Introduction

What do these statistics cover?

Scottish Annual Business Statistics (SABS) provides data mainly on the Production (including Manufacturing), Construction and Service Sectors in Scotland. The Annual Business Survey, from which the statistics are largely derived, covers approximately two thirds of the economy. The main sectors **not** covered are the financial sector & parts of agriculture and the public sector. These statistics are therefore best suited to the analysis of individual industries rather than the economy as a whole.

The Tables include information on businesses' employment, turnover, purchases, approximate gross value added and labour costs. Data are classified according to industry group, geographical area and ownership. All figures are at current prices unless otherwise stated.

What year do tables relate to?

Please note that Tables mainly contain 2008-2015 data published on a [SIC 2007](#) basis only and were released on 30th August 2017.

When will the figures be updated?

New 2016 and revised 2015 figures are scheduled for release in Summer 2018.

Key Facts

The latest Scottish Annual Business Statistics (SABS), sourced from the Annual Business Survey (ABS), allow detailed analysis of the structure and performance of businesses in Scotland over the period 2008 to 2015. The ABS covers the "non-financial business economy", which accounts for approximately two thirds of the economy. The main sectors **not** covered are the financial sector & parts of agriculture and the public sector. These statistics are therefore best suited to the analysis of individual industries rather than the economy as a whole.

To set the SABS results in context it is useful to consider the performance of the Scottish economy as a whole in terms of [Scottish Gross Domestic Product \(GDP\)](#). Scottish GDP in constant basic prices grew each year from 1998 reaching a peak in Q2 of 2008. Scotland then entered recession, which lasted six quarters and returned to growth in Q1 of 2010. Further short periods of economic contraction occurred later in 2010, and then in early 2012. Since 2012 there has been year-on-year growth. The most recent figures show that the Scottish economy grew by 0.7 per cent during the first quarter of 2017, following a contraction of 0.2% in the previous quarter.

Notes:

- where "manufacturing" is referred to, this covers Section C of [Standard Industrial Classification \(SIC 07\) codes](#)
- where "construction" is referred to, this covers Section F of SIC 07 codes
- where "services" are referred to, this covers Sections G to S of SIC 07 codes (but does **not** include Section K "Financial and insurance activities" and parts of the public sector which includes Section O "Public administration and defence")
- where "remaining sectors" are referred to, this covers Sections A, B, D and E of SIC 07 codes (but does **not** include parts of agriculture under Section A)
- where GVA is referred to, this is approximate Gross Value Added at basic prices. The main drivers of GVA are: Turnover (the main component of income) and Purchases (the main component of the consumed goods and services).
- SABS financial data are in current prices i.e. the values have not been adjusted to take account of inflation.

Broad sectors

In 2015, cash terms GVA in the **services sector** amounted to £54.4 billion, compared to £12.5 billion in **manufacturing** and £7.1 billion in the **construction sector**. The **remaining sectors**, covered by SABS, accounted for £16.0 billion (oil and gas extraction accounted for £6.6 billion of this, note that SABS includes off-shore oil and gas activity).

Between 2014 and 2015, GVA in the **services sector increased** by £2.6 billion (5.0%) and **construction GVA increased** by £0.6 billion (8.4%). However, **manufacturing GVA reduced** by £0.9 billion (-7.0%). GVA for the **remaining sectors**, covered by SABS, reduced by £1.9 billion (-10.6%); this was due to falling GVA in the oil and gas extraction sector driven by the decline in the oil price.

Services

In 2015, the **two largest contributions** to GVA within **services** came from:

- the **retail trade sector** at £6.6 billion (12.1% of total **services** GVA); and
- the **architectural and engineering activities sector** at £5.0 billion (9.2%).

In 2015, the local authority areas contributing most to total GVA within the **retail trade sector** were Glasgow City (13.1%), Edinburgh City (12.8%) and Aberdeen City (8.7%). Please see related [Map for Local Authority Area share of Scotland's Retail sector](#).

The two services industry divisions experiencing the **largest absolute increases** in GVA, between 2014 and 2015, were:

- the **head offices and management consultancy sector** - up £542 million (+33.4%); and
- the **computer programming sector** – up £539 million (+25.1%).

The two services industry divisions experiencing the **largest absolute decreases** in GVA, between 2014 and 2015, were:

