service on which they were engaged, provided them with ropes and scaling ladders, and, advancing quickly and noiselessly, reached the rock, whose summit was fortunately wrapped in a heavy fog, whilst the bottom was clear. But, on the first attempt, all was likely to be lost. The ladders lost their hold while the soldiers were on them; and had the garrison been on the alert, the noise must have inevitably betrayed them. They listened, however, and all was still. Again the ladders were fixed, and, their 'craws' or steel hooks this time catching firmly in the crevices, the leaders gained a small out-jutting ledge, where an ash tree had struck its roots. Fixing the ropes to its branches, they speedily towed up the rest of their comrades. They were still, however, fourscore fathoms from the wall. They had reached but the middle of the rock, day was breaking, and when, for the second time, they planted their ladders, a singular impediment occurred. One of the soldiers in ascending was seized with a fit, in which he convulsively grasped the steps so firmly, that no one could either pass him or unloose his hold. But Craufurd's presence of mind suggested a ready expedient; he tied him to the ladder and turned it round, so the passage was once more free. They were

now at the bottom of the wall, where the footing was narrow and precarious; but once more fixing their ladders in the copestone, Alexander Ramsay, Craufurd's ensign, and two other soldiers, stole up, and though at once discovered by a sentinel, leapt down and slew him, sustaining the attack of three of the guard till they were joined by Craufurd and the rest. Their weight and struggles to surmount it brought the wall down with a run, and afforded an open breach, through which they rushed in shouting, 'A Darnley, a Darnley!' Craufurd's watchword, given evidently from affection to his hapless master, the murdered king. According to Dr Hill Burton, the point thus gained was the top of the western peak, the ascent being made to the left of the present entrance; and from this vantage-ground the assailants now turned the cannon on the garrison, who, panic-struck, attempted no resistance. Fleming, the governor, from long familiarity with the rock, managed to escape down the face of an almost perpendicular gully, and, passing through a postern which opened upon the Clyde, threw himself into a fishing-boat, and so passed over to Argyllshire. In this achievement the assailants lost not a man, and of the garrison only four were slain. In the castle were taken prisoner John Hamilton, Archbishop of St Andrews, who was found with mail shirt and steel cap on, Verac, the French ambassador, Fleming of Boghall, and John Hall, an English gentleman, who had fled to Scotland after Dacre's rebellion. Lady Fleming, the wife of the governor, was also taken, and treated by the Regent courteously, being suffered to go free, and carry off with her her plate and furniture. But Hamilton, the primate, was instantly brought to trial for the murder of Darnley and Moray, condemned, and hanged and quartered without delay.

In 1581, as a signal and crowning favour, Esmé Stewart, the new-made Duke of Lennox, received the governorship of Dumbarton Castle, one of the three great national fortresses; in 1639 it was seized on a Sunday by the Covenanters, its captain, 'a vigilant gentleman,' attending church with so many of the garrison that, they being taken on their homeward way, the place was defenceless. It was, however, recaptured by the Royalists, to be lost again on 28 Aug. of the following year. Thereafter the castle drops quietly out of history, a visit from Queen Victoria on 7 Aug. 1847 being all that remains to be noticed. Nor of the town is there anything worthier of record than the injury done it by floods of the Leven in 1334, and again in the early years of the 17th century, when the magistrates felt obliged to apply to parliament for aid in constructing bulwarks. A commission of 1607 reported that 'na less nor the sovme of threttie thousand poundis Scottis money was abill to beir out and furneis the necessar charges and expenses in pforming these warkis that are liable to saif the said burgh from utter destructiounne.' A grant of 25,000 merks Scots was accordingly made for the purpose by parliament; and, this proving insufficient, a farther sum of 12,000 was afterwards granted by King James. In 1675 Dumbarton gave the title of Earl in the peerage of Scotland to George, third son of the first Marquis of Douglas, but this peerage became extinct at the death of his son about the middle of the 18th century.

The parish of Dumbarton is bounded NW by Bonhill; N by Kilmarnock; NE by Drymen and Killearn in Stirlingshire; SE by Old Kilpatrick; S, for 3 furlongs, by the river Clyde, which separates it from Renfrewshire; and W by the river Leven, dividing it from Cardross. Its utmost length, from NE to SW, is 6½ miles; its breadth, from E to W, varies between 1½ furlong and 5½ miles; and its area is 8563 acres, of which 98½ are foreshore and 174 water. The LEVEN winds 4½ miles southward along all the western border, and is joined from the interior by Murroch Burn; whilst Overton Burn, tracing much of the south-eastern boundary, and itself joined by Black Burn, flows direct to the Clyde. The southern and western districts, to the mean distance of 1½ mile from the Leven, present no striking natural

feature except the Castle Rock, in whose vicinity they lie so little above sea-level as to be sometimes flooded by spring tides. From this low valley the surface rises north-eastward to Auchencroch and Dumbarton Muirs, attaining 895 feet at Knockshanoch, 1228 at Dughnot Hill, 1118 at Knockupple, and 892 at Knockvadie. Limestone abounds at Murroch Glen, 2½ miles NNE of the town; red sandstone is quarried on the moors; and an excellent white sandstone occurs at Dalreoch, in Cardross parish. The soil—in a few fields a rich alluvium—in some of the arable tracts is very clayey, in others gravelly, and in most somewhat shallow, yet generally fertile; whilst that of the moors is sparse, and of little value. Among the mansions are Strathleven, Heleuslee, and Overton. Dumbarton is seat of a presbytery in the Synod of Glasgow and Ayr; the living is worth £425. Pop. of entire parish (1891) 14,065.—*Ord. Sur.*, sh. 30, 1866.

The presbytery of Dumbarton comprises the old parishes of Arrochar, Baldernock, Balfon, Bonhill, Buchanan, Cardross, Drymen, Dumbarton, Fintry, Killearn, Kilmarnock, New Kilpatrick, Old Kilpatrick, Luss, Roseneath, Row, and Strathblane; the *quoad sacra* parishes of Alexandria, Clydebank, Craigrownie, Dalreoch, Duntocher, Garelochhead, Helensburgh, Helensburgh-West, Jamestown, Knoxland, Milngavie, and Renton; and the chapelries of Peaton, Temple, Dalmuir, and Kilegellan. Pop. (1881) 70,081, (1891) 87,739, of whom 12,200 were communicants of the Church of Scotland.—The Free Church also has a presbytery of Dumbarton, with 2 churches at Dumbarton, 2 at Helensburgh, 3 at Renton, and 15 at respectively Alexandria, Arrochar, Baldernock, Bonhill, Bowling, Cardross, Clydebank, Duntocher, Garelochhead, Killearn, Luss, Old Kilpatrick, Roseneath, Shandon, and Strathblane, which 22 churches together had 5322 members in 1891.—There is also a presbytery for the U.P. Church, with 2 churches at Dumbarton, and 1 each at Alexandria, Balfon, Bonhill, Clydebank, Craigs and Duntocher, Drymen, Helensburgh, Kilmarnock, Old Kilpatrick, Radnorpark, and Renton, which 13 churches had 4457 members in 1891.

See John Glen's *History of the Town and Castle of Dumbarton* (Dumb. 1847); Sir Wm. Fraser's *The Lennox* (2 vols., Edinb., 1874); and Donald Macleod's *Castle and Town of Dumbarton* (Dumb. 1877).

Dumbarton and Helensburgh Railway. See NORTH BRITISH RAILWAY.

Dumbartonshire, a county, partly maritime, but chiefly inland, in the W of Scotland, comprising a main body and a detached district. The main body is bounded N by Perthshire, E by Stirlingshire, SE by Lanarkshire, S by the river Clyde and the upper Firth of Clyde, which divide it from Renfrewshire, and W by Argyllshire. Its eastern boundary, from Island Vow, above Inversnaid, to the mouth of Endrick Water, runs along the middle of Loch Lomond; thence, to the mouth of Catter Burn, is traced by Endrick Water; and, in the extreme SE, for 3 miles above Maryhill, is traced by the river Kelvin. Its western boundary, except for 9¼ miles in the extreme N, is all formed by Loch Long. The detached district, commencing 4¼ miles E by N of the nearest point of the main body, and 5 NNE of Glasgow, comprises the parishes of Kirkintilloch and Cumbernauld; it is bounded N and E by Stirlingshire, and S and W by Lanarkshire. The Boundary Commissioners in 1891, by section 40 of the Local Government (Scotland) Act, 1889, left the detached district untouched. There was no alteration made in any of the parish boundaries, and the only change in the county boundary was its extension to include the entire parish of New Kilpatrick (which was partly in Stirlingshire) and the town of Milngavie.

All the northern or ARROCHAR district of the county, lying partly around the head of Loch Lomond, partly between that lake and Loch Long, is a group of mountains, intersected by deep gorges.—Culminating in Ben Vorlich (3092 feet) and Ben Vane (3004), it displays all the most characteristic features of grand, romantic,

beautiful Highland scenery. The central part from Finnart and the middle of Loch Lomond to the hillscreens of the Firth of Clyde, but including the peninsula of Roseneath, is a region varying between the highland and lowland, and exquisitely bleuds many a feature of sternness and wildness with many of the sweetest loveliness. The lofty hills of Arrochar and Luss, in particular, contrast most strikingly with the wide expanse of the pellucid waves of the queen of lakes, far-famed Loch Lomond. 'Here savage grandeur, in all the towering superiority of uncultivated nature, is seen side by side with the very emblem of peace and tranquillity, an alpine lake, which the winds reach only by stealth.' The southern district, comprising the seaboard of the Clyde, the Vale of Leven, and the tract eastward of that vale to the extremity of the main body of the county, is generally lowland and rich almost to excess with gentle contour and tasteful ornamentation; yet even this is diversified—to some extent broadly occupied—with characters of abruptness and boldness, shown in the shoulders of the Cardross hills, in the mass of Dumbarton Rock, in the brows of Dumbuck and of basaltic ranges northward of it, and in the capriciously escarped, romantic acclivities of the Kilpatrick Hills, which, extending 5½ miles from E to W, and attaining a maximum altitude of 1313 feet in Duncomb and Fynloch, contain many rich close scenes, and command some of the finest and most extensive views in Scotland. The detached district is all lowland, and of tame appearance, nowhere exceeding 480 feet above sea-level, yet extends so near the roots of the Campsie Fells as to borrow effects of scenery similar to those which the tracts along the Clyde borrow from the Kilpatrick Hills. No region in Scotland can boast of finer scenery than the county of Dumbarton; and certainly none more varied, or oftener visited and admired by strangers.

Considerably more than one-half of Loch Lomond, and fully two-thirds of the islands in it, belong to Dumbartonshire. Loch Sloy in Arrochar, Lochs Humphrey and Cochno in Old Kilpatrick, Fynloch in Dumbarton, Faunyside Loch in Cumbernauld, and several smaller lakes, have aggregately a considerable area. The river Clyde, from opposite Blythswood to the influx of the Leven, runs 8½ miles along the southern border; and, like the Firth, onward to the south-westerly extremity of Roseneath, teems with the vast commercial traffic of Glasgow. The Leven, winding 7½ miles southward from Loch Lomond to the Clyde, bisects the lowland district of the county's main body, and is notable at once for the purity of its waters, the richness of its vale, and the profusion of bleachfields and print-works on its banks. The Endrick, over all its run on the eastern boundary, is a beautiful stream. The Kelvin, though ditch-like where it approaches the main body's south-eastern border, yet at Killermont and Garscube exhibits much exquisite beauty. Allander Water drains most of New Kilpatrick to the Kelvin. The Falloch, Invcrogias, Douglas, Luss, Finlas, Fruin, and other brooks and torrents, with many fine cascades, drain most of the Highland tracts into Loch Lomond. The Kelvin traces most of the northern boundary of the detached district, but everywhere there retains its ditch-like character. The sluggish Luggie drains the western part of the detached district to the Kelvin, and some tiny streamlets drain the eastern part to the Carron. Many beautiful rivulets and burns are in the interior of the main body, running either to the principal rivers, or pursuing independent courses to the Clyde, Gare Loch, or Loch Long. The Forth and Clyde Canal traverses the N border of the detached district, and afterwards passes along the S border of the main body to the Clyde at Bowling Bay. Springs of excellent water are almost everywhere numerous and copious.

The climate is exceedingly various. Some parts of the county, such as the seaboard of the Clyde and the Vale of Leven, are comparatively genial, while other parts, as the pastoral lands of Arrochar and the plateaux of the Kilpatrick Hills, are comparatively severe. -Even

small tracts only a few miles distant from one another are so strongly affected by the configuration of the surface as to differ widely in regard to heat, moisture, and the winds. Nowhere in Scotland do heights and hollows act more powerfully on climate, the former in the way of attracting or cooling, the latter in ventilating or warming. Even in places so near and like one another as Keppoch, Camus Eskan, Ardincaple, and Bellretiro, the aggregate rain-fall, as ascertained by gauges all of one construction, was respectively 43.15, 45.5, 50.57, and 52.5. The climate, on the whole, however, is good. There is more moisture, indeed, than in many other parts of Scotland, but the excess is not so much in the quantity that falls as in the length of time it takes to fall; and whatever disadvantage arises from a corresponding excess of cloudiness, seems to be well counterbalanced by the prevalence of the genial W wind during no less than about nine months in the year. Sharp E winds blow in spring, but, even in their sharpest moods, they are not so keen as in the eastern counties, and are much less accompanied with frosty fogs.

The formation consists of mica slate in the N, with dykes of whinstone and greenstone; Lower Silurian towards the S; and Old Red sandstone along the Clyde estuary, where trap rocks of various kinds form Dumbarton Castle Rock and Dumbuck Hill, besides the main bulk of the Kilpatrick Hills. Mica slate, always stratified, often laminated, and generally comprising much mica, much quartz, and very little felspar, forms the greater part of the highest and most striking uplands of the N. The quartz of the mica slate is sometimes so extremely abundant as to render the rock more properly quartzose than micaceous. The mica slate likewise passes occasionally into talc slate, and both the mica slate and the talc slate, between Tarbet and Luss, are intersected by beds of greenstone, felspar, and porphyry. Clay slate is also plentiful in the N, lies generally on the mica slate, is frequently traversed by veins of quartz, abounds with iron pyrites, and is quarried as a roofing slate at Luss and Camstradden. A kind of limestone slate, or a laminated rock strongly charged with lime, occurs in the same tracts as the clay slate. Greywacke, chiefly amorphous, seldom slaty, and often abounding with quartz, commences a little S of Camstradden slate quarry, and forms a large portion of the parishes of Row and Cardross. A bluish-black limestone is frequently associated with the greywacke. Old Red sandstone extends from the lower part of Loch Lomond, through the western part of Bonhill, and through Cardross and Row, to the SW of Roseneath. A yellow sandstone of quite different lithological character from the Old Red sandstone, easily chiseled, but hardening by exposure, occurs at some parts of the seaboard of the Clyde, and extends at intervals and fitfully to Nethertou-Garscube. Carboniferous limestone, coal, shale, and small beds of ironstone lie above the sandstones in the eastern wing of the main body of the county, and throughout the detached district; but they aggregately yield a very poor produce compared with that of other Scottish regions of the coal formation.

The land area of the county (including that of the portion of New Kilpatrick parish that was formerly in Stirlingshire) is 157,895 acres, but was at one time over-estimated at 167,040 acres; and, by a competent agricultural authority, who so over-estimated it, was classified into 6050 acres of deep black loam, 30,970 of clay on a subsoil of till, 25,220 of gravel or gravelly loam, 3750 of green hilly pasture, 99,400 of mountain and moor, 720 of bog, and 930 of isles in Loch Lomond. The rivalry of proprietors in the lowland districts, the demand from the markets of Glasgow and Greenock, the great increase of general local trade, and the new facilities of communication by steamboats and railways, have powerfully stimulated agricultural improvement. Draining, fencing, reclamation, skilful manuring, ameliorated courses of rotation, and the use of better implements, have all been brought largely into play, with the result of greatly enhancing

the value of land and increasing the amount of produce. In 1881 the percentage of the cultivated area was 26·8, in 1891 33·5, viz., 5·1 under corn crops, 2·5 under green crops, 10·3 under clover, etc., and 15·4 under permanent pasture. A great extension of sheep-farming, begun in the early part of the present century, went on vigorously and rapidly in the upland districts; and was accompanied there by the practice of moor-burning, which occasioned such a change on the face of the hills, that tracts formerly brown and heathy are now covered with pasture. The growth of copeswood on lands unfit for tillage or pasture has long been much practised; and, besides being ornamental to the landscape, yields a considerable revenue. In 1891 there were 8203 acres under wood. The cattle, in the upland districts, are of the Highland breeds; in the lowland districts generally either crosses between these and the Ayrshire, or, on dairy farms or for dairy purposes, pure Ayrshire. The sheep, on the hill districts, are mostly the black-faced; on the low grounds, are generally the Cheviot, with some mixture of English breeds. The native horses are small animals, of intermediate character between the ordinary cart-horse and Highland pony; and with few exceptions are scarcely ever used in field labour. Clydesdale horses, either purchased in the Lanarkshire markets or bred from good stallions, are in common use on the arable farms. Swine, mostly for home use, are kept by almost all the farmers, and by many cottagers. Herds of fallow deer are on Inchmurrin and Inchlonaig in Loch Lomond; and red deer once abounded in the mountain districts, but were long ago exterminated. Bee-keeping is largely carried on, especially at Clynder.

Manufactures struck root in Dumbartonshire in the year 1728, and were greatly stimulated and extended by the formation of good roads, the deepening of the Clyde, the opening of the Forth and Clyde Canal, the introduction of steam navigation, and the opening of successively the Dumbartonshire, the Vale of Leven, the Forth and Clyde, the Dumbarton and Helensburgh, the Strathendrick, and the Lanarkshire and Dumbartonshire railways. They have also derived increase from demands and facilities for shipbuilding, from the growing increase of summer tourists to Loch Lomond and Loch Long, and from summer residence of multitudes of Glasgow citizens at Helensburgh, Garlochhead, Roseneath, Kilcreggan, Cove, Arrochar, and other places; and they now figure so largely and vigorously as to compete in value with the arts of agriculture. Most of the low tracts of the county, even such as possess no coal within their own limits, have followed Glasgow and tried to rival it in some of its departments of manufacture. The Vale of Leven, in particular, is crowded with bleachfields, printfields, dye-works, and cotton-works, giving employment to thousands. Cotton-printing, cotton spinning, paper-making, iron-working, shipbuilding, the making of chemicals, and the distilling of whisky are all more or less prominent. The salmon and herring fisheries are also highly important and lucrative. The Forth and Clyde Canal, besides serving for water conveyance, concentrates some trade around its W end at Bowling Bay. The deepening of the Clyde, in addition to its greatly improving the navigation and stimulating commerce, produced the incidental advantage of adding to the county about 600 acres of rich land—the spaces behind the stone walls, formed for confining the tidal current, having rapidly filled up with a fine alluvial deposit, which soon became available first for meadow and next for the plough. The steamboat communication is very ample, including lines up and down Loch Lomond, and connecting all the chief places on the Clyde and all the sea-lochs with Greenock and Glasgow.

The only royal burgh is Dumbarton. The other towns are Helensburgh, Kirkiutulloch, Alexandria, Bonhill, Renton, Dumtocher, Clydebank, and Cumbernauld. The chief villages are Arrochar, Auchinstarry, Balloch, Bearsden, Bowling, Cardross, Clynder, Condorrat, Dalsholm, Dumbuck, Faifey, Garelochhead, Garscadden, Garscube, Hardgate, Jamestown, Kilcreggan and Cove,

Knightwood, Little Mill, Luss, Milton, Netherton, New Kilpatrick, Old Kilpatrick, Radnorpark, Roseneath, Shandon, Smithston, Twechar, Waterside, with parts of Yoker and Leuzie. The principal seats are Arden House, Ardincaple, Ardmore, Ardoch, Auchendennan, Auchentorlie, Auchentoshan, Balloch Castle, Balvic, Barcman, Barnhill, Bloomhill, Bonhill Place, Boturich Castle, Cameron House, Camus Eskan, Clober House, Cockno House, Cowden Hill, Craigrownie, Cumbernauld House, Darleith, Dumbuck House, Edinbarnet, Finnart, Garscadden, Garscube, Gartshae House, Glenarbuck, Helenslee, Keppoch, Killermont, Kilmahew, Kilmardinny, Knoxland, Lennoxbank, Overtoun, Roseneath Castle, Rosdhu, Strathleven, Stuckgowan, Tillechewan Castle, Westerton House, and Woodhead.

The places of worship within the civil county, in 1892, were 12 *quoad civilia* parish churches, 15 *quoad sacra* parish churches, 2 chapels of ease, 23 Free churches, 16 U.P. churches, 1 United Original Secession church, 1 Congregational chapel, 3 Baptist chapels, 2 Methodist chapels, 1 Evangelical Union chapel, 4 Episcopal churches, and 6 Roman Catholic churches. In 1895 the county had 61 schools (52 of them public), which, with total accommodation for 18,389 children, had 16,544 on the registers and 13,923 in average attendance.

The county is governed by a lord-lieutenant, a vice-lieutenant, 20 deputy-lieutenants, a sheriff, a sheriff-substitute, and more than 100 magistrates. The County Council is composed of 41 members, for as many electoral districts, Alexandria and Helensburgh having four districts each, and Cowgate and Renton two each. One-fourth of the members constitutes a quorum. The Standing Joint-Committee of the county is composed partly of county councillors and partly of commissioners of supply. The sheriff court for the county, and the commissary court are held at Dumbarton on every Tuesday and Friday during session; sheriff small debt courts are held at Dumbarton on every Tuesday during session and occasionally during vacation; at Kirkiutulloch, for Kirkiutulloch and Cumbernauld parishes, on the first Thursdays of March, June, September, and December; and quarter sessions are held at Dumbarton on the first Tuesdays of March, May, and August, and the last Tuesday of October. The police force of the county, in 1891, excluding 13 men for Dumbarton, comprised 62 men; and the salary of the chief constable was £350. Exclusive of Dumbarton, the county returns a member to parliament, its constituency numbering 11,789 in 1891. The annual value of real property was £384,627 in 1882, and £397,232 in 1891, or, including railways, etc., £470,103. Pop. (1881) 75,333, (1891) 94,495, of whom 46,930 were males, and 47,565 females. Houses (1891) inhabited 13,309, vacant 1056, building 236.

The registration county takes in a part of New Kilpatrick parish from Stirlingshire, and had, in 1891, population of 98,014. All the parishes are assessed for the poor, and 9 of them, with 3 in Stirlingshire and 1 in Perthshire, are included in Dumbarton poor law combination. The number of registered poor, during the year ending 14 May, 1891, was 851; of casual poor, 72. The number of pauper lunatics was 155, and the expenditure on their account was £3638. The percentage of illegitimate births was 4·8 in 1880, and 4·5 in 1890.

The territory now forming Dumbartonshire belonged anciently to the Caledonian Damnonii or Attacotti; was included by the Romans in their province of Vespasiana. In 843 the county became part of the Scottish Kingdom, under Kenneth Macalpine; and exclusive of its detached district, was long a main part of the ancient district of Lennox or Levenax. That district included a large part of what is now Stirlingshire, and portions of what are now Perthshire and Renfrewshire. It was constituted a county by William the Lyon, and underwent curtailments after some period in the 13th century, reducing it to the limits of the present main body of Dumbartonshire. The county then changed its name from Lennox to Dumbartonshire. Here in the end of the thirteenth and the beginning of the fourteenth centuries, during

the war of independence, Bruce wandered a fugitive among its glens and mountains, and when at length crowned king annexed to it its present detached district. It was the scene of many contests between Caledonians and Romans, between Cumbrians and Saxons, between Scots and Picts, between Highland clan and Highland clan, between the caterans and the Lowlanders, between different parties in the several civil wars of Scotland; and made a great figure, especially in the affairs of Antoninus' Wall and those of the Cumbrian or Strathclyde kingdom, in the events of the wars of the succession, and the turmoils of the cateran forays in the time of Rob Roy. Some of the salient points in its history are touched in the account of Dumbarton Castle, and in the article on Lennox. Several cairns and a cromlech still extant, several rude stone coffins and fire-hollowed canoes found imbedded in the mud of the river close to the castle a few years ago, are memorials of its Caledonian period. A number of old rude forts or entrenchments, particularly in its Highland districts, are memorials of Caledonian, Pictish, and Scandinavian warfare within its limits. Vestiges of Antoninus' Wall and relics found on the site of that wall along all the N border of its detached district, and along the SE border of its main body onward to the wall's western end at Chapel-hill in the vicinity of Old Kilpatrick village, and an ancient bridge and a sudatorium at Duntocher, are memorials of the Romans. Several objects in Dumbarton Castle, and particularly historical records in connection with the castle, are memorials of the civil wars; a mound in the E end of Cardross parish, not far from Dumbarton town, indicates the last residence or death-place of Robert Bruce; numerous old castles, some scarcely traceable, some existing as ruins, some incorporated with modern buildings, as at Faslane, Balloch, Ardincaple, Dunglass, and Kirkintilloch, are relics of the several periods of the baronial times; and other objects in various parts, particularly in Glenfruin, are memorials of sanguinary conflicts among the clans. See Joseph Irving's *History of Dumbartonshire, Civil, Ecclesiastical, and Territorial* (Dumb. 1860); his *Book of Dumbartonshire* (3 vols. 1879); and Sir Wm. Fraser's *Chiefs of Colquhoun and their Country* (2 vols., Edinb., 1869).

Dumbartonshire Railway. See CALEDONIAN RAILWAY.

Dumbreck, a hill on the mutual boundary of Strathblane and Campsie parishes, SW Stirlingshire, culminating $1\frac{1}{2}$ mile NNE of Strathblane village, and rising to an altitude of 1664 feet above sea-level. It forms part of the western chain of the Lennox Hills; and overhangs Ballagan Glen on the W and Fin Glen on the E.

Dumbrock, a triangular loch ($2 \times \frac{3}{4}$ furl.) in Strathblane parish, SW Stirlingshire, 1 mile SW of Strathblane village.

Dumbuck, a village and a mansion in the W of Old Kilpatrick parish, Dumbartonshire. The village stands near the Clyde, $1\frac{3}{4}$ mile E by S of Dumbarton; and the mansion, Dumbuck House, is in the neighbourhood. Wooded Dumbuck Hill (547 feet), immediately to the N, is a bold basaltic abutment from the south-western extremity of the Kilpatrick Hills, that stoops precipitously to Dumbarton plain. It commands a magnificent prospect from Tinto to Arran, and from the Grampians to Ayrshire; and so much outtops Dumbarton Castle as easily to command it by artillery, yet was occupied with little effect by Prince Charles Edward's force in the '45.

Dumbulls, an eminence (300 feet) in Forgandenny parish, SE Perthshire, 1 mile SE of Forgandenny village. Low, craggy, and elliptical, it has traces on the crests of its accessible sides of an ancient bulwark, formed of very large granite boulders; and it commands a brilliant view of Lower Strathearn and the Firth of Tay.

Dumcrieff, a handsome mansion, with finely wooded grounds, in Moffat parish, N Dumfriesshire, on the right bank of Moffat Water, 2 miles SE of Moffat town. Owned first by Murrays, then by the future Sir George

Clerk of Penicuik, it was the residence about 1735 of John Loudon Macadam, of road-making celebrity, and next of Burns's biographer, Dr James Currie (1756-1805), by whom, a few months before his death, it was sold to Dr John Rogerson (1741-1823), court physician at St Petersburg for close upon fifty years. It now belongs to his great-grandson, Lord Rollo. See DUNCRUB.

Dumfin, an eminence (200 feet) in Luss parish, Dumbartonshire, on the left bank of Fruin Water, 3 miles ENE of Helensburgh. It takes its name, signifying 'the fort of Fin,' from its legendary connection with Fingal; and it has traces of an ancient fort.

Dumfries, a town and a parish on the SW border of Dumfriesshire. A royal and parliamentary burgh, a seaport—since the era of railways of little importance—a seat of manufacture, the capital of Dumfriesshire, the assize town for the south-western counties, and practically the metropolis of a great extent of the S of Scotland, the town stands on the left bank of the river Nith, and on the Glasgow and South-Western railway at the junction of the lines to Lockerbie and Portpatrick, by rail being $14\frac{1}{2}$ miles WSW of Lockerbie, $15\frac{1}{2}$ WNW of Annan, $19\frac{1}{4}$ NE of Castle-Douglas, $80\frac{1}{2}$ ENE of Portpatrick, $42\frac{1}{2}$ SE of Cumnock, 92 SE by S of Glasgow, $89\frac{3}{8}$ S by W of Edinburgh, 33 WNW of Carlisle, and $333\frac{3}{8}$ NNW of London. The site is mainly a gentle elevation, nowhere higher than 80 feet above sea-level, partly the low flat grounds at its skirts; extends about 1 mile from N to S, parallel to the river; rises steeply from the banks at the N end, and is blocked there by a curve in the river's course; and bears the lines of Castle Street and High Street along its summit. MAXWELLTOWN, along the Kirkeudbrightshire bank of the Nith, directly opposite and nearly of the same length as Dumfries, seems to be rather a part of the town than a suburb, and is partly included in the parliamentary (though not in the royal) burgh. Behind Maxwelltown to the W is Corbely Hill, a broad-based, round, and finely-ontined elevation, on the summit of which stands a church and convent of the Immaculate Conception, erected in 1881-84, from designs by Messrs Pugin, for Nuns of the Perpetual Adoration of the Blessed Sacrament; whilst a little lower down is a picturesque building, serving the double purpose of an observatory and a museum of natural history and antiquities. The view from the top of this hill is very extensive, and also of great natural beauty—the broad and level valley, for the most part highly cultivated, of the Nith, abounding in mansions, villas, gardens, and nursery grounds; the Moffat and Galloway Hills, with the higher peaks of Queensberry and Criffel; and, over the Solway, the far-away Cumberland mountains. Altogether, the landscape, seen from the top of Corbely Hill, is not so unlike the plains of Lombardy. Dumfries itself, in architectural structure, relative position, social character, marketing importance, and general influence, holds a high rank among the towns of the kingdom. It is a minor capital, ruling in the S with nearly as much sway as Edinburgh in the E. It has either within itself or in its immediate outskirts an unusually large proportion of educated and wealthy inhabitants, giving evident indication of their presence in the tone and manners; and is seen at once, by even a passing stranger, to be a place of opulence, taste, and pretension. It has sometimes been called, by its admirers, 'the Queen of the South;' and it was designated by the poet Burns, 'Maggie by the banks o' Nith, a dame wi' pride enuch.' It is the cynosure of the south-western counties; and it sways them alike in the interests of mind, of trade, and of commerce. It has no rival or competitor, none at least that can materially compare with it, between Ayr and Carlisle, or between the Irish Sea and the Lowther Mountains. And even as a town, though other influential towns were not remote, it challenges notice for its terraces and pleasant walks beside the river; for its liues and groups of villas around its outskirts; for its picturesqueness of aspect; for the spaciousness of its principal streets; and for a certain, curious, pleasing romance in the style and collocation of many of its edifices.

Three bridges connect Dumfries and Maxwelltown; but only the uppermost one, widened in 1893, is available for carriages; and this commands a good view of all the riverward features of the burgh and the suburb, stretching partly to the N but chiefly to the S. The space along the Dumfries bank, between the bridges, is a wide street-terrace; the space further down, to a much greater distance, is an expanded or very wide street-terrace, used as the cattle market, called the Sands; and the space still further down, opposite the foot of the town and a long way past it, is a broad grassy promenade, fringed along the inner side by a noble umbrageous avenue, and called the Dock Park. The central streets present an array of fairly well-appointed shops. All the streets are paved, drained, clean, and well-lighted; and outlets on the roads to the N, to the S, and to the E are studded with villas. The town is well supplied with water, introduced in 1851 from Lochrutton, at a distance of 4 miles from Dumfries, on the principle of gravitation. The waterworks are under the management of a water commission, the members of which are partly elected by the town-councils of Dumfries and Maxwelltown and partly by the rate-payers. The scheme has operated most beneficially on the health of the community, for while Dumfries suffered severely from cholera on two occasions, and the infirmary used to be almost permanently occupied by a large number of fever patients, thanks also to a sanitary reform that has long been in progress, there is now not a healthier town in the kingdom, though there are yet several parts of the town that are disagreeable and unwholesome. The Nith contributes much to both salubrity and beauty; approaches, in long winding sweeps, under high banks richly clothed with wood; breaks immediately beyond the lower bridge, over a high caul, built for the water supply of grain mills on the Maxwelltown side; swells into a lake-like expanse above the caul; leaps into rapid current at low tide below it; is driven back by the flow of tide against it; and, both above and below the town, for several miles, has verdant banks tracked with public roads and footpaths.

The uppermost bridge was built in 1790-95; encountered great difficulties in the erection; cost, with the approaches, £4588; occasioned, for the forming of Buccleuch Street, an additional cost of £1769; it was widened and greatly improved in 1893 through the munificence of Miss M'Kie. The middle bridge was built in the 13th century by Devorgilla, mother of John Balliol; and for many long generations was held to be second only to London Bridge. It had originally nine arches, and is commonly, but erroneously, said to have had thirteen; suffered, in course of burghal improvements, demolition of about one-third of its length at the Dumfries end; has now only six arches; is ascended, at the Dumfries end, by a flight of steps, so as to be accessible only by foot passengers; and makes a prominent figure both in curious picturesqueness and as a great work of the early mediæval times. The lowermost bridge was opened on the last day of 1875; cost nearly £1500; is an iron suspension structure for pedestrians; measures 203 feet in length and 6½ feet in width; and has sides of trellis work rising 35 feet from the roadway to the finial. The County Buildings stand on the S side of the lower part of Buccleuch Street; were erected in 1863-66, after designs by David Rhind, of Edinburgh, with aid of £10,418 from Government; are in the Scottish Baronial style, with peaked towers and open Italianised parapets; present an imposing castellated appearance; rise to a height of four stories, including a sunk story; and contain a court-hall with accommodation for 300 persons, and offices or rooms for all departments of the county business. The prison of 1851, which adjoined the E end of the County Buildings, not fulfilling the requirements deemed necessary in modern prisons, was condemned; and a new one for Dumfries, Wigtown, and Kirkcudbright shires, was opened in August 1883, on the western outskirts of Maxwelltown. The old prison was taken down, and on its site were erected a new post office and a hall, called the St George's Hall, which be-

longs to Free St George's Church. The Town-Hall, on the N side of Buccleuch Street, opposite the post office, was originally the spacious chapel or 'tabernacle' erected by Robert Haldane in 1799. Having stood for some years unoccupied after the Haldane collapse, it was purchased in 1814, altered, renovated, and architecturally adorned, to be used as the county courthouse; and, after the opening of the new County Buildings in 1866, was sold for £1020 to the town council. Within it hang portraits of William and Mary of Orange, and Charles, the third Duke of Queensberry; and here is preserved the famous Silver Gun of the Seven Trades, the mimic cannon, 10 inches long, which James VI. presented to the craftsmen in 1617, to be shot for on Kingholm Merse—a custom kept up till 1831. The stack of buildings in the centre of High Street, cleaving it for a brief space into two narrow thoroughfares, contains the old town council room, and is surmounted by a steeple called originally the Tron, but now the Mid Steeple. This steeple was erected in 1707, at a cost of £1500, from designs (not of Inigo Jones, but) of a certain Tobias Bachup of Alloa. It has a fine peal of bells. It figures prominently, both in the High Street's own range and in every landscape view of the town, but has now a weather-worn and neglected appearance. The Trades Hall, on the E side of High Street opposite the Mid Steeple, was rebuilt in 1804 at a cost of £11,670; and, the trades' corporation privileges having been abolished in 1846, was sold to a merchant in 1847 for £650, and converted into business premises. The Assembly Rooms stand in George Street, were erected at a comparatively recent period, and are neat and commodious. The Theatre, in Shakespeare Street, built in 1790, and rebuilt and decorated in 1876, was the scene of early efforts of Edmund Kean and Macready. A Doric column to the memory of the third Duke of Queensberry was erected in Queensberry Square in 1804; and a very handsome iron ornamental fountain was inaugurated in 1882, replacing a former one commemorative of the introduction of the burgh's water supply.

The railway station stands at the north-eastern extremity of the town; was constructed, in lieu of a previous adjacent one, in 1863; and contains accommodation for the junctions of the lines from Lockerbie and Portpatrick with the Glasgow and South-Western. It includes a fine suite of buildings for offices, waiting-rooms, and hotel; had, till 1876, all its building on the W side of the railway, confronted, along the opposite side, by a broad, brilliant parterre; but in 1875-76, preparatory to its becoming the working nexus between the Scottish systems and the English Midland system, underwent great extension and improvement by the erection of a booking-office and other buildings on the E side, the provision of three times the previous amount of accommodation for goods, the construction of new premises for engines and smiths' shops, the formation of a great series of new sidings, the laying down of three new lines of rails, and the opening of a new approach street. To add to its accommodation a large and substantial hotel was erected in 1896. A viaduct of the Glasgow and South-Western railway crosses the Nith about a mile N of the station; and some other railway works of considerable magnitude are in the vicinity. Most of the banking-offices in the town are neat or handsome edifices, and several of them are of recent erection. The King's Arms Hotel and the Commercial Hotel, on the confronting sides of the lower expansion of High Street, are old and spacious establishments; and the latter was the headquarters of Prince Charles Edward during three days of Dec. 1745. The Queensberry Hotel, near the junction of English Street and High Street, is a recent elegant erection, as is also the New George Hotel. The Southern Counties Club, in Irish Street, was erected in 1874; is a handsome two-story edifice; and contains an elegant billiard room, 45 feet by 25, and other fine large apartments. Nithsdale woollen factory, at the foot of St Michael Street, overlooking the Dock promenade, was erected in 1858-59; is a vast, massive, turreted edifice, almost palatial in aspect; and has a chimney stalk rising to the height of

174 feet. Troqueer woollen factories, on the Kirkcudbrightshire side of the Nith, almost directly opposite the Nithsdale factory, are two structures of respectively 1866-67 and 1869-70, and more than compete with the Nithsdale factory in both extent of area and grandeur of appearance. Kingholm Mills, the cradle of the tweed trade in Dumfries, were closed in 1893, and the machinery removed to Nithsdale and Troqueer Mills. Those factories have belonged to one firm since 1871, and give employment to over 1000 hands. Rosefield Woollen Mills, erected in 1887-88, employ about 400 hands.

St Michael's Established church stands off the E side of St Michael Street, near the site of its pre-Reformation predecessor. Built in 1744-45, repewed and renovated in 1869 and 1881, an organ introduced in 1890, and two memorial windows inserted in 1891, it contains 1250 sittings, and is surmounted by a plain but imposing steeple, 130 feet high. The churchyard around it—a burial-place for upwards of seven centuries—is crowded with obelisks, columns, urns, and other monuments of the dead, computed to number fully 3300. Among them are the mausoleum of the poet Burns, and a granite pyramid (1834) to the memory of three martyrs of the Covenant. Greyfriars Established church stands on the site of Dumfries Castle, fronting the N end of High Street, and succeeded a previous church on the same site, built in 1727 partly of materials from the ancient castle. Itself erected in 1866-67, after designs by Mr Starforth, of Edinburgh, at a cost of nearly £7000, it is a richly ornamented Gothic edifice, the finest in the burgh, with a beautiful spire 164 feet high. A brass tablet to the memory of soldiers who fell in Egypt was erected in 1891. St Mary's Established church, at the N end of English Street, on the site of a 14th century chantry, reared by the widow of Sir Christopher Seton, was built in 1837-39, after designs by John Henderson, of Edinburgh, at a cost of £2400. It also is Gothic, with an open spire formed by flying buttresses, and was renovated and re-seated in 1878. A new hall in connection with the church was opened in 1888, and cost £2400. As much of the Crystal Mount, on which the church stands, as is not covered by the buildings, is used as a burial-place. The Free church in George Street, built in 1843-44 at a cost of £1400, was completely remodelled in 1893 at a cost of £2000. The Territorial Free church, at the junction of Shakespeare Street with the foot of High Street, was built in 1864-65 at a cost of £1800, and contains 500 sittings. The Martyrs' Free church, formerly the Reformed Presbyterian church, on the E side of Irving Street, was built in 1831-32, and interiorly reconstructed in 1866; is a neat building; and contains 650 sittings. The U.P. church in Loreburn Street, rebuilt in 1829 at a cost of more than £900, contains 500 sittings. The U.P. church in Buccleuch Street, rebuilt in 1862-63, after designs by Alexander Crombie, at a cost of £2000, is a handsome Gothic edifice, and contains 700 sittings. The U.P. church in Townhead Street was built in 1867-68; succeeded a previous church in Queensberry Street, built in 1788; is a handsome edifice; and contains 460 sittings. The Congregational chapel, on the W side of Irving Street, was built in 1835, enlarged in 1862, repewed and renovated in 1880; is a neat structure in the Italian style; and contains 650 sittings. The Wesleyan chapel in Buccleuch Street, at the corner of Castle Street, is a modest edifice, and contains 400 sittings. The Episcopal church of St John's, in Dunbar Terrace, was built in 1867-68, after designs by Slater and Carpenter, of London; is a striking structure in pure First Pointed style, with a tower and spire 120 feet high; and contains 460 sittings. The Catholic Apostolic chapel, in Queen's Place, was built in 1865 at a cost of £1000, and is a small building with a towerlet and pinnacle 58 feet high. The Baptist chapel in Newhall Terrace, successor to one in Irish Street, is a solid, plain edifice, seated for 420, erected in 1880 at a cost of £1900. The Roman Catholic church of St Andrew, pro-cathedral of the diocese of Whithorn or Galloway, in Shakespeare Street, near English Street

was built in 1811-13 at a cost of £2600. Romanesque in style with Byzantine features, it received the addition of a fine tower and octagonal spire (1843-58), 147 feet high, of N and S transepts and a domed apse (1871-72); and in 1879 the interior was beautifully decorated with arabesque designs. For all these improvements St Andrew's is indebted to the Maxwells of Terregles, and mainly to the late Hon. Marmaduke Constable Maxwell, a monument to whom was placed in it in 1876, and who lies buried here in a family vault under the altar. The Roman Catholic schools, adjoining the church, are excellent buildings with separate departments for boys, girls, and infants, and have accommodation for 736 children, an average attendance of about 420, and a grant of nearly £435. The Marist Brothers, a R.C. teaching order, a lay association of men, under vows of obedience, poverty, and chastity, have, since 1874, had their head house for the three kingdoms at St Michael's Mount, formerly Laural Bank, a mansion within 5 or 6 acres of ground in a south-eastern suburb. St Michael's Mount is also used as a sanatorium for the invalided brothers of the Order; a Provincial residence; and there is a Novitiate attached. St Joseph's Commercial College, formerly the old infirmary building, altered and enlarged, is a R.C. middle-class boarding school for boys, conducted by these Marist Brothers. About 70 pupils from various parts of the kingdom, and a few foreigners, are instructed in modern languages, mathematics, English, etc. New premises have now been erected for this college, which form a conspicuous building well-equipped for its work.

The Academy or High School was rebuilt in 1896-97 on the old site near Greyfriars' church, is surrounded by a playground 1½ acre in extent, and is a handsome building in the classic style of architecture. With accommodation for 600 scholars, it gives instruction to boys and girls in classics, modern languages, mathematics, arithmetic, writing, drawing, and all departments of English. Under the school-board, the Academy is conducted by a rector, 5 other masters, and 1 lady teacher, with endowments amounting to £120, and £48 per annum to keep up fabric from the town. There are several bursaries—1 of £18, 1 of £15, 3 or 4 each of £12, and a number of special prizes, besides 22 bursaries provided for by additional bequests, entitling successful competitors to a free education at the Academy, with use of books. There are several private schools, 2 ladies seminaries and boarding establishments, and 3 elementary board schools—Loreburn Street, St Michael Street, and Greensands, of which the two first were erected in 1876 at a cost of £3770 and £2800. With respective accommodation for 634, 607, and 363, the three have an average attendance of about 580, 500, and 250, and grants of over £630, £440, and £260.

The Episcopal school, a handsome new building in Rae Street, having accommodation for 344 children, has an average attendance of about 340, and a grant of nearly £300. The Industrial school, Burns Street, founded in 1856, with accommodation for 120 boys, is supported partly by voluntary contribution and partly by government grant. There are also an Industrial Home for destitute and orphan girls, supported by voluntary contribution; and several charitable associations of a minor character. The Almshouses in Broom's Road, East St Michael Street, owe their existence to the liberality of Mrs Caruthers of Warmanbie, being an establishment for 'ten or fewer lame or blind women. In 1880, a Young Men's and a Young Women's Christian Association were established, both having since been fairly well supported. The Mechanics' Institute (1825), near the foot of Irish Street, was built in 1859-61, and is a First Pointed edifice, including a lecture-hall (76 x 58 feet; 46 high), with accommodation for 1000 persons, in which cheap public lectures are delivered during the winter months. Connected with the main building, but facing St Michael Street, stands the antique town-house of the Stewarts of Shambelly, which is now adapted as the public reading-room and library of the Institute. The Crichton Institution, on a

rising-ground off the public road, $1\frac{1}{4}$ mile SSE of the town, originated in a bequest of over £100,000 by Dr James Crichton of Friars Carse. He had thought of a university; but, owing to the failure of attempts to obtain a charter, his trustees decided to construct a lunatic asylum for affluent patients. As partially built (1835-39), at a cost of fully £50,000, it was to have taken the form of a Greek cross, with central low octagonal tower, but, as completed (1870) at a further outlay of £40,000, it has somewhat departed from the original plan, the whole being now a dignified Italian edifice, one of whose finest features is the magnificent recreation hall. In 1889, its jubilee year, it then providing accommodation for 700 patients, and owning 600 acres of land, it was resolved to erect a handsome chapel. The neighbouring Southern Counties Asylum, for pauper lunatics, was erected in 1848 at a cost of £20,000; it and the Crichton Royal Institution have accommodation for 320 and 280 inmates respectively.

The Dumfries parish schools (laudward), Brownhall, Catherinefield, and Noblehill, with respective accommodation for 160, 189, and 639 children, have an average attendance of about 120, 120, and 490, and grants of nearly £120, £110, and £450.

In 1879, the estate of Hannahfield and Kingholm having fallen to the Queen as *ultima hæres*, that portion of the estate to the south of the town on the river bank, known as Kingholm Merse, was made over to the corporation—subject to servitude in favour of the War Department—for golf, cricket, and purposes of general sport and recreation. The crown also granted £9500 from the estate, in trust, for improving education in the counties of Dumfries, Wigtown, and Kirkcudbright; the trustees to create bursaries and scholarships, open to competition for pupils educated in primary schools, under the condition that successful competitors shall continue their education at secondary schools or at universities. The Dock Park, used as a recreation ground, is an extensive and beautiful meadow, the property of the town.

The Dumfries and Galloway Royal Infirmary stands in a situation similar to that of the Crichton Institution, a little nearer the town; was erected in 1869-71, after designs by Mr Starforth, at a cost of about £13,000; has arrangements on the most approved plans; and is maintained chiefly by legacies, subscriptions, parochial allowances, and annual grants from the counties of Dumfries, Kirkcudbright, and Wigtown. The building is Northern Italian in design, and consists of a central block of three stories and wings of two stories each. The Laurie ward here is in memory of the late husband of Mrs Laurie of Maxwellton, this lady having subscribed £5000 to the building fund. The workhouse occupies an airy healthy site to the S of the town; was erected in 1853-54 at a cost of more than £5500; contains accommodation for 132 pauper inmates; and serves entirely for the parish of Dumfries. Moorhead's Hospital stands in St Michael Street, opposite St Michael's Church; was founded and endowed, in 1753, by two brothers of the name of Moorhead; gives lodging and support to aged paupers of both sexes, and pensions to a number of widows at their own homes. A new cemetery on the slope of a hill at Craigs Road was laid out in 1874.

Dumfries is broadly stamped with the name of the poet Burns (1759-96). His term of residence here flashed on the popular mind so vividly as to have been at once and till the present day esteemed an epoch—'the time of Burns.' The places in it associated with his presence outnumber, at least outweigh, those in Ayr, Irvine, Kilmarnock, Tarbolton, Mauchline, or Edinburgh. He appeared first in the town on 4 June 1787, and came to it then on invitation to be made an honorary burghess. He became a resident in it, on removal from ELLISLAND, in December 1791. For eighteen months he lived in a house of three small apartments, on the second floor of a tenement on the N side of Bank Street, then called the Wee Vennel. He then removed to a small, self-contained, two-story house

on the S side of a short mean street striking eastward from St Michael Street, in the northern vicinity of St Michael's Church. The street was then called Millbrae or Millbrae-Hole; but, after Burns's death, was designated Burns Street. The house, in the smaller of whose two bedrooms he died on 21 July 1796, was occupied afterwards by his widow down to her death in 1834, and purchased in 1850 by his son, Lieut.-Col. William Nicol Burns. It is now occupied by a caretaker, and continues to be as much as possible in the same condition as when Burns inhabited it. Admission on the part of the public may be had to view the house on the payment of a small fee. Nearly a hundred of Burns's most popular songs, including 'Auld Langsyne,' 'Scots wha hae wi' Wallace bled,' 'A man's a man for a' that,' 'O whistle and I'll come to ye, my lad,' 'My love is like a red, red rose,' 'Ye banks and braes o' bonnie Doon,' 'Cauld kail in Aberdeen,' 'Willie Wastle,' 'Auld Rob Morris,' and 'Duncan Gray,' were written by him either in this house or in the house in Bank Street. Many objects, too, in and near the town, and many persons who resided in or near it, are enshrined in his verse. The High School which preceded the present academy was made accessible to his children by a special deed of the Town Council (1793), that put him on the footing of a real freeman. The Antiburgher Church in Loreburn Street, on the site of the present U.P. church there, was frequently attended by him in appreciation of the high excellence of the minister who then served it. The pew which he more regularly occupied in St Michael's Church bore the initials, 'R. B.' cut with a knife by his own hand; and was sold, at the repairing of the church in 1869, for £5. A window pane of the King's Arms Hotel, on which he scratched an epigram, drew for a long time the attention of both townsmen and strangers. A volume of the *Old Statistical Account of Scotland*, belonging in his time to the public library of which he was a member, was transferred to the mechanics' institute, and bears an original verse of his in his own bold handwriting. Another volume there, a copy of *De Lolme on the British Constitution*, presented by him to the library, contains an autograph of his which was interpreted at the time to indicate seditious sentiments. The Globe Tavern which he used to frequent, and on a window of which he inscribed the quadrain in praise of 'Lovely Polly Stewart' and a new version of 'Coming through the Rye,' retains an old-fashioned chair on which he was wont to sit; and the mere building, situated in a narrow gloomy close off High Street, is hardly less replete with memories of him than is the house in which he lived and died. To the Trades' Hall, already noticed, his coffined corpse was removed on the eve of his public funeral. The matrix of the cast of his skull, taken at the interment of his widow in 1834, continued in the possession of the townsman who took it, and probably is still in safe keeping in the town. His remains were originally buried in the NE corner of St Michael's churchyard, with no other monument than a simple slab of freestone* erected by his widow; but, in 1815, were transferred to a vault in a more appropriate part on the SE border, and honoured with a mausoleum, erected by subscription of fifty guineas from the Prince Regent and of various sums from a multitude of admirers. The mausoleum, in the form of a Grecian temple, after a design by Thomas F. Hunt, of London, cost originally £1450, and contains a mural sculpture by Turnerelli, representing the Poetic Genius of Scotland throwing her mantle over Burns, in his rustic dress, at the plough. It is now glazed in the intervals between its pillars, to protect the sculpture from erosion by the weather; and, besides Burns's own remains, covers those of his widow and their five sons. The late William Ewart, M.P., placed a bust of the poet in a niche of the front wall of the Industrial School; and on 6 April 1882 Lord Rosebery unveiled the fine marble statue from

* So says Mr McDowall, but, according to Dorothy Wordsworth, there was 'no stone to mark the spot' when, on 18 Aug. 1803, with Coleridge and her brother William, she stood beside the 'untimely grave of Burns.' Can it be that here, too, they were misinformed, as in the case of Rob Roy's grave, noticed under BALQUHINDER?

Mrs D. O. Hill's model of the poet, on the open space in front of Greyfriars Church. Nearly 10 feet high, it is raised 6 feet from the ground on a pedestal of grey Dalbeattie granite; and represents Burns as resting against the trunk of a tree in an easy half-sitting attitude. His right hand is placed on his heart, while the left holds a posy made up of daisies; and his face manifests mingled pensiveness and elevation, as if he were in the very act of addressing the "wee, modest, crimson-tippit flower." The dress is such as he may have worn when following the plough at Mossiel, or binding after his reapers in the harvest rig at Ellisland; consisting as it does of tailed coat with large lapelles, long lapelled waistcoat, knee breeches, rough knitted stockings and heavy rustic shoes—a light shepherd's plaid, however, being added to the drapery which envelops his sinewy form. The centenary of the poet's death was celebrated in Dumfries on the 21st July, 1896, amid much enthusiasm and considerable display. A vast procession made its way to the mausoleum, and deposited numerous wreaths and floral tributes sent by Scotsmen at home and abroad—one gigantic wreath from Australia (though delayed in transit, and arriving too late for the celebration day) being embedded in ice, and weighing altogether 23 cwts. Earl Rosebery presided at the celebrations, and at the conversazione in the Drill Hall delivered a splendid oration on the genius and character of the deceased poet. See William M'Dowall's *Burns in Dumfrireshire*, and his *Guide to Dumfries and Vicinity*.

Dumfries has a head post office, with money order, savings bank, insurance, and telegraph departments, offices of the Bank of Scotland, the British Linen Co., the Clydesdale, Commercial, National, Royal, and Union Banks, and a local savings bank. Two newspapers are published—the *Conservative Dumfries Courier and Herald* (1809) and the *Liberal Dumfries and Galloway Standard* (1843), both on Wednesday and Saturday. A weekly market of much importance is held every Wednesday for the sale of sheep, cattle, pigs, etc.; and on the same day, in a covered building in Loreburn Street, a sale of butter and eggs is held. Another market of secondary importance is also held on Saturday. Horse fairs are held on Tuesday and Wednesday of February, either the 12 and 13 of that month, or the Tuesday and Wednesday after, on the Wednesday before 26 May, on the Wednesday after 17 June o.s., on either 24 and 25 Sept. or the Tuesday and Wednesday after, and on the Wednesday before 22 Nov.; and seven hiring fairs are held in the course of the year. A sale of cattle on the Sands, at the Wednesday weekly market, dates from 1659; was preceded, for a long time before the Union, by a weekly sale on Monday; drew always large supplies from Dumfrireshire and Galloway for transmission into England; rose progressively to such importance that, during a considerable course of years, so many as about 20,000 head of cattle were annually sold on the Sands to English purchasers; suffered a severe check, partly by the opening of the railways, partly by weekly auction of live stock, partly by other causes. The sale of sheep, at the weekly markets, seems not to have commenced till about the end of last century; but it increased rapidly in result of the turnip husbandry; yet, like the Sands or market sale of cattle, it was much curtailed by auction sales and private transfer. The sale of pork, in the weekly market on the Sands, for many years prior to 1832, amounted usually to upwards of 700 carcasses in one day in the busiest part of the year, often to many more, but it also received a severe check by the vast importation of American bacon, the opening of the railways, and by other causes. However, there is still a weekly sale on the Wednesdays of January, February, March, November, and December. The number of horses sold is also very large.

The port of Dumfries is strictly the river Nith, in its run of 14½ miles to the channel of the Solway, but comprises besides all the Scottish side of the Firth, from Sarkfoot to Kirkandrews Bay; and includes, as creeks or sub-ports, Annan, Barlochan, and Kirkcudbright. Its harbourage nearly everywhere is tidal, with great disadvantage from the peculiar 'bore' of the Solway—a

sudden rapid breast of water of short duration, followed by hours of total recess, leaving nothing but shallow fresh-water streams across great breadths of foreshore. At Dumfries itself there is no better accommodation than a series of quays, one at Dumfries dock, and three at intervals down to a distance of 5 miles. The navigation of the Nith was always difficult; but in years prior to 1834, at a cost of £18,930, it underwent material improvement. A rock which obstructed the channel at Glencaple, 5 miles below the town, was cut away; other obstacles in the river's bed were removed; the landing-places at the river's mouth, and the lighthouse on Southernness flanking the mouth, were put in better condition; a quay at Glencaple, and two quays at Kingholm, and near Castleldyke, between Glencaple and the town, were constructed. The quay at the town itself was renovated and extended, and embankments and other works, to counteract the devastating effect of the tide's impetuous rush up the river, were formed. The town's harbour, in consequence, became safer for small vessels, accessible to larger vessels than before, and accessible also to coasting steamers; yet, in result of successively the opening of the Glasgow and South-Western railway in 1850, the opening of the Castle-Douglas and Dumfries railway in 1859, the opening of the Lockerbie and Dumfries railway in 1863, the opening of the Silloth railway and wet-dock in 1864, and the opening of the Solway Junction railway in 1869, it has lost an amount of traffic more than equal to all that it previously gained. The revenue from the harbour, in 1831, was a little short of £1100; in 1844, £1212; in 1864, £555; in 1867, £474; in 1881, £332, 7s. 9d.; and in 1894, £1038. The tonnage belonging to the port and sub-ports, which averaged 8292 during 1840-44, had risen to 15,286 in 1860, but sank to 11,682 in 1866, to 7764 in 1873, to 3304 in 1884, and to 868 in 1894. In 1894 the tonnage of ships which entered was 24,922; of those which cleared, 24,765.

The productive industry of Dumfries, till a recent period, went little beyond ordinary local artisanship, but it is now vigorous and flourishing in various important departments of trade and manufacture. The large number of warehouses and shops bears evidence to a healthy amount of competition among business people, both for the ordinary retail trade, and also for the wholesale supply of numerous county towns and villages. There is one very extensive foundry and machine shop for the construction and repair of engines, agricultural machines, implements, etc. The staple trade, which was chiefly local in former years, now consists principally of the manufacture of steam engines, boilers, large steam and hand cranes, plant for railway companies and contractors, iron bridges, etc. The manufacture of hosiery is increasing yearly in importance, and gives employment to a large number of hands in several factories of considerable size. Tanning and currying, and coach-building are also important, and there are many employers of skilled labour, of high standing, in various departments of trade. The manufacture of tweeds was introduced in 1847, and has gone on since then steadily increasing. There are several factories of moderate size, besides those already mentioned.

Constituted a royal burgh by David I. (1124-53), and divided into four wards, Dumfries is governed by a provost, 3 bailies, a dean of guild, a treasurer, and 19 other councillors. The General Police and Improvement Act of Scotland was adopted prior to 1871; and the magistrates and town councillors act as commissioners of police. The assize or judiciary court is held twice a year. The sheriff court for the county is held every

Seal of Dumfries.

Tuesday and Friday during session; the sheriff small debt court, and the debts recovery act court, every Tuesday in time of session, and on the same days that ordinary courts are held in vacation. A court of county justices is held in Dumfries every Monday. The water and gas works of the burgh are public property, and are well managed, the rates to consumers steadily diminishing. With Annan, Kirkcudbright, Lochmaben, and Sanquhar, Dumfries returns one member to parliament; in 1891 its parliamentary constituency numbered 2107, its municipal 1898. Corporation revenue (1867) £1599, (1875) £2360, (1881) £2204, (1891) £2700. Valuation (1861) £30,028, (1870) £42,860, (1882) £57,713, of which £4344 was in railways, (1892) £65,320, 4s. 2d. Pop. of royal burgh (1841) 10,069, (1851) 11,107, (1861) 12,313, (1871) 13,710, (1881) 15,759, (1891) 16,675; of parliamentary burgh (1851) 13,166, (1861) 14,023, (1871) 15,436, (1881) 17,090, (1891) 17,821, of whom 9813 were females. Houses in parliamentary burgh (1891) inhabited 3863, vacant 227, building 21.

The name Dumfries was anciently written Dunfres, and is supposed to have been derived from the Gaelic words *dun* and *phreas*, signifying 'a mound covered with copsewood,' or 'a hill-fort among shrubs.' A slight rising-ground on the area now occupied by Greyfriars Church was the site of an ancient fort, afterwards reconstructed into a strong castle; is presumed to have been clothed with copse or natural shrubs; and appears to have given origin to the name. The burgh's armorial bearing was anciently a chevron and three fleur-de-lis, but came to be a winged figure of St Michael, trampling on a dragon and holding a pastoral staff. The motto is, 'A'loreburn'—a word that, during centuries of struggle against invaders, was used as a war-cry to muster the townsmen. The side toward the English border being that whence invasion usually came, a place of rendezvous was appointed there on the banks of a rill called the Lower Burn, nearly in the line of the present Loreburn Street; and when the townsmen were summoned to the gathering, the cry was raised, 'All at the Lower Burn,'—a phrase that passed by elision into the word 'A'loreburn.' A village, which ere the close of the 10th century had sprung up under the shelter of the fort on the copse-covered mound, grew gradually into a town, and was the seat of the judges of Galloway in the reign of William the Lyon, who died in 1214, about which period or a little later it seems to have become a centre of considerable traffic. Streets on the line of the present Friars' Vennel and of the northern part of High Street, with smaller thoroughfares toward Townhead and Loreburn Street, appear to have been its oldest portions; and are supposed to have had, about the middle of the 13th century, nearly 2000 inhabitants. The erection of the old bridge before the middle of the 13th century, together with the high character which that structure originally possessed, indicates distinctly both the importance then attained by the town and the line in which its chief riverward thoroughfare ran; and another structure, erected by the same bountiful lady who erected the bridge, also indicates the position of the nucleus around which the town lay. This was a Minorite or Greyfriars' monastery, situated near the head of Friars' Vennel, where now the Burns Statue stands; and, small though it was, as compared with many abbeys, it seems to have been a goodly First Pointed edifice, comprising an aisled church, a range of cloisters, a refectory, and a dormitory. In 1286 Robert Bruce the Competitor and the Earl of Carrick, his son, with banner displayed assaulted and captured the castle of Dumfries, a royal fortress of the child-queen Margaret, the Maid of Norway; and in the summer of 1300 King Edward I., on his way to the siege of Caerlaverock, seized and garrisoned this castle, and added the high square keep, part of which remained standing till 1719. In the beginning of 1306 the famous Robert Bruce was in London, called thither as King Edward's counsellor, when a warning of peril was sent him by the Duke of Gloucester, his friend—a sum of money and a pair of spurs. The hint was

enough; that day he started for Scotland, his horse shod backwards, that the hoof-prints might throw pursuers off the track. On February the 4th he halted at Dumfries, where the English justiciars were sitting in assize—John Comyn of Badenoch, surnamed the Red, among the throng of barons in attendance. Him Bruce encountered in the church of the Minorites, and, falling into discourse, made the proposal to him: 'Take you my lands, and help me to the throne; or else let me take yours, and I will uphold your claim.' Comyn refused, with talk of allegiance to Edward, and their words waxed hotter and hotter, till, drawing his dagger, Bruce struck a deadly blow, then hurried to his friends, who asked if aught were amiss. 'I must be off,' was the answer, 'for I doubt I have slain the Red Comyn.' 'Doubt!' cried Kirkpatrick of Closeburn, 'I mak sikar;' and, with Sir John de Lindsay, rushing into the church, despatched the wounded renegade outright. A frenzy seized them; they carried the castle by assault; and thus was rekindled the War of Independence. One episode therein was that, in this same year of 1306, Sir Christopher Seton, Bruce's brother-in-law, was hanged by the English at Dumfries, on the Crystal Mount, where his widow afterwards founded a chapel in honour of the Holy Rood.

The town was burned by the English prior to 1448; suffered devastation by them at other periods; and, in 1469, obtained from the Crown all the houses, gardens, revenues, and other property which had belonged to the Grey Friars. It was burned again by the English in 1536, and was then revenged by Lord Maxwell. That nobleman, with a small body of retainers, made an incursion into England, and reduced Penrith to ashes; and either he or some member of his family, mainly with materials from the Greyfriars' monastery, strongly reconstructed Dumfries Castle. Queen Mary, in October 1565, when the town was held by Murray and other disaffected nobles, favourers of the Reformation, marched against it with an army of 18,000 men, at whose approach the leaders of the opposition retreated over the Border. The castle was again taken and the town sacked, in 1570, by the English under Lord Scrope and the Earl of Essex. The townsmen, in 1583, erected a bartizaned, two-storied stronghold, called the New Wark, to serve both as a fortress to resist invasion and as a retreat under discomfiture; and, either about the same time or at an earlier period, they constructed likewise, between the town and Lochar Moss, a rude fortification or extended rampart, called the Warder's Dike. But all vestiges of these works, of the castle, and of the monastery are now extinct.

In 1617 James VI. spent two days at Dumfries in royal state, and was sumptuously entertained at a public banquet. The town shared largely in the disasters that overspread Scotland under Charles I., and still more largely in those of the dark reign of Charles II., when, in November 1666, a fortnight before the battle of Rullion Green, fifty mounted Covenanters and a larger party of peasants on foot here seized Sir James Turner, and, with him, a considerable sum of money. The Cameronians, or those of the Covenanters who resisted the settlement at the Revolution, were comparatively numerous in the surrounding district; and, on 20 Nov. 1706, about 200 of them rode into the town, issued a manifesto against the impending union of Scotland and England, and burned the articles of union at the cross, but did not succeed in precipitating the town into any serious disaster. In October 1715 word was brought to the magistrates that the Jacobite gentry of the neighbourhood had formed a design to surprise the town; and, it being the sacramental fast-day, and the provincial synod being then in session, the clergy mustered their fencible parishioners, so that 'a crowd of stout Whigs flocked in from the surrounding districts and villages, with their broad bonnets and grey hose, some of them mounted on their plough-horses, others on foot.' That very evening they were joined by a strange ally, no other than Simon Fraser, the infamous Lord Lovat, who, with five followers, all armed to the teeth, rode up to the head inn,

en route from London to the North. Hill Burton describes the suspicions aroused by the presence of this large, square-built, peculiar-looking man; how, having shown his credentials, he presently helped to bring in the Marquis of Annandale, beset by the Jacobites under Viscount Kenmore; and how their courteous and partly convivial meeting was interrupted by a rumour of attack, a body of horse having ridden up close to the town.* A party of the townspeople, during the insurrection of 1745, cut off at Lockerbie a detachment of the Highlanders' baggage; and, in consequence, drew upon Dumfries a severer treatment from Prince Charles Edward than was inflicted on any other town of its size. Prince Charles, on his return from England, let loose his mountaineers to live at free quarters in Dumfries; and he levied the excise of the town, and demanded from its authorities a contribution of £2000 and of 1000 pairs of shoes; but, an alarm having reached him that the Duke of Cumberland had mastered the garrison left at Carlisle and was marching rapidly on Dumfries, he hastily broke away northward, accepting for the present £1100 for his required exaction, and taking hostages for the payment of the remainder. The town suffered loss to the amount of about £4000 by his visit, besides the damage caused by the plundering of his troops; but, in acknowledgment of its loyalty to the Crown, and as part compensation for its loss, it afterwards got £2800 from the forfeited estate of Lord Elcho. Later events have mainly been either commercial, political, or social; and, with the exception of a dire visitation of cholera (15 Sept. to 27 Nov. 1832), by which nearly 500 perished, they have left no considerable mark on its annals. It may, however, be noticed that the Highland and Agricultural Society has held its meeting here in 1830, 1837, 1845, 1860, 1870, 1878, and 1886. The town, on the whole since 1746, has plentifully participated in the benign effects of peace and enlightenment; and, though moving more slowly than some other towns in the course of aggrandisement, it has been excelled by none in the gracefulness of its progress, and in the steadiness and substantiality of its improvement.

The title Earl of Dumfries, in the peerage of Scotland, conferred in 1633 on the seventh Baron Crichton of Sanquhar, passed in 1694 to an heiress who married the second son of the first Earl of Stair. Her eldest son, William, who succeeded her in 1742 as fourth Earl of Dumfries and his brother James in 1760 as fourth Earl of Stair, died without issue in 1768, when the former title devolved on his nephew, Patrick Macdowall of Freugh (1726-1803), whose daughter married the eldest son of the first Marquis of Bute; and the title now is borne by her great-grandson, John (b. 1881), son and heir of the present Marquis of Bute. On the town's roll of fame are the following eminent natives or residents, the former distinguished by an asterisk:—The Rev. William Veitch, who was minister of Dumfries during the conflict between Presbyterianism and Episcopacy, and whose biography was written by the Rev. Dr M'Crie; the Rev. Dr Henry Duncan of Ruthwell (1774-1846), author of the *Philosophy of the Seasons*, who started the *Courier*, and founded here the earliest of all savings' banks, and a statue of whom is in front of the Savings' Bank building; *Dr Benjamin Bell (1749-1806), the eminent surgeon; Sir Andrew Halliday (1783-1839), a famous physician, who spent his latter years and died in Dumfries; *Sir John Richardson (1787-1865), surgeon and naturalist of Sir John Franklin's overland Polar expedition; *Sir James Anderson (1824-91), captain of the *Great Eastern*; *Gen. Sir William M'Murdo, K.C.B. (b. 1819), son-in-law and favourite officer of Sir Charles Napier, the hero of Seinde; John M'Diarmid (1790-1852), editor of the *Scrap Book*, author of *Sketches from Nature* and a *Life of Cowper*, and for 35 years the talented conductor of the *Dumfries Courier*; Thomas Aird (1802-76), the well-known poet, and editor of the *Dumfriesshire Herald* from 1835 to 1863; William

M'Dowall (b. 1815), author of the *Man of the Woods* and of the *History of Dumfries*, and editor of the *Dumfries Standard* from 1846; *James Hannay (1827-73), author of *Eustace Conyers*, *Singleton Fontenoy*, and other works of fiction; *Dr Robert Carruthers (1799-1878), of Inverness, but long connected with Dumfries, the author of a *Life of Pope*, the *Highland Note-Book*, the *Encyclopædia of English Literature*, etc., and of ten *Dumfries Portraits*, which appeared in the *Dumfriesshire Monthly Magazine*, begun in 1821; William Bennet, editor of the three volumes of the *Dumfries Monthly Magazine*, begun in 1825; Allan Cunningham, John Mayne, Robert Anderson, Joseph Train, Robert Malcolmson, Dr Browne, and Dr John Gibson, who contributed largely to these two periodicals; the Rev. William Dunbar, editor of the *Nithsdale Minstrel*, a volume of original poetry published in 1815; William Paterson (1658-1719), the founder of the Bank of England, and the projector of the Darien Expedition; Patrick Miller of Dalswinton (1731-1815), the distinguished inventor and agriculturist; *Robert Thorburn, A.R.A. (1818-85), the famous miniature painter; Kennedy, the landscape painter; Dunbar and Currie, the sculptors; *James Pagan (1811-70), journalist; *Joseph Irving (1830-92), historian and annalist; Thomas Carlyle (1795-1881), a 'writer of books'; *John Mayne (1759-1846), minor poet and journalist; and not a few besides.

The parish, containing also the villages of Georgetown, Gasstown, and Locharbriggs, with part of the village of Kelton, is bounded NW by Holywood and Kirkmahoe, NE by Tinwald, E by Thorwald, S by Caerlaverock, and W by Troqueur and Terregles in Kirkcudbrightshire. Its greatest length, from N to S, is 6½ miles; its greatest breadth is 3¼ miles; and its area is 10,200 acres, of which 69½ are foreshore and 98½ water. The NITH winds 7 miles south-by-eastward along all the boundary with Holywood and Kirkcudbrightshire, and sluggish LOCHAR Water 7½ south-south-eastward along that with Tinwald and Thorwald. Near Lochthorn, 2½ miles NNE of the town, is a little lake (1¼ × ¾ furl.), which, in time of hard frost, is much frequented by skaters and curlers. A mineral spring, called Crichton's Well, occurs in Lochar Moss; another, a strong chalybeate, on Fountainbleau farm. The picturesque low height of Clumpton rises 2 miles NE of the town; and an undulating low eminence, as formerly noticed, forms chief part of the site of the town, southward of which another low ridge of hills runs nearly parallel to the Nith, at about half a mile's distance, into Caerlaverock; and rises at Trohoughton to 312 feet. The rest of the surface is nearly a dead level, sinking to 40, and rarely exceeding 100, feet. The western face of the ridge, overlooking the Nith, is gently sloping, and highly embellished; but the eastern breaks down in abrupt declivities, presents a bold front and a commanding outline, and forms, about 1½ mile from the town, two precipitous ledges, called the Maiden Bower Craigs, one of them containing a remarkable cavity, said to have been used by those mythic beings, the Druids, as a sort of 'St Wilfrid's needle,' or ordeal of chastity. A broad belt of Lochar Moss, along the eastern border, continued all sheer morass down into the present century, but now is extensively reclaimed, and partly clothed with verdure or with wood. Permian sandstone is the prevailing rock, and has been largely quarried. The soil, in the SW, is a pretty strong clay; in the flat lands by the Nith, is mostly clay incumbent on gravel; in the N and NE, is a light reddish sandy earth resting on sandstone; and in the E, is either native moss, reclaimed moss, or humus. Nearly four-fifths of the entire area are regularly or occasionally in tillage, some 350 acres are under wood, and nearly all the rest of the land is capable of remunerative reclamation or culture. An ancient castle of the Comyns stood ¾ mile SSE of the town, on a spot overlooking a beautiful bend of the Nith, and still called Castledykes. A meadow near it bears the name of Kingholm, and may have got that name either by corruption of Comyn's holm or in honour of Robert Bruce. Another meadow, by the riverside

* It is noteworthy that the first book printed at Dumfries was Peter Rae's *History of the Rebellion in Scotland, in Dumfries, Galloway, etc.* (1718).

northward of the town, is called the Nunholm, from its lying opposite the ancient Benedictine nunnery of Lincluden. Not far away are the ruins of SWEETHEART ABBEY, founded in the thirteenth century for a body of Cistercian monks, while on the opposite shore is Caerlaverock Castle, in the neighbouring churchyard the grave of Old Mortality, and a short distance north of Dumfries the grave of Jeanie Deans. This parish is the seat of both a presbytery and a synod, and it is divided ecclesiastically into the three parishes of St Michael, Greyfriars, and St Mary, the value of the two first livings being £495 and £282. Pop. of entire parish (1831) 11,606, (1861) 13,523, (1871) 14,841, (1881) 16,839, (1891) 17,878.—*Ord. Sur.*, shs. 10, 9, 1864-63.

The presbytery of Dumfries comprises the old parishes of Caerlaverock, Colvend, Dumfries-St Michael, Dumfries-Greyfriars, Dunscore, Holywood, Kirkbean, Kirkgunzeon, Kirkmahoe, Kirkpatrick-Durham, Kirkpatrick-Irongray, Lochrutton, Newabbey, Terregles, Tinwald, Torthorwald, Troqueer, and Urr, and the *quoad sacra* parishes of Dumfries-St Mary, Dalbeattie, and Maxwelltown. Pop. (1881) 41,099, (1891) 40,522, of whom 8022 were communicants of the Church of Scotland.—The Free Church also has a presbytery of Dumfries, with 3 churches in Dumfries, 2 at Dunscore, and 12 at Corsock, Dalbeattie, Dalton, Glencaple, Hightae, Irongray, Kirkbean, Kirkmahoe, Kirkpatrick-Durham, Maxwelltown, Lochend and Newabbey, and Ruthwell, which 17 had together 3216 members in 1891. The U.P. Synod likewise has a presbytery of Dumfries, with 3 churches in Dumfries, 2 in Sanquhar, and 12 at Burnhead, Castle-Douglas, Dalbeattie, Dalry, Dunscore, Kirkcudbright, Lochmaben, Mainsiddle, Moniaive, Thornhill, Urr, and Carsphairn, which together had 2803 members in 1891.

The synod of Dumfries comprises the presbyteries of Dumfries, Lochmaben, Langholm, Annan, and Penpont.—The Free Church also has a synod of Dumfries, comprising presbyteries of Dumfries, Lockerbie, and Penpont, and superintending thirty-six congregations.

See John M'Diarmid's *Picture of Dumfries and its Environs* (Edinb. 1832); William M'Dowall's *History of the Burgh of Dumfries; with Notices of Nithsdale, Annandale, and the Western Border* (Edin. 1867; 2d ed. 1873); and his *Memorials of St Michael's, the Old Parish Churchyard of Dumfries* (Edinb. 1876).

Dumfries House, a seat of the Marquis of Bute in Old Cumnock parish, Ayrshire, near the left bank of Lugar Water, 2 miles W of Cumnock town, and $\frac{3}{4}$ mile N of Dumfries House station on the Ayr and Cumnock section of the Glasgow and South-Western, this being $15\frac{1}{2}$ miles E by S of Ayr. Built about 1757 by William Dalrymple, fourth Earl of DUMFRIES, it has a drawing-room hung with very fine old tapestry, said to have been presented by Louis XIV. to one of the former Earls, and stands amid finely wooded grounds that contain the ruins of Terringzean Castle, and extend into Auchinleck parish, on the opposite bank of the Lugar, which here is spanned by an elegant bridge.—*Ord. Sur.*, sh. 14, 1863.

Dumfriesshire, a coast and Border county in the S of Scotland. It is bounded N by Lanark, Peebles, and Selkirk shires; NE by Roxburghshire; SE by Cumberland; S by the Solway Firth; SW by Kirkcudbrightshire; and NW by Ayrshire. Its length, from W to E, varies between 21 and $46\frac{1}{2}$ miles; its breadth, from N to S, between 13 and 32 miles; and its area is 1103 square miles or 705,945 $\frac{3}{4}$ acres, of which 20,427 are foreshore and 5801 $\frac{1}{2}$ water. Its outline is irregularly ellipsoidal, being indented to the depth of 13 miles by the southern extremity of Lanarkshire, and to the depth of 5 $\frac{3}{4}$ miles by Ettrick Head in Selkirkshire. Its boundary line, over all the W, NW, N, and NE, to the aggregate extent of 120 miles, is mainly mountain watershed; over most of the march with Cumberland, to the aggregate extent of 11 miles, is variously Liddel Water, Esk river, and Sark Water; over all the S, to the extent of 21 miles, is the Solway Firth; along the SW, to the extent of 15 miles, is the river Nith and Cluden Water. The summits on or near the upland boundary line

include Auchenchain (1271 feet) and Blackcraig (1961) at the Kirkcudbrightshire border; Blacklorg (2231), M'Crierick's Cairn (1824), and Halfmerk Hill (1478), at the Ayrshire border; Mount Stuart (1567), Wanlock Dod (1808), Lowther Hill (2377), Well Hill (1937), Wedder Law (2185), and Queensberry (2285), at the Lanarkshire border; Hartfell (2651) and White Coomb (2695), at the Peebleshire border; Herman Law (2014), Andrewhinney (2220), Bodesbeck Law (2173), Capel Fell (2223), Ettrick Pen (2269), Quickningair Hill (1601), and Black Knowe (1481), at the Selkirkshire border; and Stock Hill (1561), Roan Fell (1862), and Watch Hill (1642), at the Roxburghshire border.

All the northern part of the county is prevalently upland. Mountains or high hills, with similar altitudes to those on the boundary line, and intersected with only a small aggregate of glens or vales, occupy all the north-western, the northern, and the north-eastern border to a mean breadth of 7 or 8 miles; and spurs or prolongations of them strike south-eastward, southward, and south-westward, to lengths of from 2 or 3 to 7 or 8 miles, sometimes shooting into summits nearly as high as those on the borders, but generally sinking into low hills, and separated from one another by broadening vales. These uplands constitute a large and prominent portion of the Southern Highlands of Scotland; but they differ much, in both segregation and contour, from the upland masses of most of the Northern Highlands. Few or none of the mountains have the ridgy elongations, the rugged, craggy outlines, or the towering peaked summits so common in Argyll, Perth, Inverness, and Ross shires; but almost all of them, whether on the borders or in the interior, lie adjoined in groups, rise from narrow bases over rounded shoulders, and have summits variously domical, conical, and tabular or flat. Three of the most remarkable of the interior heights are Cairnkinna (1813 feet) in Penpont, Langholm Hill (1161) in the vicinity of Langholm, and Brunswark Hill (920) in the NE of Hoddam, all three having forms of peculiar character, quite in contrast to those prevailing in the Northern Highlands. The region southward of the uplands breaks into three great valleys or basins, traversed by the rivers Nith, Annan, and Esk; and is intersected, between the Nith and the Annan, to the extent of about 7 miles southward from the vicinity of Amisfield, by the range of the Tinwald, Torthorwald, and Mouswald Hills, with curved outlines, cultivated surfaces, and altitudes of from 500 to 800 feet above sea-level, and commanding gorgeous, extensive, diversified prospects. The basins of the Annan and the Esk S of a line drawn from Whinnyrig, past Ecclefechan, Craigshaws, Solway Bank, and Broomholm, to Moorburnhead, cease to be valleys, or are flattened into plains, variegated only by occasional rising-grounds or low hills, either round-backed or obtusely conical. The valley of the Nith also, for 10 miles before it touches the Solway, is in all respects a plain, with exception of a short range of low hills in Dumfries and Caerlaverock parishes and a few unimportant isolated eminences; and the E wing of it, partly going flatly from it to the base of the Tinwald Hills, partly going southward, thence past the small Dumfries and Caerlaverock range to the Solway Firth, is the dead level of Lochar Moss.

The river Nith and one or two of its unimportant and remote tributaries enter Dumfriesshire through openings or gorges in its north-western boundaries, and a small tributary of the Annan enters through a gorge in the N; but all other streams which anywhere traverse the county rise within its own limits. The Nith, from the point of entering it, and the Annan and the Esk, from short distances below the source, draw toward them nearly all the other streams, so as to form the county into three great valleys or basins, but the Nith giving the lower part of the right side of its basin to Kirkcudbrightshire, and the Esk going entirely in its lower part into England. The three rivers all pursue a south-south-easterly course—the Nith in the W, the Annan in the middle, and the Esk in the E; and, with the exception of some small curvings, they flow parallel to

one another, at an average distance of about 12 miles, imposing upon their own and their tributaries' basins the names of respectively Nithsdale, Annandale, and Eskdale. The streams which run into them are very numerous, yet mostly of short course, of small volume, and remarkable chiefly for the beauty or picturesqueness of the ravines or the dells which they traverse. The chief of those which enter the Nith are, from the W, the Kello, the Euchar, the Scar, the Cairn, and the Cluden; from the E, the Crawick, the Minnick, the Enterkin, the Carron, the Cample, and the Duncow. The chief which enter the Annan are, from the W, the Evan and the Kinnel; from the E, the Moffat, the Wamphray, the Dryfe, the Milk, and the Mein. The chief which enter the Esk are, from the W, the Black Esk and the Wauchope; from the E, the Megget, the Ewes, the Tarras, and the Liddel. Four rivulets, each 10 miles or more in length, have an independent course southward to the Solway—the Lochar and the Cummertrees Pow in the space between the Nith and the Annan; the Kirtle and the Sark in the space between the Annan and the Esk. Several of the tributary streams, like the three main ones, give their names to their own basins—the Moffat, the Dryfe, and the Ewes in particular giving to their basins the names of Moffatdale, Dryfesdale, and Ewesdale. A group of lakes, the largest of them Castle Loch ($6 \times 5\frac{1}{2}$ furl.), lies near Lochmaben; and dark Loch Skene ($6 \times 1\frac{1}{2}$ furl.), remarkable for emitting the torrent of the 'Grey Mare's Tail,' lies on the N border at the source of Moffat Water. Pure springs are almost everywhere abundant; chalybeate springs are near Moffat, Annan, and Ruthwell; and sulphureous at Moffat and Closeburn House.

The Geology.—The oldest rocks in Dumfriesshire are of Silurian age, consisting mainly of greywackes, flagstones, and shales, belonging to the upper and lower divisions of that formation. A line drawn from the head of Ewes Water in Eskdale, south-westwards by Lockerbie to Mouswald, marks the boundary between the two divisions, the Lower Silurian rocks being met with to the N of this limit. The members of both series have been much folded; but by means of the lithological characters of the strata, and with the aid of certain fossiliferous bands of shales yielding graptolites, it is possible to determine the order of succession. In the neighbourhood of Moffat the fossiliferous black shales of the lower division are typically developed, where they have been divided into several well-marked zones by means of the graptolites which occur in them in profusion. They are admirably displayed at Dobbs Lynn, near the head of Moffatdale, and in the streams on the S side of the Moffat valley. The Silurian rocks, which now form the great mass of high ground throughout the county, were elevated so as to form a land barrier towards the close of the Silurian period. In the hollows worn out of this ancient tableland, the strata belonging to the Old Red Sandstone, Carboniferous, and Permian periods were deposited. But even these newer paleozoic formations have been so denuded that only isolated fragments remain of what once were more extensive deposits.

Along the county boundary in Upper Nithsdale the representatives of the Lower Old Red Sandstone are met with, where they consist of sandstones and conglomerates, associated with contemporaneous volcanic rocks. They form part of the great belt of Lower Old Red strata stretching from the Braid Hills near Edinburgh into Ayrshire. The Upper Old Red Sandstone, on the other hand, forms a narrow fringe underlying the carboniferous rocks from the county boundary E of the Ewes Water south-westwards by Langholm to Brunswark. At the base they consist of conglomeratic sandstones, the included pebbles having been derived from the waste of the Silurian flagstones and shales. These are overlaid by friable Red sandstones and marls, which pass conformably underneath the zone of volcanic materials which always intervene between them and the overlying Carboniferous strata. The zone of igneous rocks just referred to is specially interesting, as it points to the existence of volcanic action on the S side of the Silurian

tableland at the beginning of the Carboniferous period. The igneous rocks consist mainly of slaggy and amygdaloidal porphyrites, which were spread over the ancient sea bottom as regular lava flows. Brunswark Hill is made up of this igneous material. Some of the volcanic orifices from which the igneous materials were discharged are still to be met with along the watershed between Liddesdale and Teviotdale in the adjacent county of Roxburgh.

The carboniferous rocks are met with in three separate areas:—(1.) in the district lying between Langholm and Ruthwell; (2.) at Closeburn near Thornhill; (3.) in the neighbourhood of Sanquhar. The first of these areas is the most extensive, measuring about 22 miles in length, and varying in breadth from 2 to 7 miles. The strata included in it belong to the Calciferous Sandstone series which forms the lowest subdivision of the Carboniferous formation. The following zones were made out in the course of the geological survey of the district. They are given in descending order:—(7.) Canonbie coals; (6.) Marine Limestone series of Penton, Gilnockie, and Ecclefechan; (5.) Volcanic zone of fine tuff and porphyrite, including about 50 feet of fine shales; (4.) Irvine Burn and Woodcock air sandstones; (3.) Tarras Water-foot Cementstone series; (2.) White sandstones; (1.) Brunswark and Ward Law volcanic rocks.

The recent discovery which has proved so interesting and important was met with in the fine shales of zone (5) and partly in zone (3). Upwards of twenty new species of ganoid fishes were obtained from these beds near Langholm, and out of the sixteen genera to which these species belong five are new to science. Very few of the species are common to the carboniferous rocks of the Lothians, which has an important bearing on the history of that period. Along with the fishes were found about twelve new species of decapod crustaceans and three new species of a new genus of Phyllo-pods. Of special importance is the discovery of four new species of scorpions. Hitherto the occurrence of fossil scorpions in rocks of Carboniferous age has been extremely rare. The specimens recently obtained are admirably preserved, and from a minute examination of them it is evident that they closely resemble their living representatives. The remains of several new plants were also found in the fine shales already referred to.

Within the Silurian area, Carboniferous rocks are met with in the Thornhill and Sanquhar basins. These deposits lie in ancient hollows worn out of the Silurian tableland which date back as far as the Carboniferous period. At Closeburn and Barjarg there are beds of marine limestone associated with sandstones and shales which probably belong to the Calciferous Sandstone series. Again, at the south-eastern limit of the Sanquhar coalfield there are small outliers of the Carboniferous Limestone series, consisting of sandstones, shales, and thin fossiliferous limestones. The latter rapidly thin out, and the true coal measures rest directly on, the Silurian platform. From these facts it would appear that in Upper Nithsdale the Silurian barrier did not sink beneath the sea-level till the latter part of the Carboniferous period, not in fact till the time of the deposition of the coal measures. The Sanquhar coalfield is about 9 miles in length, and from 2 to 4 miles in breadth. It contains several valuable coal seams, and from the general character of the strata it is probable that they are the southern prolongations of the Ayrshire coal measures. Another fact deserves to be mentioned here, which was established in the course of the survey of the county. The Canonbie coal seams do not belong to the true Coal Measures as has hitherto been supposed, but are regularly intercalated with the members of the Calciferous Sandstone series.

The strata next in order are of Permian age which are invariably separated from the Carboniferous rocks by a marked unconformity. Indeed so violent is the unconformity that we find the Permian strata to the E of Lochar Moss stealing across the edges of the Calciferous Sandstone beds till they rest directly on the Silurian rocks.

Permian strata occur in five separate areas—1 at Moffat, 2 at Lochmaben and Cornecockle Moor, 3 between Annan and the mouth of the Esk, 4 the Dumfries basin, 5 the Thornhill basin. In addition to these areas there is a small patch of contemporaneous igneous rocks overlying the Sanquhar coalfield, which is believed to be of the same age. In the neighbourhood of Moffat the breccias are evidently an ancient morainic deposit of glacial origin. Several well-striated stones were found in them resembling the scratched stones in ordinary boulder clay. In the red sandstones of Cornecockle Moor reptilian footprints have been detected, produced by reptiles moving in a S direction, which led to the witty remark of Dean Buckland 'that even at that early date the migration from Scotland to England had commenced.' Between Annan and Canonbie the strata consist of red sandstones, while in the Dumfries basin the red sandstones of Locharbriggs are overlaid by an alternation of red sandstones and breccias. An interesting feature connected with the Thornhill basin is the occurrence of contemporaneous volcanic rocks at the base of the series. They form a continuous ring round the northern half of the basin cropping out from underneath the breccias and red sandstones. In the Sanquhar basin also there are several 'necks' or volcanic vents filled with agglomerate, which in all likelihood mark the sites from which lavas of Permian age were discharged.

It is interesting to note the proofs of the original extension of the Permian strata over areas from which they have been completely removed by denudation. Some of the Carboniferous strata in the Sanquhar coal-field have been stained red by infiltration of iron oxide, and in the S of the county the Calciferous Sandstone beds overlying the Canonbie coals have been so much reddened as to resemble externally the Permian sandstones. Even on Eskdalemuir the Silurian greywackes have been stained in a similar manner. In these cases the older rocks were buried underneath strata of Permian age from which the percolating water derived the iron oxide.

Within the limits of the county there are intrusive igneous rocks of which the most conspicuous example is the mass of granite on Spango Water, about 5 miles N of Sanquhar. This mass is about 3 miles long, and upwards of 1 mile in breadth. There are also dykes or veins of felstone and basalt. One example of the latter deserves special notice. It has been traced from the Leadhills south-eastwards by Moffat, across Eskdalemuir by Langholm to the English border. In texture it varies from a dolerite to tachylite, which is the glassy form of basalt.

Only a passing allusion can be made to the proofs of glaciation which are so abundant throughout the county. During the period of extreme glaciation the general trend of the ice sheet was SE towards the Solway Firth and the English border. The widespread covering of boulder clay which is now found in the upland valleys and on the low grounds is the relic of this ancient glaciation. But in the valleys draining the main masses of high ground there are numerous moraines deposited by local glaciers. Amongst the finest examples are those round Loch Skene at the head of Moffatdale.

Economic Minerals.—Coal seams occur at Sanquhar and Canonbie, and limestone at Closeburn, Barjarg, Kelhead, and Harelaw Hill, Liddesdale. Veins of silver and lead ore are met with at Wanlockhead, antimony at Glendinning and Meggat Water. The building stones in greatest demand are the white sandstones of the Carboniferous formation, the Permian red sandstones of Thornhill, Dumfries, Cornecockle, and Annan; while in the neighbourhood of Moffat the coarse grits of Silurian age are much used. (B. N. Peach, F.R.S.E., and J. Horne, F.R.S.E., of the Geological Survey of Scotland.)