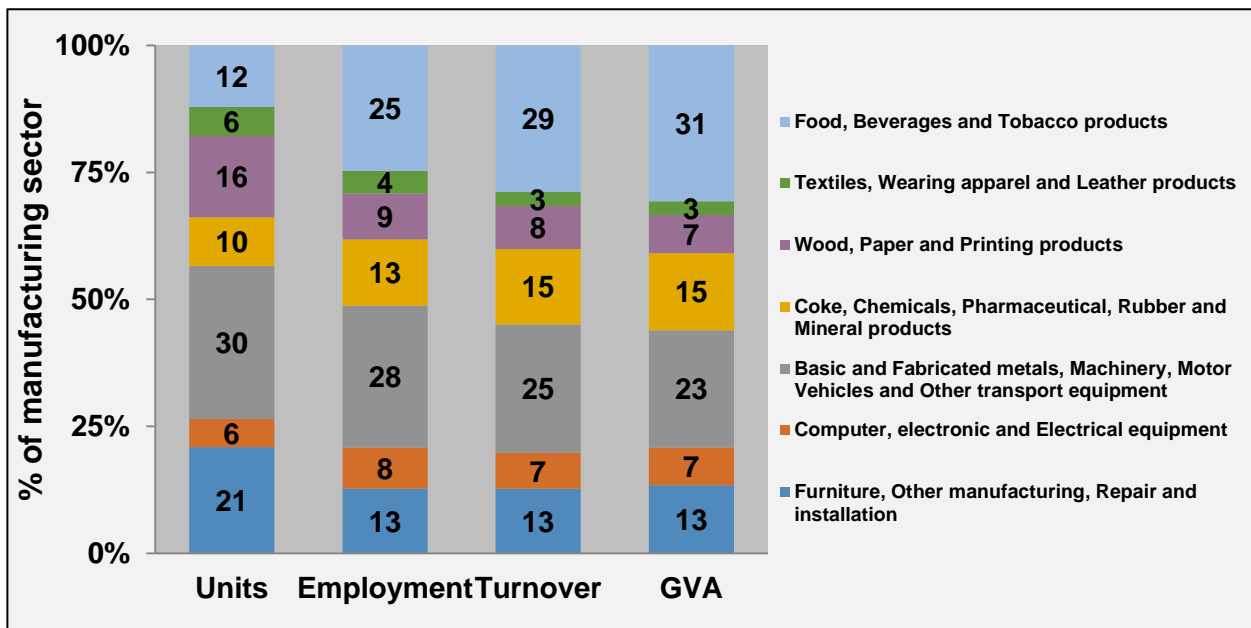

- the **architectural and engineering activities sector** - down £450 million (-8.2%); and
- the **retail trade sector** – down £431 million (-6.1%).

Manufacturing

In 2015, cash terms GVA in the **manufacturing sector** amounted to £12.5 billion.

Chart 1 below shows that the *combined industry divisions* making the largest contribution to **manufacturing** GVA in 2015 were "Food, Beverages and Tobacco products" (31%) (covers SIC 10-12) and "Basic and Fabricated metals, Machinery, Motor Vehicles and Other transport equipment" (23%) (covers SIC 24-25 & 28-30). The "Food, Beverages and Tobacco products" sector has contributed the most to manufacturing GVA in every year since the start of the series in 2008.

Chart 1: Manufacturing sector 2015 - Shares of the sector's Units, Employment, Turnover & GVA

In 2015, the **two largest contributions** to GVA within **manufacturing** industry divisions came from:

- the **manufacture of beverages sector** at £2.3 billion (18.5% of total **manufacturing** GVA); and
- **food products** at £1.5 billion (12.2%).

The two manufacturing industry divisions experiencing the **largest absolute increases** in GVA, between 2014 and 2015, were:

- the **manufacture of beverages sector** - up £167 million (+7.8%); and
- the **manufacture of motor vehicles, trailers and semi-trailers sector** – up £58 million (+26.1%).

The two manufacturing industry divisions experiencing the **largest absolute decreases** in GVA, between 2014 and 2015, were:

- the **manufacture of fabricated and metal products sector** - down £351 million (-23.3%); and
- the **machinery and equipment (nec) sector** – down £235 million (-22.9%).

In 2015, the local authority areas contributing most to total GVA within the **manufacturing sector** were Fife (10.7%), Aberdeen City (9.5%) and Glasgow City (8.6%). Please see related [Map for Local Authority Area share of Scotland's Manufacturing sector](#).

The two local authority areas experiencing the **largest absolute increases** in manufacturing GVA, between 2014 and 2015, were:

- **Moray** - manufacturing GVA up by £83 million (+20.4%); and
- **Fife** – manufacturing GVA up by £66 million (+5.2%).

The two local authority areas experiencing the **largest absolute decreases** in manufacturing GVA, between 2014 and 2015, were:

- **Aberdeen City** - manufacturing GVA down by £468 million (-28.2%); and
- **Aberdeenshire** – manufacturing GVA down by £247 million (-22.5%).

The reduction in **manufacturing** GVA in the North East of Scotland may be linked to the decline in the Oil price.

Construction

In 2015, cash terms GVA in the **construction sector** amounted to £7.1 billion. **Construction GVA was comprised of:**

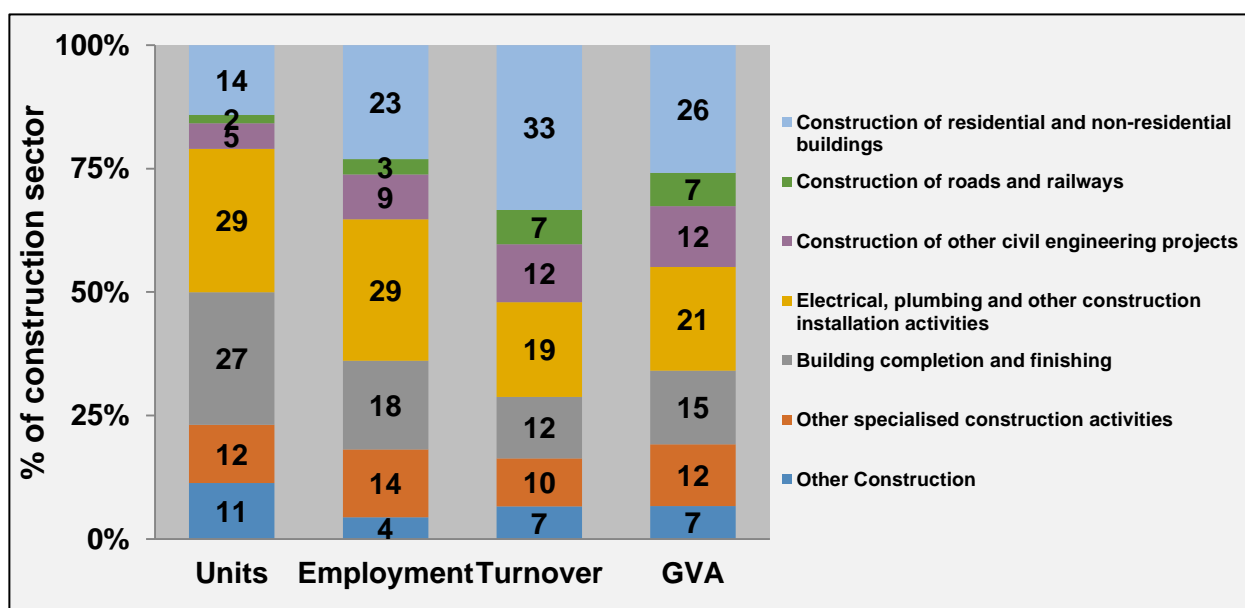

- **specialised construction trades** at £3.5 billion (49.6% of total **construction** GVA);
- **construction of buildings** at £2.2 billion (30.5%); and
- **civil engineering** at £1.4 billion (19.8%).

Within the **construction sector**, between 2014 and 2015, GVA increased for **construction of buildings** by £269.3 million (14.1%), **civil engineering** was up by £240.1 million (20.4%) and **specialised construction trades** was up by £45.2 million (1.3%).

In 2015, the local authority areas contributing most to total GVA within **construction** were Glasgow City (14.8%), Aberdeenshire (8.0%) and North Lanarkshire (7.7%).

Looking at the **construction sector** in more detail, Chart 2 below shows that "Construction of residential and non-residential buildings" (SIC 41.2) and "Electrical, plumbing and other construction installation activities" (SIC 43.2) sub-sectors together account for almost half of value added in the **construction sector**.

Chart 2: Construction sector 2015 - Shares of the sector's Units, Employment, Turnover & GVA

Company Ownership

In 2015, only 4.7% of business sites in the Scottish **non-financial business economy** were **foreign-owned**, however these **foreign-owned** businesses contributed 29.2% of Scotland's **non-financial business economy** GVA. One factor driving this is that **foreign-owned** businesses tend to be larger (in terms of employment) than UK-owned businesses, but the sectors that **foreign-owned** businesses tend to operate in also has an impact.

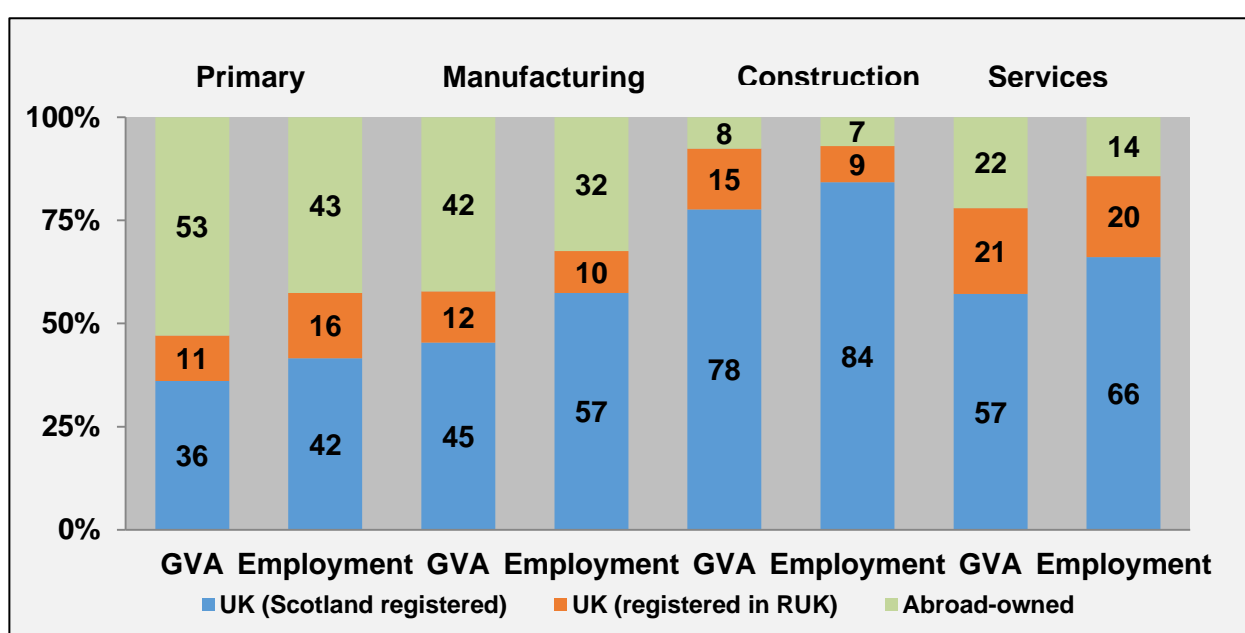

Within **manufacturing**, **foreign-owned** businesses accounted for 42.3% of GVA and 32.4% of employment, whilst UK-owned **Scotland based** businesses accounted for 45.4% of GVA and 57.3% of employment. The remaining GVA and employment is accounted for by UK-owned businesses based in the **Rest of the UK** (12.4% of GVA and 10.2% of employment).

Within **construction**, **foreign-owned** businesses accounted for only 7.6% of GVA and 7.0% of employment, whilst UK-owned **Scotland based** businesses accounted for 77.6% of GVA and 84.2% of employment. The remaining GVA and employment is accounted for by UK-owned businesses based in the **Rest of the UK** (14.8% of GVA and 8.8% of employment).

Within **services**, **foreign-owned** businesses accounted for 22.0% of GVA and 14.3% of employment, whilst UK-owned **Scotland based** businesses accounted for 57.1% of GVA and 66.1% of employment. The remaining GVA and employment is accounted for by UK-owned businesses based in the **Rest of the UK** (20.8% of GVA and 19.6% of employment).