The soil in the mountain districts is mainly moorish, mostly unsuitable for tillage, and partly irreclaimable; but in places where it has a dry subsoil, is capable of gradual transmutation into loam. The soil, in the lowland districts, is generally of a light nature, incumbent on either rock, gravel, or sand; in Nithsdale and Annan-

dale, is mostly dry; in Eskdale, is generally wet; in some places, where it lies on a retentive subsoil, is cold, and occasions rankness of vegetation; in considerable tracts of the outspread plain, is of a loamy character, rich in vegetable mould; on the gentle slopes of the midland district, is an intermixture of loam with other soils; on the swells or knolls of the valleys, and even of the bogs, is of a gravelly or sandy character; on the margins of streams, is alluvium, or what is here called holm-land, generally poor and shallow in the upland dells, but generally rich and deep in the lowland valleys. Clay, as a soil, seldom occurs, except as mixed with other substances; but, as a subsoil, is extensively found, either white, blue, or red, under the greensward of hills, and beneath soft bogs. Peat-moss exists in great expanses both on the hills and in the vales; and wherever it so lies as to be amenable to drainage, is of such a character as to be convertible into good soil. Sea-silt, or the saline muddy deposit from the waters of the Solway, spreads extensively out from the estuary of the Lochar, and both forms a productive soil in itself, and serves as an effective top-dressing for the adjacent peat-moss. The percentage of cultivated area is 37·95; 30,676 acres are under wood; and little short of two-thirds of the entire county is either pastoral or waste.

Arable farms range mostly between 100 and 150 acres, yet vary from 60 to 800; and sheep-farms range from 300 to 3000 acres. Some farms, chiefly along the mutual border of the upland and the lowland regions, are both pastoral and arable, and are regarded as particularly convenient and remunerative; and these comprise about one-third of the total acreage under rotation of crops. The cattle, for the dairy, are mostly of the Ayrshire breed; for the shambles or for exportation, are mostly of the Galloway breed. The sheep, on the uplands, are either black-faced or Cheviots; in the lowlands are a mixed breed, resulting from crosses of the Cheviots with Leicesters, Southdowns, and Spanish breeds. The draught horses are of the Clydesdale breed. Pigs are raised chiefly for exportation of pork and bacon into England; and they have, for many years, been an object of general attention among both farmers and cotters. The value of the pork produced rose from £500 in 1770 to £12,000 in 1794, to £60,000 in 1812, and to £100,000 in 1867, since which last year it has somewhat fallen off, there being only 11,531 pigs in the county in 1895, against 15,088 in 1877, and 18,612 in 1866.

The commerce of the county is principally conducted through DUMFRIES. Manufactures in hosiery and tweeds have recently become important in Dumfries; but manufactures in other departments, with perhaps one or two exceptions, are of comparatively small amount. Hosiery employs many looms in Thornhill, Lochmaben, and other towns and villages; woollen fabrics, of various kinds, are made at Sanquhar and Moffat; gingham are manufactured at Sanquhar and Annan; muslins, at Kirkconnel; coarse linens, at Langholm. Weaving, in different departments, employs many hands; artificership, in all the ordinary departments, employs many more; and operations connected with coal and lead-mining employ a few. The energies of the county, as compared with those of other counties, either in Scotland or in England, are not small; but, partly in consequence of dearth of coal, partly for other reasons, they are mainly absorbed in the pursuits and accessories of agriculture; and yet, since at least the commencement of the present century, they have been so spent as to produce an amount of prosperity scarcely, if at all, inferior to what has been realised in other counties. The roads, the fences, the dwelling-houses, the churches, the people's dress, and the people's manners in Dumfriesshire, taken as indices of progress and refinement, will bear comparison with those of any other district in Great Britain. The railways within the county are the Glasgow and South-Western, down Nithsdale, and across the foot of Annandale; the Caledonian, down the entire length of Annandale; the Dumfries and Lockerbie, across the

interior from Dumfries to Lockerbie; the Solway Junction, in the S of Annandale, from the Caledonian near Kirtlebridge to the Solway Firth near Annan; small part of the Castle-Douglas and Dumfries, on the W border of Dumfries parish; and branches of the Hawick and Carlisle section of the North British to Langholm and Gretna.

The *quoad civilia* parishes, inclusive of two which extend slightly into Lanarkshire, amount to 43. The royal burghs are Dumfries, Annan, Lochmaben, and Sanquhar. The burghs of barony are Moffat, Lockerbie, Langholm, Ecclefechan, Thornhill, and Moniaive. The principal villages are Springfield, Eaglesfield, Sunnybrae, Bridekirk, Gasstown, Heathery Row, Hightae, Park, Dunreggan, Rowan Burn, Wanlockhead, Greenbrae, Glencape, Torthorwald, Roucan, Collin, Penpont, Kirkconnel, Kirtlebridge, Waterbeck, Dornock, Cummertrees, Ruthwell, Clarencefield, Mouswald, Closeburn, Holywood, Kelton, Locharbriggs, Amisfield, Dalswinton, Wamphray, Carronbridge, and Crawick Mill. The principal seats are Drumlanrig Castle, Langholm Lodge, Castlemilk, Kinmount, Kinharvey House, Glen Stewart, Tinwald House, Comlongan Castle, Dumrieff House, Springkell, Jardine Hall, Rockhall, Westerhall, Raehills, Crawfordton, Amisfield House, Closeburn Hall, Dalswinton House, Hoddam Castle, Mosknow, Halleathes, Mount Annan, Craighdarroch, Blackwood House, Murraythwaite, Broomholm, Barjarg Tower, Speddoch, Dormont, Elshields, Carnsalloch, Conheath, Capenoch, Courance, Glensae, Kirkmichael House, Rammerscales, Craigielands, Corehead, Langshaw, Cove, Maxwelltown House, Warmambie, Bonshaw, Northfield, Boreland, Broomrig, Cowhill, Portrack, Gribton, Newtonairds, Milnhead, Burnfoot, Lanrick, and Corehead. According to *Miscellaneous Statistics of the United Kingdom* (1879), 676,971 acres, with a total gross estimated rental of £595,512, were divided among 4177 landowners, one holding 253,514 acres (rental £97,530), one 64,079 (£27,884), six together 82,759 (£56,690), twelve 81,881 (£59,150), twenty-six 76,576 (£50,977), twenty-eight 36,800 (£26,318), fifty-three 37,505 (£129,105), etc.

The county is governed by a lord-lieutenant, a vice-lieutenant, 18 deputy-lieutenants, a sheriff, a sheriff-substitute, and about 100 magistrates. The principal courts are held at DUMFRIES; and sheriff small-debt courts are held at Annan on the first Tuesday of January, May, and September; at Langholm on the third Saturday of January, May, and September; at Lockerbie on the first Thursday of April, August, and December; at Moffat on the first Friday of April, August, and December; and at Thornhill on the second Thursday of April, August, and December. The county had two parishes, Kirkpatrick-Juxta and Moffat, that were partly also in Lanarkshire, though the Ordnance Survey Maps show the former as wholly in the county of Dumfries. The Boundary Commissioners in 1891 transferred both parishes entirely to Dumfriesshire, Kirkpatrick-Juxta being now as represented on the maps. The only alteration on the boundaries of interior parishes was as regards Dornock and Kirkpatrick-Fleming, which see. The police force, in 1891, besides 19 men for Dumfries, comprised 41 men; and the salary of the chief constable was £400. The county prison is at Dumfries. The annual value of real property, assessed at £295,621 in 1815, was £319,751 in 1843, £350,636 in 1861, £572,945 in 1882, and £457,299, 4s. 7d. in 1892. The four royal burghs, together with Kirkcudbright, send one member to parliament, and the rest of the county sends another, and had a constituency of 9231 in 1891. Pop. (1801) 54,597, (1821) 70,878, (1831) 73,770, (1841) 72,830, (1861) 75,878, (1871) 74,808, (1881) 76,140, (1891) 74,221, of whom 34,885 were males. Houses (1891) inhabited 15,626, vacant 1144, building 88.

The registration county takes in the parts of Moffat and Kirkpatrick-Juxta parishes formerly in Lanarkshire, and had in 1891 a population of 74,249. All the parishes are assessed for the poor. Dumfries parish has a poor-house for itself; and respectively 6 and 9 parishes form the poor-law combinations of Kirkpatrick-Fleming and

Upper Nithsdale. The number of registered poor, in the year ending 14 May 1891, was 1129; of casual poor, 42. The number of pauper lunatics was 183, their cost being £4338. The percentage of illegitimate births was 15.9 in 1872, 13.8 in 1880, and 13.6 in 1890.

Dumfriesshire, in the times of Established Episcopacy, formed part of the diocese of Glasgow, and was divided into the deaneries of Nithsdale and Annandale. And now, under Established Presbyterianism, it lies wholly within the province of the synod of Dumfries, but does not constitute all that province. Its parishes are distributed among the presbyteries of Dumfries, Annan, Lochmaben, Langholm, and Penpont; but those in Dumfries presbytery are conjoined with 12 in Kirkcudbrightshire, those in Langholm presbytery with Castleton in Roxburghshire. In 1892 the places of worship within the county were 49 Established, 29 Free, 22 U. P., 2 Congregational, 3 Evangelical Union, 1 Baptist, 1 Methodist chapel, 6 Episcopal, and 8 Roman Catholic—namely 4 at Dumfries, 1 each at Annan, Lockerbie, Langholm, and Moffat. Dumfries is the official residence of the Bishop of Galloway, a see which was originally founded by St Ninian in 397, was extinct from 803 to 1189, and vacant from 1558 till 1878. In the year ending 30 Sept. 1891, the county had 111 schools (98 of them public), which, with accommodation for 16,206 children, had 13,643 on the rolls, and 10,844 in average attendance.

The territory now forming Dumfriesshire, together with large part of Galloway, belonged to the Caledonian Selgovæ; passed, after the Roman demission, to the kingdom of Cumbria or Strathclyde; was much overrun by the Dalriadans, both from the N of Ireland and from Kintyre; rose, for a time, into a condition of rude independence; was subjugated by the Scots or Scoto-Dalriadans after the union of the Scoto-Dalriadan and the Pictavian kingdoms; and was constituted a county or placed under a sheriff by William the Lyon. But, during a considerable period, its sheriffs had direct authority only within Nithsdale, and no more than nominal authority in the other districts. Both Annandale and Eskdale, from the time of David I. till that of Robert Bruce, were under separate or independent baronial jurisdiction; held, in the former, by Robert Bruce's ancestors, in the latter, by various great landowners. The county then consisted of the sheriffship of Nithsdale, the stewardry of Annandale, and the regality of Eskdale; and was cut into three jurisdictions nearly corresponding in their limits to the basins of the three principal rivers. Bruce, after his accession to the throne, framed measures which issued in a comprehensive hereditary sheriffship; and an Act, passed in the time of George II., adjusted the jurisdiction of the county to the condition in which it now exists.

Great barons, about the time of David I., were proprietors of most of the lands in the county. Donegal, the ancestor of the Edgars, owned great part of Nithsdale, and was called Dunegal of Stranith. The Macenswells, ancestors of the Maxwells, held the lands of Caerlaverock; the Comyns held the estates of Dalswinton and Duncow, and lands extending thence southward to Castledykes in the southern vicinity of Dumfries; the Bruces, ancestors of the royal Bruce, held Annandale, and resided chiefly at Lochmaben; the Kirkpatricks, the Johnstons, the Carlyles, and the Carnoes held portions of Annandale as retainers of the Bruces; and the Soulises, the Aveuels, the Rossedals, and others held Eskdale. The Baliols also, though not properly barons of the county itself, but only impinging on it through succession to the lords of Galloway, yet powerfully affected its fortunes. Dumfriesshire, during the wars between the Bruces and the Baliols, was placed betwixt two fires; or, to use a different figure, it nursed at its breasts both of the competitors for the crown; and, from the nature of its position bearing aloft the Bruce in its right arm, and both the Baliol and the Comyn in its left, it was peculiarly exposed to suffering. The successful Bruce, after his victory of Bannockburn, gave the Comyns' manor

of Dalswinton to Walter Stewart, and their manor of Duncow to Robert Boyd; bestowed his own lordship of Annandale, with the castlo of Lochmaben, on Sir Thomas Randolph, and created him Earl of Moray; and conferred on Sir James Douglas, in addition to the gift of Douglasdale in Lanarkshire, the greater part of Eskdale, and other extensive possessions in Dumfriesshire. The county suffered again, and was once more the chief seat of strife during the conflicts between the Bruces and the Balliols in the time of David II. Nor did it suffer less in degree, while it suffered longer in duration, under the subsequent proceedings of the rebellious Douglasses. These haughty barons, 'whose coronet so often counterpoised the crown,' grew so rapidly in at once descent, acquisition, power, and ambition, as practically to become lords-paramount of both Dumfriesshire and Kirkcudbrightshire. Their possessions, at their attainder in 1455, reverted to the Crown, and were in part bestowed on the Earl of March; yet still, through old influence and through action of old retainers and their descendants, continued to give the Douglasses a strong hold upon the county, such as enabled them to embroil it in further troubles. The county was invaded, in 1484, by the exiled Earl of Douglas and the Duke of Albany; and thence, during a century and a half, it appears never to have enjoyed a few years of continuous repose. Even so late as 1607, the martial followers of Lord Maxwell and the Earl of Morton were led out to battle on its soil, in a way to threaten it with desolation; and all onward till the union of the Scottish and the English crowns, marauding forces and invading armies, at only brief intervals of time, overran it from the southern border, and subjected it to pillage, fire, and bloodshed. The county sat down in quietude under James VI., and begun then to wear a dress of social comeliness; but again, during the reign of the Charleses, it was agitated with broils and insurrections; and, in the rebellions of 1715 and 1745, especially in the latter, it was the scene of numerous disasters. The Jacobites were strong in it, and worked so vigorously in the cause of the Chevalier and the Pretender as to draw destruction on their own families. The Maxwells, in particular, were utterly overthrown by the attainder of the Earl of Nithsdale in 1715; and several other great families lost all their possessions and their influence either then or in 1746. The Dukes of Buccleuch, partly through extension of their own proper territories, partly through inheritance of those of the Dukes of Queensberry, are now by far the largest and most influential landowners of the county; and the Marquis of Queensberry and Hope-Johnstone of Annandale hold a high rank.

Caledonian cairns, camps, and hill-forts are numerous in many of the upland districts, particularly on the south-eastern hills; remains of Caledonian stone circles are in the parishes of Gretna, Eskdalemuir, Wamphray, Moffat, and Holywood; Roman stations, Roman camps, or remains of them are at Brunswark, Castle O'er, Raeburnfoot, Torwoodmoor, Trohoughton, Gallaberry, Wardlaw Hill, and Caerlaverock; Roman roads connected the Roman stations with one another, and went up Annandale, and westward thence to Nithsdale. A remarkable antiquity, supposed by some writers to be Anglo-Saxon, by others to be Danish, is in Ruthwell churchyard; old towers are at Amisfield, Lag, Achincass, Robgill, and Lochwood; and ancient castles, some in high preservation, others utterly dilapidated, are at Caerlaverock, Comlongan, Torthorwald, Closeburn, Morton, Sanquhar, Hoddam, Wauchope, and Langholm. Ancient monasteries were at Dumfries, Caxtonbie, Holywood, and other places; and a fine monastic ruin is still at Lincluden. Vast quantities of ancient coins, medals, weapons, and pieces of defensive armour have been found. Numerous places figure prominently in Sir Walter Scott's *Guy Mannering*, *Redgauntlet*, and *Abbot*. See, besides works cited under ANNANDALE, CAERLAVEROCK, DRUMLANRIG, DUMFRIES, LOCHMABEN, and MOFFAT, two articles on Dumfriesshire in *Trans. High. and Ag. Soc.*, 1869.

Dumglow. See DRUMGLOW.

Dumgree, an ancient parish in the upper part of Annandale, Dumfriesshire, now divided between Kirkpatrick-Juxta and Johnstone. The larger section of it is within Kirkpatrick-Juxta, and retains there, near the right bank of Kinnel Water, some traces of the ancient church.

Dumphail. See DUNIPHAIL.

Dun, a parish of NE Forfarshire, containing, towards its south-western corner, Bridge of Dun Junction on the main line of the Caledonian, 4 miles E by S of Brechin, 15½ ENE of Forfar, and 5¼ (3¼ by road) W by N of Montrose, under which it has a post and railway telegraph office. Bounded N by Logiepert, NE by Montrose, SE by Montrose Basin, S by the river South Esk, dividing it from Maryton, SW by Brechin, and NW by Stracathro, the parish has an utmost length from E to W of 3¼ miles, an utmost width from N to S of 2¾ miles, and an area of 6030 acres, of which 1586¾ are foreshore and 137½ water. Montrose Basin, over all its connection with the parish, is alternately an ornament and an eyesore—at high-tide a beautiful lagoon, but at ebb a dismal expanse of black and slimy silt. The South Esk, along all the southern border, is a fine stream, abounding with salmon and sea-trout, and it is crossed at Bridge of Dun by a handsome three-arched bridge, built in 1737. A loch called Dun's Dish (4¼ × 1½ furl.) lies at an altitude of 242 feet in the north-western corner, and sends off a burn to the South Esk. The land along the river and the basin is low, flat, and protected by embankments, thence rises gently to the centre of the parish, and thence to the western and north-western borders is somewhat tabular, attaining 230 feet above sea-level near Balnillo, 202 near Dun House, 207 near Glenskinno, 279 in Dun Wood, and 290 near Damside. The soil, on the low flat ground, is a fertile clayey loam; and on the ascent thence to the centre is partly light and sandy, partly rich blackish mould; and beyond is first of good quality, next wet and miry. About three-fourths of the entire area are in tillage, and nearly one-sixth is under wood. In Dun, in 1839, was born Alexander Hay Japp ('H. A. Japp'), sub-editor of *Good Words* since 1865; and John Erskine, the Laird of Dun (1508-91), was born at the family seat of Dun. He was a leader of the Reformation party, and at his house in 1555 John Knox preached almost daily, making many converts. David Erskine, Lord Dun (1670-1755), an eminent lawyer, and a staunch upholder of the Episcopalian non-jurors, was also born at Dun House, which, standing 7 furlongs NNE of Bridge of Dun, is now the seat of Augustus Jn. Wm. Hy. Kennedy-Erskine, Esq. (b. 1866; suc. 1870). The other chief mansion is LANGLEY Park; and the property is mostly divided among four. Dun is in the presbytery of Brechin and synod of Angus and Mearns; the living is worth £163. The parish church, 9½ furlongs N by W of Bridge of Dun, was built about 1833, and contains 300 sittings; a public school, with accommodation for 171 children, had (1891) an average attendance of 135, and a grant of £128, 12s. 6d. Valuation (1882) £7846, 3s. 6d., (1891) £7958, 9s., including £1942 for railways. Pop. (1801) 680, (1831) 514, (1861) 552, (1871) 565, (1881) 541, (1891) 552.—*Ord. Sur.*, sh. 57, 1868.

Dunach, an estate, with a mansion, in Kilmore parish, Argyllshire, on the N shore and near the head of salt-water Loch Feochan, 3½ miles S of Oban. It was purchased in 1871 for the sum of £16,500 by Neil Macleod Macdonald, Esq., and is now owned by his widow.

Dunachton, a barony in Alvie parish, Inverness-shire, 1¼ mile SW of Kincaig station. It passed by marriage, about 1500, from the M'Nivens to the Mackintoshes; and had a castle, burned in 1689, and never rebuilt.

Dunagoil, a headland on the SW coast of the Isle of Bute, 1¼ mile NW of Garroch Head. Rising to a height of 119 feet, and offering to the sea a steep and rugged acclivity, that terminates in a lofty, cavernous cliff, it presents also to the land side a precipitous ascent, difficult of access, and scaleable chiefly by a narrow rugged ledge

at the southern extremity. Its flattish summit, retaining vestiges of an ancient vitrified fort, supposed to be Scandinavian, commands an extensive view along Kilbrannan Sound and the Firth of Clyde.

Dunaidh, a large, high, almost inaccessible rock in Killarrow parish, Islay island, Argyllshire, near the Mull of Islay. An old castle or fort on it, that seems to have been a place of remarkable strength, is now an utter ruin, without any characters of architectural interest.

Dunain or **Dunean**, an estate, with a mansion, in Inverness parish, Inverness-shire, 3 miles SW of Inverness town. It anciently had a baronial fortalice; and to the N rises Dunain Hill (940 feet).

Dun Alastair or **Mount Alexander**, a fine modern Scottish Baronial mansion in Forthingall parish, Perthshire, on the left bank of the Tummel, 3 miles E of Kinloch Rannoch, and 17 W of Pitlochry. Its predecessor was the seat of the Struan Robertsons, and it owes much of its ornamental planting to the Jacobite poet-chieftain of Clan Donnachie, Alexander Robertson (1670-1749), the prototype of Scott's 'Baron of Bradwardine.' The present house was built by Gen. Sir John Macdonald, K.C.B. (1788-1866). It afterwards passed into the hands of Mr Tennent, of Wellpark Brewery, Glasgow, and on his death in 1891 was sold to Mr J. C. Bunten, who has had it fitted up with electric lighting plant and machinery. There is a post and telegraph office of Dun Alastair.

Dunamarle. See DUNIMARLE.

Dunan, a bold promontory (100 feet) on the Atlantic coast of Lochbroom parish, Ross-shire, on the northern side of the entrance to Loch Broom, 10½ miles NW of Ullapool.

Dunan-Aula, a tumulus in Craignish parish, Argyllshire, in the valley of Barbreck. It is said to have been formed over the grave of a Danish prince of the name of Olaf or Olaus, who led an invading force into sanguinary battle with the natives on ground in its vicinity; and ¼ mile distant are a number of rude monuments erected in memory of the warriors who fell.

Dunans, an estate, with a mansion, in Kilmodan parish, Argyllshire, near the head of Glendaruel, 4 miles NNE of Glendaruel House, and 23 NNW of Rothesay.

Dunaverty, a quondam castle in Southend parish, Argyllshire, on a small bay of its own name, 5 miles E by N of the Mull of Kintyre, and 10½ SSW of Campbeltown. Crowning a steep pyramidal peninsula (95 feet), with cliff descending sheer to the sea, and defended on the land side by a double or triple rampart and a fosse, it appears, both from its site and from its structure, to have been a place of uncommon strength, and commanded the approach to Scotland at the narrowest part of sea between Scotland and Ireland. An early stronghold of the Lords of the Isles, said to have given shelter to Robert Bruce at the ebb of his fortunes, it was captured and garrisoned by James IV. in 1493, and in the following year recaptured by Sir John of Isla, who hanged the governor from the wall, in the sight of the King and the fleet. In 1647 it capitulated to General David Leslie, who put every mother's son of its garrison to the sword, instigated thereto by Mr John Nave, his excellent chaplain, who 'never ceased to tempt him to that hoodshed, yea, and threatened him with the curses befell Saul for sparing the Amalekites.' The castle has been so completely demolished that scarcely a vestige of it now exists.

Dunavourd. See DONAVOURD.

Dunbar (Gael. *dun-barr*, 'fort on the point'), a town and a parish on the north-eastern coast of Haddingtonshire. A royal burgh, seaport, and seat of considerable traffic, the town by road is 11 miles ENE of Haddington, and 11½ ESE of North Berwick, whilst by the North British railway it is 29½ E of Edinburgh, and 28½ NW of Berwick-upon-Tweed. It stands, says Thomas Carlyle, 'high and windy, looking down over its herring-boats, over its grim old Castle now much honeycombed,—on one of those projecting rock-promontories with which that shore is niched and vandyked, as far as the eye can reach. A beautiful sea; good land

too, now that the plougher understands his trade; a grim niched barrier of whinstone sheltering it from the chafings and tumblings of the big blue German Ocean. Seaward St Abb's Head, of whinstone, bounds your horizon to the E, not very far off; W, close by, is the deep bay and fishy little village of Belhaven; the gloomy Bass and other rock-islets, and farther the hills of Fife, and foreshadows of the Highlands, are visible as you look seaward. From the bottom of Belhaven Bay to that of the next sea-height St Abb's-ward, the town and its environs form a peninsula. . . . Landward, as you look from the town of Dunbar, there rises, some short mile off, a dusky continent of barren heath hills, the Lammermuir, where only mountain sheep can be at home.' To which need only be added that the town itself chiefly consists of a spacious High Street and one or two smaller parallel streets.

At the foot or N end of the High Street stands Dunbar House, within the old park of the castle, exhibiting to the street a large couchant sphinx with extended wings, and to the sea a handsome façade with central circular portico. Built by the Messrs Fall, and thereafter a mansion of the Earl of Lauderdale, it was purchased in 1859 by Government, and converted into a barrack. The park around it, which serves as the parade-ground of the Haddingtonshire militia, contained, till its levelling in 1871-72, two large artificial mounds, supposed to be of prehistoric origin. The castle, founded at an early period of the Christian era, but many times reconstructed in the course of wellnigh a thousand years, bore for a long time prior to the invention of gunpowder the reputation of impregnability, and was one of the grandest fortresses of the Border counties, exerting a powerful influence on the national history down to its demolition in 1568. Its ruins, already grievously dilapidated, were still further reduced by excavations for the Victoria Harbour; hut Grose has left us two views, and Miller a full description, of them in their more perfect condition. Of Miller's description the following is a summary:—The castle is founded on a reef of trap rocks, which project into the sea, and, in many places, rise like bastions thrown up by nature to guard these stern remains of feudal grandeur against the force of the waves. The body of the buildings measures 165 feet from E to W, and in places 207 from N to S. The South Battery—by Grose supposed to have been the citadel or keep, and now converted into a fever hospital—is situated on a detached rock, which, 72 feet high, and accessible only on one side, is connected with the main part of the castle by a passage of masonry 69 feet long. The citadel measures 54 feet by 60 within the walls, and in shape is octagonal. Five of the gun-ports, or so-called 'arrow-holes,' remain, and measure 4 feet at the mouth, but only 16 inches at the inner extremity. The buildings are arched, and extend 8 feet from the outer walls, and look into an open quadrangle, whence they derive their light. About the middle of the fortress, part of a wall remains, through which there is a doorway, surmounted with armorial bearings, and leading seemingly to the principal apartments. In the centre are the arms of George, eleventh Earl of Dunbar, who succeeded his father in 1369; and who, besides the earldom of Dunbar and March, inherited from his heroic mother the lordship of Annandale and the Isle of Man. The towers had communication with the sea, and dip low in many places. NE from the front of the castle is a large natural cavern of black stone, supposed to have formed part of the dungeon, which, Pennant observes, 'the assistance of a little art had rendered a secure but infernal prison.' But as it has a communication with a rocky inlet from the sea on the W, it is more likely that it is the dark postern through which Sir Alexander Ramsay and his brave followers entered with a supply of provisions to the besieged in 1339. It was a place also well suited for securing the boats belonging to the garrison. The castle is built of a red stone like that of the neighbouring quarries. Part of the foundation of a fort, which was begun in 1559 for the purpose of accommodating a

French garrison, may be traced, extending 136 feet in front of the castle. This building was, however, interrupted in its progress, and demolished. In the NW part of the ruins is an apartment about 12 feet square, and nearly inaccessible, which tradition designates Queen Mary's Room.

The public buildings include the town-hall, an old edifice; the assembly-rooms (1822), substantial and commodious, but badly situated; the prison, legalised in 1864 for prisoners whose term does not exceed 10 days; the corn exchange (1855); St Catherine's Hall (1872), with ball or concert room, and Masonic, Free Gardeners', Shepherds', and Good Templars' lodges; and the railway station, which, standing on the south-eastern outskirts of the town, occupies part of the site of Oliver Cromwell's camp, and is a large Tudor structure, with accommodation suitable to its position nearly midway between Berwick and Edinburgh. Not far from the station, at the S end of the High Street, stands the parish church, on a spot 65 feet above sea-level—the site of a cruciform collegiate church, which, founded in 1342 and 1392 by Earls Patrick and George for a dean, a vicar-dean, and 8 prebendaries, measured 123 feet from E to W, and 83 feet across the transept. Built in 1819-21, from designs by Gillespie Graham, at a cost of £8000, the present church is an elegant structure in the Gothic style, with a pinnacled square tower 108 feet high, that commands an extensive view, and serves as a landmark to mariners. The interior, seated for 1800 worshippers, is adorned with two stained-glass windows, erected in 1865 and 1871; whilst immediately behind the pulpit is a superb monument, erected to the memory of George Home, Earl of Dunbar, third son of Alexander Home of Manderston. This nobleman was in great favour with James VI., and, holding successively the offices of high-treasurer of Scotland and chancellor of the exchequer in England, was raised to the peerage in 1605. It was on him that the 'British Solomon' chiefly depended for the restoration of prelacy in Scotland; and, at the parliament held at Perth in 1606, he had the skill to carry through the act for the restoration of the estate of bishops. He died at Whitehall, 29 Jan. 1611, 'not,' says Calderwood, 'without suspicions of poison.' 'His body being embalmed, and put into a coffin of lead, was sent down to Scotland, and with great solemnity interred in the collegiate church of Dunbar, where his executors erected a very noble and magnificent monument of various coloured marble, with a statue as large as life.' The monument is 12 feet broad at the base, and 26 feet high. The Earl is represented, kneeling on a cushion, in the attitude of prayer, with a Bible open before him. He is clad in armour, which is seen under his knight's robes, and on his left arm is the badge of the Order of the Garter. Two knights in armour stand on each side as supporters. Above them are two female figures, Justice and Wisdom, betwixt whom, and immediately above the cupola, Fame sounds her trumpet; while, on the opposite side, Peace, with her olive branch, sheds a laurel wreath on his lordship. Immediately beneath the monument is the vault, wherein the body is deposited in a leaden coffin. Other places of worship are a Free church (1850), a U.P. church (1813), a Wesleyan Methodist chapel (1764), St Anne's Episcopal church (1889, designed by Dr Rowand Anderson), and the Roman Catholic church of Our Lady of the Waves (1877; made a separate mission in 1881). The Burgh public school and the Lamer public school each accommodate 350 children.

The town has a head post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland, the British Linen Co., and the Commercial Bank, gaswork, a cemetery company, a lifeboat, coastguard station, rocket apparatus, shipwrecked mariners' society, Shore Hall, fever hospital, bowling, curling, golf, cricket, and football clubs, a total abstinence society, east and west promenades, three bathing-pools, etc. A weekly corn market is held on Tuesday, and fairs are held on the first Tuesday of February (hiring) and on 26 May and 22 November if

a Tuesday, otherwise on the Tuesday after. Malting, brewing, fish-curing, brickmaking, rope and sail making, iron-founding, and the manufacture of agricultural implements and paper are carried on; and there are also corn and flour mills near. A printing-press was erected in 1795, the earliest in the county; and from it was issued the first Scotch cheap periodical miscellany. The gasworks belong to the town, and a good supply of soft water is brought from a distance of 2 miles. The port had long a custom-house of its own, with jurisdiction from Gullane Point to the bounds of Berwick, but is now a sub-port of Leith. A whale fishery company was established in 1752, but, having little or no success, was dissolved in 1804. In 1830 six vessels were engaged in timber and grain trade with the Baltic, and 39 in various coasting trade; and in 1839 the vessels belonging to the port were 30 of 1495 tons, in 1851 only 11 of 658 tons, this falling-off of the shipping trade being mainly ascribed to the opening of the North British railway. The chief exports are corn, fish, and potatoes; and the imports, coal and timber. The small Old Harbour, commenced with a grant of £300 from Cromwell, in 1820 received the addition of a graving-dock, which, proving, however, useless, was long ago filled up; large stores have since been erected on the site. The New or Victoria Harbour, formed in 1844 at a cost of £15,762 by the burgh and the Fishery Board, and repaired in 1880 at a further cost of £2181, covers 5 acres, and is an important haven of refuge for vessels between Leith Roads and the English Tyne. It has a light, visible for 16 miles.

Created a royal burgh by David II. (1329-71), Dunbar is now governed by a provost, 3 bailies, a treasurer, and 7 councillors. It partly adopted the General Police and Improvement Act of Scotland in the year 1862; and formerly formed one of a group of burghs sending a member to Parliament, but its representation was merged in that of the county in 1885. The annual value of real property within the burgh in 1891 amounted to £17,454, whilst the corporation revenue for 1890 was £1236.

Pop. (1861) 3517, (1871) 3320, (1881) 3661, (1891) 3645. Dunbar is a place of hoar antiquity. At it in 678—the year of his expulsion from his see—the great St Wilfrid, Bishop of York, was imprisoned by Egfrid; and in 849 it is said to have been burned by Kenneth mac Alpin. In 1072 Gospatric, ex-Earl of the Northumbrians, and kinsman to Malcolm Ceanmor, obtained from that king Dunbar with the adjacent territory; and the town's history for 360 years centres mainly around the sea-built castle of his descendants, the Earls of Dunbar and March. Patrick, fifth Earl of Dunbar, who in 1184 wedded a natural daughter of William the Lion, was justiciary of Lothian and keeper of Berwick; and during his tenure of these offices, in 1214, Henry III. invaded Scotland with a powerful army, and, having taken the town and castle of Berwick, next laid siege to the fortress of Dunbar, but finding it impregnable, devastated the country up to the walls of Haddington. A marvellous story is told of Patrick, seventh Earl, who, during the troublous minority of Alexander III., was one of the chiefs of the English faction. Bower, who was born at Haddington 100 years after, relates that, on 11 March 1286, the night preceding King Alexander's death, True Thomas of Ereildoun or EARLSTON, arriving at the castle of Dunbar, was jestingly asked by the Earl if the morrow would bring any noteworthy event. Where-to the Rhymour made answer mystically: 'Alas for tomorrow, a day of calamity and misery! Before the twelfth hour shall be heard a blast so vehement as shall exceed those of every former period,—a blast that shall strike the nations with amazement,—shall humble

Seal of Dunbar.

what is proud, and what is fierce shall level with the ground! The sorest wind and tempest that ever was heard of in Scotland! Next day, the Earl and his companions having watched till the ninth hour without observing any unusual appearance in the elements, began to doubt the powers of the seer, and, ordering him into their presence, upbraided him as an impostor, whereto he replied that noon was not yet past. And scarce had the Earl sat down to the board, scarce had the shadow of the dial fallen upon the hour of noon, when a messenger rode furiously up, who, being questioned, cried: 'Tidings I bring, but of a lamentable kind, to be deplored by the whole realm of Scotland! Alas, our renowned King has ended his fair life at Kinghorn!' 'This,' said True Thomas, 'this is the scatheful wind and dreadful tempest which shall blow such calamity and trouble to the whole state of the whole realm of Scotland!'

Patrick, eighth Earl of Dunbar—surnamed Black Beard—succeeded in 1289, and in the same year appeared at the parliament of Brightham as Comes de Marchia (Earl of March or the Merse), being the first of his line so designated. He was one of the ten competitors for the crown of Scotland (1291); and when, in 1296, Edward I. with a powerful army entered Scotland, the Earl of Dunbar took part against his country. His Countess, however, more patriotic than he, delivered the castle over to the leaders of the Scottish army. Edward despatched the Earl of Warrenne with 12,000 men to the siege; whilst the Scots, sensible of the importance of this fortress, whose capture would lay their country open to the enemy, hastened with their main army of 40,000 men, under the Earls of Buchan, Lennox, and Mar, to its relief. Warrenne, undaunted by the superior numbers of the Scots, left part of his army to blockade the castle, and with the rest advanced to meet the foe. The English had to descend into a valley before they could reach the Scots; and as they descended, the Scots, observing some confusion in their ranks, set up a shout of exultation, and, causing their horns to be sounded, rushed down from their position of advantage. But when Warrenne emerged from the glen, and advanced undismayed against their formidable front, the undisciplined troops, after a brief resistance, fled, and were chased with great slaughter as far as Selkirk Forest. Edward, next day, with the main body of the English army, came up to Dunbar, and compelled the garrison to capitulate. So, at least, runs the story, but Dr Hill Burton observes, that 'evidently there was not a great battle, with organised troops and known commanders pitted against each other' (*Hist. Scot.*, ii. 170, ed. 1876). According to Blind Harry, when Wallace first undertook to deliver his country, the Earl of Dunbar refused to attend a meeting of the Estates at Perth. Thereupon Wallace encountered Patrick in a field near Innerwick, where the Earl had assembled 900 of his vassals, and with half that number compelled the traitor, after a terrible conflict, to retreat to Cockburnspath, himself falling back on Dunbar. Patrick now went to Northumberland to crave the aid of the Bishop of Durham; but his ostensible reason, the Minstrel tells us, was 'to bring the Bruce free till his land.' Vessels were immediately sent from the Northumbrian Tyne to blockade Dunbar, and cut off supplies, while the Earl, with 20,000 men, hastened to retake his fortress. In the interim Wallace had repaired to the W in quest of succour, and, returning by Yester, was joined by Hay and a chosen body of cavalry. With 5000 men he marched to the support of Seton, while the Bishop of Durham, who had remained at Norham with Bruce, came to the assistance of Dunbar, and threw himself into an ambush near Spottmoor. By this unexpected movement Wallace was completely hemmed in, when Seton fortunately came to his relief. The two armies closed in mortal strife. The Scots pushed on so furiously against the Southrons, that they were just about to fly, but Patrick was

'Sa cruel of intent,
That all his host tuk of him hardiment;
Through his awne hand he put mony to pain.'

The desperate valour of the Wallaces, the Ramsays, and the Grahams was of little avail against the superior force of the English; so that when the ambushade of Bishop Beck appeared, they were on the point of retiring. Dunbar singled out Wallace amidst the throng, and wounded him; but the hero, returning the blow with sevenfold vengeance, clove down Maitland, who had thrown himself between. Wallace's horse was killed beneath him, and he was now on foot dealing destruction to his enemies, when

'Erle Patrick than, that had gret craft in war,
With spears ordand guid Wallace down to hear.'

But 500 resolute warriors rescued their champion, and the war-worn armies were glad to retire. The same night Wallace traversed Lammermuir in quest of the recreating host, while Bishop Beck, Earl Patrick, and Bruce fled to Norham. On his return, the champion, still mindful of the odium attached to his name by the Earl of Dunbar,—

'Passit, with mony awful men,
On Patrickis land, and waistit wonder fast,
Tuk out guid, and places doun thair cast;
His steads, sevin, that Mete Hamys was call'd,
Wallace gert break the hurly higgings hauld,
Baith in the Merse, and als in Lothiane,
Except Dunhar, standand he leavit nane.'

In 1314 Edward II. of England, after seeing his army annihilated at Bannockburn, fled with a body of horse towards Berwick; but Sir James Douglas, with 80 chosen horsemen, so pressed on the royal fugitive, that he was glad to shelter himself in the castle of Dunbar. Here he was received by Patrick, ninth Earl, 'full gently;' and hence, in a fishing-boat, he coasted along the shore till he reached the towers of Bam-brough. After this, the Earl of Dunbar made peace with his cousin, King Robert, and was present at Ayr in May 1315, when the succession to the Crown of Scotland was settled on Bruce's brother. But after the defeat at Halidon Hill (1333), Edward at Berwick once more received the fealty of the Earl of Dunbar with several others of the nobility; and the castle of Dunbar, which had been dismantled and razed to the ground on the approach of the English, was now rebuilt at the Earl's expense, for the purpose of maintaining an English garrison.

In 1339 the castle was again in the sole possession of its lord, and at the service of the Crown of Scotland; and then the Earls of Salisbury and Arundel advanced at the head of a large English host to take it. The Earl of Dunbar was absent in the North; so that the defence of his stronghold devolved upon his Countess, a lady who, from her swarthy complexion, was called Black Agnes, and who was daughter to the great Thomas Randolph, Earl of Moray. During the siege, Agnes performed all the duties of a bold and vigilant commander. When the battering engines of the English hurled stones or leaden balls against the battlements, in scorn she would bid a maid wipe off with a clean white handkerchief the marks of the stroke; and when the Earl of Salisbury, with vast labour, brought his sow close to the walls, the Countess cried:—

'Beware, Montagow,
For farrow shall thy sow!'

Whereupon a large fragment of rock was hurled from the battlements, and crushed the sow to pieces, with all the poor little pigs—as Major calls them—who were lurking beneath it. The following is Wyntoun's rhyming narrative of this most memorable siege:—

'Schyre William Montague, that sua
Had tane the siege, in hy gret ma
A mekil and richt stalwart engine,
And up smertly gert dress it; syne
They warpit at the wall great stanes
Baith hard and heavy for the nays,
But that nane merying to them made,
And alsua when they castyne had,
With a towel, a damiselle
Arrayed jolly and well,
Wipit the wall, that they might see
To gere them malr annoyed he;

There at the siege well lang they lay,
 But thero little vantage got they;
 For when they hykkyne wald, or assall,
 They tint the maist of their travaile.
 And as they hykeryd there a' day,
 Of a great shot I shall you say,
 For that they had of it ferly,
 It here to you rehearse will I.
 William of Spens porcit a Blasowne,
 And thro' three faultis of Awhyrchowne,
 And the Actowne through the third ply
 And the arrow in the hollie,
 While of that dynt there dead he lay;
 And then the Montagu gan say;
 "This is one of my Lady's pinnis,
 Her amouris thus, till my heart rinnis."
 While that the siege was there on this wise
 Men sayis their fell sair juperdyis.
 For Lawrence of Prestoun, that then
 Haldin ane of the wichest men,
 That was in all Scotland that tide,
 A rout of Inglismen saw ride,
 That seemed gude men and worthy,
 And were arrayed right richly;
 He, with als few folk, as they were,
 On them assembled he there;
 But at the assombling, he was there
 Untill the mouth stricken with a spear,
 While it up in the harnys ran;
 I'll a dike he withdrew him than.
 And died; for nae mair live he might.
 His men his death perceived noucht;
 And with their faes faucht stoutly,
 While they them vanquish'd utterly.
 Thus was this guid man brought till end,
 That was richt greatly to commend.
 Of gret wirschiipe and gret hownte
 His saul he eye in satisfie.

Sir William als of Galstown
 Of Keith, that was of gude renown,
 Met Richard Talhot by the way
 And set him to sa hard assay,
 That to a kirk he gert him gae,
 And close there defence to ma;
 But he assailed there sae fast,
 That him behor'd treat at the last,
 And twa thousand pound to pay,
 And left hostage and went his way.
 The Montagu was yet lyand,
 Sieging Dunbare with stalwart hand
 And twa gallies of Genoa had he,
 For till assiege it by the sea.
 And as he thus assieging lay,
 He was set intill hard assay;
 For he had purchased him covyn
 Of ane of them, that were therein,
 That he should leave open the yete,
 And certain term till him then set
 To come; hut they therein hally
 Were warnit of it privily.
 He came, and the yete open fand,
 And wald have gane in foot steppand,
 But John of Cowpland, that was thea
 But a right poor simple man,
 Shut him off hack, and in is gane,
 The portcullis came down on ane;
 And spared Montagu, thereout
 They cryed with a sturdy shout
 "A Montagu for ever mair!"
 Then with the folk that he had there
 He turned to his Herbery,
 And let him japyt fullyly.

Syne Alexander, the Ramsay,
 That trowed and thought, that they
 That were assieged in Dunbar,
 At great distress or mischieff were;
 That in an evening frae the Bass,
 With a few folk, that with him was,
 Toward Dunbar, intil a boat,
 He held all privily his gate;
 And hy the gallies all slyly
 He gat with his company;
 The lady and all that were there
 Of his coming well comfort were,
 He issued in the morning in hy,
 And with the wachis sturdily,
 Made ane apart and stout melle.
 And but trysel entered he.

While Montagu was there lyand,
 The King Edward of England
 Purchased him help and alyawns.
 For he wald amowe were in France;
 And for the Montagu he sends;
 For he cowth nae thing till end
 Forowtrn him, for that time he
 Was maist of his counsel privie
 When he had heard the king's hidding
 He removed, hut mair dwelling,
 When he, I trow, had lying there
 A quarter of a year and mair.
 Of this assiege in their hehyng
 The English oysid to make karping

"I vow to God, she makes gret stere
 The Scottish wench ploddere,
 Como I aire, come I late,
 I fand Annot at the yate."

Amongst the nobles who fell in the field of Durham, in 1346, was Thomas, Earl of Moray, brother to the heroic Countess of Dunbar. As he had no male issue, Agnes inherited his vast estates; and her husband assumed the additional title of Earl of Moray. Besides the earldom of Moray, the Earl of Dunbar and his Countess obtained the Isle of Man, the lordship of Annandale, the baronies of Morton and Tibbers in Nithsdale, of Morthingtoun and Longformacus, and the manor of Dunse in Berwickshire, with Mochrum in Galloway, Cumnock in Ayrshire, and Blantyre in Clydesdale.

George, the tenth Earl of Dunbar and March, succeeded his father in 1369. From his vast possessions he became one of the most powerful nobles of southern Scotland and the great rival of the Douglasses. His daughter Elizabeth was betrothed, in 1399, to David, Duke of Rothesay, son and heir to Robert III.; and on the faith of the Prince, who had given a bond to perform the espousals, the Earl had advanced a considerable portion of her dowry. But Archibald, Earl of Douglas—surnamed the Grim—jealous of the advantage which this marriage promised to a family whose pre-eminence in the state already rivalled his own, protested against the alliance, and, by his intrigues at court, through the Duke of Albany, had the contract between Rothesay and Lady Elizabeth cancelled, and his own daughter substituted in her place. Stung by the insult, Earl George withdrew to England, where Henry IV. granted him a pension of £400 during the continuance of war with Scotland, on condition that he provided 12 men-at-arms and 20 archers with horses, to serve against Robert. With a Douglas at Otterburn (1388), he had defeated Hotspur; now, with Hotspur, at Homildon (1402), he defeated a Douglas. At last, through the mediation of Walter Halyburton of Dirleton, a reconciliation was effected in 1408, Douglas consenting to Dunbar's restoration, on condition that he himself should get the castle of Lochmaben and the lordship of Annandale, in lieu of the castle of Dunbar and earldom of March, which he then possessed.

George, eleventh Earl of Dunbar and March, succeeded his father in 1420, being then nearly 50 years old. In 1434, he and his son Patrick visited England. The motive of this visit to the English court is not known; but the slumbering jealousies of James I.—who had already struck a blow at the power of the barons—were easily roused; and he formed the bold plan of seizing the estates and fortresses of a family which for ages had been the wealthiest and most powerful on the Scottish border. The Earl of Dunbar was arrested and imprisoned in the castle of Edinburgh, while the Earl of Angus, Chancellor Crichton, and Adam Hepburn of Hailes were despatched with letters to the keeper of the castle of Dunbar, who immediately surrendered it to the King's authority. In a parliament assembled at Perth on 10 Jan. 1435, George was accused of holding his earldom and estates after their forfeiture by his father's treason. In vain did he plead that his father had been pardoned and restored by Albany; it was answered, that a forfeiture incurred for treason could not be pardoned by a regent; and the parliament, in compliance with this reasoning, adjudged, 'that, in consequence of the attainder of George de Dunbar, formerly Earl of March and Lord of Dunbar, every right both of property and possession in all and each of those estates in the earldom of March and lordship of Dunbar, and all other lands which he held of our said lord the King, with all and each of their appurtenances, did and does exclusively belong and appertain to our lord the King.' Thus earldom and estates were vested in the Crown; and by James II. the lordship of Dunbar was bestowed on his second son, Alexander, third Duke of Albany, then in his infancy.

In 1483 Albany gave the castle of Dunbar into the

hands of the English; a condition of the truce with Henry VII. was, that its recapture by the Scots should not be deemed an act of war. On the marriage of Margaret of England with the King of Scotland in 1502, the earldom of Dunbar and lordship of Cockburnspath, with their dependencies, were assigned as the jointure of the young Queen; but the castle of Dunbar is expressly mentioned as being reserved by the King to himself. In 1516 John, fourth Duke of Albany, placed a French garrison here, under poor De la Bastie; and by the French it was held till James V., during his marriage sojourn in Paris (1537), expressly bargained for its evacuation. Three years later an English spy wrote word how James 'at least twice every week in proper person, with a privy company of six persons and himself, repairs secretly by night, at the hour of twelve of the clock or after, to his said castle of Dunbar, and there so continues sometimes by the space of one day, and sometimes of two days, and returns by night again, and hath put all his ordnance there in such case that the same are in full and perfect readiness to be removed and set forward at his pleasure.'

The English, in the inroad under the Earl of Hertford, in 1544, after their return from the siege of Leith, and after burning Haddington, encamped the second night—26 May—near Dunbar. 'The same day,' says Patten, 'we burnt a fine town of the Earl of Bothwell's, called Haddington, with a great nunnery and a house of friars. The next night after we encamped besides Dunbar, and there the Scots gave a small alarm to our camp. But our watches were in such readiness that they had no vantage there, but were fain to recoil without doing of any harm. That night they looked for us to have burnt the town of Dunbar, which we deferred till the morning at the dislodging of our camp, which we executed by 500 of our hackbutters, being backed with 500 horsemen. And by reason we took them in the morning, who, having watched all night for our coming and perceiving our army to dislodge and depart, thought themselves safe of us, were newly gone to their beds; and in their first sleeps closed in with fire, men, women, and children, were suffocated and burnt. That morning being very misty and foggy, we had perfect knowledge by our espials that the Scots had assembled a great power at a strait called the Pease.'

In 1547, Hertford, now Duke of Somerset, invaded Scotland with an army of 15,000 men; and having crossed the pass of Pease, with 'puffing and payne,' as Patten says, demolished the castles of Dunglass, Innerwick, and Thornton. 'This done, about noon, we marched on, passing soon after within the gunshot of Dunbar, a town standing longwise upon the seaside, whereat is a castle—which the Scots count very strong—that sent us divers shots as we passed, but all in vain: their horsemen showed themselves in their fields beside us, towards whom Bartevil with his 800 men, all hackbutters on horseback—whom he had right well appointed—and John de Rybaud, with divers others, did make; but no hurt on either side, saving that a man of Bartevil's slew one of them with his piece. The skirmish was soon ended.' In 1548, Dunbar was burned by German mercenaries under the Earl of Shrewsbury, on his return to England from the attack on Haddington.

On Monday, 11 March 1566, just two days after Rizzio's assassination, Mary at midnight slipped out from Holyrood, and, with Darnley and six or seven followers, riding straight to Seton House, there got an escort on to the strong fortress of Dunbar, whose governor 'was amazed, early on Tuesday morning, by the arrival of his king and queen hungry and clamorous for fresh eggs to breakfast.' Having thus seduced Darnley to abandon his party, the Queen's next step was to avenge the murder of her favourite. A proclamation was accordingly issued from Dunbar on 16 March, calling on the inhabitants of Edinburgh, Haddington, Linlithgow, Stirling, etc., to meet her at Haddington on Sunday the 17th; but it was not till the 27th that Bothwell, with 2000 horsemen, escorted the royal pair back to Edinburgh. Melville, the interim secretary,

tells how at Haddington during this homeward journey Mary complained bitterly of Darnley's conduct in the late assassination; and on 19 April, in parliament, she, 'taking regard and consideration of the great and manifold good service done and performed, not only to her Highness's honour, weill, and estimation, but also to the commonweill of her realm and lieges thereof, by James, Earl Bothwell, and that, through his great service foresaid, he not only frequently put his person in peril and danger of his life, but also super-expended himself, alienated and mortgaged his livings, lands, and heritage, in exorbitant sums, whereof he is not hastily able to recover the same, and that he, his friends and kinsmen, for the most part, dwell next adjacent to her Highness's castle of Dunbar, and that he is most habile to have the captaincy and keeping thereof, and that it is necessarily required that the same should be well entertained, maintained, and furnished, which cannot be done without some yearly rent, and profit given to him for that effect, and also for reward of his said service: therefore, her Majesty infested him and his heirs-male in the office of the captaincy keeping of the castle of Dunbar, and also in the crown lands of Easter and Wester Barns, the lands of Newtonleyes, Waldane, etc.

So it was to Dunbar Castle that Bothwell brought Mary 'full gently,' when, with 800 spearmen, he met her at Fountainbridge, on her return from Stirling, 24 April 1567, ten weeks after the Kirk-of-Field tragedy. The Earl of Huntly, Secretary Maitland, and Sir James Melville, were taken captives with the Queen, while the rest of her servants were suffered to depart; and Melville himself was released on the following day. Of Bothwell and Mary, Buchanan tells that, 'they had scarcely remained ten days in the castle of Dunbar, with no great distance between the Queen's chamber and Bothwell's, when they thought it expedient to return to the castle of Edinburgh.'

The marriage at Edinburgh, the retreat to BORTHWICK, and the flight thence in page's disguise to CAKEMUIR—these three events bring Mary once more to Dunbar, for the third and last time, on 13 June. With Bothwell she left next day to levy forces, and the day after that comes CARBERRY Hill, whence Bothwell returns alone, to fly on shipboard, which ends Dunbar's great three-act tragedy.

On 21 Sept. 1567, four companies of soldiers were sent to take Dunbar, which surrendered to the Regent on 1 Oct., and in the following December the castle, which had so often sheltered the unfortunate and the guilty, was ordered by Parliament to be destroyed. In 1581, among several grants excepted by James VI. from the general revocation of his deeds of gift made through importunity, mention is made of the 'forthe of Dunbar granted to William Boncle, burgess of Dunbar.' This probably referred to the site of the fortress, and perhaps some ground adjacent.

On 22 July 1650, Cromwell, at the head of 16,000 men, entered Scotland; on 3 Sept. he fought the Battle of Dunbar. Of which great battle and the events that led to it we have his own account in a letter to Lenthall, Speaker of the Parliament of England:—'We having tried what we could to engage the enemy, 3 or 4 miles W of Edinburgh; that proving ineffectual, and our victual failing, we marched towards our ships for a recruit of our want. The enemy did not at all trouble us in our rear, but marched the direct way towards Edinburgh; and partly in the night and morning slips through his whole army, and quarters himself in a posture easy to interpose between us and our victual. But the Lord made him to lose the opportunity. And the morning proving exceeding wet and dark, we recovered, by that time it was light, a ground where they could not hinder us from our victual; which was an high act of the Lord's Providence to us. We being come into the said ground, the enemy marched into the said ground we were last upon; having no mind either to strive or to interpose between us and our victuals, or to fight; being indeed upon this aim of reducing us to a lock, hoping that the sickness of our army would

render their work more easy by the gaining of time. Whereupon we marched to Musselburgh to victual, and to ship away our sick men ; where we sent aboard near 500 sick and wounded soldiers.

‘And upon serious consideration, finding our weakness so to increase, and the enemy lying upon his advantage, at a general council it was thought fit to march to Dunbar, and there to fortify the town. Which, we thought, if any thing, would provoke them to engage. As also, that the having a garrison there would furnish us with accommodation for our sick men, and would be a good magazine, which we exceedingly wanted, being put to depend upon the uncertainty of weather for landing provisions, which many times cannot be done, though the being of the whole army lay upon it ; all the coasts from Berwick to Leith not having one good harbour. As also, to lie more conveniently to receive our recruits of horse and foot from Berwick.

‘Having these considerations, upon Saturday, the 30th of August, we marched from Musselburgh to Haddington. Where, by that time we had got the van-brigade of our horse, and our foot and train, into their quarters, the enemy had marched with that exceeding expedition that they fell upon the rear-forlorn of our horse, and put it in some disorder ; and indeed had like to have engaged our rear-brigade of horse with their whole army, had not the Lord, by His Providence, put a cloud over the moon, thereby giving us opportunity to draw off those horse to the rest of the army. Which accordingly was done without any loss, save of three or four of our afore-mentioned forlorn ; wherein the enemy—as we believe—received more loss.

‘The army being put into a reasonable secure posture, towards midnight the enemy attempted our quarters, on the W end of Haddington ; but through the goodness of God we repulsed them. The next morning we drew into an open field, on the S side of Haddington ; we not judging it safe for us to draw to the enemy upon his own ground, he being prepossessed thereof ; but rather drew back, to give him way to come to us, if he had so thought fit. And having waited about the space of four or five hours, to see if he would come to us, and not finding any inclination in the enemy so to do, we resolved to go, according to our first intendment, to Dunbar.

‘By that time we had marched three or four miles, we saw some bodies of the enemy’s horse draw out of their quarters ; and by that time our carriages were gotten near Dunbar, their whole army was upon their march after us. And, indeed, our drawing back in this manner with the addition of three new regiments added to them, did much heighten their confidence, if not presumption and arrogancy. The enemy that night, we perceived, gathered towards the hills, labouring to make a perfect interposition between us and Berwick. And having in this posture a great advantage, through his better knowledge of the country he effected it, by sending a considerable party to the strait pass at Coperspath [Cockburnspath], where ten men to hinder, are better than forty to make their way. And truly this was an exigent to us, wherewith the enemy reproached us ; as with that condition the Parliament’s army was in, when it made its hard conditions with the King in Cornwall. By some reports that have come to us, they had disposed of us, and of their business, in sufficient revenge and wrath towards our persons, and had swallowed up the poor interest of England, believing that their army and their king would have marched to London without any interruption ; it being told us, we know not how truly, by a prisoner we took the night before the fight, that their king was very suddenly to come amongst them, with those English they allowed to be about him. But in what they were thus lifted up, the Lord was above them.

‘The enemy lying in the posture before mentioned, having those advantages ; we lay very near him, being sensible of our disadvantages ; having some weakness of flesh, but yet consolation and support from the Lord Himself to our poor weak faith, wherein I believe not a

few amongst us stand : That because of their numbers, because of their advantages, because of their confidence, because of our weakness, because of our strait, we were in the Mount, and in the Mount the Lord would be seen ; and that He would find out a way of deliverance and salvation for us ; and indeed we had our consolations and our hopes.

‘Upon Monday evening—the enemy’s whole numbers were very great, as we heard, about 6000 horse and 16,000 foot at least ; ours drawn down, as to sound men, to about 7500 foot and 3500 horse,—upon Monday evening, the enemy drew down to the right wing about two-thirds of their left wing of horse. To the right wing ; shogging also their foot and train much to the right, causing their right wing of horse to edge down towards the sea. We could not well imagine but that the enemy intended to attempt upon us, or to place themselves in a more exact position of interposition. The Major-General and myself coming to the Earl Roxburgh’s house [Broxmouth], and observing this posture, I told him I thought it did give us an opportunity and advantage to attempt upon the enemy. To which he immediately replied, that he had thought to have said the same thing to me. So that it pleased the Lord to set this apprehension upon both of our hearts at the same instant. We called for Colonel Monk, and showed him the thing ; and coming to our quarters at night, and demonstrating our apprehensions to some of the colonels, they also cheerfully concurred.

‘We resolved, therefore, to put our business into this posture : That six regiments of horse and three regiments and a half of foot should march in the van ; and that the Major-General, the Lieutenant-General of the horse, and the Commissary-General, and Colonel Monk to command the brigade of foot, should lead on the business ; and that Colonel Pride’s brigade, Colonel Overton’s brigade, and the remaining two regiments of horse, should bring up the cannon and rear. The time of falling-on to be by break of day ; but, through some delays, it proved not to be so ; not till six o’clock in the morning.

‘The enemy’s word was *The Covenant*, which it had been for diver days. Ours, *The Lord of Hosts*. The Major-General, Lieutenant-General Fleetwood, and Commissary-General Whalley, and Colonel Twisleton, gave the onset ; the enemy being in a very good posture to receive them, having the advantage of their cannon and foot against our horse. Before our foot could come up, the enemy made a gallant resistance, and there was a very hot dispute at sword’s point between our horse and theirs. Our first foot, after they had discharged their duty, being overpowered with the enemy, received some repulse, which they soon recovered. For my own regiment, under the command of Lieutenant-Colonel Goffe, and my Major, White, did come seasonably in ; and, at the push of pike, did repel the stoutest regiment the enemy had there, merely with the courage the Lord was pleased to give. Which proved a great amazement to the residue of their foot ; this being the first action between the foot. The horse in the meantime did, with a great deal of courage and spirit, beat back all opposition, charging through the bodies of the enemy’s horse, and of their foot ; who were, after the first repulse given, made by the Lord of Hosts as stubble to their swords. Indeed, I believe I may speak it without partiality, both your chief commanders and others in their several places, and soldiers also, were acted [actuated] with as much courage as ever hath been seen in any action since this war. I know they look to be named ; and therefore I forbear particulars.

‘The best of the enemy’s horse being broken through and through in less than an hour’s dispute, their whole army being put into confusion, it became a total rout ; our men having the chase and execution of them near eight miles. We believe that upon the place and near about it were about three thousand slain. Prisoners taken : of their officers, you have this enclosed list ; of private soldiers, near 10,000. The whole baggage and train taken ; wherein was good store of match, powder, and bullet ;

all their artillery, great and small—thirty guns. We are confident they have left behind them not less than fifteen thousand arms. I have already brought in to me near two hundred colours, which I herewith send you. What officers of theirs of quality are killed, we yet cannot learn; but yet surely divers are; and many men of quality are mortally wounded, as Colonel Lumsden, the Lord Libberton, and others. And, that which is no small addition, I do not believe we have lost 20 men. Not one commissioned officer slain as I hear of, save one cornet, and Major Rooksby, since dead of his wounds; and not many mortally wounded. Colonel Whalley only cut in the hand-wrist, and his horse (twice shot) killed under him; but he well recovered another horse, and went on in the chase. Thus you have the prospect of one of the most signal mercies God hath done for England and His people, this war' (Carlyle's *Cromwell*,* part vi.).

The subsequent history of Dunbar presents nothing very memorable. At it Cope landed his troops from Aberdeen, 16 to 18 Sept. 1745—the week of the battle of Prestonpans. In 1779, Paul Jones's squadron hovered a brief space in front of the town, and, in 1781, Captain G. Fall, another American privateer, threatened a descent, but sheered off on perceiving preparations making for giving him a warm reception. By a strange coincidence the provost in the latter year was Robert Fall, member of a family that, from the middle of the 17th to the close of the 18th century, figures largely in the annals of Dunbar as one of the chief merchant houses in the kingdom. The Falls of Dunbar married into the Scottish baronetcy, and gave a Jacobite member to Parliament; yet Mr Simson adduces many reasons for believing that they came of the selfsame stock as the Gipsy Faas of Kirk-Yetholm—Faa being the form under which we first meet with the name at Dunbar, in the Rev. J. Blackadder's Memoir, under date 1669. When on 22 May 1787 Robert Burns arrived at 'this neat little town, riding like the devil, and accompanied by Miss —, mounted on an old carthorse, huge and lean as a house, herself as fine as hands could make her, in cream-coloured riding-clothes, hat and feather, etc.'—he 'dined with Provost Fall, an eminent merchant (Mrs F. a genius in painting).' Which is about the last that we hear of the Falls at Dunbar, where, in 1835, there was 'not even a stone to tell where they lie.' At York there are Falls at the present day, who likewise lay claim to Romani origin (Simson's *History of the Gipsies*, 2d ed., New York, 1878; and *Notes and Queries*, 1881).

The parish, containing also the villages of BELHAVEN and East and West BARNs, is bounded N and NE by the German Ocean, SE by Innerwick, S by Spott and Stenton, W by Prestonkirk, and NW by Whitekirk-Tynninghame. Its utmost length, from W by N to E by S, is $7\frac{1}{2}$ miles; its breadth, from N to S, varies between $2\frac{1}{2}$ furlongs and 3 miles; and its area is 8803 acres, of which 1284 $\frac{1}{2}$ are foreshore and 21 $\frac{1}{2}$ water. At the western boundary is the mouth of the river TYNE; Dry Burn winds $4\frac{1}{2}$ miles east-north-eastward to the sea along all the Innerwick border; and to the sea through the interior flow Spott Burn and Beil Water. The coast to the W, indented by Tynninghame and Belhaven Bays, presents a fine sandy beach; but eastward from the mouth of Beil Water is bold and rocky, 'niched and vandyked' with headlands of no great height, yet here and there jagged and savage in their way. The interior exhibits a pleasant diversity of hill and dale, rising gradually towards the Lammermuir Hills, and commanding a prospect of seaboard and ocean from St Abb's Head to the Bass and the hills of Fife. The highest points are BRUNT Hill (737 feet) and DOON Hill (582), these rising 3 and $2\frac{1}{2}$ miles SSE of the town, the latter on the boundary with Spott; since Dunbar

Common, $6\frac{1}{2}$ miles SSW of the town, though sometimes regarded as part of the parish, is really divided among Spott, Stenton, and Whittinghame. A part of the Lammermuirs, with drainage towards the Berwickshire Whitadder, it attains at Clints Dod a height of 1307 feet. The rocks of the parish exhibit interesting phases both of eruptive and of secondary formations. Coal occurs, but not of sufficient thickness to be worked; excellent grey limestone has long been quarried; and red sandstone, more or less compact, is plentiful. The soil is partly a fertile loam, partly clay, partly a light rich mould; and the entire area, with slight exception, is under tillage. Indeed the district around Dunbar is one of the richest and best cultivated in Scotland, and produces a much greater supply than is needed by the inhabitants. A rough tombstone, rudely inscribed with the name of Sir William Douglas, is in the vicinity of Broxmouth House; and in Broxmouth grounds is a small mound, crowned with a cedar of Lebanon, and known as Cromwell's Mount, since from it Cromwell beheld the descent of Leslie's army from Doon Hill. Three ancient chapels stood at the villages of Belton, Hedderwick, and Pinkerton; but both they and the villages have long been extinct. A monastery of Red or Trinity Friars was founded at the town, in 1218, by Patrick, fifth Earl of Dunbar, and has bequeathed to its site the name of Friar's Croft; and by Patrick, seventh Earl, a monastery of White or Carmelite Friars was founded in 1263 near the town, it is thought on ground where some Roman medals were exhumed at the forming of a reservoir. A *Maison Dieu*, of unknown date, stood at the head of High Street. Mansions are Broxmouth Park, Lochend House, Belton House, Hedderwick House, and Winterfield House. The seat of a presbytery in the synod of Lothian and Tweeddale, this parish is divided ecclesiastically into Dunbar proper and Belhaven, the former a living worth £497. Two schools under the landward board—East Barns and West Barns—with respective accommodation for 106 and 239 children, had (1891) an average attendance of 90 and 185, and grants of £76, 7s. 6d. and £171, 7s. Valuation (1891) £20,351. Pop. of civil parish (1801) 3951, (1821) 5272, an increase due to the cotton factory of Belhaven 1815-23; (1831) 4735, (1861) 4944, (1871) 4982, (1881) 5393, (1891) 5210; of ecclesiastical parish (1881) 4049, (1891) 4017.—*Ord. Sur.*, sh. 33, 1863.

The presbytery of DUNBAR comprises the old parishes of Cockburnspath, Dunbar, Innerwick, Oldhamstocks, Prestonkirk, Spott, Steuton, Whittinghame, and Whitekirk-Tynninghame, and the *quoad sacra* parish of Belhaven. Pop. (1871) 12,432, (1881) 12,663, (1891) 11,960, of whom 2821 were communicants of the Church of Scotland. See James Miller's *History of Dunbar* (1830; new ed. 1859), and J. M'Donald's *Guide* (1892).

Dunbarny, a parish of SE Perthshire, containing the post-office village of Bridge of EARN, with a station on the North British, $3\frac{3}{4}$ miles SSE of Perth, and also 1 mile S by W of the village of Kintillo. It is bounded N by Perth, NE by Rhynd, E by Abernethy, SE and S by Dron, and W and NW by Forgandenny. A narrow strip of Dunbarny parish separated the parish of Dron from its detached part. This strip (measuring from 1 to 4 furlongs across) the Boundary Commissioners in 1891 transferred to Dron parish, thus uniting its two parts. The river EARN, which issues from Loch Earn at St Fillans, winds $5\frac{1}{2}$ miles east-by-southward along the Forgandenny and Abernethy borders and through the interior between banks of singular beauty; and from its low-lying valley the surface rises northward to 725 feet on richly-wooded MONOREIFFE, southward to 800 on the western slopes of DRON Hill. Trap and Old Red sandstone are the prevailing rocks, and both have been largely quarried. Five mineral springs at PITCAITHLY enjoy a high medicinal repute, and attracted so many invalids and other visitors, as to occasion the erection of Bridge of Earn village, and of hotels both there and at Pitcaithly. The soil of the arable lands is variously till, clay, loam, and alluvium, and has been highly improved. Illustrious natives or residents were Robert Craigie (1685-1760),

* John Aubrey, in his *Miscellanies* (1696), records a circumstance unnoticed by Carlyle. 'One that I knew,' he says, 'that was at the Battle of Dunbar, told me that Oliver was carried on with a Divine Impulse; he did laugh so excessively as if he had been drunk; his Eyes sparkled with Spirits. He obtained a great Victory; but the Action was said to be contrary to Human Prudence.'

Lord President of the Court of Session; Robert Craigie, Lord Craigie (1754-1834), also an eminent judge; Sir Francis Grant (1803-78), president of the Royal Academy; and his brother, General Sir James Hope Grant, G.C.B. (1808-75). Mansions are BALLENDRICK, KILGRASTON, MONCREIFFE, Dunbarny, and Piteathly, the last two being 2 miles W by N, and 3 miles SW of Bridge of Earn. Dunbarny is in the presbytery of Perth and synod of Perth and Stirling; the living is worth £253. The ancient church stood at the extinct village of Dunbarny, close to Dunbarny House; its successor was built near Bridge of Earn in 1634; and a few yards E of the site of this is the present church (1787; 650 sittings). Chapels subordinate to the ancient church stood at Moncreiffe and at Kirkpottie in Dron; and that at Moncreiffe continues to be the burying-place of the Moncreiffe family. There is also a Free church; and a public school, erected in 1873, with accommodation for 186 children, had (1891) an average attendance of 165, and a grant of £159, 10s. 6d. Valuation (1882) £8429, 12s. 7d., (1891) £7223, 15s. 6d. Pop. (1831) 756, (1891) 829.—*Ord. Sur.*, sh. 48, 1868.

Dunbarrow, a former detached section of Dunnichen parish, Forfarshire, bounded on the SE by Carmyllie, and on all other sides by Kirkden, to which parish it was transferred in 1891 by Order of the Boundary Commissioners. With utmost length and breadth of $1\frac{3}{4}$ and 1 mile, it rises in all directions to a hill-summit (500 feet) of its own name, on which are some vestiges of an ancient fort.

Dunbarton. See DUMBARTON.

Dunbeath, a village, a bay, and a stream of Latheron parish, Caithness. The village stands on the left bank of Dunbeath Water, $\frac{1}{2}$ mile above its mouth, 6 miles NNE of Berriedale, and $2\frac{1}{2}$ SW of Wick, under which it has a post office, with money order, savings bank, and telegraph departments. An ancient place, the kirk-town once of a parish of its own name, it has a Free church, an inn, and a public and a female school; and fairs are held at it on the third Tuesday of August and November. Dunbeath Castle, crowning a peninsulated sea-cliff, 1 mile S of the village, is partly a fine modern mansion, partly an ancient baronial fortalice, which, in April 1650, was captured and garrisoned by General Hurry for the Marquis of Montrose. The bay is small, and has no capacity for shipping, but possesses value for its salmon fisheries, and as an excellent station for herring-fishing. Efforts are being (1893) made to have a pier and breakwater erected here. Dunbeath Water, issuing from little Loch Braigh na h-Aibhne (980 feet), runs $1\frac{1}{2}$ miles north-eastward and east-south-eastward along a picturesque strath, and falls into the northern curve of the bay.—*Ord. Sur.*, shs. 110, 109, 1877-78.

Dun-Bhail-an-Rìgh. See BEREGONUM.

Dunblane (Gael. 'hill of Blanc'), a town and a parish of Strathallan, S Perthshire. The town stands 200 feet above sea-level, on the left bank of Allan Water, which here is spanned by a one-arch bridge, built early in the 15th century by Bishop Finlay Dermoch, and widened in 1849; its station on the Scottish Central section of the Caledonian, at the junction of the Callander line, is 11 miles ESE of Callander, 28 SW of Perth, 5 N by W of Stirling, $4\frac{1}{4}$ WNW of Edinburgh, and $3\frac{1}{2}$ NE of Glasgow. An ancient place, it was burned under Kenneth mac Alpin (844-60) by Britons of Strathclyde, and in 912 was ravaged by Danish pirates, headed by Regnwald. But its church dates back to even remoter times, to the 7th century, and seems to have been an offshoot of Kingarth in Bute, for its founder was St Blane, of the race of the Irish Piets, and bishop of that church of Kingarth which Cathan his uncle had founded. The bishopric of Dunblane was one of the latest established by David I., in 1150 or somewhat earlier; among its bishops was Maurice, who, as Bruce's chaplain and abbot of Inchaffray, had blessed the Scotch host at Bannockburn. Long after, in post-Reformation days, the saintly Robert Leighton (1613-84) chose it as the poorest and smallest of Scotland's sees, and held it for nine years till his translation in 1670 to the archbishopric of Glas-

gow. In him Dunblane's chief interest is centred; and his memory lives in the Leightonian Library, the Bishop's Well, and the Bishop's Walk, a pleasant path leading southward not far from the river, and overshadowed by venerable beech trees. Then, too, there is Tannahill's song, *Jessie, the Flower o' Dumblane*, recalled when the sun goes down behind Beu Lomond; or one may remember that Prince Charles Edward held a levee in Balhaldie House, now an old ruinous mansion, on 11 Sept. 1745, and that the Queen drove through Dunblane on 13 Sept. 1844. The title of Viscount Dunblane in the peerage of Scotland, conferred in 1675 on Peregrine Osborne, who in 1712 succeeded his father as Duke of Leeds, is now borne by his sixth descendant, George-Godolphin Osborne, ninth Duke of Leeds and eighth Viscount Dunblane (b. 1823; suc. 1872).

The town itself, though ranking as a city, is townlike in neither aspect nor extent. Richard Franck, indeed, who travelled in Scotland about the year 1658, calls it 'dirty Dunblane,' and adds, 'Let us pass by it, and not cumber our discourse with so inconsiderable a corporation.' But to-day the worst charges to be brought against Dunblane are that its streets are narrow, its houses old-fashioned—light enough charges, too, when counterweighed by charming surroundings, a well-known hydropathic establishment, a good many handsome villas, and various public edifices of more or less redeeming character. Foremost, of course, comes the prison, which, erected in 1842 on the site of Strathallan Castle, had its front part converted in 1882 into commodious police barracks, whilst a new wing to the rear contains cells for prisoners whose term does not exceed a fortnight. The neighbouring courthouse was built in 1869, with aid of £3973 from Government. The Leightonian Library is also modern, a small house, the marble tablet on whose front bears the Bishop's arms and the inscription 'Bibliotheca Leightoniana;' it contains his bequest of 1400 volumes for the use of the clergy of the diocese, a number since considerably added to, and serves now as a public reading-room. On a rising knoll beyond the cathedral is a mineral spring, which, according to analysis made in 1873, contains 19·200 grains of common salt to 14·400 of muriate of lime, 2·300 of sulphate of lime, 4·00 of carbonate of lime, and 1·36 of oxide of iron. This spring having been acquired by a limited company, a fine hydropathic establishment, capable of accommodating 200 visitors, was built (1875-76), at a cost of £60,000, on grounds 18 acres in extent. It commands a magnificent prospect of the Grampanians, and, designed by Messrs Peddie & Kiunear, is English in style, with central clock-tower, projecting wings, a recreation room 40 yards long, billiard room, etc. The town has, besides, one or two hotels, a post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland and the Union Bank, a local savings bank, insurance agencies, gas-work, a public reading and amusement room, 2 curling clubs, a volunteer corps, a bowling green, and an agricultural society. A neat and tasteful town-hall was erected in 1887. There is also a handsome masonic hall (1886), with two stained-glass windows, one of which is in memory of the late John Stirling, Esq. of Kippendavie. Haulloom weaving is almost wholly extinct, but employment is given to a number of the townsfolk by the wool and worsted mills of Keir and Springbank.

Of Dunblane Cathedral Archbishop Laud remarked in 1633 that 'this was a goodly church before the Deformation.' In October 1892 was laid the memorial stone of its restoration, a work that occupied three years and cost £26,000, the outcome entirely of private liberality. The aisled eight-bayed nave (130 by 58 feet, and 50 high), which stood roofless for 300 years, is now a handsome building, lighted and heated in the most modern style. Besides the nave the cathedral consists of a square tower, and an aisleless choir (80 by 30 feet), with a chapter-house, sacristy, or lady-chapel to the N. The four lower stages of the tower, which stands awkwardly into the S aisle of the nave, are all that remains of King David's Norman cathedral, and exhibit a shafted N doorway, a SW stair-

case, and a rib-vaulted basement story; to them two more have been added, of Second Pointed date, ending in a parapet and a low wooden spire, the height to whose top is 128 feet. The nave is almost entirely pure First Pointed, the work apparently of Bishop Clement (1233-58), who at Rome in person represented to the Pope that, the Columban monastery having fallen into lay hands,* the church had remained for nearly ten years without a chief pastor; that he, when appointed, found the church so desolate that he had no cathedral wherein to lay his head; and that in this unroofed church the divine offices were celebrated by a single rural chaplain. In the clerestory the windows are of two lights, with a foiled circle set over them, very plainly treated outside, but highly elaborated by a range of shafted arches running continuously in front of the windows within, so much apart from them as to leave a narrow passage round the building in the thickness of the wall. The E window is rather an unusual variety of triplicate form for a large building, the central light being much taller and wider than that on each side of it. In the W front the arrangement is peculiarly fine. Over the doorway and its blind arch on either side are three very long and very narrow two-light windows of equal height, with a cinquefoil in the head of the central window, and a quatrefoil in the head of the side windows; whilst above is a vesica, set within a bevilled fringe of bay-leaves arranged zigzagwise with their points in contact. It was of this W front that Mr Ruskin thus spoke to an Edinburgh audience:—“Do you recollect the W window of your own Dunblane Abbey? It is acknowledged to be beautiful by the most careless observer. And why beautiful? Simply because in its great contours it has the form of a forest leaf, and because in its decoration it has used nothing but forest leaves. He was no common man who designed that cathedral of Dunblane. I know nothing so perfect in its simplicity, and so beautiful, so far as it reaches, in all the Gothic with which I am acquainted. And just in proportion to his power of mind, that man was content to work under Nature’s teaching; and, instead of putting a merely formal dog-tooth, as everybody else did at the time, he went down to the woody bank of the sweet river beneath the rocks on which he was building, and he took up a few of the fallen leaves that lay by it, and he set them in his arch, side by side for ever.” The choir, which since the Reformation has served as the parish church, retained very few of its pristine features, when in 1872-73 it was restored and reseated, at a cost of £2000, by the late Sir G. G. Scott. The eighteen oaken stalls, of 16th century workmanship, with misereres and ogee-headed canopies, were ranged N and S of the site of the high altar; a fine organ was erected; and two stained-glass windows were inserted by the late Sir William Stirling-Maxwell of Keir, whose skilful eye watched over the whole work of restoration. In the course of it a sculptured stone was discovered, which, measuring 6 by 2 feet, bears figures of a finely carved cross, a man on horseback, a dog or pig, etc.; among other interesting monuments are effigies of Bishop Finlay Dermoch, Bishop Michael Ochiltree, Malise Earl of Strathearn, and his Countess; but during the unfortunate repairs of 1817 the plain blue marble slabs were removed that marked the graves of James IV.’s spouse (not queen), fair Margaret Drummond and her two sisters, who all were poisoned at Drummond Castle in 1502. The bishop’s palace, overlooking the Allan, to the SW of the cathedral, has left some vestiges; but nothing remains of the deanery or of the manses of abbot, treasurer, prebends, and archdeacon. The Free church was built in 1854, the U.P. church in 1835 (improved and reseated 1886), St Mary’s Episcopal church in 1844, which, Early English in style, consists of a nave with S porch and structural sacristy, and the R.C. church of St John and St Blane in 1883.

A burgh of barony, with the Earl of Kinnoull for superior, and also a police burgh, the town is now governed by a provost, 2 magistrates, and 6 police com-

* Skene overthrows the commonly-received belief that Dunblane was ever a seat of Culdees (*Celt. Scot.* ii. 403).

missioners. A plentiful supply of water, drawn from reservoirs in the Sheriffmuir, was introduced in 1879, and in 1892 an extensive drainage scheme was initiated. Pop. (1871) 1921, (1881) 2186, (1891) 2186.

The parish, containing also the village and station of Kinbuck, 2½ miles NNE of Dunblane, is bounded NE by Ardoch, E by Blackford and Alva, SE by Logie, S and SW by Lecropt, W by Kilmadock, and N by Muthill. Its length, from NNW to SSE, is 7½ miles; its width varies between 1 and 6½ miles; and its area is 18,636½ acres, of which 93½ are water. ALLAN Water winds 8½ miles south-south-westward, partly along the Ardoch boundary, but mainly through the interior; and Wharry Burn, its affluent, runs 5½ miles west-south-westward, chiefly along the south-eastern border; whilst Ardoch Burn meanders 5½ miles south-south-eastward and southward through the western interior on its way to the Teith. The surface declines along the Allan, in the furthest S of the parish, to close on 100 feet above sea-level, thence rising north-eastward to 878 feet beyond Linns, 1500 at Glentye Hill, 2072 at *Blairdenon Hill, 1955 at *Mickle Corum, and 1683 at *Little Corum—north-north-westward to 370 near Hillside, 509 near Blarlean, 617 at Upper Glastyry, 902 near Cromlix Cottage, and 1653 at *Slymaback, where asterisks mark those summits that culminate on the confines of the parish. So that Dunblane comprises the principal part of Strathallan, with a skirting of the Ochils on the E, of the Braes of Doune on the W, and exhibits, especially along the banks of its clear-flowing river, a series of charming landscapes. The district to the N of the town is mostly bleak and dreary, that towards the NW consists in large measure of moors and swamps, and that towards the E includes part of SHERIFFMUIR, and elsewhere is occupied by heathy heights; but to the S of the town is all an assemblage of cornfields, parks, and meadows, of wooded dells, and gentle rising-grounds. The climate of the strath, in consequence partly of immediate shelter from the winds, partly of the strath’s position in the centre of Scotland, at nearly equal distance from the German and Atlantic Oceans and from the Moray and Solway Firths, is singularly mild and healthy, free alike from biting E winds and from the rain-dropping mists of the W. Eruptive rocks prevail throughout the hills, and Red sandstone underlies all the arable land, whose soil varies from gravel to reddish clay. James Finlayson, D.D. (1758-1808), the eminent divine, was born at Nether Cambushinnie farm—now in Ardoch parish, but then in that of Dunblane,—and went to school at the town. The KEIR estate extends into this parish, mansions in which are Kippenross, KIRPENDAVIE, Whitecross, Duthiestone, KILBRYDE Castle, and CROMLIX Cottage. Previous to 1618 Kilbryde formed a separate parish but was united to Dunblane. Kilbryde chapel is situated on the road to Kilbryde Castle. Dunblane is the seat of a presbytery in the synod of Perth and Stirling; the living is worth £378. Dunblane public, Kinbuck public, and Dunblane Episcopal schools, with respective accommodation for 356, 97, and 61 children, had (1891) an average attendance of 237, 92, and 62, and grants of £208, 13s. 4d., £82, 11s., and £67, 3s. Valuation (1882) £27,687, 4s. 11d., (1891) £25,672, 1s. 7d. Pop. (1801) 2619, (1831) 3228, (1861) 2528, (1871) 2765, (1881) 3122, (1891) 3220.—*Ord. Surv.*, sh. 39, 1869.

The presbytery of Dunblane comprises the ancient parishes of Aberfoyle, Balquhiddier, Callander, Dunblane, Kilmadock, Kincardine, Kippen, Lecropt, Logie, Port of Monteith, Tillicoultry, and Tulliallan, and the *quoad sacra* parishes of Bridge of Allan, Buckleyvie, Gartmore, Norriston, and Trossachs, with the chapelries of Kinlochard, Strathyre, and Menstrie. Pop. (1881) 26,501, (1891) 28,049, of whom 5825 were communicants of the Church of Scotland.—The Free Church also has a presbytery of Dunblane, with churches at Balquhiddier, Bridge of Allan, Buckleyvie, Callander, Dunblane, Gartmore, Kilmadock, Kippen, Norriston, and Tillicoultry, which together had 2374 communicants in 1891.

See vol. ii. of Billings' *Baronial and Ecclesiastical Antiquities* (1852); T. S. Muir's *Characteristics of Old Church Architecture* (1861).

Dunblane, Doune, and Callander Railway. See CALEDONIAN RAILWAY.

Dunbog, a parish of NW Fife, whose church stands 3½ miles E by S of the station and post-town Newburgh. The Denmuir detached portion of the parish of Abdie, containing 1089 acres, was in 1891 transferred by the Boundary Commissioners to the parish of Dunbog. Bounded NW by the Firth of Tay, NE by Flisk and Creich, SE by Monimail, and SW by Abdie, the parish has now an area of 3485½ acres, of which 1½ are 'inks' and 70½ foreshore. From a shore-line, 7½ furlongs in extent, the surface rises rapidly to 400 feet at Higham and 707 on Dunbog Hill, the former of which eminences is cultivated to the top, and commands a superb view of the basin and screens of the Tay, of lower Strathearn, and of the frontier Grampians, whilst the southern is uncultivated and almost barren. The valley between contains the hamlet and the church, and is traversed by the road from Newburgh to Cupar. The rocks are mainly eruptive; and the soil in a few fields is argillaceous, but mostly is a shallow rich black mould, resting on either rock or gravel. About 1820 acres are arable, and 30 or so are under wood. Dunbog House, belonging to the Marquis of Zetland, occupies the site of a preceptory of the monks of Balmerino; and is alleged, but not on good authority, to have been built by Cardinal Bethune. COLLAIRNEY Castle is a ruin. In the presbytery of Cupar and synod of Fife, Dunbog includes, *quoad sacra*, portions of Abdie and Flisk; the living is worth £264. The church was rebuilt in 1887-88; and a public school, with accommodation for 120 children, had (1891) an average attendance of 82, and a grant of £88, 5s. Valuation (1891) £3688. Pop. of civil parish (1831) 197, (1861) 207, (1871) 220, (1881) 219, (1891) 290; of *q. s.* parish (1871) 395, (1881) 386, (1891) 346.—*Ord. Sur.*, sh. 48, 1868.

Dunborerraig, an inland hill in Killarrow parish, Islay island, Argyllshire. A ruined ancient fortalice is on it; has walls 12 feet thick, with a gallery running through them; measures 52 feet in diameter within the walls; and is thought to have been built by the Scandinavians, and used by the Macdonalds.

Dun, Bridge of. See DUN, Forfarshire.

Dunbuck. See DUMBUCK.

Dunbuy, an insulated rock in Cruden parish, Aberdeenshire, ½ mile S by W of the Bullers of Buchan. Pierced by a magnificent natural arch, it is thought to be the prototype of the Scraith Rock in Shirley's *Campaign at Home*, and is mentioned by Sir Walter Scott in his *Antiquary*; whilst Dr Johnson described it as 'a double protuberance of stone, open to the main sea on one side, and parted from the land by a very narrow channel on the other.' Its name (*dun-buidhe*) signifies the 'yellow rock,' and alludes to its being covered with guano from innumerable sea-fowl.

Duncanlaw, an ancient chapelry in the E of Yester parish, Haddingtonshire. Its chapel was endowed by Robert III., but is now quite extinct.

Duncansbay Head, a promontory in Canisbay parish, Caithness, forming the north-eastern extremity of the Scottish mainland, 1½ mile E of John o' Groat's House, and 18½ miles N by E of Wick. Rising almost sheer from the sea to a height of 210 feet, it is clothed to the very brink of the precipice with a mixture of green-sward and stunted heath, and bears remains of an ancient watch-tower on its highest point, which commands a magnificent view of the Pentland Firth and the Orkneys, and over the Moray Firth, away to the seaboard and hills of Elgin, Banff, and Aberdeen shires. In its northern front, near the top of the precipice, is a vast cavern, called the Glupe; and elsewhere its seawall-haunted cliffs are gashed with deep wide fissures, one of them spanned by a natural bridge. The Stacks of Duncansbay, two rocky islets ¾ mile SSW of the promontory, are stupendous pyramidal masses of naked sandstone, that lift their fantastic summits far into the air and look

like huge pinnacles of some old Gothic pile.—*Ord. Sur.*, sh. 116, 1878.

Duncansburgh, a *quoad sacra* parish formed in 1860 out of the Inverness-shire portion of Kilmallie parish, and including the post-town Fort William. It is in the presbytery of Abertarff and synod of Argyll; the stipend is £200. A new parish church and manse were built at Fort William in 1881 at a cost of £5000.

Duncan's Height, a tumulus 36 feet high in St Andrews parish, Orkney, on the isthmus at the southern extremity of the parish.

Duncan's Hill, a round mound in the N of Caputh parish, Perthshire, a little SW of Glenbirnam House, in the southern vicinity of Dunkeld. It has traces of a rude ancient fortification, and is popularly said to have been the seat of King Duncan's court.

Duncharloway, a ruined circular fortification in Lochs parish, Lewis, Ross-shire, on the southern shore of Loch Carloway.

Dunchiſie, a ruined, ancient, strong fortification near the middle of Gigha island, Argyllshire.

Duncomb, a conical hill on the N border of Old Kilpatrick parish, Dumbartonshire, 3¼ miles NNW of Duntocher. It has an altitude of 1313 feet above sea-level; and it commands, through openings among neighbouring hills, a magnificent prospect to the S, to the E, and to the W.

Duncow, a village, a burn, and a barony of Kirkmahoe parish, Nithsdale, Dumfriesshire. The village, on the burn's left bank, 5 miles N by W of Dumfries, took its name from a round hill or 'dun' adjacent to it, and retained down to 1804 a large stone marking the site of the cottage in which James V. is said to have passed the night preceding his visit to AMISFIELD. It now has a post office under Dumfries, a public school, and a parochial library. The burn, rising within the S border of Closeburn parish, runs 8 miles south-by-eastward through Kirkmahoe parish, and falls into the Nith 3 miles N by W of Dumfries. The barony, mainly consisting of the burn's basin, belonged to the Comyns, the ancient competitors for the Scottish crown. Forfeited by them, along with the neighbouring barony of Dalswinton, and given to the Boyds, at the accession of Robert Bruce, it afterwards passed to the Maxwells, Earls of Nithsdale, and about 1796 was sold in sections to various purchasers.—*Ord. Sur.*, sh. 9, 1863.

Duncraggan, a quondam hamlet in Callander parish, Perthshire, between Lochs Achray and Venachar, adjacent to the charred remains of the New Trossachs Hotel. It was the first stage of the fiery cross, as described in the *Lady of the Lake*—

'Duncraggan's huts appear at last,
And peep, like moss-grown rocks, half-seen,
Half-hidden in the copse so green.'

Duncreich. See CREICH, Sutherland.

Duncrevie, a village in Arngask parish, Perthshire, 3½ miles NNE of Milnathort.

Dunclub, an estate, with a mansion, in Dunning parish, SE Perthshire, 1 mile WNW of Dunning town. Granted to John de Rollo in 1380 by David, Earl of Strathearn, and erected in 1511 into a free barony, it now is held by John Rogerson Rollo, tenth Baron Rollo of Dunclub in the peerage of Scotland since 1651, and first Baron Dunning of Dunning and Pitcairns in that of the United Kingdom since 1869 (b. 1835; suc. 1852). See DUMCREEFF.

Duncryne, an abrupt, conical, and finely-wooded hill in the centre of Kilmarnock parish, Dumbartonshire, 4 miles NE of Balloch pier. Resting on a basis of about 2 acres, and rising 462 feet above sea-level, it consists of trap rock disintegrated on the surface by subaerial denudation. Its summit is gained by a winding pathway, and commands a splendid view of Strathendrick, the Vale of Leven, and the hill-screens of Loch Lomond.

Dundaff, a waterfall on the mutual boundary of Lanark and Lesmahagow parishes, Lanarkshire, on the river Clyde, 2½ furlongs below Corra Linn. Near it is the rock known as 'Wallace's Chair.' It has a descent of not more than 10 feet, but presents a pretty miniature

of the greater falls in its vicinity, and is well seen from a spot near New Lanark village.