Chart 3 shows that the **construction sector** had the smallest proportion of foreign-owned employment, where 7% of employment was **foreign-owned** contributing 8% of value added. This contrasts with the **primary sector** (includes Oil & Gas and Utilities), where around 43% of employment was **foreign-owned** contributing 53% of value added.

Chart 3: Shares of Gross Value Added and Employment by sector and ownership, 2015

Growth Sectors

[Scotland's Economic Strategy 2015](#) reaffirms the Scottish Government's focus on key growth sectors of the economy. These key growth sectors include:

- Energy (including renewables)
- Sustainable Tourism
- Creative Industries (including digital)
- Life Sciences
- Financial & Business Services
- Food & Drink (including agriculture & fisheries)

SABS includes the GVA and Turnover data for the [Growth Sectors](#) as defined using [Standard Industrial Classification \(SIC\) 2007 codes](#).

Between 2014 and 2015, with the exception of the Food & Drink and Energy, all the growth sectors (as covered by SABS) experienced an increase in GVA.

Energy

Note that the SABS **energy sector** results include off-shore oil and gas activity; GVA associated with off-shore activity, under UK regional accounts procedures, is normally allocated to a separate 'Extra Regio' category rather than allocated to a region within the UK.

In 2015, GVA in the **energy sector** in Scotland amounted to £16.4 billion – down 12.9% (£2.4 billion) on 2014. The steep GVA decline over the latest year has been driven by the **oil & gas extraction** sub-sector (down from £9.3 billion in 2014 to £6.6 billion in 2015). The **engineering related scientific and technical consulting activities** sub-sector also experienced a fall in GVA from £1.7 billion in 2014 to £1.2 billion in 2015.

Sustainable Tourism (tourism-related industries)

In 2015, turnover in the **tourism-related industries sector** in Scotland amounted to £6.9 billion (up £99 million or 1.4% on 2014) and GVA amounted to £3.8 billion (up £69 million or 1.9% on 2014). The sector has experienced year-on-year growth in GVA and turnover in every year since 2011.

In 2015, the local authority areas with the highest **tourism-related industries sector** GVA were City of Edinburgh (24.3% of Scotland's tourism-related industries GVA), Glasgow City (11.3%) and Aberdeen City (7.2%). Please see related [Map for Local Authority Area share of Scotland's Sustainable Tourism](#).

The **tourism-related industries sector** play a particularly important part in the economies of some of the more rural local authority areas – for example, in 2015, 10.9% of Na H-Eileanan Siar's non-financial business economy GVA was generated by the **tourism-related industries sector**, this compares to 4.2% for Scotland as a whole. Please see related [Map for Sustainable Tourism's contribution to Local Economy](#).

Creative Industries

In 2015, GVA in the **creative industries sector** in Scotland amounted to £4.6 billion (up £889 million or 23.6% on 2014). The GVA growth over the latest year has been driven by GVA growth in the **software/electronic publishing** sub-sector (GVA up £461 million) and the **design** sub-sector (GVA up £309 million).

Creative Industries sector has experienced year-on-year growth in GVA and turnover in every year since 2010.

Chart 4 below shows the GVA performance of sub-sectors within the **creative industries sector** between 2008 and 2014-15. It shows that the "Visual Art Domain" (includes Design, Architecture & Advertising) and "Software & electronic publishing" sub-sectors have made the largest contributions in all years.

Chart 4: Creative Industries 2008 v 2014 v 2015 - Gross Value Added by sub-sectors

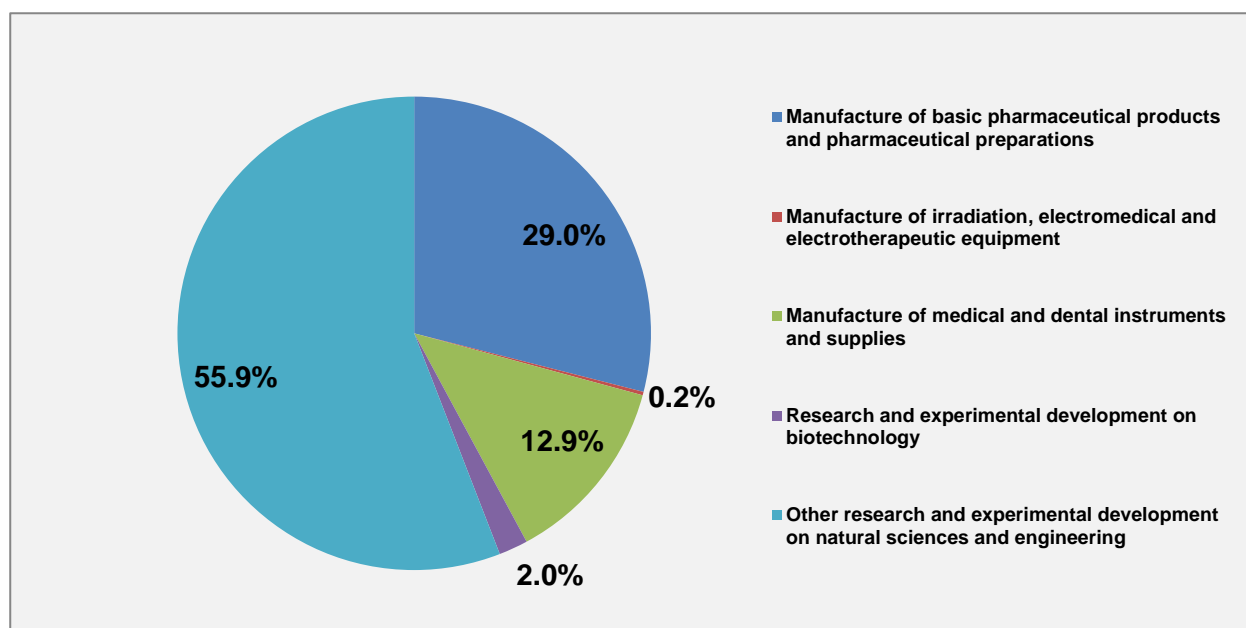

Life Sciences

In 2015, GVA in the **life sciences sector** in Scotland amounted to £1.3 billion – this represents an increase of £86 million or 7.2% on 2014.