Dundaff, a range of hills in the W of St Ninians parish, Stirlingshire. Forming the north-easterly section of the Lennox Hills, it is divided on the S from the Kilsyth Hills by Carron Water, on the W from the Fintry and the Gargunnoch Hills partly by Endrick Water, partly by a line of watershed; and, extending about 5½ miles from N to S, and 4 miles from W to E, it commences in Dundaff proper (1157 feet), flanking the Carron 7 miles SW by S of Stirling, and terminates in Scout Head (709), near the Forth, 4 miles W by S of Stirling. Between these rise Drummarnock (909), Cairnoch (1354), Hart Hill (1428), and Earls Hill (1443), with several other summits of similar altitudes. The Dundaff range resembles the other sections of the Lennox Hills in geognostic formation, but differs from them in being less verdant or more heathy; it belonged formerly to the Grahams, ancestors of the Duke of Montrose, and gives to the Duke, in the peerage of Scotland, the title of Viscount Dundaff.—*Ord. Sur.*, shs. 31, 39, 1867-69.

Dundalav, a conical, steep, rocky hill in Laggan parish, Inverness-shire, near the right bank of the Spey, 2¾ miles WSW of Laggan Bridge, and 13 WSW of Kingussie. Its small tabular summit, rising 600 feet above the circumjacent ground, commands a very extensive prospect of the upper part of Badenoch, and is crowned with remains of one of the most remarkable ancient Caledonian forts in Scotland, formed of walls from 5 to 25 feet thick, and measuring interiorly 420 feet in length, and from 75 to 205 in width. The hill has two projections or sub-summits on its sides, and seems to have thence got its name—Gael. *dun-da-laimh*, 'fort of the two hands.'

Dundarave (Gael. *dun-da-rainh*, 'castle of the two oars'), a strong old turret tower in Kilmorich parish, Argyllshire, occupying a low site on the shore of Loch Fyne, 4½ miles ENE of Inverary. A principal seat of the Macnaughtons, it bears their motto 'I hoip in God,' with the date 1596, and still continues in good preservation.

Dundardil, an ancient fort in Dores parish, Inverness-shire, supposed to have been one of a chain of forts or signal stations extending along all the Great Glen from Inverness to Fort William.

Dundargue, an ancient baronial fortalice on the coast of Aberdour parish, N Aberdeenshire, 3½ miles WSW of Rosehearty. Crowning a sandstone peninsula 65 feet high, it was built by the Englishman, Henry de Beaumont, fifth Earl of Buchan by right of his wife. From him it was captured by the regent, Sir Andrew Moray, in 1333; and now it is represented by mere vestiges.

Dundas Castle, a mansion in Dalmeny parish, Linlithgowshire, on the north-eastern extremity of a low basaltic ridge called Dundas Hill, 1¾ mile SSW of Queensferry. The estate was held by a family of its own name from 1124 or thereabouts till 1875, when it was purchased by the trustees of the late James Russel, Esq., to whose son, of the same name, it now belongs. The castle, partly of high antiquity, was partly rebuilt by the late James Dundas, Esq. of Dundas (1793-1881); and, with its thick walls and its vaulted chambers, is one of the finest and best-preserved baronial fortalices in Scotland. It sustained a siege in 1449, and on 24 July 1651 received a visit from Oliver Cromwell. Dundas Hill, extending ¾ mile from SE to NW, presents to the SW a precipitous columnar front about 70 feet high, attains an elevation of 350 feet above sea-level, and terminates abruptly in a bold wooded bluff.

Dun-Daviot. See **DAVIOT**, Inverness-shire.

Dundee, a city and a parish, or group of parishes, on the southern border of Forfarshire. The city stands chiefly in its own parish, but partly also in the parish of Liff and Benvie. It is a royal burgh, a great seat of manufacture, an extensive seaport, the largest seat of population in Scotland next to Glasgow and Edinburgh, and quite rivals these cities and the most prosperous of the other Scottish towns in modern rapidity of ex-

ension. It occupies a reach of flats and slopes on the N side of the Firth of Tay, 3½ miles W of Broughty Ferry, 9 W of Buddon Ness, 14 S by W of Forfar, 21¾ ENE of Perth, 59¼ (*vid* Tay and Forth Bridges) N by E of Edinburgh, and 84 NE of Glasgow. The

Seal of Dundee.

ground beneath and around it rises rapidly from a belt of plain, through undulating braes, to rounded hills, and culminates directly N of the town, about 1½ mile from the shore, in the summit of Dundee Law. The edificed area, seen in profile, is picturesque; the outskirts are well embellished with wood and culture; Dundee Law, rising to an altitude of 572 feet above sea-level, has a fine, verdant, dome-shaped summit; Balgay Hill, a lesser eminence a little further W, is covered with wood; and the entire town and environs, beheld in one view from Broughty Ferry Road, or from the S side of the Tay, look richly beautiful. 'Bonnie Dundee,' a designation originally given to the notorious Graham of Claverhouse, recognising his outward or physical comeliness, and ignoring his inward or moral character, applies in a somewhat analogous way to the town, whence he took his title of Viscount, recognising it truly as most attractive in its exterior, but overlooking some of its interior features. The site, having at once amenity and salubrity, is singularly advantageous for commerce; but for purposes of military defence it is utterly untenable, being thoroughly commanded by the neighbouring heights, and for the uses of facile thoroughfare, social convenience, and sanitary law, it has not, as we shall see, been judiciously aligned.

The ancient burgh stood on low flat ground along the shore, only ¼ mile long, between Tods Burn and Wallace Burn; and comprised only two principal streets, Seagate, next the Tay, and Cowgate, somewhat parallel on the N. The modern burgh as far exceeds the ancient one as a great town exceeds a mere village. In one great line of street, somewhat sinuous, but mostly not much off the straight line, it stretches from W to E, near and along the shore, under the name of Perth Road, Nethergate, High Street, Seagate, and Crofts, about 2 miles. In another great line, first north-westward, next northward, and again north-westward, it stretches from the shore, through Castle Street, Murraygate, Wellgate, and Bonnet Hill, about a mile; and even there struggles onward through distinct beginnings of further extension. A third line of street, commencing on the W at the same point as Perth Road, but diverging till nearly ¼ mile distant, and called over this space Hawkhill; then, under the name of Overgate, converging toward it till both merge into High Street; then, at the latter street diverging northward through that part of the second line which consists of Murraygate, and at the end of that street debouching eastward under the name

of Cowgate, nearly parallel to Seagate, extends about $1\frac{1}{2}$ mile. But while thus covering an extensive area, the town possesses little regularity of plan. Excepting numerous new streets, generally short ones, on the N, and a number of brief communications between the two great lines along the low ground, not even the trivial grace of straightness of thoroughfare is displayed. Most of the old streets, too, are of varying width, and many of the alleys are very narrow. Yet, by its public buildings, by its latest extensions, by its crowded harbour, by its great and numerous factories, by its many parks and recreation grounds, and by, here and there, a dash of the picturesque, the town offers large compensation for what it wants in the neat forms and elegant attractions of simple beauty.

High Street was anciently called Market Gate, from connection with the public markets; was at one time popularly called the Cross, from its having contained for a long period subsequent to 1586 the old town cross; forms an oblong square or rectangle, 360 feet long and 100 broad; is mostly edified with modern, substantial four-story houses, with shops on the ground floor; and presents a bustling, mercantile, and grandiose appearance similar to that of Trongate or Argyll Street of Glasgow. Seagate was once the fashionable quarter of the burgh, the abode of the Guthries, the Afflecks, the Brightons, the Burnsides, and other principal families; is a long, sinuous, and very narrow thoroughfare, quite denuded of its ancient splendour; has, within the last few years, undergone considerable improvement; is prolonged eastward, through Crofts and Carolina Port, with continuity with Broughty Ferry Road; and communicates laterally, through Queen Street, St Roque's Lane, and Sugarhouse Wynd, with Cowgate. Murraygate, which is now comparatively wide and well built, branches, its N end, into Cowgate, Wellgate, and Panmure Street. Cowgate inclines eastward, and terminates a few yards beyond in an interesting ancient gateway, known as Cowgate Port. King Street subdivides and contracts Cowgate; is, for the most part, well built; possesses, at its commencement, several elegant private residences and handsome shops; runs north-eastward to Wallace Burn; and merges there in the Arbroath road, leading to the Baxter Park and the Eastern Necropolis. Wellgate rises gently from Murraygate; goes northward to Lady Well, giving name to it; and leads to Victoria Road, Hilltown, Maxwellton, Smithfield, and other suburbs. Victoria Road (formerly Bucklemaker Wynd) goes laterally from the top of Wellgate to Wallace Burn, and is flanked on the N by an extensive rising-ground called Forebank. Hilltown (formerly Bonnet Hill) goes on a line with Wellgate; climbs a steep ascent, and so is called Hilltown; took its name of Bonnet Hill from once being the abode of bonnet-makers; is now a seat of various extensive manufactures; consists generally of ill-built houses, confusedly interspersed with jute factories, and presents a motely and grotesque appearance. Maxwellton occupies grounds between Bonnet Hill and Hillbank, northward of Forebank, and is a suburb of recent origin; and Hillbank, situated on the villa grounds, is a still newer suburb. Panmure Street, the third street striking from the N end of Murraygate, possesses some of the best specimens of the town's street architecture.

Castle Street goes from High Street, at right angles with the commencement of Seagate; leads down to the harbour and docks; is well edified; and breaks at its foot into a fine open space, recently much improved by the removal of the fishmarket. Crichton Street goes from the SW corner of High Street; runs parallel with Castle Street; and leads down to the greenmarket, and on to Earl Grey's Dock. Dock Street runs E and W along the harbour; is a spacious, well-built, and busy thoroughfare; and has at its E end the custom-house and the Arbroath railway station. Under the Improvement Act of 1871 an enlargement and extension of Commercial Street, from Albert Square to Dock Street, was carried out, and this is now one of the handsomest and most architectural streets in the town. Reform Street strikes from High Street in a direction

the reverse of Castle Street and Crichton Street; was erected after designs by Mr Burn, of Edinburgh, as one of the finest streets in the town; and both as to the style of its buildings and as to the splendour of its shops, rivals some of the best parts of Edinburgh. Bank Street goes from nearly the middle of Reform Street; was opened shortly before 1870; and takes its name from the office of the Bank of Scotland, occupying its eastern corner. Albert Square opens from the northern extremity of Reform Street; it surrounds a space formerly occupied by unsightly tenements and time-worn erections; was formed by clearances of these about the year 1864; contains the Albert Institute, the Free Library and Museum, and the Burns, Kinloch, and Carmichael monuments; adjoins a number of splendid public edifices; and is as handsome a central place as any provincial town can boast. Ward Road goes westward from Albert Square; Constitution Road strikes northward from nearly the middle of Ward Road; Bell Street intersects Constitution Road; Parker Square, named after the late Provost Parker, lies westward from Bell Street; and Dudhope Road, communicating with the north-eastern suburbs, leads westward to the Infirmary, the Dudhope Park, the Law, and the open country beyond. The Pleasance also lies in the NW, and is supposed, from its name, to have been once a charming suburban quarter; but is now a dense assemblage of factories, and of undoubtedly wretched unwholesome dwellings.

Overgate, going westward from the NW corner of High Street, is one of the oldest thoroughfares of the town; possessed in former times town mansions of the Marquis of Argyll, the Earls of Angus, Viscount Dundee, Stirling of East Baillie, and other magnates; was originally called Argyllgate from its connection with the family of Argyll; sends off various wynds or alleys to the right and the left; exhibits, together with these wynds, an utter recklessness of architectural taste or uniformity, feebly redeemed by the presence of many good houses; has a total length of more than $\frac{1}{2}$ mile; and terminates at the West Port, one of the most busy and stirring parts of the town. South Tay Street, forming the principal communication from Overgate to the lower part of the town, is handsomely edified, and possesses a beautiful square. Hawkhill, diverging in a line westward from the West Port, joins the Perth Road at Blacknessgate, and contains a number of large factories and Hawkhill Public School, while to keep pace with the growing requirements of free education another handsome school was erected in 1893 at the junction of Hawkhill and Pennycook Lane. Gowrie Place, at the W end of Hawkhill, is a large and splendid block of houses. Scouringburn, running north-westward from the West Port, contains extensive factories and a dense population, and joins the Lochee Road opposite Dudhope Free church. Lindsay Street, Barrack Street, and other modern thoroughfares northward from Overgate and Scouringburn present good lines of new and pleasingly constructed buildings. Nethergate, going westward from the SW corner of High Street, is prolonged to the western outskirts by Perth Road; forms, jointly with Perth Road, a continuous reach of about a mile in length; is of very unequal breadth, and of somewhat unequal architecture, but averagely spacious and well edified; exhibits, in its middle and western portions, and in streets branching from it, as aristocratic an air as can comport with proximity to manufacturing and commercial stir; contains, in its Perth Road section, some handsome villas with flower-plots in front; and leads, through a forking continuation seaward, into the promenade of Magdalene Green. Union Street goes from Nethergate, opposite the town churches, southwards towards the West and Tay Bridge stations, the esplanade, the Tay ferries, and the harbour; was formed in 1828 on clearances of many old, unsightly, time-worn houses; is a spacious and handsomely edified thoroughfare; and had its southern extremity greatly improved in 1882 by the removal of a block of old houses, the

abodes of the very lowest classes of inhabitants. Yeaman Shore and Exchange Street are well-built thoroughfares of comparatively modern construction adjoining the harbour. Several other streets, in addition to those we have named, contribute good features to the new parts of the town and to its outskirts.

Although rich in historical associations, few buildings now remain which are of much interest to the antiquary. The imperious demands of an ever-increasing population and of a constantly expanding trade, have led to the removal of numerous tenements of historic value, which for many centuries had withstood the destroying hand of Time. No fewer than 19 ancient churches or chapels, all now extinct, stood within the town or its suburbs; and in many instances were so prominent as to give their names, in some manner or other, to localities near or around them. St Paul's Church was the oldest, stood within Murraygate and Seagate, and gave the name of Paul's Close to an alley which was closed so late as about 1866. St Clement's Church occupied the site of the present Town-Hall in High Street; was a large, oblong structure, with a high steep roof, and with small circular turrets at the four corners; is seen towering above the surrounding buildings in Slezer's view of the town, published in 1696; and gave its name to St Clemeut's Lane, leading to the shore. St John's Church stood on a rock a short way E of Carolina Port, nearly $1\frac{1}{2}$ mile from High Street; was called originally Kilcraig, signifying 'the church upon the rock,' but called afterwards by the Roman Catholics the Church of the Holy Wood; and is commemorated in the name of an adjacent burying-ground, called Rood Yard. St Roque's Chapel stood outside of Cowgate Port, between Denbridge and the E end of Seagate, and is commemorated in the name of an alley running from Seagate to King Street, and called St Roque's Lane. St Salvator's Chapel stood on a rocky rising-ground N of High Street and Overgate, and is commemorated in the name of an adjacent close. Our Lady's Chapel stood at the foot of Hilltown, and is commemorated in the names of Ladywell and Ladywell Yard. St Nicholas' Chapel stood on a rock at the western part of the harbour, and gave to its site the name Nicholas Rock, afterwards changed into Chapel Craig. St Michael's Chapel adjoined to the town mansion of the old Earls of Crawford, and was demolished to make way for Union Street. St Mary's Chapel stood on the E side of Couttie's Wynd, and was represented till recently by a vestige of its basement. Logie Church stood westward of the town, within the present parish of Liff and Benvie, and was a mensal or table-furnishing church of the Bishop of Brechin. St Blaise's Chapel stood on the W side of Thorter Row. St Thomas' Chapel occupied part of a rock which was cut away to make room for Reform Street. Cowgate Chapel, also called Our Lady's Chapel, stood on the S side of Cowgate, at the top of Sugarhouse Wynd, previously called Pintry's Wynd, and originally called Our Lady's Wynd. St Serf's Chapel, St Stephen's Chapel, St Fillan's Chapel, St James the Less's Chapel, St James the Greater's Chapel, and St Margaret's Chapel occupied sites which cannot now be identified.

The Greyfriars' Monastery, adjacent to what is now the Howff, is said to have been founded about 1260 by Devorgilla, mother of King John Baliol; was the meeting-place, in 1309, of a great national ecclesiastical council recognising Robert Bruce as King of Scotland; and was entirely demolished at the Reformation. A Blackfriars' monastery stood on the W side of Barrack Street, originally called Friars' Vennel, is said to have been founded in the 15th century by a burgess of Dundee; had gardens and orchards extending westward to Lindsay Street; and was swept away at the Reformation. A Redfriars' monastery stood conjunctly with a hospital at the foot of South Tay Street; was founded, in 1392, by Sir James Lindsay of Crawford; seems, with the hospital, to have formed a large and splendid group of buildings, surmounted by a tower; was partly burned, in 1645, by the Marquis of Montrose; and continues still to figure in the town's landscape at the pub-

lication of Slezer's view in 1696. A Franciscan nunnery, or nunnery of St Clair, stood at the top of Methodist Close, off the N side of Overgate; was a large, massive, lofty pile, forming three sides of a quadrangle round a small court; came to be occupied in modern times by a number of poor families; retained in its interior, even then, some relics of ancient grandeur; and was demolished so late as Nov. 1870. A Magdalene establishment stood near the river, at the SW side of the town; seems to have occupied a spot there, at which several fragments of statues were exhumed at the digging of foundations for modern houses; and gave name to the open ground still called Magdalene Green.

The most notable of still existing antiquities is St Mary's Tower, or the Old Steeple as it is popularly termed, situated in the Nethergate. This massive and venerable tower is among the most ancient piles in the country, having survived storm and tempest, fire and siege, for many centuries. According to the commonly received account, this tower was founded by David, Earl of Huntingdon, in 1189, but recent research assigns it to the middle of the 14th century. The tower rises to a height of 156 feet, is square, the inside of the square measuring 8 yards, with walls nearly 8 feet in thickness. The grand entrance is in the W front, and exhibits a great variety of decoration. The ascent to the top of the tower is by an octagonal staircase, in the NE wall, in one unbroken line from base to summit—the frequent repetition of loop-holes or windows surmounting each other giving an air of loftiness to the imposing mass, which completely neutralises the lowering effect of the horizontal lines prevailing on its different stages. On entering the lower part of the tower by the western door, the visitor finds himself in a spacious apartment, with an area of 576 square feet. The sedilia, or stone seats, still remain entire, and extend along the N, S, and W walls. The groined roof, remarkable for its loftiness, is supported at each corner by pillars of huge proportions, and has a rich as well as a dignified effect, the bosses on its groined arches being bold and full, with a large circular aperture in the centre of the groin. On the W front of the middle parapet is an admirable figure of the Virgin and Child; a figure of our Lord, sitting on his throne, with a sceptre in his right hand, and an orb in his left, occupies a niche on the E side; and a standing figure of St David, the founder of the tower, with his sceptre and orb, is on the S side. In 1871-73 the fabric underwent a thorough restoration under the supervision of Sir Gilbert Scott, at a cost of about £8000, the most of which was raised by public subscription, but latterly the work was taken in hand and completed by the town council. The tower contains a splendid peal of bells, which were formally inaugurated on May 21, 1873, on which day also the memorial stone of the restoration was laid with masonic honours. Previous to the restoration the Old Steeple had a clock, with four dials; but these were abolished, as not being in harmony with the architectural features of the venerable pile; but in 1882, in deference to public opinion, the town council restored the clock, substituting ornamental skeleton dials, at a cost of £130. The Old Town's Cross, originally erected in 1586, at first in the Seagate, at the S end of Peter Street, subsequently in the middle of the High Street, now stands to the S of the Old Steeple; was removed from the High Street in 1777, the place where it stood being still indicated by the stones being arranged in a circular form; for many years the stones forming the Old Cross were stowed away about the base of the Old Steeple; and were re-erected in their present position in 1876. The shaft, which is still in a pretty good state of preservation, is the original one; but the unicorn is a reproduction, the original having been so broken and decayed as to be incapable of restoration. At the top of one of the sides of the shaft are the burgh arms, with the town's motto, 'Dei Donum,' now somewhat obliterated, and the date 1586.

The Cowgate Port, at the eastern extremity of the street which bears this name, has a central archway,

8½ feet wide and 11 high; but must have been higher originally, as the ground has been raised in the course of years; has been frequently 'improved,' the most recent having been in 1877, when a plate was fixed on the outer or E side, with the following inscription:— 'During the plague of 1544 George Wishart preached from the parapet of this port, the people standing within the gate, and the plague-stricken lying without in booths. "He sent His Word and healed them" (Psalm cvii.) Restored in 1877.' Dundee was in olden times the occasional residence of royalty, and a palace formerly stood on the S side of the Nethergate (then known as Fleukargate), a little to the E of Union Street. This ancient part of the Nethergate, with the vestiges of Whitehall Palace, was demolished to make way for Whitehall Street, completed in 1891. In March 1879 an old building on the N side of High Street, nearly opposite the top of Crichton Street, and known as 'Our Lady Warkstair's Land,' was taken down; was four stories in height; had a wooden front with two triangular elevations; was supposed to have been built about the year 1500, to have been a repository of a charity or almshouse under the church, and dedicated, according to the fashion of the times, to Our Lady the Virgin. Handsome shops have been erected on the site. The old Custom House, at the corner of Fish Street and Greenmarket, another ancient building, removed in 1891, furnished the scene of many of the incidents in the novel of *The Yellow Frigate*, by Mr James Grant, and is remarkable from the fact that, at the beginning of the present century, a large quantity of silver coin, numbering nearly 200 pieces, was found embedded in the mortar—this money, it is believed, having been concealed by some townsman prior to the siege of the town in 1651. A turret only of the ancient Custom House now remains to indicate the spot where Drummond's Castle stood, while Fish Street has been swept away, to make room for Whitehall Crescent, which converges on the E to Dock Street, fronting the Royal Arch, and on the W to South Union Street, immediately facing the commodious station of the Caledonian Railway, erected in 1889. The Luckenbooths stood at the eastern end of the Overgate, where it joins the High Street, and is still recognisable by the flat-capped turret at its north-eastern angle, and is noteworthy as having been the residence of General Monk, after he captured the town, and as being the birthplace of Anne Scott, Countess of Buccleuch. Dudhope Castle, originally the principal seat of the Scrymgeours, hereditary constables of Dundee, and situated on a terrace at the foot of the Law, along with the historic park and grounds appertaining thereto, was purchased in 1893 as a place of public recreation for £31,700. In quite recent years the removal of the Trades' Hall at the E, and of Union Hall at the W end of High Street, has caused two well-known public buildings to disappear from view, whilst greatly improving that central thoroughfare.

The increase of Dundee has been strikingly exhibited in its population, which has more than doubled in a single generation:—1841, 63,732; 1861, 90,426; 1871, 120,547; 1881, 140,054; 1891, 153,330. The parliamentary constituency was—1871, 16,281; 1881, 15,827; 1895, 18,088. The revenue of the town proper—known as the 'common good'—consists of lands, houses, churches, and salmon-fishings, has varied considerably at different periods, and now amounts to over £8000 annually. The revenue from the common good, however, is dwarfed by that of the several Boards into which the Town Council has been constituted by recent Acts of Parliament. The accounts for the year 1895 showed that as a police board it raised £104,725, expended £108,190, and had a debt of £741,698. As a water commission it raised £48,303, expended £49,699, and had a debt of £530,964. The harbour board, to which it appoints members, had a revenue of £69,817, expended £63,638, and had a debt of £418,771. The gas commission had a revenue of £83,336, expended £84,326, and had a debt of £229,880. In addition, the school-board had a revenue of £63,646, expended £63,462,

and had a debt of £182,288. The Combination Parish Council raised £43,920, expended £42,682, and had a debt of £39,343. Several other minor boards brought the revenue of the various public corporations for 1895 to £429,748, the expenditure to £425,979, and the total debt to £2,166,896. The increase in the value of ground in Dundee has been very remarkable. According to an authentic statement, in 1746 'the highest rent in the High Street did not exceed £3,' and some extraordinary instances are recorded of the manner in which property has since risen in value. A wood-yard, bought at the beginning of the century for £600, was sold in 1826 for £5000; and in 1835 it was resold in portions at prices which brought the total purchase-money up to £15,000. In more recent years the same upward tendencies have been exhibited. In 1858 a tenement on the W side of Reform Street, to the N of Bank Street, was purchased at equal to £1600; in 1875 it was sold at £4500. In 1859 a property in the High Street was purchased at £1400; it was resold in 1873 at £5250. In like manner, the feuing of ground in the centre of the town has greatly increased, and in some instances in recent times has been known to be trebled in about three years. Union Street was opened up in 1828, when the population of Dundee was some 40,000. The lots on either side of this street were sold at feu-duties ranging from £2, 6s. 1d. to £8, 17s. 2d. per pole. Reform Street was opened up about the year 1833, and the feus in it vary from £2, 0s. 10d. to £19, 16s. 5d. per pole. Panmure Street, the next of the more important improvements of Dundee, was opened about the year 1841. The feu-duties there ranged from £3, 4s. to £15, 9s. 2d. per pole. Bank Street followed, and was given off at rates varying from £1, 10s. 11d. to £3, 4s. Lindsay Street was opened up earlier than Bank Street or Panmure Street; and the rate varied from about £1, 15s. to about £2, 16s. 10d. per pole. Under the operation of the Improvement Act of 1871, the whole property constituting what is called the Victoria Road Improvement has been feued by the commissioners of police at rates varying from £3, 10s. 6d. to about £19, 14s. 8d. per pole; while the feus in the centre of the town have gone up to rates varying from £23, 5s. 4d. to £35, 13s. 7d. per pole. If Lindsay Street be contrasted with Victoria Road—and the contrast in point of situation appears to be all in favour of Lindsay Street—we have on the whole an increase of fully 400 per cent.; and if Reform Street be contrasted with the new Commercial Street feus, there is an increase on the average of fully 300 per cent. also. The details of purchases along Victoria Road are probably even more instructive. For instance, the property in Ladywell Lane belonging to the town of Dundee was sold to the police commissioners in 1872 at about £3 per pole, and, after providing for the formation of the street, what remained was refueed at double that rate. The same remark applies to the property on the W side of Powrie Lane; while, with regard to property in Bucklemaker Wynd, purchased by the police commissioners in 1870 at equal to £1, 12s. per pole, it was feued to the Victoria Road Calendering Company at equal to £3, 16s. 3d. per pole. The upward tendency in the value of property and ground, however, received a severe check in 1877, and for a number of years subsequently there was a continuous deterioration in values. Under the extended powers of the Town Council, a large number of assessments of different kinds are now levied. The tendency of late years has been to have these reduced. The following was the assessable rental of the town, and the rates per £1 of the police and other burgh assessments for a series of years—1831, £72,821, rate 1s. 3d.; 1841, £107,126, rate 1s. 5d.; 1851, £111,003, rate 1s. 2d.; 1861, £209,333, rate 1s. 11½d.; 1871, £370,122, rate 1s. 6d.; 1876, £541,551, rate 1s. 11d.; 1880, £588,829, rate 1s. 11d.; 1881, £595,570, rate 1s. 11½d.; 1891, £653,052, rate 2s. 0½d.; 1895, £696,733, rate 2s. 3d.

The Improvement Act of 1871 did very much to improve the town, by procuring the demolition of old and dilapidated buildings, widening the leading and more crowded thoroughfares, and forming additional

means of communication between important business parts of the town. A spacious thoroughfare, known as Victoria Road, has been constructed along what used to be known as Bucklemaker Wynd, extending from Bell Street to Cotton Road, substituting a handsome street, 60 feet wide, for the gullet of the Bucklemaker Wynd, which had only 13 feet of a carriage-way, and over which at least 1000 vehicles daily passed and repassed. A commodious bridge was also constructed across the Dens, now known as Victoria Bridge, connecting the south-eastern district of the town with the north-eastern. The approaches to the eastern district by Powrie Lane and Water Wynd have been greatly improved. The continuation of Commercial Street, between Meadowside and the Murraygate, not only gives a short cut from the High Street to the Exchange, but also provides a large number of first-class shops and business premises. The widening of what was previously known as the Narrow of the Murraygate, by demolishing all the old buildings between it and the Seagate, has got rid of a description of property which was a disgrace to the town. The opening up of the High Street, by the removal of the Trades' House at the one end and the Union Hall at the other, as already mentioned, is a palpable improvement. By this improvement scheme no less than 185 new streets have been sanctioned, and numerous narrow closes and lanes have been removed at a cost of over £500,000.

The Town-Hall stands on the S side of the High Street; occupies the site of the old church of St Clement; was erected in 1734, after designs by the elder Adam; projects several feet from the line of the adjacent buildings; is in the Roman style, with piazzas and Ionic pilasters; is surmounted, through the roof, by a spire 140 feet high, in which is a clock, with bells that chime every quarter of an hour; underwent restoration in 1853-54; contains the council-chamber, the guildhall, and the offices of the town clerk. The new Town-Hall, situated at the rear of the town buildings, was erected in 1873, and is now used as the offices of the Dundee Combination Parochial Board. The Royal Arch, on the S side of Dock Street, was erected in 1853 to commemorate the landing of the Queen at Dundee in Sept. 1844, by public subscription, at a cost of more than £3000, towards which the harbour trustees voted £500 and the late Lord Panmure contributed £750; comprises a great central arch and two side arches, surmounted by two central turrets; and is in the Anglo-Saxon style, with profuse ornamentation. The Custom-House stands at the E end of Dock Street; was erected in 1843 at a cost of £8000; is a large fine structure, with a portico in the Roman Ionic style; and contains accommodation for the Customs, the Excise, and the Harbour Trust. The Albert Institute stands in the centre of Albert Square; was erected in 1865-68 as a subscription memorial to the late Prince Consort, after designs by Sir Gilbert Scott; stood then and for some years afterwards incomplete, with an unsightly gap in its NE wing, which was removed to make room for the erection of the Victoria Art Galleries, opened by the Marquis of Lorne 26 October 1889; is in the Gothic style, with an exquisite wheel window in the N gable, a splendid fleche on the summit, and other richly artistic features; contains in the upper story a noble hall, with fine open roof, and has a commodious suite of rooms attached. The eastern portion, used as a free museum and picture gallery under the provisions of the Free Libraries Act, was completed in 1874, having been erected from a plan by Mr D. M'Kenzie, a local architect; has a public fountain on the W, which is made to play on certain special occasions, the architectural features being in keeping with the nature of the ground and the style of the Institute buildings; the basins are of Polmaise stone, flanked by polished shafts of Peterhead granite, and ornamented with carved heads of lions, etc. The Albert Institute having been wound up, the building was, on March 28, 1879, put up for sale by public auction, and acquired by the Corporation for the nominal upset price of £1000, it being a condition of

sale that the building shall not be otherwise used than for a philosophical institute, comprising a museum, lecture-rooms, reading-rooms, and picture gallery; and that they shall in all time coming be appropriated to the purposes for which they were originally designed. The Royal Exchange stands at the W end of Panmure Street; was built in 1853-56, after designs by David Bryce, of Edinburgh, at a cost of more than £12,000; is an elegant structure in the Flemish style of the 15th century, common in Brussels and other large towns of the Low Countries; shows a side frontage of two stories, surmounted by a range of dormer windows, with traceried heads and crocketed gables; contains a lofty handsome hall, or reading-room, 77 feet long and 34 wide, with fine ornamented roof; and has a tower which was intended to be 120 feet high, with a stone crown, but could not be finished in consequence of the ground beneath it threatening to sink, and was terminated at only one stage above the main building, in a curved parapet and flat roof. The Eastern Club stands on the S side of Albert Square, opposite the Albert Institute; was erected in 1870; is in the Venetian style; and has a highly ornate front. The Court-House buildings, for the holding of judiciary and sheriff courts, are in West Bell Street; consist of a long-drawn and lofty range of massive stone buildings; were erected in 1864-65, with aid of £13,587 from government; and are a handsome and spacious edifice, with portico surmounted by the royal arms in bold relief. The Kinloch monument stands to the NW of the Albert Institute, facing towards the SW; commemorates George Kinloch, the first member for Dundee in the reformed parliament; was inaugurated on Feb. 3, 1872; and consists of a bronze statue by Sir John Steell, R.S.A., of Edinburgh, about 8 feet high. The Carmichael statue stands to the NE of the Albert Institute; was erected by public subscription to commemorate the leading member of the firm of James and Charles Carmichael, iron-founders, who conferred a boon upon the trade with which he was connected by the invention of the fan blast; the sculptor was Mr John Hutchison, R.S.A., of Edinburgh, and the monument stands about 18 feet high. The Burns statue stands to the SW of the Albert Institute; is by Sir John Steell, being a replica in bronze of a statue sent to New York, and represents the poet in a sitting posture; the figure is colossal, being about 12 feet in height, and the pedestal is of Peterhead granite; the statue was formally unveiled on Oct. 16, 1880. The Market Shelter is opposite the Albert Institute on the N side, and in a recess at the W end of the Exchange buildings; was erected for the accommodation of the gentlemen attending the market, which is held on the street facing the Exchange, and was opened for business in the summer of 1882. The Kinnaird Hall is on the S side of Bank Street; was erected in 1856-58 after designs by Charles Edward, of Dundee; contains a hall 130 feet long, 60 wide, and 40 high, capable of accommodating from 2500 to 3000 persons; has a fine open roof supported by iron girders, and the side walls are tastefully decorated; and has a fine organ. The Volunteer Drill Hall, on the N side of West Bell Street, is a plain brick building of ample proportions; is 160 feet in length, including one gallery, 80 feet in breadth, and 42 feet in height to the apex of the roof; and was erected in 1867, mainly by means of subscriptions among the friends of the volunteer movement. The other public halls are—Ancient Mason Lodge, High Street; Argyll, Overgate; Buchan's, Bank Street; Camperdown, Barrack Street; City Assembly Rooms, foot of Castle Street; Cooper's, top of Benvie Road; Cutlers', Murraygate; Dundee, Barrack Street; Forfar and Kincardine Mason Lodge, Meadow Street; Gilfillan Memorial Church Hall, Whitehall Crescent; Good Templars', Reform Street; Gray's Assembly Rooms, Perth Road; Guthrie Street Hall; Jamaica Street Hall; Larch Street Hall; Operative Masons', Tally Street; Operative Mason Lodge, Overgate; Operative Tailors, Overgate; Panmure, Bain Square; Plasterers', Tally Street; Princes Street Hall; Rosebank Hall, Rosebank Street; Smellie's, Barrack Street; Strathmore, Sea Wynd, Nethergate; Thistle,

Union Street; Trades', South Union Street; Victoria, Victoria Road; and Wellgate Hall.

Three parish churches under one roof—called variously St Mary's, St Paul's, and St Clement's; the East, the South, and the West; the Old, the New, and the Steeple—stand between Overgate and Nethergate, near the W end of High Street; are adjoined, at their western extremity, by a massive ancient tower 156 feet high; and form a cathedral-looking structure, both historically interesting and scenically prominent and imposing. The pile has been for ages popularly called the Town Churches and the Tower; and it is conspicuous at once as visibly connecting the town with antiquity, as bulking largely among its public edifices, and as constituting the most distinctive feature in its burghal landscape. Whether seen in full front, or seen through a vista from any part of the town's interior, the Tower looms largely in the view, looking the impersonation of Time casting its gloom upon the evanescent scenes around; or seen from any point or distance in the environs or in the circumjacent county, whether from the E or from the W or from the S, the Tower lifts its grand bold summit high above the undulating surface of a sea of roofs, and suggests thoughts of many generations who have spent their ephemeral life beneath its shadow. The churches originated in a chapel founded somewhere between 1196 and 1200 by Prince David, Earl of Huntingdon, on ground then beyond the limits of the town, and long known as the 'Kirk in the Field;' they grew, by reconstruction of the chapel and by successive extensions, into a great cruciform edifice 174 feet long, with a choir 95 feet long, 29 broad, and 54 high; they comprised, besides three churches of the same names as the present three, a fourth one, called variously St John's, the North, and the Cross; they suffered damage from the English, before the national Union, to an extent which required St Clement's to be entirely rebuilt in 1789; they were almost totally destroyed by accidental fire in Jan. 1841. St Mary's and St Paul's were entirely rebuilt, and the former has a very fine stained-glass window; but St Clement's was merely restored, and is an extremely plain portion of the pile. They retain the crucial form of the original structures, with the choir or chancel for St Mary's, the transept for St Paul's, and the nave for St Clement's; and they are in a laudable variety of the Decorated Pointed style. The Tower, which has already been noticed, is the only part of the early pile now standing.

St John's parish church, formerly called also the North or Cross Church, ceased at the burning of the Town Churches in 1841 to stand conjoint with St Mary's, St Paul's, and St Clement's, and is now an edifice in South Tay Street, formerly used as a Gaelic church. St Andrew's Church, on the N side of the Cowgate, is now the oldest established church in the town; was originally built in 1772 by means of voluntary subscriptions by the kirk-session and trades of that period, and continued to be owned and managed by them as a proprietary body until 1872, when the congregation obtained the entire management and control of the church, and of the property connected with it; was endowed in the following year, and put on the footing of one of the parochial charges of the Church of Scotland; is a plain building with a handsome spire, which rises to an altitude of 139 feet, and contains a set of fine musical bells; has undergone repeated renovations, the most recent being in 1874, when extensive alterations, both internally and externally, were made upon it, costing about £2000. Chapelshade Church, in Constitution Road, is a large, plain-looking building with about 1200 sittings; was erected into a parish church in 1872, with a suitable district attached. St David's Church stands in North Tay Street; was originally an Independent chapel, built in 1800; passed by sale to the Church of Scotland in 1823; is exteriorly a very plain edifice, but interiorly handsome; and contains nearly 2000 sittings. Wallacetown Church was opened in May 1840, and in March 1874 was erected into a parish *quoad sacra*. St Mark's stands in Perth

Road; was built in 1869, after designs by Pilkington and Bell, at a cost of £6000; and is highly ornamental. St Enoch's, in Nethergate, was originally a Free church, erected in 1873, standing on the street line adjoined by other buildings; has a highly effective character; and was erected into a parish church in March 1876. Rosebark Church, in Constitution Street, was erected as a mission station in 1872 at a cost of nearly £2000; is a Gothic structure in the Early Church form, with about 600 sittings; and in Jan. 1875 was erected into a parish church. St Matthew's, in the Ferry Road, is in the Early English Gothic style, with transepts; stands in a district inhabited chiefly by the poor and working-classes; and was built in 1875, as a chapel of ease, at a cost of about £3400. Clepington Church is in the Early English style, was the last of five churches built under a scheme for providing additional accommodation for members of the Church of Scotland in Dundee, and was opened on Jan. 16, 1881. There are also Logie *quoad sacra* church and the chapelries of Maryfield (opened 1886) and St Thomas, Lochee Road (formerly connected with the Church of England). St Paul's Free Church, in Nethergate, was built in 1852, after designs by Charles Wilson, of Glasgow, at a cost of about £5000; is a cruciform structure in the Early Pointed style; and has a finely proportioned spire 167 feet high. St Peter's Free Church, in St Peter Street, was built in 1836; is a plain structure, with a neat spire containing a peal of bells; has 1006 sittings; and was the scene of the ministry of the lamented M'Cheyne. The M'Cheyne Memorial Church, in Perth Road, was built in 1871 after designs by Pilkington & Bell, and is an edifice tastefully and elaborately ornate. Chapelshade, Wallacetown, Dudhope, Chalmers, Wellgate, Willison, and the High Free churches, are all tasteful edifices; and there are besides St Andrew's, St David's, St John's, Hilltown, Bonnet Hill, Ogilvie, Albert Square, and Martyrs' Free churches. The Bell Street U.P. Church is a massive, elegant, and spacious edifice. School Wynd Church, known also as George's Chapel, in Lindsay Street, erected in 1825, was for 42 years the scene of the pastoral labours of George Gilfillan. The Dudhope Road U.P. Church superseded a previous one in Temple Lane, was built in 1870 after designs by Pilkington & Bell, and is a handsome structure. There are also the Tay Square, Cowgate or Wishart, Butterburn, Victoria Street, Ryehill, Downfield, Hawkhill, Lochee, Lochee Road, and Park churches. The Gilfillan Memorial Church, formed of adherents of the Rev. David Macrae, deposed from the ministry of the U.P. Church in 1879, is situated in Whitehall Crescent, and contains 1400 sittings. The Original Secession Church is a small but substantial building. Of the Congregationalist places of worship the oldest is Ward Chapel in Constitution Road; was built in 1833 after designs by Mr Smith, of Dundee; and is a beautiful edifice in the Second Pointed style. Pannure Street Chapel was built in 1855 after designs by Mr Bryce of Edinburgh, and is a picturesque structure with a boldly traced circular window and two octagonal towers. Castle Street, Lindsay Street, Princes Street, and Russell Congregational chapels are all respectable. The old Scotch Independent Chapel, in Euclid Street, was built after designs by Mr Maclaren, of Dundee, and is a handsome edifice. Trinity and Morison Evangelical Union chapels are plain but comfortable buildings. Baptist chapels are in Rattray Street and in Long Wynd, the former being erected in 1878 in place of a chapel in Meadowside that had to be removed to make way for the town improvements. The Catholic Apostolic Church, at the corner of Constitution Road and Dudhope Crescent Road, is a large and very handsome edifice in the Pointed style, and was erected in 1867; it has a tastefully decorated interior, and is divided into nave and aisles, the latter being lighted by two light windows, and the nave from a clerestory. Wesleyan Methodist chapels are in Ward Road and Victoria Road; both are neat structures; and the latter was built in 1869 after designs by Alexander Johnston, of Dundee. The

Unitarian Christian Chapel, in Constitution Road, was built in 1870, also after designs by Alexander Johnston. St Paul's Episcopalian Church, at the top of Seagate, was built in 1852-55, after designs by Sir Gilbert Scott, at a cost of £13,000; is in the Second Pointed style, of crucial form, with nave, aisles, transepts, chancel, and octagonal apse; has both a noble exterior and a very beautiful interior; and is surmounted, at its W end, by a tower and spire rising to the height of 220 feet, and figuring conspicuously in almost every view of the town. St Mary Magdalene's Episcopalian Church, in Blinshall Street, is a recent edifice in similar style to St Paul's Episcopalian Church but of smaller size, and erected at about one-fifth of the cost. St Salvador's Episcopalian Church, in Clepington, also is a recent erection. Besides these there are Holy Trinity, St John Baptist, St Martin's, and St Paul's Mission churches. St Andrew's Roman Catholic pro-Cathedral Church, in Nethergate, was built in 1836; is an elegant edifice in the Pointed style, with a beautiful interior; and contains 1200 sittings. St Mary's Roman Catholic Church, at Forebank in Hilltown, was built in 1851; has a plain exterior in Anglo-Saxon style and a very striking and gorgeous interior; and contains 1500 sittings. St Joseph's Roman Catholic Chapel, in Wilkie's Lane, was built in 1872-74 at a cost of about £5000; is a cruciform structure 147½ feet in length from N to S, and 40 in width in both nave and transepts; and contains 1200 sittings. St Patrick's Roman Catholic Church was built in 1890, and contains 500 sittings. In addition to these there are St Joseph's Convent and the Convent of Our Lady of Mercy (1893). The Glassite Meeting House, on the N side of King Street, is a plain octagon-shaped building. Salem Chapel, in Constitution Road, erected in 1872, is a neat specimen of Gothic architecture. There are also a Meeting-house for the Society of Friends, and a Jewish synagogue.

The Howff or old burying-ground lies off Barrack Street; superseded the three ancient burying-grounds of St Paul, St Roque, and St Clement, all now quite extinct; was formed, about 1567, in what had been the garden of the Greyfriars' Monastery; became so crowded and insanitary as to be closed by order of the Privy Council in 1858; and equals or surpasses every other old burying-ground in Scotland, not excepting that of the Edinburgh Greyfriars, in the number and variety of its interesting old monuments. The burying-ground on the W side of Constitution Road was opened in 1836; is tastefully laid out in mounds and walks; but, like the Howff, is now closed against interments. The Western Cemetery, on the N side of Perth Road, was opened in 1845; comprises six acres, beautifully laid out in compartments and promenades; has a very grand gateway; and contains a monument to the poet William Thom, who died in Dundee in 1848. The Eastern Necropolis, on the N side of Arbroath Road, about 2 miles from High Street, was opened in 1862; is laid out with great taste and beauty in serpentine walks; and has an admirably designed gateway. A project for a Roman Catholic cemetery was started about 1860, and won some contributions, but fell to the ground. Balgay Cemetery, which occupies the western portion of Balgay Hill, is very tastefully laid out.

The Baxter Park, at the north-eastern extremity of the town, is so named from having been the gift of the late Sir David Baxter and his two sisters; is about 36 acres in extent, and cost the donors nearly £40,000, in addition to which they gave a sum of £10,000 for the maintenance of the park in all time coming; and is well laid out, with a pavilion in the centre of the terrace in which is a marble statue of Sir David Baxter, erected by public subscription. Balgay Hill, 452 feet in height, to the westward of the town, was acquired by the police commissioners of the burgh as a place of public recreation in 1871; covers 60 acres of ground, a portion of which has been laid out as a cemetery; enjoys the advantage of having been previously beautifully wooded; commands a gorgeous view over all the lower Tay and the Carse of Gowrie, with their periphery of hills and mountains; is

encircled with a drive 25 feet wide, and intersected with umbrageous drives and walks, looking like well-shaded avenues; has its main approach on the S, from Blackness Road, through a handsome entrance-lodge in the Scottish Baronial style; and has two other approaches, respectively on the W from Hillside and on the N from the Ancrum Road. The cemetery and the park jointly cost about £13,000, and were opened by the Earl of Dalhousie, amid great public demonstrations, in Sept. 1871. Close beside Balgay Hill is the Lochee Park, presented in 1890 to the city by Messrs. Cox Brothers. It covers 25 acres of ground, cost £10,000, an additional sum of £6000 being added for maintenance and repairs and is intended solely as a recreation ground. In May 1882, Sir John Ogilvy, who for many years was one of the parliamentary representatives of Dundee, made a gift to the town of his rights in the Fair Muir, a field about 12 acres in extent, lying to the N of the town, which has now been added to the parks available for purposes of public recreation. Dundee Law, which stands to the N of the town, has also been acquired by the police commissioners for use as a public pleasure-ground. It rises gently to an elevation of 372 feet above sea-level, and culminates in a round, green summit, the prospect from which is far-reaching and picturesque. The slopes around the Law, where not built upon, are cultivated. On the summit are the vestiges of a fortification, said to have been erected by Edward I. The extent of the public ground at the Law is about 18 acres. The Magdalene Green (about 17 acres) is an open grassy slope, which adjoins the river in the neighbourhood of the N end of the Tay Bridge. It was extended on the W in 1896 by a gift of about 3 acres from Sheriff Thoms in memory of his father, a former provost. The esplanade, adjoining the Magdalene Green, is a splendid marine parade; was constructed at the joint expense of the Caledonian and North British Railway Companies, the harbour trustees, and the town; and was opened in July 1875. In 1893 it was extended westwards to Ninewells, and, 2½ miles in length, forms a marine walk of surpassing beauty. The Dudhope Park (along with a children's open-air gymnasium in Barrack Square) was formally opened in 1895. It comprises 23 acres, and cost about £30,000. The Bleaching Green (6 acres) is to the E of the Dudhope Park, and whilst principally used as an adjunct to the public washing-house that stands in the centre, is also available to the public for recreative purposes. Besides which there is Stobs Muir, consisting of about 11 acres of land.

The harbour extends from Craig Pier on the W, nearly opposite Union Street, to Carolina Port on the E; lies almost all, like the harbours of Greenock and Liverpool, within the line of low-water mark; offers commodious ingress in very reduced states of the tide; and is one of the finest, safest, and most convenient harbours in Great Britain; yet, prior to 1815, had no better accommodation for shipping than a small pier and a few ill-constructed erections, which could not be reached by vessels of any considerable draught. Between 1815 and 1830, at an aggregate cost of £162,800, a wet-dock, with a graving-dock attached to it, was constructed, the tide harbour was deepened and extended, sea-walls and additional quays were built, and various other improvements were made. The wet-dock then constructed bears the name of King William's Dock, covers an area of 6½ acres, and has its adjoining graving-dock in corresponding proportion. A second wet-dock was formed subsequent to 1830, bears the name of Earl Grey's Dock, and covers 5½ acres. Two other wet-docks, further to the E, were partially formed in 1863-65 and completed in 1873-75; bear the names of Camperdown Dock and Victoria Dock; cover respectively 8½ and 10¾ acres; admit vessels drawing 20 feet at high water of spring tides, and vessels drawing 15½ feet at high water of neap tides; and are connected with a new graving-dock for the largest class of vessels. Further extensions are in progress. There is a steam crane capable of lifting 70 tons at the Victoria Dock; a caisson, on a new and peculiar principle, and working with great facility and

case, is at the entrance of Camperdown Dock; and the great outer sea-wall extends considerably to the E and has a skilful structure and a massive appearance. All the works formed from 1815 till 1875 are considerably within the range of high-water mark, leaving an important space of ground between them and the town to be occupied as the site of buildings, and as a continuation of Dock Street; and parts of them are also within low-water mark, leaving even there, between the wet-docks and the sea, a space for warehouses and shipbuilding yards. The docks are accessible, in various directions, by spacious streets or roads; and have adaptations, in every way, to secure the speedy and effective loading and unloading of any number of vessels which they may contain. The Camperdown and Victoria Docks lie the furthest to the E, and are used mainly, or almost entirely by the vessels of largest burden; while the other docks have less depth of water, and are used by middle-class and smaller vessels. A further extension of the harbour is under consideration. By an act of parliament, passed in June 1830, the management of the harbour was transferred from the commissioners appointed under a previous statute to a board of trustees, elected annually; and by a subsequent act obtained in the year 1869, the constitution of this trust was changed, and the representation enlarged. Previously, the board consisted of 21 members; but the recognition of the Chamber of Commerce, shipowners, and harbour and municipal ratepayers as elective bodies, increased it to 32. Seven members have seats *ex officio*—the provost, 4 councillors, and the dean of guild; the county council elects 4, the Seamen Fraternity 1, the guildry 6, the Nine Trades 3, the Three Trades 1, the Chamber of Commerce 3, the shipowners 3, the harbour ratepayers 3, and the municipal ratepayers 2. Shipowners are qualified as electors who possess 100 tons of shipping; and the harbour ratepayers, before being entitled to vote, must show that they have paid £10 of rates in respect of vessels or goods. The county choose their representatives at the Michaelmas meeting in October, and the others are elected in the beginning of November. The trustees of the harbour are thus in all respects a thoroughly popular body, elected by the parliamentary constituency and others who have the deepest interest in the right management of the harbour. Of late years, the powers of the trust have been greatly increased, and their jurisdiction has been correspondingly extended. In 1873 they acquired the management and working of the Tay Ferries from the Caledonian Railway Company, upon payment of a sum of £20,000—the purchase involving an outlay altogether of £35,000; and in 1875 they entered into an arrangement with the Seamen Fraternity for the transference of the lighting and buoying of the river from that body to the trust. The compensation paid to the Fraternity was a sum of £15,000, besides relieving them of a debt of £4060 due to the Public Works Loan Commissioners. This arrangement was sanctioned by an act of parliament passed in the same year. This act was a consolidated measure, and repealed all previous legislation subsequent to the constitution of the trust, with the exception of the acts regulating the Tay Ferries. In this consolidated act, however—which may, indeed, be said to be the Magna Charta of the port of Dundee—all the previous powers and privileges of the board were retained, while additional ones were conferred, and the trustees were declared to be the conservators of the river Tay and estuary. In the act of 6 and 7 Vict., chap. 83, provision was made for the gradual reduction and extinction of the debt, by which the credit of the harbour has been raised, and a large reduction obtained in the rate of interest. By an act passed in 1889 the redemption of Harbour Trust loans was fixed at the rate of 2½ per cent. per annum; it also provided that the loans existing at the passing of the act should be paid off in 50 years, and that all new loans should also be paid within 50 years of borrowing. Additional borrowing powers up to £100,000 were granted. The revenue for 1895 amounted to £61,223. The whole of the moneys levied or leviable by the trustees under their

different harbour acts are exclusively applied to the maintenance and extension of the harbour and its works; and the surplus of the revenue over the expenditure is devoted to paying a portion of the new works rather than borrowing the whole sum. The gross cost of the harbour, in 1895, was £1,010,859, and the debt £403,975; and the whole amount has been borrowed at a little under 4 per cent. So well have the affairs of the harbour been managed, that, since the year 1815, surpluses to no less a sum than £303,450 have been applied to the extinction of debt. The accounts of the trustees are made up annually, and audited by a qualified person named by the sheriff of the county; and when so audited, an abstract of the accounts is printed and circulated. The following table shows the progressive state of the finances of the Dundee harbour trust, being the amount of revenue and expenditure in the years named ending May 31, with the amount of debt at date:—

Year.	Revenue.	Expenditure.	Debt.
1854	£23,428	£19,779	£159,532
1860	24,677	20,446	164,062
1865	29,879	24,679	210,803
1870	33,503	24,813	190,232
1875	45,233	39,794	*318,367
1880	48,533	44,143	360,494
1885	49,244	50,316	353,016
1891	59,248	50,401	368,922
1894	50,618	59,113	418,725
1895	61,223	55,020	403,975

The University College of Dundee was founded and endowed in 1831 by Miss Baxter, sister of the late Sir David Baxter, and Dr. J. B. Baxter, for upwards of fifty years Procurator-Fiscal for Dundee, who executed a deed of trust providing a sum of £140,000 for the purpose. Of this sum £35,000 were set apart for buildings and £100,000 as an endowment for salaries to professors and other charges. Both of these accounts have been largely added to by handsome subscriptions from gentlemen connected with the town and others. The governors are all subscribers. Teaching began in the college in 1833, in 1890 it was affiliated to the University of St Andrews, and in 1892 fully incorporated with it. The management is now largely vested in the University Court, of which the Principal of the College is a member *ex officio*, and to which the Council sends two representatives. The Council consists of nine members elected by the governors, seven *ex officio* members, and three representative members. There are now nine chairs—namely, Mathematics and Natural Philosophy, Chemistry (including dyeing and bleaching), Engineering and Drawing, Classics and Ancient History, English Language and Literature, Natural History, Botany (endowed by Mr J. F. White of Balruddry), Anatomy (endowed by Mr Thomas H. Cox of Maulesden), and Physiology. Also lectureships in French, German, Logic and Metaphysics, Fine Art, Law, Systematic, Clinical, and Operative Surgery, and Clinical Medicine. Clinical instruction in medicine and surgery is provided at the Dundee Royal Infirmary, and in mental diseases at the Dundee Royal Lunatic Asylum. The laboratories at the college are fitted with every appliance for study and research, and special facilities are given for the study of electrical engineering. The science curriculum qualifies for the degrees of B.Sc. and D.Sc. in St Andrews University, and the medical classes for graduation in medicine at the same or at any other Scottish university. By an agreement between the University of St Andrews and the College, confirmed by an Act of Parliament passed in 1893, the former obtains a more direct control of the finances and the patronage of the chairs, while the latter are enabled to found and equip a complete medical school and to confer the M.A. degree in Arts. Connected with the college are many scholarships and bursaries. An important part of the scheme is the conducting of evening classes for those who cannot attend during the day. A Technical Institute, founded by Sir David Baxter at a cost of £13,000, has been erected adjacent to the College. The High-

School stands at the N end of Reform Street, looking down along its area, and facing the Albert Institute; superseded an English school, a grammar school, and an academy, dating from respectively the 13th century, the 16th century, and the latter part of the 18th century; was built in 1833, after designs by Mr Angus, at a cost of more than £10,000; is in the Doric style, with a portico of eight fluted columns, copied from the Parthenon of Athens; contains a science room, measuring 42 feet by 40, a museum room of the same dimensions, another room measuring 57 feet by 30, and a total of 14 classrooms; has a playground of about an acre in extent; is conducted by a rector, a lady superintendent, and a competent staff of teachers in English, classics, modern languages, mathematics, science, commercial classes, etc.; and is governed by a Board of Directors, seven of whom are elected by the annual subscribers to the institution, and the others by the Town Council, the Chamber of Commerce, the guildry incorporation, and the nine incorporated trades; the lord provost, the lord dean of guild, and the parish minister are *ex officio* members. When the School-Board was formed in Dundee, an attempt was made, but unsuccessfully, to transfer the management of this institution to that body, on the ground that it was a burgh school. The proposal was revived in 1880, and expensive litigation was threatened, when the difficulty was happily solved by the offer of Mr William Harris, a local philanthropist, to give £20,000 towards the better endowment of the High School, and £10,000 to the School-Board for the erection of a secondary school, on condition that the School-Board agreed to the continuance of the High School under the existing management—which offer was joyfully accepted by all the parties interested. A higher class school—the Harris Academy—was accordingly started under the School-Board. Workshops have been attached to the High School and the Harris and Morgan academies, to give practical instruction in the handling of tools to their pupils. The High School for Girls is an effective building erected in 1886, having frontages to Euclid Street and Euclid Crescent, immediately west of the High School. During the period that the School-Board has been established in Dundee, it has vigorously carried out the Education Act for the elementary education of the people, and a number of new and admirably constructed and equipped schools have been opened by them. In 1894 there were 23 schools under the Board, with accommodation for 21,000 scholars. These had an average attendance throughout the year of 16,600, while the government grants earned comprised an aggregate of over £17,370. The cost of the teaching staff is about £25,000, and the assessment imposed has varied from 1d. in 1874 to 1s. in 1895. Since the advent of free education private schools are not so numerous, but there are still a few of high mark for polite education. The Dundee Educational Trust has consolidated several trusts in terms of the Educational Endowments (Scotland) Act 1882 for the promotion of higher education. In 1861 a Working Men's College was commenced in Dundee; but, after two years' working, the support given was so small that it had to be discontinued. The Young Men's Christian Association, in Constitution Road, has a handsome and commodious building for its various purposes, including a splendid reading-room, well supplied with newspapers and periodicals; class-rooms for young men engaged in handicrafts during the day, where instruction is given in those higher departments of education likely to prove of practical value to them in their several occupations. Dundee has of late years made a great advance in the cultivation of music, both vocal and instrumental. To the city also belongs the honour of having introduced the novelty of giving a highly-successful rendering of Handel's *Messiah* by children, which was performed in several of the largest towns in Scotland by a party of youthful choristers. Dundee now possesses a large number of musical associations, and concerts are periodically given, at which classical music is interpreted by the leading vocalists and instrumentalists in the country.

The Morgan Hospital occupies a fine site at the junction of the Forfar and Pitkerro roads, immediately N of Baxter Park; sprang from a bequest of £70,000 by John Morgau, a native of Dundee, who amassed a large fortune in India; was, subsequent to considerable litigation, erected in 1863-66 after designs by Peddie and Kinear of Edinburgh; is in the Scottish Baronial style, with four façades, enclosing an oblong court 125 feet by 50; has a main front 183 feet long, surmounted at the centre by a lofty turreted tower; cost, for its erection, about £18,000; and is surrounded by an extensive playground. The hospital is now used as a secondary school under the School-Board and called the Morgan Academy, whilst the trust is administered by a board of governors, who are elected two by the Town Council and one each by the presbytery, the School-Board, the High School, the nine trades, the town councils of Forfar, Arbroath, and Montrose. The Industrial Schools stand in Ward Road, in front of the new Courthouses; were erected in 1856 after designs by Mr Charles Edward; are in the Early English style, both pleasing and commodious; were originally occupied by both boys and girls, but latterly have been occupied by girls only. For the boys a new and additional institution was, in 1878, erected at Baldovan, about 3 miles N from Dundee, on a site, 13 acres in extent, feued from Sir John Ogilvy, where a handsome building in the Gothic style, two stories high and 180 feet in length, was provided. In connection with the Industrial Schools, a Home for Apprentice Boys was opened in West Bell Street on 23 Nov. 1881, in which accommodation is provided for 20 boys who had left the institution, and were serving their apprenticeships to various trades in Dundee. The Orphan Institution stands in Ferry Road, about 1½ mile from High Street (was formerly in Small's Wynd); was erected in 1870 after a design by Mr W. Chalmers, Broughty Ferry; is a large and handsome building, well adapted to its special benevolent purposes; and in 1892 the inmates were 26 boys and 24 girls, while the revenue for the year amounted to £1341 and the expenditure to £1329. The *Mars* training-ship lies anchored in the Tay, about a mile to the W of Newport; is used for the board, maintenance, education, and training of boys in the duties of a seafaring life; was originally a two-decked 80-gun line-of-battle ship, subsequently converted into a screw of 400 horse-power, and later still adapted, at a cost of over £4000, into a training-ship; and in December 1892 received a new steam launch designed and built by Mr D. Brown Livie, a local boatbuilder. The Institution for the Blind originated in 1865, by the purchase of Danfield House by Mr and Mrs Francis Mollison. This proving unsuitable the same generous benefactors made provision for the erection of handsome premises fronting Magdalen Green, which were formally opened in January 1885 by Mr Wm. Ogilvy Dalgleish of Errol Park; accommodation is now provided for both males and females, where the blind can carry on their work in comfort, and earn their own living. The Deaf and Dumb Institution stands in Lochee Road, on a commanding and salubrious site; was opened on 5 Sept. 1870, and superseded a much smaller building in the Bucklemaker Wynd; and provides an excellent training for the unfortunate class for whom it was designed. The old Infirmary stood in King Street, on an elevated site sloping to the S, well detached from other buildings; was erected in 1798; was subsequently used as a female lodging-house; and latterly was converted into a Board School. The New Infirmary occupies a commanding site with a clear exposure to the S; was erected in 1852-54, after designs by Messrs Coe & Godwin, of London, at a cost of about £15,000; is a magnificent edifice in the Tudor style; has a S frontage 350 feet in length, with two wings running back each 160 feet, and a projection backward from the middle; exhibits, in the centre of its frontage, a projecting portion loftier than the rest, flanked with four-story battlemented turrets, and surmounted by a pyramidal crown with lantern finial; is arranged internally on the corridor system in a man-

ner very airy and eminently convenient; was originally constructed to accommodate 220 patients under ordinary circumstances, but has had additions since made so as to accommodate about 400 persons. A Sick Hospital for the poor was erected in 1891-92 by the Dundee Combination Parochial Board on ground to the north of the East Poorhouse. The buildings, which consist of a centre block and two side pavilions, are fitted with all the latest hospital improvements, contain 264 beds, and cost about £25,000.

A Convalescent House, for the reception of females recovering from illness or accidents, was opened in Nov. 1860 in a house in Union Place, being that which was at one time tenanted by the late Rev. R. M. M'Cheyne; but was removed in June 1870 to larger premises in William Street, Forebank. A second institution of this nature, for both male and female patients, was erected in 1877 in the vicinity of Broughty Ferry; stands next the cemetery, on the E, in a park of some 6 or 7 acres; was designed by Mr James M'Laren, and has an imposing appearance, its central tower rising as a landmark for miles round; had its funds supplied by the late Sir David Baxter and his friends, and included, besides the sum of £10,000 set apart for the building and furniture, other £20,000 as an endowment for its maintenance; and accommodates 25 male and 25 female boarders. Bannatyne House, Newtyle, equipped and partially endowed as a sanatorium for working girls, was presented to the city in 1892 by Mr and Mrs Alexander Moncur. The Royal Lunatic Asylum stood in the north-eastern extremity of the town, upon an inclined plane considerably higher than the level of the old streets, and commanded a fine view of the waters and shores of the Tay; was erected in 1820; and was a large and well-arranged edifice, encircled with gardens and airing grounds to the extent of more than 12 acres; but latterly had become utterly inadequate to the proper accommodation of the increasing number of inmates. A new asylum was therefore erected in 1879-82 at West Green, about 5 miles from Dundee, providing accommodation for 355 patients, the plans providing also for the erection of a private asylum for 70 patients, a chapel, superintendent's house, farm buildings, and lodges; each patient having for the single rooms 1040 cubic feet space, and for the dormitories 780 cubic feet. The front of the asylum is to the S, and commands a splendid prospect of the Tay and the bordering counties, as well as the German Ocean. It has turreted corners, and over the roof in the centre is a fleche of timber. The buildings altogether cost about £60,000, and were occupied in the summer of 1882. The Sailors' Home, in Dock Street, formally opened on Dec. 16, 1881, by the Earl of Dalhousie, was the result of a movement originated about two years previously; is in the Elizabethan style, 5 stories in height, with frontages to Dock Street and Candle Lane, the elevation to Dock Street being tastefully ornamented, and presenting a very handsome appearance; provides accommodation for 80 seamen, besides a house for the superintendent; has also a chapel, seated for 240 persons, where divine service is conducted every Sunday; and cost altogether £12,000, the whole of which was locally subscribed. The Curr Night Refuge stands in West Bell Street opposite the burying-ground; was erected, with the sum of £6000 set aside by the trustees of the late Mrs Curr of Roseville, for the purpose; is in the Elizabethan style, after designs by Mr David Maclaren, not too elaborated with decorations, but possessing a tasteful and pleasing appearance; and was opened in the summer of 1882. Other charitable institutions in the town are the Indigent Sick Society, instituted in 1797 for affording aid to the indigent and sick; the Eye Institution, founded in 1836 for the benefit of those suffering from diseases of the eye; the Home for Fallen Women, founded in 1848 by Sir John and Lady Jane Ogilvy, for the reclamation of females who have strayed from the paths of virtue; Baldovan Asylum for Imbecile Children, also established by Sir John and Lady Ogilvy in 1855, and providing accommodation for about 70 inmates; the Pri-

soners' Aid Society, established in 1872 for the correction and reformation of ticket-of-leave persons and prisoners discharged from gaol; the Cabmen's Shelter, in South Lindsay Street, immediately adjoining the Old Steeple, erected in 1875 by public subscription for the benefit of cabmen; the Homœopathic Dispensary, in South Tay Street, opened in 1876; Harris's Charity, originated in 1874 in a gift of £10,000 from Mr Wm. Harris, the interest of which is applied for the relief of those who have seen better days; the Sunday morning free breakfasts to the poor, originated in 1875; the Dundee Humane Society, for the purpose of rewarding those who distinguish themselves by their courageous and humane exertions in saving life, established in 1865; the Dundee Swimming Club and Humane Society, formed in 1874, to encourage swimming in all its branches, and to reward those persons who may be the means of saving life; the Clothing Society, conducted by ladies, embraces all denominations, and is perfectly unsectarian in its character. Committees (1893) have been appointed for the establishment of a Maternity Hospital and an Hospital for Incurables, a gift of £1000 having already been intimated to the former institution. These committees expect to be able to begin active operations whenever the Cobb trustees allocate the money at their disposal—a bequest to the city of between £60,000 and £80,000. There is a local treasurer for the Indigent Gentlewomen's Fund, for the relief of ladies who, having been brought up genteelly, have fallen into poverty through no fault of their own. There are also local agencies for a number of metropolitan and national charitable institutions.

Dundee acquired the title and dignity of a city by royal charter dated 11th January, 1892, Alexander Mathewson, Esq., being the first Lord Provost, and in the same year the boundaries were extended in the Clepington district by Act of Parliament. Previous to the passing of the Reform Bill of 1832 it united with the burghs of Perth, Cupar-Fife, St Andrews, and Forfar in sending one representative to parliament; but when that measure became law it elected a member of its own, and since 1868 it has had two parliamentary representatives. A sheriff-substitute for Dundee was first appointed in 1832, and since 1865 it has been the seat of a circuit court of judiciary. For some years the police force was regulated by a statute passed in 1837, which vested the management jointly in the magistrates and in a specially-elected body of general commissioners. Subsequently however, by the adoption of the General Police Act of 1850, the whole parliamentary area, including the populous district of Lochee, and also the harbour of Dundee, were embraced in the police boundaries. In Oct. 1881, in consequence of a disagreement respecting the sum to be paid by the harbour trustees to the police commissioners for watching, cleansing, and lighting the harbour, the trustees from that date undertook the duty themselves. The Central Police Office is in West Bell Street; and there are district stations in Princes Street, Scouringburn, Maxwelltown, and South Road, Lochee. The force consists of—1 superintendent, 3 lieutenants, 6 inspectors, 1 sanitary inspector (who is also inspector of lodging-houses) and 7 assistants, 1 detective inspector and 8 detective officers, 1 inspector of markets and 1 assistant, 14 sergeants, and about 143 constables. The prison, in West Bell Street, was erected in 1837 at a cost of £26,000; had considerable additions made to it in 1844, in 1857, and again in 1872. For making provision for the poor, Dundee and its suburbs used to be divided into two districts—namely, the parish of Dundee proper and the united parish of Liff and Benvie—each of which had its own house for the reception of paupers, and its own funds, assessment, and board of management; but in 1879 the two districts were united under one management, the two workhouses being retained for the eastern and western districts respectively. What used to be the Dundee Poorhouse is situated at Maryfield, to the W of the Forfar Loan; was erected in 1856 at a cost of £10,000, with accommodation for 300 inmates; but was subsequently enlarged so

as to receive 650 persons. What was the Liff and Benvie Poorhouse is in the Blackness Road, was erected in 1864, and is capable of accommodating upwards of 168 inmates. In 1869 the waterworks of the Dundee Water Company were transferred, by purchase, at an expense of fully £5000, to the Corporation, by whom, as the Dundee Water Commission, the water supply is now controlled. The water supply formerly came from Monikie, but by the construction of new works the city in 1893 is wholly supplied from Lintrathen Loch with 9,000,000 gallons daily. The water is of great purity and the supply can be largely increased. A gas company was first formed in Dundee in 1825, a second in 1846; and in 1868 the works and plant of both companies were acquired by a mixed body, of whom the Corporation formed the majority, and who now, as the Dundee Gas Commission, supply the community with gas. The works are in East Dock Street, and have been from time to time extended to meet the increasing requirements of the town. In the parliamentary session of 1882 the Gas Commission applied to parliament for a bill authorising them to manufacture and supply the electric light, and in 1893 the centre of the city was lit up with this illuminant. A commodious and convenient cattle market, with slaughter-houses and other adjuncts, was provided in 1876 by the police commissioners at Carolina Port, adjoining the East Dock Street railway station, at a cost of about £35,000. The extent of ground is about 6½ acres, and the frontage to the Ferry Road on the N, and Dock Street on the S, is between 500 and 600 feet. The Greenmarket—the open street between the foot of Crichton Street and Dock Street—is where a large portion of the marketing of the working-classes is conducted. The Fish Market is held in Craig Street in premises which extend to the river. Spacious public offices were erected in 1893 in Commercial Street for the accommodation of the Water and Gas Commissioners. The Post Office having become inadequate for the purposes for which it was intended, and being in appearance unworthy the dimensions and importance of such a city as Dundee, the erection of a new one was begun in 1895. The site of the new building is at the corner of Constitution Road and Meadowside, and the contract price is £21,366. Postal receiving-houses, with money order and savings bank departments, are in King Street, Hilltown, Perth Road, Scouringburn, Princes Street, and Blackcroft. Telephonic communication is provided by the Post Office authorities, who in 1893 took over the National Telephone Company's work.

Dundee was the second town in Scotland to open a Free Public Library, which it decided to do at a public meeting held on Sept. 6, 1866, but the library itself was not opened until July 1, 1869, and the reference department three months afterwards. The success of the Free Library was so great that ultimately arrangements were made by which the Albert Institute directors conveyed to the town the ground necessary for the erection of additional buildings to be occupied as a picture gallery and museum, and also, as has already been stated, vested the whole of the Albert Institute in the Town Council, as trustees for carrying out the purposes for which the institute was founded. In 1873 a branch of the Lending Library was opened in Lochee; but it was taken advantage of to so small an extent, that it was discontinued after a few months' trial. The museum occupies the extreme E end of the Albert Institute buildings; was formally opened to the public on May 9, 1874; contains a large number of geological, botanical, and natural history specimens, besides a splendid collection of articles from the Arctic regions. The picture gallery is enriched with some choice works of art, although the collection is not nearly so large as it ought to be. An annual Fine Art Exhibition is now held in the Albert Institute buildings. Dundee was first provided with public baths by a joint-stock company in 1848; but in 1871 they were acquired by the Corporation, and have since been greatly extended and improved. The baths are situated on the West Protection Wall, closely adjoining the river, so that an abundant water supply can

at all times be had. They include a handsome Turkish bath, splendid swimming ponds, and excellent plunge baths. In 1891 additional public baths were opened in Guthrie Street and Horse Water Wynd. Dundee furnishes two contingents to the Forfarshire Rifle Volunteer Corps—the 1st V. B. Black Watch, consisting of 8 companies, with about 800 men of all ranks; and the 3rd V. B. Black Watch (Dundee Highland), of 6 companies, with about 600 men of all ranks. It also furnishes a corps to the Forfarshire Artillery Brigade, and a company of submarine mining engineers for the defence of the Tay. In 1881 an attempt was made to raise a brigade of Naval Artillery Volunteers; but in Jan. 1882, the Lords Commissioners of the Admiralty declined to sanction the undertaking, as a sufficient number of volunteers had not come forward. Dundee, however, furnishes a larger contingent towards the Royal Naval Reserve than any port in Scotland, and more than any port in the kingdom in proportion to its seafaring population. For their training the *Unicorn*, formerly a double-decked frigate, has been specially fitted up, and now lies moored in Earl Grey's Dock. The Savings Bank is situated in Euclid Street, nearly opposite Ward Chapel; was originally established in 1815, but removed to its present handsome quarters in 1867. The progress of the bank is shown by the following statement of the sum due to depositors during a series of years, ending at November 20 in each year:—1860, £108,779; 1865, £150,897; 1870, £256,400; 1875, £409,558; 1880, £566,608; 1891, £1,130,313; 1895, £1,520,070. A working men's club, with suitable premises in South Tay Street, was established in 1873 by the munificence of Mr George Armitstead, one of the then parliamentary representatives of the burgh, but after maintaining a languishing existence was closed in Dec. 1881. The theatre stands at the junction of Gellatly Street and Seagate, having been erected in 1885 by a joint-stock company, after designs by Mr W. Alexander, city architect, and accommodates 1700. The Dundee Music Hall, formerly the Exchange Room, at the foot of Castle Street, has been converted into the City Assembly Rooms. A circus, erected by the Brothers Cooke behind the Queen's Hotel, Nethergate, was opened in Feb. 1878, but was burned in April 1891. It was rebuilt by Messrs Livermore Brothers, and opened by them in January 1893 as a People's Palace of Popular Entertainments; it can also be used as a circus. The Dundee Public Gymnasium, Ward Road, a French Renaissance building from designs by Bailie M'Culloch, was opened in Sept. 1891. It is furnished in the most complete manner with all the necessary apparatus for gymnastic purposes, and is well supplied with the usual accessories of such a building. The floor of the hall can be cleared and made available for racing, musical drill, etc. In 1891 athletic grounds were opened at Carolina Port. Dundee possesses a number of yachting and rowing clubs; has a fine skating pond at Stobsmuir; an open-air bathing pond at Stannergate; an open-air bathing association, and the East End Bathing Ponds; a chess club, founded in 1826; and several angling clubs, besides numerous cricket, football, and bowling clubs. Amongst its miscellaneous institutions are a time gun, connected by an electric wire with the Observatory at Greenwich, and fired daily at one o'clock; and two Russian guns, captured during the Crimean war, and placed in front of the Esplanade station, Magdalene Green.

Dundee has three railway stations—one at the E end of Dock Street, another at the W end, and a third the Tay Bridge station—immediately adjoining the Esplanade. The first Tay Bridge was one of the longest in the world, its length, including the extension on the northern shore, being 10,612 feet. This great length was taken in 85 spans of varying width, the widest, of which there were 11, being 245 feet. It was designed by Thomas Bouch (afterwards knighted), cost £350,000, and was opened for traffic on May 31, 1878. On the evening of Sunday, Dec. 28, 1879, during a severe storm, the whole of the high central girders of the bridge were blown down while a passenger train was crossing from the S to the N, and every individual in the ill-fated train perished.

An inquiry into the cause of the disaster showed that both the design and construction were faulty, and that it was not well maintained. After much delay plans for a new bridge, a little to the west of the former structure, were sanctioned by the Board of Trade, and the work was begun in the spring of 1882 and completed early in 1887. It was designed by W. H. Barlow, F.R.S., London, built by Sir William Arrol & Co., Glasgow, and cost about £650,000. It is a wrought-iron, lattice-girder bridge, 2 miles and 73 yards in length, carries a double-line railway, and is supported on 86 pairs of piers, based on solid foundations, which are sunk to an average depth of 30 feet below the bed of the river. Its height in the centre is 77 feet from high-water level, thus allowing vessels going to Perth and Newburgh to pass underneath; and it declines imperceptibly to 65 feet on the south end, where the shore is high, and to 16 feet at the north end. The greatest care was taken in its construction, all the materials having been subjected to severe and most searching tests, and its massive appearance gives good guarantee of its stability. It was opened for traffic on 13th June 1887. Dundee is well supplied with tramways, and the company has conducted the traffic with such satisfaction that the town in 1893 entered into a new agreement with it.

The Dundee Chamber of Commerce, formed in 1836, but only obtaining its charter of incorporation in 1864, is now a large and influential body, composed principally of gentlemen engaged in the staple manufactures of the town. A Horticultural Society has existed for many years, and holds an annual exhibition at which prizes are awarded for the best plants, cut flowers, fruit, and vegetables. A Naturalists' Society was formed in 1872, which has accommodation provided for it in one of the rooms of the Albert Institute. The Dundee branch of the Royal National Lifeboat Institution has lifeboat stations at Broughty Ferry and Buddonness, and in 1892 instituted the Lifeboat Saturday Demonstration in support of its funds. There are also numerous provident, building, and insurance societies, and a number of co-operative societies. The Dundee Temperance Society was established in Jan. 1830; the Independent Order of Good Templars was introduced in Sept. 1870; and the Women's Temperance Prayer Union was formed in 1874. There are also various municipal and political, as well as social and convivial, organisations in the town. The newspapers are—the *Dundee Advertiser*, published daily, as well as a bi-weekly edition on Tuesdays and Fridays; the *Dundee Courier and Argus*, daily, also with bi-weekly issue on Tuesdays and Fridays, entitled the *Northern Warder*; the *Evening Telegraph*, daily; the *People's Journal*, every Saturday; and the *Weekly News*, every Saturday. The *People's Friend*, a Scottish literary miscellany, is published every Wednesday; the *Wizard of the North*, a comic journal, monthly; and the *Piper o' Dundee*, weekly.

The manufactures of the town exhibit a remarkable history of failure, perseverance, and eventual success. Coarse woollens, under the name of plaiding, dyed in Holland, and exported throughout Europe; bonnets, so extensively manufactured as to employ a large proportion of the population; coloured sewing thread, made by 7 different companies, maintaining 66 twisting-mills, and employing 1340 spinners; the tanning of leather, in at least 9 tanyards, and to the annual value of £14,200; glass, in 2 factories, one for window glass, the other for bottle glass; the spinning of cotton, vigorously conducted, for a time, by 7 different companies; the refining of sugar, carried on in a large building in Seagate; these and other minor manufactures all flourished for a season, and terminated in disaster and extinction, some of them leaving their names on their localities.

The staple trade for some time was in flax and linen; afterwards included hemp; and of late years, with rapid increase, has turned largely on jute. For many years, with the view of encouraging the linen trade, a bounty was paid by the Government on all linen exported; and in 1832—the last year that this bounty was paid—the value of the linen sent out from Dundee

amounted to £600,000. The largest hemp and flax establishment in the town is that of the Messrs Baxter Brothers in Princes Street, which covers upwards of nine acres of ground. This firm employs upwards of 4000 workpeople, and consumes 7000 tons of flax alone per annum, besides a considerable quantity of hemp—a quantity exceeding what is worked up by any other firm in the world. It is here that the greater part of the ships' canvas for the British Royal Navy is manufactured. Jute, however, is now the staple trade of the town, its development since the civil war in America having been something marvellous, and almost fabulous fortunes having been made by some of the larger manufacturers engaged in it. Since 1874, however, the trade has been in a very depressed state, mainly in consequence of the number of jute factories that have been established in other parts of the country, on the Continent, and in Calcutta.

The following is a return of the quantity of jute, flax, hemp, and codilla imported and of the manufactures exported during the six years ending 31 May 1895:—

IMPORTED.

Year.	Jute.	Flax.	Hemp	Codilla.
	Tons.	Tons.	Tons.	Tons.
1890	206,759	29,896	1053	4776
1891	233,919	19,590	948	5336
1892	196,696	19,932	1251	7581
1893	201,414	13,893	1883	5763
1894	185,205	16,640	1685	4367
1895	238,226	20,342	1592	4280

MANUFACTURES EXPORTED.

Year.	Linen and Jute Manufactures.	Bags and Sacks.	Yarns.
	Tons.	Tons.	Tons.
1890	72,371	16,900	21,189
1891	76,018	16,986	23,977
1892	89,825	13,239	19,241
1893	84,962	15,236	20,532

1895	9,407	14,805	23,798

The seal and whale fishing employed five vessels in 1892, with such poor success, however, that several vessels were despatched at the end of the year to the south polar seas in search of better fishing ground, but the results were not encouraging. Every ship engaged in the fishery has from 70 to 90 of a crew, who have to be provisioned for several months; and to this outlay has to be added the cost of repairing and refitting the vessels, which is sometimes a pretty heavy sum. When it is mentioned that the capital invested in the whaling fleet represents a total of about £200,000, some idea may be formed of its magnitude. The value of the fisheries varies in different seasons, but of late years it has been on the decrease. The average price obtained for seal skins may be put at 4s. 6d. each, and every tun of oil is worth about £35; while, as regards the whale fishery, the price of the oil obtained may be given at £40 per tun, and of bone at £500 per ton, although it has been as high as £1000 per ton in some years. Some of the vessels engaged in the fishings belong to private individuals, and the others to joint-stock companies. The following is a return of the fisheries for a series of years:—

Year.	Whale and Seal.		Year.	Whale and Seal.	
	Blubber.	Bone.		Blubber.	Bone.
	Tuns.	Cwts.		Tuns.	Cwts.
1870	1630	810	1890	962	190
1880	2065	1120	1891	573	281
1881	3168	500	1892	791	164
1887	822	235	1893	1133	68
1888	1234	155	1894	1315	387
1889	969	45	1895	609	282

The following is a statement of the number of vessels that entered the harbour, and their aggregate tonnage, for several years:—

Year.	Number of Vessels.	Registered Tonnage.	Year.	Number of Vessels.	Registered Tonnage.
1890	2344	630,491	1893	2970	710,285
1891	3075	699,775	1894	2865	644,843
1892	3071	708,782	1895	3122	774,142

The number of vessels belonging to Dundee in 1894 was 171, with an aggregate tonnage of 125,534. Of these 83 were sailing and 88 steam vessels, of 67,412 and 58,122 tons respectively. As regards its shipbuilding the following table, showing the number of vessels and amount of tonnage launched and on hand at the end of each of a number of recent years, will serve to indicate the position of that industry.

Year.	Launched.		On Hand.	
	Vessels.	Tonnage.	Vessels.	Tonnage.
1888	8	11,197	12	17,199
1890	14	23,474	9	11,088
1892	10	21,990	2	6,870
1895	9	8,222	3	1,000

The engineering and iron-founding trades of the town are also of considerable importance, and a large trade is also done in the manufacture of confectionery, marmalade, leather, boots and shoes, tobacco, etc., as well as in the brewing of beer and the grinding of flour.

Lochee forms a sort of outgrowth of Dundee, being separated from the body of the town by a very circuitous and irregular road; and, although now forming part of the burgh, retains much of the village character; has two places of worship in connection with the establishment—the *quoad sacra* churches of Lochee and St Luke; a Free church, U.P. church, St Margaret's Episcopal Church, St Clement's Roman Catholic chapel, St Mary's of the Immaculate Conception, and a Baptist chapel. Wellburn Asylum, conducted under Roman Catholic auspices, affords accommodation for 100 aged men, and a similar number of old women. The Camperdown Linen Works, of Messrs Cox Brothers, are the largest of the kind about Dundee, and give employment to a large proportion of the inhabitants of Lochee.

The name Dundee was anciently written *Donde*, *Dondie*, and *Dondei*; and is supposed by some to be a corruption of the Latin *Dei Donnm*, signifying the 'gift of God,' by others to be a variation of the Celtic *Duntaw*, signifying the 'hill of Tay.' The name *Alec* or *Alectum*, signifying 'a handsome place,' is alleged to have been previously used, but seems to have been merely a poetical epithet applied to Hector Boece. The town is said by some old historians to have been a place of importance and strength at the time of the Roman invasion under Agricola; but it really does not appear fairly on record till the year 834, and not very authentically even then; and, like all the other ancient towns of Scotland, it suffered obscuration or obliteration of its early history from destruction of public documents by Edward I. of England. Elpin, King of the Scots, is said to have, in 834, made Dundee his headquarters in warfare against Brude, King of the Picts, to have led out from it an army of 20,000 against him to Dundee Law, and to have there been discomfited, captured, and beheaded. Malcolm II., in 1010, concentrated his forces in Dundee, and led them thence to his victory over the Danish general at Barrie. Malcolm Ceanmor, about 1071, as we have already noticed, erected in Dundee a palace for his Queen Margaret; and King Edgar, in 1106, as also we previously stated, died in that palace. David, Prince of Scotland, Earl of Huntingdon, the hero of Sir Walter Scott's graphic story of *The*

Talisman, landed at Dundee on his return from the crusades; was met here, soon after his arrival, by his brother William the Lyon; received from William a gift of the town, together with conferment on it of extended privileges; and, in fulfilment of some vows which he had made in the spirit of the period, erected in it, on the site of the present town churches, a magnificent chapel. His eldest daughter, mother of the Princess Devorgilla, was married at Dundee in 1209, to Alan, Lord of Galloway and Constable of Scotland.

The town, at that time and onward to the Wars of the Succession, was the most important one in the kingdom, not even excepting Perth, Stirling, and Edinburgh, for at once wealth, population, and political consequence; it received confirmation of its immunities and privileges from Alexander III.; and it therefore was a prime mark of Edward I. of England's arrows in his usurpation of Scotland's rights. His forces came against it in 1291, took possession of its castle, burned or otherwise demolished its churches, sacked its private houses, destroyed or carried off its records, and inflicted ruthless barbarities on its inhabitants. Edward himself entered it in 1296, and again in 1303; and, in the latter year, subjected it once more to conflagration and disaster. Sir William Wallace had attended its grammar school when about 16 years of age; he began his public career by appearing in it amid the desolations done by Edward, and killing the son of the English governor who held its castle; he laid siege to it, with such forces as he could collect, in the summer of 1297; he temporarily relinquished the siege, in result of intelligence which drew him off to Stirling to achieve his great victory there; he returned to Dundee to resume the siege, immediately after his victory of Stirling; he promptly got possession of the town by unconditional surrender; and he received from the burghesses a handsome guerdon in money and arms. Its castle, soon after Wallace's departure, was seized and garrisoned by a partisan of Edward; was speedily besieged again by Wallace; first in person, next through his lieutenant, Alexander Scrymgeour; was pressed by the latter with a force of 8000 men, and eventually reduced; and was ordered by Wallace to be demolished, that it might no more afford foothold to invading armies. Scrymgeour, in reward of his bravery, was constituted by Wallace Constable of Dundee; and formed the source of a series of hereditary constables, one of whom became Viscount Dudhope. A great council, as we formerly noticed, was held within the Greyfriars' Monastery, in 1309, to recognise Robert Bruce as King of Scotland. The castle, in 1312, was rebuilt and garrisoned by the English; in the same year was captured by Prince Edward, brother of Robert Bruce; in the same year was recaptured by the English; and, in the early part of 1313, was captured again by Prince Edward. Robert Bruce resided in the town during part of 1314; and, while here, conferred upon it some new important gifts. Richard II. of England, in 1385, attacked the town and burned it. James V. and his Queen, in 1528, attended by a numerous train of prelates, nobles, and gentlemen, were magnificently entertained in the town for six days.

Dundee was the first town in Scotland to receive the doctrines of the Reformation. Wishart began his ministry herewith public lectures on the Epistle to the Romans; had crowded and attentive audiences; was temporarily driven from the town at the instance of the Romish authorities; came back, four days afterwards, on learning that pestilential plague had struck it; preached to its terrified inhabitants, as we formerly noticed, from the battlements of Cowgate port; and was instrumental of so great and permanent spiritual benefit to it, as to occasion it to be afterwards called the Second Geneva. An army of Henry VIII. of England, after the battle of Pinkie in 1547, advanced to Dundee; entered it without opposition, such forces as could be raised in it retiring at their approach; began to fortify it with defensive walls at its most accessible parts; held possession for only eight days, in consequence of the rumoured advance of French and other troops in the interest of

the Queen Regent; and, on the eve of their departure, demolished the fortifications which they had begun to erect, rifled the town, and set fire to its churches and to many of its houses. The Queen Regent's troops entered without resistance; united with the townspeople in quenching the conflagration which was going on; and reconstructed and extended the defensive fortifications. A body of the townsmen, to the number of nearly 1000, headed by their provost, Hallyburton, in 1559, hearing of the hostile intentions of the Queen Regent, marched into junction with the army of the Reformers, and contributed largely to their victory at Perth. Queen Mary, during her progress through Scotland, in 1565, spent two days in Dundee; and, despite the antagonism between her religions tenets and those of the townspeople, was treated with every mark of loyalty and affection. The town gave refuge, in 1584, both to the celebrated Professor Melville of St Andrews and the notable Earl of Gowrie, who figured in the raid of Ruthven. James VI. visited the town at periods between 1590 and 1594, and revisited it with pompous ceremonial in 1617.

The Marquis of Montrose, in 1645, with a force of only about 750 men, stormed the town, plundered its churches and principal houses, and set parts of it on fire; but was suddenly chased from it by an army of 3800 under Generals Baillie and Harry. Charles II., in 1651, immediately before his march into Worcester, spent some weeks in Dundee; got sumptuous entertainment from the magistrates; and was provided by the inhabitants with a stately pavilion, six pieces of artillery, and some troops of horse. General Monk, in the same year, besieged the town; encountered a stubborn, prolonged, and sanguinary resistance beneath its walls; broke eventually into it with terrible impetuosity; slaughtered all its garrison and more than 1200 of its inhabitants, and subjected it to such a pillage that each soldier in his army received nearly £60 sterling. Graham of Claverhouse, in 1689, two years after he had been created Viscount Dundee, and about six weeks before he fell on the battlefield of Killiecrankie, approached the town with intention of inflicting on it signal vengeance; but was met, and mainly repelled, by a prompt armed embodiment of the burghesses; yet succeeded in setting fire to the entire suburb of Hilltown. Graham of Duntrune, in Sept. 1715, proclaimed in Dundee the Pretender as King of the British dominions; and the Pretender himself, in the following January, made a public entrance into the town and spent a night, as we formerly mentioned, in the town mansion of Stewart of Grandtully. A force of Prince Charles Edward, consisting of about 600 men under the command of Sir James Kinloch, held possession of the town from 7 Sept. 1745 till 14 Jan. 1746. Queen Victoria and the Prince Consort, in Sept. 1844, on their way to Blair Castle, landed at Dundee; and the Prince and Princess of Wales, in Sept. 1864, embarked at it for Denmark. The Queen, the Prince and Princess of Wales, Prince Leopold, General Grant, ex-President of the United States, and other eminent personages also visited it after the first Tay Bridge was opened. In 1892 the Marquis and Marchioness of Lorne (Princess Louise) visited the city to inspect the Nurses Home in Dudhope Place.

Many natives of Dundee and its vicinity, and many other persons who have resided in it, are on the roll of fame. Some of the chief are Sir William Wallace, who attended its grammar school, and possibly was a native; Sir Nicol Campbell of Lochow, the ancestor of the Dukes of Argyll; John Blair, who celebrated the enterprises of Sir William Wallace in a Latin poem, now lost; Alexander Scrymgeour, already mentioned as the first of the hereditary constables of Dundee; Hector Boece, the old Scottish historian; Robert Pittloch or Patullo, who commanded the Scottish guard in the service of France, and acquired distinguished military honours, under Charles VII.; James Hallyburton, provost of the town for more than thirty years, and a strenuous defender of the principles of the Reformation; James Wedderburn and his brother, vicar of Dundee, who considerably aided the overthrow of the Roman Catholic

church by their satires on its clergy; Dr Kinloch, physician to James VI.; the elder Marr, the friend and fellow-labourer of Napier of Merchiston, the inventor of logarithms; James Gleg, who left a professor's chair in St Andrews to become rector of Dundee grammar school; Sir George Mackenzie, Lord-Advocate of Scotland, author of the *Institutes of the Scots Law*, and founder of the Advocates' Library in Edinburgh; John Marr, the constructor, in the 17th century, of a remarkably accurate chart of the Firth of Tay and North Sea; George Yeaman, the representative of the town in the last Scottish parliament, and one of the ablest and most patriotic legislators of his country; Robert Fergusson, the talented but unfortunate Scottish poet, who early came to a disastrous end in Edinburgh; Robert Stewart, an eminently literary man, and a distinguished surgeon; Sir James Ivory, the celebrated mathematician; James Weir, also a profound mathematician; Admiral Viscount Duncan, the hero of Camperdown, and of many other naval battles; Dr Robert Small, the author of an *Explanation of the Astronomical Theories of Kepler*; the Rev. John Glass, founder of the religious body called Glassites; the Rev. John Willison, author of the *Afflicted Man's Companion*; the Rev. Dr Russell, author of a number of religious works, and a powerful preacher; the Rev. R. M. M'Cheyne, author of a *Mission to the Jews*, and a most effective preacher; Thomas Hood, the humorist; William Thom and Robert Nicoll, the well-known poets; William Gardiner, author of the *Flora of Forfarshire*, and other botanical works; J. B. Lindsay, a distinguished mathematician, electrician, and linguist; Alexander Wedderburn, first Earl of Rosslyn; and Charles Middleton, first Lord Barham; Sir David Baxter, an eminent manufacturer, and a distinguished local benefactor; the Rev. George Gilfillan, a popular lecturer, author, and divine.

The parish of Dundee contains also parts of Lochee and Broughty Ferry, and until 1891 it had a detached part, situated at Duntrune, and adjoining the parishes of Murroes and Tealing; the Boundary Commissioners in that year, however, transferred this detached portion, containing 794 acres, to the parish of Murroes. The parish lies along the Firth of Tay; contains the greater part of the town of Dundee; and is bounded N by Liff, Mains, and Murroes, E by Monifieth, and W by Liff and Benvie. It has an elongated form, stretching from E to W, broadest at the E end, narrowest at the middle; and it measures $6\frac{1}{2}$ miles diagonally from NE to SW, $5\frac{1}{2}$ miles in direct length from E to W, and $2\frac{1}{2}$ miles in extreme breadth from N to S. The area is 4432 acres, of which 173 are foreshore and 38 water. The surface rises gently from the shore; swells somewhat suddenly into braes in the northern outskirts of the town; ascends boldly thence to the green round summit of Dundee Law, at an elevation of 572 feet above sea-level; forms, to the W of the Law, the lesser yet considerable and finely-wooded height of Balgay Hill; and all, as seen from the Fife side of the Tay, presents a beautiful appearance. The view from most parts of it is charming, and that from the top of Dundee Law is at once extensive, panoramic, and splendidly picturesque. E and S, as far as the eye can reach, the mouth of the Tay, the bay and towers of St Andrews, the German Ocean, and the greater part of Fife, are seen spread out as in a map. Turning to the opposite point of the compass, the dark ridges of the Sidlaw Hills, with a broad valley intervening, and the more distant peaks of the Grampians, meet the eye. The Tay, opposite the town, is rather less than 2 miles broad; and it contracts further down to a width of barely 1 mile. Dighty and Fithie Waters traverse the north-eastern part of the main body, and make a confluence at the boundary with Monifieth. The rocks are chiefly porphyry, sandstone, amygdaloid, and trap, and they lie geognostically subjacent to the Carboniferous strata. Paving-stone and slate are raised in small quantity. The soil, in the E, is partly alluvial, partly argillaceous, and generally good; in the W, is thin and dry; in the NW and behind Dundee Law, is poor, upon a tilly bottom. Mansions, separately noticed,

are Craigie, Claypots, and Duntrune. Dundee is the seat of a presbytery in the synod of Angus and Mearns. It ranked till 1834 as one parish, but was served by two ministers from the Reformation till 1609; it acquired a third minister in 1609, a fourth and a fifth in 1789; and it now is divided into the *quoad civilia* parishes of Dundee proper, St Mary, St Clement, and St Paul, with much of St David and St John, and contains whole or part of the *quoad sacra* parishes of St Matthew, St Mark, St Andrew, St Enoch, Chapelshade, Clepington, Wallace-town, Rosebank, and Logie, and the chapelries of Maryfield and St Thomas.—*Ord. Sur.*, shs. 48, 49, 1868-65.

The presbytery of Dundee comprises the old parishes of Dundee, Abernyte, Auchterhouse, Inchture, Kinnaird, Liff and Benvie, Longforgan, Llundie and Fowllis, Mains and Strathmartine, Monifieth, Monikie, Murroes, and Tealing; the *quoad sacra* parishes of Broughty Ferry, Broughty Ferry-St Stephens, Dundee-St Matthew, Dundee-St Mark, Dundee-St Andrew, Dundee-St Enoch, Chapelshade, Clepington, Wallace-town, Rosebank, Logie, Lochee, and Lochee-St Luke; and the chapelries of Dundee-St Thomas, Maryfield, Invergowrie, Downfield, and Monifieth-St Margaret, and Beach Mission. Pop. (1831) 163,732, (1891) 178,795, of whom 24,808 were communicants of the Church of Scotland in 1892. The Free Church also has a presbytery of Dundee, with 18 churches in Dundee, 3 in Broughty Ferry, 2 in Monifieth, and 7 in respectively Abernyte, Liff, Lochee, Longforgan, Mains, Monikie, and Tealing. The U.P. Synod has also a presbytery of Dundee, with 14 churches in Dundee, 2 in Kirriemuir, 2 in Broughty Ferry, and 5 in respectively Alyth, Blairgowrie, Ferry-Port-on-Craig, Newbigging, and Newport.

Dundee and Arbroath Railway, a railway in the S and SE of Forfarshire, from Dundee east-north-eastward to Arbroath. It was authorised, in 1836, on a capital of £266,700 in shares and £88,900 in loans; was opened in April 1840; became amalgamated with the Scottish North-Eastern in July 1863; and passed, with the North-Eastern, to the Caledonian in July 1866. On Feb. 1, 1880, the North British Railway Co. became joint owners of the line with the Caledonian Co. It is 17 miles long; traverses the parishes of Dundee, Monifieth, Barry, Panbride, St Vigeans, Arbirlot, and Arbroath; and has junctions at Broughty Ferry with the northern terminus or Dundee-ward fork of the North British railway, and at Arbroath with the E end of the Arbroath and Forfar railway, and through that with the Aberdeen section of the Caledonian. It commences at Trades Lane in Dundee; runs parallel with Dock Street; crosses, for about a mile, a baylet of the Firth of Tay; traverses a very deep rock cutting on the Craigie estate; intersects, at two different points, the road between Dundee and Broughty Ferry; goes along Broughty Ferry links, and through the barren sands of Monifieth and Barry; traverses thence, for 6½ miles, a tract of little interest; and has, in its course, both under and over it, a number of beautifully constructed bridges.

Dundee and Forfar Railway, a railway in the S of Forfarshire, from Dundee north-north-eastward to Forfar. It was authorised, in July 1864, on a capital of £125,000 in shares and £40,000 in loans; is 17¼ miles long; and was opened in Nov. 1870. It belonged, at first, to the Scottish North-Eastern Company; and passed, with the rest of the North-Eastern system, to the

Caledonian. It gives direct communication between Dundee and Forfar, in lieu of the circuitous route by way of Arbroath; and connects, at Forfar, with the lines thither from respectively Arbroath and Perth. A plot of 9 acres for its use at Forfar was purchased, on the eve of its opening, from the Forfar Town Council.

Dundee and Newtyle Railway, a railway in the SW of Forfarshire, from Dundee north-westward to Newtyle. It was originally a single track line, 10½ miles long, formed on an authorised capital of £140,000 in shares and £30,000 in loans, and opened in 1831; was leased in perpetuity, under an act of 1846, to the Dundee and Perth Company, with further authorised capital of £50,000 in shares and £16,606 in loans; underwent alterations and extensions, under both that act and an act of 1859, with still further authorised capital of £70,000 in preference shares; was again extended and improved, to the aggregate length of 4½ miles, under acts of 1862 and 1864, on further authorised capital of £49,000 in shares and £14,900 in loans; became amalgamated as part of the Dundee and Perth system with the Scottish Central in 1863; and passed, as part of the Scottish Central system, to the Caledonian in 1865. It originally left Dundee on an inclined plane 800 yards long, with a gradient of 1 yard in 10, and proceeded through a shoulder of Dundee Law in a tunnel 340 yards long; and had a branch for goods traffic, through the streets of Dundee to the terminus of the Dundee and Perth railway; but these features of it have disappeared. A new reach, in lieu of the discarded portions, and measuring 7¾ miles in length, was opened in June 1859; and a branch to Lochee, 6 miles in length, was opened in June 1861. It traverses the parishes of Dundee, Liff and Benvie, Mains and Strathmartine, Auchterhouse, and Newtyle; ascends an inclined plane, in the gorge of the Sidlaws, to a summit-elevation of 544 feet above sea-level, and descends a second inclined plane, through the Slack of Newtyle, into the valley of Strathmore; connects there, with the North-Eastern section of the Caledonian system, by branches, some of which were originally its own; and communicates, through these, with Coupar-Angus, Meigle, Glamis, and Forfar.

Dundee and Perth Railway, a railway in Forfar and Perth shires, from Dundee west-south-westward, along the northern bank of the Tay, to Perth. It is 21½ miles long, and, opened in May 1847, was amalgamated in 1863 with the Scottish Central, with which it passed to the Caledonian in 1865. It commences at Yeaman Shore, in Dundee; skirts the western part of that town on a sea embankment; runs along the face of the romantic cliff of Will's Braes; traverses the charming beach of Invergowrie Bay, near Invergowrie village; crosses the great sandstone quarries of Kingoodie on a stupendous viaduct; passes near Inchture Bay and Powgavie Harbour; sheers off to some little distance from Errol, and northward of Inchyra; coincides again with the river's bank, past Kinnoull; crosses the Tay, from Barnhill, on a magnificent bridge of great length, in the form of a segment of a circle, with the central part resting on an island; terminates at the Princes station in Perth; and connects, at its E end, with the Dundee and Newtyle railway—at its W end, with the several railways radiating from Perth. The scenery along its course, through the Carse of Gowrie, and past Kinnoull Hill all onward to Perth, is everywhere beautiful, in many places brilliant, from Glencarse to Perth superb. The final meeting of the shareholders as an independent company was held on Jan. 6, 1882.

Dundavid. See DUNTULM.

Dundelchack or **Dun na Seilcheig**, a loch on the mutual border of Daviot and Dores parishes, NE Inverness-shire, 8½ miles SSW of Inverness. Lying 702 feet above sea-level, it has an utmost length from SW to NE of 3¾ miles, whilst its breadth varies between 2¾ furlongs and 1 mile. It sends off a rivulet eastward to Loch Clachan, and thence to the river Nairn. Trout and red char are plentiful, the former running up to 4 lbs., but

neither rise very freely to the fly; and pike of from 3 to 20 lbs. may be taken by trolling.—*Ord. Sur.*, shs. 73, 83, 1878-81.

Dundonald, an ancient castle in the centre of Killean and Kilchenzie parish, Kintyre, Argyllshire. From the Macdonalds, Lords of the Isles, it passed to the ancestors of the Duke of Argyll, and is now represented by rude remains.

Dundonald, a village and a coast parish of Kyle, Ayrshire. The village stands, 113 feet above sea-level, 1½ mile S by E of Drybridge station, 4¼ miles NE of Troon, 4¾ SE of Irvine, and 5¼ SW of Kilmarnock, under which it has a post office. Dundonald Castle, crowning a beautiful round hill a little W of the village, seems, from the style of its architecture and from other circumstances, to have been erected in the 12th or 13th century. According to legend, it was built entirely of wood, with never a wooden pin, by one Donald Din, or Din Donald, the story of whose enrichment by the discovery, through a dream, of a pot of gold is related also of a Norfolk chapman, a spendthrift of Dort, and a Baghdad beggar (pp. 236-238 of Robert Chambers's *Popular Rhymes of Scotland*, ed. 1870). The residence of several princes of the Stewart dynasty and the death-place of Robert II. (1390), it has given the title of Baron since 1647, of Earl since 1669, to the family of Cochrane; and now, with 5 roods of land adjoining, it is the last remaining property in Ayrshire of that family. Tradition relates that it was shorn of its topmost story for building or improving their neighbouring house of Auchans; but it still forms a massive two-story ruin, measuring 113 feet by 40, and retains on its western wall, in high relief but much obliterated by time, the armorial bearings of the Stewarts. At its southern end are shattered remains of two or three arched cells, which belonged to its keep or prison; and it seems, from vestiges still visible, to have been surrounded by a rampart and a moat. Samuel Johnson and Boswell were here in 1773.

The parish, containing also the seaport of Troon and the FULLARTON suburb of Irvine, is bounded N by Irvine, Dreghorn, and Kilmaurs, E by Riccarton, SE by Symington and Monkton-Prestwick, SW and W by the Firth of Clyde. Rudely resembling a triangle in shape, with southward apex, it has an utmost length from NNW to SSE of 7¾ miles, an utmost breadth from ENE to WSW of 6½ miles, and an area of 13,404½ acres, of which 940 are foreshore and 99½ water. The coast-line, 8½ miles long, from the mouth of the Irvine to that of the Pow Burn, is low and sandy, broken only by the promontory of Troon, but fringed by Lappock, Stinking, Mill, Garden, and Scal Rocks, and Little and Meikle Craigs. The surface for some way inland is almost a dead level, and at its highest point but little exceeds 400 feet above the waters of the firth—said point occurring near Harpercroft, and belonging to the so-called Claven or Cleavance Hills. All under tillage, pasture, or wood, these form a central tract, and, extending about 3 miles south-eastward and 1½ mile south-westward, converge to a *culmen*, which commands a wide panoramic view, said to comprise portions of fourteen counties. From just above Gatehead station to its mouth, the river IRVINE, winding 11 miles west-north-westward, roughly traces all the boundary with Kilmaurs, Dreghorn, and Irvine; whilst Rumbling Burn follows that with Symington and Monkton, and one or two smaller rivulets flow through the interior to the firth. The rocks in the Claven Hills, and elsewhere in patches, are eruptive; in all other parts, belong to the Carboniferous formation. Coal has long been mined at Shewalton and Old Rome; excellent sandstone is quarried for exportation at Craiksland and Collennan; and hone-stone, of a very superior quality, abounds on the estate of Curreath. The soil, to the breadth of about ½ mile on nearly all the coast, except round Troon, is sandy and barren; in the adjacent tracts to the E, is of various character from light to loamy; in the extreme E, is mostly a loamy fertile clay; and is a stiffish clay in some other parts. A very large proportion of the entire area is under cultivation, and much is

devoted to dairy husbandry. A native was the cobbler-artist, John Kelso Hunter (1802-73). A famous pre-Reformation church, 'Our Lady's Kirk of Kyle,' adjoined Dundonald Castle, but has disappeared; and an ancient chapel stood on Chapel Hill, near Hillhouse mansion; while not far from Newfield the supposed remains of a Roman bath proved to be a modern horse-pond. A vitrified fort, now in a state of utter dilapidation, crowned a projecting eminence between two ravines at Kemplaw; and two ancient camps are on the heights above Harpercroft farm. AUCHANS House is an interesting object; and mansions of comparatively modern erection are Fullarton, Shewalton, Newfield, Fairlie, Curreath, and Hillhouse, Fullarton House, near Troon, being a seat of the Duke of Portland. In the presbytery of Ayr and synod of Glasgow and Ayr, this parish is divided into the *quoad sacra* parishes of TROON, FULLARTON, and Dundonald, the last being a living worth £414. Its church, built in 1803, contains 630 sittings; and four public schools—Drybridge, Dundonald, Loans, and Troon (Portland)—with respective accommodation for 80, 138, 60, and 604 children, had (1891) an average attendance of 36, 103, 38, and 464, and grants of £29, 17s. 6d., £106, 5s., £32, 5s. 6d., and £406; there is also St Patrick's Roman Catholic school, Troon, with accommodation for 172 children, an average attendance (1891) of 38, and a grant of £30, 16s. 6d. Pop. of civil parish (1801) 1240, (1831) 5579,* (1861) 7606, (1871) 6964, (1881) 8105, (1891) 9545; of Dundonald registration district (1871) 1507, (1881) 1509, (1891) 1166.—*Ord. Sur.*, sh. 22, 1865. See the Rev. J. Kirkwood's *Troon and Dundonald: with their surroundings, Local and Historical* (3d ed., Kilm., 1881).

Dundonnell, an estate, with a mansion, in Lochbroom parish Ross-shire, on the right bank of Strathbeg river, 8 miles S of Ullapool, under which there is a post office. Its owner is H. Mackenzie, Esq., whose deer forest extends to about 40,000 acres.

Dundonnell, a small green islet of Peterhead parish, Aberdeenshire, opposite Sterling Hill, and 5 furlongs S by W of Buchan Ness. It formerly had a salt-pan.

Dundornadil. See DORNADILLA.

Dundreich, a huge rounded hill near the eastern border of Eddleston parish, NE Peeblesshire. It culminates 2½ miles NE of Eddleston village at an altitude of 1954 feet above sea-level, and commands views into Lanarkshire, over the Lothians, and from the Cheviots to the Grampians.

Dundreennan (Gael. *dun-nan-droigheann*, 'fort of the thorn bushes'), a village and a ruined abbey in Rerwick parish, Kirkcudbrightshire. The village stands in a narrow valley, on the right bank of Abbey Burn, 1½ mile N by W of the coast at Port Mary, and 5 miles ESE of Kirkcudbright, under which it has a post office. Its environs are charming, with vantage grounds commanding fine views inland, down the valley, and across the Solway Firth; and the village itself consists of a single row of one-story houses containing many stones from the ruined abbey, and interspersed with fine old trees. At it are 2 inns, the manse and parish church of Rerwick, and a public school. The abbey, standing in the south-eastern vicinity of the village, was founded in 1142, for Cistercian monks, by Fergus, Lord of Galloway; passed, with its property, in 1587 to the Crown; and was annexed, in 1621, to the royal chapel of Stirling. It fell into such neglect and dilapidation as long to form a quarry for repairing or erecting neighbouring houses; but still is represented by considerable remains, with interesting architectural features, and in 1842 was cleared out and put into a state of conservation by the Commissioners of Woods and Forests. Its church was cruciform, comprising a six-bayed nave (130½ × 30 feet), with side aisles 15½ feet wide, a transept (107 × 28 feet), a choir (45 × 26 feet), and a central tower and spire 200 feet high; and was partly in the Transition Norman style, but chiefly in the First Pointed. The cloisters were on the S side of the church, and enclosed a

* An increase largely due to the annexation of Troon, Halfway, and Shewalton from Irvine.

square area of 108 by 104 feet; various monastic offices stood still further S, and occupied a space of nearly 300 square feet; and to the S of the S transept stood the chapter-house (51½ × 35 feet). The chief extant portions of the pile are the N and S walls of the choir; the E aisle of the S transept; part of the N transept; a few feet of the piers of the central tower, remarkable for their unequal dimensions; the doorway of the chapter-house, flanked on each side by a double window; the cells or cellars at the entrance to the garden; and several curious monuments—of Allan Lord of Galloway (1234), Prior Blakomor, an abbot, a nun (1440), a cellarer (1480), Sir William Livingstoun (1607), etc. Queen Mary is commonly said to have ridden straight from Langside to Dundrennan, or at least to have passed the last night (May 15, 1568) of her sojourn in Scotland here; but Dr Hill Burton questions this belief, challenging the authenticity of her letter to Elizabeth 'from Dundreunan,' and upholding the counter-claims of TERREGLES, Lord Herries' house. The estate of Dundrennan lies round the village and the abbey, and has long been the property of the Maitlands of Dundrennan and Compton.—*Ord. Sur.*, sh. 5, 1857. See the Rev. Æneas B. Hutchison's *Memorials of the Abbey of Dundrennan* (Exeter, 1857), and J. H. Maxwell's *Dundrennan Abbey, and its History* (Castle-Douglas, 1875).

Dunduff, a farm in Maybole parish, Ayrshire, 6 miles SW of Ayr. It contains a ruined baronial fortalice, the shell of the ancient church of Kirkbride, with a burying-ground still in use, and a field called the Priest's Land adjoining that graveyard.

Dundurcus, an ancient parish on the E border of Elginshire, on both sides of the river Spey, 6½ miles SSW of Fochabers. It was suppressed in 1782 or 1788, when the part of it on the right side of the Spey, excepting the small property of Aikenway, was annexed to Boharm; whilst that on the left side, together with Aikenway, was annexed to Rothes. The portion of it adjacent to the river is a beautiful haugh, and bears the name of Dundurcus Vale. Its church and burying-ground were situated on the verge of a plateau overlooking the haugh, 2 miles NE of Rothes village; and the church still exists in a state of ruin; while the burying-ground was re-enclosed, about 1835, with a substantial wall.

Dundurn, an ancient parish in Strathearn, Perthshire, at the foot of Loch Earn, now annexed to Comrie, and originally called Duinduirn or Dundearn after a dun or fortified hill at the foot of the loch. The principal stronghold of the district of Fortrenn, this dun was besieged in 683; and Grig or Girig, King of the Picts, was slain at it in 889. See ST FILLANS.

Dundyvan. See COATBRIDGE.

Dunearn Hill. See BURNISLAND.

Duneaton Water, a stream of the upper ward of Lanarkshire, rising on the SE slope of Cairntable (1944 feet) at an altitude of 1550. Thence it winds 19 miles east-by-northward, partly on the boundary between Douglas and CRAWFORDJOHN, but chiefly through the interior of the latter parish, till, after a total descent of 800 feet, it falls into the Clyde at a point 1½ mile below Abington. It receives so many little affluents, that over the last 4 or 5 miles of its course it has an average width of 40 feet; it is frequently swept by freshets, overflowing alluvial lands on its banks; it occasionally changes portions of its channel and lines of its fords; and it is an excellent trouting stream.—*Ord. Sur.*, sh. 15, 1864.

Dunecht, a seat of the Earl of Crawford in Echt parish, Aberdeenshire, 5½ miles SSW of Kintore station, and 12 W of Aberdeen, under which there is a post office of Dunecht. Originally a Grecian edifice of 1820, it has received a number of additions, the latest and most important that of 1877-81, from designs by the late Mr G. E. Street, R.A. Among its more noteworthy features are the observatory, the library, and the private chapel, from the vault beneath which, in the summer of 1881, was stolen the body of Alexander William Lindsay (1812-80), twenty-fifth Earl of Craw-

ford since 1398 and eighth Earl of Balcarres since 1651, who was author of works on the Lindsay family, the Mar peerage, Etruscan inscriptions, etc. His son and successor is James Ludovic Lindsay (b. 1847; suc. 1880), who is an ex-president of the Royal Astronomical Society and a fellow of the Royal Society. See CRAWFORD and BALCARRES.

Duneira. See DUNIRA.

Dunemarle. See DUNIMARLE.

Dunevan, an ancient fort near Cawdor, in Nairnshire. It has two ramparts, enclosing an oblong level space, on the top of a hill; it contains, within that space, traces of a well, and remains of a large mass of garrison buildings; and it held beacon communication, through intermediate forts, with Dundardil on Loch Ness.

Dunfallandy, an estate, with a mansion, in Logierait parish, Perthshire, near the right bank of the Tummel, 1½ mile south-south-east of Pitlochry. The estate is in a fine situation, and the whole surroundings are extremely beautiful. Of two stones here, one marks the scene of a dreadful murder and usurpation; the other, half-sunk in the ground, is carved with grotesque figures of animals, and was long regarded with much superstitious awe.

Dunfermline, a city and parish in the SW of Fife. A royal and parliamentary burgh, a place of manufacture, and the seat of administration for the western division of the county, the city stands on the North British line of railway from Thornton Junction to Stirling, at the junction of a branch line southward to Charlestown harbour, and of the line from Perth to Edinburgh *via* the Forth Bridge, by road being 5½ miles NW of North Queensferry, 16 NW of Edinburgh, and 29 S of Perth, whilst by rail it is 7½ WSW of Lochgelly, 15½ WSW of Thornton Junction, 29 SW of Cupar, 13½ E by S of Alloa, 20½ E by S of Stirling, and 42½ NE by E of Glasgow. Its site is variously flat and sloping, but consists mainly of a longish eminence, which, stretching from E to W, rises to a height of 354 feet above sea-level, and presents a somewhat bold ascent to the N. The environs abound in diversities of surface, enriched with floral ornament, and gemmed with fine close views; and they contain a number of mansions, villas, and pretty cottages. The city, as seen from any point near enough to command a distinct view, yet distant enough to comprehend it as a whole, looks to be embosomed in wood; and over the tree-tops rise Queen Anne Street U.P. church, 'with its enormous rectilinear ridge,' the steeples of the County Buildings, the Town House, and the old Abbey church, with the fine square tower of its modern neighbour. A stranger, approaching Dunfermline for the first time, forms a very mistaken notion of its extent, supposing it to be little else than a large village in a grove; and, on entering, is surprised to find himself in a city teeming with activity, bustling with trade, and every way worthy of ranking with the foremost burghs. Some vantage spots within the town, especially the vicinity of the Abbey and the top of the Abbey church tower, command extensive panoramic prospects. First, from the top of the tower are seen the rich tracts of south-western Fife, together with their equally fine continuation through the former detached district of Perthshire and through Clackmannanshire, to the Ochils; beyond is the Firth of Forth, from the great bridge westward, sometimes concealed by an elevated strip of coast, but here and there beheld in all its breadth through various openings, and rendered everywhere more picturesque by thus being chequered with land; further still are the southern banks and screens of the Forth, beautifully undulated and luxuriantly fertile, the many-wooded swells of the Lothians, the heights of Edinburgh, occasionally its very spires, the pleasure-grounds of Hope-toun, the promontory of Blackness, the harbour of Borrowstounness, and the 'links' of the Forth to the vicinity of Stirling; and, at the limits of vision, are the Lammermuirs of Haddington and Berwick shires, Soutra Hill at the watershed of the Gala and the Tyne, the Pentlands in Midlothian, Tinto in Lanarkshire, the

Canispie Fells in Stirlingshire, and Ben Lomond and Ben Ledi among the south-western Grampians.

The alignment and architecture of the town are far from corresponding with the exterior views. The older streets are narrow and irregular; the principal streets, though containing substantial houses, want some character of spaciousness, length, or elegance, to render them imposing; and all the streets taken together fail to present an urban aspect. Yet some portions, either from their neatness, from their impressive antiquity, or from combinations of striking natural feature and fine artificial ornament, are variously pleasing, attractive, and picturesque. Several streets are entirely modern—one of the newest in a style displaying much good taste; others, even the oldest, have been materially improved; and a large suburb in the W is entirely modern. A bridge, 294 feet in length, was built (1767-70) at a cost of more than £5500 by George Chalmers, across Pittencrieff Glen or the glen of the Tower Burn, and became so surmounted by excellent houses and good shops, as to be one of the best of the modern streets. Pittencrieff Glen, even within itself, through combination of romantic natural features with interesting ancient monuments, is highly attractive; and, as to situation, 'is a most agreeable surprise, hanging on the skirts of a manufacturing town like a jewel on an Ethiop's ear.' The demesne, around Pittencrieff mansion, includes the glen, and spreads away to the SW; and the glen contains the remains of a tower of Malcolm Ceanmor, and of a subsequent royal palace,—which ruins, with ground around them sufficient to give access thereto, were in 1871 pronounced by the House of Lords to be Crown property. 'The moment you leave the street,' says Mercer, 'you enter a private gate, and are on the verge of a deep glen filled with fine old trees, that wave their foliage over the ruins of the ancient palace; and a little further on is the peninsular mount on which Malcolm Ceanmor resided in his stronghold. Round the base of the mount winds a rivulet, over which is a bridge leading to the mansion-house, situated on the further bank in a spacious park, well-wooded, adorned with shrubberies, and having a splendid prospect to the S. The ground, too, is classical, for amidst this scenery, three centuries ago, when it was even more romantic than it is at present, must often have wandered the poet Henrysoun, holding sweet dalliance with the Muses.'

Malcolm's Tower is believed to have been built between 1057 and 1070. It crowned a very steep eminence, rising abruptly from Pittencrieff Glen, and forming a peninsula; and was described by Fordun as extremely strong in natural situation, and defended by rocky cliffs. Its foundations were 70 feet above the level of the rivulet below, but could not, from the nature of the site, have been of very great extent, probably not more than about 60 feet from E to W, and 55 feet from N to S, with a pyramidal roof. The tower appears to have had great thickness of wall, but has been stripped to the ground of all its hewn outside stones, and is now only represented by a connected angle or fragment of the S and W walls, measuring 31 feet on the S, and 44 feet on the W, with a height of about 8 feet. In spite of its diminutive character, however, this tower was the place of Malcolm Ceanmor's marriage to the Saxon princess, St Margaret, in the spring of 1068, as well as the birthplace of 'the Good Queen Maud,' wife of Henry I. of England. About 290 yards NNE of the Tower is St Margaret's Cave, which, as cleared of *débris* in 1877, measures 11½ by 8½ feet, and is 6½ feet high. The Royal Palace may have been founded as early as 1100, though the so-called Arabic numerals of the Annunciation Stone turned out in 1859 to be really the last four letters of the motto *Confido*. More likely it was not built till after the departure of Edward I. of England in February 1304. Said to have been burned by Richard II. in 1385, it was restored and enlarged about 1540 by James V.; passed into neglect after Charles II.'s time; and, becoming roofless in 1703, is now a total ruin. It occupies a romantic site a little SE of Malcolm's Tower,

and comprises no more than remains of the SW wall, measuring 205 feet in length, 59 in exterior height, and 31 interiorly from the sill of a window on the first floor; is strongly supported by 8 buttresses; and has several cross-mullioned windows, and one oriel, over which a 16th century sculpture representing the Annunciation was discovered in 1812. In that year the old palace was so far repaired by the proprietor of Pittencrieff as to be likely to resist, for a long period, any further dilapidation. The kings of Scotland, from Robert Bruce onward, appear to have frequently resided in this palace. James IV. was more in it than any of his immediate predecessors; James V. and his daughter, Queen Mary, resided here; James VI. subscribed the Solemn League and Covenant in it; and at it were born David II. (1323), James I. (1394), Charles I. (1600), and his sister Elizabeth (1596), the 'Winter Queen' of Bohemia. Here, too, the 'young man, Charles Stewart,' kept his small court, and was kept in courteous restraint, at the time of Cromwell's invasion in 1650; here on 16 Aug. he subscribed the 'Dunfermline Declaration,' a testimony against his own father's malignancy.

A building called the Queen's House, to the NE of the Royal Palace, with which it communicated by a gallery, stood in the middle of the street, to the N of the present Pended Tower, and extended nearly to the great W door of the Abbey Church; took its name from having been rebuilt in 1600 by Queen Anne of Denmark and from having been her personal property; was partially inhabited till 1778, but was entirely removed in 1797. The residence of the Constable of the royal buildings stood immediately N of the Queen's House. An aperture, originally about 4 feet high, and 2½ feet wide, but now so choked with earth as to be only 2½ feet high, is near the NW corner of the Palace, and forms the entrance to a dark subterranean passage branching into offshoots, and measuring 93½ feet in total length. The Pends or Pended Tower, connecting the Palace and the Abbey, is a massive oblong structure, with elegant groined archway on the line of the street; presents interesting features of strong ribbed arches and Transition Norman windows; and now is 35 feet long, 47 high, and 16 broad, but was formerly more extensive. The old market-cross of 1626, similar to the ancient crosses of Edinburgh, Aberdeen, Peebles, and other old burghs, according to the Vandal taste with which such things were regarded in last century, was removed in 1752, when its shaft, about 8 feet high, surmounted by a unicorn bearing a shield with St Andrew's Cross, was built into the corner of a neighbouring house. There it remained till 1868, when it was re-erected within the railings of the County Buildings.

The Abbey originated in the founding in 1072 of the church of the Holy Trinity by Malcolm Ceanmor. It was endowed both by that king and by his sons Ethelred and Eadgar, and was completed and further endowed by Alexander I. in 1115. Remodelled in 1124 as a Benedictine Abbey by David I., who placed in it an abbot and twelve brethren brought from Canterbury, it had become by the close of the 13th century one of the most extensive and magnificent monastic establishments in Scotland. Matthew of Westminster, speaking of what it was at that time, says, 'Its boundaries were so ample, containing within its precincts three carrucates of land, and having so many princely buildings, that three potent sovereigns, with their retinues, might have been accommodated with lodgings here at the same time without incommoding one another.' It was occupied by Edward I. of England from 6 Nov. 1303 till 10 Feb. 1304; and by him was set on fire, and otherwise much injured, along with the Palace, at his departure. It was restored in much less probably than its former magnificence, after the kingdom became settled under Bruce; but, on 28 March 1560, its choir, transepts, and belfry were, with the monastic buildings, 'cast down' by the Reformers, though the date of the north-western spire (156 feet) is not certainly ascertained. The nave was refitted in 1594, as again in 1594-99, for use as a parish church, and so continued under the name of the Auld

Kirk, till 1821. The church, when complete, must have been cruciform, comprising a seven-bayed nave with side aisles (106 × 55 feet), a transept (115 × 73 feet), a choir with a lady-chapel (100 × 55 feet), and three towers—two western ones terminating the aisles, and flanking the gable of the nave; and the great central tower, rising from the crossing. Four tall and beautiful Pointed windows, in the N wall of the N transept, continued standing till 1818, when they were removed, along with the remains of the choir, to give place to the new church. Judiciously repaired by the Commissioners of Woods and Forests in 1847, the nave now serves as a noble vestibule to the said new church, and is a fine specimen of the architecture of the age in which it was erected (1072-1175). Most of its windows have been filled with stained glass—memorials to Queen Annabella (1860), the Rev. Dr Chalmers (1871), the Reids (1873), the Alexanders (1873), the Douglasses (1877), etc. The great western window was filled with stained glass in 1884 by Mr Carnegie of Pittsburg, U.S., a native of Dunfermline, at a cost of £3000. The style of the nave is Anglo-Norman, but the external effect is a good deal marred by the enormous buttresses built 1620-75. The N aisle is entered by a porch, with a Norman arcade above it; the original doorway has very rich Norman moulding; the porch is of date about 1440. In its vault is a shield bearing the arms of Abbot Bothwell. The groined roof of the S aisle of the church is of later date than most of the interior, and out of keeping with the Norman ornaments, and the channelled piers separating the aisles from the nave have decorations somewhat similar to those of Durham Cathedral. 'The upright mouldings or pilasters are of Norman character, alternately polygonal and circular, the shafts undecorated. The interior tiers of moulding of the arcades are of toothed and rose work; while a broad band of sculpture, representing grotesque heads, animals, and foliage, spreads round the whole, and is surmounted by a narrow decorated moulding, resembling the character of a later period.' The frater-hall or refectory (121 × 34 feet) of the monks stood to the S of the church, and still exists in a state of ruin to the extent of the S front wall and the W gable. It has, in the S front wall, nine tall and graceful windows; and in the W gable a well-preserved Decorated window of 7 lights, measuring 20 feet in height, and 16 feet in breadth, and characterised by the intertwining of its mullions into compartments, each crossed in quatrefoil.

The Abbey had great wealth and power, owned nearly all the lands in western Fife, part of the lands in southern and eastern Fife, various lands in other counties, and at one time the barony of Musselburgh in Midlothian. It possessed the right of a free regality, with civil jurisdiction equivalent to that of a sheriff over the occupiers of the lands belonging to it, and with a criminal jurisdiction equivalent to that of the Crown, wielding the power of life and death. A bailie of regality, appointed by the abbot and officiating in his name, resided in an edifice called the Bailie House, near the Queen's House, and presided in the regality courts. The property of the Abbey was held, from 1560 till 1584 by Robert Pitcairn, from 1584 till 1587 by the Master of Grey, and from 1587 till 1589 by Henry Pitcairn; and was then constituted a temporal lordship, and conferred upon Anne of Denmark, queen of James VI. The office of heritable bailie of the lordship was given, in 1593, by Queen Anne to Alexander Seton, who afterwards became Earl of Dunfermline; and was regranted, along with a 57 years' lease of the feu-duties and rent of the lordship, by Charles I. to the second Earl of Dunfermline. In 1665 it passed to the Earl of Tweeddale, in lieu of a debt due to him by the Earl of Dunfermline; was confirmed or vested, in 1669, to the Marquis of Tweeddale by royal charter; and, in common with the other heritable jurisdictions in Scotland, was abolished in 1748, its value (reckoned at £8000) being compensated with £2672. The Abbey Church succeeded Iona as the place of royal and princely sepulture, and so received the ashes of many kings, princes, and other notable persons. The chief of these were Malcolm Ceanmor, his queen St

Margaret,* and their sons Eadward, Eadmund, and Ethelred; King Donald Ban; King Eadgar; Alexander I. and his queen Sibylla; David I. and his two queens; Malcolm IV.; Malcolm, Earl of Athol, and his countess, in the reign of William the Lion; Alexander III., his queen Margaret, and their sons David and Alexander; King Robert Bruce, his queen Elizabeth, and their daughter Mathildis; Annabella Drummond, queen of Robert III. and mother of James I.; Constantine and William Ramsay, Earls of Fife; Randolph, Earl of Moray, Regent of Scotland during the minority of David II.; Robert, Duke of Albany and Governor of Scotland; Elizabeth Wardlaw, author of *Hardicanute*, and other famous ballads; and Ralph Erskine, one of the founders of the Secession Church. The remains of King Robert Bruce, as strikingly narrated in Sir Walter Scott's *Tales of a Grandfather*, were discovered in 1818 at the digging for the foundation of the new parish church. They were found wrapped in a pall of cloth of gold, thrown apparently over two coverings of sheet-lead in which the body was encased, all being enclosed in a stone coffin. There was strong internal evidence of the remains being those of Robert Bruce, and, after a cast of the skull had been taken, they were replaced in the coffin, immersed in melted pitch, and reinterred under mason-work in front of the pulpit of the new parish church. An inlaid monumental brass was in 1889 inserted in the floor over his tomb.

The new parish church, or New Abbey Church, was built in 1818-21 at a cost of nearly £11,000. Cruciform in plan and Perpendicular in style, it contains, among other decorations, a stained-glass window, erected in 1881 as a memorial of the late Earl of Elgin and Kincardine, Governor-General of India, and illustrative of incidents in the life of Christ. In the S transept are three much-admired white marble monuments, General Bruce's by Foley (1868), the Hon. Dashwood Preston Bruce's by Noble (1870), and Lady Augusta Stanley's by Miss Grant of Kilgraston (1876). The church has, near the E end, a fine square tower 103 feet high, with terminals showing an open-hewn stone-work, in the place of a Gothic balustrade, having in capital letters 4 feet high, on the four sides of the tower's summit, the words 'King Robert The Bruce,' and at each corner of the tower there is a lofty pinnacle. The church was repaired in 1835, and contains nominally 2050 sittings, but is available practically for only about 1400 persons. In 1892 a handsome iron gateway was presented to the church by ex-Provost Alexander. St Andrew's Church, in North Chapel Street, built in 1833 as a chapel of ease, was constituted a *quoad sacra* church in 1835. The North Church, at the E end of Gofdrum Street, was built in 1840 as an extension church; it is likewise now a *q. s.* parish church. A free site and the necessary funds having been obtained for a church in the southern district, a temporary building was erected in 1893 during its construction. Three Free churches are in the town, and bear the same names as the three Established ones—Abbey, St Andrews, and North. In 1882 the congregation of Free Abbey church built a new church and hall in Canmore Street. There are four U.P. churches—Queen Anne Street (1798-1800; 1642 sittings), Chalmers Street (1861-62; 430 sittings), St Margaret's (1826-27; 979 sittings), and Gillespie (1848-49; 600 sittings), the last, on the highest ground in the city, being a handsome Gothic edifice, with stained windows and a marble font. Queen Anne Street U.P. church occupies the site of a former

* Malcolm was buried first at Tynemouth, but afterwards taken to Dunfermline; and here in 1250 his bones were laid by his wife's when these were translated to a richly-decorated shrine. The history of St Margaret's head is curious—in 1560 brought to Edinburgh Castle at Queen Mary's request; in 1567 removed to the Laird of Durie's house; in 1597 delivered to the Jesuits; in 1620 exposed to veneration at Antwerp; and in 1627 transferred to the Scots College at Douay, whence it disappeared in the French Revolution. Her other relics, with those of her husband, seem to have been placed by Philip II. of Spain in the church of St Lawrence at the Escorial (Hill Burton, *Hist. Scotl.*, i. 381, ed. 1876).

church built in 1741 for Ralph Erskine, one of the parish ministers of Dunfermline, and afterwards one of the founders of the Secession body. It is a gaunt and ungainly edifice, remarkably conspicuous, but internally very commodious. On a plot of ground in front is a stone statue (1849) of Ralph Erskine, by Handyside Ritchie. The Congregational Chapel, in Canmore Street, was built in 1841, has a good organ, and contains 700 sittings. The Evangelical Union Chapel, in Bath Street, is more recent, and contains 310 sittings. A new Gothic Baptist chapel was built in Viewfield Place in 1882 at a cost of £3000, and contains 600 sittings. Trinity Episcopal Chapel stands in Bath Street, was built in 1842, and is a Gothic edifice, in the form of a Greek cross, with a fine organ. St Margaret's Roman Catholic church, in Holyrood Place, rebuilt in 1871-73 after designs by Thornton Shiells, of Edinburgh, consists of an aisleless nave and a semicircular apse, with two semicircular chapels projecting therefrom. An Irvingite congregation dates from 1835.

The Old Town House at the corner of Kirkgate and Bridge Street, with a tower and spire 100 feet high, becoming inadequate, and being in a somewhat inconvenient situation, was demolished, along with adjacent tenements, in 1875, through the operations of an improvement scheme. This scheme resulted in the widening of Bridge Street by 4 feet and of the Kirkgate by 22, and in the erection of the new Corporation Buildings (1875-79), after designs by Mr J. C. Walker, of Edinburgh, at a cost of about £25,000. These, in a combination of the Scottish Baronial and French Gothic styles, have one front to Kirkgate of 144 feet, and another to Bridge Street of 66 feet, whilst at the connecting corner of the two is a clock tower, rising to the height of 150 feet, and 23 feet square. The principal entrance is round-arched, having massive buttresses and granite columns supporting a balcony and projecting windows, over which are sculptured the Royal Scottish arms. The Kirkgate front has fanciful and grotesque ornaments, while that of Bridge Street has busts of Malcolm Ceanmor, St Margaret, Robert Bruce, and Elizabeth his queen. The council chamber is 39½ by 25¼ feet, with an open timber roof; while the burgh court-room measures 50½ feet by 31½, and has a similar roof to that of the council chamber. There are a number of portraits of local celebrities in the Corporation Buildings, as well as the famous cartoon of Sir Noel Paton's 'Spirit of Religion' (1845), presented by the artist in 1881. A stucco model of Mrs D. O. Hill's statue of Burns, erected at Dumfries in April 1882, has also been placed in the vestibule. The burgh prison, standing near the public park, is a very plain building, but with good internal arrangements; and was erected in 1844-45 at a cost of £2070. The County Buildings, formerly known as the Guild Hall, were erected, in 1807-11, by a number of private persons in the district. The frontage to High Street has 24 windows, and is surmounted by a spire 132 feet high. Intended originally as a Guild or Merchant House, it was converted into a hotel in 1817, and in 1849-50 into a court-house for the western district of Fife. The burgh post office is in Douglas Street. St Margaret's Hall, in St Margaret Street, was completed in 1878 at a cost of £9000, in Early English style, with simple exterior decorations. The large hall affords accommodation for 1320 persons, and has a very fine organ, with 26 stops, 1522 pipes, and hydraulic blowing engine; there are also a lecture hall, reading-room, and committee rooms. Close to this hall is the new free public library, erected in 1881-83 at a cost of £5000, by Mr Andrew Carnegie, of New York, who further gave £3000 for books. Domestic Tudor in style, and three stories in height, it comprises library, reading, recreation, and smoking rooms. At a cost of £5000, the same gentleman founded the Carnegie Baths (1877), in School End Street. This building is of the height of two stories in the centre elevation, with a square tower surmounted by a flagstaff. Two swimming baths measure respectively 70 by 35 and 25 by 17 feet, each sloping from 3 to 6 feet in depth;

and the larger of the two has accommodation for 500 spectators on occasion of an aquatic *fête*. The Music Hall, in Guildhall Street, was erected in 1851-52. The building has a clear rise of wall to the height of 90 feet, and it contains no fewer than three halls, the principal one accommodating 1500 persons, and having a proscenium and other appliances necessary for a theatre.

The Grammar School or High School, at the head of the town, an oblong edifice, erected on the site of former schools built about 1560 and destroyed by fire in 1624, re-erected in 1625 and again in 1817, has in turn given place to the New High School in Buchanan Street, opened in January 1886. Erected by private subscription at a cost of between £7000 and £8000, it is Scottish Baronial in style, with modern improvements, and has a lofty bell-tower. The Commercial Academy was erected by the Guildry in 1816, and was long one of the principal elementary schools in the town. The Rolland School sprang from a donation of £1000 by the late Adam Rolland of Gask, and was originally under the direction of the Town Council. All these schools, together with the Female Industrial School, the Free Abbey Church School, and others, were acquired by the Burgh School-Board after the passing of the Education Act of 1872, and since then the board has erected a school, at a cost of £4136, at the W end of the town; shared the cost of another further N with the Parish School-Board, besides purchasing one for £1200, which was in connection with St Leonards Weaving Factory. A new school was erected in 1892 on the site of the Industrial School. A central school has also been substituted for the Rolland and Commercial Schools at a cost of £5143, and altogether there are seven public schools under the board, and St Margaret's Roman Catholic School. With total accommodation for 3900 children, these have an average attendance of about 3130, and grants amounting to over £2600. There are also a young men's literary institute, a school of arts, an agricultural society, an orchestral society, a horticultural society, an ancient society of gardeners, a co-operative society (with about 4000 members and £42,822 capital in 1890), a building company, a property investment society, two masonic lodges, a Burns club, a gymnasium, curling, bowling, cricket, football, and swimming clubs, a cemetery (1873), a public park (1860), in which there is a fountain, the gift of Provost Donald in 1887, and a bandstand, the gift of Mrs Carnegie; a cottage hospital (1893), etc. Near Dunfermline is the joint Infectious Diseases Hospital, erected in 1893 at a cost of about £6000 by the Dunfermline Local Authority and the Dunfermline District Committee of the Fife County Council.

The town has a head post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland and the British Linen Co., Commercial, National, and Royal Banks, a national security savings bank, numerous insurance offices or agencies, two railway stations, and several hotels. Two weekly newspapers—the Independent Liberal *Dunfermline Press* (1859) and the Liberal *Dunfermline Journal* (1872)—are published on Saturday. A weekly corn market is held on Tuesday, and a monthly horse and cattle market is held on the third Tuesday of every month.

The burgh, at the beginning of the 17th century, was entirely rural, and had no more than 1600 inhabitants. Down to the beginning of the 18th century, it continued to be almost without trade, but now it is the chief seat of the manufacture of table-linen in Great Britain, perhaps in the world. This manufacture began slowly, but advanced steadily till it became so important as to bring much wealth to the town and give employment to a large population. The weaving of huckaback and diapers led the way to the weaving of damask, which was introduced in 1718; a great improvement on the damask loom was effected in 1779; a further improvement, in the shape of what was called the comb draw-loom, in 1803; and the Jacquard machine was introduced in 1825. A drawing academy,

for promoting taste and inventiveness in designs, was established in 1826. Orders for sets of table-linen, from the nobility and gentry, and eventually from King William IV. and Queen Victoria, increasingly rewarded and stimulated progress; orders from America and from other countries followed; and certain special splendid fabrics, particularly one designated the 'Crimean Hero Tablecloth' (1857), as well as the general excellence of the ordinary damasks, gave the manufacture an established reputation. There are altogether 10 factories, containing 4000 power looms, and giving employment to nearly 6000 persons, of whom a great proportion are females. Among the largest of these establishments are St Leonards (1851), beautifully situated at the S side of the town, employing upwards of 1500 work-people; Bothwell (1865), employing about 900; and Victoria (1876), employing some 800. Previous to the introduction of steam, the work was produced by hand-looms, of which there were in 1890 only about 100 remaining, receiving but scanty employment, and this method is rapidly dying out. The weaving trade, besides employing so many persons in the town itself and in its suburbs, supports looms in the parishes of Torryburn, Carnock, Culross, and Inverkeithing, and even in Kinross, Leslie, Strathmiglo, and Auchtermuchty. The town and its neighbourhood has also 4 bleachfields, employing 500 persons, a tannery, rope-works, dyeworks, 2 iron foundries, 3 engineering establishments, fireclay and terra-cotta works, tobacco manufactories, breweries, and flour-mills. There are, too, a number of collieries in the immediate vicinity of Dunfermline, the town possessing several of these.

A royal burgh probably since the beginning of the 12th century, Dunfermline received a charter of confirmation in 1588 from James VI., and is governed by a provost, 4 bailies, a dean of guild, a treasurer, and 15 councillors, who act as police commissioners under the General Police and Improvement Act of Scotland. It

is the residence of the sheriff-substitute for the western district of Fife; and unites with STIRLING, Inverkeithing, Culross, and South Queensferry in sending a member to parliament. Burghcourts are held regularly, with the town-clerk as assessor; sheriff ordinary courts are held every Tuesday during session; sheriff small-debt courts on the first and the third

Seal of Dunfermline.

Tuesday of every month during session; justice of peace courts, both civil and criminal, are held when necessary; and courts of quarter sessions are held on the third Tuesday of April and the last Tuesday of October. The police force, in 1891, comprised 15 men; and the salary of the superintendent is from £150 to £200. The water supply, from 1847 to 1865, was furnished by a joint stock company from 37 acres of reservoirs at Craighluscar, 3 miles to the NW; but, the supply not proving satisfactory, the Corporation bought up the works and constructed, in 1868, an additional reservoir of 12 acres at the same place. In 1876 they obtained a new Water Bill, by which they were enabled to procure in 1878 a plentiful supply from Glensherrup Burn, an affluent of the Devon—the cost of the parliamentary bill and of the works pertaining to this latter supply amounting to about £70,000. Drainage works (1876-77), to convey the town sewage to the sea at Charlestown, cost about £10,000; and the gas-works were constructed in 1829 by a company, with a capital of £22,575. The Corporation revenue was £870 in 1834, and £5825 in 1891, when the municipal constituency numbered 3701; the parliamentary, 2754. Valuation (1874) £43,281, (1882) £57,790, (1892) £67,568. Pop. (1871) 14,958, (1881) 17,085, (1891) 19,647, of whom 8728 were males. Houses (1891) inhabited 4349, vacant 106, building 38.

Dunfermline, 'the town on the crooked Linn,' or cascade, took its origin from Malcolm Ceanmor's Tower; and, down to the era of the Reformation, owed its maintenance chiefly to the Royal Palace and the Abbey. It is mentioned, in connection with ancient story, in the ballad of *Sir Patrick Spens*. Edward I. of England, while residing in it, received the submission of many Scottish barons who had held out against him during his progress through Scotland. On 25 May 1624, 220 tenements, or nine-tenths of the entire town, were totally destroyed by fire; and by the battle of PITREAVIE or Inverkeithing (Sunday, 20 July 1651), between the armies of Cromwell and Charles II., the town lost some hundreds of its townsmen. Dunfermline gave the title of Earl, from 1605 till 1694, to the family of Seton; and the title of baron, in 1839, to the third son of Sir Ralph Abercromby. Among distinguished natives or residents of the town or the parish, have been members of the Bruce, the Seton, the Halket, and the Wardlaw families; John or Arnold Blair (fl. 1300), a monk of the Abbey, and chaplain to Sir William Wallace; John Durie, also a monk of the Abbey, who embraced the Protestant faith and became an eminent preacher of it in Montrose, Leith, and Edinburgh; George Durie, Abbot of Dunfermline, and for some time an extraordinary Lord of Session and Keeper of the Privy Seal; Robert Pitcairn, Abbot of Dunfermline and Secretary of State during the regencies of Lennox, Mar, and Morton, and afterwards under James VI.; three other Abbots of Dunfermline, who held the office of Lord High Chancellor of Scotland; David Ferguson (1534-98), the first Protestant minister of Dunfermline, and a man of great celebrity in his day; John Davidson (1544-1604), a playwright and Reformer, who was minister at successively Liberton and Prestonpans; Robert Henryson, a poet and 'guid Scholemaister of Dunfermline' (1450-99); Adam Blackwood (1539-1623), a Catholic controversialist, and a senator in the parliament of Poitiers; Henry Blackwood (1526-1616), an eminent physician; Admiral Sir Andrew Mitchell (1757-1806) of the Hill, who figured conspicuously in the naval service in the time of Lord Howe and Lord Nelson; Henry Fergus (1764-1837), minister in Dunfermline Relief Church, who did some service in matters of physical science; Robert Gilfillan (1798-1850), minor poet; the Rev. Peter Chalmers, D.D. (1790-1870), historian of Dunfermline, and for 52 years its minister; Ebenezer Henderson, D.D. (1784-1858), theological professor in Highbury College, London; his nephew, Ebenezer Henderson, LL.D. (1809-79), the historian of Dunfermline; Sir J. Noel Paton, R.S.A. (b. 1821); his brother, Walter Paton, R.S.A.; and his sister, the sculptor, Mrs D. O. Hill; and Mr Carnegie.

The parish of Dunfermline contains also the villages of Charlestown, Halbeath, North Queensferry, Crossford, Masterton, Patienuir, Townhill, Kingseat, and Wellwood, chief part of Limekilns, and part of Crossgates. Until 1891 it comprised a large main body and a small detached district, and inclosed almost wholly a detached portion of the parish of Inverkeithing. Part of the main body, forming a portion of the estate of Moreland, in the extreme north of the parish, was in recent years, though claimed by Fife, assessed as in the county of Kinross. The Boundary Commissioners, in the year mentioned, gave this disputed part to Kinross-shire (to the parish of Cleish), and transferred the above-mentioned small detached part to Inverkeithing parish, but gave to the parish of Dunfermline the detached portion of the parish of Inverkeithing and so much of that parish as lies to the west of the east march of the farm of Brucehaven. By this latter transfer the burgh of Dunfermline was placed wholly in the parish of Dunfermline. The parish is bounded N by Cleish in Kinross-shire, NE by Beath, E by Dalgety and Inverkeithing, S by Inverkeithing and the Firth of Forth, W by Torryburn, Carnock, and Saline. Its utmost length, from N to S, is 8 miles; its breadth, from E to W, varies between 3½ and 5¼ miles. The coast is 1½ mile long, chiefly of a rocky character; and, in the portion

immediately in front of Broomhall House, rises steeply, and is covered with fine wood. The southern division of the parish, with a general ascent from S to N, exhibits, though nowhere exceeding 253 feet above sea-level, in most parts, diversities of undulation and acclivity, and displays over most of its surface rich wealth of both natural feature and artificial culture. The northern division is much more diversified in general contour, attaining 449 feet at Baldridge, 529 at Colton, 705 at the Hill of BEATH, 744 at Craigluscar, 746 at Din Moss, 1189 at Knock Hill, 883 at Muirhead, 921 at Craigenat, and 1014 at Outh Muir—heights that have generally a bleak and naked aspect. The islets Long-Craig, Du-Craig, and Bimar lie within the seaward limits, but are all small and rocky. The only streams are brooks, the chief of these being Lyne Burn, Baldridge Burn, and that which runs through Pittencrieff Glen. Town Loch (3 × 1 furl.), Craigluscar Reservoir (1½ × 1 furl.), and Lesser Black Loch (¾ × ¼ furl.), lie within the northern division; Loch Glow (6 × 3½ furl.), and the Greater Black Loch (2 × ¾ furl.), on the Kinross-shire border; whilst on the boundary with Beath is shallow Loch Fitty (1 × ¼ mile). A small mineral spring occurs in the vicinity of Charlestown. The rocks of the hills are chiefly eruptive, and throughout great part of the lower grounds belong to the Carboniferous system. Trap, sandstone, and limestone are extensively worked; ironstone, chiefly in balls and in thin bands, was formerly worked to the extent of about 4500 tons annually; copper pyrites, in small quantities, occur in the ironstone; and coal was mined here prior to 1291, earlier, that is, than in any other place in Britain, unless it be TRARENT. It continues to be turned out in vast quantities, both for home use and for exportation. The soil, in most parts of the southern division, is a rich brown loam, in other parts of a light nature incumbent on strong clay; in some portions of the northern division is of fair quality, but in others is poor and shallow. Rather less than two-thirds of the entire area are under cultivation; about 1100 acres are under wood; and the rest of the land is either pastoral or waste. Broomhall, the seat of the Earl of Elgin, is a prominent feature, and has been separately noticed. Pitreavie, Pittencrieff, Pitfirrane, Garvoch, Craigluscar, Halbeath, Gask, Blackburn, Middlebank, Piltiver, Southfod, Keirsbeath, Sunybank, Netherbeath, Northfod, and Balmule are the principal estates; and most of them are noticed either separately or in other articles. This parish is the seat of a presbytery in the synod of Fife, and is divided ecclesiastically into Dunfermline proper, Dunfermline-North, and Dunfermline-St Andrew. The population, in 1891, of Dunfermline proper, was 19,478; of Dunfermline-North, 4532; of Dunfermline-St Andrew, 4649. The charge of Dunfermline proper is collegiate. At Townhill is an Established chapel of ease (1878); and there are also U.P. churches of Crossgates (1802) and Limekilns (1825). Eight public schools, under the landward board, with total accommodation for 1796 children, had (1891) an average attendance of 1370, and grants amounting to £1300; and a neat oblong poorhouse, on the Town Green to the ENE of the burgh, was erected in 1843 at a cost of £2384, and contains accommodation for 103 pauper inmates. Landward valuation (1866) £40,715, 12s. 10d., (1882) £49,854, 1s. 5d., (1891) £42,511, 1s. 10d. Pop. of entire parish (1801) 9980, (1831) 17,068, (1861) 21,187, (1871) 23,313, (1881) 26,568, (1891) 28,667.—*Ord. Sur.*, shs. 40, 32, 1867-57.

The presbytery of Dunfermline comprises the old parishes of Aberdour, Beath, Carnock, Culross, Dalgety, Dunfermline, Inverkeithing, Saline, and Torryburn, the *quoad sacra* parishes of Dunfermline-St Andrew, Dunfermline-North, and Mossgreen, and the chapelry of Townhill. Pop. (1871) 38,356, (1881) 41,510, (1891) 47,110, of whom 6048 were communicants of the Church of Scotland. The Free Church has also a presbytery of Dunfermline, with 3 churches in Dunfermline, and 9 in respectively Aberdour, Carnock, Culross, Lassodie, North Queensferry, Saline, Torryburn, Townhill, and Tullisallan, which 12 churches had 2386 communicants in

1891. The U.P. Synod has a presbytery of Dunfermline and Kinross, with 4 churches in Dunfermline, 2 in Kinross, and 13 in respectively Alloa, Balgedie, Cairneyhill, Cowdenbeath, Crossgates, Edenshead, Inverkeithing, Kincardine, Limekilns, Lochgelly, Milnathort, Muckart, and Pathstruie, which 19 churches had 5907 members in 1891.

Peter Chalmers' *Historical and Statistical Account of Dunfermline* (2 vols., Edinb., 1844-59); Dr Ebenezer Henderson's *Royal Tombs at Dunfermline* (Dunf. 1856); his *Annals of Dunfermline and Vicinity from 1069 to 1878* (Glasg. 1879); and J. C. R. Buckner's new edition of *Clark's Guide to Dunfermline and its Antiquities* (Dunf. 1890).

Dunfermline and Queensferry Railway. See NORTH BRITISH RAILWAY.

Dunfermline and Stirling Railway. See NORTH BRITISH RAILWAY.

Dunfillan, a verdant conical hill in Comrie parish, Perthshire, 7 furlongs E by S of the foot of Loch Earn. It rises to a height of 600 feet, and terminates in a rock popularly called St Fillan's Chair, whence the saint whose name it bears is alleged to have bestowed his benediction on the surrounding country.

Dun Fionn, a vitrified fort in Kiltarlity parish, Inverness-shire, on a high conical mound above a cliff, on the S side of the Dhruim, 4¾ miles WSW of Beauly. It is on the Lovat estate; and, a number of years ago, was laid open, by order of the late Lord Lovat, for the inspection of the curious.

Dungavel, a bold, green, double-topped hill (1675 feet) in the central part of Wiston and Robertson parish, Lanarkshire, overhanging the river Clyde, at the mouth of Robertson Burn, 2½ miles S by W of Tinto.

Dungavel, a hill (1502 feet) in Avondale parish, Lanarkshire, 6 miles SSW of Strathaven.

Dungeon, a lake in the N of Kells parish, Kirkcudbrightshire, 8 miles NW by W of New Galloway. Lying 1025 feet above sea-level, it is ¾ mile long, and from ¾ furlong to ¼ mile wide; it contains both trout and char; and it sends off a rivulet to Pulharrow Burn, an affluent of the Ken.—*Ord. Sur.*, sh. 8, 1863.

Dungeon, Dry, Round, and Long Lochs of the, three neighbouring lakes of W Kirkcudbrightshire, the first lying on the mutual border of Carsphairn and Minnigaff parishes, and the two last in the N of Minnigaff. Their measurements and altitude above sea-level are—Dry Loch (1 × 1 furl.; 1075 feet), Round Loch (2 × 1 furl.; 910 feet), and Long Loch (2½ × 1 furl.; 900 feet). Dry Loch, at the 'divide' between the Firth of Clyde and the Solway Firth, sends off its effluence partly northward by Gala Lane to Loch Doon, partly southward by a burn that traverses the other two to Cooran Lane, and so to the Dee; and all three abound in small trout.—*Ord. Sur.*, sh. 8, 1863.

Dunglass, a small rocky promontory in Old Kilpatrick parish, Dumbartonshire, 3 furlongs W by S of Bowling Bay, and 2½ miles ESE of Dumbarton. Almost surrounded by the Clyde, it may have been possibly a Roman outpost, but has been wrongly regarded by some antiquaries as the western termination of Antoninus' Wall; was long a stronghold of the chiefs of the Clan Colquhoun, and retains round all its crest loop-holed, ivy-clad ruins of their ancient castle. The only portions of the old castle now remaining are the south-west wall next the Clyde and the north-east wall with the doorway, both consisting of very solid masonry. Dunglass is crowned, on its highest point, by an obelisk, erected in 1839 to the memory of Henry Bell, the originator of steam navigation.

Dunglass, a mansion in Oldhamstocks parish, E Haddingtonshire, standing in the midst of a fine park, ¾ mile inland, and 1½ mile NW of Cockburnspath. An elegant edifice, surmounted by a tower, it occupies the site of a strong castle of the Lords Home, which, passing, on their forfeiture in 1516, to the

Douglasses, was besieged and destroyed by the English under the Earl of Northumberland in the winter of 1532, and again under the Protector Somerset in 1547. It was rebuilt in greater extent and grandeur than before, and gave accommodation in 1603 to James VI. and all his retinue when on his journey to London; but, being held in 1640 by a party of Covenanters under the Earl of Haddington, whom Leslie had left behind to watch the garrison of Berwick, it was blown up with gunpowder on 30 August. An English page, according to Scotstarvet, vexed by a taunt against his countrymen, thrust a red-hot iron into a powder-barrel, and himself was killed, with the Earl and many others. Dunglass is the seat now of Sir Basil Francis Hall, seventh Bart. since 1687 (b. 1828; suc. 1876). Dunglass was the birthplace of his grandfather, Sir James Hall (1761-1832), the distinguished geologist and chemist. A wooded, deep ravine called Dunglass Dean, and traversed by Berwick or Dunglass Burn, extends $4\frac{1}{2}$ miles north-north-eastward to the sea, along the mutual border of Haddington and Berwick shires. It is spanned by two bridges not far from each other on old and new lines of road, and by an intermediate magnificent railway viaduct, whose middle arch is 135 feet in span, and rises 125 feet from the bed of the stream to the top of the parapet. With five other arches toward the ravine's crests, this viaduct is, in itself, an object of great architectural beauty; and combines with the adjacent bridges and with the ravine's features of rock and wood and water to form an exquisitely striking scene.—*Ord. Sur.*, sh. 33, 1863.

Dungyle, a green hill (675 feet) in Kelton parish, Kirkcubrightshire, near the N base of the Screel, $3\frac{1}{2}$ miles S by E of Castle-Douglas. An ancient Caledonian circular hill-fort on it has three ramparts of stones mixed with earth, and measures 117 paces in diameter.

Dungyle, Buteshire. See DUNAGOIL.

Dunhead, an ancient triangular camp or fort in Carmyllie parish, Forfarshire, on a peninsular eminence at the junction of the Black Den and the Den of Gynyd ravines. Probably formed by the Caledonians, and remodelled by the Danes, it was defended on two sides by precipices, and on the third by a rough rampart and a ditch; and it is now represented by mere vestiges.

Dun-I, an abrupt hill, 327 feet high, in Iona island, Argyllshire, $\frac{1}{2}$ mile NNW of the Abbey.

Dunian, a lumpish, round-backed, ridgy hill in Bedrule and Jedburgh parishes Roxburghshire. It rises from a base of between 2 and 3 miles in breadth; extends about 3 miles between the Teviot and the Jed down to the vicinity of their point of confluence; bears most of the town of Jedburgh on its north-eastern skirt; attains, on a cap or nodule within Bedrule parish, an altitude of 1095 feet above sea-level; is traversed over its back, not far from the crowning cap, by the road from Jedburgh to Hawick; and commands, from much of that road, and especially from its summit, extensive and splendid views. Its name signifies the 'hill of St John.'

Dunimarle, an estate in Culross parish, Fifeshire, a little to the W of Culross town. An ancient castle here was one of the traditional scenes of the murder of Lady Macduff and her children; the present mansion is almost entirely modern, built by the late Mrs Sharpe Erskine, and containing a good library, with paintings and other works of art.

Dunino or **Denino**, a hamlet and a parish in the E of Fife. The hamlet lies between Cameron and Chesters Burns, $4\frac{1}{2}$ miles SSE of St Andrews. It has a post office under Stravithie (R.S.O.)

The parish was represented on the Ordnance Survey Maps as having a detached part lying to the S of the main portion, and surrounded by the parish of Craill, while the boundary recognised in practice lay to the S of that shown on the maps, and really included not only the part marked as detached, but a considerable portion of what was shown as belonging to the parish of Craill. The Boundary Commissioners in 1891 gave effect to the boundary as known in practice. The surface is drained

by Cameron, Wakefield, and Chesters Burns, whose waters unite in the NE corner of the parish to flow as Kenly Burn toward the sea; and takes a general south-westward rise, from less than 200 to over 500 feet above sea-level. The rocks belong chiefly to the Carboniferous formation, and coal was at one time extensively mined. Ironstone is not rare, having once been collected from the side of one of the brooks to the amount of 40 tons; and sandstone of excellent quality is abundant, but has not been much quarried. The soil in some parts is clayey, in others sandy. About 100 acres are under wood. Pittairthie Castle, a roofless ruin in the SW of the parish, is partly very ancient, partly a structure of 1653; and in its oldest portion consists of a large square tower, with vaults beneath. Stravithie Castle, another baronial fortalice, a little to the NW of the hamlet, stood entire about the year 1710, but now has left no traces. Draffan Castle, too, supposed to have been built by the Danes, has completely disappeared. An ancient nunnery stood on the highest ground in the parish, whence its ruins were removed in 1815. Three stones, by Chesters Burn, 100 yards W of the church, are supposed to have been part of an ancient Caledonian stone circle. The late Rev. Charles Rogers, LL.D., antiquary, was born at the manse in 1825; and Wm. Tennant, author of *Auster Fair*, was parish schoolmaster (1813-16). Dunino is in the presbytery of St Andrews and synod of Fife; the living is worth £258. The parish church, a Gothic building of 1826, contains 230 sittings; and a public school, with accommodation for 92 children, had (1891) an average attendance of 70, and a grant of £71, 15s. 6d. Valuation (1882) £4213, 18s. 7d., (1891) £3030, 10s. 2d. Pop. (1861) 370, (1871) 325, (1881) 297, (1891) 277.—*Ord. Sur.*, sh. 41, 1857.

Dunipace, a village and a parish of E Stirlingshire. The village, called the Milton of Dunipace, stands on the left bank of the river Carron, opposite the town of DENNY, with which it is connected by a bridge, and with which it has formed a police burgh since 1876; and is itself a considerable place, sharing in Denny's industries. Pop. (1881) 1258, (1891) 1078.

The parish, containing also the village of Torwood, took its name from two famous mounds, to be afterwards noticed; and, anciently a chapelry of Cambuskenneth, acquired parochial status at the Reformation. In 1624 it was united on equal terms to Larbert, and came in course of time to be considered as subordinate to, or as absorbed into, it; but since the passing of the Poor-law Act (1834) has again been treated, in various respects both civil and ecclesiastical, as a distinct or separate parish. It is bounded W and N by St Ninians, E by Larbert, SE by Falkirk, and S and SW by Denny. Its utmost length, from E to W, is $5\frac{1}{2}$ miles; its breadth, from N to S, varies between $\frac{3}{4}$ mile and $3\frac{3}{4}$ miles; and its area is 5629 acres, of which 43 are water. The CARRON winds $5\frac{1}{2}$ miles east-south-eastward on or close to the Denny border, then 1 mile eastward through the south-eastern interior, here being joined by BONNY Water, which for the last $1\frac{1}{2}$ mile of its crooked east-north-easterly course roughly traces most of the boundary with Falkirk. The eastern district is part of the Carse of Stirling, and sinks to less than 100 feet above sea-level; thence the surface rises to 206 feet near Househill, 250 near Doghillock, 354 in the Tor Wood, 496 near Rullie, and 846 near Buckieside, at the north-western extremity of the parish. Trap rock prevails over about one-third of the area, and sandstone over the other two-thirds; the latter is partly capital building material, partly of a character well suited for flag or pavement. The soil ranges from moorish earth to argillaceous alluvium, but for the most part is extremely fertile. Mining has fallen off recently, but Dunipace finds an outlet for its labour in the industries of Denny parish. Torwood Castle is a venerable ruin, and, with the remnant of Torwood Forest, is separately noticed. Herbertshire Castle is a very ancient mansion, standing amid finely-wooded grounds; originally a royal hunting seat, it passed in the fifteenth century to the Earls of Orkney, in the sixteenth century to the Earls of Linlithgow;

and, coming afterwards to the Stirlings and the More-heads, was sold in 1835 to Forbes of Callendar. Carbrook House, too, occupies a romantic site, amid well-wooded grounds, within half a mile of Torwood Castle; whilst Dunipace House and Quarter House are elegant modern mansions. Dunipace mounds, or the 'Hills of Dunipace,' whence the parish derived its name, are situated on a small plain adjacent to the Carron, 2 miles ESE of Milton village; and, covering 2 Scotch acres, rise to a height of 60 feet. According to George Buchanan, they were raised to commemorate a treaty of peace between some Caledonian king and the Roman Emperor Severus (hence their name *Duni Pacis*, 'hills of the peace'); according to Dr Hill Burton, they are 'evidently residuary masses left by retreated waters, in which they have made shallows or islands. This will account for their form without the necessity of supposing that they were ever rounded by art. If analogy did not support this view, it would be strengthened by the incident of a third hill in the same place having been levelled about 1835, and showing complete internal evidence of natural formation.' Some finely-preserved Roman utensils, one of them of a unique kind, have been discovered near Dunipace village; and, in result of a search instigated by the discovery of these relics, distinct vestiges of a previously unnoticed Roman camp were found in a neighbouring wood. Forbes of Callendar and Harvie-Brown of Quarter are the chief proprietors, 2 others holding each an annual value of £500 and upwards, 12 of between £100 and £500, 9 of from £50 to £100, and 13 of from £20 to £50. In the presbytery of Stirling and synod of Perth and Stirling, this parish forms a joint charge with Larbert, the stipend amounting to £498. The plain old parish church, whose graveyard is still in use, stood within a few yards of the Hills of Dunipace; the present one, on a knoll $1\frac{1}{2}$ mile to the WNW, is a Gothic edifice, built in 1834 at a cost of £2500, and containing 604 sittings. There is also a Free church; and two public schools, Dunipace and Torwood, with respective accommodation for 300 and 30 children, had (1891) an average attendance of 131 and 52, and grants of £108, 13s. and £45, 17s. 9d. Valuation (1892) £10,039, 1s., including £1130 for railway. Pop. (1801) 948, (1841) 1578, (1861) 1731, (1871) 1733, (1881) 1875, (1891) 1716; of the Dunipace portion of the *g. s.* parish 1674.—*Ord. Sur.*, sh. 31, 1867.

Duniphail or **Dunphail**, an estate in Edinkillie parish, Elginshire, with a station of its own name on the Highland railway, near the right bank of the Divie, $1\frac{1}{2}$ mile SSE of its influx to the Findhorn river, and $8\frac{1}{2}$ miles S by W of Forbes. The estate, extending southward from the station to nearly the source of the Divie, belonged anciently to the Comyns, and, after passing successively to the families of Dunbar and Cumming-Bruce, came by marriage in 1864 to Thomas John Hovell-Thurlow, who, born in 1838, in 1874 succeeded his brother as fifth Baron Thurlow (cre. 1792), and in the same year assumed the additional surnames of Cumming-Bruce. Dunphail Castle, which crowns a green conical hill, three-fourths engirt by a narrow ravine, supposed to have been at one time the channel of the Divie, was vainly besieged in the beginning of the 14th century by Randolph, Earl of Moray, after the 'Battle of the Lost Standard,' and is now a fragmentary ruin. The present mansion, erected in 1828-29, from designs by Playfair, of Edinburgh, and considerably enlarged in 1842, is a splendid edifice in the Venetian style, with very beautiful grounds. It was built on a terrace 26 feet above and 200 yards distant from the Divie; but in the great flood of 3 and 4 Aug. 1829 it was all but destroyed by that impetuous stream, the bank falling in within one yard of the foundation of the E tower.—*Ord. Sur.*, sh. 84, 1876. See **DIVIE**.

Dunira, a fine modern mansion in Comrie parish, Perthshire, $2\frac{1}{2}$ miles E of St Fillans, and 3 WNW of Comrie. From its wooded hill-side it commands a magnificent view of Strathearn; it was the favourite resid-

ence of that unfortunate statesman, Henry Dundas, first Viscount Melville (1742-1811).

Dunkeld (Celt. *dun-calden*, 'fort of the Keledei' or Culdees), a small but very interesting town of Strathhtay, Perthshire, until 1891 partly in the parish of Caputh and partly in that of Dunkeld and Dowally, but in that year transferred by the Boundary Commissioners wholly to the latter parish. A burgh of barony, it stands 216 feet above sea-level, on the left bank of the Tay, which here receives the Bran, and here is spanned by a magnificent bridge, leading 1 mile south-south-eastward to BIRNAM village and Dunkeld station on the Highland railway (1856-63), this being $80\frac{1}{2}$ miles S by E of Grantown, $8\frac{1}{2}$ NW of Stanley Junction, $15\frac{3}{4}$ NNW of Perth, $63\frac{3}{4}$ NNW of Edinburgh, and $77\frac{3}{4}$ NE by N of Glasgow. The town lies low, deep sunk among wooded heights—behind it, Newtyle (996 feet) and Craigiebarns (900); and opposite, with the broad deep river between, Craig Vinean (1247) and Birnam Hill (1324). Gray, in describing the approach to it, speaks of the rapid Tay, seeming to issue out of woods thick and tall, that rise upon either hand; above them, to the W, the tops of higher mountains; down by the river-side under the thickest shades, the town; in its midst a ruined cathedral, the tower and shell still entire; and a little beyond, the Duke of Athole's mansion. Dunkeld is, indeed, the portal of the Grampian barrier; and its environs offer an exquisite blending of all that is most admired in the Highlands with one of the richest margins of the Lowlands.

About 815, or nine years after the slaughter of the monks of Iona by Vikings, Constantin, King of the Picts, founded the Culdee church of Dunkeld, as seat of the Columban supremacy in Scotland; which church was either completed or refounded by Kenneth mac Alpin, who in 850 translated to it a portion of St Columba's relics. So richly does Kenneth seem to have endowed this church, that, prior to 860 its wealth exposed it to pillage by the Danes, under the leadership of Ragnar Lodbroc. The first of its bishops was also first bishop of the Pictish kingdom, the Bishop of Fort-rann; but at his death in 865 the primacy was transferred to Abernethy, since the second abbot is styled merely 'princeps' or superior, and may have been either a cleric or a layman. Lay abbots certainly, and probably hereditary, were Duncan, who fell in battle at Drum-crub (965), and Crinan, who was son-in-law to Malcolm II. of Scotia, and father of the 'gracious Duncan,' and who, says Dr Skene, 'was in reality a great secular chief, occupying a position in power and influence not inferior to that of any of the native Mormaers.' During his time the abbey itself appears to have come to an end, for in 1027 Dunkeld was 'entirely burnt.' The bishopric was revived in 1107 by Alexander I., among its thirty-seven holders were Bruce's 'own bishop,' William Sinclair (*ob.* 1338), and Gawin Douglas (1474-1522), the translator of Virgil's *Aeneid*. Once and once only Dunkeld has figured markedly in history, when on 21 Aug. 1689, twenty-five days after Killiecrankie, the cathedral, Dunkeld House, and the walls of its park were successfully held against 5000 Highlanders by the new-formed Cameronian regiment, 1200 strong, under Lieut.-Col. William Cleland, the same young poet Covenantar by whom, ten years before, Drumclog had been mainly won. He now fell early in the siege, which was maintained from early morn till close on midnight; but his men withstood stubbornly every wild onslaught of the mountaineers, and, being galled by musketry from the town, sent out a party with blazing faggots, fastened to long pikes. They fired the dry thatch, and burned every house save three; nay, some of the zealots with calm ferocity turned the keys in the locks, and left the unhappy marksmen to their doom. At length, worn out, the Highlanders retreated, whereon the Cameronians 'gave a great shout and threw their caps in the air, and then all joined in offering up praises to God for so miraculous a victory.' So ended this conflict between the 'Hillmen' and the Mountaineers, which, trifling as it may seem, had all the effect of a decisive battle in

crushing the hopes of James VII.'s Scottish adherents (vii. 385-390 of Hill Burton's *Hist. Scotl.*, ed. 1876). In olden times Dunkeld received many a visit from royalty, on its way to hunt in Glen Tilt—from William the Lyon in the latter half of the 12th century, from James V. in 1529, and from Queen Mary in 1564. And Queen Victoria, three times at any rate, has driven through the town. First, with Prince Albert, on 7 Sept. 1842, when 500 Athole men escorted her from the triumphal arch to the luncheon tent in the midst of an encampment of 1000 Highlanders. There she was welcomed by the late Duke of Athole (then Lord Glenlyon), who, through over-fatigue, had suddenly become quite blind; and there she beheld a sword-dance. Next, with Prince Albert still, on 11 Sept. 1844, when they 'got out at an inn, which was small, but very clean, to let Vicky have soue broth; and Vicky stood and bowed to the people out of the wiudow.' Thirdly, *incognita*, with the Dowager Duchess of Athole, on 3 Oct. 1865. Nor have other illustrious visitors been rare—the poet Gray (1766), Robert Burns (1787), Wordsworth (1803), etc., etc., etc.

The pretty village of Birnam, which has been separately noticed, is connected with the town by Telford's uoble stone bridge erected in 1805-9 at a cost of £33,978, of which £7027 was advanced by the commissioners of Highland roads, £18,000 borrowed on the security of the tolls, and the rest defrayed by the Duke of Athole. Measuring 685 feet in length, 26½ in width, and 54 in height, it has seven arches—the middle one 90, two others each 84, two others each 74, and the two land-arches each 20, feet in span. The pontage was abolished in 1879. The town is laid out in the form of a cross; and, as approached from the right side of the Tay, is not seen in its full extent till one reaches the middle of the bridge. The street leading from the bridge was commenced in 1803, along a new reach of the Great North Road, from Perth to Inverness, by way of the bridge, and was designed to be a sort of new town, more elegant than the old; at the lower or bridge end stand the Athole Arms and the Free church, at the upper the Royal Hotel and the City Hall. The street at right angles to it comprises most of the old town, as reconstructed after the siege of 1689, and with a single exception consists of houses later than that date. The one exception is the ancient deanery, standing not far from the choir of the cathedral, and characterised by great thickness of wall.

The cathedral stands by the river side, at the W end of the old street, a little apart from the town, and on one side is shaded by trees, on the other bordered by a flower garden. It comprises a seven-bayed nave (1406-65), 122 feet long by 38 feet wide, and 40 high to the spring of the roof, with side aisles 12 feet wide, a four-bayed aisleless choir (1318-1400), 104 by 27 feet; a rectangular chapter-house (1457-65), on the N side of the choir; and a massive north-western tower (1469-1501), 24 feet square, and 96 feet high. All are Second Pointed in style, except the choir, which retains some scanty portions of First Pointed work, and is the only part not ruinous. Not long had the belfry been finished, when, on 12 Aug. 1560, Argyll and Ruthven required the Lairds of Airtully and Kinvaid 'to pass incontinent to the Kirk of Dunkeld, and tak down the hail images thereof, and bring furth to the kirkyard, and burn them openly. And siclyke cast down the altars, and purge the kirk of all kinds of monuments of idolatry; and this ye fail not to do, as ye will do us singular empleasure, and so commits to the protection of God. Fail not but ye tak good heid that neither the desks, windocks, nor doors be onways hurt or broken, either glassin work or iron work.' The tenderness of the closing injunction would seem to have been neglected, since the roofs were included in the demolition; and not until 1600 was the choir re-roofed to serve as the parish church. Such it is still, and Dorothy Wordsworth describes the ruin in 1803 as 'greatly injured by being made the nest of a modern Scotch kirk with sash windows, very incongruous with the noble antique

tower; but in 1815 Government gave £990 and the Duke of Athole £4410 towards its renovation, and it now contains 655 sittings. In the nave may be noticed abundant features of the French Flamboyant. The great W window, for instance, so far as can be judged from the remaining fragments of its tracery, appears to have been designed on a peculiarly florid pattern, and so defects from the vertical line of the gable, as to give space for a smaller circular window with double spiral mullions, above which is a foliated cross, still quite entire. The windows of the side aisles are very beautiful, and present no fewer than eight distinct patterns of tracery. The massive round piers dividing the side aisles from the nave are 10 feet high to the capital and 13½ in circumference, and out of Scotland might almost be taken for Romanesque. The arches between them, however, are unmistakably Second Pointed, with fluted soffits. The triforium consists of plain semicircular arches, divided by mullions into two lights, with a trefoil between; and the clerestory likewise consists of two-light windows, with trefoil heads and quatrefoil interval. Buttresses project between the windows, and are surmounted in the choir portion by crocketed pinnacles. An octangular turret, resembling a watch tower, at the south-western angle of the nave, terminates in a small parapeted gallery, supported on a rose carved moulding, and takes up a staircase, communicating by an ambulatory with the main tower, in which hang four bells. An elaborately sculptured monument of Bishop Robert Cardeny (1436), comprising a statue of him in his robes, beneath a crocketed canopy, is in the S aisle of the nave; a statue of Bishop William Sinclair (1338) is in the N aisle; a gigantic stone effigy of Alexander Stewart, Earl of Buchan, the 'Wolf of Badenoch' (1394), arrayed in panoply of mail, is in the spacious vestibule of the choir, where also a Gothic mural monument was erected in 1872 to the memory of the officers and men of the 42d Highlanders who fell in the Crimean War and Indian Mutiny. The upper part of it contains a sculptured group, in high relief, representing a scene on a battlefield, all in pure white marble from the chisel of Sir John Steell, of Edinburgh. The chapter-house, adjoining the N side of the choir, is still entire; is lighted by four tall lancet windows, with trefoil heads, and, serving as the burying place of the ducal line, contains a fine marble statue of the fourth Duke of Athole (1833), with monuments of other members of the family.

The episcopal palace, a little SW of the cathedral, consisted of several long two-story houses, with thatched roofs, till in 1403 it was superseded by a strong castle, rendered necessary by frequent annoyance from Highland caterans; and, though now long extinct, has bequeathed to its site the name of Castle Close. The bishops made a great figure in their day. They had four palaces, at Dunkeld, Clunie, Perth, and Edinburgh, and got their lands S of the Forth erected into the barony of Aberlady, and those in the N into the barony of Dunkeld, which latter extended, not only around the town but continuously, with considerable breadth, for a distance of 7 miles to the palace of Clunie. A hill on which the bishops hanged many a freebooter rises close to the second lodge of the ducal grounds, and to the rear is a hollow in which many persons accused of witchcraft were burned at the stake. An ancient chapel, on ground now occupied by Athole Street, was built about 1420 by Bishop Cardeny, who endowed it with the rents of the lands of Mucklarie, eventually transferred to the rector of the grammar school. Another ancient chapel stood on Hillhead to the E of the town; was erected principally for the inhabitants of Fungarth; is now represented by only an enclosure wall around its site; and, having been dedicated to St Jerome, has bequeathed to the people of Fungarth the ludicrous nickname of 'Jorums.'

Dunkeld House, the modest seat of the Dukes of Athole, is a plain square mansion of the 17th century, behind the cathedral. A new palace, a little to the W, beside the Tay, was founded by the fourth Duke, who

left it unfinished at his death in 1830. Planned on a sumptuous scale, this promised to form a magnificent Gothic edifice; but the site did not please the next Duke, so two stories only were nearly finished, with a gallery 96 feet long and a private chapel, when £30,000 of the £200,000 it would have cost were expended. The grounds connected with Dunkeld House are of great extent, and, highly improved by the sixth Duke of Athole, who died in 1864, are surpassingly rich in features of natural and artificial beauty, including a home-farm, extensive gardens with vineries and greenhouses, an 'American garden,' 50 miles of walks and terraces, 30 miles of carriage-drives, the Rumbling-Bridge, the Falls of Bran, Ossian's Hall, etc. Plantations alone cover 18,500 acres, of larch principally, which is commonly said to have here been introduced to Scotland—a claim disputed, under date 1725, by DAWICK in Peeblesshire. Anyhow, 'it was in 1738 that Mr Menzies of Meggernie brought small plants of the tree from London, and left five at Dunkeld and eleven at Blair, as presents to the Duke of Athole. These sixteen plants no doubt formed the source whence sprang the great proportion of the larch plantations throughout Scotland during the 18th and the early part of the 19th century. . . . The entire area under larch in the Athole forest is stated at 10,324 acres, and the trees originally planted on it at 14,096,719. . . . Of the five planted in 1738, two were cut in 1809; one of them contained 147, and the other 168, cubic feet of timber; and they were sold at 3s. per cubic foot. . . . The two remaining ones of the five are still in a growing condition, and though they have begun to show signs of decay, they might yet survive many years. In 1831 their girth at 4 feet from the ground was 12 and 11 feet; in 1867, 16½ and 14½' ('Larch Forests,' in *Trans. Highl. and Ag. Soc.*, 1869). Besides these 'Mother Larches,' there are two oaks, two beeches, and a sycamore, whose huge dimensions are recorded in the same *Transactions* for 1880-81.

The old town cross, about 20 feet high, with four iron jongs attached to it, was removed about the beginning of the present century; in 1866 a fountain was erected by public subscription on its site to the memory of the sixth Duke. In 1877 a substantial City Hall was built at a cost of £1500; and Dunkeld has besides a post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland and the Union Bank, a local savings bank, insurance agencies, hotels and inns, a public library, gaswork (1851), a good water-supply (1866), 2 masonic lodges, a Good Templars' lodge, curling and cricket clubs, a horticultural and poultry association (1869), a rose association (1873), a young men's Christian association, etc. Saturday is market-day; and fairs are held on 13 Feb., 7 April, 23 June (St Columba's), and the second Tuesday in November (cattle and horses), but they have dwindled greatly in importance. Nor are there any manufactures, the linen industry having been long extinct. Places of worship, other than the Cathedral, are an Episcopal church (1857-83; 350 sittings) and the Free church (1874-75; 1000 sittings). The latter, which cost above £3000, presents a large gable frontage, with a tower upon either side, of which the western terminates in a slated spire, 85 feet high. The interior is adorned with a stained-glass memorial window to Fox-Maule Ramsay, eleventh Earl of Dalhousie, who laid the foundation stone. The royal grammar school was founded in 1567, the Duchess of Athole's girls' industrial school in 1853. St George's Hospital, endowed by Bishop George Brown in 1510 for seven old bedesmen, was succeeded by small cottages after the siege of 1639, and, through the loss of its charter, was stripped of most of its property about 1825. The town is governed by a baron ballie, under the Duke of Athole, having never availed itself of Queen Anne's charter of 1704 erecting it into a royal burgh. Pop. (1881) 768, (1891) 613.—*Ord. Sur.*, shs. 48, 47, 1868-69.

Dunkeld is the seat of a presbytery in the synod of Perth and Stirling, which comprises the old parishes of Auchtergaven, Blair Athole, Caputh, Cargill, Clunie,

Dunkeld and Dowally, Little Dunkeld, Kinclaven, Kirk-michael, Lethendy and Kinloch, Moulin, and Rattray, and the *quoad sacra* parishes of Glenshee and Tenandry. Pop. (1871) 17,750, (1881) 17,030, (1891) 15,676, of whom 4164 were communicants of the Church of Scotland in 1892.—There is also a Free Church presbytery of Dunkeld, with churches of Auchtergaven, Blair Athole and Struan, Burrelton, Cargill, Clunie, Dalguise and Strath-bran, Dunkeld, Kirk-michael, Lethendy, and Moulin.—The Roman Catholics have also a see of Dunkeld, which, after being vacant for 293 years, was re-established in 1878, and comprises the counties of Clackmannan, Fife (northern part), Forfar, Kinross, Perth, and the portions of Stirling formerly surrounded by Perth and Clackmannan shires.

See Canon Alexander Myln's *Vita Dunkeldensis Ecclesie Episcoporum* (edited for Bannatyne Club by T. Thomson, 1823-31); vol. ii. of *Billings' Baronial and Ecclesiastical Antiquities of Scotland* (1852); *Dunkeld, its Straths and Glens* (new ed., Dunkeld, 1879); and Dr William Marshall's *Historic Scenes in Perthshire* (1880).