The increase in **life sciences sector** GVA over the latest year was driven by the **research and development on natural sciences/engineering** sub-sector which increased its GVA by £107 million (17.6%).

Chart 5 below shows that the sub-sectors making the largest contribution to **Life Sciences** GVA in 2015 were "Other research and experimental development on natural sciences and engineering" (55.9%) and "Manufacture of basic pharmaceutical products and pharmaceutical preparations" (29.0%).

Chart 5: Life Sciences - Gross Value Added by sub-sectors in 2015

Financial and Business Services (partial)

Totals for the Financial and Business Services growth sector relate only to those sectors fully covered in SABS – and so Financial & Insurance Activities are **not** included. The SABS results therefore really only cover the **business services sector** within the growth sector.

In 2015, GVA in the **business services sector** in Scotland amounted to £7.8 billion, representing a £326 million (or 4.4%) increase on 2014. The GVA growth over the latest year has been driven by **management consultancy activities** sub-sector (GVA up £439 million) and **other business support service activities** sub-sector (GVA up £190 million). Whereas, the **other engineering activities** sub-sector had the largest decrease in GVA between 2014 and 2015 (GVA down £171 million).

Food and Drink (partial)

Totals for the Food and Drink growth sector relate only to those sectors covered in SABS – and therefore agriculture is **not** included. Food and Drink, as presented in the SABS results, relates only to:

- SIC 3: Fishing and Aquaculture
- SIC 10: Manufacture of Food Products
- SIC 11: Manufacture of Beverages

In 2015, GVA in the **food and drink growth sector (as covered by SABS)** in Scotland amounted to £4.1 billion – representing a £90 million (-2.2%) decrease on 2014. The overall figures, however, mask a difference in performance in the sub-sectors - with GVA for the fishing sub-sector (SIC 3) decreasing by £131 million and the food manufacturing sub-sector (SIC 10) decreasing by £125 million, compared to an increase of £167 million for the beverages manufacturing sub-sector (SIC 11).

Methodology & Notes

Background

Scottish Annual Business Statistics (SABS) is based on data from the Annual Business Survey (ABS) (formerly Annual Business Inquiry (ABI)) conducted by the Office for National Statistics (ONS).

The statistics have been produced under partnership procedures agreed between ONS and the Scottish Government (SG). These have resulted in an improvement in the quality of the underlying data and consistency in the figures used by ONS and SG.

The ABS is the UK's key resource for understanding the detailed structure and performance of businesses across the UK, classified to the UK [Standard Industrial Classification \(SIC\)](#) system. Estimates ¹, by industry (using SIC codes), are published for:

<i>Local unit counts</i>	<i>Increase in Stocks</i>
<i>Employment</i>	<i>Gross Wages and Salaries</i>
<i>Employee Jobs</i>	<i>Total Labour Costs</i>
<i>Turnover</i>	<i>Total Output at basic prices</i>
<i>Purchases of goods and services</i>	<i>GVA per Head</i>
<i>Approximate GVA at basic prices</i>	<i>Gross Wages and Salaries per Head</i>
<i>Taxes</i>	<i>Total Labour Costs per Head</i>

Within SABS, estimates by industry sector are published for Scotland, Scottish local authority areas and business ownership groups. These estimates are presented as monetary values, and give a snapshot of business activity that can be used to understand the level of contributions to the Scottish economy from different industry sectors, local authority areas and ownership groups.

[1] Definitions for the employment and financial estimates are available at:
<http://www.gov.scot/Topics/Statistics/Browse/Business/SABS/Definitions>

Coverage

The ABS is an annual survey of registered ² businesses covering the production (including manufacturing), construction and service industries (including distribution) which represent the UK Business Economy. This is about two thirds of the UK's whole economy in terms of Gross Value Added. The statistics do **not** cover the whole economy, omitting the financial sector, parts of agricultural sector and parts of the public sector.

Exclusions

The following sub-classes of SIC 1 (Crop and animal production, hunting and related service activities) are omitted:

- 01.1 – Growing of non-perennial crops
- 01.2 – Growing of perennial crops
- 01.3 – Plant propagation
- 01.4 – Animal production
- 01.5 – Mixed farming

Within SABS, the services sector is defined as division codes 45 to 96 of SIC 2007 (SIC07). Although the publication refers to the services sector for simplicity, it should be noted that the figures quoted do **not** relate to the entire services sector, but only to those sectors covered by the ABS. The main industries **excluded** from the services sector are:

- Financial and Insurance activities (Section K);
- Public Administration and defence (Section O);
- Education (**public provision** in Section P); and
- Health (SIC 86.2, **public provision** in SIC 86.1 and 86.9 in Section Q).

*Please see box below for information on **exclusion** of Insurance and Reinsurance sector (SIC 65.1 and 65.2) which falls under Section K.*

Oil & Gas

ABS data relating to Oil & Gas extraction (SIC 6) is allocated to UK regions (including Scotland) according to the address at which the business is registered - onshore and offshore Oil & Gas extraction and activities are allocated in this way. GVA associated with off-shore activity, under UK regional accounts procedures, is normally allocated to a separate 'Extra Regio' category rather than allocated to a region within the UK.