Dunkeld and Dowally, a Strathtay united parish of central Perthshire, containing the villages of DOWALLY and KINDALLACHAN, and (until 1891) a part only of the town of DUNKELD, which part lay detached from the main body, a little to the SE. The Boundary Commissioners in the above year transferred to Dunkeld and Dowally parish the part of Caputh parish that intervened between the main portion and this detached part. As the district thus transferred includes the town of Dunkeld so far as previously in the parish of Caputh, the whole town is now in the parish of Dunkeld and Dowally. The parish had another detached section, the barony of Dalcapon (comprising 1284 acres), which, lying mainly on the left bank of the Tummel, 1½ mile N of Ballinluig Junction, was transferred by the Commissioners to the parish of Logierait. Dunkeld and Dowally, bounded N by Logierait, E by Cluny and Caputh, and S and W by Little Dunkeld, has an utmost length from N to S of 6¼ miles, a varying breadth from E to W of ¾ mile and 4½ miles. The TAY flows 6½ miles south-south-eastward along all the boundary with Little Dunkeld, and receives Kindallachan and Dowally Burns from the interior. In the interior, too, are Loch ORDIE (5 × 3¾ furl.), Lochan na Beinne (1½ × ¾ furl.), St Colme's Loch (2 × 1 furl.), and Dowally Loch (1½ × ¾ furl.), whilst at the meeting-point of Logierait and Moulin lies Loch BROOM (5½ × 2 furl.). Along the Tay the surface declines to less than 200 feet above sea-level, thence rising eastward to 1440 feet near Lochan na Beinne and 1622 at Chapel Hill. Dorothy Wordsworth has left us her impression of this parish, through which she drove with her brother on 8 Sept. 1804:—'We travelled down the Tummel till it is lost in the Tay, and then, in the same direction, continued our course along the vale of the Tay, which is very wide for a considerable way, but gradually narrows, and the river, always a fine stream, assumes more dignity and importance. Two or three miles before we reached Dunkeld, we observed whole hill-sides, the property of the Duke of Athole, planted with fir trees till they are lost among the rocks near the tops of the hills. In forty or fifty years these plantations will be very fine'—a prediction abundantly verified, woods, mostly of larch, now clothing the entire parish, with the exception of barely one-fortieth in pasture and little more than a tenth under crops. The Queen, too, remarks in her *Journal* on the beautiful windings of the Tay and the richly-wooded height, rocky and pyramidal, of Craigiebarns. A large white building, St Colme's, 7 furlongs SSE of Dowally and 4 miles NNW of Dunkeld, is the model farm of the Dowager Duchess of Athole; and the Duke of Athole is the sole proprietor. This parish is in the presbytery of Dunkeld and synod of Perth and Stirling; the living is worth £165. The churches are noticed under Dowally and Dunkeld; and Butterstone, Dowally, and Dunkeld Royal public, and Dunkeld Duchess of Athole's schools, with respective accommodation for 100, 107, 180, and 135 children, had (1891) an average attendance of 26,

34, 57, and 88, and grants of £34, £43, 14s., £56, 5s. 6d., and £95, 0s. 6d. Valuation (1891) £5656, 6s. 2d. Pop. of parish (1871) 839, (1881) 791, (1891) 1074; of Dunkeld registration district (1881) 882, (1891) 740.—*Ord. Sur.*, shs. 55, 56, 47, 1869-70.

Dunkeld and Perth Railway. See HIGHLAND RAILWAY.

Dunkeld, Little, a Strath-tay parish of central Perthshire, containing the villages of Birnam, Inver, Dalguise, and Balnaguard, with the stations of Murthly, Dunkeld, and Dalguise. The Boundary Commissioners in 1891 transferred to it the Amulree portion of the parish of Fowlis-Wester. It is bounded N by Logierait, NE by Dunkeld-Dowally and Caputh, E by Kinclaven, S by Auchtergaven, Methven, and Fowlis Wester, and W by Dull. Its area is now 42,531 acres, of which 872½ are water. The TAY sweeps 17¾ miles east-south-eastward, southward, and east-south-eastward again, along all the boundary with Logierait, Dunkeld-Dowally, and Caputh; its affluent, the BRAN, from 9 furlongs below its exit from Loch Freuchie, winds 12½ miles east-north-eastward, partly along the southern border, but mainly through the interior. Loch Skiach (6 × 3½ furl.) and Little Loch Skiach (2½ × 1½ furl.) lie towards the middle of the parish; and on its western border are Lochs Creagh (1½ × ¾ furl.) and Fender (2½ × 2 furl.) In the furthest E the surface sinks along the Tay to less than 200 feet above sea-level, thence rising westward and north-westward to Kingswood (451 feet), Birnam Hill (1324), Little Trochrie Hill (1199), Creag Liath (1399), Airlich (1026), Meikle Crochan (1915), Craig Vinean (1247), Drum Mor (1203), Meall Mor (1512), Craig Hulich (1809), Meall Dearg (2258), Creag Mhor (1612), Creag an Eunaich (1506), Meall Reamhar (1659), Elick More (1693), Craig Lochie (1700), and Creag Maoiseach (1387), where the eleven last are all to the N of the Bran. Roofing-slate, of excellent quality and of a deep-blue hue, has been quarried on Birnam Hill, and fine-grained sandstone near Murthly, while potters-clay occurs in Strathbrann. The soil is black loam throughout most of the eastern valley, on the other arable lands is partly black mould, partly a mixture of sand and gravel, and on the hills is very poor. A considerable though ever-lessening number of cairns, stone circles, and hill-forts make up the antiquities, with 'Duncan's Camp' upon Birnam Hill, the ruins of Trochrie Castle, an old bridge across the Bran a little higher up, and a memorial stone at Ballinloach that marks the meeting-place of feudal courts. In the days of Bishop James Bruce, about the middle of the fifteenth century, this parish suffered severely from the raids of Robert Roach Macdonnochie; and at some period unknown to record its church and its clergy would seem to have fared but poorly at the hands of its own parishioners. For—

'Oh! sic a parish, oh! sic a parish!

Oh! sic a parish is Little Dunkel!

They hae hangit the minister, droun'd the precentor
Dung down the steeple, an' fuddl'd the bell!

Thanks to the beauty of its scenery, Little Dunkeld has many interesting memories of visits from illustrious personages—the poets Gray and Wordsworth, the Queen and Prince Consort, Millais the painter, and others. Perhaps the most interesting of all is that thus noted in Burns's *Highland Tour*:—'30 Aug. 1787. Walk with Mrs Stewart and Beard to Birnam top—fine prospect down Tay—Craigiebarns hills—Hermitage on the Bran, with a picture of Ossian—breakfast with Dr Stewart—Neil Gow plays—a short, stout-built, honest, Highland figure, with his greyish hair shed on his honest social brow—an interesting face, marking strong sense, kind openheartedness, mixed with unmixtrusting simplicity—visit his house—Margot Gow.' Neil Gow (1727-1807) was born at Inver; so was his son, Nathaniel (1766-1831), who was himself a masterly violinist. The principal mansions are Murthly Castle, Dalguise House, Kinnaid House, Kinloch Lodge, Torwood, St Mary's Tower, and Erigmore. Giving off portions to the *quoad sacra* parishes of Amulree and Logiealmond, Little Dunkeld is in the presbytery of Dunkeld and synod of Perth

and Stirling; the living is worth £358. There are two churches—the one, by the Tay, nearly opposite Dunkeld, built in 1798, and containing 820 sittings; the other, in Strathbrann, near Rumbling-Bridge, 3 miles to the WSW, rebuilt in 1851, and containing 250. There is also a Free church of Strathbrann and Dalguise, standing near Trochrie, 4 miles WSW of Dunkeld; and the five schools of Drumour, Little Dunkeld, Murthly, Balnaguard, and Dalguise, with respective accommodation for 67, 200, 142, 37, and 56 children, had (1891) an average attendance of 93, 105, 74, 19, and 24, and grants of £46, 0s. 6d., £108, £80, 17s., £34, 15s., and £32, 8s. 6d. Valuation (1891) £20,439, 7s. 10d. Pop. of parish (1871) 2373, (1881) 2175, (1891) 2108; of registration district (1871) 2352, (1881) 2149, (1891) 2068.—*Ord. Sur.*, shs. 47, 48, 55, 1868-69.

Dunkenny, an estate, with a mansion, in Eassie and Nevay parish, Forfarshire, 2 miles WSW of Glamis station, on the Cupar-Angus and Forfar section of the Caledonian railway. Its owner is John Ramsay L'Amey, Esq. (b. 1813; suc. 1854).

Dunlappie, an ancient parish in the N of Forfarshire, united in 1612 to Stracathro. It forms the north-western district of the present Stracathro parish; takes its name from the two words Dun and Lappie, signifying a 'hill' and 'water'; and consists partly of Lundic Hill (800 feet), with West Water flowing around much of the hill's base, and partly of lower grounds traversed by numerous streamlets.

Dun Leacainn, a massive hill (1173 feet) in Inverary parish, Argyllshire, rising from the margin of Loch Fyne to the NE of Furnace village, 8 miles SW of Inverary town. A granite quarry, furnishing stones of fine grain and colour for exportation, is worked in a spur of the hill, and was the scene of a stupendous blast in Oct. 1871, when 4 tons of gunpowder, deposited in a deep boring, the result of more than a twelvemonth's operation, exploded with a muffled roar, and with a slight upheaval of the hill-front; and tore into pieces, ready for working to the desired size, many thousand tons of solid rock. Another monster blast at Craræ quarry in 1886 was witnessed by many excursionists from Glasgow, who crowded in too soon after the explosion, and a number succumbed to the fatal influence of the foul gases that supervened.

Dunliath, an old Scandinavian fort in Kilmuir parish, Isle of Skye, Inverness-shire.

Dunlichity, an ancient parish of NE Inverness-shire, united in 1618 to DAVIOT, and lying along Strathnairn to the SW of Daviot. It takes its name, originally *Dunleacatti*, and signifying 'the hill of the Catti,' from a hill adjacent to its church; it forms the larger portion of the united parish of Daviot and Dunlichity; and it still has a church of its own, rebuilt in 1758, and containing 300 sittings. The Catti, whose territory lay in and around it, were the ancestors of the Clan Chattan, comprising MacIntoshes, MacPhersons, Davidsons, MacGillivrays, MacBeans, VicGovies, Gows or Smiths, and others, all followers of MacIntosh of MacIntosh.

Dunlop, a village in the N of Cunninghame district, Ayrshire, and a parish partly also in Renfrewshire until 1891, when the Boundary Commissioners placed it wholly within the county of Ayr. The village, standing on the right bank of Glazert Burn, has a town hall, opened 8 Dec. 1891, a post office, with money order, savings bank, and telegraph departments, a branch of the Clydesdale Bank, and a station on the Glasgow, Barrhead, and Kilmarnock Joint railway, 2¾ miles NNW of Stewarton, 7¾ miles NNW of Kilmarnock, and 16 SW of Glasgow; fairs are held at it on the second Friday of May, *o.s.*, and 12 Nov. Pop. (1891) 404.

The parish, containing also Lugton Junction, 2¼ miles N of Dunlop and 5¼ E by S of Beith, is bounded N and NE by Neilston, SE and S by Stewarton, and NW by Beith. Its utmost length, from NE to SW, is 5½ miles; its breadth, from NW to SE, varies between 3¼ furlongs and 2½ miles; and its area is 7181¼ acres, of which 1101 belonged to Renfrewshire, and 2 are water. Three streams all run south-westward, on their ultimate way to the

Irvine—LUGTON Water along the boundary with Beith, Corsehill Burn along that with Stewarton, and Glazert Burn right through the interior; Halket Loch, covering 9 or 10 acres, was drained about 1830. Sinking to 280 feet above sea-level at the south-western corner of the parish, the surface rises thence to 444 feet near Ravenslie, 447 near Dunlop station, 583 near Titwood, 828 near Craignaght, 687 near East Halket, and 749 at Drumgrain—steep rocky knolls or hills these last that command a brilliant panoramic prospect. The rocks are partly eruptive, partly carboniferous; claystone-porphry, amygdaloid, greenstone, and basalt have been extensively quarried; limestone is plentiful, and has long been worked; and coal exists, but of very inferior quality. Columnar basalt, its pillars generally pentagonal and somewhat curved, occurs at Lochridge Hills, and has been laid bare by quarrying operations. The soil in a few spots is moss, in some is a fine loam, and mostly is of a clayey retentive nature, very productive, especially in grass. Barbara Gilmour, a woman whose wits had been sharpened by exile in Ireland during Scotland's troubles between the Restoration and the Revolution, settled down in Dunlop as a farmer's wife, and, having specially turned her attention to the produce of the dairy, attempted successfully to manufacture from unskimmed milk a species of cheese till then unknown in Scotland, and differing vastly from the horny insipidity of her foregoers. Her process soon was copied by her neighbours; and 'Dunlop cheese' came in a short time into such demand, that whether made by Barbara or her neighbours, or by the housewives of adjoining parishes, it found a ready market far and near. Even Cobbett himself pronounced it 'equal in quality to any cheese from Cheshire, Gloucestershire, or Wiltshire.' The Cunninghame cattle of the present day, from whose milk this famous cheese is mostly made, are descendants from several foreign animals—Alderneys, according to tradition—purchased about the middle of last century by Mr John Dunlop of Dunlop House. ARKER Castle is the principal antiquity; a pre-Reformation chapel, $\frac{1}{2}$ mile from the village, having left no vestiges. From at least 1260 down to 1858 the lands of Dunlop were held by a family of the same name, the last but one of whom, John Dunlop (1806-39), M.P. for the county, was created a baronet in 1838. He it was that built Dunlop House in 1833, a fine Tudor mansion, $\frac{1}{4}$ mile E of Dunlop station. Dunlop is in the presbytery of Irvine and synod of Glasgow and Ayr; the living is worth £337. The parish church, built in 1835, is a handsome edifice, containing 750 sittings. There is also a Free church; and a public school, with accommodation for 236 children, had (1891) an average attendance of 132, and a grant of £129, 14s. Pop. (1801) 808, (1831) 1040, (1861) 1038, (1871) 1160, (1881) 1363, (1891) 1410.—*Ord. Surv.*, sh. 22, 1865.

Dunloskin, a farm with a small fresh-water lake in Dunoon parish, Argyllshire, on the Hafton estate, 1 mile N by W of Dunoon town. Loch Loskin (500 × 200 yards) lies at an altitude of 110 feet above sea-level, and is famous for water-lilies and other aquatic plants; W of it rises peaked Dunan (575 feet), which commands a splendid view.

Dunlugas, an estate, with a mansion in Alvah parish, Banffshire, on the right bank of the Deveron, $4\frac{1}{2}$ miles NNW of Turriff. Built in 1793, the mansion is a handsome three-story granite edifice, with very beautiful grounds. Its owner is Sir Robert John Abercromby, Bart., of Birkenbog. See ALVAH.

Dunmacsniochan. See BEREGONTUM.

Dunmaglass (Gael. *dun-na-glas*, 'grey castle'), an estate, with a shooting-lodge, in Daviot and Dunlichity parish, Inverness-shire, 15 miles SSW of Daviot church, and $6\frac{1}{2}$ E by S of Inverfarigaig pier, upon Loch Ness. From 1626 the estate belonged to the heads of the Macgillivrays, the last of this name who held it being Neil John Macgillivray, Esq., of Montreal, in Canada. It now belongs to William Sopper, Esq.; and, extending over 15,600 acres, comprehends all the upper waters of the FARIGAIG.

Dunman, a rocky hill on the SW coast of Kirkmaiden parish, Wigtownshire, overhanging the sea, $4\frac{1}{2}$ miles WNW of the Mull of Galloway. It rises to a height of 522 feet; is crowned with the vestiges of an ancient fort, probably of the times of the Strathclyde or Cumbrian kingdom; and, about the end of last century, had an eagle's eyrie on its cliffs.

Dunmhieraonaill or **Ronaldson's Tower**, a ruined ancient beacon or watch-tower in Kilminver and Kilmelfort parish, Argyllshire, on a point on the coast of the Sound of Mull.

Dunmoor. See DUN, MUIR OF.

Dunmore, a conspicuous height (841 feet) in Comrie parish, Perthshire, $1\frac{1}{2}$ mile N by W of Comrie village. It is crowned by a handsome granite obelisk, 72 feet high, erected in 1815 to the memory of Henry Dundas of DUNIRA, first Viscount Melville (1742-1811); and it commands a magnificent view of Strathearn.

Dunmore, a hill (1520 feet) in Crieff parish, Perthshire, flanking the left or E side of the Sma' Glen of Glenalmond, 5 miles S of Amulree. A ruined ancient fort surmounting it, about half a rood in extent, consists of strong stone bulwarks, in places double, and partly vitrified on the W side. Inaccessible on all sides except one, and there defended by a deep trench, 30 paces beyond the bulwarks, it is believed to belong to the ancient Caledonian times; and has, by popular tradition and by some credulous antiquaries, been regarded as a habitation of Fingal. See CLACH-NA-OSSIAN.

Dunmore. See KILCALMONELL.

Dunmore, a village and a noble mansion in Airth parish, Stirlingshire. The village stands on the right shore of the Forth, $2\frac{1}{2}$ miles NNE of Airth station, on the Alloa section of the Caledonian railway, 8 ESE of Stirling, and $6\frac{1}{2}$ NE of Larbert, under which it has a post and telegraph office. It has a small pier, at which the Leith and Stirling steamers sometimes call. Near the village is Dunmore pottery, which has acquired quite a European reputation for its ware. The mansion, $\frac{3}{4}$ mile WSW of the village, is a plain castellated edifice, and stands amid splendid gardens and beautifully wooded grounds, containing and commanding delightful views. There is free access to the park, which contains some rare old trees. Its private Episcopal chapel, St Andrew's (1850-51), is a good Early English structure, with stained-glass windows, monuments to the two last earls, and an exquisite marble one to the Hou. Mrs C. A. Murray, who died in 1851. Beneath the chapel is the Dunmore mausoleum, and close to it is the tower of the old Elphinstone castle. Dunmore House, formerly the chief Scottish seat of the Earls of Dunmore, was purchased, together with a portion of the estate, by Claud H. Hamilton, Esq., of Barnes and Cochno, Dumbartonshire. See HARRIS.

Dun, Muir of, a hamlet in Dun parish, Forfarshire, 3 miles N by W of Bridge of Dun Junction on the Caledonian railway.

Dunmyat, an abrupt commanding hill in the former Perthshire portion of Logie parish, to the N of the Links of Forth, and $3\frac{1}{2}$ miles NE of Stirling. The parish of Logie was reconstituted in 1891 by the Boundary Commissioners, and along with this Perthshire portion was placed wholly in Stirlingshire. A frontier mass of the Ochils, it projects somewhat from the contiguous hills, standing out from them like a buttress, and presenting to the Carse of the Forth an acclivity of steeps, precipices, and cliffs; it consists of rocks akin to those of the neighbouring hills, but penetrated with large workable veins of barytes; it rises to an altitude of 1375 feet above sea-level; and it commands, from its summit, a prospect of great extent and diversity, almost unrivalled in gorgeousness, and comprehending the domain of Airthrey, the vale of the Devon, Cambuskenneth Abbey, the town and castle of Stirling, the Carse of the Forth, the luxuriant Lothians, the fertile strath between the Forth and the Clyde away to the centre of Clydesdale, the upper basin of the Forth to the river springs on Ben Lomond, and the peaks and masses of the frontier Grampians and of the Southern

Highlands, from the centre of Perthshire all round to the Pentlands.—*Ord. Sur.*, sh. 39, 1869.

Dunn, a hamlet, with an inn, in Watten parish, Caithness, near the head of Loch Watten, 9 miles SE of Thurso.

Dun-na-Feulan or **Gull Rocks**, two rocky islets near the cliffs of Sanday island, in Small Isles parish, Argyllshire. Of different magnitudes, but of similar height, rising 100 feet above sea-level, they form striking scenic combinations with surrounding objects; and, when the mountains of Rum are swathed in clouds and the intervening sea-sound is lashed into tumult by a storm, their appearance is singularly grand. One of them is so slender as to present some resemblance to a steeple; and it consists partly of trap rock and partly of conglomerate, divided from each other by a vertical plane.

Dunnagoil. See DUNAGOIL.

Dunnechtan. See DUNNICHEN.

Dunnemarle. See DUNIMARLE.

Dunnet, a village and a parish in the N of Caithness.

The village stands, near the north-eastern corner of Dunnet Bay, 3 miles NNE of Castletown and 9 ENE of Thurso by road, only 2½ and 6½ by sea; a little place with a beautiful southern exposure, it has a post office under Thurso, an inn, and fairs on the first Tuesday of April, the last Tuesday of August, and the second Tuesday of October.

The parish is bounded NW and N by the Pentland Firth, E by Canisbay, SE by Bower, SW by Bower and Olig, and W by Dunnet Bay. Its utmost length, from N to S, is 8 miles; its breadth, from E to W, varies between 4½ furlongs and 6½ miles; and its area is 17,758½ acres, of which 3838½ are foreshore and 519 water. The coast-line, about 15 miles in length, is occupied over more than half that distance by the bold promontory of Dunnet Head; comprises a reach of 1½ mile in the extreme SW of level sand, and a reach of 2¼ miles in the extreme E of low shore accessible at several creeks; and in all other parts is rocky and more or less inaccessible, Dunnet Bay (3¼ × 2½ miles) strikes east-south-eastward from the Pentland Firth, along the SW base of Dunnet Head, and, extending to the said reach of level sand, belongs on its southern shore to Olig parish. Throughout its connection with Dunnet it affords no shelter for vessels, but forms there excellent fishing ground for saithe, flounders, etc., and is sometimes frequented, in July and August, by shoals of herrings. Dunnet Head, 4 miles long and from 1½ to 3 miles across, goes northward from the vicinity of the village to a semicircular termination; and, consisting mainly of a hill ridge diversified with heights and hollows, it stoops precipitously to the sea all round its coast in broken rocks from 100 to 306 feet high. It contains at or near the water line several caves, and is crowned on its extremity by a lighthouse, erected in 1831 at a cost of £9135, and showing a fixed light, visible at the distance of 23 nautical miles. The rest of the land is comparatively low and flat, attaining only 200 feet above sea-level at Barrock near the Free church, and 216 near Greenland school. Besides ten little lakes on Dunnet Head, the largest of them the Loch of Bushtas (3 × 1 furl.), there are in the interior St John's Loch (6½ × 4½ furl.) and Loch Hailan (8½ × 3½ furl.); but Loch Syster (1½ × ½ mile), on the Canisbay border, was drained in 1866 at a cost of £840, whereby 269 acres of solum were exposed—150 of them capable of cultivation. Sandstone, of compact structure suitable for ordinary masonry and for mill-stones, rollers, and gate posts, forms the main mass of Dunnet Head; sandstone-flag, suitable for pavement and similar to the famous Caithness flag of other parts of the county, underlies the interior districts; and both are extensively quarried. The soil, on Dunnet Head, is mostly moss, incumbent on moorland-pan; on the eastern seaboard, is black loam, overlying sandy clay; on the south-western seaboard, round Dunnet village, is a dry, black, sandy loam; over 2000 acres eastward of Dunnet Bay is benty sand or links, formerly in commonage, but now divided among several farms, and considerably clothed with herbage; over 3000 acres in the extreme

E is moss, from 2 to 6 feet deep, resting upon blue clay; and in the southern districts is an argillaceous loam, incumbent on a bed of clay from 2 to 5 feet deep. If the entire land surface be classified into 17 parts, about 5 of them are in cultivation, 2 are links, 6 are moss, and 4 are improvable waste. Several of the ancient structures, usually called Picts' houses, are in the parish, one of them at Ham being still fairly entire; in 1873, a cist at Kirk o' Banks yielded 5 penannular silver armlets, about 3 inches in diameter, which now are in the Edinburgh Antiquarian Museum. A pre-Reformation chapel at Dunnet Head and two others in different localities have left some vestiges. Timothy Pont, the topographer, was minister during 1601-8. Dunnet is in the presbytery of Caithness and synod of Sutherland and Caithness; the living is worth £245. The parish church at the village is ancient, and, repaired and enlarged in 1837, contains 700 sittings. There is also a Free church at Barrock, 2½ miles to the E. Three public schools—Dunnet, Cross Roads, and Greenland—with respective accommodation for 100, 185, and 68 children, had (1891) an average attendance of 73, 109, and 46, and grants of £85, 16s., £128, 3s., and £55, 8s. 6d. Pop. (1801) 1366, (1831) 1906, (1861) 1861, (1871) 1661, (1881) 1607, (1891) 1488, of whom 45 were Gaelic speaking.—*Ord. Sur.*, sh. 116, 1878.

Dunnichen, a village and a parish of Forfarshire. The village stands 1½ mile E by N of Kingsmuir station, on the Dundee and Forfar section of the Caledonian railway, and 3¾ miles ESE of its post-town, Forfar. A great March fair which was formerly held here is now extinct.

The parish, containing also LETHAM village and Kingsmuir station, is bounded N and NE by Rescobie, E by Kirkden and Carmyllie, S and SW by Inverarity, W and NW by Forfar. The Dunbarrow detached portion of the parish, comprising 828 acres, was transferred by the Boundary Commissioners in 1891 to the parish of Kirkden. Its utmost length, from N to S, is 3¾ miles; its width, from E to W, varies between 7½ furlongs and 3¾ miles; and its area is now 4094 acres, of which 5 are water. The surface, sinking near Letham to close on 300 feet above sea-level, thence rises south-westward to 418 near Craichie, 513 near Fairhead, and 614 near Draffinn; and west-north-westward to 764 at Dunnichen Hill, on the Rescobie border, which, either cultivated or planted to its summit, was originally called Dun-Nechtan, perhaps after Nectan Morbet, a Pictish king (457-81). The rivulet Vinney, running from W to E along the base of Dunnichen Hill, receives some rills in its progress, and passes into Kirkden, there to fall into the Lunan. A marsh of some 50 acres in extent, called the Mire of Dunnichen, and containing an islet on which the ancient church of Dunnichen is said to have been built, was drained, and is now under cultivation. Sandstone, quarried for various purposes, is the prevailing rock; and the soils, for the most part, are either friable loams with predominance of sand, or friable clays on retentive bottoms. Fully three-fourths of the entire area are either regularly or occasionally in tillage, a little more than one-tenth is under wood, and the rest is either pastoral or waste. A Caledonian or Pictish fort, on a low southern shoulder of Dunnichen Hill, had left some vestiges, which were partly removed for building dykes, and partly obliterated by a quarry; another ancient fort on Dunbarrow Hill is still traceable in its foundations. In a sanguinary battle, fought on the East Mains of Dunnichen, the revolted Picts defeated and slew Ecgrid, the Northumbrian king, recovering thus their independence, 20 May 685. Their victory has left its vestiges in stone-covered graves, with urns and human bones, both on the East Mains of Dunnichen and in a round gravel knoll near the Den of Letham. Dunnichen House, near the village, at the foot of the southern slope of Dunnichen Hill, is a fine mansion, beautifully embosomed in trees; the estate, purchased about 1700 by a Dundee merchant of the name of Dempster, was greatly improved by the eminent agriculturist, 'honest George Dempster,' M.P. (1735-1818),

and now is held by Lady Katherine H. Dempster-Metcalf. Dunnichen is in the presbytery of Forfar and synod of Angus and Mearns; the living is worth £185. The parish church (1802; 456 sittings) stands at Dunnichen village, and at Letham are Free and Congregational churches; whilst three public schools—Craichie, Letham infant, and Letham mixed—with respective accommodation for 100, 87, and 156 children, had (1891) an average attendance of 73, 55, and 90, and grants of £76, 8s., £42, 10s., and £89, 18s. Valuation (1882) £8421, 10s. 11d., (1891) £6020, 3s., plus £409 for railway. Pop. (1801) 1043, (1831) 1513, (1861) 1932, (1871) 1536, (1881) 1422, (1891) 1233.—*Ord. Sur.*, sh. 57, 1868.

Dunnideer, an isolated hill in Insch parish, Aberdeenshire, $1\frac{1}{4}$ mile W of Insch village. Separated only by the narrow vale of the Shevock rivulet from Christ's Kirk Hill (1020 feet) in Kennethmont parish, and standing nearly in a line with the W end of Foudland (1529) $3\frac{1}{4}$ miles to the N, it rises abruptly in the form of a cone, a little flattened at the top, to a height of 876 feet above sea-level, or 470 above the village. It is crowned by remains of a vitrified fort, and by the fragment of an ancient tower, with walls 7 feet thick and from 50 to 60 feet high, variously alleged to have been built either by Grig or Girig, King of the Picts, or by David, Earl of Huntingdon.

Dunnikier, a mansion in Kirkcaldy parish, Fife, 3 miles N of Kirkcaldy town. The estate, comprising much of the seaboard of Dysart parish and about seven-eighths of the landward part of Kirkcaldy, has belonged since the close of the 17th century to the Oswalds, a family that has produced an eminent statesman and a distinguished general in the Right Hon. James Oswald (c. 1715-80) and Sir John Oswald, G.C.B. (c. 1770-1840). See KIRKCALDY.

Dunnikier, a hill in Kilconquhar parish, Fife, $3\frac{1}{4}$ miles NNW of Colinsburgh. It rises to an altitude of 750 feet above sea-level, and commands an extensive and very brilliant view over much of Fife, and over parts of the Firths of Forth and Tay, to the Lammermuirs, the Sidlaws, and the Grampians.

Dunninald House, a mansion of 1825 in Craig parish, Forfarshire, $\frac{1}{2}$ mile from the lofty sea-cliffs of Boddin and 3 miles S by W of Montrose. The estate contains 663 acres. See CRAIG.

Dunning (Gael. *dunan*, 'small fort'), a village and a parish of Lower Strathearn, SE Perthshire. The village stands, 200 feet above sea-level, on Dunning Burn, near the northern base of the Ochils, $1\frac{3}{4}$ mile SE of Dunning station on the Scottish Central section of the Caledonian, this being $4\frac{1}{2}$ miles NE of Auchterarder, $23\frac{1}{2}$ NE of Stirling, $60\frac{1}{2}$ NNW of Edinburgh (*via* Stirling), $53\frac{1}{2}$ NE of Glasgow, and $9\frac{1}{2}$ WSW of Perth. It has a post office, with money order, savings bank, and railway telegraph departments. Burned by Mar's forces in the retreat from Sheriffmuir to Perth, with the exception of a single house, on 14 Nov. 1715, it now is a neat little place, held in feu of Lord Rollo and Dunning, under a baron-bailie; and possesses a branch of the Union Bank, a local savings bank, inns, gaswork, a town-hall, a library and reading-room, a mutual improvement society (1858), bowling and curling clubs, and a co-operative society. A plentiful supply of water was introduced in 1872, and a magnificent fountain, the gift of a successful native abroad, has been erected in the village square. A thorn-tree, planted to commemorate its burning by the Jacobites, and protected by a strong circular wall, still stands in the centre of the village. The prosperity of the village has suffered through the decadence of handloom weaving. Wednesday is market-day. The parish church is said to have been built between 1200 and 1210, but it has undergone many alterations since, having been almost rebuilt in 1810, and contains 1000 sittings. Much of the ancient building, however, still remains in its original form, the most conspicuous object being its massive square Norman tower. This, with its saddle-roof and SW stair-turret, is a very characteristic structure, taper-

ing upwards in three unequal stages to a height of 75 feet. In the course of recent repairs, a fine Norman arch between the tower and the interior of the church, which had been barbarously bricked up and disfigured, was reopened and restored. In 1890 Lord Rollo restored two fine windows in the ancient tower, in which a new clock, costing £120, was placed in November of the same year. There are also a Free church and a U.P. church; whilst a public school, with accommodation for 289 children, had (1891) an average attendance of 196, and a grant of £184, 12s. Pop. (1841) 1068, (1861) 1105, (1871) 943, (1881) 1048, (1891) 838.

The parish, containing also the village of Newton of Pitcairns, is bounded N by Findo-Gask, NE by Forteviot, E and SE by Forgandenny, S by Orwell in Kinross and by Fossoway, SW by Glendevon, and W by Auchterarder. The detached portion of the parish was in 1891 joined to the main portion by the Boundary Commissioners—the intervening detached portion (12 acres) of Auchterarder parish, to the NW of Dunning parish, having been transferred to the latter. Its utmost length, from N to S, is $6\frac{1}{2}$ miles; its breadth, from E to W, varies between $2\frac{1}{4}$ and $5\frac{1}{4}$ miles; and its area is now 14,940 acres, of which 73 are water. The EARN, here winding $3\frac{1}{2}$ miles eastward, roughly traces all the northern boundary, and here receives Dunning Burn, running $3\frac{1}{4}$ miles north-by-eastward over a gravelly bed; another of its affluents, the Water of May, rises on the eastern slope of John's Hill, at the SW corner of the parish, and thence flows $4\frac{1}{2}$ miles eastward and north-eastward through the southern interior and along the Forgandenny border, till it passes off into Forgandenny. In the W is triangular White Moss Loch ($1\frac{1}{2} \times 1\frac{1}{2}$ furl.), and in the E the tinier Loch of Montalt ($1 \times \frac{1}{2}$ furl.) Sinking in the NE along the Earn to 34 feet above the sea, the surface rises southward to the green pastoral Ochils, and, tolerably level over its northern half, attains 193 feet near Mains of Duncrub, 171 near Nether Garvock, 1064 at Rossie Law, 932 near Montalt, 1419 at Simpleside Hill, 1302 at Skymore Hill, 1337 at Cock Law, 1558 at Corb Law, and 1500 at John's Hill, the two last culminating on the Auchterarder border. Trap rock prevails in the S, sandstone throughout the centre and the N; and both have been quarried. The soil is light and sandy along the Earn, clay or gravel in other arable tracts, and on the Ochils such as to yield good pasture for sheep. A fort is on Rossie Law, a standing stone near Crofts; and urns have been found and pieces of ancient armour. Mansions are DUNCRUB House, Garvock, Pitcairn, Inverdunning, and Kippen. Dunning is in the presbytery of Auchterarder and synod of Perth and Stirling; the living is worth £280. Valuation (1891) £12,519, 12s. 3d. Pop. (1801) 1504, (1831) 2045, (1861) 2084, (1871) 1832, (1881) 1635, (1891) 1345, this singular decrease in the landward part of the parish being due to the absorption of small farms into large.—*Ord. Sur.*, shs. 40, 39, 43, 47, 1867-69.

Dunnottar (anc. *Dunfoither*; Gael. *dun-òitir*, 'fort of the low promontory'), a coast parish of Kincardineshire, containing the fishing village of Crawton and all the old town of STONEHAVEN. It is bounded NW and N by Fetteresso, E by the German Ocean, S by Kinneff, and SW by Arbutnott and Glenbervie. Rudely resembling a triangle in outline, with westward apex, it has an utmost length from E to W of 5 miles, an utmost breadth from N to S of $3\frac{3}{4}$ miles, and an area of 7884 $\frac{1}{2}$ acres, of which 16 are foreshore and 86 water. The coast is rock-bound and precipitous, consisting partly of detached masses and headlands, but chiefly of a range of cliffs rising to heights of 100 and 200 feet above the deep water that washes their base. In its loftiest portion for about a mile it presents an unbroken wall-like face, thronged with sea-birds, and hence called Fowlshough; elsewhere it exhibits fantastic forms of isolated or creviced rock, several large caverns and rock-tunnels, and a natural arcade more than 150 yards long, through the base of a high promontory, which may be traversed by an ordinary-sized boat. The sea can be gained from the land only by a few narrow grassy

declivities that lead down to coves or baylets, fenced by sunken rocks against access by ships or large boats. CARRON Water winds $6\frac{1}{2}$ miles east-by-northward along all the boundary with Fetteresso; and the northern division of the parish along its bank forms the eastern end of the Howe of Mearns—the eastern commencement, that is, of the great hollow which extends diagonally across Scotland, and bears in Forfarshire and Perthshire the name of Strathmore. Otherwise the surface has a general westward or west-south-westward ascent, to 433 feet near Kittlenaked, 492 at Law of Lumgair, 638 at Cloch-na Hill, and 700 near Carmont on the Glenbervie border. The predominant rock is sandstone conglomerate, containing nodules of quartz and limestone; whilst porphyritic granite forms a stratum at Carmont. Granite and gneiss boulders are not unfrequent; columnar basalt forms part of a ledge of rock at Crowth; and a building-stone, known locally as 'red craig,' has been quarried on a sandstone cliff above Stonehaven Harbour. The soils are variously clayey, loamy, gravelly, and moorish; and they occur, not in separate expanses or in strictly distinguishable sections, but mixedly in all parts of the parish, and often on one farm or even in one field. About three-fifths of the entire area are under cultivation, rather more than one-fifth is hill pasture or moor, and fully one-twelfth is under wood. DUNNOTTAR CASTLE is the chief antiquity, others being a cairn at Carmont and a 'Pict's kiln' on Lumgair Law. Barras, the seat once of a branch of the Ogilvies, $3\frac{1}{2}$ miles SSW of Stonehaven, is now a ruin; and the principal mansion is Dunnottar House, 1 mile SW of Stonehaven, which, built about 1802, is a plain but large edifice, with gardens formed at a cost of £10,000 and upwards. Its owner is William Nathaniel Forbes, Esq. (b. 1826; suc. 1851). Dunnottar is in the presbytery of Fordoun and synod of Angus and Mearns; the living is worth £251. The parish church stands by the Carron, 1 mile WSW of Stonehaven, and was built in 1782 on the site of the church of St Bridget; in its graveyard is a stone to the Covenanters who perished in the Castle, and here it was that in 1793 Scott met Robert Paterson or 'Old Mortality.' The parish church and churchyard formerly stood on the rock on which the castle is built, and within the castle walls. A mission church, named St Bridget's, was opened in January 1888. Brackmuirhill and Dunnottar public schools, and Stonehaven (Episcopal) school, with respective accommodation for 128, 526, and 98 children, had (1891) an average attendance of 89, 324, and 108, and grants of £67, 16s. 6d., £286, 2s. 6d., and £94, 10s. Valuation (1892) £11,489, 19s. 5d., *plus* £1322 for railway. Pop. (1871) 2102, (1881) 2498, (1891) 2739.—*Ord. Sur.*, sh. 67, 1871.

Dunnottar Castle, a ruined fortress on the coast of Dunnottar parish, $1\frac{1}{2}$ mile S by E of Stonehaven. It crowns the flat summit, $4\frac{1}{2}$ acres in extent, of a stupendous rock, which, somewhat resembling that of Edinburgh Castle, is all but severed from the mainland by a chasm, and on all other sides rises sheer from the sea to a height of 160 feet. The ancient capital of the Mearns, this natural stronghold figures early in history, for, in 681, we hear of the siege of 'Dunfoithir' by Bruidhe, King of the Picts, and, in 894, of a second siege under Turan, his successor. Then, in 900, Donald, King of Alban, was cut off here and slain by the Danes; and, in 934, Aethelstan, ravaging Scotland with his land forces, penetrated so far as Dunnottar. Of much later date, however, is the present castle, which, from its situation and extent, forms one of the most majestic ruins in the kingdom, and which, prior to the era of artillery, must have been well-nigh impregnable. The only approach to it is by a steep path winding round the body of the rock, which has been scarped and rendered inaccessible by art. The entrance is through a gate, in a wall about 40 feet high; whence, by a long passage, partly arched over, and through another gate pierced with four cailles or loop-holes, the area of the castle is reached. This passage was formerly strengthened by two iron portcullises. The area is surrounded by an embattled wall, and occupied by buildings of very different ages, which,

though dismantled, are, for the most part, tolerably entire, wanting but roofs and floors. The oldest, with the exception of the chapel, is a square tower said to have been built towards the close of the 14th century. A large range of lodging-rooms and offices, with a long gallery of 120 feet, appears to be comparatively modern—not older than the latter end of the 16th century. There are ruins of various other buildings and conveniences necessary or proper for a garrison, such as barracks, a basin or cistern of water 20 feet in diameter, a bowling-green, and a forge said to have been used for casting iron bullets. The building now called the chapel was at one time the parish church; for, notwithstanding its difficulty of access, the church, and even the churchyard of the parish, were originally situated on this rock. Sir William Keith, Great Marischal of Scotland, made an exchange of certain lands in the counties of Fife and Stirling with William de Lindsay, Lord of the Byres, for part of the lands of Dunnottar; and the natural strength of its rock led him to build a castle on it as a refuge for himself and his friends during those troublous times. But, to avoid offence, he first built a church for the parish in a more convenient place; notwithstanding which, the Bishop of St Andrews excommunicated him for violation of sacred ground. Sir William, on this, applied to Pope Benedict XIII., setting forth the exigency of the case, and the necessity of such a fortress, with the circumstance of his having built another church; on which his holiness issued a bull, dated 18 July 1394, directing the bishop to take off the excommunication, and to allow Sir William to enjoy the castle at all times, on the payment of a certain recompense to the church; after which it continued in the Keith family till the forfeiture of the last Earl in 1716.

Prior to this, however, a castle of Dunnottar is said to have been taken about 1296 by Sir William Wallace, who burned 4000 Englishmen in it. Blind Harry gives the following lively account of this achievement:—

'The Englishmen, that durst them not abide,
Before the host full fear'dly forth they flee
To Dunnottar, a swake within the sea.
No further they might win out of the land.
They seem'd there while they were four thousand,
Ran to the kirk, ween'd girth to have tane,
The lave remain'd upon the rock of stane.
The bishop there began to treaty ma,
Their lives to get, out of the land to ga;
But they were rude, and durst not will.
Wallace in fire gart set all hastily,
Burnt up the kirk and all that was therein.
Attour the rock the lave ran with great din;
Some hung on crags, right dolefully to dee,
Some lap, some fell, some flutter'd in the sea,
No Southern in life was left in that hold,
And them within they hurnt to powder cold.
When this was done, fell fell on their knees down,
At the hishop ask'd absolution.
When Wallace leugh, said, I forgive you all;
Are ye war-men, repent ye for so small?
'They rued not us into the town of Air
Our true barons when they hang'd there!'

In 1336, too, we hear of the castle of Dunnottar being refortified by Edward III. in his progress through Scotland; but scarce had he quitted the kingdom when it was retaken by Sir Andrew Moray, the Regent of Scotland. No further event of historic interest occurred for many centuries afterwards, during which it was the chief seat of the Marischal family. But, in the time of the Great Rebellion it was besieged by the Marquis of Montrose, the Earl Marischal of that day being a staunch Covenanter. The Earl had immured himself in his castle, along with many of his partisans, including 16 Covenanted clergymen who had here sought refuge from Montrose. The Earl would have come to terms but for this ministerial party, and the Marquis at once subjected his property to military execution. Stonehaven and Cowie, which belonged to the vassals of the Earl Marischal, were burned; the woods of Fetteresso shared the same fate; and the whole of the lands in the vicinity were ravaged. The Earl is said to have deeply regretted his rejection of Montrose's terms, when he beheld the smoke ascending from his property; 'but the famous Andrew Cant, who was among the number

of his ghostly company, edified his resolution at once to its original pitch of firmness, by assuring him that that reek would be a sweet-smelling incense in the nostrils of the Lord, rising, as it did, from property which had been sacrificed to the holy cause of the Covenant.'

At Dunnottar Castle, in 1650, William, seventh Earl Marischal, entertained Charles II.; and in the following year it was selected by the Scots Estates and Privy Council as the strongest place in the kingdom for the preservation of the regalia from the English army, which then overran the country. These being here deposited, the Earl obtained a garrison, with an order for suitable ammunition and provisions. Cromwell's troops, under command of Lambert, besieged the castle, which was put under command of George Ogilvy of Barras, in the parish of Dunnottar, as lieutenant-governor; the Earl himself having joined the king's forces in England. Ogilvy did not surrender until the siege had been converted into a blockade, when he was reduced by famine and a consequent mutiny in the garrison. He had previously, however, removed the regalia by a stratagem on account of which he was long imprisoned in England. Mrs Granger, wife of the minister of Kinnelf, had requested permission of Major-General Morgan, who then commanded the besieging army, to visit Mrs Ogilvy, the lady of the Lieutenant-Governor. Having gained admission, she packed up the crown among some clothes, and carried it out of the castle in her lap, whilst the sword and sceptre seemed to have formed a sort of distaff for a mass of lint which, like a thrifty Scots matron, she was busily spinning into thread. The English general very politely assisted the lady to mount her horse; and her husband that night buried the regalia under the flags of his church, where they remained till the Restoration, in 1660, when they were delivered to Mr George Ogilvy, who presented them to Charles II. For this good service, with his long imprisonment and loss of property, Ogilvy received no farther mark of royal favour or reward than the title of Baronet and a new coat-of-arms. Sir John Keith, brother to the Earl Marischal, was created Earl of Kintore; but honest Mr Granger and his wife had neither honour nor reward.

Dunnottar was used, in the year 1685, from early in May till towards the end of July, as a state prison for 167 Covenanters, men and women, who had been seized at different times in the W of Scotland, during the persecution under Charles II. In the warmest season of the year they were all barbarously thrust into a vault, still called 'The Whigs' Vault,' where 9 of them died. About 25, in a state of desperation, crept one night from the window, along the face of the awful precipice, in the hope of escaping; but two of these perished in the attempt, and most of the others were captured, and subjected to horrible tortures. In 1720 the dilapidated estate of George, tenth Earl, was sold to the York Building Company for £41,172, and Dunnottar Castle dismantled; but in 1761 the Earl repurchased it, to sell it, however, in 1766, to Alexander Keith, writer in Edinburgh, whose son, as exercising the office of Knight-Marischal of Scotland in 1822, was created a Baronet by George IV. Dunnottar went to his daughter, and, at her death in 1852, to her son, Sir Patrick Keith-Murray of Ochtertyre, with whom it remained till 1875, when it was purchased by Alexander Innes, Esq. of Raemoir and Cowie. See James Napier's *Stonehaven and its Historical Associations, being a Guide to Dunnottar Castle, etc.* (Stoneh. 1870).

Dunolly, an estate, with an ancient castle and a modern mansion, in Kilmore and Kilbride parish, Argyllshire. The ancient castle, crowning a precipitous rocky promontory between Oban Bay and the mouth of Loch Etive, 9 furlongs NNW of Oban town, is believed to have taken its name, signifying 'the fortified hill of Olaf,' from some ancient Scandinavian prince or king; and occupies a romantic site, well adapted by its natural character for military defence. Originally perhaps a rude fortalice, altered or extended in the course

of centuries into a strong castle, it dates in record so early as the 7th century, but retains no masonry earlier than the latter part of the 12th; as long the principal seat of the Macdougalls, Lords of Lorn, figures boldly in old history and in curious legend; and is now a gloomy, lonely, fragmentary ruin. 'The principal part of it which remains,' says Sir Walter Scott, 'is the donjon or keep; but fragments of other buildings, overgrown with ivy, attest that it had once been a place of importance, as large apparently as Artornish or Dunstaffnage. These fragments enclose a courtyard, of which the keep probably formed one side, the entrance being by a steep ascent from the neck of the isthmus, formerly cut across by a moat, and defended doubtless by outworks and a drawbridge.' An eagle, kept chained within the ruin, was seen by the poet Wordsworth in 1831, and forms the subject of a stinging sonnet from his pen. A stalactite cavern was accidentally discovered, about 1830, in what long had been garden ground contiguous to the base of the castle rock; was ascertained to have had an entrance which had been blocked by a wall; and was found to contain many human bones, some bones of several of the lower animals, pieces of iron, remains of broadswords, and a few defaced coins. Thomas Brydson, in his *Pictures of the Past*, says respecting Dunolly Castle—

'The breezes of this vernal day
Come whispering through thine empty hall,
And stir, instead of tapestry,
The weed upon the wall,

'And bring from out the murmur'ing sea,
And bring from out the vocal wood,
The sound of Nature's joy to thee,
Mocking thy solitude.

'Yet proudly, 'mid the tide of years,
Thou lift'st on high thine airy form,
Scene of primeval hopes and fears,
Slow yielding to the storm!

'From thy grey portal, oft at morn,
'The ladies and the squires would go;
While swell'd the hunter's bugle-horn
In the green glen below;

'And minstrel harp, at starry night,
Woke the high strain of battle here,
When, with a wild and stern delight,
The warriors stooped to hear.

'All fled for ever! leaving nought
Save lonely walls in ruin green,
Which dimly lead my wandering thought
To moments that have been.'

Modern Dunolly Castle, a little to the N, is a fine edifice, embosomed among wood, and contains the famous Brooch of Lorn, graphically described in Scott's *Lord of the Isles*, taken from Robert Bruce in the skirmish of Dalry, in Killin parish, Perthshire, with several other curious relics of antiquity. The estate belonged to the Macdougalls from very early times; was forfeited for participation in the '15, but restored just before the outbreak of the '45; and now is held by Col. Charles Allan MacDougall of MacDougall (b. 1831; suc. 1867). One of its proprietors fell in the Peninsular Campaign; another, in 1842, steered the barge of Queen Victoria through Loch Tay, in her progress from Taymouth to Drummond Castle.

Dunoon, a favourite watering-place and a parish of Cowal district, Argyllshire. The town extends more than 3 miles along the western shore of the Firth of Clyde, from the entrance of Holy Loch south-south-westward to beyond West or Balcay Bay, and consists of Hunter's Quay to the N, Kirn, and Dunoon proper to the S. Each has its separate steamboat pier, that of Hunter's Quay being 6 miles WNW of Greenock and $\frac{2}{3}$ mile N of Kirn's, which is 1 mile NNE of Dunoon's, which again is $1\frac{1}{2}$ mile W by N of Cloch Lighthouse, 11 miles NNW of Largs, and 11 NNE of Rothesay. Old Dunoon arose beneath the shadow of an ancient castle, which, crowning a small rocky headland between the East and West Bays, is supposed by some antiquaries to have been founded by dim Dalriadic chieftains in the early years of the 6th

century, and later to have been held by Scandinavian rovers. However that may be, from the reign of Malcolm Ceanmor (1058-93) this castle was the seat of the Lord High Stewards of Scotland, on the accession of the sixth of whom, Robert, to the throne in 1370, it became a royal palace, under the hereditary keepership of the Campbells of Lochow, ancestors of the Duke of Argyll. By royal charter of 1472 Colin, Earl of Argyll, Lorne, and Campbell, obtained for himself certain lands around the Castle of Dunoon, which in 1544 was besieged and taken by Lennox, the would-be regent, and on 26 July 1563 received a visit from Mary Queen of Scots. In 1646 it was the scene of a cruel atrocity wrought by the Campbells on the Lamonts of Cowal and Bute, thirty-six of whom were most traitorously carried from the houses of Escog and Castle-Toward to the village of Dunoon, and there were hanged on an ash-tree at the kirkyard. 'Insomuch that the Lord from heaven did declare his wrath and displeasure by striking the said tree immediately thereafter, so that the whole leaves fell from it, and the tree withered, which being cut down there sprang out of the very heart of the root thereof a spring like unto blood, popping up, and that for several years, till the said murderers or their favourers did cause howk out the root.' Henceforward the castle, which seems to have covered an acre of ground, and to have had three towers, was left to utter neglect, its stones abstracted for neighbouring cottages, so that now its bare outline can hardly be traced, though the greensward of course is imagined to cover a perfect labyrinth of vaults. Hard by, on the site now occupied by the parish church, stood the castle chapel—a nunnery in popular belief; and also near were the butts or cuspars, the gallows' hill, and a moat-hill (Gael. *Tom-a-mhoid*). As the castle decayed, so too decayed the village of Dunoon, in spite of its being the regular ferry between Cowal and Renfrewshire and an occasional resort of invalids for the benefit of drinking goats' whey. The year 1822 found it a Highland *clachan*, with a church, a manse, three or four slated cottages, and a sprinkling of thatched cottages or huts. But in that year the late James Ewing, Esq., LL.D., purchased a feu here, and built thereon the handsome marine villa called, from the neighbouring castle, Castle House; and it was not long before others followed his lead, steam navigation having by this time brought Dunoon within comparatively easy reach of Glasgow. Fringing the sweeping curves of East and West—or Milton and Balgay—Bays, modern Dunoon stands partly on the low platform of the Firth's old sea-margin, partly on gentle ascents, with immediate background of broken, heather-clad braes, and, beyond, of the Cowal heights. The whole exhibits a charming indifference to town-like regularity, villas and cots being blended with gardens and trees; sea, wood, and mountain being all within easy access; and the views of the Clyde and its basin being wide as they are lovely. In 1893 the castle and grounds were purchased by the commissioners for the benefit of the burgh, at a cost of £4600. In 1895 the commissioners also purchased the pier from the Hafton estate trustees; this they intend to considerably enlarge and improve, so as to meet modern requirements.

To descend to details, the town has two post offices of Dunoon and Kirn, with money order, savings bank, and telegraph departments, branches of the British Linen Co., Clydesdale, and Union Banks, insurance agencies, numerous hotels, a gas company, an excellent water supply, fed by a reservoir with storage capacity of 45,000,000 gallons, agricultural and horticultural societies, a capital bowling-green, fairs on the third Thursday of January, February, and November, and three Independent weekly papers—the *Saturday Argyllshire Standard* (1870), the *Wednesday Dunoon Observer*, and the *Friday Dunoon Herald and Cowal Advertiser* (1876). The Burgh Buildings, erected in 1873-74, at a cost of £4000, are a two-storied Scottish Baronial pile, and contain the municipal offices, with a hall that, measuring 73½ by 35½ feet, can accommodate 500 persons, and is adorned with a stained-glass window. A fine stone

edifice, Romanesque in style, and originally erected at a cost of £11,000 for a hydropathic establishment, was, thanks to the late Miss Beatrice Clugston of Lenzie, opened in 1869 as the West of Scotland Convalescent Sea-side Homes. Fitted with splendid baths, and accommodating 200 inmates, as enlarged by a new wing in 1880 at a cost of £8000, these Homes have hitherto (1893) been the means of restoring upwards of 48,000 invalids to health; on 5 Aug. 1872 they were honoured with a visit by the Princess Louise and the Marquis of Lorne. There is also Dunoon District Cottage Hospital, and in the neighbourhood of the quay has been erected an ornamental band-stand. The first wooden steamboat jetty, formed by a private joint stock company in 1835, proving insufficient, the present pier, with waiting-rooms and separate allotment for vehicle traffic, was built by the late Mr Hunter of Hafton; it extends 390 feet into the water, which at its head has a depth of about 4 fathoms. Kirn pier is of similar construction; whilst Hunter's Quay is a stone erection of 1823, with a projection and slip, and, near it, the Royal Clyde Yacht Club-house, destroyed by fire in 1889, and rebuilt in the following year. In 1880 an esplanade, protected by a breast-wall, was formed along the northern shore of Balgay Bay at a cost of £500; beyond, spanning Balgay Burn, is the Victoria Bridge (1878). The parish church, built in 1816, and enlarged in 1834 and 1839, is a good Gothic edifice, with 838 sittings, and a massive square pinnacled tower; in its graveyard are time-worn tombstones to the Rev. John Cameron and Andrew Boyd, Bishop of Lismore, bearing date 1623 and 1636. The Free church, dating from 1843, was rebuilt (1876-77) in the French Gothic style at a cost of £10,000; and a Free Gaelic church is the old U.P. church of 1828, converted to its present purpose in 1875, in which year the U.P. body built a handsome new Gothic church at a cost of £5000. A Scottish Episcopal church, Holy Trinity, Early English in style, with nave, chancel, and stained-glass windows, was built in 1850; a Roman Catholic church, St Mun's, in 1863. Other places of worship are an English Episcopal church and a Baptist chapel, both open only during the summer months; with a *quoad sacra* and a U.P. church (1863) at Kirn, and an English Episcopal church at Hunter's Quay, open only in the summer months. The beautiful cemetery, 2 acres in extent, contains the graves of Robert Buchanan of Ardfillayne (1785-1873), professor of logic in Glasgow University, and the late James Hunter, Esq. of Hafton (d. 1855); but at Greenock, not here at her birthplace, rests Mary Cameron, Burns's 'Highland Mary' (d. 1786). A bronze statue to her memory, however, by Mr. D. W. Stevenson, was unveiled on the centenary of the poet's death, July 21, 1896. Dunoon public, Kirn public, and Dunoon Roman Catholic (St. Mun) schools, have accommodation for about 540, 210, and 70 children. Since 1868 a burgh, with Kirn and Hunter's Quay, under the General Police and Improvement Act, Dunoon is governed by a provost, 2 magistrates, and 9 police commissioners. A sheriff court is held monthly for small debts and debts recovery cases. Pop. (1881) 4692, (1891) 5283.

The parish comprises the ancient parishes of Dunoon and Kilmun, and, besides the town and suburbs of Dunoon, contains the post-office villages of SANDBANK, KILMUN, STRONE, BLAIRMORE, ARDENTINNY, INELLAN, and TOWARD. It is bounded N by Strachur, NE by Lochgoilhead, E by Loch Long and the Firth of Clyde, S by the Kyles of Bute, W by Inverchaolain, and NW by Kilmoran. Its utmost length is 16¼ miles from N to S, viz., from Whistlefield inn to Toward Point; its breadth, from E to W, varies between 2 and 7½ miles; and its land area is 44,577 acres. The coast-line, reaching from 1½ mile NNE of Glenfinart to opposite Rothessay, extends about 23 miles—7 along Loch Long, 5 around HOLY LOCH, 9 along the Firth of Clyde, and 2 along the KYLES OF BUTE. It is everywhere bordered with the low green platform of the old sea-margin, a natural terrace thickly fringed with town and village and pleasant mansion, and backed by hills or mountains. The 3 lower miles of narrow Loch Eck belong to Kilmun; and

from its foot the EACHAIG river winds $5\frac{1}{2}$ miles south-eastward to the head of HOLY LOCH, and receives by the way the Massan and Little Eachaig, the former running $8\frac{1}{2}$ miles southward and south-eastward through the interior, the latter $4\frac{1}{2}$ miles east-north-eastward along the boundary of Kilmun with Inverchaolain and Dunoon. Dunoon is not so mountainous as Kilmun, its chief elevations from S to N being Inellan Hill (935 feet), Ben Ruadh (1057), Garrowchorrán Hill (1115), Corlorach Hill (1371), Kilbride Hill (1294), Horse Seat (1282), the Badd (1215), *BISHOP'S SEAT (1651), Duman (575), Strone Saul (993), Finbracken Hill (649), and Dalinlongart Hill (643); whilst in Kilmun rise Kilmun Hill (1535), Stronchullin Hill (1798), BEN RUADH (2178), *Creachan Mor (2156), and Cruach a' Bhuie (2084) to the E of the Eachaig and Loch Eck, and, to the W thereof, Ballochyle Hill (1253), Clachaig Hill (1708), Sgarach Mor (1972), A' Chruach (1570), Cláich Beinn (2109), and BENMORE (2433), where asterisks mark those summits that culminate on the confines of the parish. Clay slate, greenish, greyish, or bluish in hue, sometimes finely laminated and firmly grained, is a predominant rock, and has been quarried for roofing purposes on Toward estate and near the town of Dunoon. Highly indurated mica slate, traversed by veins of compact quartz and contorted into every variety of curve, is still more prevalent, forming by far the greater portion of the ancient parish of Dunoon, and passing into clay slate in the southern part of Kilmun Hill. Silurian rock, coarse-grained and merging out of junction with clay slate, occurs at Strone Point and Toward; whilst Old Red sandstone skirts the shore from Inellan to within about a mile of Toward Castle, and has been quarried, at different periods, for building purposes. Limestone, in small quantity and here and there of quality akin to marble, occurs contiguous to the Old Red sandstone, which near Toward Point is traversed by dykes of trap; and serpentine, taking a high polish, is fairly plentiful on the coast near Inellan. The soils are generally light and shallow, consisting chiefly of humus, sandy gravel, or sandy loam. Great agricultural improvements have lately been effected, especially on the Benmore estate, where and at Castle Toward hundreds of acres have been planted with millions of trees. On Ardnadam farm is a cromlech; ancient stone coffins have been found in various places; an artificial mound, 90 by 73 feet, and 10 feet high, on Ardinslat farm, is supposed to have been formed by the Romans; and Kilmun has interesting ecclesiastical antiquities. One of these is a square tower, 40 feet high, with a stair of a peculiar construction, the only remains of a collegiate church which Sir Duncan Campbell of Lochow founded in 1442. A plain, square mausoleum here now forms the burial-place of the noble family of Argyll. The principal mansions, all separately noticed, are Castle-Toward, Hafton House, Benmore House, and Glenfinart House. At Toward Point is a lighthouse which stands 70 feet above high water, and exhibits a white light flashing every 10 seconds. Dunoon is the seat of a presbytery in the synod of Argyll; and the civil parish is divided ecclesiastically among Dunoon-Kilmun itself (a living worth £319) with the chapelries of Kilmun and Toward, and the following *quoad sacra* parishes, with date of erection as such—Ardentinn (1874), Inellan (1873), Kirn (1874), Sandbank (1876), and Strone (1884). The nine schools, all of them public but the last, Ardentinn, Dunoon (Grammar), Inellan, Kirn, Rashfield, Sandbank, Strone, Toward, and St Mun's R. C., with total accommodation for 1460 children, have an average attendance of about 1000, and grants amounting to over £1300. Pop. (1801) 1750, (1831) 2416, (1841) 4211, (1861) 5461, (1871) 6871, (1881) 8003, (1891) 8683.—*Ord. Sur.*, sh. 29, 1873.

The presbytery of Dunoon comprises the old parishes of Dunoon and Kilmun, Inverchaolain, Kilfinan, Kilmoran, Kingarth, Rothesay, Lochgoilhead, and Strachlan and Strachur, the *quoad omnia* parish of North Bute, the *quoad sacra* parishes of New Rothesay, Ardentinn, Inellan, Kirn, Sandbank, Strone, and Tighna-

bruaich, and the chapelries of Carrick-Castle, Kilbride, Kilmorich, Kilmun, St Ninians, St Brendan's, Toward, and Rothesay-Gaelic. Pop. (1881) 23,711, (1891) 24,755, of whom 3392 were communicants of the Church of Scotland in 1892. The Free Church has a presbytery of Dunoon, with 3 churches in Rothesay, 2 in Dunoon, 2 in Kingarth, and 9 at respectively Inellan, Kilfinan, Kilmoran, Kilmun, Lochgoilhead, North Bute, Sandbank, Strachur, and Tighnabruaich, which together had 3671 members and adherents in 1891.

Dunpender. See TRAPRAIN.

Dunragit, a hamlet and a mansion on the W border of Old Luce parish, Wigtownshire. The hamlet lies near a station of its own name on the Castle-Douglas and Portpatrick railway, $3\frac{1}{2}$ miles W of Glenluce, and has a post and telegraph office. To the S of the station is the Mote of Dunragit, a roundish eminence, now overgrown with whins; and to the N, on the hillside, stands Dunragit House, a modern edifice, a seat of John Charles Cuminghame, Esq. of Craighams.

Dun-Richnan. See DORES.

Dunrobin Castle, the Scottish seat of the Duke of Sutherland, in Golspie parish, Sutherland, on a terrace overlooking the sea, near a private station on the Highland railway, $1\frac{1}{2}$ mile NE of Golspie, and $4\frac{1}{2}$ WSW of Brora. It boasts to be the oldest inhabited house in the kingdom, founded in 1098 or 1275 by Robert, Thane or Earl of Sutherland, after whom it received its name, but of whom history knows absolutely nothing; the greater portion of it, however, is modern, built by the second Duke between 1845 and 1851. It thus forms two piles conjoint with one another, and together constituting a solid mass of masonry, 100 feet square and 80 feet high. The ancient pile on the seaward side is a plain but dignified specimen of the old Scottish Baronial architecture. The new is very much larger than the old, and, blending the features of German schloss, French chateau, and Scottish fortalice, makes a goodly display of oriel windows, battlements, turrets, and pinnacles; whilst its great entrance-tower, at the north-eastern angle, is 28 feet square and 135 high. Internally, the castle is arranged in suites distinguished by the names of different members or relations of the family, as the Duke's, the Argyll, the Blantyre, and the Cromartie Rooms, the last so called after George, the Jacobite third Earl of Cromartie, who here was made prisoner by the Sutherland militia, 15 April 1746. Each of these suites comprises a complete set of sitting and bed rooms, and is decorated in a style of its own; and that on the seaward front is separated from the others by a wide gallery or passage, is adorned and furnished in the most costly and elegant manner, commands from a bedroom oriel window a wide and magnificent view, and was set apart for the use of the Queen so long ago as 1851. From one cause and another Her Majesty's visit was postponed till September 1872, when it fell to her to lay the foundation stone of a monument to her late mistress of the robes, the second Duchess (1806-68). A beautiful Eleanor cross, 40 feet high, with a bronze bust by Noble, this monument, finished in 1874, crowns a slight eminence to the right of the principal avenue. Prior to the Queen's visit, Dunrobin had twice received the Prince and the Princess of Wales—in 1866 and 1871. Very fine flower gardens, between a terrace (100 yards long) and the sea, are reached by successive broad flights of steps; behind is the beautiful park, in which are two 'brochs' or dry-built circular towers. One of these, being excavated by the Rev. Dr. Joass, yielded two little plates of brass, the one oblong, the other semicircular (Mr Joseph Anderson, Rhind Lecture, 31 Oct. 1881). Both castle and grounds are accessible to the public. See SUTHERLAND, CROMARTY, and BEN-A-BHRAGIE.—*Ord. Sur.*, sh. 103, 1878.

Dunrod, an ancient parish on the coast of Kirkcudbrightshire, united about the year 1683 to Kirkcudbright, and now forming the southern part of that parish. Its name signifies 'a red hill,' and seems to have been derived from an oblong reddish-coloured hill adjacent to the site of its church. This, with its fragment of a Norman font, stood 4 miles SSE of Kirkcudbright town,

and measured 30 feet in length and 15 in breadth. The churchyard is still in use, and has a circular form.

Dunrod, an ancient barony in Innerkip parish, Renfrewshire, taking name from a hill to the E of Kip Water, and traversed by a burn of its own name. The hill culminates 2 miles ENE of Innerkip village, and, rising to an altitude of 936 feet above sea-level, figures conspicuously in the gathering grounds of the Greenock water-works. The burn belongs naturally to the basin of the Kip, but flows eastward into one of the reservoirs of the Greenock water-works; and it is spanned, at a point $1\frac{1}{2}$ mile ENE of Innerkip village, by a curious and very ancient bridge, supposed to be Roman. The barony belonged to Sir John de Lindsay, Bruce's accomplice in the Red Comyn's murder (1306), and remained with his descendants till 1619, when it was sold to Archibald Stewart of Blackhall by Alexander Lindsay of Dunrod, who from the haughtiest baron in the West country sunk to a warlock beggar, selling fair winds to fishermen and sea-captains, and died at last in a barn. An old rhyme says of him—

'In Innerkip the witches ride thick,
And in Dunrod they dwell;
But the greatest loon among them a'
Is auld Dunrod himsel.'

See pp. 31-39 of Gardner's *Wemyss Bay, Innerkip, etc.* (Paisley, 1879).

Dunrossness, a parish in the S of Shetland, containing the hamlet of Boddam, near the head of a long voe, on the E coast, 7 miles N of Sumburgh Head, and 20 SSW of Lerwick, under which there is a post office of Dunrossness, with money order, savings' bank, and telegraph departments. There are also post offices at Virkie, Fair Isle, and Sandwick, the last two with money order and telegraph departments.

The parish comprises the ancient parishes of Dunrossness, Sandwick, and Conningsburgh; and, besides a large tract of Mainland, includes a number of islands. The Mainland portion is bounded on the N by Quarff, and on all other sides by the sea, extending southward to Sumburgh Head; and measuring in straight line, from N to S, about 18 miles. The chief islands are Mousa, in the NE; Fair Isle, far to the S; and Colsay and St Ninians on the W. There is a lighthouse on the SW of Fair Isle, showing four flashes in quick succession, with intervals of half a minute between the groups; and a fog signal was established at this station in 1892, and also a second light and fog-signal on the N of the island. The coasts are rocky and unequal; and the principal bays or creeks are Quendale Voe, West Voe, Grutness, and Aiths Voe. Sumburgh Head rises boldly in the extreme S of Mainland, and is crowned by a lighthouse, showing a fixed light, visible at the distance of 22 nautical miles. Fitful Head, as bold and loftier, rises on the N side of Quendale Voe, $5\frac{1}{2}$ miles NNW of Sumburgh Head. The interior consists largely of bleak mossy hills; and in the S end, much of what formerly was arable land has been destroyed by sand drifts; yet a considerable aggregate of moss and moor has been brought into a state of pasture or tillage by processes of reclamation. The rocks of the western half are claystone slate, of the eastern secondary sandstone. Several small lakes, abounding with fish, are dotted over the surface; and the neighbouring seas yield to the crofters a richer harvest than their fields. Between 1872 and 1877 three Runic and two Ogham inscriptions were discovered near the ancient burying-ground of Conningsburgh church, which, dedicated to either St Paul or Columba, stood close to the seashore, a little E of the present Free church. Inland is the broch of Aithsetter, and across the bay to the southward is the more celebrated broch of MOUSA (*Procs. Soc. Ants. Scotl.* 1879, pp. 145-156). In the presbytery of Lerwick and eynd of Shetland, this parish is divided *quoad sacra* into SANDWICK and Dunrossness, the latter a living worth £262. Its church, built in 1790, contains 858 sittings. An Established church was built in Fair Isle in 1892. There are also Free churches of Dunrossness and Conningsburgh, and a Baptist chapel

of Dunrossness. Eight public schools have been recently built in the civil parish, at Conningsburgh, Sandwick, Bigtown, Levenwick, Boddam, Quendale, Virkie, and Fair Isle, with respective accommodation for 79, 132, 73, 52, 120, 60, 70, and 48 children. Valuation (1881) £3728, 8s. 9d., (1891) £3896, 19s. 3d. Pop. of civil parish (1881) 4126, (1891) 3752; of registration district (1871) 1970, (1881) 1604, (1891) 1415.

Dunsappie, a small lake (233 × 67 yards) at the E border of Canongate parish, Edinburghshire, on the depressed E shoulder of Arthur's Seat, contiguous to the most easterly reach of the Queen's Drive, 3 furlongs E by N of the summit of Arthur's Seat, and $1\frac{1}{2}$ mile by road SE of Holyrood Palace. It lies 360 feet above sea-level, amid grounds on which Prince Charles Edward's army encamped both before and after the battle of Prestonpans; it points the way of the easiest ascent to the summit of Arthur's Seat; and, in winter, being one of the first places to bear, is often crowded with skaters.

Dunscath, a ruined baronial fortalice on the W coast of Sleat parish, Isle of Skye, Inverness-shire. It belonged to the Barons of Sleat, and seems, from remains of a prison and of a draw-well, to have been a place of considerable strength.

Dunscore (Gael. *dun-sgoir*, 'fort of the sharp rock'), a village and a parish of Nithsdale, W Dumfriesshire. The village, Dunscore or Cottack, standing 3 furlongs from the Cairn's left bank, and 320 feet above sea-level, is 9 miles NW of Dumfries, and $4\frac{1}{2}$ WSW of Auldirth, under which it has a post office.

The parish is bounded N by Glencairn and Keir, NE by Kirkmahoe, S by Holywood and Kirkpatrick-Durham in Kirkeudbrightshire, and W by Balmaclellan, also in Kirkeudbrightshire; and by Glencairn and Holywood it is all but cut into two separate halves, eastern and western, at a point on the Cairn, $1\frac{1}{2}$ mile SW of the village. Its utmost length, from E to W, is $11\frac{1}{2}$ miles; its breadth varies from barely 150 yards to $3\frac{1}{2}$ miles; and its area is $14,923\frac{1}{2}$ acres, of which $108\frac{1}{2}$ are water. The NITH winds $2\frac{1}{2}$ miles south-south-eastward along the boundary with Kirkmahoe; CAIRN Water courses $2\frac{1}{2}$ miles southward along that with Glencairn, next for 150 yards across the belt connecting the two halves, and lastly $1\frac{1}{2}$ mile along the Holywood border; whilst from Balmaclellan Dunscore is separated by Loch URR (5 × 4 furl.) and Urr Water, flowing $1\frac{1}{2}$ mile southward therefrom. Through the western half Glenessland Burn runs $4\frac{1}{2}$ miles east-north-eastward to the Cairn; through the eastern, Laggan Burn $5\frac{1}{2}$ to the Nith. The surface sinks along the Nith to 80, along the Cairn to 195, and along the Urr to close on 500, feet above sea-level; and the chief elevations are Rose Hill (717 feet), Crawston Hill (711), and Cats Craig (637) in the eastern half, and, in the western, Stroquhan Moor (1027), Craigdasher Hill (958), Craigenputtoch Moor (1088), Knochoute (1070), and Bogrie Hill (1416), the last-named culminating on the north-western border. The parish presents a striking variety of scenery—in the E, the Nith's fertile holms, with soft environment of wooded hills; and in the W, the heathery granite heights and black morasses that stretch through Galloway, almost to the Irish Sea. Its rocks are partly Silurian, partly Devonian; and the soil is a rich alluvium along the Nith and the Cairn, on other low grounds mostly sand or light gravel, and on the uplands a light stony loam, overlying a tilly bottom. Fully one-third of the entire area has never been cultivated, little indeed of it admitting of reclamation; about 60 acres are covered with natural wood, and 440 with plantations of larch and Scotch firs. Antiquities, other than four ancient camps or forts, a 'Druidical' stone circle, and several tumuli, are the towers of BOGRIE and Lag. The latter ruin, $1\frac{1}{2}$ mile NE of the village, was the seat of the Griersons from 1408, its last inhabitant being that noted hunter-down of Covenanters, Sir Robert Grierson of Lag (1650-1736). He is buried in the graveyard of the ancient church, which, disused since 1649, stood towards the SE corner of the parish, $\frac{1}{2}$ mile SW of Ellisland. The said farm of ELLISLAND was

Robert Burns's home from 1788 to 1791, as CRAIGENPUTTOCH was Thomas Carlyle's from 1828 to 1834, so that Dunscore has memories such as few parishes in Scotland have. John Welsh himself (1570-1623), John Knox's son-in-law, has been claimed as a native. FRIARS CARSE and Stroquhan House are the principal mansions. At the former of these mansions Burns was a frequent visitor, and there met with Captain Grose, the antiquary, to whom he was introduced by Captain Riddell. Dunscore is in the presbytery and synod of Dumfries; the living is worth £221. The present parish church, at the village, is a Gothic edifice of 1823, with a handsome W tower and 850 sittings. There are also Free churches of Dunscore and Craig and a U.P. church; whilst four public schools—Burnhead, Dunscore, Dunscore infant and female, and Gleuessland—with respective accommodation for 96, 90, 58, and 59 children, had (1891) an average attendance of 38, 61, 32, and 50, and grants of £33, 17s. 6d., £69, £23, 4s., and £53, 12s. 6d. Pop. (1801) 1174, (1831) 1488, (1861) 1554, (1871) 1504, (1881) 1405, (1891) 1260.—*Ord. Surv.*, sh. 9, 1863.

Dunscriben, a small walled fort in Urquhart and Glenmoriston parish, Inverness-shire, on the brow of a hill fronting Loch Ness, 1½ mile SSW of Bunloit hamlet.

Dunscedburgh, a ruined fort in Kilmuir parish, Isle of Skye, Inverness-shire.

Duns Dish. See DUN.

Dunse or Down Law, a hill (665 feet) at the southwestern extremity of Roxburgh parish, Roxburghshire, conjoint with Peniel Heugh in Crailing parish, and 2 miles NE of Ancrum village.

Dunse or Duns (the spelling till 1740, revived in 1882), a town and a parish of central Berwickshire. Standing, 420 feet above sea-level, on a plain at the southern base of Dunse Law, the town by road is 44 miles ESE of Edinburgh, 15¾ W of Berwick-on-Tweed, and 3 furlongs N by W of Dunse station on a loop-line of the North British, this being 8¾ miles SW of Reston Junction, 5½ ESE of Edinburgh, and 22 NE of St Boswells. The original town, which by charter of 1489 was made a burgh of barony, was built on the *dun* or Law, but, overthrown and burned by the English in 1545, was thereafter abandoned to utter decay and extinction. This Law is a round, smooth, turf-clad hill, rising gradually from a base of 2½ miles in circumference to a tabular summit 713 feet high and nearly 30 acres in area, and itself consists of trap or greenstone rock, through which obtrudes a block of the Old Red sandstone, highly metamorphosed by the action of heat,—the 'Covenanters' Stone.' Here in the spring of 1639 Leslie encamped with an army, numbered variously at from 12,000 to 30,000 men. Charles was at Berwick, whence through a telescope he saw the hillside stirring with pikemen and musqueteers, stout ploughmen and Swedish veterans, and Argyll's supple Highlanders with their targes and plaids and dolrachs; before every captain's tent a standard bearing the legend, in golden letters, 'For Christ's Crown and Covenant.' 'Our hill,' writes Principal Baillie, 'was garnished on the top towards S and E with mounted cannon, well-nigh to the number of 40, great and small. Our regiments lay on the sides of the hill almost round about. The place was not a mile in circle—a pretty round rising in a declivity without steepness to the height of a bowshot. On the top somewhat plain, about a quarter of a mile in length, and as much in breadth, as I remember, capable of tents for 40,000 men. The crouners lay in canvas lodgings high and wide; their captains about them in lesser ones; the soldiers about them all in huts of timber covered with divot or straw.' Ministers also there were to superfluity, who encouraged the soldiers by 'their good sermons and prayers, morning and even, under the roof of heaven, to which drums did call them for bells.' So the host lay, barring the royalists' progress, till a 'humble supplication' on the part of the Scots and a 'gracious proclamation' on that of his Majesty led to the hollow Pacification of Berwick, 18 June 1639. The Stone, an oblong, measuring originally 5 by 2½ feet, had been chipped away

by relic-mongers almost to nothing, when, in 1878, it was enclosed and cleared of the surrounding turf, so that now once more it stands 2½ feet above the ground.

The present town, the 'Dunse that dings a', was founded about 1588, and at first was defended on three sides by a deep morass, long since drained and obliterated. In 1670 it was constituted a burgh of barony under Sir James Cockburn of Cockburn, who had bought the estate of Dunse from Hume of Aytoun; and down to 1696 it claimed to be one of Berwickshire's county-towns, a rank that it once more shares with Greenlaw under an act of 1853. The single episode in its history, apart from the prayerful encampment, is that of the 'Dunse demoniac' in 1630, a poor woman whom the Earl of Lauderdale believed to be possessed by an evil spirit, and who spoke better Latin even than the minister (Chambers's *Dom. Ann.*, ii. 43); but Dunse has produced some very worthy sons. Foremost among them, doubtfully, the 'Angelic Doctor,' Duns Scotus (1265-1308), author of *Realis*, and greatest of schoolmen. Afterwards, certainly, the Rev Thomas Boston (1676-1732), author of *The Fourfold State*, whose birthplace in New town Street is marked by a tablet; Cadwallader Colden, M.D. (1688-1776), botanist and lieutenant-governor of New York; James Grainger, M.D. (1724-67), a minor poet; Thomas M'Creie, D.D. (1772-1835), biographer of Knox and Melville; James Cleghorn (1778-1838), an accomplished actuary; John Black (1783-1855), for twenty-three years editor of the *Morning Chronicle*; and Robert Hogg (b. 1818), botanist. The Rev Adam Dickson, too, an able writer upon agriculture, was minister from 1750 till his death in 1776. Lighted by gas since 1825, and well supplied with water by a company founded in 1858, the town has a modern and well-to-do aspect, with its square or market-place, its spacious streets, and its pretty suburbs, studded with tasteful villas. The Town-Hall, in the centre of the market-place, a Gothic structure with elegant spire, is of modern erection, as likewise are the County Buildings and the Corn Exchange, the latter opened in 1856. A mechanics' institute dates from 1840; and in 1875 a public library hall was built at a cost of £670. Dunse has besides a post office, with money order, savings bank, insurance, and telegraph departments, branches of the Bank of Scotland (1833), the British Linen Co. (1784), and the Royal Bank (1856), insurance agencies, hotels, agricultural and horticultural societies, a volunteer corps, a workmen's institute, and a Tuesday paper—the *Berwickshire News* (1869). A nearly extinct corn market is held on Tuesday, and hiring fairs are held on the first Tuesday of March, May, and November; sheep, cattle, and horse fairs on the first Thursday of June, the second Tuesday of July, 26 August (or the Tuesday after if the 26th falls on Saturday, Sunday, or Monday), the third Tuesday of September, and 17 November or the Tuesday after. But the fairs for sheep, cattle, etc., all of which were once well known, may now be said to be nearly obsolete. Indeed, in a commercial point of view, Dunse may be said to be declining, from the fact that the population is decreasing. There is also an auction mart, with fortnightly sales of sheep and cattle. The parish church, a very plain building of 1790, that superseded an ancient Norman edifice, was almost destroyed by fire in 1879. As reopened on 16 Jan. 1881 after restoration at a cost of nearly £4000, it contains 920 sittings of pitch-pine, stained and varnished; is beautified with several stained-glass windows; and has a fine new organ, its congregation having been the second in the Church of Scotland to employ instrumental music. Boston Free church, repaired in 1881 at a cost of nearly £700, contains 650 sittings; and three U.P. churches—East, South, and West—contain respectively 650, 640, and 900. There are also a Roman Catholic chapel (1882) and an Episcopal, Christ Church (1854; 200 sittings), in simple Norman style. A new combined public school, erected at a cost of £5760, was opened on 9 Feb. 1880. Dunse now is governed by 9 police commissioners, having adopted the General Police and Improvement Act in 1873, when the burgh bounds were extended. Sheriff courts are held every Friday

during session, sheriff small-debt courts on the last Fridays of Jan. Feb. March, May, June, and November, justice of peace courts on the first Monday of every month. Pop. (1861) 2556, (1871) 2618, (1881) 2438, (1891) 2198.

The parish is bounded N by Abbey St Bathans, NE by Bunkle, E and SE by Edrom, SW by Langton, and NW by Longformacus. Its utmost length, from NW to SE, is $7\frac{1}{2}$ miles; its breadth, from NE to SW, varies between $1\frac{1}{2}$ and 5 miles; and its area is 11,474 $\frac{1}{2}$ acres, of which 78 $\frac{1}{2}$ are water. From just above the Retreat to a little below Cumledge, WHITADDER Water, winding 6 $\frac{3}{4}$ miles south-south-eastward, traces all the north-eastern border; and BLACKADDER Water for a few yards touches the south-eastern corner of the parish, being joined here by Langton Burn, which, coming in from Langton, runs 3 $\frac{3}{4}$ miles on or close to the southern and south-eastern boundary. The surface sinks to 250 feet above sea-level at the confluence of Langton Burn with the Blackadder, and along the Whitadder to close on 230, thence rising north-westward to 700 feet at Dunse Law, 869 at Jennies Wood, 1000 at Black Hill, 1033 at Commonside, 960 near Windyshield, and 1065 at COCKBURNLAW—heights that belong to the southern ridge of the Lammermuirs. The rocks of the hills are partly eruptive, mainly Silurian; and those elsewhere are sandstone of three different formations, which has been quarried, and which in places is rich in vegetable fossils. More than once copper has been mined on the banks of the Whitadder, but never with profitable results. A sharpish gravel is the prevailing soil throughout the N, and a very rich light deep loam over most of the S, with patches near the town of dark deep sandy loam. About one-half of the entire area is in tillage, and as much as one-sixth perhaps is under wood. Dunse Castle, the chief mansion in the parish, standing 1 mile W by N of the town, near the south-western base of the Law, is a splendid modern castellated pile, with an ancient tower adjoining it that is said to have been built by Randolph, Earl of Moray, and with beautiful grounds containing an artificial lake (4 \times $\frac{3}{4}$ furl.) Other mansions are MANDERSTON, Wedderburn Castle, Berrywell, Cairnbank, Cumledge, and Wellfield. Dunse is the seat of a presbytery in the synod of Merse and Teviotdale; the living is worth £475. Dunse and Millburn public schools, with respective accommodation for 635 and 95 children, had (1891) an average attendance of 312 and 70, and grants of £320, 0s. 6d. and £64, 18s. Pop. (1801) 3157, (1831) 3469, (1861) 3595, (1871) 3602, (1881) 3353, (1891) 3137.—*Ord. Sur.*, shs. 26, 34, 33, 1864-63.

The presbytery of Dunse comprises the parishes of Abbey St Bathans, Bunkle and Preston, Cranshaws, Dunse, Eccles, Fogo, Greenlaw, Langton, Longformacus, and Polwarth. Pop. (1831) 8510, (1891) 8061, of whom 2214 were communicants of the Church of Scotland in 1892.—The Free Church has a presbytery of Dunse and Chirnside, with churches at Allanton, Chirnside, Coldingham-shore, St Abb's, Dunse, Eyemouth, Grant's House, Greenlaw, Langton, Longformacus, Mordington, Reston, and Swinton, which together had 2072 members in 1891. The U.P. Church has also a presbytery of Dunse, with three churches at Dunse, two at Aytun, and one each at Berwick, Chirnside, Coldingham, Eyemouth, Greenlaw, Horndean, Stockbridge, Whitby, and Spittal.

Dunshelt. See DANESHALT.

Dunsinane, a hill and an estate in Collace parish, Perthshire. One of the Sidlaws, 'high Dunsinane hill' culminates 8 miles NE of Perth, and, conical in form, with truncated summit, rises gradually on the NW side, steeply or murally on the other sides, to an altitude of 600 feet above the circumjacent ground, and 1012 above the level of the sea. It commands a fine view of Strathmore and Blairgowrie, and is crowned with vestiges of a strong ancient fort. This—Macbeth's Castle, according to Shakespeare and local tradition—occupied an oval area 210 feet long and 130 feet wide, and was defended both by a rampart and by fosses quite round the upper

part of the hill. Excavations, made on its site in 1857, led to the discovery of a doorway and an underground chamber, and of an exquisitely worked bronze fingerring in the form of a spiral double serpent. The estate comprises the entire parish, and has long been the property of the Nairnes, who held a baronetcy from 1704 to 1811, the fifth and last baronet, Sir William Nairne, having in 1786 been raised to the bench as Lord Dunsinane. The mansion, 3 miles WNW of the hill, and 7 NNE of Perth, has a fine southern exposure, and is an elegant edifice, greatly improved and modernised about 1830, with extensive and beautiful grounds.—*Ord. Sur.*, sh. 48, 1863.

Dunskeig, a hill in Kilcalmonell parish, Argyllshire, at the S side of the mouth of West Loch Tarbet. Rising very steeply from the seaboard to a height of 300 feet, it commands an extensive view, and is crowned with remains of two very ancient forts, one of them vitrified.

Dunskellar. See UIST, NORTH.

Dunskerry, an islet of Durness parish, Sutherland, in the Pentland Firth, 4 miles N of Fair-air Head.

Dunskey, an old castle in Portpatrick parish, Wigtownshire, $4\frac{1}{4}$ furlongs SSE of Portpatrick town. Crowning the brink of a giddy precipice, 100 feet high, at the head of Castle Bay, it was built about 1510 by Adair of Kilhilt on the site of an older stronghold, plundered and burned in 1489 by Sir Alexander M'Culloch of Myrtoun. From the Adairs it came to the Blairs in 1648, but was quite ruinous in 1684. Dunskey Burn and a cave near its mouth were popularly thought, down to a comparatively recent period, to possess some magic properties of healing. Near the head of Dunskey Glen stands Dunskey House, amid extensive wooded grounds, $1\frac{1}{4}$ mile N by W of Portpatrick. Built in 1706, and greatly enlarged and improved about 1830, it is the property of Sir Edward Hunter-Blair, Bart., of BLAIR-QUHAN.

Dun's Muir. See DUN, MUIR OF.

Dunstaffnage, a famous ancient castle in Kilmorè and Kilbride parish, Argyllshire, on a small, tabular, rocky promontory at the S side of the mouth of Loch Etive, $3\frac{1}{2}$ miles NNE of Oban. Its name has been derived from Gaelic words signifying 'the fortified hill with the two islands,' alluding partly to its own strong site, and partly to Eilean Mor and Eilean Beag, two islets lying a little to the NE. The original castle is alleged to have been founded either by 'Ewin, a Pictish monarch, contemporary with Julius Cæsar,' or by some early chief of the Lorn branch of the Dalriads, and to have been occupied as a royal seat by the later Dalriadian kings till 844, when Kenneth mac Alpin succeeded to the crown of Pictavia. Skene, however, remarks that 'of Dunstaffnage, as a royal seat, history knows nothing;' and by him the Dalriadian capital is placed at Dunadd in Glassary parish. The Scandinavian Vikings, who in the 9th century began to make bold descents upon the western coasts, had possibly here a fortress; and this may have been altered, enlarged, or rebuilt at various periods, till it acquired its ultimate form about the 13th century. Having come into the possession of the Macdougals, Lords of Lorn, it was besieged and captured by Robert Bruce in 1308, soon after his victory in the Pass of Awe; and by him was conferred on Sir Archibald Campbell of Lochawe, whose fourth descendant, Colin, first Earl of Argyll, in 1490 made a grant of Dunstaffnage to his younger son, Alexander. In 1536 his twelfth descendant received a baronetcy, which became extinct at the death of its third holder in 1879. The estate—3000 acres—then passed to Alexander James Henry Campbell, Esq., who is now hereditary captain of the castle, and whose mansion, Dunstaffnage House, stands 1 mile WSW of Connel station, and $4\frac{1}{2}$ miles NE of Oban. Dunstaffnage Castle itself must have undergone important alterations subsequent to the time of Robert Bruce; and, as it now stands, cannot claim much higher antiquity, or possibly even less, than the neighbouring castle of Dunolly. It gave refuge to James, last Earl of Douglas, after his forfeiture in 1455, serving him as a

place of council with Donald, Earl of Ross and Lord of the Isles; and it served as a military post, with a small English garrison, during the rebellions of 1715 and 1745. Flora Macdonald was for a short time a prisoner here in the summer of 1746.

The castle is now a mere shell, tall and irregular, but not without majesty; and to the sea it presents a grand and striking aspect, sharing in the magnificent scenery round the head of the Firth of Lorn. Its immediate site, or the crown of the rock on which it stands, measures 300 feet in circumference; its own periphery, round the exterior of its walls, is about 270 feet; and its form is quadrangular, with internal measurement of 87 feet from wall to wall, these walls being 30 to 70 feet high and 9 feet thick. Three of its angles have each a round tower, and the fourth is rounded; three of its sides are bare and weather-worn, and the fourth forms part of a modern dwelling; and the main entrance to it was by a staircase from the sea, and is supposed to have been protected by a fosse with a drawbridge. Some brass guns which belonged to vessels of the Spanish Armada, wrecked off the coast of Mull, are on the walls. A ruined chapel, standing 400 feet distant, and formerly used by the inmates of the castle, is in the Early Pointed style, much defaced by alterations, and measures 78 feet in length, 26 in breadth, and 14 in height. It is supposed to contain within its area the ashes of some of the Dalriadan kings or princes, as also of Alexander II., who in 1249 died in the neighbouring island of Kerrera; and it returns a very fine echo. Some of the ancient regalia are said to have been preserved in the chapel till about the beginning of the 18th century; and to have then been stolen by servants of the keeper. Two other fine relics were afterwards found in it—the one a battle-axe, 9 feet long, of beautiful workmanship, embossed with silver; the other a small ivory figure representing a crowned monarch with a scroll in his hand, and supposed to have been a coronation sculpture. The famous coronation stone, or Stone of Destiny, described by Winton in his *Chronykill* as the palladium of the liberty of Scotland, is always said to have been removed hence by Kenneth mac Alpin to SCONE; and, according to Dr Macculloch, is strictly homogeneous with stones in the castle's masonry, and therefore likely to have been really hewn from some quarry in the neighbourhood. Dunstaffnage figures largely in Barbour's *Brus*, in Sir Walter Scott's *Lord of the Isles*, and, as 'Ardenvohr,' in his *Legend of Montrose*.—*Ord. Sur.*, sh. 45, 1876.

Dunsyre (perhaps 'fort of the marsh'), a village and a parish on the NE border of the upper ward of Lanarkshire. The village, standing 750 feet above sea-level, near the right bank of South Medwin Water, has a post and railway telegraph office under Dolphinton, and a station on a branch line of the Caledonian, 2½ miles W by N of Dolphinton, and 8¼ ENE of Carstairs Junction.

The parish is bounded NE by West Calder in Edinburghshire, E by Linton in Peeblesshire, SE by Dolphinton and Walston, and W, NW, and N by Carnwath. Its length, from N to S, varies between 3¼ and 5¾ miles; its utmost breadth, from E to W, is 4¾ miles; and its area is 10,759½ acres, of which 16 are water. South MEDWIN Water, rising in the NE corner of the parish, winds 9¼ miles SSE and WSW along all the eastern and southern border, and receives West Water with two or three smaller burns from the interior, where, to the NW, lies tiny Crane Loch (¾ × ½ furl). The surface sinks along South Medwin Water, at the south-western corner, to less than 700 feet above sea-level, and rises thence to 960 feet at Easthills, 1313 at Dunsyre Hill, 1347 at Mid Hill, 1210 at Left Law, 1460 at Bleak Law, 1070 at Cairn Knowe, 1336 at Black Law, 1360 at Harrows Law, and 1425 at White Craig—these forming the Pentlands' south-western termination. Springs of excellent water are numerous and copious; and springs charged with iron ore abound on the verge of a marsh. The rocks are partly crystalline, partly stratified, and the stratified ones comprise sandstone and limestone, and are supposed to belong to the Carboniferous formation. Copper ore and calc-spar are found. The soil is

generally sandy, and not very fertile; about 3000 acres being in tillage, 30 under wood, and the rest either pastoral or waste. The chief of the two estates in the parish was part of the lands exchanged in 1492 by the first Earl of Bothwell, with the Earl of Angus, for the lands and castle of Hermitage in Liddesdale; and passing by sale from the Marquis of Douglas to Sir George Lockhart, president of the court of session (1685-89), belongs now to his descendant, Lockhart of Lee and CARNWATH. Dunsyre Castle, 300 yards from the parish church, had a basement vault and a two-storied superstructure; and down to about 1740 was a seat of baronial courts, and possessed its instruments of torture. No fewer than eight other old fortalices stood within the parish—five at Easter Saxon, two at Westhall, and one at Todholes. Several cairns have been found to contain urns; and the route by which Agricola's army went from Tweeddale to the Roman camp at Cleghorn, traversed the parish, and still is traceable in the form of an earthen dike. Dunsyre was a frequent retreat of the Covenanters in the times of the persecution; and William Veitch, one of the most distinguished of their preachers, was tenant of Westhills up to the battle of Rullion Green (1666); whilst Donald Cargill, the martyr, preached, in 1669, on Dunsyre Common. Dunsyre is in the presbytery of Biggar and synod of Lothian and Tweeddale; the living is worth £171. The church is an old building, with iron jugs and a Gothic tower, added in 1820, and contains 245 sittings. A public school, with accommodation for 46 children, had (1891) an average attendance of 29, and a grant of £38, 19s. Pop. (1801) 290, (1831) 335, (1861) 312, (1871) 302, (1881) 254, (1891) 191.—*Ord. Sur.*, sh. 24, 1864.

Duntelchaig. See DUNDELSHACK.

Duntiblae, a village in Kirkintilloch parish, Dumbar-tonshire, on Luggie Water, 1½ mile ESE of Kirkintilloch town. It was the residence and death-place of the weaver-poet Walter Watson (1780-1854).

Duntocher, a small manufacturing town in Old Kilpatrick parish, Dumbar-tonshire, on Dalmuir Burn, in a gap of the Lower Kilpatrick Hills, 1 mile NE by N of Dalmuir station, and 9 miles by road NW of Glasgow. It occupies a romantic site, in front of picturesque groupings of the Kilpatrick Hills; has charming environs, with many delightful walks; and, extending with its eastern suburbs of Faifley and Hardgate to a length of fully 1 mile, consists chiefly of plain two-story houses, many of them with small gardens attached. A bridge over it at the town is very ancient; bears a Latin inscription, placed upon it in 1772, stating it to have been built by the Romans; and is firmly believed by most of the townspeople, and even thought by some antiquaries, to be really a Roman structure, perhaps the oldest bridge in Scotland; but has been so often repaired as to retain few or no indications of its date, and very probably was no otherwise Roman than in having been built with stones abstracted from a previous Roman structure. A Roman fort stood on a neighbouring hill; and, though now almost entirely obliterated, continued till Pennant's time (1772) to be distinctly traceable, and has yielded some important relics. Three subterranean vaulted chambers were discovered on the side of this hill in 1775; included several rows of pillars, arranged in a labyrinth of passages; and were conjectured to have been a sudatorium or hot bath for the use of the garrison. Roman tablets, altars, vases, coins, and querns were found either on the hill or in a neighbouring field; and most of them were deposited for preservation in the Hunterian Museum of Glasgow College. Antoninus' Wall also passed a short distance to the S, and might readily have yielded its materials for the constructing of buildings after the Roman times. The town, then only a village, about the end of last century became a seat of cotton manufacture; but its mill was closed in 1808, when the Gartclash property passed to William Dunn (1770-1849). By him the mill was reopened and greatly extended, and to him Duntocher owed its rapid expansion. Since 1831 it was the seat of trade for the four large cotton-mills of Duntocher itself, Faifley,

Hardgate, and Miltonfield, all four within a mile of one another. These mills long turned out annually about a million of pounds of cotton yarn, and two millions of yards of cotton cloth; and afforded the chief means of support to the population. But there are also, in the town, a manufactory of agricultural implements, and, in its near vicinity, lime-works, coal-works, and quarries. The waterworks at Cochma, constructed in 1874, supply Duntocher, Dalmuir, and Clydebank with water. The town, which is lighted with gas, has a post office, with money order and savings bank departments under Glasgow, a *g. s.* parish church (1836; 800 sittings), a Free church, a U.P. church (670 sittings), St Mary's Roman Catholic church (1850; 500 sittings), public and Roman Catholic schools, a public library, and a savings bank. Pop. (1851) 2446, (1861) 2360, (1871) 1367, (1881) 1572, (1891) 2154.—*Ord. Sur.*, sh. 30, 1866.

Duntreath, an old castellated mansion in Strathblane parish, SW Stirlingshire, on the right bank of Blane Water, 2½ miles WNW of Strathblane village. Built in the form of an open quadrangle, but never completed on the S side, it was long unoccupied after 1740, and fell into great decay. It retains on the N side a chapel which by tradition is said to have 'undergone a crash during the celebration of divine service;' and it stands in a moderately large and very beautiful park. At the forfeiture of the last Celtic Earl of Lennox in 1425, Duntreath was granted to a younger branch of the Edmonstone family, and now is held by Sir Archibald Edmonstone, fifth Bart. since 1774 (b. 1867; suc. 1888). There is here an aqueduct bridge of eight small arches in connection with the Glasgow water supply from Loch Katrine. See COLZITUM.

Duntroon Castle, an ancient baronial fortalice, repaired and modernised into a comfortable mansion, in Kilmartiu parish, Argyllshire, on a headland projecting from the northern shore of Loch Crinan, 4 miles SW of Kilmartin village. Long the seat of the Campbells of Duntroon, it was unsuccessfully besieged by Colkitto in 1644; now it belongs to Malcolm of Poltalloch, and presents an imposing appearance as seen from the Crinan Canal.

Duntrune, a beautiful mansion, since 1891 in Murros parish, Forfarshire, near the left bank of Fithie Burn, 4½ miles NE of Dundee. From its high site, 330 feet above sea-level, it commands a magnificent prospect—over Ballumbie and Linlathen woods, Broughty Ferry and the Firth of Tay, to St Andrews, with its grand old tower of St Rule standing out clear on the sky-line. Here lived and died the author of *Mystifications*, shrewd, witty, kindly Miss Stirling Graham (1782-1877), whose nephew and heir, John Edmund Lacon, Esq., is present owner. A neighbouring hamlet bears the name of Burnside of Duntrune. See Dr John Brown's *John Leech and other Papers* (Edinb. 1882).

Duntulm, an ancient castle in Kilmuir parish, Isle of Skye, Inverness-shire, on a little promontory, overhanging Loch Scour, 9 miles N of Uig. Built on the site of a Scandinavian fort, it was long the seat of the Macdonalds, descendants of the Lords of the Isles, till they were driven out of bore to Mugstot by the ghost of one Donald Gorm. It bore originally the name of Dundavid or St David's Fort, in honour of a Scandinavian king or viking who had resided in the previous fortalice; and seems to have been a splendid structure, so strong as to be impregnable alike by land and by sea; but now is reduced to a mere shell—a fragment of a tower and a portion of flanking wall. A neighbouring hamlet of Duntulm has a post office under Portree. See chap. xi. of Alexander Smith's *Summer in Skye* (Lond. 1865).

Dunure, a seaport village and an ancient castle in Maybole parish, Ayrshire. The village stands on a small bay, 6 miles SW of Ayr, under which it has a post office, and 5½ NW of Maybole; and has an artificial harbour, which, lying on the SW side of the bay, within a small headland called Dunure Point, was formed in 1811 at a cost of £50,000, but proving of small value, was allowed to go into decay. The water round the headland has a depth of from 4 to 20 fathoms, with a level, clean, sandy bottom, and good anchorage; and a passage, 150 feet wide at

bottom, was cut thence, through solid rock, to a square basin, with from 700 to 1000 feet of quay, all sheltered by high ground, and lined with buildings forming a quadrangle. The access is easy and safe in almost any wind; and the egress is so facile that a vessel, immediately on leaving the harbour, can at any time and at once put out to sea. The depth of water in the harbour is 12 feet at ordinary spring tides, but could be artificially increased to nearly 30 feet. Yet in spite of all these advantages, on a coast devoid of natural shelter, inhospitable to shipping, and overlooked by a productive country, the only craft frequenting this place has been an occasional sloop in the agricultural interests and a few fishing boats. Crowning a cliff that overhangs the harbour, the castle bears marks of great antiquity and strength, and had formerly defences of rampart and fosse. From the fourteenth century onwards it was long a seat of the Marquis of Ailsa's ancestors, and figured prominently in such wild scenes in the history of the Kennedys as the roasting of the commendator of CROSSRAGUEL; but is now a fragmentary ruin, belonging to Kennedy of Dalquharran Castle.—*Ord. Sur.*, sh. 14, 1863.

Dunvegan, a village, a castle, a sea-loch, and a headland in Duirinish parish, Isle of Skye, Inverness-shire. The village lies near the head of the sea-loch, 23½ miles W by N of Portree, and 11 NNW of Struan; is a place of call for steamers from Glasgow to Skye and the Outer Hebrides; and has a post office, with money order, savings bank, and telegraph departments, a good hotel, Duirinish Free church, and a public school, erected in 1875-76 at a cost of £915. Dunvegan Castle stands, near the village, on a rocky headland, washed on three sides by the sea, and on the fourth approached by a bridge over a narrow ravine. Forming three sides of a quadrangle, it presents 'an amorphous mass of masonry of every conceivable style of architecture, in which the nineteenth jostles the ninth century;' and has, from time immemorial, been the seat of the chiefs of the Macleods, proprietors once of Lewis, Uist, and the greater part of Skye. And still, as says Alexander Smith, 'Macleod retains his old eyrie at Dunvegan, with its drawbridge and dungeons. At night he can hear the sea beating on the base of his rock. His "Maidens" are wet with the sea-foam; his mountain "Tables" are shrouded with the mists of the Atlantic. The rocks and mountains around him bear his name, even as of old did his clansmen. "Macleod's country," the people yet call all the northern portion of the island.' The present chief is Norman Macleod of Macleod (b. 1812; suc. 1835). The oldest portion of Dunvegan, on the seaward side, is described by Dr Samuel Johnson as 'the skeleton of a castle of unknown antiquity, supposed to have been a Norwegian fortress, when the Danes were masters of the island. It is so nearly entire, that it might easily have been made habitable, were there not an ominous tradition in the family that the owner shall not outlive the reparation. The grandfather of the present laird, in defiance of prediction, began the work, but desisted in a little time, and applied his money to worse uses.' A lofty tower was added by Alastair Crotach ('Crockback Alexander'), who, dying at a great age in Queen Mary's reign, was buried at Rowardill in Harris. A third part, a long low edifice, was built by Rory More, who was knighted by James VI.; the rest consists of modern reconstructions and additions; and the whole forms one of the most interesting castles in the Highlands. Its history is marked, more even than that of most old Highland places, with legends of weird superstition; and furnished Sir Walter Scott with the subject of the last of his *Letters on Demonology*. Sir Walter spent a night in its Fairy Room in the summer of 1814, and wrote a description of it more picturesque than true. And forty years earlier, in the autumn of 1773, Dr Johnson 'tasted lotus here, and was in danger of forgetting that he was ever to depart, till Mr Boswell sagely reproached him with sluggishness and softness.' Two singular relics are preserved at Dunvegan Castle. One is the 'fairy flag,' alleged to have been captured at the Crusades by one of the

Macleods from a Saracen chief, and consisting of a square piece of very rich silk, enwrought with crosses of gold thread and with elf-spots. The father of Dr Norman Macleod records how strangely a Gaelic prophecy fulfilled itself in 1799, when, as a boy, he was present at the opening of the iron chest in which this flag was stored. The other relic is a curiously-decorated drinking-horn, holding perhaps two quarts, which the heir of Macleod was expected to drain at one draught, as a test of manhood, before he was suffered to bear arms, or could claim a seat among grown-up men. This—'Rory More's horn'—is mentioned in a bacchanalian song of Burns, and was placed in the South Kensington Museum during the International Exhibition of 1862. Dunvegan Loch, known also as Loch Follart, separates the peninsula of Vaternish on the NE from that of Duirinish on the SW; measures $7\frac{1}{2}$ miles in length, and $2\frac{1}{4}$ miles in mean width; and affords safe anchorage, in any wind, for vessels of the heaviest burden. Dunvegan Head flanks the SW side of the sea-loch's entrance, or terminates the peninsula of Duirinish. It presents a singularly bold and precipitous appearance, rising to a height of more than 300 feet; and commands a fine view of the loch, the Minch, and the glens and mountains of Harris. See Samuel Johnson's *Tour to the Western Islands* (1775); chap. x. of Alexander Smith's *Summer in Skye* (1865); and vol. i., pp. 333-335, of the *Memoir of Norman Macleod, D.D.* (1876).

Dunwan Dam, a crescent-shaped lake in Eaglesham parish, SE Renfrewshire, 2 miles SW by S of Eaglesham village. Lying 850 feet above sea-level, it is $7\frac{1}{2}$ furlongs long; has a varying width of $1\frac{1}{2}$ and 3 furlongs; and sends off Holehall Burn, which falls into the White Cart.—*Ord. Sur.*, sh. 22, 1865.

Dupplin Castle, a noble mansion of Lower Strathearn, in Aberdalgie parish, Perthshire, $1\frac{1}{2}$ mile NE of Forteviot station, and $5\frac{1}{2}$ miles SW of Perth. Standing within a half mile of the Earn's left bank, amidst a large and finely-wooded park, it succeeded a previous edifice, destroyed by fire in 1827; and, built during 1828-32 at a cost of £30,000, is a splendid Tudor structure, commanding a view of nearly all Strathearn, and containing a library famous for rare editions of the classics. It is the seat of George Hay, eleventh Earl of Kinnoull (cre. 1633) and Viscount Dupplin (1627), who, born in 1827, succeeded his father in 1866. On 6 Sept. 1842 Dupplin Castle was honoured by a passing visit from the Queen and Prince Albert. In its vicinity, on the night of 12 Aug. 1332, was fought the Battle of Dupplin, when Edward Baliol and the 'disinherited barons,' to the number of 500 horse and 3000 foot, surprised and routed a host of 30,000 under Mar, the new Regent of Scotland, who himself was slain with 13,000 of his followers. A stone cross, its elaborate carving now almost obliterated, stands on the face of an acclivity, on the opposite bank of the Earn, almost in the line of the ford by which Baliol's army passed the river; and a large tumulus, $\frac{1}{2}$ mile N, was found to contain some stone-formed graves. See ABERDALGIE; and Millar's *Historical Castles of Perthshire* (1890).—*Ord. Sur.*, sh. 48, 1868.

Dura Den, a small ravine in Kemback parish, Fife, $2\frac{1}{2}$ miles E of Cupar. It is traversed by CERES Burn on its northerly course to the Eden, and, barely 9 furlongs in length, is famous for the wealth of fossil ganoid fish enshrined in its yellow sandstone. This yellow sandstone is one of the upper beds of the Old Red, and has a thickness here of between 300 and 400 feet. The fish are found crowded together in one thin layer, nearly a hundred finely-preserved specimens having been counted on a single slab about 5 feet square; and they consist of two species of *Holoptychius* (*Andersoni* and *Flemingii*), besides *Dipterus*, *Platygnathus*, *Phaneropteron Andersoni*, *Glyptolæmus*, *Glyptopomus*, and *Pumphaeractus*. See Dr J. Anderson's *Dura Den, a Monograph of the Yellow Sandstone and its Remarkable Remains* (Edinb. 1859).—*Ord. Sur.*, sh. 49, 1865.

Durhamtown, a village in Bathgate parish, Linlithgowshire, 1 mile SSW of Bathgate town.

Durie, an estate, with a mansion of 1762, in Scoonie parish, Fife, $1\frac{1}{2}$ mile NNW of Leven. The estate, extending to the coast and including the feus of Leven, belonged to a family of its own name from the 13th till the first half of the 16th century, when it passed by marriage to James V.'s favourite, Sir Alexander Kemp. From his posterity it was purchased in 1614 by the great lawyer, Sir Alexander Gibson, whose notes on important decisions were published posthumously as *Durie's Practicks*, and who in 1621, on being appointed a lord of session, assumed the title of Lord Durie. He died at Durie House in 1644, having in 1628 received a Nova Scotia baronetcy, whose present holder is Gibson Carmichael of CASTLE CRAIG. The strangest tale is told of this Sir Alexander, how, prior to his elevation to the bench, he was walking one day on the beach not far from Leven, when he was seized and gagged by a party of Borderers, headed by Christy's Will, and was carried over the Firth to Leith, from Leith to Edinburgh, and thence through Melrose over the English Border to Harbottle Castle, there to be kept eight days a prisoner, till a lawsuit was ended to which his presence might have proved inimical. This seems a correcter version of the story than Sir Walter Scott's, according to which three months was the term of imprisonment, the Earl of Traquair its instigator, and its scene the lonely peel-tower of Graham. 'Not for years after, when travelling in Annandale, did Lord Durie recognise in the names of *Maudie* the cat and *Batty* the shepherd's dog, belonging to Will's establishment, the only words which, loudly called from time to time, had reached his ears during his days of captivity' (Chambers's *Domestic Annals*, i. 355). Durie was sold in last century to the ancestor of its present proprietor, Robert Christie, Esq. (b. 1818; suc. 1872), whose colliery was long so famous for the output and quality of its coal, that even in Holland any prime coal was known as 'Durie coal.'—*Ord. Sur.*, sh. 40, 1867.

Durine. See DURNESS.

Duirinish. See DUIRINISH.

Durisdeer, a village and a parish of Upper Nithsdale, NW Dumfriesshire. The village stands, 575 feet above sea-level, on the left bank of Kirk Burn, 2 miles NNE of Carronbridge station, this being $2\frac{1}{4}$ miles ESE of Old Cumnock, $17\frac{1}{2}$ NNW of Dumfries, and 6 N of Thornhill, under which Durisdeer has a post office. There is here a public school and the parish church.

The parish, containing also part of the village of Carronbridge, and since 1727 comprising half of the ancient parish of Kilbride or Kirkbride, is bounded NW by Sanquhar, NE by Crawford in Lanarkshire, SE by Morton, SW and W by Penpont. Its utmost length is $8\frac{1}{4}$ miles from N by E to S by W, viz., from Lowther Hill to the Nith above Morton Mill; its breadth, from E to W, varies between $\frac{1}{2}$ mile and $6\frac{1}{2}$ miles; and its area is 19,852 acres, of which $134\frac{1}{2}$ are water. The NITH has here a south-south-easterly course of $7\frac{1}{2}$ miles, partly along the Sanquhar and Penpont borders, but mainly through the interior, and here receives Enterkin Burn and CARRON Water, which last traces $3\frac{1}{2}$ miles of the boundary with Morton. In the furthest S the surface sinks along the Nith to less than 200 feet above sea-level, thence rising north-westward and north-north-westward to 595 feet near Auchensknoch, 744 near Mar, 696 near Cleuch-head, 1229 near Ballaggan, 1128 at Birny Rig, 1195 at Fardingmullach Hill, and 724 near Crairiepark; whilst to the left or E of the Nith, the chief elevations from S to N are High Enoch (676 feet), Nether Hill (1290), *Scaw'd Law (2166), *Durisdeer Hill (1861), Black Hill (1740), Coshogle Rig (1214), *Well Hill (1987), Thirstane Hill (1895), and LOWTHER Hill (2377), where asterisks mark those summits that culminate right on the Lanarkshire border. The leading formation of the northern uplands, a portion these of the wild, bleak Southern Highlands, is Silurian; and a reddish friable sandstone prevails over most of the low tracts to the S. The soil is wet and heavy in some of the arable lands, in others gravelly or sandy; but, as a rule, is loamy and very fertile.

About two-fifths of the entire area are either regularly or occasionally in tillage; woods and plantations cover more than one-ninth; and the rest is either pastoral or waste. A charming glimpse of the scenery of Durisdeer is given by Dorothy Wordsworth, who with her brother and Coleridge drove up from Thornhill to Wanlockhead on 19 Aug. 1804:—'About a mile and a half from Drumlanrig is a turnpike gate at the top of a hill. We left our car with the man, and turned aside into a field where we looked down upon the Nith, which runs far below in a deep and rocky channel; the banks woody; the view pleasant down the river towards Thornhill; an open country, cornfields, pastures, and scattered trees. Returned to the turnpike house, a cold spot upon a common, black cattle feeding close to the door. Our road led us down the hill to the side of the Nith, and we travelled along its banks for some miles. Here were clay cottages perhaps every half or quarter of a mile. The bed of the stream rough with rocks; banks irregular, now woody, now bare; here a patch of broom, there of corn, there of pasturage; and hills green or heathy above' (*Tour in Scotland*, ed. by Princ. Shairp, 1874). Then, too, there is the ENTERKIN, made famous by Defoe and the author of *Rab and his Friends*; and Well or Wald Path, the Roman way from Nithsdale to Strathclyde, runs up from Carronbridge to Durisdeer village, 7 furlongs NNE of which are remains of a Roman camp. DRUMLANRIG Castle is the most prominent object, and the Duke of Buccleuch is sole proprietor. Durisdeer is in the presbytery of Penpont and synod of Dumfries; the living is worth £393. The cruciform church, at the village, was built in 1699, and contains 540 sittings; its northern transept is the Douglas mausoleum. Here is a sumptuous marble monument with two sculptured figures in the Roubilliac taste, brought from Rome, and representing James, second Duke of Queensberry (1622-1711), and his Duchess; the vault beneath contains twelve Douglas coffins, ranging in date between 1693 and 1777. There is also a Free church preaching-station; and Birleyhill and Durisdeer public schools, and Enterkinfoot school, with respective accommodation for 106, 103, and 47 children, had (1891) an average attendance of 44, 67, and 26, and grants of £53, 15s., £70, 7s. 6d., and £37, 5s. 6d. Pop. (1801) 1148, (1821) 1601, (1861) 1320, (1871) 1189, (1881) 1107, (1891) 1076.—*Ord. Sur.*, shs. 15, 9, 1864-63. See Dr C. T. Ramage's *Drumlanrig Castle, with the Early History and Ancient Remains of Durisdeer* (Dumf. 1876).

Durn, a hill and a burn in Fordyce parish, N Banffshire. The hill culminates 2 miles SW of Portsoy, and, rising to an altitude of 651 feet above sea-level, is crowned with remains of an ancient camp, supposed to have been Danish; a quarry on its northern side yields a beautiful variety of quartz, exported to England for the use of the potteries. The burn, rising near Smithfield, at an altitude of 600 feet, runs 6 miles north-north-eastward to the sea at Portsoy.—*Ord. Sur.*, sh. 96, 1876.

Durness, a coast parish of NW Sutherland, containing Durine village, 2½ miles SSE of the northernmost point of Fair-air, 13 ESE of Cape Wrath, 20¼ WNW of Tongue *viâ* Heilem, Hope, and Tongue ferries, and 55½ NNW of Lairg, under which it has a post office (Durness), with money order, savings bank, and telegraph departments. At it also are Durness hotel, Durine public school, the parish church, and (in Sangomore hamlet, 5 furlongs S by E) a Free church.

The parish, till 1724 forming one with Tongue and Eddrachillis as part of 'Lord Reay's country,' is bounded N by the North Sea, E by Tongue, SE by Farr, SW by Eddrachillis, and W by the Atlantic. From N to S its utmost length is 20½ miles; its utmost breadth, from E to W, is 17 miles; and its area is 147,079 acres, of which 8726½ are water and 2541 foreshore, and which includes the three islands of CHOARIC, HOAN, and GORVELLAN, with a number of smaller islets. The western coast is very slightly indented, affording a rock-bound and lofty front to the Atlantic, and terminating on the N in the huge promontory of grim CAPE WRATH

(523 feet). Thence 5½ miles eastward the northern coast is solely or mainly broken by Kearvaig Bay, but onward thence to the eastern boundary it is deeply intersected by the Kyle of Durness and Loch Eriboll. Everywhere almost it exhibits some of the finest rock scenery in Scotland, the cliffs about Cape Wrath, Fair-air, and WHITEN HEAD rising sheer from the water to a height of 200 or 700 feet, and being fringed with 'stacks,' and tunnelled by caverns, of which the most celebrated are those of Whiten and Smoo. The river Dionard or Grudie, rising on the north-eastern slope of Meall Horn at 1760 feet of altitude, and in its upper course traversing Lochan Ulabhith (1½ × 1 furl.), An Dubh Loch (2¼ × 1 furl.), and Loch Dionard (5¼ × 1½ furl.; 1380 feet above sea-level), runs 14¼ miles northward to the Kyle of Durness, which, itself winding 5¼ miles northward, with a varying width of 2½ and 6½ furlongs, is left nearly dry at low water, and itself expands into Durness or Baile na Cille Bay, 1½ mile long, and from 1½ to 2 miles broad. The Polla, issuing from Loch Dubh (1½ × ½ furl.; 631 feet), and presently traversing Loch Staonsaid (5 × 1½ furl.; 585 feet), runs 7¼ miles north-by-westward along Strath Beg to the head of Loch ERIBOLL, which, penetrating the land for 10½ miles southward and south-south-westward, varies in width between 5 furlongs and 2½ miles over its upper portion, while its entrance is 3 miles broad, from Hoan island to Whiten Head. Lastly, the river HOPE, formed by three principal head-streams at an altitude of 94 feet, flows 6½ miles along Strath More to fresh-water Loch Hope (5½ miles × 1 to 7 furl.; 12 feet), whence issuing it continues 1½ mile northward to Loch Eriboll, at its south-eastern side. There are besides, a multitude of lesser streams and lakes, as Lochs BORLAY, CRASPUL, and Meadaidh (6 × 1½ furl.; 221 feet), which sends off a stream 2 miles north-north-eastward to the sea near Smoo House. The surface is everywhere mountainous, moorish mostly and rocky, with little green land except along the coast. The chief elevations from N to S, those marked with asterisks culminating on the borders of the parish, are Cnoc Ard an Tionail (603 feet), Cnoc nan Earbagan (800), Creagan na Speirieg (746), *Creag Riabhach Bheag (1521), BEN HOPE (3040), Cnoc na Pogaille (1169), Cnoc a' Chraois (1143), and *BEN HÈE (2864), to the E of the Hope; Beinn Heilem (585), Beinn Poll (756), Meall a' Bhaid Tharsuinn (902), Creag na Faoilinn (954), An Lean Carn (1705), and Feinne-bheinn Mhor (1519), to the E of Loch Eriboll and the Polla; Beinn Ceanna-beinne (1257), Meall Meadhonach (1387), Meall nan-crath (1605), BENSPEUVE (2537), Cran Stackie (2630), Conamheall (1587), and *Carn Dearg (2613), to the E of the Kyle of Durness and the Dionard; and, between these and the Atlantic, Cnoc a' Ghuis (982), Meall Sgribhinn (1216), Cnoc na Ba Ruaidhe (726), *BEN-BERG-VORE (1528), Beinn an Amair (911), Glasven (1085), FOINAVEN (2980), *Creag Dionard (2554), and Meall Horn (2548). The rocks are chiefly gneiss, granitic gneiss, quartzite, and mica slate, with occasional veins of porphyry and feldspar; but in some parts are variously conglomerate, red sandstone, and limestone, which last is extensively wrought not far from Cambusan-down on Loch Eriboll. Although there are several good patches of mixed gravel and moss, with here and there a piece of fairish loam, it may almost be said that Durness contains no land suitable for cultivation; but it is an excellent grazing district, the limestone that underlies the surface-soil proving a valuable stimulant to its pasture. The holdings some of them are very large, Eriboll, Keoldale, and BALNAKIEL extending to from 30,000 to 40,000 acres, whilst Melness, lying partly in Tongue, and partly in Durness, is supposed to exceed 70,000, being thus the largest farm, not merely in Sutherland, but probably also in the United Kingdom. On the first and last there are but 150 and 90 arable acres, the remainder being devoted to the rearing of immenso flocks of sheep, which are all of the Cheviot breed. The fresh- and salt-water fisheries of salmon, trout, char, sea-trout, herrings, cod, haddock, and ling are highly productive; but the lobster fisheries of Loch Eriboll have greatly fallen off within the last thirty years.

The chief antiquities are ten round 'duns,' and of these the most perfect is Dun Dornadilla in Strath More, which, 16 feet high, and 50 yards in circumference, consists of two concentric walls of slatystones. At AULTNACAILLICH, not far from this famous 'dun,' was born the Gaelic poet, Robert Donn. Durness is in the presbytery of Tongue and synod of Sutherland and Caithness; the living is worth £177. The parish church of 1619, occupying the site of a cell of Dornoch monastery, is now a ruin; the present church contains 300 sittings. Durine and Laird public schools, with respective accommodation for 116 and 33 children, have an average attendance of about 80 and 40. Pop. (1831) 1153, (1861) 1109, (1871) 1049, (1881) 987, (1891) 960, of whom 804 were Gaelic-speaking.—*Ord. Sur.*, shs. 114, 113, 108, 1880-82. See pp. 57-72 of Arch. Young's *Sutherland* (Edinb. 1880).

Durno, a village in Chapel of Garioch parish, Aberdeenshire, 2 miles N of Pitcaple station. It has a branch of the Town and County Bank.

Duror, a hamlet and a *quoad sacra* parish in Lismore and Appin parish, Argyllshire. The hamlet stands on the right bank of Duror rivulet, and on the road from Oban to Fort William, within 1 mile of the shore of Loch Linnhe, and 5 miles WSW of Ballachulish. At it are a post office, an inn, a public school, the Established church (1826; 323 sittings), and St Adamnan's Episcopal church (1851; 100 sittings). Fairs are held here on the Saturdays before the last Wednesdays of May and October. A capital trout-stream, the rivulet Duror rises at an altitude of 1800 feet, and runs 6 miles west-north-westward and west-south-westward to the head of Cuil Bay. The *quoad sacra* parish is in the presbytery of Lorn and synod of Argyll; the stipend is £120, with manse and glebe. Pop. (1881) 492, (1891) 412.—*Ord. Sur.*, sh. 53, 1877.

Durran. See OLRIG.

Durris, a Deeside village and parish of N Kincardineshire. The village, Kirkton of Durris, stands on the right bank of the Burn of Sheeoch, immediately above its confluence with the Dee, $1\frac{1}{2}$ mile E of Crathes station, this being 3 miles E by N of Banchory, and 14 WSW of Aberdeen. Durris has a post office under Drumoak.

The parish is bounded N by Banchory-Ternan and Drumoak (these parishes being now wholly in Kincardineshire and Aberdeenshire respectively), E by Maryculter, SE by Fetteresso and Glenberrie, W by Strachan and Banchory-Ternan. Its utmost length, from E to W, is $6\frac{1}{2}$ miles; its breadth, from N to S, varies between $3\frac{1}{2}$ and $4\frac{1}{2}$ miles; and its area is 15,435 acres, of which 141 are water. The DEE, which is here crossed by a neat iron bridge erected in 1862, winds 6 miles east-north-eastward along all the northern border; and its impetuous affluent, the Burn of Sheeoch, rising $1\frac{3}{4}$ mile beyond the south-western extremity of the parish, runs $8\frac{1}{2}$ miles north-north-eastward through the interior. In the NE the surface sinks along the Dee to 82 feet above sea-level, thence rising south-westward to 570 feet near Corsehills, 865 at Brunt Yairds, 975 at Strathgyle, 1245 at Cairn-mon-earn, 1054 at Craighbeg, 1232 at Mongour, 725 at Cairnshee, 829 at Mulloch Hill, 578 at the Ord, 1207 at Shillofad, and 1231 at Monluth Hill, the last two culminating on the borders of the parish. Gneiss, the predominant rock, often shows bare on the hill-sides, and forms, too, great detached blocks upon the cultivated lands. The soil of the low grounds is mostly a fertile loam, of the higher grounds either clayey or gravelly, the subsoil being generally cold damp clay; but great improvements have been effected in the way of drainage and reclamation within the last 50 years. Nearly four-fifteenths of the entire area are in tillage; rather more than another fifteenth is under wood; and the rest is either pasture, moss, moor, or waste. Castle Hill, a knoll by the Dee, 5 furlongs NE of the village, is ensigned by a ditch, and seems to have been a military post; in various parts are remains of cairns, tumuli, and stone circles, which form the subject of an article in *Procs. Soc. Ants. Scoll.* (vol. ii., new series, 1880).

The eminent antiquary, Cosmo Innes (1798-1874), was a native. Excepting Corsehills farm, the whole parish is comprised in the Durris estate, which, held from the 13th century by a branch of the Frasers, went by marriage to the celebrated Charles Mordaunt, Earl of Peterborough (1658-1735). His daughter in 1706 married the second Duke of Gordon, and in 1824 the estate devolved upon the fourth Duke as heir of entail. In 1834 it was purchased by Anthony Mactier, late of Calcutta; in 1871 it was sold once more, for £300,000, to the late James Young, Esq., F.R.S., of KELLY in Renfrewshire; and is now the property of H. R. Baird, Esq. Durris House stands $1\frac{3}{4}$ mile E of the village and $1\frac{1}{2}$ SSE of Park station, and, built in the 17th century, was enlarged both by Mr Innes' father and by Mr Mactier; not far from it is Durris Tower, erected in 1825 to commemorate the winning of a lawsuit by the Duke of Gordon. Durris is in the presbytery and synod of Aberdeen; the living is worth £176. The parish church, at the village, was built in 1822, and contains 550 sittings. There is also a Free church; and two public schools, Crossroads and Woodlands, with respective accommodation for 100 and 130 children, had (1891) an average attendance of 83 and 61, and grants of £72, 12s. and £62, 2s. Valuation (1882) £9834, 0s. 11d. (1892) £9368, 18s. 2d. Pop. (1801) 605, (1831) 1035, (1861) 1109, (1871) 1021, (1881) 1014, (1891) 918.—*Ord. Sur.*, sh. 66, 1871.

Durrisdeer. See DURISDEER.

Dusk. See DUVISK.

Duthich. See DUCH.

Duthil, a hamlet and a parish of NE Inverness-shire. The hamlet, standing 817 feet above sea-level, on the left bank of the Dulnain, is $2\frac{1}{2}$ miles ENE of Carrbridge, $6\frac{1}{2}$ N by W of Boat-of-Garten Junction, and 7 WSW of Grantown.

The parish, containing also the village of CARRBRIDGE (on the Aviemore and Inverness section of the Highland railway), and the stations of AVIEMORE and BOAT-OF-GARTEN (on the Aviemore and Forres section of the same railway), comprises Duthil and Rothiemurchus, lying left and right of the Spey, and the former till 1870 belonging to Elginshire. In 1891 the Boundary Commissioners transferred to the united parish the Inverness-shire portion of the Elginshire parish of Cromdale. It is bounded NE by Cromdale, E by Abernethy, SE by Crathie-Braemar in Aberdeenshire and by Alvie, SW by Alvie, and NW by Moy-Dalarossie and by Cawdor and Ardelach in Nairnshire; and has an utmost length of $22\frac{3}{4}$ miles from N to S, viz., from Carn Allt Laoigh to a point $1\frac{1}{2}$ mile S by E of Loch Eunach, with an utmost breadth from E to W of $10\frac{1}{2}$ miles. The Allt na Beinne Moire, issuing from Lochan nan Cnapan, in the extreme S of Rothiemurchus, runs 10 miles northward through Loch Eunach and along Glen Eunach, to a confluence with the Luineag, coming $3\frac{1}{2}$ miles west-north-westward from Loch Morlich; and, as the Drurie, their united waters flow $1\frac{1}{2}$ mile west-north-westward to the Spey, nearly opposite Aviemore station. The SPEY itself has here a north-eastward course of $12\frac{1}{2}$ miles—first $2\frac{1}{2}$ along the Alvie border, next $2\frac{3}{4}$ across the interior (parting Duthil from Rothiemurchus), and lastly 7 along the boundary with Abernethy; its tributary, the DULNAIN, winds $12\frac{3}{4}$ miles east-north-eastward through the interior, then $1\frac{1}{2}$ mile along the Cromdale border. The largest of twelve lakes in Duthil proper, with utmost length and breadth and altitude, are Lochs Mor ($3\frac{1}{2} \times \frac{3}{4}$ furl., 800 feet) and Vad ($3 \times 2\frac{1}{2}$ furl., 752 feet), whilst ten in Rothiemurchus include Lochs Eunach ($10 \times 2\frac{1}{2}$ furl., 1700 feet), An Eilein ($7\frac{1}{2} \times 4\frac{1}{2}$ furl., 840 feet), Morlich (8×5 furl., 1046 feet), and Phitiluis ($5 \times 2\frac{1}{2}$ furl., 674 feet), the two last lying mainly in Abernethy. Immediately along the Spey the surface sinks little below, and little exceeds, 700 feet above the sea; and from NE to SW, between the Spey and the Dulnain, the chief elevations, belonging to the Monadhliath range, are Creag an Fhithich (1325 feet), Docharn Craig (1244), Carn Lethendy (1415), Beinn Ghuibnich (1895), Carn Avie (1907), Garbh-mheall Mor (1880), Carn Sleamhuinn (2217), *Carn Dearg Mor (2337), and *CRAIGELLACHIE

DWARFIE STONE

(1500), where asterisks mark those summits that culminate on the borders of the parish. Beyond the Durnain, again, rise Tullochgriban High (1040 feet), *Carn Allt Laigh (1872), Creag na h-Iolaire (1750), *Carn Glas (2162), Carn Dubh (1409), Inverlaiduan Hill (1511), *Carn na Larach (1957), Carn Aluinn (1797), *Carn Pharis Mhoir (2021), and *Sgum an Mor (2037). And lastly from N to S in Rothiemurchus the principal summits, part of the Cairngorm group, are Cadha Mor (2313), Carn Elrick (2433), *Castle Hill (2366), Inchriach (2766), *Creag na Leacainn (3448), *BRAERIACH (4248), and *Sgoran Dubh (3658). The rocks are chiefly granitic; and the arable soil along the Spey and the Durnain is mostly alluvial on a deep clay bottom, that of the higher lands being thin and gravelly, with a considerable admixture of stones. The cultivated area, however, bears but a small proportion to moorland and deer forest, with miles upon miles of pinewood, natural or planted; and game has a far higher value than crops or farm-stock, Rothiemurchus Forest, which extends to about 19,000 acres, alone letting for £2000 in 1895. The Indian commander, Field Marshal Sir Patrick Grant, G.C.B., G.C.M.G., was born in this parish in 1804. Mansions are the DOUNE and Aviemore House; and the chief proprietors are the Countess-Dowager of Seafield, Mr Grant, and the Duke of Richmond and Gordon. In the presbytery of Abernethy and synod of Moray, the civil parish is divided into the *quoad sacra* parishes of Duthil and Rothiemurchus, the stipend of the former amounting to £260. Duthil church (1826; 850 sittings), at the hamlet, adjoins the splendid Seafield Mausoleum erected in 1837; and Rothiemurchus church stands on the Spey's right bank, 2½ miles SSW of Aviemore station. There are also a Free church at Carrbridge, and the four public schools of Deshar, Duthil, Durnain-Bridge, and Rothiemurchus, the first two built in 1876 at a united cost of £2071. With respective accommodation for 128, 124, 113, and 103 children, these had (1891) an average attendance of 66, 82, 47, and 87, and grants of £72, 2s. 6d., £112, 9s., £50, 15s. 6d., and £105, 8s. 6d. Pop. (1801) 1578, (1831) 1895, (1861) 1923, (1871) 1872, (1881) 1664, (1891) 2431, of whom 1728 belonged to Duthil *g. s.* parish, and 266 to that of Rothiemurchus.—*Ord. Sur.*, shs. 74, 64, 1877-74.

Dwarfie Stone, a remarkable block of sandstone in Hoy island, Orkney, 2 miles SE of the summit of Ward Hill. It is 18 feet long, 14 broad, and from 2 to 6 high; and has been hollowed out into three chambers. Whether a Troll's abode, according to the island folklore, or a Christian hermitage, according to the antiquaries, it is woven, in Scott's *Pirate*, into the story of 'Norna of the Fitful Head.'

Dyce, a village and a parish of SE Aberdeenshire. The village lies near the Don's right bank, 4½ furlongs NNE of Dyce Junction on the Great North of Scotland, this being 6½ miles NW of Aberdeen. It has a post office, with money order, savings bank, and telegraph departments. Previous to the introduction of the railway a bleak moor, this place is now a flourishing village.

Bounded N by Fintray, NE by New Machar, E by Old Machar, S by Newhills, and W by Kinnellar, the parish has an utmost length from E to W of 4½ miles, an utmost breadth from N to S of 3¼ miles, and an area of 5285½ acres, of which 48½ are water. The Don, winding 6½ miles east south-eastward roughly traces all the Fintray, New Machar, and Old Machar border, descending in this course from 146 to 104 feet above sea-level; and from its broad level haugh the surface rises to 241 feet near Farburn and 822 on wooded Tyrebagger Hill. Gneiss occurs along the valley of the Don; but the principal rock is granite, which, suited alike for building and for paving, has long been worked for exportation to London. The soil of the low grounds is a fertile alluvium; but, on Tyrebagger, is so thin and moorish as to be unfit for either tillage or pasture. Fully one-half of the entire area is in tillage, extensive reclamations having been carried out within the last forty years; and plantations of larch and Scotch fir may cover about one-fourth more. Antiquities are several tumuli on small emi-

DYKE

nences; an ancient Caledonian stone circle, comprising ten rough granite stones, from 5 to 10 feet high, and 8 feet distant one from another, on a gentle acclivity at the SE side of Tyrebagger; a large block of granite, called the Gouk Stone, said to commemorate the death of some ancient leader, on the NE of Caskieben; and a large, oblong, curiously-sculptured stone, in the enclosure-wall of the churchyard. PITMEDDEN and CASKIEBEN are the chief mansions. Dyce is in the presbytery and synod of Aberdeen; the living is worth £168. The old parish church, of pre-Reformation date, stood very inconveniently in the NE, on a rocky promontory washed by a bend of the Don; but a handsome new one, with 350 sittings, ½ mile nearer the centre of the parish, was built in 1872 at a cost of £1200. There is also a Free church; and two public schools, Dyce Overtown and Dyce village, with respective accommodation for 103 and 241 children, had (1891) an average attendance of 53 and 130, and grants of £46, 12s. and £123, 10s. Pop. (1801) 347, (1831) 620, (1851) 470, (1861) 585, (1871) 945, (1881) 1162, (1891) 1343.—*Ord. Sur.*, sh. 77, 1873.

Dye Water, a stream of Strachan parish, Kincardineshire, rising, at an altitude of 2000 feet, on the south-eastern slope of Mont Battock (2558 feet), near the meeting-point of Kincardine, Forfar, and Aberdeen shires. Thence it winds 7½ miles eastward and 7½ miles north-by-eastward, till, after a total descent of 1740 feet, it falls into the Feugh, ½ mile WSW of Strachan church. Traversing a rocky Highland glen (Glen Dye), it is subject to sudden and violent freshets, and abounds in trout of about ¼ lb. each. The Dye has some six or seven feeders, the principal one being the Char Burn, which is famed for its numerous and large trout.—*Ord. Sur.*, sh. 66, 1871.

Dye Water, a stream of Longformacus and Cranshaws parishes, in the Lammermuir district of Berwickshire. It rises, at an altitude of 1600 feet, on the Haddingtonshire border, 2½ miles E by S of Lammer Law, and thence winds 13½ miles eastward, till, after a total descent of 1000 feet, it falls into the Whitadder, ¾ mile WSW of Ellem inn. A little above Longformacus village it receives Watch Water, running 6 miles east-by-northward through or along the eastern border of the southern section of Cranshaws; passes, higher up, the curious old shooting-box of BYRECLEUCH; and everywhere, but especially in its upper reaches, abounds in excellent trout.—*Ord. Sur.*, sh. 33, 1863.

Dye Water. See WEST WATER.

Dyke, a village of NW Elginshire, and a parish formerly partly also in Nairnshire. The village stands on the left bank of Muckle Burn, 1 mile NE of Brodie station on the Highland railway, this being 6 miles E of Nairn and 3½ W by S of the post-town, Forres. On a rising-ground at the N end of the village is the new school, built in 1877 at a cost of over £1500, Elizabethan in style, with belfry and clock-tower.

The parish, containing also the villages of Kintessack and Broom of Moy, comprises the ancient parishes of Dyke and Moy, united to each other in 1618. The Seafield portion of the parish, to the east of the Findhorn, comprising 43 acres, and forming, previous to 1891, a detached part of the county of Nairn, was transferred by the Boundary Commissioners in that year to the county of Elgin—the whole parish being now in Elginshire. It is bounded NW and N by the Moray Firth, E by Kinloss and Forres, SE by Edinkillie, SW by Ardclach, and W by Auldearn. Rudely resembling a triangle in outline, with southward apex, it has an utmost length from NNE to SSW of 9½ miles, an utmost breadth from E to W of 4½ miles, and an area of 15,507 acres, inclusive of 1496½ acres of foreshore and 257½ of water. Roughly tracing all the eastern boundary, the FINDHORN flows 6½ miles north-north-eastward to its mouth in the Moray Firth, just above which it is joined by the MUCKLE Burn, winding 10½ miles north-eastward along the Auldearn border and through the interior. Buckie Loch (5½ × 1¼ furl.) lies close to the coast-line, which, 6½ miles long, is everywhere low, backed

by the CULBIN Sandhills (99 feet). Inland the surface is mostly low and level, near Loanhead attaining its highest point (134 feet) to the N of the railway, but rising S thereof to 105 feet at Feddan, 184 near Logiebuchany, and 500 at the southern extremity of the parish, near Craigmomore. Crystalline rocks prevail from Sluie to the head of the parish; and Devonian, with some belonging to later formations, in all other parts. The soil throughout the level central district is highly fertile; and elsewhere is of various character. Less than a fifth of the entire area is in tillage, about one-thirteenth is pasture, and the remainder is either waste or woodlands. The latter cover a very large extent, and include some of the finest trees in Scotland. Among those of Brodie, planted between 1650 and 1680, are three ash-trees (the largest 76 feet high, and girthing 21 at 1 foot from the ground), four oaks (do. 71, 16), five beeches (do. 81, 18), a sycamore (69, 12 $\frac{1}{2}$), and a Spanish chestnut (41, 15); among those of Darnaway, two ash-trees (the largest 50 and 24 $\frac{1}{2}$), five oaks (do. 65, 27 $\frac{1}{2}$), and a beech (65, 16 $\frac{1}{2}$)—these measurements being taken from tables in *Trans. Highl. and Ag. Soc.* for 1879-81. Hardmuir, a little WSW of Brodie station, is celebrated as the 'blasted heath,' now planted, whereon Macbeth met the weird sisters of Forres. Mansions, all noticed separately, are Darnaway Castle, Brodie House, Dalvey, and Kincorth. Dyke and Moy is in the presbytery of Forres and synod of Moray; the living is worth £314. The parish church, built in 1781, contains 850 sittings. There is also a Free church; and Dyke and Kintessack public schools, with respective accommodation for 229 and 57 children, had (1891) an average attendance of 103 and 20, and grants of £103, 10s. and £13, 15s. Pop. (1801) 1492, (1831) 1451, (1861) 1247, (1871) 1238, (1881) 1218, (1891) 1044.—*Ord. Sur.*, shs. 84, 94, 1876-78.

Dykehead, a village in Shotts parish, NE Lanarkshire, $\frac{1}{2}$ mile W of Shotts station, under which it has a post office. It stands amid a bleak moorish country, but derives prosperity from extensive neighbouring mineral works. Pop. (1891) 1431.

Dykehead, a village in Old Monkland parish, Lanarkshire, $\frac{1}{4}$ mile E of Baillieston.

Dykehead, a village in Cortachy parish, NW Forfarshire, near the right bank of the river South Esk, 6 miles N of Kirriemuir.

Dykehead. See DULLATUR.

Dyrock, a burn in Kirkmichael parish, Ayrshire. It issues from Shankstone Loch, a very small loch about 8 miles from Maybole, on the boundary with Straiton; runs about 4 miles westward and west-south-westward past Kirkmichael village; and falls into Girvan Water, a good troutful stream, about a mile NNE of Crosshill village.

Dysart. See MARYTON.

Dysart, a coast town and parish of Fife. A royal and parliamentary burgh, the town is built on the slope of a hill, above the northern shore of the Firth of Forth, 10 $\frac{1}{2}$ miles NNE of Leith by water, whilst its station on the Edinburgh and Dundee section of the North British is 2 $\frac{1}{2}$ miles NE of Kirkcaldy, 8 NE of Burntisland, 2 $\frac{1}{2}$ S by E of Thornton Junction, and 16 $\frac{1}{2}$ SSW of Cupar. Its parliamentary boundary includes the three villages of Gallatown ($\frac{1}{2}$ mile NNW), Sinclairtown ($\frac{1}{2}$ mile WNW), and Pathhead (1 mile WSW), which otherwise rather form a north-north-eastward extension of KIRKCALDY, and indeed were incorporated (1876) in the municipal burgh of that 'lang town,' so that here we need trouble ourselves with little more than the royal burgh, or Dysart proper. This is a place of hoar antiquity, its history beginning with the half mythical St Serf, who is said to have held his famous discussion with Satan in a cave in Lord Rosslyn's grounds above the Old Church, and whose cell, the said cave (Lat. *desertum*, 'a solitude'), is supposed to have given the town its name. A standing stone, a mile to the N, marks, says tradition, the spot where a battle was fought with invading Danes in 874; in 1470 the neighbouring castle of RAVENSCRAIG was granted by James III. to William, third Earl of

Orkney, ancestor of the St Clairs of Rosslyn. Under them Dysart was a burgh of barony, till early in the 16th century it was raised to a royal burgh by James V., who further exempted it from customs, vassalage to Inverkeithing. Mary of Guise landed a French army at Dysart in 1559, and some desultory fighting was carried on for months against the Reforming lords, whose troops occupied Kirkcaldy. So long ago as 1450 its 'canty carles' made and shipped salt to home and foreign ports; and other thriving industries of this 'Little Holland' were fishcuring, malting, brewing, and coal-mining—thriving, at least, till the Union, which dealt a great blow to Dysart, as to all other ports of Fife. Modern Dysart is just old Dysart at second-hand. The arrangement of the streets—three narrow ducts, uncertain lanes, a few scattered houses landward, and a central square—is much the same; and many of the old houses still live decrepiti within the burgh bounds. On some are the booth-keepers' piazza marks; on others half-effaced pious legends and dates; elsewhere Flemish architecture, outside stairs, roofs banked with grey stone, and such-like wrinkles of antiquity imprinted haggardly on the town. One largish block of such houses, dating from 1660, was demolished in 1876, to widen the Coalgate; and some of these contained deep hiding-holes for smuggled goods, the contraband trade having arisen as legitimate commerce declined. The town-hall, standing in the middle of the town, was built in 1617, and serving Cromwell's troopers as both a barrack and a magazine, was almost destroyed by an accidental explosion. It lay in ruins for several years, and now is a plain, strong, rubble-work structure, with a tower and spire, a council room, and a disused lock-up. By Cromwell, too, the 'Fort,' a high rock, nearly in the middle of the harbour, is said to have been fortified, though it shows no traces of fortification works. A fragment of an ancient structure, long used as a smithy, bears the name of St Dennis' Chapel, and by some is held to have been the church of a priory of Black Friars, by others to have been served by a single priest. A little to the E of it stand the nave and saddle-roofed tower of the ruinous kirk of St Serf, Second Pointed in style, and therefore a good deal earlier than the date 1570 on one of its mullionless windows. The present parish church, erected in 1802 at a cost of £1900, is a very plain building, containing 1600 sittings. A cruciform Gothic Free church, rebuilt in 1873-74, is a solid-looking edifice, with a bulky broached spire; and the U.P. church, also Gothic in style, and also with a spire, is seated for 600, and was rebuilt in 1867 at a cost of over £2500. Two public schools, one a half-time school, with respective accommodation for 617 and 120 children, have an average attendance of about 460 and 90, and grants of over £410 and nearly £80. The town has, besides, a post office, with money order, savings bank, insurance, and telegraph departments, a branch of the Bank of Scotland, gas-work (1843), the Normand Memorial Hall (1885), the Fitzroy Hall, a Mechanics' Institute, and a cemetery. There is a combination poorhouse, with accommodation for 155 inmates. Nail-making, which towards the close of 18th century employed 100 smiths and turned out yearly twelve millions of nails of £2000 value, had all but become extinct by 1836; but flax-

spinning and the weaving of linen and woollen fabrics, which last, introduced in 1715, produced half a century since some 31,000,000 yards of cloth a year, worth fully £150,000, are still carried on in large establishments, though to a smaller extent. The harbour, comprising an outer basin and an inner wet-dock (once a quarry) with 18 feet of water and berthage for 17 or 18 vessels, is ample enough for all the scant commerce Dysart still retains, and has a patent slip capable of taking up a ship of 400 tons burden. Governed by a provost, a first and second bailie, a treasurer, a chamber-

Seal of Dysart.

455

lain, and 5 councillors, Dysart unites with Kirkcaldy, Kinghorn, and Burntisland, in returning a member to parliament. Its parliamentary constituency numbered 1861, and its municipal 530, in 1891, when the annual value of real property within the parliamentary burgh was £9420, whilst the corporation revenue was £1018. Pop. of royal burgh (1831) 1801, (1851) 1610, (1861) 1755, (1871) 1812, (1881) 2623, (1891) 3022; of parliamentary burgh (1851) 8041, (1861) 8066, (1871) 8919, (1881) 10,874, (1891) 12,849. Houses in latter (1891) inhabited 2796, vacant 61, building 13.

The parish of Dysart, containing also Gallatown, Sinclairtown, and Pathhead, with most of Boreland village, is bounded N by Kinglassie, NE by Markinch, E by Wemyss, SE by the Firth of Forth, and W by Kirkcaldy, Abbotshall, Auchterderran, and Kinglassie. Its utmost length, from NNW to SSE, is 4 miles; its width, from E to W, varies between $1\frac{3}{4}$ and $2\frac{3}{4}$ miles; and its area is 4197 acres. Lochty Burn flows $2\frac{1}{2}$ miles east-by-southward along all the northern boundary, on its way to the sluggish ORE, which itself winds 3 miles east-by-northward across the northern interior and along the Markinch border. The bold and rocky coastline, $2\frac{3}{4}$ miles long, rises steeply to 178 feet at the north-eastern extremity of the town; inland, the surface undulates gently, attaining 226 feet near Gallatown, 300 near Carberry, 271 near Bogleys, 218 near Middle Balbeiggay, and 227 near Wester Strathore, whilst dipping slightly towards the above-named streams. The rocks, belonging to the Carboniferous formation, include excellent sandstone, claystone, limestone, ironstone, and coal, all of which have been largely worked. As a coal district Dysart has long been famous. Four centuries have passed since first the coal was worked in shallow mines, the excavations increasing to their present gigantic extent. The coal has been often on fire; and in the burgh records for 1578 we read that 'ane evil air enterit the main heuch, the door being then at the west entrie of the town.' This evil air set the mine on fire. Again and again combustion took place—in 1622, 1741, and 1790—fissuring and scorching the earth, causing Regent Buchanan of St Andrews to write Latin hexameters on its startling effects upon the scenery, and giving com-

memorative names to streets and lanes in the vicinity. The soil is generally good, and the entire area is in tillage, with the exception of a few acres of pasture and some 400 under wood. An antiquity, other than Ravenscraig Castle and the standing stone, was a so-called Roman camp at Carberry, which, however, has long since wholly disappeared; the Red Rocks, too, to the E of the town, are associated by legend with the burning of certain witches. Three natives of Dysart were Robert Beatson of Vicarsgrange, LL.D., (1741-1818), an author; David Pitcairn, M.D. (1749-1809), an eminent physician; and William Wallace (1768-1843), a mathematician. The title Earl of Dysart, conferred in 1643 on William Murray, son of the Rev. William Murray, minister of Dysart and preceptor to Charles I., passed to his elder daughter, who married first Sir Lionel Tollemache of Helmingham Hall, in Suffolk, and secondly the celebrated Duke of Lauderdale; it now is held by her eighth descendant by her first marriage, William John Manners Tollemache, who, born in 1859, succeeded as eighth Earl in 1878, and has his seats at Ham House in Surrey and Buckminster Park in Leicestershire. Dysart House, a little W of the town, is a plain but commodious mansion, with beautiful gardens, commanding a splendid view across the Firth; and was the Scottish seat of Jas. Francis Harry St Clair Erskine, fifth Earl of Rosslyn, who sold it and the policies in 1896. Dysart is in the presbytery of Kirkcaldy and synod of Fife; and the charge is collegiate; the first minister's stipend being £463 with manse and glebe, and the second's £288, whilst ecclesiastically the parish is divided into Dysart proper and Pathhead. The public schools of Gallatown, Pathhead, and Sinclairtown, with respective accommodation for 343, 600, and 710 children, are under the Burgh School Board, while those of Boreland and Strathore, with respective accommodation for 84 and 97 children, are under the landward or parish school board. Valuation (1891) £5704, 9s. 1d. Pop. (1801) 5385, (1831) 7104, (1861) 8542, (1881) 11,601, (1891) 13,626.—*Ord. Sur.*, sh. 40, 1867. See *Notices from the Local Records of Dysart* (Glasg. Maitland Club, 1853), W. Muir's *Gleanings from the Records of Dysart, 1545-1796* (Edin. 1862), and *The Kingdom: a handbook to Fife*.

E

EACHAIG, a small river in the Kilmun portion of the united parish of Dunoon and Kilmun, Argyllshire. Issuing from the foot of Loch Eck, it winds $5\frac{1}{4}$ miles south-south-eastward along Strath Eachaig to the head of Holy Loch, on its right side receiving the Massan near Benmore House and the Little Eachaig very near its mouth, a little higher up being spanned by an iron bridge of 1878 on the Inverary route. It is a very good salmon and trout stream, the former weighing from 7 to 25 lbs.—*Ord. Sur.*, sh. 29, 1875.

Eagerness or Eggersness ('Edgar's ness'), a headland of Sorbie parish, E Wigtownshire, flanking the N side of Garliestown Bay, $6\frac{3}{8}$ miles SE by S of Wigtown. Projecting $\frac{3}{4}$ mile from the mainland, and contracting from a width of $7\frac{1}{2}$ furlongs to a point, it rises to a height of 100 feet, and presents a rocky though not precipitous face to the sea. On its eastern side stood Eggersness Castle, whose scanty ruin is so overgrown with brushwood and rank vegetation as to be hardly discernible. Its date and history are alike unknown.—*Ord. Sur.*, sh. 4, 1857.

Eagle or Aigle. See EDZELL.

Eaglescarnie, an estate, with a mansion, in Bolton parish, Haddingtonshire, on the left bank of Gifford or Coalstoun Water, $4\frac{1}{4}$ miles S by E of Haddington. Its owner is Alexander Charles Stuart, Esq. (b. 1814; suc. 1855).

Eaglesfield, a village in Middlebie parish, Dumfriesshire, on the right side of Kirtle Water, 7 furlongs NNE of Kirtlebridge station on the Caledonian, and $2\frac{3}{4}$ miles E of Ecclefechan, under which it has a post office, with money order and savings bank departments. On a site near the centre of the village, a public hall, accommodating about 300 persons, was opened in 1893. It comprises, besides cloak and other rooms, a reading-room and library. There is also a General Assembly and subscription school. Pop. (1881) 534, (1891) 491.

Eaglesham, a village and a parish of SE Renfrewshire. The village, standing 500 feet above sea-level, is 4 miles S of Busby, $8\frac{1}{2}$ S of Glasgow, 11 SE of Paisley, and $3\frac{3}{4}$ S by E of Clarkston station on the East Kilbride branch of the Caledonian, with which it communicates by omnibus. Successor to an older village, demolished in 1769, but which during the reign of Charles II. was important enough to acquire by act of parliament a weekly market, it was founded by the twelfth Earl of Eglinton in 1796, and, had its founder's plan been carried out, would have ranked second to scarce a small town in Scotland. Even as it is, it presents a remarkably regular and pleasant aspect, with its double row of neat two-story houses, facing each other at the distance of 100 yards at the upper and 250 at the lower end; whilst midway between them flows a rivulet, whose gently-sloping banks are partly greensward, partly adorned with trees. The parish church (1790; 550 sittings) is an octagonal structure with a chaste steeple, furnished with a clock and a fine-toned bell; other places of worship are a

U.P. church (350 sittings), a Free church (320 sittings), and St Bridget's Roman Catholic church (1858; 350 sittings). Eaglesham has besides a post office under Glasgow, a branch of the Clydesdale Bank, several inns, gaswork, and a flower show on the third Thursday of August *o.s.* Handloom weaving, once the staple industry, is all but extinct; and a cotton-mill, some years ago destroyed by fire, has never been rebuilt. Hence the rapid decrease in the number of the inhabitants. Now, however, the bracing and healthy air is proving a strong attraction to many Glasgow families, and in summer there is a large influx of visitors. A public and a girls' industrial school, with respective accommodation for 166 and 150 children, had (1891) an average attendance of 76 and 64, and grants of £69, 6s. 6d. and £60, 1s. Pop. (1881) 588, (1891) 786.

The parish is bounded NW by Mearns, NE by Cathcart and East Kilbride in Lanarkshire, E and SE by East Kilbride, S by Loudoun in Ayrshire, and SW by Fenwick, likewise in Ayrshire. Its utmost length, from NW to SE, is $6\frac{1}{2}$ miles; its utmost breadth, from NE to SW, is $5\frac{1}{2}$ miles; and its area is $16,004\frac{1}{2}$ acres, of which $337\frac{1}{2}$ are water. The small detached Kirklands portion of East Kilbride parish, consisting of only about one acre, was transferred by the Boundary Commissioners in 1891 to the parish of Eaglesham. White CART Water, gathering its head-streams from the eastern moors, winds $5\frac{1}{2}$ miles north-westward along all the north-eastern border; and EARN Water flows to its north-eastward along the boundary with Mearns; whilst through the interior run Ardoch and Boreland Burns, with others of its tributaries. In the S, however, rise several affluents and sub-affluents of the river Irvine. To the SW lie BINEND Loch (5×2 furl.), DUNVAN Dam ($7\frac{1}{2} \times 3$), and Loch GOIN or Blackwoodhill Dam (7×3); nearer the village are High Dam ($1\frac{1}{2} \times 1\frac{1}{2}$), Mid Dam ($1 \times \frac{3}{4}$), and Picketlaw Reservoir ($2 \times 1\frac{1}{2}$). In the farthest N the surface sinks along the Cart to 380 feet above sea-level, thence rising to 832 at Moor-Yett plantation, 1084 at BALAGICH Hill, 1035 at Blackwood Hill, 987 at Melowther Hill, and 1230 near the south-eastern border. The rocks, with slight exception, are alternations of greenstone, claystone, and greywacke—part of the great trap mass that predominates so extensively in the hills of Renfrewshire. The soil, though reposing almost everywhere on trap, varies greatly in quality, some parts being specially rich, and others being represented by barren moors or deep bogs. The pasture is generally excellent. About five-twelfths of the entire area are under cultivation, three-fourteenths are meadow or natural pasture, $178\frac{1}{2}$ acres are under wood, and all the rest is either moss or moor. The moors, especially about Loch Goin, figure often in the history of the Covenant, two of whose martyrs rest in the parish kirkyard. North Moorhouse farm, near Earn Water, 3 miles to the W of the village, was the birthplace of Robert Pollok (1799-1827), the gifted author of the *Course of Time*; and in that epic one lights again and again on sketches of the 'hills and streams and melancholy deserts' round his home, that home overshadowed by four goodly trees—

'Three ash and one of elm. Tall trees they were,
And old; and had been old a century
Before my day.'

The barony of Eaglesham formed part of the grant made by David I. (1124-53) to Walter, the founder of the house of Stewart, by whom it was transferred to Robert de Montgomerie; and it was long the Montgomeries' chief possession, Sir John, who wedded the heiress of EGLINTON, here building the castle of POLNOON towards the close of the 14th century. Eaglesham House, late Polnoon Lodge, to the NE of the village, is the seat of Allan Gilmour, Esq. (b. 1820; suc. 1849). With the exception of 10 acres, he is sole proprietor. Eaglesham is in the presbytery of Glasgow and synod of Glasgow and Ayr; the living is worth £342. Pop. (1881) 1385, (1891) 1207.—*Ord. Sur.*, sh. 22, 1865.

Eagleshay or Egilshay, a low-lying island of Rousay parish, Orkney, separated from the E side of Rousay island by Howa Sound, and lying 11 miles N of Kirk-

wall. It measures 3 miles in length from N to S, by $1\frac{1}{2}$ mile in breadth, and includes a small bay of shell sand, a large tract of benty sand, burrowed by hundreds of rabbits, and a small fresh-water lake. The rocks belong to the Lower Old Red sandstone, and the soil is good, but poorly cultivated. Eagleshay is notable as the place where St Magnus was murdered by his cousin Hakon about the year 1110; and at its western extremity, on the scene, it is said, of his murder, are the remains of a small ancient church of St Magnus, with a round tower at its W end, and a vaulted choir at the E. There is a public school under Rousay school-board. Pop. (1881) 165, (1891) 147.

Eagleshay or Egilshay, an island of Northmaven parish, Shetland, in Islesburgh cove, on the E of St Magnus Bay. It measures about $1\frac{1}{2}$ mile both in length and in breadth, is excellent grazing-ground, and teems with rabbits.

Eagton or Eglin Lane, a troutful stream in the SE of Straiton parish, Ayrshire. Issuing from Loch Enoch (1650 feet), at the boundary with Kirkcudbrightshire, it runs $6\frac{3}{4}$ miles north-north-eastward to the head of Loch Doon (680 feet), and receives by the way the effluents of Lochs Macaterick and Riecaur.

Ealan. See ELLAN.

Eanaig or Einig, a stream in Kincardine parish, Ross-shire, formed by the confluence of Rappach Water and Abhuinn Dubhach, and running 4 miles east-north-eastward to the Oykell, at a point $\frac{1}{2}$ mile SE of Oykel-bridge. It is a good trouting stream, also frequented by grilse.—*Ord. Sur.*, sh. 102, 1881.

Earbusaig. See LOCHALS.

Earlcairney, a dilapidated cairn in Dalmeny parish, Linlithgowshire, on the top of a high sea-bank, 1 mile W of Bernbogle Castle. It was originally 500 feet in circumference and 24 feet high.

Earl's Burn, a rivulet in the W of St Ninians parish, Stirlingshire, rising at an altitude of 1300 feet, just within the confines of Gargunnoch parish. Thence it runs $6\frac{1}{2}$ miles south-south-eastward among the Lennox Hills, till, after a total descent of 550 feet, it falls into Carron Water at the SW base of Dundaff Hill (1157 feet), $5\frac{1}{2}$ miles W by N of Denny. A reservoir, feeding the mills of Denny, was formed near its source, about 1834, by means of an embankment 22 feet high, at a cost of close upon £2000; covers an area of nearly 60 acres; and, in October 1839, after a heavy rain, burst the embankment, rushed down in impetuous torrent, and did great damage to property along all the course of the Carron.—*Ord. Sur.*, shs. 39, 31, 1869-67.

Earl's Cross. See DORNOCH.

Earlsferry, a decayed coast village possessing the status of a royal burgh, in Kilmouchar parish, Fife, until 1891, when, with all the coast district of the parish south of the railway and the Cocklemill Burn, it was transferred to the parish of Elie. It is traditionally said to have been constituted a burgh by Malcolm Ceanmhor at the request of Macduff, Earl of Fife, who, in his flight from the vengeance of Macbeth, was concealed in a cave at Kinraig Point, and thence was ferried over the firth to Dunbar by fishermen of the place. The legend on the face of it is false; but, whatever its date, the original charter having been accidentally destroyed by fire in Edinburgh, James VI. granted a new one in 1589, which speaks of Earlsferry as 'of old, past memory of man, erected into a free burgh.' Then and afterwards it seems to have been a place of considerable trade, with two weekly markets and two annual fairs, the privilege of levying dues and customs, and the right of returning a member

Seal of Earlsferry.

granted a new one in 1589, which speaks of Earlsferry as 'of old, past memory of man, erected into a free burgh.' Then and afterwards it seems to have been a place of considerable trade, with two weekly markets and two annual fairs, the privilege of levying dues and customs, and the right of returning a member

to Parliament. These are all things of the past; but Earlsferry still is governed by a provost, who has a seat in the County Council, a bailie, a treasurer, and six councillors, and has its town-hall (1872), with quaint old steeple, a gaswork, golf links, and a public school. An abundant supply of gravitation water was obtained in 1882 from near Kellie Law at a cost of £11,000, conjointly with Elie and St Monance, followed by an extensive system of drainage. The old custom of ringing the curfew bell still exists in the ancient burgh. Pop. (1891) 304. See ELIE.

Earlshall, an ancient mansion in Leuchars parish, Fife, 7 furlongs ESE of Leuchars village. Said to have been named from a former estate of the Earls of Fife, it was built in years from 1546 till 1620, and was for generations the seat of the family of Bruce. It mainly consists of a square tower, and it contains a great hall, 50 feet long and 18 wide, with a fine arched roof, on which are emblazoned the arms of the Bruces and of numerous great houses with which they were allied by marriage. It continued to be inhabited down into the 19th century, and it stands in a small park, planted with venerable trees.

Earl's Hill, one of the Lennox Hills in the W of St Ninians parish, Stirlingshire, 6 miles SW of Stirling. It rises to an altitude of 1443 feet above sea-level, and adjoins other summits of not much inferior height.

Earlsmill, a station in Keith parish, Banffshire, on the Keith, Dufftown, and Craigellachie section of the Great North of Scotland railway, $\frac{3}{4}$ mile SSW of Keith station.

Earl's Seat, a hill at the meeting-point of Killearn, Campsie, and Strathblane parishes, Stirlingshire. The highest of the Lennox range, it culminates, 3 miles N by E of Strathblane village, at an altitude of 1894 feet above sea-level. Southward it projects an offshoot called the Little Earl; on E and W it is flanked by two hills of 1345 and 1781 feet in height; and it sends off from its southern slopes Finglen and Ballagan Burns.—*Ord. Sur.*, sh. 30, 1866.

Earlston, a small town and a parish of Lauderdale, SW Berwickshire. The town stands, 345 feet above sea-level, near the left bank of Leader Water, at the western confines of the parish, by road being 4 miles NNE of Melrose, $7\frac{1}{2}$ SSE of Lauder, and 31 SE of Edinburgh; whilst its station on the Berwickshire section of the North British is $4\frac{1}{2}$ miles N by W of St Boswells Junction, and $17\frac{1}{2}$ WSW of Dunse. Its ancient church, in connection with which the town in all probability arose and grew into any importance, was granted about the middle of the 12th century by Walter de Lindsay to the monks of Kelso, and by them was transferred in 1171, in exchange for Gordon, to their brethren of Coldingham, who continued to watch over it and the spiritual interests at stake in the district on to the time of the Reformation. Situated, as it is, not far from Dryburgh and Melrose Abbeys, it appears to have been in early times a place of some importance—ecclesiastical probably, to judge from the reported occasional visits of David I. of pious memory. From the family of Lindsay the manor passed into the hands of the Earls of Dunbar, and hence the older name of *Ercildoune* came to be changed to *Earlstoun* or *Earlston*. Under its present superior, the Earl of Haddington, the town is governed by a baron bailie; and courts are still held in it, consisting of two 'boulawmen,' a survival this of the ancient border 'Birley Courts.' Its chief historical interest, however, centres in the memorials and traditions which connect it with Thomas the Rhymer, a stone embedded in the wall of the parish church bearing inscription, 'Auld Rhymer's race lies in this place.' 'Thomas Rimor de Ercildun' appears as witness to a charter of Petrus de Haga to Dryburgh Abbey, which charter Mr John Russell, in his *Haigs of Bemersyde* (1881), assigns to somewhere between 1260 and 1270; and a fragment of the 'Rhymer's Tower' still stands between the town and Leader Water. He seems to have been dead by 1299; and a MS. of the early part of the 14th century, supposed by Prof. Veitch to be earlier than

1320, contains what was said to be one of his predictions, many of which are scattered through this work under ALE, BASS, COWDENKNOWES, CRIFFEL, etc. He has been styled the 'Father of Scottish poetry,' and his claim to the title would rest on secure foundation, if only one could positively ascribe to him the authorship of *Sir Tristrem*, and of the three-fytte *Prophecy*, best known in its ballad versions. These tell how, as he lay on Huntly Bank, the Fairy Queen rode by on a milk-white palfrey, and how, having kissed her under the Eildon tree, he was taken by her to Elfland, where through the bite of an apple he gained a perilous guerdon, the tongue that could never lie. Seven years he tarried in Elfland, and then was permitted to revisit earth only on the condition that he should, when summoned, return to his mistress the queen. And so, as he sat one evening carousing in his tower with some boon companions, a messenger rushed in, in breathless haste, to beg him to come forth and break the spell of a portent which troubled the village. Straightway the Rhymer obeyed the summons, and hurrying out saw a hart and a hind from the neighbouring forest pacing slow and stately up and down the street. The animals at sight of him quietly made off for the forest; and, with a last farewell to Ercildoune, True Thomas followed them, thenceforth to 'dree his weird' in Fairyland. Nor, though the voice of tradition predicts his return to earth, has he ever again been seen in the haunts of living men. (See EILDON HILLS.) His spirit, however, appears to have lingered in the tower he left, for his mantle was reputed to have descended on the shoulders of 'one Murray, a kind of herbalist, who, by dint of some knowledge of simples, the possession of a musical clock, an electrical machine, and a stuffed alligator, added to a supposed communication with Thomas, lived for many years in very good credit as a wizard.' So Sir Walter in his *Scottish Minstrelsy*; but Mr Robert Chambers, in *Popular Rhymes of Scotland*, shows that this hearsay account refers to Mr Patrick Murray, an enlightened and respectable medical practitioner, of good family connections, talents, and education, who, in 1747, possessed, with other property, the Rhymer's Tower, and there pursued various studies of a philosophical kind, not very common in Scotland during the 18th century.

The town extends eastward at right angles to Leader Water, and consists of plain business premises and dwelling-houses, many of the latter only one story high. It is lighted with gas, well drained, supplied with good water, and beautifully situated in a pleasant valley en- girt by hills of moderate elevation. The inhabitants are dependent partly on agriculture, partly on dyeing and on the manufacture of woollen and other textures, such as tweeds, shirtings, and 'Earlston gingbams.' The town has a post office, with money order, savings bank, and telegraph departments, a branch (1862) of the Commercial Bank, insurance agencies, hotels, a spacious corn exchange, a reading-room and library (1856), horticultural and friendly societies, billiard, bowling, and curling clubs, and a volunteer corps. A weekly grain market is held on Monday in winter, but on alternate Mondays in summer; a fortnightly stock sale on Mondays; and cattle and horse fairs are held on 29 June and the third Thursday of October, besides hiring fairs on the last Monday of February, the first Monday of April, and the Monday before the third Thursday of October. The parish church of 1756 was superseded in 1892 by a new one, containing 700 sittings. There is also a U.P. church. Pop. (1861) 980, (1871) 1168, (1881) 1010, (1891) 1060.

The parish, containing also the hamlet of REDPATH, is bounded N by Legerwood and Gordon, E by Hume and Nenthorn, S by Smalholm in Roxburghshire and by Merton, and W by Melrose in Roxburghshire. Its length, from E to W, varies between 1 and 7 miles; and its utmost breadth, from N to S, is $3\frac{3}{8}$ miles. The Boundary Commissioners in 1891 transferred to Melrose parish, in the county of Roxburgh, so much of the

parish of Earlston as lay to the west of the Leader Water, including the Craigsford detached part of the parish, which was surrounded by Melrose parish, and was of very small area. LEADER Water winds 4½ miles southward, and EDEN Water runs 3½ miles south-by-westward along all the Nenthorn border. Between these troutful streams the surface rises—in places steeply from the Leader—to 825 feet on Huntshaw Hill, 708 near Crossriggs, 1031 on conical Black Hill of Earlston, 885 near Craig House, and 806 near Darlingfield. Black Hill is porphyritic, overlying red sandstone; and at the E end of Earlston the pelvis and other hones of the *Cervus elephas* have been found, 12 feet from the surface, in a vegetable deposit, above which were marly and reddish clays. The soil is in some parts clayey, in others a light dry loam; while elsewhere it is strong and very fertile. There is a good deal of marshy ground in the E, and in the N are several hundred acres of moss. About two-thirds of the entire area are in tillage, woodlands cover nearly one-ninth, and the rest is either pastoral or waste. On the summit of Black Hill are the remains of a camp, commonly said to be Roman, but probably of native origin. Mansions are Mellerstain (one of the seats of the Earl of Haddington), Cowdenknowes, Carolside (one of the seats of Lord Reay), and Kirklands; and the Earl of Haddington is chief proprietor. Earlston is the seat of a presbytery in the synod of Merse and Teviotdale, which was, till recently, for an interval of a century, designated the presbytery of Lauder; the living is worth £261. A public school, erected at the town in 1876 at a cost of £2470, with accommodation for 323 pupils, had (1891) an average attendance of 243, and a grant of £252, 2s. 6d. There is also a school at Mellerstain, which, with accommodation for 52 children, had an average attendance in 1891 of 35, and a grant of £39, 7s. Pop. (1881) 1767, (1891) 1766.—*Ord. Surv.*, sh. 25, 1865.

The presbytery of Earlston comprises the parishes of Channelkirk, Earlston, Gordon, Lauder, Legerwood, Mertoun, Smailholm, Stow, and Westruther. Pop. (1871) 10,212, (1881) 9503, (1891) 8623, of whom 2967 were communicants of the Church of Scotland in 1892.

See an article by G. Tait in *Proc. Berwickshire Naturalists' Club* (1867); Dr J. A. H. Murray's *Romance and Prophecies of Thomas of Ercildoune* (Early Eng. Text Soc. 1875); and chap. viii. of Prof. John Veitch's *History and Poetry of the Scottish Border* (1878).

Earlston, a mansion in Borgue parish, S Kirkcudbrightshire, 4½ miles WSW of Kirkcudbright, and 5 SSE of Gatehouse. A large and elegant edifice, built about 1835, and embosomed among woods, it is the seat of Sir William Gordon, sixth Bart. since 1706 (b. 1890; suc. 1843), who was one of the 'Six Hundred' in the famous Balaclava charge.

Earlston, an old castle and a burn in Dalry parish, N Kirkcudbrightshire. The castle, standing near the left bank of the Ken, 2 miles N by W of Dalry village, has the form of a tall square tower, and bears over its door the date 1655. It was the seat of Sir William Gordon's ancestors, who figured prominently among the Covenanters; has long been unoccupied, but retains a strong oaken roof; and might easily be rendered habitable. Earlston Burn runs 4 miles south-westward to the Ken, and, in the southern vicinity of the castle, makes a fine waterfall, called Earlston Linn.

Earn, a rivulet of SE Renfrewshire, rising at the boundary with Ayrshire, and running 6 miles north-eastward along the mutual border of Eaglesham and Mearns parishes to the White Cart, at a point 2 miles N of Eaglesham village. Professor Wilson, while a pupil at the manse of Mearns, fished often in its waters; and Pollok, the author of the *Course of Time*, spent a large portion of his few years on earth among its sequestered banks and braes.—*Ord. Surv.*, sh. 22, 1865.

Earn, a loch and a river, giving the name of Strathearn to its basin. The lake impinges, at its head, on Balquhidder parish, but elsewhere belongs to the western or upper part of Comrie. It commences near Lochearnhead village, at the foot of Glen Ogle;

is approached there by the Callander and Oban Railway; and extends in a direction of E by N to the village of St Fillans. Lying 306 feet above sea-level, it is 6½ miles long; its breadth varies between 3¼ and 6½ furlongs; and its greatest depth is 49 fathoms. Its temperature varies so little throughout the year that, not only does the lake itself never freeze, even in the keenest frost, but the river Earn, which flows from it, seldom, if ever, freezes till it has run a distance of at least 5 miles. Its waters contain abundance of fine trout, and can be fished conveniently from either Lochearnhead or St Fillans. Its shores and foreground screens, to the mean breadth of about ½ mile, are clothed with wood; its midground screens are a diversity of waving, rolling, receding hill and mountain intersected by ravines; and its sky-line on the S side soars into the broken fantastic heights of Stuc-a-Chroin (3819 feet) and the monarch mountain of Ben Vorlich (3224), whilst to the N rises Srou Mor (2203). Streamlets and torrents enter it from the ravines, and one of them—the Burn of Ample, near Lochearnhead—just before entering it, forms, in the grounds of Edinample, a picturesque double waterfall. ARDVOIRLICH House, on its southern shore, has beautiful grounds, and is the 'Darnlinvarach' of Scott's *Legend of Montrose*; and one of two artificial islets, Neish, near its foot, is clothed with wood, and has curious historical associations. Good roads go down both sides of the lake, and each commands a pleasing series of views; but only the northern one is travelled by public coaches, though the southern commands the finer prospects. The scenery, on the whole, is more charming than imposing, more beautiful than grand, yet compares advantageously with the scenery of other admired lakes, and has features of at once picturesqueness, romance, and sublimity. 'Limited as are the dimensions of Loch Earn,' says Dr Macculloch, 'it is exceeded in beauty by few of our lakes, as far as it is possible for many beauties to exist in so small a space. I will not say that it presents a great number of distinct landscapes adapted for the pencil, but such as it does possess are remarkable for their consistency of character, and for a combination of sweetness and simplicity with a grandeur of manner scarcely to be expected within such narrow bounds. Its style is that of a lake of far greater dimensions; the hills which bound it being lofty and bold and rugged, with a variety of character not found in many of even far greater magnitude and extent. It is a miniature and a model of scenery that might well occupy ten times the space; yet the eye does not feel this. There is nothing trifling or small in the details; nothing to diminish its grandeur of style, to tell us that we are contemplating a reduced copy. On the contrary, there is a perpetual contest between our impressions and our reasonings. We know that a few short miles comprehend the whole, and yet we feel as if it was a landscape of many miles, a lake to be ranked among those of the first order and dimensions. While its mountains rise in majestic simplicity to the sky, terminating in those bold and various and rocky outlines which belong to so much of the geological line from Dunkeld to Killycrankie—even to Loch Katriue, the surfaces of the declivities are equally various and bold, enriched with precipices and masses of protruding rock, with deep hollows and ravines, and with the courses of innumerable torrents which pour from above, and, as they descend, become skirted with trees till they lose themselves in the waters of the lake. Wild woods also ascend along the surface in all that irregularity of distribution so peculiar to these rocky mountains,—less solid and continuous than at Loch Lomond, less scattered and less romantic than at Loch Katrine, but, from these very causes, aiding to confer on Loch Earn a character entirely its own. If the shores of the lake are not deeply marked by bays and promontories, still they are sufficiently varied; nor is there one point where the hills reach the water in that meagre and insipid manner which is the fault of many of our lakes, and which is the case throughout the far greater part even of Loch Katrine. Loch Earn has no

blank. Such as its beauty is, it is always consistent and complete.'

The river Earn, issuing from Loch Earn at St Fillans village, takes a general easterly course along Strathearn, and falls into the Tay, at a point $1\frac{1}{2}$ mile NNE of Abernethy, 1 mile W of the boundary between Perthshire and Fife, and $6\frac{3}{4}$ miles SE by S of Perth. Its course abounds in serpentine folds, which contribute much to its beauty and to its abrasive power; and, measured along which, it has a total length of $46\frac{1}{2}$ miles—viz., $13\frac{3}{4}$ to Crieff Bridge, $24\frac{3}{4}$ thence to Bridge of Earn, and $8\frac{3}{4}$ thence to its mouth. It draws not only from the numerous mountain feeders of the lake, but also from numerous mountain streams on both flanks of the upper part of its own proper basin, so that it always has a considerable volume and a lively velocity, and is liable in times of rain to swell suddenly into powerful freshets; and it sometimes bursts or overflows its banks, particularly in its lower reaches, with devastating effect on the crops or soils of the flooded district. Its chief tributaries on the left are the Lednock at Comrie and the Turret at Crieff; on the right, the Ruchill at Comrie, the Machany at Kinkell, the Ruthven at Trinity-Gask, and the May at Forteviot. The first 13 miles of its course, from Loch Earn onward, lie through the parish of Comrie and the parish of Monzievaird and Strowan; and the rest of its course, though occasionally intersecting wings or districts of parishes, as in the case of Forteviot, is mainly the boundary line between Crieff, Monzie, Trinity-Gask, Findo-Gask, Aberdalgie, and Rhynd on the N, and Muthill, Blackford, Auchterarder, Dunning, Forgandenny, Dunbarny, and Abernethy on the S. Its flow is so comparatively rapid, and so briefly affected by the tide, as to prevent it from being navigable, even for vessels of from 30 to 50 tons' burden, higher than to the Bridge of Earn. Its waters contain salmon (running up to $48\frac{1}{2}$ lbs.), perch, and pike, and have great abundance of common trout, yellow trout, and sea trout. Its scenery, throughout the upper reaches onward to the vicinity of Crieff, vies with that of Loch Earn in all the elements of natural beauty and power, and, throughout the middle and lower reaches onward to its foot, is unexcelled by that of any Lowland tract in Britain. The Highland features, excepting varieties of detail, have already been sufficiently indicated in our account of the lake, and the Lowland ones will be described under STRATHEARN.—*Ord. Sur.*, shs. 46, 47, 48, 1868-72.

Earn, Bridge of, a village in Dunbarny parish, SE Perthshire, on the right bank of the Earn, with a station upon the Edinburgh and Perth section of the North British railway, $3\frac{3}{4}$ miles SSE of Perth. It took its name from an ancient bridge, now superseded by a fine modern three-arch structure, and it consists of two parts, old and new—the old founded in 1769, on leases of 99 years; the new begun in 1832, for the accommodation of visitors to the neighbouring mineral wells at PITCAITHLY, and formed on a symmetrical plan in a row or street of handsome houses. Nestling beneath the wooded slopes of MONCRIEFF Hill (725 feet), it is a charming little village, and has a post office, with money order, savings bank, insurance, and telegraph departments, a very commodious hotel, a library, gaswork, waterworks, etc. The Queen changed horses here on 6 Sept. 1842. Pop. (1841) 119, (1861) 381, (1871) 326, (1881) 304, (1891) 325. See DUNBARNY.—*Ord. Sur.*, sh. 48, 1868.

Earnock, an estate, with a mansion, in Hamilton parish, Lanarkshire. The mansion, standing $2\frac{1}{2}$ miles WSW of Hamilton, is a modern square edifice, with very fine pleasure-grounds.

Earnock, Meikle, a village in Hamilton parish, Lanarkshire, 2 miles SW of Hamilton. An ancient tumulus adjoining it, though formerly much larger, now measures 12 feet in diameter and 8 in height, and has yielded several urns.

Earnside, an ancient forest in Dunbarny parish, SE Perthshire, and eastward thence, along the Earn and the Tay to the eastern border of Abdie parish, around

Lindores Abbey, in Fife. It is said by Sibbald to have been 4 miles long and 3 broad, but it could not have been less than 8 miles long, and, though taking name from the river Earn, it extended so far beyond that river's present confluence with the Tay as to countenance a tradition that the Earn once flowed to the base of the hills in the NW of Fife, that the Tay closely skirted the heights which now screen the N side of the Carse of Gowrie, and that the two rivers did not unite till they reached a point considerably to the E of their present confluence. Earnside Forest was the traditional scene of adventures of Sir William Wallace, notably of a sanguinary conflict which he maintained within it against the English; and it was sometimes called 'Black Earnside,' a name referring probably to the dense gloom of its trees. It was long ago destroyed, but large masses of black oak, supposed to be remains of it, are found embedded in the soil of various parts of the territory which it once occupied.

Earraid, an islet of Kilfinichen parish, Argyllshire, separated by a narrow channel from the south-western extremity of Mull. In 1871 it had a temporary population of 122, engaged in the construction of DRUHEAR-TACH Lighthouse. Pop. (1891) 47.

Earsay. See IORSA.

Easdale, an island and a village of Kilbrandon parish, Argyllshire. The island lies 16 miles SW of Oban, off the W shore of Seil island, from which it is separated by a strait only 400 feet wide at the narrowest. With a somewhat roundish form, measuring 850 and 760 yards in the two greatest diameters, it rises at one point to a height of 130 feet above sea-level, but generally is very little higher than tide-mark. It presents an unattractive appearance, but is highly interesting for its valuable slate quarries. Commenced about 1631, these, in one part, have been carried to a depth of 300 feet below sea-level, being there kept dry by steam pumps and by the accumulated *débris* thrown up in the way of embankment; they have long been worked with the appliances of steam-engines and railroads; and they belong to the Earl of Breadalbane. In 1866 they were let to a company of workmen formed on co-operative principles, but, favourable as were the terms of the lease, the venture proved unprofitable, so in the following year they were transferred to a company of slate merchants, who have continued to work them with great vigour. They employ about 300 men, and turn out annually between seven and nine millions of slates, worth not less than £14,000. The strait between Easdale and Seil is used by the inhabitants of the two islands much in the manner of a highway, or similarly to the manner in which the people of Venice use their canals, the workmen especially disporting themselves on it in boats at all available times, and regularly crossing it at meal hours; it also is part of the ordinary marine highway of the western steamers between the Clyde and the N, affording passengers an opportunity of seeing the curious operations in the quarries; and it likewise serves as a good harbour, and has been entered in the course of a year by as many as 400 sailing vessels, most of them sloops, and many of them, even to the number of more than twelve at a time, waiting their turn to be cargoes with slates. The village stands on both sides of the strait, or is partly Easdale proper on Easdale island, and partly Ellanabrieach on Seil; consists chiefly of snug, slated, one-story houses; and has a post office under Oban, with money order, savings bank, and telegraph departments, a pier (1873), a public school, a young men's improvement association, a library, and occasional lectures on popular and scientific subjects. Queen Victoria, when on her way to Ardverkie in 1847, had a brilliant reception at Easdale. Pop. of island (1861) 449, (1871) 504, (1881) 460, (1891) 317; of village, (1861) 772, (1871) 855, (1881) 805, (1891) 865. See p. 76 of *Trans. Highl. and Ag. Soc.* for 1878.

Easnambroc, a waterfall of 30 feet in Kiltarlity parish, Inverness-shire, on the river Glass, 1 mile above Fasnakyle.

Eassie and Nevay, a united parish on the W border

of Forfarshire, containing, towards its NE corner, Eassie station on the Scottish Midland section of the Caledonian, $5\frac{1}{2}$ miles ENE of the post-town Meigle, and $2\frac{3}{4}$ W by N of Glamis, by road; whilst by rail it is $2\frac{1}{2}$ miles SW of Glamis station, $4\frac{1}{4}$ NE of Alyth Junction, and $24\frac{3}{4}$ NE of Perth. United before the middle of the 17th century, the ancient parishes of Eassie and Nevey were nearly equal to each other in extent—Eassie on the N, Nevey on the S. The whole is bounded N by Airlie, E and SE by Glamis, S and SW by Newtyle, and W by Meigle in Perthshire. Its greatest length, from NNE to SSW, is $4\frac{1}{2}$ miles; its breadth varies between $1\frac{1}{2}$ and $2\frac{3}{4}$ miles; and its area is $5061\frac{1}{2}$ acres, of which 8 are water. DEAN Water creeps $2\frac{3}{4}$ miles west-by-southward along all the northern border, with scarcely perceptible current, yet sometimes in winter, bursting its strong embankments, floods all the neighbouring fields. Eassie Burn rises in the N of Auchterhouse parish, and, running $6\frac{1}{2}$ miles north-by-westward through DENOON Glen in Glamis parish, and across the north-eastern extremity of Eassie past Eassie station, falls into Dean Water at a point $2\frac{3}{4}$ miles WNW of Glamis village. The level northern and north-western portion is part of STRATHMORE, and sinks along Dean Water to 160 feet above the sea; southwards the surface rises to the Sidlaws, attaining 371 feet near Murleywell, 621 at Ingliston Hill, and 947 on the south-eastern border, whilst Kimpurney Hill (1134 feet) culminates just within Newtyle. The rocks of the uplands are partly eruptive, partly Devonian; that of the Strathmore division is Old Red sandstone; and here the soil is mainly a soft sandy loam of high fertility, as there it is partly moorish, partly a thin black mould. Nearly half of the entire area is in tillage; about 240 acres are under wood; and the rest is either pastoral or waste. A circular mound, with traces of an ancient deep, wide moat, is occupied by Castle-Nairne farmhouse; and a large sculptured stone, similar to the famous sculptured stones of Meigle and Aberlemno, is near the old church of Eassie. All Nevey belongs to the Earl of Wharncliffe, the rest of the parish being divided among 4 proprietors. This parish is in the presbytery of Meigle and synod of Angus and Mearns; the living is worth £178. Two churches, the one in Eassie, the other in Nevey, were formerly in use alternately; and both of them still stand as ruins, with burial grounds at each, beyond the station. The present church, 2 miles SW of Eassie station, was built in 1833, and contains 400 sittings. A public school, with accommodation for 127 children, had (1891) an average attendance of 93, and a grant of £86, 13s. 6d. Valuation (1882) £6974, 11s. (1891) £5257, 13s., plus £1974 for railway. Pop. (1801) 838, (1831) 654, (1861) 748, (1871) 586, (1881) 561, (1891) 553.—*Ord. Sur.*, sh. 56, 1870.