[2] Businesses registered for Value Added Tax (VAT) and/or Pay As You Earn (PAYE)

Use

The Annual Business Survey (ABS) is a valuable source dataset which is used alongside a number of other datasets in the production of macro-economic statistics for Scotland and the UK as a whole. It is important to note that overall growth rates associated with the ABS are **not** comparable to the official growth rates for the whole economy given that significant sectors of the economy are **not** included in the ABS and the results have **not** been balanced with other datasets. The SABS statistics are therefore best suited to analyses of individual industries rather than the economy as a whole.

The SABS data allows analysis of business structure, ownership and location within detailed sectors of the Scottish business economy. SABS figures are used extensively, by the Scottish Government, to inform sectoral policy (including the growth sectors) and regional/local economic development.

The SABS results can be used to answer questions such as:

- how much value has been created in a particular industry, and how many people are employed by it?
- has there been a shift in activity from one industrial sector to another, and which sub-industries are driving the change?
- are any industries particularly dominant in specific local authority areas?
- how productive is a particular industry and what is it that is having an impact on productivity?

Links to some examples of how the Scottish Annual Business Statistics results have been used are provided below:

A range of statistics from the SABS publication broken down by industry sector are used to monitor change within the growth sectors (covering Food & Drink, Creative Industries, Sustainable Tourism, Energy, Financial & Business Services and Life Sciences) of the Scottish economy. The **Growth Sectors statistics database** is available at:

<http://www.gov.scot/Topics/Statistics/Browse/Business/Publications/GrowthSectors>

Scotland's Marine Economy - sectors that depend on the marine environment. Sectoral data for this topic at link below is mainly derived from SABS.

<http://www.gov.scot/Topics/marine/Publications/TopicSheets/tslist/economy>

Scottish Enterprise – The “Scottish key economic facts February 2017” includes GVA from SABS for the Growth Sectors.

<https://www.scottish-enterprise.com/knowledge-hub/articles/publication/scottish-key-facts>

Invest Glasgow – This Glasgow City Council web page uses SABS GVA and Turnover figures.

<http://investglasgow.com/retail/>

Falkirk Council – Provides a range of statistics from SABS for Falkirk Local Authority area.

<https://www.falkirk.gov.uk/services/council-democracy/statistics-census/docs/economic-info-analysis/corporate-statistics/Scottish%20Annual%20Business%20Statistics%202014.pdf?v=2016110313217>

Change in Purchases apportionment methodology

Data on purchases for 2012 onwards has been produced using a new Purchases Apportionment Methodology (PAM) for the apportionment from the reporting unit purchases to the local unit level. This new method was introduced to preserve the additivity of purchases components values to the total purchases. This has introduced a discontinuity in the purchases and GVA data series with 2008 to 2011 still calculated using the original method.

The change in the calculation of purchases (and hence GVA) has minimal impact for the large majority of sectors. However, the industry affected to the greatest extent is 'Gambling and Betting (SIC 92)' where there is volatility for a small number of multi-site businesses. The sampled businesses within this Division provide details of the “amounts payable to winning customers” as part of their purchases. The new apportionment method has led to volatile local estimates of payments to winning customers which then also affects other associated variables, like total purchases and GVA. Additional work and analysis is required by ONS to identify further improvements to the methodology, and estimates, to reduce this impact while maintaining the additivity. Until this is completed (which at earliest would impact on publications in 2018), regional Purchases and GVA figures for Division 92 (Gambling and betting activities) should be viewed **with caution**.

More detail of PAM change can be found in this [Information Paper](#). A detailed 2012 region by [industry impact assessment](#) has also been published by ONS.

Major Time Series Analysis Caveats

SABS 2103 to 2015

Data on purchases for 2012 onwards has been produced using a new Purchases Apportionment Methodology (PAM) for the apportionment from the reporting unit purchases to the local unit level. This new method was introduced to preserve the additivity of purchases components values to the total purchases. This has introduced a discontinuity in the purchases and GVA data series with 2008 to 2011 still calculated using the original method.

The change in the calculation of purchases (and hence GVA) has minimal impact for the large majority of sectors. However, the industry affected to the greatest extent is 'Gambling and Betting (SIC 92)' where there is volatility for a small number of multi-site businesses. The sampled businesses within this Division provide details of the "amounts payable to winning customers" as part of their purchases. The new apportionment method has led to volatile local estimates of payments to winning customers which then also affects other associated variables, like total purchases and GVA. Additional work and analysis is required by ONS to identify further improvements to the methodology, and estimates, to reduce this impact while maintaining the additivity. Until this is completed (which at earliest would impact on publications in 2018), regional Purchases and GVA figures for Division 92 (Gambling and betting activities) should be viewed **with caution**.

More detail of PAM change can be found in this [Information Paper](#). A detailed 2012 region by [industry impact assessment](#) has also been published by ONS.

SABS 2012

In line with Office for National Statistics (ONS) ABS releases, data for the **Insurance and Reinsurance sector (SIC 65.1 and 65.2)** has been removed from the SABS results for all years from 2008 to 2012. The previously published ABS data for the **Insurance and Reinsurance sector** has been excluded due to on-going volatility while ONS carry out a more detailed quality assessment. This does not affect any other industry sectors and, as the **Insurance and Reinsurance sector** data has been removed for all years in the series, this does **not** affect time series analysis.