East Barnes, etc. See BARNES, EAST, etc.

Eastend, an estate, with a modern mansion, in Carmichael parish, Lanarkshire, 2 miles WSW of Thankerton. Its owner is Michael H. Thomson-Carmichael, Esq. (b. 1875; suc. 1892).

Easterfield. See INVERKEITHNY.

Easterhill, an estate, with a mansion, in Shettleston parish, Lanarkshire, on the right bank of the Clyde, 5 furlongs SSW of Tollcross.

Easterhouse, a collier village in Old Monkland parish, Lanarkshire, with a station on the Glasgow and Coatbridge branch of the North British, $3\frac{1}{2}$ miles W of Coatbridge, and a post office under Glasgow.

Easterhouse, a former seat of the Duke of Argyll, Roseneath parish, Dumbartonshire, which was destroyed by fire in 1802. A new mansion was built (1803-5) a short distance from the old site. See ROSENEATH.

Easterskene, an estate, with a mansion, in Skene parish, SE Aberdeenshire. The mansion stands near the NE shore of Loch Skene, 9 miles W by N of Aberdeen, and S by E of Kintore station. Built about 1832, it is a large edifice in the Tudor style, with fine grounds, and commands an extensive prospect to the frontier Grampians.

Eastertown, a hill on the S border of Fyvie parish, Aberdeenshire, projecting from the Bethelnie range in

Meldrum, and finely diversifying the upper vale of Ythan Water.

Eastertyre, an estate, with a mansion, in Logierait parish, Perthshire, near the left bank of the Tay, $2\frac{1}{2}$ miles WNW of Ballinluig Junction.

Eastfield. See RUTHERGLEN.

East-Grange Station. See CULROSS.

East-Haven, a fishing village in Panbride parish, Forfarshire, with a station on the Dundee and Arbroath railway, $4\frac{1}{2}$ miles SW of Arbroath. It sends large quantities of live lobsters to the London market, and of white fish to Dundee, Forfar, and other towns.

Eastmuir. See SHETTLESTON.

Eastwood, a mansion in Dunkeld parish, Perthshire, in the south-eastern vicinity of Dunkeld town. Its grounds are very beautiful, commanding at one point a splendid view of the town, the bridge, the cathedral, and the environs of Dunkeld. In 1879 Eastwood was rented by Sir J. E. Millais, Bart., R.A.

Eastwood or Pollok, a parish in the E of Renfrewshire. It contains the post-town of POLLOKSHAW and the village of THORNIEBANK, with the stations of Pollokshaws, Kennishead, Thornliebank, and Giffnock. A small tongue of the parish of Govan, that lay on the north border of Eastwood parish, and was left outside the new boundary of the city of Glasgow, was transferred by the Boundary Commissioners in 1892 to the parish of Eastwood, while remaining in the county of Renfrew. The parish is bounded N by Govan, Abbey-Paisley, and the county boundary, E by Govan (in Glasgow) and Cathcart, S by Mearns, SW by Neilston, and W by Abbey-Paisley. The White CART winds 4 miles west-north-westward through the interior and along the boundary with Abbey-Paisley; Levern Water runs $2\frac{1}{2}$ miles, partly along that boundary, partly across a narrow western wing; and Auldhouse Burn, another of the White Cart's tributaries, comes in from Mearns, and traverses the interior, itself receiving Brock Burn, which rises close to the south-eastern border. The surface is charmingly diversified with shallow vale and gentle eminence, westward declining to 50 feet above sea-level, whilst rising to 167 near Knoehead, 170 near Haggbowse, 221 near Giffnock station, and 302 at Upper Darnley. The rocks are chiefly of the Carboniferous formation, and include valuable beds of sandstone, limestone, ironstone, and coal, all of which have been worked. The Giffnock sandstone has a fine grain and a whitish hue; the Eastwood pavement stone is a fine foliated limestone; and the Cowglen coal is of good quality, and occurs in numerous seams, none of them more than $2\frac{1}{2}$ feet thick. The soil on the banks of the streams is very fertile alluvium; on the higher grounds, is generally a thin earth on a till bottom; and elsewhere, is of various quality. Rather less than half the entire area is in tillage; as much or more is pasture, and some 350 acres are under wood. Extensive factories are at Pollokshaws, Thornliebank, and Greenbank; and the whole parish teems with industry, as if it were immediately suburban to Glasgow. Robert Wodrow (1679-1734), author of a well-known *History of the Church of Scotland*; Matthew Crawford (d. 1700), author of a voluminous unpublished work of the same title; and Stevenson Macgill, D.D. (1765-1840), professor of divinity in the University of Glasgow, were ministers of Eastwood; whilst Walter Stewart of Pardovan, author of the *Pardovan Collections*, died in the parish, and was interred in the Pollok burial-aisle. Darnley and Pollok, both separately noticed, are estates with much interest attaching to them; and Sir John Stirling-Maxwell, Bart., is the chief proprietor. In the presbytery of Paisley and synod of Glasgow and Ayr, this parish is ecclesiastically divided into Eastwood proper and Pollokshaws, the former a living worth £549. The various places of worship and the schools are noticed under Pollokshaws and Thornliebank. Pop. (1801) 3375, (1831) 6854, (1861) 11,314, (1871) 13,098, (1881) 13,915, (1891) 16,042.—*Ord. Sur.*, sh. 30, 1866.

Eathack or Eigheach, Loch. See GAUIR.

Eathie, a picturesque reach of coast, traversed by a romantic burn—a noble Old Red sandstone ravine—in the NE of the Black Isle district of Ross and Cromarty. Its liassic deposit, amazingly rich in fossil organisms, possesses high interest both in itself and in connection with those early researches of Hugh Miller, which he describes in chap. viii. of *My Schools and Schoolmasters*.

Ebrie, a burn of N Aberdeenshire, rising in New Deer parish, $1\frac{1}{2}$ mile SE of New Deer village, and running $8\frac{1}{2}$ miles southward to the Ythan, at a point $2\frac{3}{4}$ miles WNW of Ellon. It is followed, over the greater part of its course, by the Buchan and Formartine section of the Great North of Scotland; has Arnage House and Arnage station on its left bank; gives the name of Inverebrie to a section of Ellon parish contiguous to its mouth; and, in times of heavy rain, becomes a voluminous torrent.—*Ord. Surv.*, sh. 87, 1876.

Ecclefechan (Celt. 'Church of Fechan'), the birth-place of Thomas Carlyle, is a village in Hoddam parish, Annandale, Dumfriesshire. It stands 171 feet above sea-level, $\frac{3}{4}$ mile ESE of Ecclefechan station, on the main line of the Caledonian, this being $3\frac{1}{4}$ miles WNW of Kirtlebridge, 20 NW of Carlisle, $5\frac{3}{4}$ SE by S of Lockerbie, 81 S by W of Edinburgh, and $81\frac{1}{2}$ SE by S of Glasgow. At it are a post office, with money order, savings bank, insurance, and telegraph departments, a branch of the Royal Bank, gasworks, inns, a Gothic Free church (1878; 280 sittings), a Gothic U.P. church (1865; 600 sittings), and a public school; and fairs are held here on the Tuesday after 11 June and the Tuesday after 20 October. 'The village of Ecclefechan' (we quote from the *Scotsman* of 11 Feb. 1881), 'situated midway between Lockerbie and the Solway Firth, has been generally identified as the "Entepfulh" of Carlyle's *Sartor Resartus*. There it is, little altered from what it was when Carlyle knew it in his early days, lying in a hollow, surrounded by wooded slopes, with its little "Kuhbach" still gushing kindly by—where not covered over—to join Mein Water at the foot of the town, before the Mein loses itself in Annan Water, $1\frac{1}{4}$ mile lower down the valley. There are the beechwoods; and here, by the side of the road, is the field where the annual cattle fair is held—"undoubtedly the grand summary of Entepfulh child's culture, whither, assembling from all the four winds, come the elements of an unspeakable hurly-burly." Built along the Glasgow and Carlisle highway, the stage-coach in the old days wended its way night and morning through Ecclefechan; but the cheery horn of the guard is no more heard, and, the railway having passed it by, the village is now probably the scene of less bustle than it was eighty years since. The weaving industry, which at a time less remote, gave employment to not a few men and women, has now almost deserted it, and the quietude of the place has been further increased by a diversion of the turnpike road to the higher ground along the western boundary, in order to avoid the hollow in which Ecclefechan is situated. The inhabitants are now, for the most part, people engaged in agricultural pursuits, and shopkeepers and others who minister to their wants. The village has a particularly neat and tidy appearance, from the fact that nearly all the houses not faced with the red sandstone of the district are regularly whitewashed about the time of the fair. Most of the older cottages and other tenements are said to have been erected by the father and uncle of Carlyle, who, it is known, followed the trade of mason, and who are still well remembered in Ecclefechan. The house in which Thomas Carlyle was born stands on the W side of the main street near the S end of the village. It is a plain two-story building, whitewashed like so many of its neighbours, and may be said to be divided into two parts by a large keyed arch, which gives access to a court and some gardens behind. At present it is occupied by two separate families, who enter their respective dwellings by door-

ways on either side of the arch. It was in the northernmost division, in a small chamber immediately over the archway, that Carlyle first saw the light, on 4 Dec. 1795. The room, which is reached from the ground floor by a well-worn staircase of red sandstone flags, is of small proportions—4 or 5 feet wide by 8 or 9 in length—with a bed-place formed in the old style by making a recess in the wall.* Closely adjoining this interesting tenement is a lane, known as Carlyle's Close, in which stood a house afterwards tenanted by Carlyle's father, and in which all the other children were born. Here Carlyle was brought up. This house in the lapse of time has undergone considerable changes; and the Philistinism of Ecclefechan has at last transformed it into the village shambles. The churchyard lies on the W side of the village, 50 yards or thereby along the beech-fringed road which leads to Hoddam Castle. It is only about half an acre in extent; and in the centre of it many years ago stood the ancient church of St Fechan, of which not a stone remains. Close to the churchyard on the E side is a handsome Gothic church in red sandstone, cruciform in shape, with a square clock-tower, which is the most prominent object in the village. This belongs to the U.P. congregation, and took the place of the old Secession church; in which, it is understood, Carlyle was baptized by the Rev. Mr Johnston, who afterwards taught the youthful genius Latin. By the side of the churchyard is a long cottage-like building in a fair state of repair—the old parish school, where Carlyle learnt "those earliest tools of complicity which a man of letters gets to handle—his class-books." This old school-house, said to have been built with the stones of the ruined church, ceased some five and thirty years ago to be used by the village schoolmaster, who removed to a more commodious building within a stone's cast, which since the passing of the Education Act has been enlarged and dignified with a clock-tower. The old school-house is now a casual poorhouse and soup-kitchen.' In the churchyard itself are headstones to Archibald Arnott, Esq. (1772-1855), Napoleon's medical attendant at St Helena; to Robert Peal (1692-1749), said to be the great-grandfather of Sir Robert Peel; and, in the W corner, to James Carlyle (1758-1832) and Margaret Aitken (1771-1853), his second wife, who 'brought him nine children, whereof four sons and three daughters survived, gratefully reverent of such a father and mother.' Two of those sons have since been laid beside her—Dr John Aitken Carlyle (1801-79), the translator of Dante, and Thomas Carlyle himself, whose funeral on 10 Feb. 1881, a cloudy, sleety day, was attended by Prof. Tyn-dall, Mr J. A. Froude, Mr J. M. Leckie, etc. A stone (1882) marks his grave, and the churchyard wall was rebuilt and walks were laid out in the winter of 1881-82. Pop. of village (1861) 884, (1871) 846, (1881) 768, (1891) 746.—*Ord. Surv.*, sh. 10, 1864. See also ANNAN, KIRK-CALDY, HADDINGTON, and CRAIGENPUTTOCH.

Eccles, a Border village and parish of Berwickshire. The village stands, 244 feet above sea-level, in the SW of the parish, 2 miles NNW of the nearest reach of the Tweed, $5\frac{1}{2}$ SE of Greenlaw station, $5\frac{3}{4}$ NNE of Kelso, under which it has a post office, and $6\frac{1}{4}$ WNW of Coldstream. It has also a reading-room and library. Though now consisting of but one small street, it represents an ancient town of no little consequence, the seat of St Mary's Cistercian nunnery, founded in 1155. Town and nunnery were burned in Hertford's raid of 1545; and nothing remains now of the latter save two vaulted cells and a fragment of wall near the churchyard.

The parish, containing also the villages of BIRGHAM and LEITHOLM, is bounded N by Fogo, E by Swinton and Coldstream, S by Northumberland and by Sprouston in Roxburghshire, W by Ednam and Stichill in Roxburghshire, W by Hume, and NW by Greenlaw. Its length, from ENE to WSW, varies between $2\frac{5}{8}$ and $6\frac{3}{8}$ miles; its utmost breadth is $5\frac{1}{2}$ miles; and

* Fechin of Fore, probably, the Vigeanus of the Scottish Calendar, who, according to Skene, was an Irish anchorite of the latter half of the 6th century, about which period St Kentigern first fixed his see at HODDAM.

* So the *Scotsman*, but, according to Carlyle's brother, it was not in this room, but in that at the top of the stair, on the right hand side, that the Sage of Chelsea was born.

its area is 12,488 $\frac{1}{2}$ acres, of which 70 $\frac{1}{2}$ are water. The **Tweed**, here a glorious fishing river, sweeps 3 miles east-north-eastward along all the Sprouston and Northumberland border; **LEET Water**, ditchlike but troutful, flows 2 miles south-south-westward along the boundary with Coldstream; and, through the northern interior, **Lambden Burn**, after tracing 2 $\frac{3}{4}$ miles of the Greenlaw border, meanders 4 $\frac{1}{2}$ miles eastward to the Leet, past **Leitholm**. A partially drained bog near **Birgham** is much frequented by wild ducks. The surface sinks along the Tweed to 80 feet above sea-level, thence rising in gentle parallel ridges to 230 feet near **Wester Whitrig**, 272 at **Bartle Hill**, 296 near **Harlaw**, 338 at **Eccles Hill**, and 353 near **Hardacres**. The chief rocks are a sandstone resting on clay-stone porphyry, and quarried for masonry; a sandstone covered by amygdaloid, containing green steatite and calcareous spar; a dark slaty, marly sandstone, containing 25 per cent. of carbonate of lime; a magnesian limestone, containing red hornstone and crystals of calcareous spar; and red massy gypsum, in thin beds, containing ferruginous crystals. The soil is light on the banks of the Tweed; in the middle and northern districts, is chiefly clay and loam. All the land, with slight exception, is arable and very productive, having fine embellishments of enclosures and plantations, and presenting a rich and charming appearance. **Kames** was the birthplace of the distinguished judge and philosopher, **Henry Home** (1696-1782), who from it assumed the title of **Lord Kames**, and here was visited in 1759 by **Benjamin Franklin**. **Leitholm Tower**, a ruined Border peel, stands beside **Lambden Burn**; and at **Deadriggs** is the sculptured stone of **CROSSHALL**. **Eccles House** is the property of **James Lewis Greig, Esq.** (b. 1868; suc. 1869). Other mansions, most of them noticed separately, are **Antonshill**, **Belchester House**, **Bughtrig**, **Kames**, **Mersington House**, **Purves Hall**, **Springhill**, and **Stoneridge**. **Eccles** is in the presbytery of **Dunse** and synod of **Merse** and **Teviotdale**; the living is worth £372. The parish church, at the village, with handsome spire and 1000 sittings, was built in 1774, successor to its ancient predecessor, which was dedicated first to **St Cuthbert**, afterwards to **St Andrew**. There are also a Free church (280 sittings) of **Eccles** and a U.P. church (300) of **Leitholm**; whilst the three public schools of **Birgham**, **Eccles**, and **Leitholm**, with respective accommodation for 88, 120, and 143 children, had (1891) an average attendance of 42, 87, and 119, and grants of £36, 11s. 6d., £84, 12s., and £116, 19s. 6d. Pop. (1801) 1682, (1831) 1885, (1861) 1861, (1871) 1780, (1881) 1546, (1891) 1446.—*Ord. Surv.*, shs. 25, 26, 1865-64.

Ecclesfechan. See **ECCLESFECHAN**.

Ecclesgreig. See **ST CYRUS**.

Ecclesiamagirdle (Celt. 'church of St Grizel'), a former detached portion of **Dron** parish, **SE Perthshire**, lying westward of the main body, and parted therefrom by a strip of **Dunbarny**, 1 furlong broad at the narrowest, but united to the main body in 1891 by the **Boundary Commissioners** by incorporating into **Dron** parish the greater portion of this intervening strip of **Dunbarny** parish. With utmost length and breadth of 1 $\frac{1}{2}$ and $\frac{3}{4}$ mile it has an area of 631 $\frac{3}{8}$ acres; contains **GLENEARN House** and a fragment of an ancient chapel; and is all so overshadowed by the **Ochils**, that, according to an old-world rhyme—

'The lasses o' Exmagirdle
May very weel be dun;
For frae Michaelmas till Whitsunday
They never see the sun.'

Ecclesmachan (Celt. 'church of St Machan'), a village and a parish of **Linlithgowshire**. The village stands 2 $\frac{1}{2}$ miles N by W of **Uphall** station, 3 WSW of **Winchburgh** station, and 4 $\frac{3}{4}$ ESE of **Linlithgow**.

The parish until 1891 consisted of two portions, separated by a strip of **Linlithgow** parish, 1 mile broad at the narrowest. In that year, however, the **Boundary Commissioners** united the two portions of **Ecclesmachan** by transferring to that parish the intervening **Linlithgow** strip. It at the same time received a further accession

of territory by having transferred to it also the western portion of the **Aldcathie** detached part of **Dalmeny** parish, the eastern portion going to **Kirkliston**. While the south-western portion was the larger of the two, the north-eastern contained the village. The surface rises gently from 300 to 600 feet above sea-level in the north-eastern, from 480 to 720 in the south-western, division; and the latter is drained by **Brox**, the former by **Nidry**, **Burn**. The rocks are partly eruptive, partly carboniferous. Sandstone is plentiful; and great beds of indurated clay, interspersed here and there with seams of clay-ironstone, occur in conjunction with trap; whilst coal has been mined in the N. **Bullion Well**, a mineral spring that issues from the trap rocks of **Tor Hill**, near the manse, and is weakly impregnated with sulphuretted hydrogen, was formerly held in some medicinal repute. With the exception of 130 acres under wood, the whole almost of the land is in tillage. The eminent surgeon, **Robert Liston** (1794-1847) was a native, his father being parish minister; so too, perhaps, was the poet **William Hamilton** of **Bangour** (1704-54), who is best remembered by his exquisite *Braes of Yarrow*. The property is mostly divided among three. **Ecclesmachan** is in the presbytery of **Linlithgow** and synod of **Lothian** and **Tweeddale**; the living is worth £338. The church, which early in the 18th century was mainly rebuilt, contains 153 sittings; and a public school, with accommodation for 115 children, has an average attendance of 100, and a grant of over £106. There is also a combination school at **Craig Binning**, which, with accommodation for 42 children, has an average attendance of 42, and a grant of £32, 8s. Pop. (1801) 303, (1831) 299, (1861) 309, (1871) 329, (1881) 278, (1891) 506.—*Ord. Surv.*, sh. 32, 1857.

Echline. See **DALMENY**.

Echt, a village and a parish of **SE Aberdeenshire**. The village, **Kirkton** of **Echt**, stands 332 feet above sea-level, 6 miles NNW of **Park** station and 12 W of **Aberdeen**, under which it has a post office. At it are an inn and a branch of the **Town and County Bank**. Cattle and horse fairs are held here on the first Monday of **January**, **February**, **April**, **June**, **August**, **September**, and **December**; horse fairs on the first Monday of **March** and the **Monday** in **July** before **St Sairs**; and hiring fairs on the first Monday of **March**, the second Monday of **May**, and the second Tuesday of **November**.

The parish is bounded N by **Cluny**, NE by **Skene**, E by **Skene** and **Peterculter**, S by **Drumoak** and **Banchory-Ternan** in **Kincardineshire**, and W and NW by **Midmar**. Its utmost length, from N to S, is 5 $\frac{3}{8}$ miles; its breadth, from E to W, varies between 3 $\frac{1}{2}$ and 5 $\frac{1}{4}$ miles; and its area is 12,003 $\frac{3}{8}$ acres, of which 55 $\frac{5}{8}$ are water. **Kinnernie Burn** runs 4 $\frac{3}{8}$ miles east-by-southward to **Loch Skene**, along all the northern and north-eastern border; **Loch SKENE** (7 × 5 furl.) itself and **Leuchar Burn**, issuing from it, form part of the eastern boundary; and the **Burn of Echt**, coming in from **Midmar**, runs across the south-western district to **Gormack Burn**, which traces part of the southern boundary. In the furthest E the surface declines to 252 feet above sea-level along **Leuchar Burn**, along **Gormack Burn** to 190, and rises thence to 478 at **Knockquharn**, 410 at **Dunecht**, 800 at conical **Barmekin Hill**, 1179 at **Meikle Tap**, and 1291 at **Greyamore**, the two last being summits of the **Hill of FARE**. The **Howe** of **Echt** is a valley along the course of the **Burn of Echt**, overhung on the SW by the **Hill of Fare**, and has a very mild and salubrious climate. The principal rocks are reddish granite and gneiss; and the soil is in some parts mossy, in others is light and sandy, and on the best lands is chiefly a light loam incumbent on clay. About 8000 acres are in cultivation; fully 3000 are under wood (nearly all of it planted during the present century); and the rest of the land is pastoral or waste. Cairns and ancient **Caledonian** standing stones make up the antiquities, with the celebrated fortress on the **Barmekin**, which has been separately noticed, as likewise has the battle of **Corrichie**. **DUNECHT** is the only mansion, and the **Earl of Crawford** is much the largest proprietor. **Echt** is in the presbytery of **Kin-**

cardine O'Neil and synod of Aberdeen; the living is worth £194. The parish church, at the village, was built in 1804, and contains 600 sittings; a Free church stands $\frac{1}{2}$ mile to the E. Three public schools—Cullerley, Kirkton, and Waterton—with respective accommodation for 70, 207, and 102 children, had (1891) an average attendance of 37, 128, and 47, and grants of £28, 10s., £133, 12s. 6d., and £40, 9s. Pop. (1801) 972, (1831) 1030, (1861) 1287, (1871) 1259, (1881) 1297, (1891) 1207.—*Ord. Sur.*, sh. 76, 1874.

Eck, a long narrow loch of singular beauty in Strachur and Dunoon parishes, Cowal, Argyllshire. Lying 67 feet above sea-level, it extends $6\frac{1}{2}$ miles from N by W to S by E; off Whistlefield inn has a maximum width of 3 furlongs; and receives the Cur at its head, whilst sending off the Eachaig at its foot. The western shore is flanked by Ben Bheag (2029 feet), Ben More (2433), and Clach Ben (2109); its eastern, by Ben Dubhain (2090), Cruach a Bhuic (2084), and Ben Ruadh (2175); and the latter takes up the road from Dunoon and Holy Loch to Strachur and St Catherine's ferry on Loch Fyne. A steamboat, launched on its waters so long ago as 1830, was shortly discontinued; but now once more, since 1877, the yacht-like screw *Fairy Queen* plies backwards and forwards in connection with the circular Loch Eck route to Inverary. The loch contains abundance of salmon-trout, the 'gwyniad' or fresh-water herring, and a remarkably translucent fish, 4 or 5 inches long, provincially called the 'goldie.' A round hillock, near its head, bears the name of Tom-a-Chorachasich ('the hill of Chorachasich'), and is traditionally said to mark the grave of a gigantic Scandinavian prince, who here was slain in battle with the natives.—*Ord. Sur.*, shs. 37, 29, 1876-73.

Eckford, a village and a parish of lower Teviotdale, Roxburghshire. The village stands, 200 feet above sea-level, near the right bank of the Teviot, $1\frac{1}{2}$ mile SE of Kirkbank station, $6\frac{1}{2}$ miles NE of Jedburgh, and $5\frac{1}{2}$ miles S by W of Kelso, under which it has a post office; contains the parochial church and a public school; and suffered severely in the times of the Border warfare.

The parish, containing also the hamlets of **KIRK-BANK**, **CESSFORD**, and **CAVERTON**, is bounded NW by Roxburgh, N by Kelso and Sprouston, E by Linton and Morebattle, SE by Hounam, S and SW by Jedburgh, and W by Crailing. Its greatest length, from N by E to S by W, is $6\frac{1}{2}$ miles; its utmost breadth, from E to W, is $4\frac{1}{2}$ miles; and its area is $10,097\frac{1}{2}$ acres, of which $99\frac{1}{2}$ are water. The **TEVIOT**, entering from Crailing, winds $2\frac{1}{2}$ miles northward through the western interior; and its affluent **KALE WATER**, in many 'a loop and link,' runs $4\frac{1}{2}$ miles west-north-westward, nearly through the centre of the parish. To the S of the village is a small loch (2 by $\frac{3}{4}$ furl.), containing tench, perch, trout, and splendid eels. The surface sinks in the NW along the Teviot to 180 feet above sea-level, thence rising southward and eastward to 260 near Kirkbank station, 606 at Bowmont Forest, 481 at Caverton Hill, 651 at Wooden Hill, 754 at Bank Hill, and 800 in the furthest S—heights that command extensive views of the beautiful country around. Trap and sandstone are the predominant rocks, and have been worked in several quarries. The soil, in the low grounds in the W, is a lightish mould; on the higher grounds towards the S, is clayey; and elsewhere is extremely various, sometimes even on the same farm, but generally fertile. About three-fourths of the entire area are in cultivation; 800 acres are under wood; and the rest of the land is pastoral or waste. The **Kale** is here spanned by two stone bridges; the Teviot by a suspension-bridge, 180 feet long and 16 wide. The ruins of **CESSFORD Castle** are the chief antiquity; but old peel-houses stood at Eckford, Ormiston, Wooden Hill, and the Moss; whilst several stone coffins, a Roman urn, and a Roman coin have been found. Haughhead estate belonged, in the reign of Charles II., to that zealous Covenanter, Hobbie or Henry Hall, and was the place where Richard Cameron received his licence to preach the gospel. A deep ravine in the eastern part of the course of Kale Water was the

scene of frequent assemblies of the persecuted for worship; and several artificial caves, a little farther down, were used by them as retreats from danger. Sir William Bennet, the intimate friend of the poets Thomson and Ramsay, was born at Marlefield, and spent the greater part of his life in the parish. By some he has been deemed the prototype of Ramsay's 'Sir William Worthy'; and a sequestered spot, within a short distance of Marlefield, traversed by a runnel flowing to the Kale, has been falsely claimed for the genuine 'HABBIE'S HOWE.' There is one saw-mill in the parish, at Kalemouth. **KIRK-BANK** is the only mansion; and most of the property is divided between the Dukes of Buccleuch and Roxburgh. Eckford is in the presbytery of Jedburgh and synod of Merse and Teviotdale; the living is worth £289. The church, erected in 1662, retains its old iron joughs, and contains 300 sittings. Two public schools, Caverton Mill and Eckford, with respective accommodation for 93 and 100 children, had (1891) an average attendance of 50 and 70, and grants of £44, 3s. 6d. and £71, 1s. 6d. Pop. (1801) 973, (1831) 1148, (1861) 957, (1871) 931, (1881) 912, (1891) 757.—*Ord. Sur.*, shs. 25, 17, 1865-67.

Eckfordmoss, a hamlet in the parish of Eckford, Roxburghshire.

Eday, an island and a parish in the North Isles district of Orkney. The island, at its southern extremity, lies $3\frac{1}{2}$ miles N by E of Shapinshay, $4\frac{1}{2}$ WNW of Stronsay, 6 E of Rousay, and $13\frac{1}{2}$ NNE of Kirkwall; and extends $7\frac{1}{2}$ miles in a direction nearly due N, to within $1\frac{1}{2}$ mile W of Sanday, and $2\frac{1}{2}$ miles E by S of Westray. It contracts, in the form of an isthmus at the middle, from an extreme width of 3 miles in the S and of 2 in the N; forms the headlands of Warness in the extreme S, Venness in the SE, Fersness at the north-western extremity of its southern division, and Red Head, a high promontory of red granite, in the extreme N; and has two excellent harbours, Fersness Bay, immediately N of Fersness Head, and Calf Sound, a narrow strait dividing it in the extreme NE from Calf Island. The interior, which contains two small fresh-water lakes, rises to 248 feet at Vinquoy Hill in the N, and to 333 at Ward Hill in the S; abounds in an excellent kind of sandstone, which is quarried, and has been much used for building in Kirkwall, and even exported to London; comprises some fertile land to the E and S, with soils variously of sand, gravel, loam, and clay, but is mostly a deep heath-covered peat moss, a plentiful store of fuel for the northern Orkneys. By the trustees of the late Mr Samuel Laing the estate of Carrick, already noticed, was sold to the late Robert James Hebden, Esq., who introduced sheep-farming on a large scale into Eday with much success, his flock being composed of Cheviots, which thrive well on the island. He further improved a large extent of land around his residence in the NE part of the island, and built a commodious farm-steading, with water-driven machinery. His son and successor, Harry Carwardine Hebden, Esq. (b. 1841; suc. 1877), holds 7500 acres. The antiquities of Eday comprise a number of tumuli, remains of several Picts' houses, and an ancient standing stone 16 feet in height. There is a post office of Eday under Kirkwall, with money order and savings bank departments; a small inn stands at Calf Sound; and two public schools, North and South Eday, with respective accommodation for 90 and 90 children, had (1891) an average attendance of 36 and 36, and grants of £56, 17s. 6d. and £48, 14s. Pop. (1861) 897, (1871) 822, (1881) 730, (1891) 647.

The parish comprehends also the island of Pharay and the Holm of Pharay, protecting the entrance of Fersness Bay; the islet of Red Holm, lying to the N of Pharay; the Calf of Eday island, flanking the outer side of Calf Sound; and the islets of Little Green Holm and Muckle Green Holm, lying to the SW of Eday—all, except Pharay, uninhabited and pastoral. For civil purposes it is united to STRONSAY. There are in it an Established church (1816), raised to *quoad sacra* parochial status in the year 1882 (stipend £135); a U.P. church (1829); and a Baptist chapel (1881).

Valuation (1891) £1697, 19s. 2d. Pop. (1801) 718, (1831) 961, (1861) 979, (1871) 905, (1881) 802, (1891) 705.

Edderton, a parish of NE Ross-shire, containing **BALBLAIR** distillery and Edderton station on the Highland railway near the S shore of Dornoch Firth, 5½ miles WNW of Tain, and there having a post and railway telegraph office. It is bounded N by Dornoch Firth, E by Tain, SE by Logie-Easter, S by Kilmuir-Easter and Rosskeen, and W by Kincardine. Its utmost length, from E to W, is 8¼ miles; and its breadth, from N to S, varies between 4½ and 5½ miles. The shore-line, closely followed for 8½ miles by the Highland railway, is everywhere sandy, except where Struie Hill descends to the water's edge, and there it is fringed with rocks. Cambuscurrie Bay, where a Danish fleet is said to have once cast anchor, is now not more than a fathom deep at high water; but Ardmore has a tolerable harbour. Four rivulets—Edderton Burn, Allt Muidh a Bhlair, Easter Fearn Burn, and Wester Fearn Burn—drain the interior to the firth, and, though of small volume in dry weather, are easily swollen by heavy rains, and then are very impetuous. To the W lies triangular Loch Muidh a Bhlair (2¼ × 1¾ furl.). From the low narrow terrace that marks the old sea-margin of the firth, the surface rises inland to 1000 feet at Edderton Hill, 1116 at Cnoc an t-Sabhail, 794 at Cnoc Al nau Gamhainn, 1082 and 1218 at Struie Hill, 1274 at Cnoc an Liath-bhaid, 1566 at Beinn Clach an Fheadain, 1792 at Cnoc Muidh a' Bhlair, 1763 at Beinn nan Oighreagan, 682 at Cnoc Bad-a-bhacaidh, 728 at Carr Dubh, and 1845 at Cnoc Leathado na Siorramachd, the first and last of which summits mark the eastern and western limits of the parish. The leading formation is Old Red sandstone, mixed a good deal with granite, gneiss, and schistose limestone. The soil along the coast is very light, and mostly rests on a sandy bottom; inland it may be said to range in a regular series upward of gravel, deep alluvial loam, poor sand, and a mixture of gravel, moss, and clay. **FEARN** Abbey, rebuilt in 1338 within the parish to which it now gives name, was originally founded about 1227 in the western extremity of Edderton, and has bequeathed its name to several localities. Scandinavian round towers of the kind called 'duns,' that formerly were numerous on the hills, have all been mainly or entirely destroyed; but two sculptured stones stand near the old church, the one in the graveyard, the other behind the old school-house. (See **CARRYBLAIR**.) Edderton is in the presbytery of Tain and synod of Ross; the living is worth about £280. The present parish church, erected in 1842, is a handsome edifice, containing 700 sittings. The old parish church of 1743 was soon after the Disruption taken possession of by the adherents of the Free Church. A public school, with accommodation for 160 children, had (1891) an average attendance of 73, and a grant of £85, 6s. 6d.; and there is Side School at Easter Fearn. Pop. (1801) 899, (1831) 1023, (1861) 836, (1871) 860, (1881) 789, (1891) 642.—*Ord. Sur.*, shs. 93, 94, 1881-78.

Eddleston ('Eadulf's town'), a village and a parish of N Peeblesshire. A neat little place, founded about 1785, the village stands, 680 feet above sea-level, on the left bank of Eddleston Water, a bridge over which leads to Eddleston station on the North British railway, 4½ miles N by W of Peebles and 23¾ S of Edinburgh; at it are a post office, with railway telegraph, the parish church, and a public school.

The parish is bounded N and NE by Penicuik and Temple in Midlothian, E by Innerleithen, S by Peebles, SW by Lyne, and W by Newlands. In outline resembling a triangle, with northward apex, it has an utmost length from NNE to SSW of 9¾ miles, an utmost width from E to W of 5½ miles, and an area of 18,590¼ acres, of which 100½ are water. Eddleston Water, rising in the extreme N, close to the Edinburghshire border, at 880 feet above sea-level, flows 6½ miles southward through this parish, next 2¾ miles through that of Peebles, till, after a total descent of 330 feet, it falls into the Tweed at Peebles town. It is joined in Eddleston

by thirteen tributary burns, on one of which is the picturesque waterfall called **COWEY'S LNIN**, and is a capital trout-stream. Perch, pike, and eels abound in pretty Portmore Loch (now an Edinburgh reservoir), which, lying 2¼ miles NNE of the village, sends off Loch Burn northward to the South Esk river, so that the drainage belongs partly to the Forth, though mainly to the Tweed. The surface presents an assemblage of big, green, rounded hills—from S to N attaining, to the left or E of Eddleston Water, 1204 feet near Windylaws, 1763 at *Whiteside Edge, 1928 at *Cardon Law, 2040 at **DUNDREICH**, 2004 at *Jeffries Corse, 1178 at Northshield Rings, 1024 near Westloch, and 926 at Scarce Rig; to the right or W, 1020 near Cringletie, 1561 at Craillie Hill, 1327 at Kilrubie Hill, 1521 at the Cloich Hills, and 1062 near Whiterig, where asterisks mark those summits that culminate on the confines of the parish. The rocks belong chiefly to the Lower Silurian formation; the soils are of varying quality. Less than a fifth of the entire area is in tillage, one-twentieth is under wood, and fully seven-tenths are pastoral or waste. Of five prehistoric hill-forts, the best preserved are Northshield (450 × 370 feet) and Milkiston (550 × 450), the former consisting of three concentric oval walls and ditches, the latter of four. The mansions are Portmore, Darnhall, and Cringletie, all separately noticed. Eddleston is in the presbytery of Peebles and synod of Lothian and Tweeddale; the living is worth £321. The church, built in 1829, contains 420 sittings; and the school, with accommodation for 124 children, had (1891) an average attendance of 81, and a grant of £90, 10s. 6d. Pop. (1861) 758, (1871) 700, (1881) 711, (1891) 571.—*Ord. Sur.*, sh. 24, 1864.

Eddlewood, a colliery village that has recently sprung up near Earnock in Hamilton parish, Lanarkshire. It possesses a reading room and recreation hall (1892).

Eddrachalda or **Calda**. See **ASSYNT**.

Eddrachillis (Gael. *eadar-de-chaolas*, 'between two firths'), a coast parish in the W of Sutherland, containing the village of Scourie, at the head of Scourie Bay, 21 miles S by W of Cape Wrath, 29 NNE of Loch Inver (*viâ* Kylesku Ferry), and 43¼ NW of Lairg, under which it has a post office, with money order and savings' bank departments. Till 1724 forming one parish with Durness and Tongue as part of 'Lord Reay's country,' it now is bounded NE and E by Durness, SE by Lairg and Creich, S and SW by Assynt, and W by the Atlantic Ocean. Its utmost length, from N by W to S by E, is 28¾ miles; its utmost breadth from E to W, exclusive of islands, is 15¼ miles; and its area is 226 square miles, or 144,617 acres, of which 1059½ are foreshore and 7985½ water. Of thirty-five islands and islets belonging to the parish, and lying at distances of from a few yards to 2½ miles from the mainland, only **HANDA** challenges special attention. **KYLESKU** projects far inland from the sea, along the boundary with Assynt, and forks at its head into Lochs Glendhn and Glencoul. **LAXFORD** and **INCHARD** are only less considerable sea-lochs; and, save to the N, the entire coast is niched and vandyked by a multitude of lesser inlets. The district between Lochs Laxford and Inchard, and eastward thence to the boundary with Durness, is called in Gaelic *Ceathramh-garbh*, or the 'rough territory;' whilst that to the N of Loch Inchard bears the name of *Ashir*, or 'cultivable country.' The coast, which rises steeply in the N to a height of 600 feet above sea-level, as seen from the sea at a distance of some miles, bears a striking resemblance to many parts of the coasts of Norway; both seaboard and interior are reputed to be wilder and more rugged than any other region of similar extent in Scotland; and the entire surface, with rare exception, is a grand assemblage of crags, hills, glens, ravines, defiles, lochs, tarns, torrents, and towering mountains. The glens and ravines, in many instances, are so narrow, tortuous, rugged, and precipitously flanked as to be dangerous to strangers unattended by a guide. Of lakes there is a veritable net-work, among the larger being Sandwood Loch (9 × 3 furl.), Loch na Claise Carnaich (7¾ × 4 furl.; 490 feet above sea-level), Loch Slack (2½ miles × 1 mile;

118 feet), Loch More (4 miles \times 3 furl. ; 127 feet), and Loch an Leathaid Bhuain (1½ mile \times 3½ furl. ; 690 feet). These generally afford good sport to anglers, as likewise do the river Laxford and numerous lesser streams. The mountains are variously isolated, clustered, or in ranges, and, with a great diversity of form and altitude, exhibit a high degree of grandeur and picturesqueness, including, from N to S, *Creag Riabhach (1592 feet), Ben Dearg Mhor (1527), An Socach (1165), *FOINAVEN (2952), Sail Mhor (2580), Ben Anskaird (1265), BEN STACK (2367), Meallan Liath (2625), Ben Strome (1374), *BEN HEE (2864), Ben Leoid (2597), and *Ben Uidhe (2834), where asterisks mark those summits that culminate on the borders of the parish. The rocks comprise hornblende slate, red sandstone, and limestone, but mainly are either gneissic or crystalline. Very little land is in tillage, and even that little is cultivated solely by manual labour, or with very little aid from the plough. The arable soil on the coast and in the valleys, all the way between Kylesku and Loch Inchard, is principally a mixture of gravel and moss; but in Ashir district is dark loam intermixed with sand. A vast proportion of the parish is included in the Duke of Sutherland's deer forest, and a very large area is devoted to sheep walks. Fishing is actively prosecuted, in many instances by the crofters. From remote ancestors of the Duke of Sutherland the entire territory was conveyed in the early part of the 13th century to the Morays of Culbin, and, passing by marriage about the year 1440 to the Kinnairds of Kinnaird, afterwards went to the Macleods. About 1550 it was seized by a branch of the Mackays, who took the designation of Mackays of Scourie; and in 1829 it was repurchased by the Sutherland family, and has since undergone great improvement in its dwellings, roads, and general economy. Some ancient Caledonian standing stones are at Badnabay; and remains of Scandinavian forts are at Kylestrome and Scourie.—The parish is in the presbytery of Tongue and synod of Sutherland and Caithness, and is ecclesiastically divided into Eddrachillis proper and KINLOCHBERVIE, the former a living worth £173. The church, at the head of Badcall Bay, 2½ miles SSE of Scourie, contains 275 sittings. There are also Free churches of Eddrachillis and Kinlochbervie; and three public schools—Badcall, Oldshore, and Scourie—with respective accommodation for 80, 80, and 55 children, had (1891) an average attendance of 50, 56, and 33, and grants of £61, 14s., £47, 7s. 6d., and £68, 7s. Pop. (1801) 1253, (1831) 1965, (1861) 1641, (1871) 1530, (1881) 1523, (1891) 1409, of whom 511 were in Scourie registration district and 898 in that of Kinlochbervie.—*Ord. Sur.*, shs. 107, 108, 113, 1880-82.

Eden, an estate, with a mansion, in King-Edward parish, Aberdeenshire. The mansion, standing on the right bank of the Deveron, 4 miles SSE of Banff, and 2½ NW by N of King-Edward station, is a modern edifice, with beautiful grounds, and commands an extensive view of the Deveron's valley. It was the birth-place in 1829 of the Right Hon. Sir Mountstuart Elphinstone Grant Duff, G.C.S.I., who represented the Elgin burghs from 1857 to 1881, and was Governor of Madras from 1881 to 1886. An old castle, ¾ mile S of Eden House, was once a place of considerable strength, but now is a shapeless ruin.

Eden, a river of northern and north-eastern Fife, formed by the confluence of Carmore and Beattie Burns at Burnside, on the Kinross-shire border, 3¼ miles NE of Milnathort, and 3¼ WSW of Strathmiglo. Thence it runs through the parish of Strathmiglo; between the parishes of Auchtermuchty, Collesie, and Monimail on the left, of Falkland, Kettle, and Cults on the right; through the parish and past the town of Cupar; and between the parishes of Dairsie and Leuchars on the left, of Kemback and St Andrews on the right—till, at St Andrews Bay, it falls into the German Ocean. Its prevailing direction is first ENE, next E, next ESE, next and mainly, or from about the middle of its contact with Collesie, ENE. Its length of course, measured along the windings, is 29½ miles, viz., 17¼ from

Burnside to Cupar Bridge, and 11¼ thence to Eden Mouth. Its tributaries are numerous, but all small. Its basin, for the most part, is a fine flat valley, of great fertility and highly cultivated, more beautiful than bold in natural features, and bearing the names of Stratheden and the Howe of Fife. Large portions of land on its banks were formerly devastated by its floods, but are now protected by canal cuts and embankments. From Burnside the total fall is only 300 feet; and the current throughout the greater part of its course, particularly below the town of Cupar, is very slow, yielding scanty water-power, but skilfully husbanded for driving mills. In spite of these mills, the Eden is a very fair trouting stream, but the ascent of salmon is hindered by various dams. Its lowest reaches, to the extent of 6 miles, are estuary, mostly left bare at the recess of the tide; and have, midway, extensive beds of cockles and mussels. The river might, at no great expense, be rendered navigable to Cupar.—*Ord. Sur.*, shs. 40, 48, 49, 1865-68.

Edendon Water, a mountain rivulet in Blair Athole parish, Perthshire, rising, at an altitude of 2700 feet, among the central Grampians, close to the Inverness-shire border, and 3¼ miles SSE of Dalwhinnie Hotel. Thence it runs 10 miles partly eastward, but chiefly southward, and falls into the Garry ½ mile WNW of Dalnacardoch, after a total descent of 600 feet.—*Ord. Sur.*, shs. 64, 55, 1874-69.

Edenham. See EDNAM.

Edenkillie. See EDINKILLIE.

Edenshead, **Edentown**, or **Gateside**, a village in Strathmiglo parish, Fife, near the left bank of the Eden, 2 miles WSW of Strathmiglo town. It includes the hamlet of Edensbank to the E; adjoins Edenshead House on the S; and has a post office (Gateside), a station (Gateside) on the Fife and Kinross section of the North British, and a U.P. church.

Edenstown, a neat modern village in Collesie parish, Fife, 1¼ mile WNW of Ladybank.

Eden Water, a stream of Berwick and Roxburgh shires, rising in Legerwood parish, 3¼ miles ESE of Lauder, at an altitude of 860 feet. Thence it winds 23¼ miles eastward, southward, and eastward again, through or along the border of Legerwood, Westruther, Gordon, Hume, Earlston, Nenthorn, Smailholm, Stichill, Kelseo, and Ednam, till, after a total descent of 760 feet, it falls into the Tweed, at a point 1¾ mile E of Ednam village and 3½ miles NE of Kelseo town. It is a first-rate trout-stream, especially above Stichill Linn; and the lower part of its course is very beautiful, through rich and finely-wooded pastoral scenery.—*Ord. Sur.*, sh. 25, 1865.

Edenwood, a mansion in Ceres parish, Fife, on the right bank of the Eden, 2 miles SSW of Cupar. Its late owner, Sir George Campbell, K.C.S.I. (1825-92), was Lieut.-Governor of Bengal from 1871 to 1874, and represented the Kirkcaldy burghs from 1875 till his death.

Ederdown. See EDDERTON.

Ederham. See EDBROM.

Ederline or **Aligan**, a pretty loch on the western border of Glassary parish, Argyllshire, with Ford village near its foot. Lying 122 feet above sea-level, it has an utmost length and breadth of 4 and 2½ furlongs; contains a few trout and some big pike, running up to 30 lbs.; and sends off a stream 7 furlongs northward to the head of Loch Awe.—*Ord. Sur.*, sh. 37, 1876.

Edgar. See PORT EDGAR.

Edgebucklin Brae. See PINKIE.

Edgehead, a hamlet in Liberton parish, Edinburghshire, 5 furlongs SSW of Gilmerton.

Edgehead, a hamlet in Cranston parish, Edinburghshire, 3 miles ESE of Dalkeith.

Edgerston, a *quoad sacra* parish on the southern border of Roxburghshire, 7¼ miles SSE of its post-town and station, Jedburgh. Comprising the detached sections of Jedburgh parish, with portions of Oxnam and Southdean (all as existing previous to the re-adjustment of these parishes by the Boundary Commissioners in 1891), it is in the presbytery of Jedburgh and synod of Merse and Teviotdale; the minister's stipend

is £100. The church was built in 1838, and contains 200 sittings. Edgerston House stands near the left bank of an affluent of Jed Water. A public school, with accommodation for 78 children, had (1891) an average attendance of 61, and a grant of £64, 2s. 6d. Pop. (1881) 358, (1891) 289.—*Ord. Sur.*, sh. 17, 1864.

Edinample, an estate, with a mansion, in Balquhider parish, Perthshire. The mansion, standing in the mouth of Glen Ample, on the southern side of the upper part of Loch Earn, 2 miles NE of Lochearnhead station, is an ancient castellated edifice; and has romantic wooded grounds, traversed by Ample Water, which forms, in front of the mansion, a picturesque double waterfall.

Edinbain, a hamlet in Duirinish parish, Isle of Skye, Inverness-shire, at the head of Loch Grishinish, 10½ miles E of Dunvegan, and 13½ NW of Portree, under which it has a post office, with money order, savings bank, and telegraph departments. At it are a comfortable little inn, a merchant's shop, a smithy, a mill, a public school, a shooting-lodge, and a slated, stone-built hospital, founded and amply endowed by the late Mr Macleod of Grishinish.

Edinbellie. See BALFRON.

Edinburgh, the metropolis of Scotland and the county town of Midlothian, is situated, since the inclusion of Portobello, on the southern shore of the Firth of Forth. The observatory on the Calton Hill is in lat. 55° 57' 23" N and long. 3° 10' 46" W, and the new observatory at Blackford Hill in lat. 55° 55' 28" N and long. 3° 11' 4" W. Edinburgh is SSW of Aberdeen, S by W of Dundee, S by E of Perth, E by N of Glasgow, NE of Ayr, and N by E of Dumfries. Its distance as the crow flies is 188 miles from John o' Groat's House and 337 from London. By road it is 35½ miles from Stirling, 42 from Dundee, 42½ from Glasgow, 44 from Perth, 48 from Hawick, 57 from Berwick-on-Tweed, 77 from Dumfries, 100 from Carlisle, 111 from Aberdeen, 159 from Inverness, and 389 from London; while by rail the distance is 36 miles from Stirling, 47½ from Glasgow, 53 from Hawick, 57½ from Berwick-on-Tweed, 77 from Ayr *via* Muirkirk, and 84 *via* Glasgow City Union, 89½ from Dumfries, 101 from Carlisle, 135½ from Aberdeen (by Stirling and Perth); 47½ miles from Perth by the Forth Bridge; 59½ from Dundee and 130½ from Aberdeen by the Forth and Tay Bridges; 163 from Stranraer; 191½ from Inverness; 392½ from London, by the Great Northern and East Coast route, 400 by the North Western, and 405½ by the Midland.

Site.—The Scottish capital—'one of the few great cities of the empire that possesses natural features, and which, were the buildings away, would, while it ceased to be town, become very picturesque country'—is built on a series of roughly parallel ridges and hollows that run very nearly E and W. From the shore of the Firth of Forth the ground slopes irregularly upward till at the line of George Street it reaches a height of about 225 feet above sea-level, falls again thence to Princes Street Gardens (about 150 feet, the eastern end of the hollow being overtopped by the Calton Hill, 349 feet), rises thence to the ridge extending from the Castle (438 feet at the top of the Castle Rock, 359 at the W end of the Esplanade, 300 at the W end of the Lawnmarket) to Holyrood (119 feet); sinks again to the hollow of the Grassmarket and Cowgate (220 feet), rises to the ridge along Lauriston (283 feet), falls to the Meadows (241 feet), rises again to the villa quarter of the Grange (about 300 feet), falls to the hollow of the Jordan Burn (Morning-side, 250; Powburn, 184), and thence rises again to the Hills of Blackford (about 500 feet) and Braid (698 feet), between which is the hollow of the Braid Burn (about 200 feet). Overlooking the whole of the eastern and southern part of the city is ARTHUR'S SEAT. The origin of these undulations, which have so much to do with the picturesqueness of Edinburgh, is discussed at length in the section dealing with the geology, where also are indicated the various sheets of water that, at times more or less recent, occupied portions of the different hollows.

Appearance.—The peculiar nature of the site of Edinburgh, and its position with reference to the neighbouring Firth of Forth, and to the outliers of the Pentland Hills on the S and SW, has led to a comparison of the city with Athens. Stuart, one of the authors of *The Antiquities of Athens*, was the first to remark and describe the similarity; and he has been followed by Dr Clarke, Mr H. W. Williams (Grecian Williams), and many other descriptive writers well qualified to form a correct judgment, so that Edinburgh has, by almost general consent, been called 'Modern Athens,' and the 'Athens of the North.' 'The distant view of Athens from the Ægean Sea,' says Mr Williams, 'is extremely like that of Edinburgh from the Firth of Forth, though certainly the latter is considerably superior.' 'There are,' he adds, 'several points of view on the elevated grounds near Edinburgh, from which the resemblance between the two cities is complete. From Torphin in particular, one of the low heads of the Pentlands immediately above the village of Colinton, the landscape is exactly that of the vicinity of Athens as viewed from the bottom of Mount Anchesmus. Close upon the right, Brilessus is represented by the mound of Braid; before, in the abrupt and dark mass of the Castle, rises the Acropolis; the hill Lycabettus, joined to that of the Areopagus, appears in the Calton; in the Firth of Forth we behold the Ægean Sea—in Inchkeith, Ægina; and the hills of Peloponnesus are precisely those of the opposite coast of Fife. Nor is the resemblance less striking in the general characteristics of the scene; for, although we cannot exclaim, "These are the groves of the Academy, and that the Sacred Way!" yet, as on the Attic shore, we certainly here behold—

"A country rich and gay
Broke into hills, with balmy odours crowned,
And joyous vales, mountains, and streams,
And clustering towns and monuments of fame,
And scenes of glorious deeds, in little bounds!"

It is indeed most remarkable and astonishing that two cities, placed at such a distance from each other, and so different in every political and artificial circumstance, should naturally be so alike.' When comparing the two cities as to their interior structure, however, Mr Williams sees a considerable difference between them, and pronounces Edinburgh to be the superior. He says, 'The epithets Northern Athens and Modern Athens have been so frequently applied to Edinburgh that the mind unconsciously yields to the illusion awakened by these terms, and imagines that the resemblance between these cities must extend from the natural localities and the public buildings to the streets and private edifices. The very reverse of this is the case; for, setting aside her public structures, Athens, even in her best days, could not have coped with the capital of Scotland.'

Many other picturesque views of the city may be obtained from various points within and around, the best known being those from the Castle, the Calton Hill, the top of the Scott Monument, Corstorphine Hill, the high ground to the NW of Fettes College, the Arboretum, Warriston Cemetery, the Radical Road beneath the Salisbury Crags, the top of Arthur's Seat, the high ground at Liberton, the Blackford, Braid, and Craiglockhart Hills. Scott, with whom the view from the Salisbury Crags—at a time when it commanded nearly the whole of the city as then existing—was always a favourite one, has thus described it:—'The prospect in its general outline commands a close-built, high-piled city, stretching itself out in a form which, to a romantic imagination, may be supposed to represent that of a dragon; now a noble arm of the sea, with its rocks, isles, distant shores, and boundary of mountains; and now a fair and fertile champaign country, varied with hill, dale, and rock, and skirted by the picturesque ridge of the Pentland mountains; but as the path gently circles around the base of the cliffs, the prospect, composed as it is of these enchanting and sublime objects, changes at every step, and presents them blended with, or divided from, each other in every possible variety which can gratify the eye and the imagination.' The view from the top of Arthur's

Seat is much the same, only more sweeping. Of the views from the S, which are all alike excellent, probably those from Liberton and the Braids are the best; though the nearer one from Blackford has, by Scott's description, been rendered much more famous. 'Fairer scene' Lord Marmion 'ne'er surveyed.'

'The wandering eye could o'er it go,
And mark the distant city glow
With gloomy splendour red;
For on the smoke-wreaths, huge and slow,
That round her sable turrets flow,
The morning beams were shed,
And tinged them with a lustre proud,
Like that which streaks a thunder-cloud.
Such dusky grandeur clothed the height,
Where the huge castle holds its state,
And all the steep slope down,
Whose ridgy back heaves to the sky,
Piled deep and massy, close and high,
Mine own romantic town!
But northward far, with purer blaze,
On Ochil mountains fell the rays,
And as each heathy top they kissed,
It gleamed a purple amethyst.
Yonder the shores of Fife you saw;
Here Preston Bay and Berwick Law:
And, broad between them rolled,
The gallant Firth the eye might note,
Whose islands on its bosom float,
Like emeralds chased in gold.'

Sir David Wilkie, looking with the artist's eye and speaking with voice of authority, was no less enthusiastic. 'What the tour of Europe was necessary to see elsewhere,' he says, 'I now find congregated in this one city. Here are alike the beauties of Prague and of Salzburg, here are the romantic sites of Orvieto and Tivoli, and here is all the magnificence of the admired bays of Genoa and Naples. Here, indeed, to the poetic fancy, may be found realized the Roman Capitol and the Grecian Acropolis.' And, says Mr Hallam—

'Even thus, methinks, a city reared should he,
Yea, an imperial city, that might hold
Five times an hundred noble towns in fee,
And, either with the might of Babel old
Or the rich Roman pomp of Empery,
Might stand compare, highest in arts enrolled,
Highest in arms, brave tenement for the free,
Who never crouch to thrones, or sin for gold.
Thus should her towers be raised, with vicinage
Of clear bold hills, that curve her very streets,
As if to vindicate, 'mid choicest seats
Of art, ahiding Nature's majesty,—
And the broad sea beyond, in calm or rage,
Chainless alike, and teaching liberty.'

From all the higher points of vantage, also, the views of the surrounding landscape are full of charm, and the monotony of long lines of buildings is relieved by glimpses of hill or of sea, as the eye wanders over a wide and varied range of country extending from the Lammermuirs on the SE to the Grampians on the NW, and from the North Sea on the E to the mountains about the sources of the Forth on the W; while nearer hand is the blue expanse of the Firth, with the hills of Fife beyond, and, all around on the other three sides, the fertile and well-wooded undulations of the Lothians. Nor is the surrounding landscape lost even in the very centre of the town, for from points in the streets brief but pleasant glimpses of it may be caught. Arthur's Seat in one direction, and the Firth of Forth, with Fife beyond, in another, suddenly make their appearance as we turn some corner—'a perspective of a mile or more of falling street, and beyond that woods and villas, and a blue arm of the sea, and the hills upon the farther side.' Even into the city itself the country may be said to penetrate, so numerous are the open spaces with grass and shrubs and trees, the freshness and beauty of which are none the less appreciated from their contrast with the buildings or business bustle around. 'The finest view from the interior,' says Alexander Smith, 'is obtained from the corner of St Andrew Street, looking W. Straight before you the Mound crosses the valley, bearing the white Academy buildings; beyond, the Castle lifts, from grassy slopes and billows of summer foliage, its weather-stained towers and fortifications, the Half-Moon battery giving the folds of its standard to the wind. Living in Edinburgh there abides, above all

things, a sense of its beauty. Hill, crag, castle, rock, blue stretch of sea, the picturesque ridge of the Old Town, the squares and terraces of the New—these things, seen once, are not to be forgotten. The quick life of to-day sounding around the relics of antiquity, and overshadowed by the august traditions of a kingdom, makes residence in Edinburgh more impressive than residence in any other British city. What a poem is that Princes Street! The puppets of the busy, many-coloured hour move about on its pavement, while across the ravine Time has piled up the Old Town, ridge on ridge, grey as a rocky coast washed and worn by the foam of centuries; peaked and jagged by gable and roof; windowed from basement to cope; the whole surmounted by St Giles's airy crown. The New is there looking at the Old. Two Times are brought face to face, and are yet separated by a thousand years. Wonderful on winter nights, when the gully is filled with darkness, and out of it rises, against the sombre blue and the frosty stars, that mass and bulwark of gloom, pierced and quivering with innumerable lights. There is nothing in Europe to match that. Could you but roll a river down the valley it would be sublime. Finer still, to place one's self near the Burns Monument and look toward the Castle. It is more astonishing than an Eastern dream. A city rises up before you painted by fire on night. High in air a bridge of light leaps the chasm; a few emerald lamps, like glowworms, are moving silently about in the railway station below; a solitary crimson one is at rest. That ridged and chimneyed bulk of blackness, with splendour bursting out at every pore, is the wonderful Old Town, where Scottish history mainly transacted itself; while, opposite, the modern Princes Street is blazing throughout its length. During the day the Castle looks down upon the city as if out of another world; stern with all its peacefulness, its garniture of trees, its slopes of grass. The rock is dingy enough in colour; but, after a shower, its lichens laugh out greenly in the returning sun, while the rainbow is brightened on the lowering sky beyond. How deep the shadow which the Castle throws at noon over the gardens at its feet where the children play! How grand when giant bulk and towery crown blacken against sunset! Fair, too, the New Town sloping to the sea. From George Street, which crowns the ridge, the eye is led down sweeping streets of stately architecture to the villas and woods that fill the lower ground, and fringe the shore; to the bright azure belt of the Forth with its smoking steamer or its creeping sail; beyond, to the shores of Fife, soft blue, and flecked with fleeting shadows in the keen clear light of spring, dark purple in the summer heat, tarnished gold in the autumn haze; and farther away still, just distinguishable on the paler sky, the crest of some distant peak, carrying the imagination into the illimitable world.'

Geology.—Edinburgh has always been a favourite field for geological investigation. Ever since the days of Hutton, the volcanic rocks which are so well developed on Arthur's Seat, the Calton Hill, and at the Castle, have been the subject of careful study among geologists. The striking features to which these igneous rocks give rise, arrest the attention even of the non-scientific observer. Indeed, few cities present such remarkable facilities for examining the structure and physical relations of ancient volcanic rocks. The literature bearing on the geology of Edinburgh and its environs is rather voluminous. Amongst the various writers on the subject, the names of Hutton, Playfair, Sir James Hall, Hibbert, Jamieson, Hay Cunningham, Edward Forbes, Hugh Miller, Charles M'Laren, Sir Archibald Geikie, R. Chambers, Milne Home, and Judd may be mentioned. Special reference ought to be made to the admirable volume on *The Geology of Fife and the Lothians*, by Charles M'Laren, and to Sir Archibald Geikie's lucid description of the geology of Edinburgh.*

With the exception of Blackford Hill, which is a continuation of the Lower Old Red Sandstone volcanic rocks

* Geological Survey Memoir accompanying Sheet 32 of the one-inch Map.

of the Pentlands, the newer portion of Arthur's Seat, and several isolated veins of igneous rock, the solid rocks which underlie the city of Edinburgh and Leith belong to the lowest divisions of the Carboniferous system. On account of the strata being largely impregnated with lime, they were appropriately named by M'Laren the Calciferous Sandstone Series—a term which is now generally applied to them. They may be arranged in three divisions:—

- | | | |
|-------------------------------|-----------------------|--|
| Calciferous Sandstone Series. | Cementstone Series. | 3. An upper division of white sandstones, black and blue shales, containing nodules of clay ironstone. |
| | | 2. A middle division of interbedded volcanic rocks, consisting of basalts, porphyrites, and tuffs, with intercalated beds of sandstone. |
| | Red Sandstone Series. | 1. A lower division of red and mottled sandstones, red, green, and grey shales and marls, with calcareous nodules and bands merging occasionally into pure limestones. Coarse conglomerates occur at the base of this group. |

The members of the lowest division occupy an irregular area, bounded by the Braid Hills on the S, Arthur's Seat on the E, and the Calton Hill on the N, while the western limit is sharply defined by the great fault extending from Craiglockhart north-eastwards by Merchiston and the Castle Esplanade, to the NW slope of Calton Hill. Within this area the strata are arranged in the form of a low arch, the crest of which runs from Blackford Hill to St Andrew Square. As this anticlinal fold is truncated on the W by the fault just referred to, it is only on the E side of the arch that the complete succession can be traced. The lowest beds are exposed in the neighbourhood of Blackford Hill, where they consist of conglomerates composed of pebbles, chiefly derived from the Old Red Sandstone volcanic rocks. They rest unconformably on these igneous rocks, and are not faulted against them, as has hitherto been supposed. It is important to note that the strata to the W of Blackford Hill occupy a higher horizon than those on the E side. As we pass to the SW this overlap gradually increases till the members of the Upper or Cementstone Series rest directly on the Old Red Sandstone formation. This overlap indicates the gradual submergence of the Pentland ridge in the early part of the Carboniferous period. At the beginning of that period the Pentlands formed a promontory jutting far into the sea in which the red sandstones were deposited, but eventually the ridge was submerged and buried beneath the accumulating sediment of the succeeding groups. Excellent sections of these basement conglomerates were exposed in 1881-82 in the cuttings of the Suburban railway.

Next in order come the sandstones of Craigmillar, and the strata which are exposed in the southern part of the town, consisting of red sandstones with red and green marls. In the districts of Newington, Grange, the Meadows, and Warrender Park, these beds dip to the N at angles varying from 10 to 15 degrees, while to the W of these localities they dip to the NW—thus indicating the dome-shaped arrangement of the strata. Excellent sections were exposed in 1879-81 in connection with the building operations in Warrender Park. They also occur in Gilmore Place with an inclination to the NW, and they reappear at the head of Keir Street with an easterly dip. The anticlinal axis must therefore run northwards between these two points. The same beds are well displayed on the S slope of the Castle Esplanade as seen from Johnston Terrace. In this well-known section, the honeycombed sandstones with red and green marls are brought into conjunction with the plug of basalt on which the Castle stands, by the great fault already referred to. They dip to the E at an angle of from 15 to 20 degrees, but as they approach the fault they become horizontal, and eventually bend over till they conform to the hade of the fault, which is inclined at an angle of 80 degrees to the NW. The SE slope of the plug of basalt is beautifully slickensided. The striae, however, are not

vertical, but are slightly inclined to the NE, showing a faint lateral thrust in that direction, as well as a downthrow to the NW. From the Castle eastwards to Holyrood and the Hunter's Bog there is a continuous easterly dip at an average angle of 15 degrees, where the strata pass conformably below the interbedded volcanic rocks of Arthur's Seat (division 2). Fossils rarely occur in the red sandstones. Fragments of wood have been found in the beds at Craigmillar, which are probably the remains of pine-like *Araucaria*. In the quarry above Salisbury Crag, a small *Estheria Peachii* was found by Mr Grieve. Under St Anthony's Chapel, in a bed crammed with vegetable matter, Mr Bryson found specimens of *Dadoxylon*, and Sir Archibald Geikie obtained fragments of *Poacites* and the remains of *Rhizodus Hibberti*. The beds at that locality lie above the first interbedded lava-flow, now represented by the Long Row, and it is probable, therefore, that they belong to the Cementstone Series.

Towards the close of the deposition of the red sandstones volcanic activity seems to have begun in the neighbourhood of Edinburgh. From certain volcanic orifices streams of lava and showers of ashes were ejected and spread over the sea-floor, which at intervals were commingled with ordinary sediment. The records of this volcanic action are still preserved to us on Arthur's Seat, the Calton Hill, and at Craiglockhart. These interbedded volcanic rocks must be carefully distinguished from the three great intrusive sheets of igneous rock which were injected between the red sandstones forming the western base of Arthur's Seat. On account of their durability these intrusive sheets have more successfully resisted the denuding agencies than the intervening sandstones, and hence they now form the prominent escarpments of St Leonard's, Salisbury Crag, and the Dasses. The first outflow of lava is represented by the compact basalt of the Long Row, which is overlaid by tuffs, volcanic breccias, and ashy sandstones which are well exposed at the Dry Dam. The general character of these volcanic ashes is different from the coarse agglomerate which now forms the higher part of the hill, and which was ejected at a much later date. The tuffs and ashy sandstones are succeeded by basaltic lavas and porphyrites, the latter forming the slopes of the Whinny Hill and Dunsappie. The junction of these rocks with the overlying shales and sandstones (division 3) is not seen on the eastern slope of Arthur's Seat, owing to the covering of superficial deposits. The evidence is supplied, however, by the section on Calton Hill.

The contemporaneous volcanic rocks of Arthur's Seat are truncated on the N side by an E and W fault—an offshoot from the main dislocation trending from Craiglockhart by the Castle to the NW slope of Calton Hill. This branching fault has a downthrow to the N, and by means of it the outcrop of the interbedded volcanic rocks of Arthur's Seat has been shifted about half a mile to the W as far as the Calton Hill. The existence of this fault was clearly proved in the course of draining operations along the Canongate, where a continuous section was exposed of red sandstones and marls, with a few dykes of igneous rock. The succession of the volcanic rocks of Calton Hill closely resembles that of Arthur's Seat. At the base there is a series of basaltic lavas and tuffs which are overlaid by porphyrites forming the higher part of the hill. To the E they are rapidly succeeded by black shales and sandstones (division 3) occurring in the gardens of Royal Terrace, while on the NW slope of the hill they are abruptly cut off by the great fault already described.

The strata of the upper division differ from the red sandstones in lithological character, and particularly in the greater abundance of fossils. Within the present area, the prominent members of the Cementstone Series are the white sandstones of Granton and Craigmillar, and the Wardie shales. Beyond the limits of the Edinburgh district it comprises the well-known oil shales of Midlothian and the Burdiehouse Limestone which has become celebrated for the great abundance of ichthyo-

lites and crustaceans embedded in it. The occurrence of such a thick mass of limestone in the series, however, is quite exceptional, as the calcareous bands are usually found in seams only a few inches thick. It was formerly supposed that the sandstones of Granton and Craighleith occupied a higher horizon than the Wardie shales, but it is evident from recent investigations that they underlie the shales. On the shore, at Granton, the sandstones form an arch the axis of which runs N and S. On the E side of the anticline they dip to the E, and are succeeded by thin bedded sandstones and shales, which eventually pass underneath the Wardie shales. The latter are repeated by gentle undulations eastwards as far as Trinity. The sandstones at Craighleith are evidently the inland prolongations of those on the shore, as the strike of the beds is nearly N and S. In this quarry the beds dip both to the E and SW as if curving round an anticlinal fold. A characteristic feature of the sandstones at both localities is the presence of numerous remains of plants in a fragmentary form, one of the most abundant being *Sphenopteris affinis*. Huge trunks of coniferous trees have also been obtained from these beds. These sandstones make excellent building material, and have been largely quarried for this purpose; indeed the greater part of Edinburgh has been built of this stone.

The Wardie beds consist of black and blue shales, in which are embedded nodules of clay ironstone. The nodules have yielded fish remains, coprolites, and plants. When these bands are traced inland, they become intercalated with bands of sandstone, but the shales form the essential feature of the subdivision. By means of the fault extending from Craiglockhart by the Castle to Calton Hill, the members of the Cementstone Series are brought into conjunction with successive beds of the Red Sandstone division. On the NW slope of the Calton Hill they are thrown against the volcanic series (division 2), while to the NE of that locality the effect of the displacement is to bring different members of the Cementstone Series against each other. It is evident therefore that the fault is decreasing in amount towards the NE. Along the W side of this fault the Wardie shales are generally inclined to the NW. In the neighbourhood of St Andrew Square, however, they form a well-marked anticline, which has already been referred to as the northern prolongation of the arch running southwards to Blackford Hill. In 1865 Mr G. C. Haswell recorded an interesting exposure on the W side of Hanover Street, at the corner of Rose Street, where the strata, consisting of sandstones, shales, and fireclay, form an anticline and syncline within a horizontal distance of about 12 feet. They were lately seen on the E side of Hanover Street, in the course of excavations at Rose Street, having a north-westerly dip at angles varying from 40 to 50 degrees. McLaren noted the occurrence of similar beds at the New Club in Princes Street. Upwards of 100 feet of dark shales dip to the NW at the West Church Manse. They crop out in the cuttings of the Caledonian and Suburban railways, and they are also exposed at the Dean near the Dean Bridge. At these localities they are inclined to the NW, and a similar dip continues to near Coltbridge, which forms the centre of a synclinal fold. From this point westwards we have a gradually descending series towards the Corstorphine Hill and the Craighleith sandstones.

Reference has already been made to the fish remains and plants embedded in the ironstone nodules, but there are certain bands of shales in this subdivision which are of special importance on account of the marine fauna which they have yielded. They occur at Granton, Craighleith, the Dean Bridge, Drumsheugh, and Woodhall, and at all these localities there is a marked identity in the species of fossils. These horizons have been explored by Messrs Henderson and Bennie, who have collected a great variety of marine forms from them, upwards of 17 well-defined species having been disinterred from the Woodhall shales alone. Some of the species are typical of the Carboniferous Limestone, which overlies the Cementstone Series.

The following fossils are characteristic of these beds: *Spirorbis carbonarius*, *Lingula squamiformis*, *L. mytiloides*, *Avicula Hendersoni*, *Myalina crassa*, *Bellerophon decussatus*, *Murchisonia striatula*, *Orthoceras attenuatum*, *O. cylindraceum*. This assemblage of fossils is widely different from that met with in the Burdiehouse Limestone, which is essentially a fresh or brackish water deposit. Indeed, a careful examination of the fossils derived from the various members of the Cementstone Series seems to prove that during their deposition there must have been an alternation of estuarine and marine conditions.

The interbedded volcanic rocks at Craiglockhart are probably on the same horizon as those on Arthur's Seat and the Calton Hill. At the base there is a considerable development of felspathic tuff, which is overlaid by basaltic lava. This latter rock, which is a coarse variety of basalt, presents features of great beauty when examined microscopically, showing prisms of labradorite with minute grains of augite. This mineral also occurs in distinct crystals, and the olivine, which is apparent even to the naked eye, is also well represented. These volcanic rocks are inclined to the NW, and are succeeded by sandstones and shales, while on the N side they are abruptly cut off by a fault.

The history of the intrusive igneous rocks of the Edinburgh district and the later volcanic rocks of Arthur's Seat is full of interest. Reference has already been made to the three great intrusive sheets of the Heriot Mount, Salisbury Crag, and the Dasses, which belong to the period of volcanic activity towards the close of the deposition of the red sandstones. These rocks, which consist of coarsely crystalline dolerites, were not erupted at the surface like the contemporaneous lavas and tufts of the Long Row, the Dry Dam, and Whiuny Hill. Their intrusive character is clearly proved by their relations to the overlying and underlying strata. The sandstones and shales both above and below these sheets have been altered by contact with them, and the two lower ones gradually steal across the edges of the intervening strata till they unite to form the great columnar mass of Samson's Ribs.

But these igneous masses are of older date than those which cap the hill. There can be little doubt that the former belong to the period of volcanic activity at the close of the Red Sandstone Series. We have already pointed out that the older volcanic rocks of Arthur's Seat lie on the E side of the anticlinal axis, on which the S part of Edinburgh stands, and that they are regularly succeeded by the higher divisions of the Carboniferous system. Long before the eruption of the later volcanic materials, the older rocks had been tilted to the E, and had been subjected to prolonged denudation. A vast thickness of material had been removed. The softer sedimentary strata had been worn into hollows, and the harder igneous rocks of Salisbury Crag, the Dasses, and the Long Row projected as ridges before the renewal of volcanic activity. The later igneous rocks consist of coarse agglomerate and basalt, the former being ejected before the basalt. The coarse ash is admirably displayed in the Queen's Drive, where the blocks are extremely large, from an examination of which it is evident that they have been derived from the older rocks of the hill. On the top of Arthur's Seat there is a mass of basalt, filling the vent from which these coarse agglomerates were discharged. The basalt of the lion's haunch is part of a lava flow which rests on the agglomerate, and sends down a branching vein into it. No precise age can be assigned to these later ejections. All that can be safely averred is, that they are more recent than the Lower Carboniferous period.

The rock on which the Castle stands consists of a compact basalt with a marked columnar structure. It is an oval-shaped mass, which, save on the E side, is surrounded by beds of division 3, and on account of its greater hardness has more successfully resisted denudation. It closely resembles many of the volcanic necks which are so common among the Scotch Carboniferous rocks. They represent the vents from which the

lavas and ashes were discharged, and are now filled with tuff or crystalline rocks. The neck on which the Castle stands is abruptly truncated on the E side by the great fault which has been frequently referred to, and by means of this dislocation it must have been thrown down from a much higher level.

At various localities throughout Edinburgh veins and dykes of basalt and dolerite occur. Some of these have an E and W trend, and are probably of Tertiary age. One of them is exposed in the path leading up to the Calton Hill, at the back of Greenside church, where it is intruded among the volcanic rocks of the hill. They are also to be seen in the Water of Leith near the Dean Bridge, and in the cutting of the Caledonian railway near Coltbridge. Several veins have been traced in the old part of the town: one from the foot of St Mary Street to St Patrick Square, and another from the eastern part of the Cowgate to the University.

The effects of glaciation are still fresh in the neighbourhood of Edinburgh. The rounded contour of the ground and the striated surfaces alike point to the operation of this agent. On the Corstorphine Hill several striated surfaces occur which were first observed by Sir James Hall, the direction of the markings being a few degrees N of E. At one point on the N side of the Castle, nearly horizontal striae were observed on a vertical face of rock pointing in a similar direction. On the Calton Hill there are several examples, and a striated surface was long to be seen at the side of the road leading to the Nelson Monument. Other examples were met with at the side of the Low Calton, owing to the removal of the boulder clay, the general trend being ENE. In the Queen's Park they occur on the top of the Salisbury Crags, and the splendid *roche moutonnée* in the Queen's Drive, above Samson's Ribs, is now well known. A remarkable example of an overhanging cliff with a striated surface is to be seen on the road leading to Duddingston, in what is locally designated 'the Windy Gowl'—a phenomenon which could only have been produced by glacier ice. In the course of 1882 well-preserved striae were observed by Mr B. N. Peach within 100 feet of the top of Arthur's Seat, at the top of the gully known by the name of 'the Guttled Haddy.' Here the ice-markings ascend the slope at an angle of 20° on a nearly vertical face of rock. The direction is E 18° N, and from the appearances presented by the striated surfaces it is evident that they were produced by ice moving towards the ENE. At Craigmillar the striae run approximately E and W; and again, on the Braid Hills, where they are very plentiful, the trend is to the S of E. 'Striated pavements' in the boulder clay have been observed both by Hugh Miller and Sir Archibald Geikie, indicating an ice movement in an ENE direction. All these instances prove that Edinburgh was glaciated by ice moving towards the E, while here and there slight local deflections were produced by the irregular contour of the ground.

The greatest accumulation of boulder clay is that which covers Princes Street. In the low-lying parts of the town it is buried beneath the alluvial deposits of ancient lochs or is overlapped by the accumulations of the raised beaches. Along the coast-line it crops out from underneath these marine deposits. About 1867 a fine exposure of boulder clay was made in the course of the excavations for the Albert Dock at Leith. It consisted of a tough dark clay charged with blocks of various sizes from widely separated localities. Along with the blocks of local origin there were stones which had come from Corstorphine Hill, the Mons Hill, Campsie Fells, and the Grampians. Similar evidence is obtained from the patches of boulder clay round Arthur's Seat. On the Queen's Drive, where the second escarpment begins leading down to Duddingston, there is a considerable thickness of this deposit overlying the Carboniferous red marls. It is fawn-coloured, and consists mainly of sandstone blocks associated with boulders of Carboniferous limestone, fragments of coal, black shale, diabase, porphyrites, quartz rock pebbles

from the neighbourhood of Callander, and schists from the Grampians. The same commingling of foreign and local rocks is observable in the small patch, in the gully named 'the Guttled Haddy,' at a height of over 700 feet. This locality is considerably above the level of the sources from which some of the blocks have been derived, so that they could not have been transported by the agency of floating ice.

The deposits of the 100 feet beach lap round the hills on which Edinburgh stands, their inland margin never rising much above this level. They consist of a great series of stratified sands and clays which once formed an almost continuous plain, but which has been trenched and worn into hollows by prolonged denudation. Where a section can be obtained it is evident that the mounds on which the marine deposits rest have been carved out of the solid rock. Though the finely stratified sands predominate in these beds, yet in places they wholly consist of finely laminated clay free from stones. Occasionally there are layers of small stones as if they had been dropped into the accumulating sediment by floating ice. These are mostly local, but a few have been transported from the Grampians. Some chalk stones and chalk flints also occur in the clays, the former resembling the Danish chalk in the island of Faxoe. One of the best sections for examining this deposit is the clay pit at Portobello. In this section there are certain bands highly crumpled, while the beds above and below are undisturbed. In 1881 an excellent section was exposed in Warriston Park, nearly opposite the gate leading into the Botanic Garden, where several layers of these crumpled beds occurred, the intervening layers of sand being free from any contortion. The folds were mostly inverted, and inclined to the SW. These phenomena may be accounted for by supposing that, during the deposition of these beds, they were occasionally subjected to the movement of pack ice driven on to the banks of sand and mud during low tide by the NE winds blowing up the Firth. The partly consolidated clays were pushed laterally by the ice as it was driven shorewards. As the ice floated or melted away, the crumpled clays were again overlaid by ordinary sediment. The crumpling might recur at intervals with severe weather, a low tide, and NE winds. This supposition is strengthened by an examination of the contents of the beds. The shells are of an arctic type, and are not abundant; while the Foraminifera and Entomostraca are also arctic. The clays consist of the finest sediment—the flour of the rocks, in fact—and are almost destitute of organic matter. They point to a time when the rivers flowing into the Forth were turbid with glacial mud, when the land surface was nearly devoid of vegetation, and when the estuary was not suitable for the growth of algae.

The 50 feet beach has been carved out of the deposits of the older terrace, the underlying boulder clay, and the solid rock. It forms a narrow strip along the coast, the broadest part occurring at the Leith Links. This ancient beach is bounded by a low inland cliff which is still tolerably steep where it consists of solid rock, but in those places where it is carved out of boulder clay, or the 100 feet terrace, it is merely a sloping bank. The strata consist of sand and gravel with occasional shells. Hugh Miller drew attention to some interesting facts connected with the old beach near Fillyside Bank between Leith and Portobello. The stones found on the surface are encrusted by *Serpula* and perforated by *Saxicava*, while the under valves of oysters are frequently attached to the boulders. Equally interesting is the occurrence of *Mya truncata*, which has been preserved with the siphuncular end uppermost in the act of burrowing in the boulder clay which forms the floor of the beach at this point. In all likelihood this part of the old sea bottom may have formed an oyster scalp. The localities where these shells occur are from 4 to 8 feet above the highest stream tides, and from 30 to 38 feet above the position where they are now found living. The elevation of the land to its present level

seems to have taken place since its occupation by man, for in the continuation of this beach farther up the Firth numerous skeletons of whales have been found along with the rude implements which were used by our ancestors. Some years ago a whale was discovered near Gargunnoch, the brain of which, in all probability, had been extracted for food, the skull having been broken open at the thinnest part. Hard by was found the implement which had evidently been used for this purpose. A comparison of the marks on the face of the implement with those on the skull showed that they perfectly agreed. Kitchen middens are found at various places along the base of the cliff forming the inner margin of this terrace. The bed of oyster shells referred to by M'Laren as occurring at Seafield is in all probability of this nature. It is rather a remarkable fact that the brick clays belonging to this beach have a fetid odour owing to the amount of animal and vegetable matter they contain. At the head of the Leith Links there are several dunes of blown sand which date back to the time when the sea rolled inwards on this beach.

In the course of the excavation of its present channel, the Water of Leith has formed several alluvial terraces which belong to post-glacial and recent times, the highest, of course, being the oldest. The successive terraces are best developed where the river has cut through the deposits of the 100 feet sea beach. The lower portion of the Warriston Cemetery occupies one of these higher terraces. In connection with this subject it is interesting to note the occurrence of a buried river channel near Coltbridge, which was proved by a series of bores put down by Mr Jeffrey. One bore, which was sunk to the S of the brewery, passed through 60 feet of superficial deposits before reaching the sandstones and shales. In a second bore, a short distance to the N, 72 feet of drift were pierced when a dyke of igneous rock was reached. A few yards further N a third bore was put down through 200 feet of superficial deposits before reaching the solid rock. As the surface of the ground at that locality is only about 150 feet above the sea, it is evident that the bottom of this old channel must be considerably below the present datum-line. This is evidently one of those buried river-channels, of which there are several examples on the E coast of Scotland and England, pointing to a considerable elevation of the land, probably in pre-glacial times.

Edinburgh formerly possessed several sheets of water which have now disappeared. The hollow along which the North British Railway passes was occupied by a chain of lochs. The Nor' Loch, to the N of the Castle, was celebrated as the place where the witches passed through their ordeal. The Grassmarket and the Cowgate overlie the alluvium of an ancient loch, the traces of which are now almost obliterated. In the Queen's Park, the place known as the King's Mire was covered by a sheet of water. The Meadows occupy the site of the Borough Loch, the shell marl being occasionally exposed in the drains there, varying in thickness from a few inches to 6 feet. Several species of *Limnaea*, *Planorbis*, *Cyclas*, and *Valvata* have been obtained from this deposit, along with a few valves of Entomostraca. The skull and horns of the *Cervus Elephas* have also been disinterred from the alluvial deposits of the Meadows. This interesting relic is now preserved in the Museum of the Antiquarian Society in Edinburgh. A large sheet of water formerly extended from Corstorphine to Gorgie and Coltbridge, which has been drained by the gorge of the Water of Leith. An interesting notice occurs in the *Scotsman* of 13 April 1833, with reference to the occurrence of a considerable depth of moss in the old town. In the course of the excavations of the new court buildings in Parliament Square, a remnant of the City Wall, erected in 1450, was laid bare; and in the mossy soil below it, about 3 feet under the foundation, a number of entire skeletons were found, showing that the ground had been used for burial before the wall was built. In some places the moss was 15 feet deep.

Though the physical features of Edinburgh were

mainly determined in pre-glacial times, there can be little doubt that they were largely modified during the glacial period. Those remarkable features of 'crag and tail,' which are well displayed on the Castle rock, the Calton Hill, Salisbury Crags, and Arthur's Seat, were partly developed during the great extension of the ice. In the foregoing examples the projecting crags or bosses of rock face the W, which is the direction from which the ice came; while the ridge or 'tail' on the lee side slopes gently towards the E. As the ice impinged on these projecting masses, the lower portion of the sheet would be deflected and compelled to move round the sides, while the higher portion would overflow the escarpments. One can readily understand that the erosion would necessarily be greatest at the base and round the sides of the crags. The Nor' Loch and the Grassmarket Loch were probably rock basins due to this cause. The hollow at the Meadows may likewise be of glacial origin. At that locality the strike of the beds nearly coincides with the direction of the ice-flow; and as the red sandstones crop out to the S in Warrender Park, it is probable that they are overlaid by softer strata occupying the site of the Meadows, which would be more readily excavated by the ice. And so also the hollow at Morningside must have been deepened by the pressure of the ice escaping round the N end of Blackford Hill. Indeed it is rather remarkable that the hollows and ancient lochs throughout Edinburgh are found in those places where they ought theoretically to occur, on the supposition that the district was glaciated by an ice sheet moving in an ENE direction.

Extent.—The area within the municipal and parliamentary boundary, excluding however Portobello, forms an irregular polygon of seven sides, with St Giles' Church as the centre, distant about $\frac{1}{2}$ mile from the middle of each side. The extreme width, from the point where Ferry Road and Newhaven Road intersect on the N to the boundary line to the south of the Braid Hill on the S, is $4\frac{1}{4}$ miles; and the extreme length, from the corner of Henderson Terrace and the Corstorphine Road on the W to the point where the road from Duddingston crosses the Braid Burn after it leaves Duddingston Loch on the E, is $3\frac{3}{8}$ miles. The municipal and parliamentary boundaries coincide, except that the former does not include the Blackford and Braid Hills, nor part of the Inverleith Public Park. The number of acres comprised within the boundary is 6116 $\frac{1}{2}$. Starting at the extreme northerly point, at the intersection of Ferry Road, the line passes in a SE direction along the centre of Bonnington Place, Bonnington Road, and Pilrig Street to Leith Walk, thence ESE in a straight line to near the middle of the west side of Lochend Loch, then straight NE for about 260 yards to the road passing Lochend House, along this road SE to the Restalrig Road, thence in a straight line to the London Road at the corner of Meadowbank, along the London Road to the corner of the barracks at Jock's Lodge, along Willowbrae Road till beyond Willowbrae Avenue, and thence back SW to the eastern boundary of the Queen's Park, following which it passes down to Duddingston Loch, round the east end of the loch, and along the road to Craigmillar as far as the bridge across the Braid Burn, which is the extreme easterly point. From the bridge it follows the course of the burn to the road at Peffermill, and then the centre of this road westward to Cameron Bridge. From Cameron Bridge it goes westward by Lady Road to Mayfield, thence in a straight line to the road leading from Mayfield Road to the Harrison Gateway at Blackford Hill, along this road, then round the boundaries of the Blackford and Braid Hills, and thence irregularly to the Comiston Road at the corner of Greenbank Terrace and Greenbank Place close to the South Morningside School. It then passes westward a little to the S of Comiston Drive to the NE corner of the grounds of the City Poorhouse, and thence in an irregular line almost due north to the Suburban Railway; the eastern side of this it then follows irregularly southward to the SW corner of the North British Distillery, and passes thence in a straight line NNW to

near the corner of Corstorphine Road and Henderson Terrace, which is the most westerly point. From this point it strikes in a straight line NE to the junction of the Comely Bank Road with that which skirts the west side of the Fettes College grounds, passes eastward along Comely Bank Road to the road leading to the main entrance to Fettes College, from that again NNE to the western entrance to the Inverleith Public Park, round the park to the N entrance, thence in a straight line NNE to near the Free Church opposite the S end of Granton Road, and then eastward along Ferry Road to the starting point. These boundaries have been somewhat altered by the Amalgamation Act of 1896, which included within the municipality Portobello and other districts.

Architecture.—The architectural features of the Old Town and the New present a very remarkable contrast from every point of view. According to Mr R. L. Stevenson, indeed, old and new are but the complementary halves of a symmetrical whole, and the picturesqueness of the one part is brought out only by contrast with the other; and assuredly grimy even as the Old Town has become, its quaint outlines have a peculiar charm of their own, and few things can be finer than the appearance—perhaps contrast—it presents when viewed on a bright summer afternoon from the Regent Road east of the Burns Monument. The older houses, which nearly all date from the restoration of the city after its destruction by the Earl of Hertford's rough wooing in 1544, had a substantial ground flat surmounted by wooden storeys, often reached by an outside stair, and with each successive flat projecting over the one beneath it, till the occupants of the top houses in the closes, or where the streets were narrow, could almost—in some cases actually—shake hands with their neighbours on the opposite side. Sometimes the outer stair was continued as far as the second floor, and at a somewhat later date the centre of the 'land' was pierced by an archway leading to a back court, where a projecting circular or octagonal tower, carried up the whole height of the building, contained a corkscrew (turnpike) staircase communicating with each floor. The gables were often crow-stepped, and on the steep roofs were generally dormer-windows—sometimes a double row, after the Flemish fashion—with gables and pediments. Where the houses had fronts all of stone the surface was relieved by string-courses, and by panels with armorial bearings or inscriptions, as well as by the carved lintels and pediments of the windows. Curious nondescript projections were corbelled out from the walls, as were also windows and corner turrets with conical or occasionally ogee roofs. The doorways, which were generally square-headed, were relieved by deep bold mouldings, and had often over the lintels coats-of-arms, initials, and inscriptions. In fact, the leading idea of the architects seems to have been not unity but harmony of design, combined with such individual freedom in the treatment of details as to secure a picturesque and graceful irregularity of outline, and at the same time a surface so broken up by projections, expected or unexpected, as to produce those effects of light and shade that alone satisfy the artistic eye, and which are often entirely wanting in more symmetrically designed buildings. When, on the other hand, the New Town was laid out, the idea of the Modern Athens, as suggested by Williams, or even previously, seems to have dominated the fancy of all the Edinburgh architects, and there was consequently among them an adherence either to strictly classical forms or to the modifications of them that came with the Renaissance. This is especially noteworthy in all the works of the brothers Adam, as well as in those of their successors Playfair and Hamilton, and though the taste and skill of these leaders were markedly successful in the case of large public and detached buildings, the adherence to the classical produced, in the lines of terrace and street, a uniformity that was in most cases alike monotonous and insipid. Towards the middle of the present century, however, a new departure took place, and under the guidance of David Bryce and his disciples there was a revival of designs conceived after the old Scottish style.

This has had most happy results, and coming as it did concurrently with a new interest in all forms of Gothic architecture, which has particularly affected ecclesiastical buildings, it has had a most pleasing effect on the picturesqueness of many parts of the city. Though rows and terraces are still to be found, the monotony of surface in those of later growth has at least been broken up and greater variety secured.

In many of the streets of Edinburgh, indeed, especially of the more recent ones, the buildings, mostly of white sandstone, may be said, notwithstanding Mr Ruskin's anathemas, to show features of considerable elegance, taste, and adaptability to site; and some hideous exceptions—such as a clumsy imitation of a Greek temple in the midst of old buildings of Scottish type, or some awkward projection marring a good line in street or square—serve but to remind one that the Philistine is abroad and that the Cockburn Society has still work to do, as certainly as the beautiful examples remind us of the long line of eminent designers. It must be remembered that it is to her own sons that all the outstanding architectural features of the city, with only one or two exceptions, are due—who have tried to make Edinburgh beautiful, from the days of the building of St Giles and Heriot's Hospital down to those of the erection of Fettes College and the Medical School of the University.

Lines of Street and Districts.—The city had its origin in the groups of buildings which must have begun at an early date to cluster round the Castle on the E and S; and these gradually spread eastward, and finally became united with others that had been spreading westward from Holyrood. The two together form what is called the Old Town, the main line of street running along the ridge that extends eastward from the Castle, and being known successively as Castle Hill, the Lawnmarket, High Street, and Canongate. South of this, and parallel to it, was the wide Grassmarket and the Cowgate. Between the two lines, and also extending N from the main ridge, were the numerous closes and wynds—the latter merely wider closes—for which Old Edinburgh was so famous. Many of the houses in this, the oldest, part of the town were destroyed by the great fires in 1824, and many more were removed by the operations carried out under the Improvement Act of 1867, by which many areas covered by squalid and ruinous buildings were cleared, and old streets and wynds either widened or replaced by new and more suitable thoroughfares, much to the welfare, physical and moral, of the inhabitants of those parts of the town. Some of the principal changes thus effected were the formation of Chambers Street, the widening of St Mary's Wynd and Blackfriars Wynd, the substitution of Jeffrey Street and Cranston Street for Leith Wynd, and the substitution of Victoria Street for the West Bow.

A wall seems to have inclosed the part of the town next the Castle from a very early date, and in 1450 this was extended so as to include all the Edinburgh of the period, which, as thus limited, seems to have consisted of the Castle Hill, the Lawnmarket, and the High Street, with the closes leading from them. Outside this wall during the next fifty years considerable suburbs grew up, and hence in the panic that followed the battle of Flodden in 1513 extensions of the fortifications became necessary, and a fresh wall was built, mainly by amateur labour, in great haste, as the remains of it at the Vennel and along the N side of Drummond Street still show. This passed southward from the Castle across the W end of the Grassmarket and up the E side of the Vennel, thence along Lauriston and Teviot Place, at the corner of which it turned abruptly N for a short distance to the end of Bristo, and thereafter resumed its eastward course by the back of the Industrial Museum, the S of the University, and the line of Drummond Street to the N end of the Pleasance. There it turned northward, and passing along the W side of St Mary's Wynd (now widened into St Mary Street) and its then continuation—Leith Wynd—terminated at the E end of the Nor' Loch. It was subsequently extended in 1540 and

1560, so as to include the site of Trinity College Church, immediately to the E of the Nor' Loch. There were gates at the SW corner of the Grassmarket, the West Port; at the Bristo, Bristo or Society Port; at the end of the Potterrow, Potterrow Port; at the end of the Cowgate, the Cowgate Port; at the end of the High Street, the Netherbow Port. Leith Wynd was also shut off at the N end by the Leith Wynd Port, and St Mary's Wynd at the S end by the St Mary's Wynd Port, close to the Cowgate Port. The Netherbow Port, as rebuilt in 1606,* was one of the objects selected by Queen Caroline for destruction, to gratify her vindictive feelings against Edinburgh at the time of the Porteous Mob; but though then spared, thanks to the exertions of the patriotic Scottish members of Parliament of that day, it fell before the reforming zeal of the magistrates of the city themselves in 1764, in which year it was demolished by the worthy successors of those would-be improvers who a few years before destroyed the Town Cross, and fit predecessors of those who, in more recent times, assented to the ruin of the exterior of St Giles and the destruction of Trinity College Church, and of whom some have, even in the years of æstheticism, been willing to agree to the construction of a railway-tunnel with all its 'sweet' accompaniments underneath the line of Princes Street. The walls themselves gradually fell into decay, and the incidents of the rebellion of 1745 having shown their utter uselessness as means of defence, they were, with the exception of the portions indicated, removed from time to time as was found necessary.

The walls of 1450 and 1513—the latter particularly—seem to have had a curious effect upon building operations. After the rude fright the suburban dwellers had received when news of Flodden arrived, there must have been an unwillingness on the part of the citizens to erect houses outside the walls, and as the population was steadily increasing, the only alternative was to rise into the air, and hence the origin of the lofty lands, or tenements, of nine, ten, or eleven storeys for which the Old Town was so long famous. Of these few now remain, the highest that are left being some houses at the top of the Mound, the back portion of the Royal Exchange Buildings, and some houses to the NW of the Calton Hill in Greenside. There are also examples of the differences of back and front elevations caused by the irregularities of the site of the city. Long before the fire, however, as early as 1750 indeed, it had been felt that extension was necessary, and longing eyes were cast on the rising ground to the N, to which, however, the deep hollow of the Nor' Loch—now filled by the straggling dinginess of the Waverley Station and by the Princes Street Gardens—seemed to bar the way. Disputes and delays took place, and the first extension accordingly took place to the S, where a builder named George Brown, after erecting Brown Square (where the W end of Chambers Street now is), in 1763-64, proceeded immediately after to build George Square. St John's Street and New Street off the Canon-gate dated from about the same period. At length the difficulties of bridging the Nor' Loch hollow having been surmounted, and plans for the coming streets and squares having been prepared by James Craig, architect, a nephew of the poet Thomson, the New Town proper was at last begun, the foundation-stone of the first house, in Rose Court, George Street, having been laid by Mr Craig on 26 October 1767; and from that time the city has gone on extending in all directions.

The New Town was regularly laid out with streets along the ridge from N to S, crossed at right angles by others of less importance from E to W. Fronting the hollow of the old loch is the magnificent line of Princes Street, occupying the course of an old country road called the Lang Gaitt, and, afterwards, when fenced by stone

walls, the Langdykes. It was widened on the S side in 1877, and has now a carriage-way of 68 feet. It is continued westward by the line of Shandwick Place and Athole Crescent (1850), and eastward by Waterloo Place and Regent Road (1815-19). Parallel to Princes Street along the top of the ridge is George Street, with St Andrew Square (1772-8)† at the E end and Charlotte Square (1800) at the W end. Farther N is Queen Street (1780), continued eastward by York Place (1785-90) and Picardy Place (1809), and westward by Albyn Place (1823). Picardy Place is so called as occupying the site of the little village of Picardy formed by French refugees from the province of that name, who came to Edinburgh after the revocation of the Edict of Nantes in 1685. Farther N still is the line of Albany Street, Abercrombie Place, and Heriot Row (all about 1820), passing westward into the circle of Moray Place (1823), and thence by Great Stuart Street (1823), Ainslie Place (1823), and Randolph Crescent (1823) into Queensferry Street. Randolph Crescent occupies part of the site and grounds of Drumshugh House, some of the old trees still remaining in the gardens. North of this line again is Great King Street (1820), terminating on the E in the square of Drummond Place, and on the W in the circle of Royal Circus (1823).

The cross streets from Princes Street, from E to W, beginning at the E end, are St Andrew Street (1770)—continued northward to Drummond Place by Duke Street and Dublin Street—St David Street (1770), Hanover Street (1786)—continued northward by Dundas Street and Pitt Street—Frederick Street (1795)—continued northward to Royal Circus by Howe Street—Castle Street (1795), Charlotte Street, and Hope Street (the latter two about 1800). Branching off the eastern end of Princes Street to the NE is Leith Street, continued by Catharine Street and Greenside, leading to the broad and busy thoroughfare of Leith Walk. This line was made available for carriage traffic in 1772 along the course of an ancient footpath. Greenside takes its name from the green sides of the hollow between it and the Calton Hill, which was used as early as the time of James II. as an arena for tournaments, wapenshaws, athletic sports, and dramatic exhibitions (some of Sir David Lyndsay's pieces were performed here 'fra nyue hours afore none till six hours at evin'), the slopes that rose all round affording excellent points of view for the spectators. It was also used as an occasional place of execution for those condemned for heresy or witchcraft, and also in one case at least of a murderer—Robert Irvine, a licentiate of the Church, who was hanged here in 1717 for the murder of two boys to whom he was tutor. Part of the ground was the site of a Carmelite monastery, which afterwards, in 1591, became a leper hospital, the inmates of which were to 'remayne thairin night and day . . . under the payne of hanging,' a penalty of which they were kept carefully in mind by the gibbet set up at 'the gavel of the hose.' Southward from the E end of Princes Street is the North Bridge, which is continued in a straight line by South Bridge, Nicolson Street, Clerk Street, Minto Street, Mayfield Street, and Craigmillar Park to the extreme S side at Powburn. South Bridge (1788) is carried over the wide hollow between the High Street and the University by a series of twenty-two arches, all of which, except that over the Cowgate, are, however, concealed by the buildings at the sides. As originally constructed there were shops below the street level with steps leading down to them, but these are now gone. Nicolson Street (1762) takes its name from Lady Nicolson, to whom the ground belonged, and who had her mansion near the N end. At the S end of the street she erected, as a memorial of her husband, a Corinthian pillar, which was shamefully broken up for rubbish when the street was extended southward. The suburb of Newington was laid out about 1800. Craigmillar Park was feued in the years subsequent to 1882. Near the centre of Princes

* The gateway, as then existing, seems to have been a structure of some pretensions, and was by far the most important of all the gates in the city. A building of two storeys—supposed to have been modelled after one of the ancient gates of Paris—it had a carriage gateway in the centre, flanked by towers with sharp conical roofs on the side facing the Canon-gate. To the S of the main archway was a small wicket for foot-passengers, and over it was a square tower with pinnacled corners and an octagonal spire.

† The dates given for the different streets are of course approximate within a year or two, as sometimes a number of years naturally elapsed between commencement and completion.

Street, opposite Hanover Street, there is a southern line formed by the huge mass of earth known as The Mound, the winding Bank Street (1798), and George IV. Bridge. The Mound was formed, between 1781 and 1830, of some two million cartloads of earth and rubbish from the foundations and building of the houses of the New Town, and replaced a series of stepping stones across the marshy bed of the old Nor' Loch, from the originator of which it was at first known as 'Geordie Boyd's Brig.' For long the greater part of the area was let for temporary purposes, while there was a paved path and carriage-way along the E side; but after the erection of the buildings of the Royal Academy and the Royal Institution, the arrangement was altered, and the present path to the E and carriage-way to the W formed. George IV. Bridge (1827-36) is partly carried over the Cowgate hollow by a series of arches, of which, however, only two are open. From the S end of it the wide Chambers Street passes E to the South Bridge. This street, formed in 1872-6, under the Improvement Act of 1867, was named after the then provost, Mr William Chambers, the publisher, the chief promoter of the improvement scheme. It took the place of Brown Square (W end), Argyle Square (near the middle), North College Street, and Adam Square (E end). At the S end of George IV. Bridge there is a fork, and to the left Bristo Street, Buccleuch Street, Causeway-side, and Mayfield Road lead to the southern outskirts, while to the right Forrest Road (1850) and the Middle Meadow Walk lead to the Meadows. At the S end of Forrest Road is the cross line of Lauriston (W), and Teviot Place (1876), Lothian Street, and College Street (E), the former leading to Lothian Road and the latter to Nicolson Street. From the Cowgate at the S end of St Mary Street (1872) the line of the Pleasance and St Leonards and the Dalkeith Road runs southward to the W side of Craigmillar Park. Pleasance seems to be a corruption of Placentia, whence came the first nuns for the neighbouring convent of St Mary, which stood near the foot of the modern Roxburgh Street. St Leonards has its name from a chapel dedicated to that saint which formerly stood on the E side of St Leonards Lane at the entrance to the Queen's Park. Scott makes special mention of St Leonards Hill as the residence of the douce Davie Deans, and the little cottage in the park adjoining this entrance has been fixed on as the dwelling he had in his mind. Dumbiedykes, with the laird's town house, is farther north. At the S end was one of the places of public execution, as the names of Gibbet Toll and Gibbet Loan, at Messrs Nelson's works, remain to testify.

From the W end of Princes Street there passes off to the NW Queensferry Street, which is continued across the Dean Bridge by Queensferry Road (1866). To the W of Queensferry Street is an important residential district, in which the principal streets are Melville Street, Manor Place, Drumsheugh Gardens, and Rothesay Place (from 1850 onwards). Southward from the W end of Princes Street is Lothian Road (1795), which is continued to the southern outskirts by Earl Grey Street, Home Street, Leven Street, Bruntsfield Place, Morningside Road, and Comiston Road.

The principal districts of the city and suburbs are Warriston and Inverleith, E and W respectively of the continuation of Pitt Street; Calton, round the base of the Calton Hill; Abbeyhill, E of Calton Hill; Jock's Lodge and Parsons Green, NE of the Queen's Park; Sciennes, SE of the Meadows; Newington, E and W of Minto Street; Craigmillar Park, E and W of the street of the same name; the Grange, to the W of Newington; Warrender Park and Bruntsfield, W of the Grange; Morningside, on both sides of Morningside Road; Plewlands, S of Morningside; Myreside, W of Morningside; Merchiston, NW of Morningside; Fountainbridge, W of the Meadows; Dalry, NW of Merchiston; Coltbridge, NW of Dalry; the Dean, W of Dean Bridge; Stockbridge, NW of Royal Circus. These are all within the municipal boundary: just outside on the west is Murrayfield, W of Coltbridge; and still farther off on the Queensferry Road the estate of Barnton was

in 1893 opened up for feuing purposes. Warriston, Inverleith, Newington, Craigmillar Park, the Grange, Bruntsfield, Morningside, Myreside, Merchiston, and Murrayfield are mostly composed of detached or semi-detached villa residences.

The Calton was, in 1631, erected by Lord Balmerino into a burgh of barony, and the baron bailie and office-bearers of the Incorporation of Trades managed all the affairs of the burgh till 1856, when it was included within the municipality. Thereafter the incorporation became practically a benefit society, and the membership having dwindled away, and all those depending on the funds having died, the whole remaining property was in 1887 transferred to the Edinburgh Town Council, who also undertook all the obligations, the chief of which are the maintenance of the High and Low Calton burying grounds. Sciennes is a corruption of Sienna, and the name is derived from St Catherine of Sienna, to whom was dedicated a convent erected here about 1514. The site is indicated by a tablet in the garden of the corner house of St Catherine's Place. The convent had as its chapel the little church of St John, erected on the Boroughmuir in 1512. Sciennes, as well as all the ground to the W and SW, now occupied by the Grange, Warrender Park, Bruntsfield, Morningside, Myreside, and Merchiston, formed the Boroughmuir, which was in 1336 the scene of a fierce encounter between the Scots under the Earls of Moray and March and a body of foreign mercenary troops under Count Guy of Namur, which was on its way to reinforce the army of Edward III., then encamped at Perth. The Boroughmuir was the place to which those under suspicion of the plague were removed when that middle-age scourge visited Edinburgh, and was also one of the places of public execution. In the time of James III. and James IV. it was the mustering place for the armies, and it was here that the forces of James IV. assembled before setting out for the fatal field of Flodden. A little artificial mound near Bruntsfield House, called King James' Knowe, and traditionally the spot where the King stood while reviewing his troops ere they set out, was removed so recently as 1876, when the ground was feued, and the 'Bore Stone,' on which the royal standard was set up, is still to be seen affixed to the enclosing wall of the Morningside Established Church. On a slope just above the Jordan Burn was the little church of St Roque, in the cemetery round which were interred those who died of the plague after being driven out to the Boroughmuir. The chapel was erected about 1501, and the ruins were removed in 1803. In the beginning of the sixteenth century part of the Boroughmuir was covered with wood, and indeed the whole area formed part of the great forest of Drumselch, which at an early period surrounded the city to W, S, and E, and from which comes the moderu Drumsheugh.

Old Streets and Localities, and Noteworthy Houses.—Many of the old lanes, and houses in different localities, have become famous from either historical or literary associations, and may be conveniently grouped here as affording landmarks in the history of the city, and in the various developments of its progress. In the case of both lanes and houses many have been swept away by the march of modern improvement, and others have yielded to the ravages of time, so that there remains but to indicate where they once had visible form and shape. Beginning with the oldest part of the town, it may be noted of the Lawnmarket that it derived its name from the stalls or booths which used to be erected there, especially on market-days, for the sale of 'lmen.' It communicated with the High Street, so late as 1817, by means of a lane on the S for foot-passengers, and a narrow carriage-way on the N of the Luckenbooths, which extended along the street to the S of St Giles, and it was blocked at its W end till 1822 by a public weigh-house. Till the opening of Bank Street on the N in 1798, it had no lateral outlets except the closes to right and left and a quaint old street, called the West Bow, which descended westward in steep corkscrew fashion at its SW corner into the Grassmarket under the

S of the Castle. The Lawnmarket, as well as the Castle Hill extending from it to the Castle Esplanade, was once a patrician quarter of the city, and the upper end of it was in early times a place of public execution for heretics, witches, traitors, and common criminals.

As the houses in the line of High Street and the Lawnmarket are numbered from E to W, we shall begin our enumeration from the E end, at the junction of St Mary Street and High Street, where stood the old Netherbow Port. Tweeddale Court, No. 10 Netherbow, contains what was once the town mansion of the noble family of Tweeddale, and in after times the head office of the British Linen Company's Bank, but which is now the publishing establishment of Oliver and Boyd. The alley which leads to this court was in 1806 the scene of a mysterious murder, a porter of the bank, of the name of Begbie, having been stabbed to the heart, and robbed of £4932, which he was conveying to the main office from a sub-office in Leith. Nearly opposite to Tweeddale Court stands what is traditionally known as John Knox's House, a good example of the more ancient, picturesque, and curiously gabled houses of the Old Town. Along the lintel of the ground floor, in old spelling, is the inscription, 'Love God above all, and your neighbour as yourself;' whilst at the corner there is an effigy of what, from a frame there was once round it, was supposed to represent the reformer preaching, but was afterwards found, when the frame was removed, to be Moses receiving the ten commandments from the Lord—a more likely symbol for the house of the reformer than any effigies of himself. Considerable doubt has arisen whether Knox actually lived here. It does not seem to have been his home before 1569, but it may have been so from that date till his death in 1572. Hyndford's Close, at No. 50 High Street, contained the ancient mansion of the Earls of Hyndford, afterwards occupied by Sir Walter Scott's maternal grandfather and his uncle Dr Rutherford, and a frequent resort of Sir Walter when a boy. It was in this close that the famous Jean Maxwell, afterwards Duchess of Gordon, and her sister stayed in their romping girlhood. Here, too, lived Lady Anne Barnard, the authoress of the ballad of 'Auld Robin Gray.' South Gray's Close, at No. 56, contains the birthplace of the well-known Harry Erskine, and his brother the Lord-Chancellor, and it leads down to Mint Court, the site of the national mint which was erected in 1574, and of the residences of Dr Cullen, Lord Hailes, Lord Belhaven, the Countess of Stair, Douglas of Cavers, and the famous Earl of Argyll, all of the latter part of the 17th century. Chalmers' Close, at No. 81, contained the mansion of the ancestors of the Earls of Hopetoun and the residence of Lord Jeffrey's grandfather, often frequented by Lord Jeffrey in his boyhood. Paisley's Close, at No. 101, was entered through a large lofty house of 1612, which contained the shop of Sir William Fettes, the founder of Fettes College, and which, on a night in November 1861, suddenly fell, burying 35 persons in its ruins. Todrick's Wynd, nearly opposite Paisley's Close, was the scene, in 1590, of a grand banquet given by the city magistrates to the Danish nobles who accompanied the queen of James VI. to Scotland. Blackfriars Wynd, at No. 96, now superseded by Blackfriars Street, took its name from a Blackfriars' monastery which stood on the slope facing its S end. It was, for more than five centuries, a highly aristocratic quarter, and included Cardinal Beaton among its inhabitants. Strichen's Close, at No. 104, contains what was the town mansion of the abbots of Melrose, afterwards occupied by Sir George Mackenzie, 'the bluidy Mackenzie' of persecuting fame. Dickson's Close, at No. 118, contained the town mansion of the Halliburtons, and also the residence of 'the Scottish Hogarth,' David Allan. Bishop's Close, at No. 129, contained the town mansion of Archbishop Spottiswood, afterwards occupied by Lady Jane Douglas; and also the mansion of the first Lord President Dundas, the birthplace of the first Viscount Melville. Carrubber's Close, at No. 135, used to contain the oldest Episcopal church

in Scotland, and the only one in the S of Scotland that had been duly consecrated; and a house built by Allan Ramsay in 1736 for a theatre, which, however, as the speculation failed (the city authorities being adverse), was soon turned to other uses, and afterwards in its time 'played many parts,' being used successively as a scientific lecture-room, a Rowite chapel, and a revival meeting-house. It contained also the house of Sir William Forbes; that of Captain Matthew Henderson, much frequented by the poet Burns; and the original workshop of James Ballantyne, the author of the *Gaberlunzie's Wallet*. Most of these have now been swept away in connection with the formation of Jeffrey Street. No. 153 was Allan Ramsay's house, an ancient timber-fronted tenement; on the first floor was his first publishing establishment, and on the second his dwelling-house. Niddry's Wynd, opposite Allan Ramsay's house, contained a temporary residence of James VI. and his queen in 1591, and a famous chapel of 1505, founded by the Countess of Ross, and known as St Mary's Chapel; but this wynd was nearly all rebuilt when the South Bridge was constructed in 1785-88, and is now called Niddry Street. Halkerston's Wynd, at No. 163, served in ancient times as an outlet from the city, and was long an important thoroughfare.

Cap and Feather Close, which stood on part of the ground now occupied by the North Bridge, and is still represented by some of the houses on the E of the Bridge lue, was the birthplace of the poet Fergusson; while No. 265, Craig's Close, contained the Isle of Man Arms, one of his favourite haunts. He died in the Darien House, which, originally built in 1698 as the offices and stores of the Darien Company, had degenerated in the following century into a pauper lunatic asylum. Its site is marked by a tablet on the building at 15 Bristo. Marlin's Wynd, which stood on part of the ground now occupied by the South Bridge, adjoining the Tron Church, took its name from a Frenchman of the 16th century who first paved the High Street. Hunter Square, a small quadrangle partly occupied by the Tron Church, at the W corner of High Street and South Bridge, and Blair Street, a short thoroughfare descending from the SW corner of that quadrangle, were formed when the South Bridge was being constructed, and took their names from Sir Hunter Blair. In Kennedy's Close, which stood on the site of Hunter Square, was the last residence of George Buchanan. Here, on his deathbed, finding that the money he had was too little to pay the expense of his funeral, he ordered it to be distributed among his poor neighbours, adding that his townsfolk might bury or not bury his bones as it seemed good to them. His body was interred next day in the Greyfriars Churchyard at the public charges. Mylne Square, at No. 173, immediately W of North Bridge, built in 1689 by the architect Robert Mylne, was entered from the street by an archway, and was long an aristocratic quarter; two flats in it, now on the line of Cockburn Street, were occupied by Charles Erskine of Tinwald, Lord Justice-Clerk, who died in 1763, and in it was the official residence of the Earl of Hopetoun when Commissioner to the General Assembly. Here also is the Union Cellar, where the 'dire deed' of the signature of the Treaty of Union was long believed to have been finally perpetrated. The cellar is now concealed beneath the handsome new block of buildings erected here in 1891-92. Covenant Close, at No. 162 High Street, contains an ancient edifice, in which the National Covenant was signed in 1638, and which has three crow-stepped gables figuring curiously in close views from the S. Old Assembly Close, at No. 172, contained the City Assembly Rooms from 1720 till 1726, as it did previously the mansion of Lord Durie, the hero of the ballad of *Christie's Will*. Fishmarket Close, at No. 190, contained the residences of George Heriot and the elder Lord President Dundas, of convivial celebrity. Fleshmarket Close, at No. 199, was long the residence of Henry Dundas, afterwards Viscount Melville, and is now intersected by Cockburn Street. Stamp Office Close, at No. 221, contained the

town mansion of the ninth Earl of Eglinton, which afterwards became, as a tavern, a famous rendezvous for men of rank and fashion; it was used by the Earl of Leven, as Lord High Commissioner, for his levees during the sittings of the General Assembly. Anchor Close, at No. 243, contained the residence of Lord Provost Drummond, and a famous printing office established by the 'revered Willie Smellie,' author of the *Philosophy of Natural History* and the printer of the first Edinburgh edition of Burns' poems. The site of the establishment, including the room where Burns used (1786-87) to sit and correct his proofs, is now occupied by the machine room of the *Scotsman* newspaper. This close also contained Douglas' Crown Tavern, which was the meeting-place where that choice body of Edinburgh wits who formed the Crochallen Fencibles used to indulge in 'high jinks.' Burns, who was a member, refers to the festivities in 'Rantin', roarin' Willie' and elsewhere. Writers' Court, at No. 315, contained the original library of the Writers to the Signet, and still boasts of containing, in decayed condition, the meeting-place of the Mirror Club, famous for the festivities described in Scott's *Guy Mannering*. Warriston Close, at No. 323, was long one of the most important alleys of the city, but now possesses scarcely any trace of its ancient features. Roxburgh Close, at No. 341, took its name from containing the town mansion of the Earls of Roxburgh. Advocates' Close, at No. 357, contained the residences of Lord Westhall, Lord Advocate Stewart, and other distinguished lawyers; and figures in connection with Andrew Crosbie, the prototype of 'Councillor Pleydell,' in Sir Walter Scott's *Guy Mannering*. At St Giles' Church is Parliament Square, formerly Parliament Close, which takes its name from the adjoining Parliament Hall. In it, to the W of the statue of Charles II., is a small plate marked I.K., which indicates as nearly as may be the burial-place of John Knox. To the W of St Giles' a heart in the paving, formed of causeway stones, marks the site of the Old Tolbooth, 'the Heart of Mithlathian.'

Dunbar's Close, at No. 418 Lawnmarket, opposite the County Hall, received its name from containing the headquarters of Cromwell's army after the battle of Dunbar, and adjoins a large house to the N, said to have been occupied by the Protector himself. Libberton's Wynd, which extended southward from Lawnmarket, between the rear of the County Hall and the roadway of George IV. Bridge, is now gone. It was one of the principal thoroughfares for pedestrians to the southern outskirts, and is mentioned as early as 1477. It contained a famous tavern—Johnnie Dowie's—frequented by poets, artists, antiquaries, advocates, and judges throughout the latter part of the 18th century, and became so noted in connection with the festive meetings of Robert Burns and his admirers as to be eventually called the Burns Tavern. The head of this close, from 1817, when the Old Tolbooth was demolished, till the date of the last public execution, was the place where the gibbet was erected, the spot being now indicated by three reversed stones in the causeway. In Old Bank Close, off the S side of the Lawnmarket (a site now occupied by the pavement of George IV. Bridge), was the residence of Sir George Lockhart, President of the Court of Session, who was in 1689 murdered at the door of his own house by an unsuccessful litigant who felt a grudge against him. Brodie's Close, on the S of Lawnmarket, just above Melbourne Place, contained the Roman Eagle Hall, notable in Burns' time for its masonic meetings, which were at length dissolved on account of the disgrace which the intemperate proceedings brought on the craft. In it is still shown, in the front tenement, the house of the notorious Brodie. Riddle's Close, at No. 322, was inhabited by Provost Sir John Smith, by Bailie Macmoran, who entertained at his table here James VI. and his Queen, Anne of Denmark, and by David Hume, who here, in his first Edinburgh house, wrote part of his *History of England*. Lady Stair's Close, which was the chief thoroughfare for foot passengers to the New Town prior to the opening of Bank Street at

No. 447, contains the house where the fashionable society of the city was long presided over by the Dowager Countess of Stair, whose subsequent history, as Viscountess Primrose, forms the groundwork of Sir Walter Scott's story of *My Aunt Margaret's Mirror*. Baxter's Close, at No. 469, contains the house in which the poet Burns lodged in the winter of 1786-87, along with a Mauchline friend, Mr Richmond, paying 1s. 6d. a week for share of a poor lodging and a chaff bed. James' Court, at No. 501, was built in 1727 as an aristocratic quarter, superseding several ancient closes. Built on rapidly sloping ground overlooking the New Town, it has to the N a height of nine stories. In its western half was the house in which David Hume lived from 1762 to 1771, the residence also of Blair the rhetorician, and of James Boswell, where he entertained Dr Johnson in 1773, when the Lexicographer was on his way to the Hebrides. This portion of the square was unfortunately destroyed by fire in 1857. Mylne's Court, at No. 517, was partly built in 1690 by the architect who constructed Mylne Square. The West Bow, descending sinuously first southward and then south-westward from the upper end of Lawnmarket, took its name from a bow or arch in the oldest town wall. It was probably the earliest approach to the city while as yet it was confined to a few houses within and around the Castle, and served, narrow, winding, steep, and rugged as it was, from an early date till the latter part of the 18th century, as the carriage egress from the city to all places in the W. In this capacity it witnessed many a scene, both grave and gay, from the entrance and departure of monarchs to those sad processions which so often passed from the 'Tolbooth to the Grassmarket.' Even in the memory of people still living it was a busy scene of traffic, and alive with the bustle of shops and workshops. It contained the house of the reputed wizard Major Weir, that used as the Assembly Rooms from 1710 till 1720, and the provost's mansion in which Prince Charles Edward was entertained in 1745. About 1830 it underwent great alteration, most of the old houses, some of which were among the quaintest in Old Edinburgh, being swept away, and the entire street line altered. One of the last of the survivors, a very fine example of the ancient timber-fronted buildings, which stood at the corner of the Lawnmarket, was demolished in 1878. The Castle Hill, with the closes and small courts leading from it, was long a highly aristocratic quarter; it contained a palace of the Queen Regent, Mary of Guise, and a mansion of the Marquess of Argyll; and still contains houses which were once inhabited by such notables as the Earls of Lennox, the Earls of Cassillis, the Earl of Dumfries, the Countess Dowager of Hyndford, Lord Sempill, Lord Rockville, Lady Elizabeth Howard, Lord Holyroodhouse, and General Sir David Baird. The old residence of the Dukes of Gordon was removed so recently as 1887. It was the birthplace of the late Mr William Nelson the publisher. Ramsay Lane, descending northward from the N side of Castle Hill, contained the residence of the 'Laird o' Cockpen,' one of the Ramsays of Dalhousie, and leads to a garden off its W side, containing what was Allan Ramsay's House, a curious octagonal edifice built by the poet himself, enlarged by his son, afterwards owned by the late Lord Murray, and vulgarly known in the poet's lifetime as the 'Goose Pic.' The Original Ragged School, founded by Dr Guthrie, which for 40 years occupied a building on the E side of Ramsay Lane, was removed to LIBERTON in 1887.

Turning now to the Canongate, and again beginning at the E end, we find first an arrangement of stones in the causeway marking the site of the Girth Cross, formerly the scene of several notable public executions, and indicating the limit in this direction of the sanctuary of Holyrood. In White Horse Close, or Davidson's Close (No. 31), is a range of buildings dating from 1523, which seems to have been occupied as one of the White Horse Inns, and which is described by Scott in *Waverley* as the residence of his hero when in Edinburgh. The buildings were altered and modernised, but with care as to

the conservation of old features, in 1889-91. Whiteford House, W from White Horse Close, is entered by a lane or entry, and occupies the site of an ancient mansion of the Earls of Winton, the scene of several incidents in Scott's *Abbot*. Queensberry House (No. 64), within an enclosure to the S, was built in 1681 by Lord Halton, afterwards third Earl of Lauderdale, and passed by purchase to the first Duke of Queensberry. Hither, when court favour failed in 1729, came the third Duke and his wife Catherine Hyde, Prior's

'Kitty, beautiful and young,
And wild as colt untamed,'

with, in their train, the poet Gay, who is said to have been a well-known customer at Jenny Ha's Change-house, which stood on the opposite side of the street. Stripped of its decorations by 'Old Q.' in 1801, it was sold to the government of the day for a barrack, and has now—as a House of Refuge for the destitute—descended from the 'classes' to the 'masses.' The Golfer's Land (No. 77) was, according to tradition, built by John Paterson, with the value of a stake won by assisting the Duke of York, afterwards James VII., to gain a golf match on Leith Links. The hexameter and pentameter quatrains on the front is by Dr Pitcairn, and alludes to Paterson's prowess. Milton Board School occupies the site of Milton House, which was built by Fletcher of Milton (a nephew of the patriotic Fletcher of Saltoun), who sat on the bench from 1724 to 1766 as Lord Milton. Most of the ornate work of the interior was destroyed when the old building was demolished, but part was preserved and removed by the last tenant of the house, and one of the old cornices and a mantel-piece have been preserved in the masters' room of the school. The old building was for some time used as a Roman Catholic School, the pupils of which strewed flowers in the path of the Queen as she approached Holyrood in 1842. In Panmure Close (No. 129 Canongate), at No. 15, was the residence of Adam Smith, where he died in 1790. The Canongate Tolbooth, dating from 1591, is an excellent and well-preserved specimen of the architecture of that period, and one or two modern alterations have been carried out in excellent taste. The projecting clock is a peculiar feature, and one worthy of modern imitation; while the inscription over one of the archways, '*Patriæ et Posteris*,' betokens a somewhat cynical and pessimistic view of life on the part of the old builders. In the tower are two bells with the dates 1608 and 1796. The older one has the inscription *Soli Deo honor et gloria*. After the erection of the Calton prison, this jail was used only for debtors: it is now used partly as a public reading-room, and partly as a district police office and fire-station. At the entrance to the churchyard close by is the Canongate Cross, with, attached to it, the staple to which the jugs were at one time affixed. The stocks are now in the Antiquarian Museum. In the neighbouring Tolbooth Wynd was the Canongate poorhouse, built in 1761, but disused since the parish was, for poor law purposes, conjoined with St Cuthbert's. On the opposite side of the street, at the entrance to Bakehouse Close, is a building of 1570, the residence of that versatile rebel and royal favourite—curious admixture, yet the more he rebelled the more did 'his master King James, who loved him dearly,' seem to delight to forgive him—George, first Marquess of Huntly, and of his son, the second Marquess, who was beheaded in 1649. On the front of the house are four tablets with the curious inscriptions *Constanti pectori res mortalium umbra: Ut tu lingue tue sic ego meorum aurium dominus sum: Hodie mihi, cras tibi, cur igitur curas: Spes altera vite*. At the W end is a curious emblem of the resurrection—wheat growing out of a heap of bones. Moray House, with its bold projecting balcony, supported by massive stone trusses, and its curious gateway with its obelisk-topped pillars, dates from the early part of the seventeenth century, when it was erected by the Countess Dowager of Home. Two of the rooms have fine dome-shaped ceilings, with raised designs.

It passed afterwards to the Earls of Moray, through Margaret, the elder daughter of the builder, and hence it has its name. In the troublous times of Charles I. the Countess of Home seems to have been a strong supporter of the Covenanters, and hither accordingly—probably in consequence—in 1648 came Cromwell, escorted by certain dignitaries of the popular party, who brought him 'to the Earl of Murrie's House in the Cannigate, where a strong guard is appointed to keep constant watch at the Gate;' and here it was, if Sir James Turner may be trusted, that the terrible decision was arrived at 'that there was a necessitie to take away the King's life.' From the stone balcony, in 1650, the Marquess of Argyll, who was here at the celebration of the wedding of his eldest son with the eldest daughter of the Earl of Moray, is said to have stood with a number of the guests, to gloat over the fate of his enemy, 'the great' Montrose, as he was led up the Canongate on his way to the Tolbooth, when he was brought to Edinburgh after his capture. It is a curious example of the irony of fate that 'three of the onlookers, including the gay young bridegroom, perished by the hand of the executioner on the same fatal spot to which the gallant Marquis was passing under their gaze.' Hither again came Cromwell, in 1650, after Dunbar, and all through the winter the rooms must have presented a scene of busy bustle, till at last the Lord General fell 'dangerously sick; worn down by over-work and the rugged climate.' The next notable occupant was Lord Chancellor Seafield, who was here at the time of the Union negotiations, and, indeed, the summer-house in the garden is traditionally said—though there is no evidence to substantiate the story—to have been the place where many of the signatures were adhibited to the treaty. Queen Mary's Bower, and Queen Mary's Thorn Tree in the gardens, seem to be misnomers due to the popular association of the name of Moray with the person of the 'Good Regent,' in whose time, of course, the property did not belong to the Moray family, nor was the house built. Since 1847 Moray House has been used as the Free Church Normal Training College, and in order to increase its usefulness for this purpose a large addition was made to the building in 1877. At No. 182, on the second floor, over the archway leading into St John Street, is a house in which Smollett spent some time in 1766, and strolling westward from which he saw the 'fine pavement,' the width of which, 'and the lofty houses on each side,' led him to the conclusion that the whole line along the ridge 'would be undoubtedly one of the noblest streets of Europe, if an ugly mass of mean buildings called the Luckenbooths, had not thrust itself into the middle of the street.' On the W side of St John Street, is also the hall of the Canongate Kilwinning Lodge of Freemasons, of which Burns was poet-laureate, and at the meetings of which he was often present. Just opposite, at No. 13, is the house of Lord Monboddo and his daughter 'the beautiful Burnett,' the praises of whose charms were sung far and wide, and whose untimely death the eccentric old lord took so sadly to heart. At No. 10 of the same street lived James Ballantyne, the friend and misfortune of Scott. His printing office—old Paul's Work—was in the old Leith Wynd, now the lower end of Cranston Street. Near the entrance to St John Street, a circle of stones in the causeway marks the site of St John's Cross, which stood at the eastern limit of the old Edinburgh Regality. Playhouse Close (No. 200 Canongate) contained a building of 1746, which was almost the earliest regular Edinburgh theatre. It was, in its early days, the scene of one or two peculiar and noteworthy riots, and it was here that in December, 1756, Home's tragedy of *Douglas* was first produced on the public stage. In Jack's Land, which is entered from Little Jack's Close (No. 229), Hume lived from 1753 to 1762, ere he moved to James' Court, and here a considerable portion of his history was written. The large square tenement with the effigy of a Moor on the front, and known as Morocco Land, has associated with it a curious old legend of an

Edinburgh scapegrace, and a visit of the plague. Opening off the Canongate at the top is St Mary Street, the modernised form of St Mary's Wynd—one of the first results of the City Improvement Act of 1867—in which, on the site now occupied by the Roman Catholic Institute, stood Boyd's White Horse Inn, whither came George III. and his preceptor the Earl of Bute in 1758, and where Johnson took up his quarters when he arrived in Edinburgh in 1773, when his ire was so sadly roused by the waiter's using his fingers as the most convenient form of sugar-tongs.

The Grassmarket, which occupies the hollow S of the Castle Esplanade, was, as we have already seen, one of the early extensions of Edinburgh. The site had, in 1477, been set apart for the holding of weekly markets for country produce, and this rural connection it still retains as the place where horse markets are held and carriers' quarters cluster; though in respect of the latter the glory has sadly departed, since the railways have absorbed the greater part of the traffic. From 1560 till the building of the New Corn Exchange in 1849 (and even after this, for the farmers were unwilling to occupy the new building) the corn market was held on the street at the W end, where also the old Corn Exchange was. From about 1660 to 1784 the E end was used as the place of public execution, and was the spot where the Covenanting martyrs sealed their testimony. The socket of the gallows, which had been covered up about 1823, was rediscovered in 1869, and its site is now marked by a cross in the causeway. This street used to contain many quaint houses of the sixteenth century, but the hand of the improvement schemers fell heavily upon it; and even those that still remain have fallen sadly from their former high estate, for here is now the realm of common lodging-houses. The Robertson Memorial Mission Church and buildings, at the NW corner, have their western wall partly built on the old city wall constructed after Flodden. Another portion of it may be seen at the Vennel, which strikes off to the S at the SW corner of the Grassmarket. At the same point the West Port strikes off to the west. Tanner's Close, on the W side of this, contained the house of Burke and Hare, the brutal wholesale murderers of 1827. It no longer exists.

Continuing the line of the Grassmarket eastward from the SE corner is the Cowgate, originally an open road fringed with wood, connecting Holyrood with the St Cuthbert's quarter, but now one of the most squalid and densely crowded districts of Edinburgh. Begun as a patrician quarter in the time of James III., it was long a favourite residence for persons of high rank. Even so late as the 18th century Lord Minto and Lord Brougham's father lived here. The house of Sir Thomas Hope, 'the strong-minded, strong-willed, stout-hearted King's Advocate,' who gained fame and fortune by his defence of the moderator and members of General Assembly who were accused of high treason in 1606, which was one of the quaintest buildings left—steep-roofed and with treble row of dormers and high chimneys—was pulled down in 1887 to make way for the Public Library. On the opposite side of the street, with battlemented tower and steeple, is the old Magdalene Chapel, now used for the purposes of the Livingstone Memorial Medical Mission. Originally founded in 1503 on the site of a *Maison Dieu*, and probably repaired in 1544, the chapel—which was dedicated to St Mary Magdalene, and held in trust by the Corporation of Hammermen—seems to have been little altered except by the erection of the steeple in 1621 and the formation of some windows. The tomb of the foundress still remains, and in the centre window of the S wall are the oldest specimens of stained glass manufactured in Scotland. Here in 1560 Craig, Knox's colleague and successor, having forgotten the use of his native tongue during twenty-four years' absence from his fatherland, preached in Latin; here in 1578 the General Assembly meeting within these walls resolved 'that Bischoppes should be called be their awin names, or be the names of Brother in all tyme coming, and that lordlie name and authoritie be banished from

the Kirk of God, quhilk has bot a Lord, Chryst Jesus;' and here in 1661, for several days ere its removal to Kilmun, lay the headless body of the Marquess of Argyll, whose head had just replaced that of Montrose on the tower of the Tolbooth.

Though nowhere are buildings of historic importance so closely clustered as along the lines just described, there are scattered about in different parts of the town houses connected with various notable Scotsmen. Burns localities have been already referred to, and it may here be added that he seems to have moved from Lady Stair's close to one of the top rooms of the house in Buccleuch Street, opposite the end of Buccleuch Place, over the 'pend' that leads from Buccleuch Place to St Patrick's Square. In the following winter, when he revisited Edinburgh, he lived in the top room of the house at the SW corner of St James Square, with the window in the gable looking towards the General Post Office. Clarinda's house was in General's Entry, which opened off the Potterrow on the site now occupied by the Marshall Street Public School. Scott, the connecting link of Burns with the later generation of Edinburgh literary men, met the great bard but once. 'As for Burns,' he says, 'I may truly say *Virgilium vidi tantum*. I was a lad of fifteen in 1786-87, when he came first to Edinburgh, but had sense and feeling enough to be much interested in his poetry, and would have given the world to know him. . . . As it was I saw him one day at the late venerable Professor Ferguson's, where there were several gentlemen of literary reputation, among whom I remember the celebrated Dr Dugald Stewart. Of course we youngsters sat silent, looked and listened.' Scott was, however, able to give the name of the author of some lines affixed to a plate Burns was admiring, and received in return a look and word which he always remembered with great pleasure. The house where they met seems to have been Sciennes House (in the district of the same name), to which Ferguson removed in the end of 1786. This seems to be the building on the N side of Braid Place, close to the Sciennes. The house in which Scott himself was born stood in College Wynd, and the site is marked by a tablet placed by the Town Council on a building at the corner of Chambers Street and Guthrie Street, opposite the University. His other localities are 25 George Square, where his father lived after moving from College Wynd, the second floor of 108 George Street, where he set up house after his marriage (his mother died at No. 75 of the same street), 19 South Castle Street, and finally 39 Castle Street, where he lived for twenty-six years—from 1800 to 1826. When he admitted the authorship of the famous novels he was living in a furnished house at 8 Walker Street (off Coates Crescent), and the last night he spent in Edinburgh was at a hotel at 34 and 35 St Andrew Square, now used as the office of the Scottish Union and National Insurance Company, whence he was carried unconscious to start on his last journey to Abbotsford. Constable's shop was at 10 Princes Street. Dugald Stewart lived in a house, now removed, in the Horse Wynd at the E end of the Canongate, and died at 5 Ainslie Place. Sir William Hamilton spent the last years of his life at 16 Great King Street, while Sir William Allan, R.A., lived at No. 72 of the same street, and Sir Henry Raeburn for a time at 133 George Street; the 'Man of Feeling' lived at 4 Brown Square, now 36 Chambers Street, and died at 6 Heriot Row; 'Christopher North' lived in turn at 53 Queen Street, 29 Anne Street (in the Dean district), and 6 Gloucester Place (W of Royal Circus), where he died; his celebrated son-in-law, Aytoun, the author of *The Lays of the Scottish Cavaliers*, lived at 1 Inverleith Terrace, and at 16 Great Stuart Street; and the site of Ambrose's Tavern, where the scene of the famous 'Noctes' is laid, is now occupied by part of the Register House buildings. The Ettrick Shepherd, when in town, lodged in Aun Street (which stood near the S end of the Waverley Bridge); at the Harrow Inn, at 46-54 Candlemaker Row (off the SE corner of the Grassmarket); and latterly at Deanhaugh

Street, on the car line, in Stockbridge, where *The Queen's Wake* was finished. It was at the Harrow Inn, too, that Dr John Brown first met 'Rab's' master, and the gentle and genial author of the imitatively pathetic idyl founded on the subsequent meeting lived himself for many years at 23 Rutland Street, at the W end of Princes Street. Sir James Simpson lived at 52 George Street. Jeffrey was born at 7 Charles Street, near the NE corner of George Square, took up house after his marriage at 18 Buccleuch Place (3d floor), and was tenant thereafter of 62 Queen Street, 92 George Street (where he was followed by Lord Cockburn), and 24 Moray Place, where he died. It was at 18 Buccleuch Place that the design of the *Edinburgh Review* first took form, and another of the early pillars of that work, Sydney Smith, lived first at 33 South Hanover Street, and thereafter at 19 Queen Street and 46 George Street. Brougham, the third great man of the group who 'cultivated literature on a little oatmeal,' was born at 21 St Andrew Square, and Hume's late years were passed in a house at the SW corner of the same square, in the corner house entering from 21 South St David Street.* Alison the historian lived in his father's house at 44 Heriot Row; Campbell the poet—in his early days when he 'instructed pupils in Greek and Latin,' and before *The Pleasures of Hope* came over him—in the second floor of the house on the N side of the archway leading from Potterrow to Alison Square (close to Marshall Street); Pollock wrote *The Course of Time* at 3 Davie Street, a street parallel to Nicolson Street, S of West Richmond Street; Dr Chalmers died at Church-hill House, No. 1 Church-hill (off Morningside Road), and his great coadjutor, Hugh Miller, had his first Edinburgh house at 5 Sylvan Place, off the S side of the Meadows, E of the Middle Walk; Darwin, when a medical student in Edinburgh, lodged at 11 Lothian Street, in which also De Quincey lived at one time at No. 42—the second floor left. Carlyle's first lodgings in Edinburgh were at Simon's Square, off Gibb's Entry, No. 104 Nicolson Street, and he lived afterwards at Moray Place, now 3 Spey Street (off Pilrig Street), and began his married life at 21 Comely Bank, near the SW corner of the Inverleith Public Park.

Of the old mansion houses that once stood in and around Edinburgh but few of importance now remain. Grange House in Grange Loan—an E and W line of roadway connecting Causewayside with Morningside Road—was originally the Grange or granary of St Giles' Church (whence the name of both house and district), but has been of course much altered and added to at various dates. The patrimony of the Dicks of Grange, into whose hands it came in 1679, and afterwards of the Dick Lauders, of whom the celebrated Sir Thomas Dick Lauder (1784-1848) is the best known representative, it was for a time the residence of Robertson the historian, who here wrote his last work, the *Disquisition* as to the knowledge the ancients had of India, and who died here in 1793. Bruntfield House, to the SE of Bruntfield Links (which also belonged to a family of Lauders, from the fifteenth century to the beginning of the seventeenth), has portions dating from the fifteenth century, and has been altered and added to at various times, but 'still preserves much of the character of the semi-fortified mansion with protecting outworks, which centuries ago frowned over the Boroughmuir.' It passed, in 1695, into the possession of the family of Warrender, to whom it now belongs, and in whom the blood of the Lauders still flows, through the female line. To the N in Whitehouse Road stood the old mansion of Whitehouse, part of which is still included in the buildings of St Margaret's convent, in which Robertson wrote his *History of Charles V.*, Home his *Douglas*, and Blair his

Lectures. To the W of this, in the Merchiston district, is Merchiston Castle, which has belonged to the family of Napier (now Lords Napier and Ettrick) since 1438. The lofty square tower, which forms a prominent part in the present pile of buildings, seems to have existed before that time, and to have been styled the King's House. Built evidently for defence, one of the walls being over ten feet thick, it had its strength severely tried in the course of the civil war in 1572, when its possession as the key to the southern approach to Edinburgh seems to have made it an object of desire to both King's and Queen's parties, and when it was in consequence, in the most impartial way, battered first by the one side and then by the other. Many members of the Napier family have risen to eminence, but the most famous of them all was John Napier, the inventor of logarithms (1550-1617). The castle is now occupied as a private boarding-school. Craig House, W of Plewlands, is an interesting building of the middle of the sixteenth century. Over the doorway is the date 1565, and the initials L.S.C.P., of which the first two are those of Lawrence Symson, the then proprietor of the estate, and the last two are probably those of his wife, whose name is, however, unknown. The mausoleum, which is said to be haunted by a 'Green Lady,' whose story, if ever she had one, has become lost in the mists of time, was long the residence of John Hill Burton (1809-81) the historian, whose library used to spread over half the rooms in the house, and even into some of the passages. The house is now used as a convalescent home in connection with the Royal Lunatic Asylum, within the grounds of part of which it stands. East Coates House, within the grounds of St Mary's Cathedral, to the N, is now the deanery of the diocese of Edinburgh. It was built by Sir Patrick Byres of Coates in the beginning of the seventeenth century. The lintel over the door of his town house in Byres Close in the High Street was removed by one of his successors in the lands of Coates, and built into the present mansion. The N wing contains also some of the ornamental portions taken from an old building in the Cowgate, known as the French Ambassador's House. Prestonfield and Peffer Mill, to the S of Arthur Seat, are separately noticed. Scott is said to have had the latter in his eye when he described the country residence of the Laird of Dumbiedykes.

Of modern houses of any size, the only noteworthy examples are the mansions of St Leonards and Salisbury Green, both side by side to the SW of the Queen's Park, and belonging respectively to the heirs of the late Mr Thomas Nelson and the late Mr William Nelson, the partners of the well-known publishing firm of Thomas Nelson & Sons. Both are excellent examples of the Scottish baronial style, and the former, designed by Mr John Lessels, has a very bold and imposing appearance, and now that the wood has begun to grow up around it, the bare aspect of the grounds that at first somewhat injured the general effect has been removed.

History.—There can be little doubt that the Castle rock early became, in the eyes of the ancient inhabitants of the district, a most desirable place on which to build their dwellings, since, from its precipitous and inaccessible character, it could easily be defended against the assaults of enemies. The oldest names seem to be those given to it by the Britons, *Mynydd Agned* (painted mount), and *Dineiddyn*; and by the Gael, *Dunedin*; and it may possibly be associated with the locality of the eleventh of the great Arthurian battles, which took place on the hill called Agned; but whether it was fortified by the Ottadeni or Gadeni, or whether, according to legend, it was a place of refuge and safety for the daughters of the Pictish kings, and hence got its name of the Castle of Maidens, must remain matters of conjecture. With regard to the latter, Buchanan is probably right when he says that it came from romances after the manner of the French, and is no older than the thirteenth century. The oldest form of the present name known is Edwinesburgh, which appears in 1128 in the foundation charter of Holyrood, and this it has got from Edwin, Aeduin, or Eadwine, who in 617 regained his paternal

* Traditionally this street takes its name from David Hume himself in jest, as the great historian was by no means looked on as a saint in his own day and generation; but it is much more likely to have got its title from the desire of associating the name of St David with that of St Andrew. There may, of course, have possibly been a desire to poke fun at Hume in selecting this particular street for that purpose.

realm of Deira, and extended his power over the Lothians as far at least as the Avon. The Castle and town—the latter, according to Simcon of Durham, being about 854 only a considerable village, on the eastern slope of the hill—next became a possession of the Celtic kings in the reign of Indulph (945-961), and was then called *Dun-Edin*, either 'the face of a hill,' or the 'strength of Edwin.' The name given to the Castle and the town, however, by King Edwin proved to be the one by which it was ever afterwards fated to be known, though it was not till about the middle of the fifteenth century that it came to be recognised as the capital city, being long considered too near the English border to be a place of safety. In 1093, on the death of Malcolm Ceanmor, Edinburgh became the place of refuge of Queen Margaret and her children, who were here besieged by Malcolm's brother, Donald Bane, who claimed the throne. Margaret, indeed, died in the Castle, and while the siege—or rather blockade, for the gates only were watched—lasted, those within, 'taught of God,' says Fordoun, 'through the merits of the holy queen,' brought down her body by a postern on the western side, where the rock was thought inaccessible, and, sheltered by a friendly mist, carried it in safety to Dunfermline. In the time of David I. the town had become of some importance, and was constituted a royal burgh. In the early part of the reign of William the Lion, who frequently resided at the Castle, still further progress was made, which must, however, have suffered some check during the time (1174-1186) that it was held by the English as one of the sureties for the payment of the ransom of the king. After its restoration, Alexander II. held his first parliament in Edinburgh, and in 1215 the pope's legate here held a provincial synod. Alexander III. made it the residence of his youthful queen, the daughter of Henry III., and the depository of the regalia and other valuables of the crown.

The Castle was surrendered to Edward I. in 1291, but afterwards passed into the hands of the Scots, who held it till 1294, when it was seized by the English, and remained in their possession till it was recaptured by Randolph, Earl of Moray, in 1313, and shortly after, in pursuance of Bruce's plan to leave no strengths for the enemy to hold, at least partially dismantled. According to Barbour, Randolph carried it by escalade with only thirty followers, being guided up a secret path on the NW side of the rock by one of his men, William Francis or Frank, who had found out the track when resident in the fortress some years before, and had been in the habit of stealing out by it during the night to visit his sweetheart in the town. In 1322 Holyrood Abbey was plundered by an army of Edward II.; and in 1326 we find it the meeting-place of a parliament of Robert Bruce, and again, in 1328, of another which ratified the treaty with Edward III. which secured the independence of Scotland. In 1334 the Castle and town were surrendered to Edward III., who had invaded Scotland to support the cause of Edward Baliol, and in 1336 seems to have afforded brief shelter to a body of mercenary troops under Guy, Count of Namur, on their way to join Edward III. at Perth. Encountered on their march at the Boroughmuir by the Earl of Moray and a body of Scots, the mercenaries were defeated and driven in confusion into the town, where many of them were slain and the rest pursued to the dismantled Castle, where they remained one night, but being unable to defend it, had to surrender on the following day to the Earl, by whom they were set free on condition of never again bearing arms against David Bruce. The Castle was rebuilt and strongly garrisoned in 1337 by Edward III. on his return from the N, but in 1341 it was recaptured by Sir William Douglas. One of Douglas's party feigning to be an English merchant, went to the governor of the Castle and represented that he had in his vessel, just arrived in the Forth, a cargo of wine, beer, and other delicacies, which he wished the governor to purchase. Samples of the wine and beer having been found satisfactory, the price was settled, and a time—early in the morning to avoid risk of disturbance

from the Scots—was fixed for the delivery of the goods. At the hour appointed, the merchant arrived, accompanied by twelve resolute and well-armed followers, habited as sailors, and the Castle gates were immediately opened for their reception. On entering the Castle, they easily contrived to overturn the waggon on which the supposed goods were piled, and instantly put to death the warder and the sentries. The appointed signal being given, Douglas and a chosen band of armed followers quitted their place of concealment in the neighbourhood, and rushed into the Castle, when the garrison, caught unawares, was after a brief struggle overpowered, and the fortress regained for Scotland.

During the latter part of the reign of David II. Edinburgh was the meeting-place of numerous parliaments, contained the mint, and was confessedly the chief town, though not yet the actual capital, of Scotland. The latter dignity was, however, not far off, for on the accession of the Stewart dynasty Edinburgh became really—though probably not officially till 1452, when it became the seat of the Court of the Four Burghs—the chief burgh of the kingdom, and its fortunes became identified with those of that ill-fated house. Yet even in the reign of Robert II., with whom the city was a favourite residence, when it was visited by a body of French knights and gentlemen, who came to give aid to the King against the English, it is described as consisting of about 4000 houses, so poor that these French visitors could not be provided with proper accommodation. In 1385 Richard II. made an incursion into Scotland, when he spent five days burning St Giles' Church, Holyrood Abbey, and the greater part of the town, but was foiled in his attempt to capture the Castle. Henry IV., in 1400, repeatedly assaulted the Castle, but he was firmly repelled by the Duke of Rothesay, then heir-apparent to the Scottish crown. In 1402 Edinburgh was the meeting-place of the parliament, convened at this time to inquire into the assassination of the Duke of Rothesay; and while James I. of Scotland was a prisoner in England, the city shared largely in the general desolation which the continual struggles of the turbulent nobles brought on the whole country. Even after his release things went badly, for in 1431 there was a serious outbreak of pest; but the sunshine of royal favour no doubt helped on such growth and prosperity as enabled the young city to get over not only its many misfortunes, but also the heavy strain which the payment of its share of the King's ransom (50,000 English merks) must have caused. James frequently resided at Edinburgh, and it was at Holyrood that, in 1429, he received the submission of the Lord of the Isles, and that his son, afterwards James II., was born. At Holyrood, too, after the sudden and terrible tragedy of Perth—and this was the first coronation that had taken place elsewhere than at Scone—was the child king crowned; and during his long minority the Castle became a frequent scene of contest and intrigue between the two leading men of the day, Sir William Crichton and Sir Alexander Livingstone. In 1444, a quarrel having arisen between them, the King was for a time detained by Crichton in the Castle in dignified captivity. From this he was rescued by his mother, who, announcing her intention of proceeding on a pilgrimage to Whitekirk in East Lothian, had her luggage put on board a vessel in Leith. Inside one of the baskets the young King was concealed, and no sooner had the ship on which he was with his mother got out of Leith than it sailed up instead of down the Firth, and he was soon safe in charge of Livingstone at Stirling. He was immediately after again carried off by Crichton, who seized him as he was taking his morning ride in the royal park at Stirling, but further quarrel between the rivals was prevented by a serious danger that seemed to both to menace the Crown. This was the ever-increasing power of the house of Douglas. The then Earl of Douglas, a youth of only seventeen, was noted for his pride, extravagance, and display of power. He paid no duty at court, did no homage, and was said to have a council of his own somewhat resembling a parlia-

ment. Mediæval rulers brooked no too-powerful subjects, and so Douglas and his brother, having accepted an invitation to visit the King in Edinburgh Castle, were suddenly seized and put to death. James II. and his queen, Mary of Gueldres, whom he married in 1449, were both great benefactors to the city, and, by the grants and immunities they bestowed, brought it greater increase of prosperity than had any previous monarch.

James III., during the course of his troubled reign, also conferred on the city, which he made his chief place of residence, various privileges; and during his time Edinburgh became a place of refuge for Henry VI. of England after his defeat at Towton in 1461. James' marriage to the Princess Margaret of Denmark in 1469 was celebrated by the city with much rejoicing. The joy and prosperity were, however, of but short duration, for there soon after came a pestilence so deadly and destructive that a parliament, summoned in 1475, was deterred from assembling. Troubles of another kind soon followed in connection with the intrigues of the nobles against the King's favourites. In 1481 there assembled on the Boroughmuir one of the largest armies ever gathered in Scotland, 'fifty thousand fighting men, by carriage men and borderers,' and all no doubt, as had been commanded, 'in their best array with forty days' victual.' They were not, however, destined 'to pass forward with the King where he pleased in defence of the realm,' but only two days' march to Lauder, where the grim Angus and his friends had their will of the favourites, and whence the poor King himself was carried back to Edinburgh and lodged in the Castle in dignified captivity, 'not put thair as ane prisoner, but for the mainteining of the commounweill . . . and thus thair was peace and rest in the countrie the space of thrie quarteris of an yeir.' A series of intrigues, in which the exiled brother of the King, the Duke of Albany, was involved, led to a visit from Albany accompanied by the Duke of Gloucester and ten thousand men, who, according to Pitscottie, 'planted their pallions' on the Boroughmuir, whence came the two Dukes and a thousand gentlemen, who 'entered into the Tolbooth before the lords of Scotland, who were sitting then in council,' and desired that the King should be set at liberty. This was agreed to, and the monarch, with Albany on the horse behind him, proceeded amid general rejoicing to Holyrood, 'where they remained a long time in great mirriness.' The merchant burgesses and community having paid to the English 6000 merks sterling on the King's behalf, he in return granted them the 'Golden Charter,' and presented to the craftsmen the famous ensign known as the Blue Blanket, with their heraldic bearings embroidered on it by the Queen. It has ever since been 'kept by the Convener of the Trades, at whose appearance therewith it is said that not only the artificers of Edinburgh are obliged to repair to it, but all the artisans or craftsmen within Scotland are bound to follow it, and fight under the Convener of Edinburgh as aforesaid.' For a time after this hollow truce was made between James and the nobles there was peace, but ere long Albany had to flee for his life, and James, having 'garnished the Castle with men and victual . . . and put his whole pose of gold and silver in it,' rode away to meet his destiny at Sauchieburn.

In the end of 1483, the city was the place of meeting of the first parliament of James IV., in whose time it still remained a favourite royal residence, and whose coronation as well as his marriage with Margaret Tudor both took place at Holyrood. At the same place he also entertained Perkin Warbeck, in 1495. The royal favour, however, brought the citizens evil as well as good, for when, in 1513, during one of the periodic visits of the pest, the King assembled his forces on the Boroughmuir, and departed on that inroad into England which terminated so disastrously at Flodden, all the magistrates and able-bodied citizens went in his train, and in few places could grief over the result have been more poignant, or the consequences more severe. Of the many dire portents that had preceded, but not pre-

vented, the departure of the army, some seem to have befallen here, and Pitscottie records that 'there was a cry heard at the market-cross of Edinburgh, at the hour of midnight, proclaiming as it had been a summons, which was named and called by the proclaimer thereof The Summons of Plotcock; which desired all men, "To compear, both earl and lord, and baron and gentleman, and all honest gentlemen within the town (every man specified by his own name) to compear within the space of forty days, before his master where it should happen him to appoint, and be for the time under the pain of disobedience." But whether,' wisely adds the chronicler, 'this summons was proclaimed by vain persons, ight-walkers, or drnk men for their pastime, or if it was but a spirit, I cannot tell truly.' Of all who were named in the summons tradition asserts that but one escaped the fatal field, and this was a worthy burgher, Mr Richard Lawson, who, 'being evil-disposed, ganging in his gallery-stair forment the cross, hearing this voice proclaiming this summons, thought marvel what it should be, cried on his servant to bring him his purse; and when he had brought him it, he took out a crown and cast over the stair, saying "I appeal from that summons, judgment and sentence thereof, and takes me all whole in the mercy of God, and Christ Jesus his son,"' and so, by foresight, tried to render himself safe in both worlds. Sadly as the city suffered, however, George of Touris—who had been left in chief charge in the absence of the provost and magistrates, along with four others for the bailies, 'til have full jurisdiction in their absence'—and his companions proved worthy of their trust, and no sooner did word of the disaster arrive than they at once ordered 'that all manner of personis, nyhbours within the samen, have reddy their fensible geir aud wapponis for weir, and compeir thairwith to the said president's, at jowing of the comoun bell, for the keeping and defens of the toun against thame that wald invade the samyn.' The inhabitants as well as the 'nyhbours' responded gallantly to the command, and one of the results of their zeal was, as we have already seen, the Flodden Wall.

In all the troubles of the long minority of James V., and in the reign of the unfortunate Mary, Edinburgh had more than its fair share. When, in 1515, the Duke of Albany arrived from France to assume the regency, he was received 'with greit blythnes and glore,' and took up his residence at Holyrood, where he summoned a convention of the nobles to meet him. The 'blythnes,' however, did not last, and through the rivalry of the Douglasses and Hamiltons the city 'became the scene of a succession of faction fights, rising at times almost to the dignity of civil war.' Of these the most famous is the skirmish of 1520, known as Cleanse the Causeway, which was the outcome of an attempt made by the Earl of Arran and some of the other western nobles to make Angus a prisoner. The famous Gawin Douglas, Bishop of Dunkeld, strove to act as mediator, and setting out from his own house, which was in the Cowgate, proceeded to Blackfriars Wynd, where Archbishop Beaton resided, to ask for his assistance in the task. The Archbishop, who was a strong Hamilton partisan, declared himself unable to do anything, and, in the heat of his protestations that on his conscience he could not help it, struck his breast, and so betrayed the fact that he had on beneath his robe a suit of armour. 'How now, my Lord,' retorted Douglas, 'methinks your conscience clatters.' The attack was to be made, as the Douglas party was supposed to be weak at the time, but the result was the catching a Tartar; for Angus' followers, having barricaded some of the closes and wynds, kept their assailants at bay till, assistance arriving, they made that clean sweep of their opponents which gave the contest its name. Several of the leading men of the Arran party and some eighty of their followers were slain, and the Earl himself escaped with difficulty across the Nor' Loch, while the clear-conscienced Beaton took refuge in the Blackfriars' Church,* where

* This was E of the University, near the site of the Fever Hospital.

he was 'takin out behind the alter and his rockit rivin aff him, and had been slaine had not beine Mr Gawin Dowglas requested for him, saying it was shame to put hand in ane consecrat bischop. So he was saiff at that tyme.'

The Castle was the place where the captive James V. spent much of his youth, with David Lyndsay for his page, whence he was brought like a puppet by Angus from time to time, to be 'in triumph shown to his own people,' and whence he had, no doubt sore against his will, more than once to lead the Douglas forces, along with the townsmen of Edinburgh and Leith, against the friends who were attempting to release him. Edinburgh was now also, and continued to be, the regular meeting-place of the parliaments. After James recovered his freedom, he seems to have spent a considerable portion of his time at Edinburgh, and both his wives were received most warmly by the citizens. For the entry of Magdalen, Lyndsay describes them as

'Makand rycht costlie scaffolding,
Depayntit weill, with gold, and azure fyne,
Reddie preparit for the upsetting,
With fontanis, flowing watter cleir, and wyne,
Disgaysit folkis, lyke creaturis divyne,
On ilk scaffold, to play ane syndrie storie;'

but, alas! ere a few weeks were passed 'triumph and mirriness was all turned into deregies and soull massis, verrie lamentable to behold,' and the fair young bride was laid with solemn pomp in the royal vault at Holyrood. In 1538 Mary of Guise was welcomed with as great rejoicing as had been her predecessor, and the effect of the 'rewards and propynes' then made seems to have been somewhat to impoverish the municipal treasury, for the council had, almost immediately after, to mortgage the northern vault of the Netherbow Port to raise money to repair the rest of that structure, and in 1541 the sum of 100 merks had to be borrowed for the repair of the park walls of Holyrood.

Shortly before this, however, the King had, by the institution of the Court of Session in 1532, conferred on the city a boon which has, more than almost any other, contributed to its prosperity and residential advantage; and in curious contrast to the liberal forethought displayed in this act, is the execution by fire at Greenside, two years afterwards, of Norman Gourlay and David Straiton, for their profession of the doctrines of the Reformers; and in 1542, on the Castle Hill, of 'twa blackfreris, ane channon of Sanct Androis, the vicar of Dollour, ane priest, and ane lawit man that duelt in Stirling,' who were all found guilty of the same heinous offence. The fatal 14th of December came, however, all too soon, and James was laid by the side of his first wife in Holyrood Chapel. The period that followed was the darkest in all the fortunes of the city. Cardinal Beaton, who had placed himself at the head of the Catholic party, was able to prevent the celebration of the marriage that had been arranged between the infant Mary and Prince Edward of England, but was utterly unable to guard against the storm his action caused. On May day, 1544, he was surprised by the sudden appearance in the Firth of Forth of two hundred English ships—which, originally fitted out for an expedition to France, had been suddenly directed N—and incontinently fled to Stirling, leaving others to bear the brunt of the conflict brought about by his selfish ambition.

The English forces, under the Earl of Hertford, having disembarked at Newhaven, took possession of Leith, and sent to demand the immediate surrender of Edinburgh. The burghers, though but ill prepared for resistance, did their best to defend themselves, and not till the second day, and after a very bloody conflict, was the enemy able to take possession of the town and to attack the Castle, which, however, proved too hard a nut for them to crack. 'On the next day,' says Bishop Lesley, 'the great army came forward with the haill ordinances and assailed the town, which they found void of all resistance, saving the ports of the town were closed, which they broke up with great artillery and entered thereat,

carrying carted ordinances before them till they came in sight of the Castle, where they placed them, purposing to siege the Castle. But the laird of Stanehouse, captain thereof, caused shoot at them in so great abundance, and with so good measure, that they slew a great number of Englishmen, amongst whom there was some principal captains and gentlemen; and one of the greatest pieces of the English ordinances was broken; wherethrough they were constrained to raise the siege shortly and retire them. The same day the English men set fire in divers places of the town, but were not suffered to maintain it, through continual shooting of ordinance forth of the Castle, wherewith they were so sore troubled that they were constrained to return to their camp at Leith. But the next day they returned again, and did what they could to consume all the town with fires. So likewise they continued some days after, so that the most part of the town was burnt in cruel manner; during the which time their horsemen did great hurt in the country, spoiling and burning sundry places thereabout, and in special all the Castle and place of Craigmillar, where the most part of the whole riches of Edinburgh was put by the merchants of the town in keeping, which, not without fraud of the keepers, as was reported, was betrayed to the English men for a part of the booty and spoil thereof.' A contemporary English account says that, 'considering the strength of the said Castle, with the situation thereof, it was concluded not to lose any more time, nor to waste and consume our munition about the siege thereof. Albeit the same was courageously and dangerously attempted, till one of our pieces, with shot out of the said Castle, was struck and dismounted.' The town itself was utterly destroyed. 'Finally,' says the account just quoted, 'it was determined by the said Lord Lieutenant [the Earl of Hertford] utterly to rinate and destroy the said town with fire: which for that the night drew fast on, we omitted thoroughly to execute on that day; but setting fire in three or four parts of the town, we repaired for that night unto our camp. And the next morning, very early, we began where we left off, and continued burning all that day and the two days next ensuing continually, so that neither within the walls nor in the suburbs was left any one house unburnt: besides the innumerable booty, spoil, and pillage that our soldiers brought from thence, notwithstanding the abundance which was consumed with fire. Also we burnt the Abbey called Holy Rood House, and the Palace adjoining the same.' The poor people who had managed to convey their goods and gear out of the city, in hope of finding some safe place of concealment without, did not, unfortunately, fare much better, for four thousand light horsemen from the Borders having arrived, the country was laid waste for seven miles round, and there was 'left neither pile, village, nor house standing unburnt, nor sacks of corn,' and there was found 'much good stuff which the inhabitants of Edinburgh had, for the safety of the same, conveyed out of the town.'

Nor was this the last of the misfortunes that here befell in consequence of the rough wooing, for after the battle of Pinkie, in 1547, some damage was again done, principally about Holyrood, by the English, against whose further attacks the city was, however, protected after the following year by a garrison of 6000 soldiers sent by the French King to the assistance of his old allies and posted at Leith. Fresh troubles were, however, at hand, for the clouds of the Reformation storm had already begun to gather. John Knox arrived in Edinburgh in 1555, and by his zealous labours soon brought to a head the discontent that already existed among the excited people, and speedily gained general acceptance for the new doctrines. In the following year the 'rascal multitude,' much to the indignation of the Queen Regent, who addressed a strong remonstrance to the magistrates, destroyed some of the statues in St Giles' Church; and in 1558 they went still further, for, indignant at an edict of the bishops and clergy ordering certain heretics to show their sorrow for the error of their ways by walking penitently in the procession of the patron saint of the city, which took

place on the 1st Sept. every year, and abjuring their errors at the Cross, they carried off the image of the saint before the time when it was to be borne through the streets, and after ducking it in the Nor' Loch (where there was a stool for ducking offenders against morality) they finally committed it to the flames. The clergy were, however, determined not to be balked, and a smaller image, procured from the Greyfriars Church, was borne aloft through the streets with due pomp, the Queen Regent leading the way, so that her presence might restrain the violence of the people. As soon, however, as she withdrew 'to hir dennar' Little St Giles, as the image was called, was attacked in the most vigorous manner. One iconoclast taking the figure 'by the heillis and dadding his head to the calsay' left it without head or hands, on which he exclaimed, 'Fye upon thee, young Sanct Geile, thy father wold have taryed four such;' and then, says Knox, the priests fled faster than at Pinkie; 'doun goes the croses, of goes the surple, round cappes cornar with the crounes; the Gray Freiris gapped, the Preastis panted and fled, and happy was he that first gate the house; for sic ane suddan fray came never amonges the generation of Antichrist within this realm befor.' Knox had before this time retired to Geneva, whence he returned in 1559 to find his party in open resistance to the Regent. Organised at Perth as the Congregation, the leaders of the movement led their followers triumphantly to Edinburgh, took possession of the mint and other government property, and openly defied the clerical party, whose headquarters were at Leith, where there was a French garrison. A good deal of fighting took place, but the ill-trained troops of the Reformers could not cope with the well-disciplined auxiliaries of France, and not till help was received from Queen Elizabeth in 1560 were they successful in gaining the freedom they desired. The same year was also noteworthy for one of those outbursts of popular violence for which Edinburgh was long famous, a riot having taken place in consequence of an attempt by the magistrates to suppress the game of Robin Hood.

Although Queen Mary returned to Edinburgh in August 1561, and was then conveyed in state to Holyrood, she did not make her formal entry into the capital till September, when 'an endless succession of pageants and allegories greeted her progress through the town. The most costly arrangements had been made for her reception. All the citizens were required to appear in gowns of fine French satin and coats of velvet, and the young men to devise for themselves some fitting habiliments of taffeta or other silk, to convey the Court in triumph. The propyne or gift of the citizens was borne on a cart, in sight of the Queen, in a rich coffer, with certain bairns fittingly attired as its custodians. At the Butter Tron at the head of the Lawnmarket was a triumphal arch, on the which were certain bairns singing in the maist heavenly wise, and suspended from the arch was a cloud opening with four leaves, in the which was ane bonny bairn. As the Queen passed through the archway the cloud opened and the bairn descended as it had been an angel, and delivered to her highness the keys of the town, together with a Bible and psalter,' after which 'the bairn returned to its place and the cloud steekit.' There were other allegorical representations of many kinds, into the meaning of which it is to be hoped the young ruler did not inquire too minutely, as they were intended to show the dire fate impending over all the adherents of the old faith.

Far different all this, as well as the loyal rejoicings at the opening of the Parliament of 1563, when people were heard to exclaim, 'God save that sweet face! Did ever orator speak so sweetly?' from the scene that followed in 1567, after six sad years of weary turmoil, when, after Carberry, with her fair face all stained with dust and tears, she was 'conveyed to Edinburgh and lodged in the midst of the town, in the provost's lodging,' while 'the common people cried out against her majesty at the windows and stairs, which was a pity to hear, . . . and others evinced their malice in setting up a banner or ensign whereupon the king was painted lying dead

under a tree and the young prince upon his knees praying, "Judge and revenge my cause, O Lord!" Vain then the sweet voice of the orator, as 'her majesty cried out to all gentlemen and others who passed up and down the streets, declaring how that she was their native princess, and that she doubted not but all honest subjects would respect her as they ought to do, and not suffer her to be abused.'

Four successive regents between 1567 and 1573 failed either to bring peace to the metropolis, or a cessation of hostilities between the two great conflicting parties of Queen's men and King's men, as the respective partisans of Mary and her son James VI. styled themselves. The city, at the time of Mary's escape from Loch Leven Castle, in 1568, was both desolated with pestilence and bristling with arms; and, after the assassination of Regent Moray at Linlithgow in 1570, suddenly passed under the military ascendancy of the Queen's party. Kirkcaldy of Grange, provost of the city and governor of the Castle, and one of the ablest soldiers of the period, ordered all opponents of the Queen to leave the city within six hours, planted a battery on the roof of St Giles' Church, strengthened the city walls, and provoked a long and disastrous strife. Two parliaments sat in the city in May 1571—the one on the Queen's part in the Tolbooth, the other for King James in Canongate; and while they fulminated forfeitures at each other, their respective followers were in constant conflict in the streets and lanes of the harassed city, which suffered from the fire of besieged and besiegers alike; while the unfortunate prisoners on both sides, as well as citizens suspected of aiding the enemy, were put to death or punished in the most barbarous way. The Castle was at length captured by the aid of an English army, in 1573, and with its fall the last hopes of the Queen's party came to an end.

The early part of the life of James VI. was spent at Stirling, and Edinburgh saw but little of regal show till 1579, when the British Solomon made his first public entry into the city amid great popular display. The allegories in which the age delighted were as numerous as usual, and one in particular reminded him of his need for wisdom by a representation of Solomon giving his decision between the two women; the keys were presented to him at the West Bow by an angel descending from a globe, he was addressed in Greek, Latin, and Scotch by fair representatives of Peace, Plenty, and Justice, and was lectured in Hebrew by Religion, while at a later hour Bacchus sat at the Cross and dispensed wine to all and sundry. In spite of this flattering reception and of former costly gifts, his gracious majesty did not prove such a kindly ruler as was expected, and tried to interfere in civic matters, and to use the city coffers in the arbitrary and high-handed way that in his successors led to the disasters that befell the later Stewarts. Costly entertainments were given to ambassadors and other notables in Holyrood at the city's expense, till at length his greed and continuous encroachments on public rights provoked the bitterest resentment. At times James was on good terms with the citizens, receiving from them gifts of money and public services; while again, as in 1596, he was so infuriated at them that he retired to Linlithgow, removed the offices of national administration, threatened to utterly destroy the city, and cherished such an intense anger against it that he vowed he would raze it to the foundation and erect a pillar on the spot where it stood. All this resulted from a riot in connection with some of the ecclesiastical disputes of the period, when the King was insulted and his life threatened, some calling 'Arms,' others 'Bring out the wretch Haman,' and others 'The sword of the Lord and of Gideon.' The puissant monarch refused for a time to be pacified; but after various negotiations and the receipt of a present of 20,000 merks from the citizens, he was at length pleased to revoke his declarations of hostility, and made another pompous ceremonial entrance into Edinburgh, amid great demonstrations of loyalty. A fresh demonstration took place on the arrival of Queen Anne from Denmark, and a 'propyne of ane jowell' presented

to the lady. In 1603, on the eve of his departure to assume the English crown, James delivered a formal valedictory address to the people in St Giles' Church, and when, after a lapse of fourteen years, he visited the city again he was greeted with great demonstrations of joy and much servile adulation, and presented with a large sum of money.

In 1633 Charles I. was crowned King of Scotland at Holyrood with great splendour, and held in the city, two days later, his first Scottish parliament. Shortly after, by his proceedings against Presbyterianism and his attempted introduction of a liturgy on the 23rd July 1637, he excited strong disaffection to his government throughout the country, and kindled a resentment which lasted more or less till the end of his dynasty. In all this, Edinburgh, as the seat of executive government, had an extensive and distressing share. The citizens were organised and trained, under direction of the town council, to resist the King's measures of ecclesiastical change. A conflict again arose between the city and the Castle, which terminated in favour of the city; and though the King afterwards appeared in person and was well received and entertained by the magistrates, the city adhered to the cause of the Covenant, and embodied a regiment of 1200 men for its support.

In 1650 Charles II. was proclaimed at the Cross, and, could he have attained tolerable footing in England, would evidently have been well supported in Edinburgh. Cromwell, in September of the same year, following up his signal victory over the Scottish army at Dunbar, took possession of Edinburgh, laid siege to the Castle, and forced it to capitulate; and did not allow the magistrates, who had all left the city, to return and resume its management till near the end of the following year. The city enjoyed a repose of several years under Cromwell, but was so impoverished that its corporation could not meet a claim upon it for £55,000, and scarcely any citizen was able to pay his debts. The news of the Restoration in 1660 was enthusiastically welcomed, and drew from the town council a congratulatory address and a gift of money to the King; and in solemn state, through streets guarded by armed burghers, the remains of the body of the Great Montrose were brought together and interred in St Giles' Church. The parliaments, however, which met in 1661 and 1662, caused a considerable diminution of the joy, for they introduced confusion and trouble afresh by passing enactments against Presbyterianism, and causing strong measures to be taken against the Covenanters. Edinburgh was put in a posture of defence; its gates were barricaded, and all ingress and egress prohibited without a passport. The very members of the law courts assumed arms; the gentlemen of the surrounding country were called in to afford their aid; and, from 1663 till the end of Charles II.'s reign, the city was the scene of the trial, torture, and execution of great numbers of Covenanters, many of them the best and brightest men of the age. The year 1670 saw also the execution of the noted wizard, Major Weir, and his sister. The latter was hanged in the Grassmarket, and the former was strangled at a stake and his body burned at Greenside, on the spot now occupied by Lady Glenorchy's Chapel.

The Duke of York, afterwards James II. of England and VII. of Scotland, resided in Edinburgh from 1679 to 1682, and 'behaved himself in so obliging a manner' as to dissipate all the hard thoughts that had been previously entertained regarding him. A magnificent court was maintained and many new luxuries—the use of tea among others—were introduced into the country, and altogether the Duke, as well as Mary of Modena and his daughter Lady Anne, seem to have been very popular. The popularity, however, quickly vanished after his accession to the throne, when his measures in favour of the Roman Catholics provoked strong local dislike, and led to several riotous outbreaks. In particular, after convoking a parliament in Edinburgh in 1686, and finding it not sufficiently pliable for his purposes, he, by his own authority, did what the parliament refused to do—

took the Catholics under his royal protection, assigned for the exercise of their religion the chapel of Holyrood Abbey, promoted as many Catholics as possible to the privy council and other offices of government, and showed in every way an utterly reckless disregard of all constitutional pledges and obligations. Towards the end of 1688 his officers of state sank into inaction under fear of the anticipated movements of the Prince of Orange, the Court of Session almost ceased to sit, the students of the University burned the Pope in effigy, and clamoured for a free parliament, and the Earl of Perth, the acting head of the government of Scotland, at length took flight to the Highlands, leaving the city entirely at its own disposal.

No sooner did it become known that the Prince of Orange had landed in England, and that the regular troops were withdrawn from Scotland, than Edinburgh was peopled with Presbyterians from every part of the country, and the city became a scene of tumultuous confusion. A mob, comprising citizens, students, and strangers, rose at the beat of drum, gave riotous expression of inveterate hatred against everything popish and prelatic, and proceeded to demolish the royal chapel of Holyrood. There they were fired upon and repulsed by a guard of some hundred men, who still adhered to the interests of James. The mob, however, soon rallied, and overcame the guard, slaying some and capturing the rest; they then pillaged the Abbey Church, pulled down the Jesuits' college, plundered and sacked other religious houses and private dwellings of Roman Catholics throughout the city, and burned at the Cross the paraphernalia of the Roman Catholic chapels; in short, everything connected with the scorned religion or the ecclesiastical policy of the dethroned monarch was extirpated with a fierceness approaching to frenzy. The magistrates, notwithstanding their former obsequiousness to James, were equally zealous in their alacrity to accept the Revolution, and promptly sent a congratulatory address to the Prince of Orange, assuring him of their allegiance. A Convention of Estates, held at Edinburgh soon after, proceeded at once to declare the forfeiture of James VII., to offer the crown of Scotland to William and Mary, to abolish prelacy and to re-establish Presbyterianism. It was protected during its sittings by 6000 Covenanters from the West, whose presence acted as a check on the Jacobite garrison of the Castle under the Duke of Gordon, who adhered to the cause of the fallen King till, the last hopes of the party being extinguished by the fall of Dundee at Killiecrankie, he surrendered his charge in June 1689.

The citizens of Edinburgh, now full of bright prospects of prosperity, began to turn their attention to commerce, and invested largely (the Corporation itself to the extent of £3000) in the stock of the Darien Company, projected by William Paterson, the founder of the Bank of England, in 1695—only to their ruin, for the jealousy of other trading companies, and the remonstrances of the Spaniards, who feared interference with their colonies, induced King William to withdraw his countenance from the scheme, after he had sanctioned it by Act of Parliament; and of the gallant expeditions which sailed from Leith in 1698 and 1699 hardly a man returned. When the news of the landing reached Edinburgh the inhabitants went wild with joy, offering up thanksgivings in the churches, illuminating the city, and burning down the Tolbooth door in order to set free some prisoners. Equally violent were their demonstrations when the news of the failure came, and deep and loud the maledictions pronounced on the government which had betrayed them. The capital of £400,000—as great a sum probably, in comparison with the wealth of the country in those days, as forty millions would be now—was entirely lost, and many of the shareholders utterly ruined. The Darien House, which was erected for the offices of the Company,* and bore the date 1698,

* According to Macaulay a building for the offices was erected in Mylne Square, but this seems to be a mistake. There may have been a temporary office there, but the house built specially for the Company was undoubtedly that indicated above.

was a large plain building in Bristo, where the site is marked by a tablet on one of the houses. It became in the latter part of last century the city Bedlam, and was finally pulled down in 1871.

The accession of Queen Anne in 1702 was received without much show of feeling, but the meeting of Parliament at Edinburgh in 1706-7, to discuss the proposal for national union between Scotland and England, caused much excitement. Even while the proposal was merely hinted at, the citizens, smarting under the Darien disaster, with the recent massacre of Glencoe still fresh in their memories, and dreading the removal of government offices to London, regarded it with keen suspicion. When the proposal became known in its details, the long-cherished antipathies and jealousies of all classes against England kindled into a fierce spirit of opposition, and the citizens pressed in vast crowds to the Parliament House, and insulted there every member who was believed to favour the union. They afterwards attacked the house of their late provost, who was a strenuous supporter of the scheme, and then scoured the streets, and made themselves absolute masters of the city. The crown-commissioner ordered a party of soldiers to take possession of the Netherbow, posted military guards in Parliament Square and other central localities, and thus quelled for a time the surging riot; but so deep and general was the popular rage, and so great the alarm of the authorities, that nothing less than the whole available force was deemed sufficient for protection. The horse guards attended the commissioner, a battalion was stationed at Holyrood, and though three regiments of infantry were constantly on duty in the city, these proved barely strong enough to protect the Parliament during its deliberations. The Edinburgh people had, indeed, at first, some cause to complain of the effects of the measure which has so benefited the country at large, for with the departure of the members of Parliament, both peers and commoners, who had so long formed one of the mainstays of the place, there was a loss of prosperity, and the town remained for many years in an impoverished and heartless condition.

The Rebellion of 1715 commenced with an attempt to capture Edinburgh Castle by surprise. Fifteen hundred insurgents crossed over from Fife, but found the city so well protected by the fortifications which the magistrates had erected, and by the presence of a force, ready, under the Duke of Argyll, to give them a warm reception, that they declined to attack it, and marched southward. The arrival, shortly after, of 6000 Dutch troops, prevented the city from suffering any further menace. In 1736 Edinburgh was the scene of a remarkable tumult, known as the Porteous Mob. Two smugglers, named Wilson and Robertson, had been condemned to death for robbing the collector of excise at Pittenweem, in Fifeshire. Both these criminals made an attempt to escape one night by forcing a bar from the window of their cell in the Tolbooth prison, but Wilson, being a stout and powerful man, stuck fast in trying to get through, so that the jailers were alarmed and the escape frustrated. Wilson regretted much that he had attempted the passage first, and considering that by doing so he had prevented his fellow-culprit Robertson's escape, made a desperate resolve that he would yet give him an opportunity of evading the last penalty of the law. According to custom the culprits were, on the Sunday before the execution, taken, under the charge of four soldiers, to hear sermon at the Tolbooth Church. When the congregation was dispersing, Wilson, suddenly seizing one of the guards with each hand, and a third with his teeth, called to Robertson to make his escape, which he very quickly did, after knocking down the fourth guard. Wilson's bold exploit made him an object of popular sympathy, and the magistrates, being afraid of a riot and an attempt at rescue on the day of execution, supplied the town-guard, then commanded by Captain Porteous, with ball cartridge. After the execution the crowd began to hoot, and throw stones, as well as other missiles, at the executioner and the guard, when Captain Porteous rashly ordered his men to fire, and six people

were killed and eleven wounded. For this conduct Captain Porteous was tried for murder and condemned to be hanged. George II. was then in Hanover, and Queen Caroline, who was acting as regent, gave a respite for six weeks to the convict, preparatory, it was believed, to a full pardon; but such was the exasperation of the people, that they determined he should suffer, despite the royal clemency. A party of citizens accordingly assembled on 7 Sept. 1736, the night previous to the day fixed for Porteous' execution, and sounding a drum, soon gathered an immense number to their aid, when they took possession of and shut the gates of the city, to prevent the entrance of the Welsh Fusiliers stationed in the Canongate, and then seized and disarmed the town-guard. After an ineffectual attempt to force the Tolbooth door with sledge-hammers and crowbars, they had recourse to fire, and soon gained an entrance. Seizing the unfortunate prisoner, they carried him on their shoulders down the West Bow to the Grassmarket, calling at a shop on the way to provide themselves with a rope, and hanged him from a dyer's pole on the S side of the street, exactly opposite the Gallows Stone. Great indignation was excited by all this at court, and the lord provost was taken into custody, and admitted to bail only after three weeks' confinement. The city was threatened with severe punishment, and by a bill that passed the House of Lords, provision was made that the provost should be confined for a year, the city-guard abolished, and the gates razed; but in the Commons the whole was modified to a fine of £2000, to be paid to Porteous' widow.

At the outbreak of the Rebellion of 1745, the old and somewhat ruinous walls were hastily repaired, and efforts made to put the city in a state of defence, while on 19 Aug. Sir John Cope, with the troops stationed at Edinburgh, left that city for the North to meet the rebels. Prince Charles, avoiding an engagement with Cope, if the latter did not rather avoid one with him, descended with his adherents upon the Lowlands by Perth, and crossed the river Forth a few miles above Stirling. Advancing rapidly he soon reached Corstorphine, three miles from Edinburgh, where, to avoid the guns of the Castle, he made a southerly detour to Slateford, whence he wrote demanding the surrender of the city. The volunteers and militia, to whom the defence of the place had been entrusted, having disbanded themselves in a very cowardly way, negotiations had to be entered into; but the Prince, unwilling for delay, gave orders early in the morning to try to take the city by surprise. A party of twenty-four men were placed at the Netherbow gate and sixty close by in St Mary's Wynd; and these, on the gate being opened to let out a coach, rushed in, overpowered the guard, and soon obtained possession of the town. Thus, on the morning of 17 Sept., the citizens found the government of their capital transferred from King George to the Highlanders under Prince Charles Edward, acting as regent for his father; and at noon on that day the heralds, with the usual formalities, proclaimed James VII. as king, and read the Prince's commission of regency, at the town cross. Charles, having learned that the city was in possession of his troops, passed round by Arthur's Seat to avoid annoyance from the Castle, and took up his quarters at Holyrood, where he established his court. The magistrates were compelled to furnish supplies and the citizens to give up their arms, though private property was otherwise respected. On his return, after the victory of Prestonpans, he blockaded the Castle, provoking from it a cannonade which did considerable damage, but after two days the blockade was removed and further mischief to the inhabitants prevented. After the Prince's final defeat at Culloden, the Duke of Cumberland visited the city, and caused fourteen of the standards taken from the rebels to be burned at the cross—the standard of the Prince being carried thither by the common hangman, and the remaining thirteen by thirteen chimney-sweeps.

Famine tumults occurred in the city in 1763, 1764, and 1765, and were quelled only by military aid. In 1778 an occurrence took place, which, though eventually