SABS 2011 (impact on 2008-09 data)

Please note that validation of data returns for 2011 highlighted that a small number of businesses within the **Insurance and Reinsurance sector (SIC 65.1 and 65.2)** were returning global figures rather than UK only. A revised 2010 estimate (together with new 2011 data) are now available in this publication. However, any global figures reported will remain in 2008 and 2009 published data in line with current Annual Business Survey (ABS) revisions policy. This can have a significant impact on Insurance, reinsurance, professional, scientific and technical activities (Section KM) time series data, as well as overall Totals, in particular local authority areas. Results for this sector are experimental and any comparisons between years should be undertaken with caution.

SABS 2010

Further Education (FE) Colleges were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges from the private/business sector to the public

sector. This change brings FE Colleges out with scope of ABS survey from 2010 onwards, which represents a step change in the 2010 results for SIC 85 compared to data for earlier years.

SABS 2009

The data, from 2008 onwards, are published on a Standard Industrial Classification (SIC) 2007 basis – data pre-2008 were published on a SIC 2003 basis. Updates to the SIC are required to enable it to more accurately reflect the structure of the modern economy - SIC 2003 was replaced by SIC 2007 in January 2008. The revision was motivated by the need to adapt the classification to changes in the world economy. The revised classification reflects the growing importance of service activities in economies over the last fifteen years, mainly due to the developments in information and communications technologies.

More information on SIC (2007) is available

at: <http://www.gov.scot/Topics/Statistics/Browse/Business/Corporate/sic2007note#top> and

<https://www.ons.gov.uk/methodology/classificationsandstandards/ukstandardindustrialclassificationofeconomicactivities/uksic2007>

The employee/employment data published in SABS, from 2008 onwards, are based on Business Register and Employment Survey (BRES) – previous years SABS employee data were based on the employment part of the Annual Business Inquiry (ABI/1). The BRES replaced and integrated the Business Register Survey (BRS) and the ABI/1 in 2009 (note that there was a pilot of BRES in 2008 which allowed 2008 BRES estimates to be produced). For businesses that are surveyed by BRES, the regional and local estimates of employment are more accurate (than those from the ABI/1) because, rather than producing data by a headquarter-based apportionment model, they are obtained directly from data reported at site level (shop, office, factory, etc). More information on BRES is available on the ONS website at:

<http://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/employmentandemployeetypes/bulletins/businessregisterandemploymentsurveybresprovisionalresults/previousReleases>

The 2008 and 2009 ABS followed a similar sample selection criteria (see Sample Design section below) and were both sampled on a SIC 2007 basis. It is important to note that 2009 marked the full introduction of the BRES, this and the change to SIC 2007 may lead to some discontinuity with businesses moving from one SIC to another between years. It is not unusual for some businesses to change SIC code over time, but there are some particular movements between 2008 and 2009 that users should be aware of e.g. a large number of landscape business sites have moved from SIC 01 (Crop and animal production, hunting and related service activities) to SIC 81 (Services to Building and Landscape Activities) between 2008 and 2009 – this is a result of the change from SIC03 (where landscape businesses were included with the agricultural sectors) to SIC07 (where landscape businesses fall under the services sector).

Insurance and Reinsurance (SIC 65.1 and 65.2) data is published for 2008 onwards – this is the first time that these data have been included in SABS. Please note that SIC 65.3 (Pension funding) is still omitted from the SABS results.

SABS 2008

ONS improved the sample design for the 2008 survey which means that the results for 2008 onwards cannot be compared with historical trends. Although this temporary loss of comparability over time is a downside - it means that the results for 2008 onwards are more accurate, and comparisons can still be made between sectors across the UK. More details are provided below on the change in sample design due to SIC 2007 and the complete re-allocation of the sample.

Notwithstanding, the change in sampling, the high energy prices in 2008 have had a significant impact on the "Remaining Sectors" results for Scotland in 2008.

Removal of Insurance and Reinsurance data (covers SIC 65.1 & 65.2)

In line with Office for National Statistics (ONS) ABS releases, data for the **Insurance and Reinsurance sector (SIC 65.1 and 65.2)** continues to be removed from the SABS results for all years from 2008 to 2013. The previously published ABS data for the **Insurance and Reinsurance sector** has been excluded due to on-going volatility while ONS carry out a more detailed quality assessment. This does not affect any other industry sectors and, as the **Insurance and Reinsurance sector** data has been removed for all years in the series, this does **not** affect time series analysis.

Background history is that data for this small part of the Financial and insurance sector (Insurance & reinsurance only) has been collected by the ABS since 2008 and was previously included in results. This was the only part of Financial and Insurance Activities (Section K) covered by the survey. As with any new time-series, estimates for these industries remained experimental while ongoing quality assurance has taken place. This quality assurance led to data for this sector being revised substantially in recent years with a resulting break in the series between 2009 and 2010. Following discussions with key users, ONS decided to remove this experimental series from ABS releases due to the continued volatility of the data and to allow for a more detailed quality assessment to be undertaken. As previously stated, removal of these series does not affect other industries published as part of this release and also has no impact on any other financial statistics published by ONS.

A review of the questionnaire for Insurance and Reinsurance businesses will be undertaken, alongside continued validation of returns to the survey, with the aim of reintroducing them to the ABS publications when the quality of the data has improved. Updates on progress will be made available when known.

Although the estimated total for the UK Business Economy in the **regional** ABS results is constrained to equal that in the corresponding **national** ABS results produced by ONS, the published totals for the UK Non-Financial Business Economy will not now be the same following the removal of data for the Insurance & reinsurance industries (65.1 and 65.2) from the **regional** results after apportionment has taken place. For example an enterprise contributing wholly to Insurance & reinsurance at a **national** level (and therefore removed from the **national** totals) may have local sites in other industries which will still contribute to the **regional** totals. Likewise, an enterprise contributing wholly to the Distribution sector (and therefore included in the **national** totals) may have a local site in Insurance & reinsurance whose contribution will be removed from the **regional** totals.

Rounding of Figures

Where necessary, figures have been rounded to the nearest final digit shown. Consequently, there may be slight discrepancies within a table between totals and the sums of constituent items.

Symbols and Abbreviations

The following symbols and abbreviations are used within the ABS data:

.. not available

- nil

* Information suppressed to avoid disclosure

Inter Departmental Business Register

The sampling frame used for the ABS is the Inter Departmental Business Register (IDBR), which consists of companies, partnerships, sole proprietorships, public authorities, central government departments, local authorities and non-profit making bodies. The main administrative source for updating the IDBR is the HM Revenue and Customs (HMRC) for VAT and PAYE details.

Each legal unit is classified to a single activity, whether it is wholly or mainly engaged in that activity. The nature of a business can change with time, possibly because another business has been absorbed in a take-over. Some businesses have a very significant secondary activity, perhaps completely different from their main activity, and a small change of direction can lead to a new main activity and to the reclassification of the business. Other changes may arise from improvements to classification data held on the IDBR as a result of new information received about individual businesses. The reclassification of businesses for reasons such as these contributes to the year on year changes in the figures published.

Further information on the IDBR can be found at: <http://www.ons.gov.uk/ons/about-ons/products-and-services/idbr/index.html>

Sample Design

The ABS sample is designed as a stratified random sample of UK businesses from the IDBR. The survey population or universe is stratified by Standard Industrial Classification, employment, and country using the information from the IDBR. The sampling scheme is designed to give best estimates of the population totals for a given sample size and involves selecting all the largest businesses with a progressively reducing fraction of smaller businesses. This method ensures the sample size is kept to a minimum.

The inquiry results are grossed up to the register population, so that they relate to all active UK businesses on the IDBR for the sectors covered.

Scottish sample

Since 1998, the Scottish Government has funded an enhanced ABS sample in Scotland, to improve the quality of Scottish figures. In 2015, around 2,600 **extra** firms in Scotland were sampled as a result of this "boost", giving a total sample size in Scotland of around 8,200 firms.

Changes to the sample

From 2008 onwards, the sampling stratification and resultant estimation has been carried out on a SIC 2007 basis.

Please note that, for the 2008 sample, ONS undertook a complete sample re-allocation (using the Neyman methodology) to ensure that sufficient account of the variability within the micro businesses was reflected in the sample.

Due to the complexity of the ABS sample structure ONS had erred away from regularly re-allocating the sample. Hence, for a number of years ONS were left in the position of having the basis of the original sample produced in 1998 but with a number of manual tweaks. The earlier sample design did not adequately take account of the greater variability of smaller businesses, which should have led to a larger proportion of smaller businesses than was actually selected over that period. Consequently, the share of smaller businesses in 2007 and earlier was smaller than it should have been.

The [Sampling Framework](#) table shows that, since 2008, there has been a significant increase in businesses sampled in 0-9 employment size. In 2007, businesses in the 0-9 employment size band made up 43% of the Scottish ABS sample, this share increased to 58% in 2008 and 2009, 59% in 2010 and 60% in 2011-2015.

The change in the sample design, due to the SIC 2007 and the sample re-allocation from 2008, means that the results for 2008 onwards are not strictly comparable with earlier years data.

Response

Details of UK-wide ABS response rates are made available by ONS [here](#).

Selective editing

When ABS responses are received, checks are undertaken by ONS to ensure the information is correct. This is known as editing and validation. Selective editing has been used to validate responses for the first time for the 2011 results using software called SELEKT. SELEKT is a generic selective editing tool which highlights responses which appear to be in error if they fall outside the range of what is expected and have a large influence on key estimates. Those responses with the highest score are prioritised for editing and validation. This increases the efficiency of the editing process by focussing on the responses with the highest impact and importance.

The introduction of selective editing should at least maintain, if not improve the quality of the ABS results as it should: minimise the bias introduced by processing (removing over-editing); remove non-value adding activities from the process; and focus resources to errors that impact on the results.

However, the full impact on quality is not yet known. This will continue to be monitored and any updates will be included with future ONS ABS releases. For more information on SELEKT, see Chapter 5 of the [ABS Technical Report](#).

Confidentiality

The Statistics of Trade Act 1947 prohibits the disclosure of any information relating to an individual undertaking without the consent of the person carrying on that undertaking. Rigorous checks have been made to ensure that information relating to individual businesses has not been disclosed, either directly or by deduction, in any of the figures released. Similar precautions will be taken in safeguarding the confidentiality of returns in the preparation of any ad-hoc analyses.

Estimation

Factors are produced to enable estimates for all businesses classified to each SIC(2007) to be compiled from data provided by responding businesses. These factors are calculated for each employment size-band within each SIC(2007) and are equivalent to the ratio of responding businesses to the total number of businesses. Northern Ireland and Scotland are sampled and estimated for separately, England and Wales are sampled separately but are combined for the estimation procedure.

Returns for the few large non-responders are estimated for individually. This estimation is normally based on summary data received from the business, or on the business's return to the survey in the previous year adjusted to take account of the likely change in the value of trading over the period.

Regional Estimation

The business unit to which ABS questionnaires are sent is called the reporting unit. For ABS, the reporting unit represents an enterprise, which may consist of one or more sub-units (called local units). For example, an enterprise might be the head office for a group of shops. An enterprise may therefore have local units at different locations, and may carry out more than one type of economic activity.

To produce the regional estimates, the reporting unit data returned by each business are divided amongst its local units. Each local unit's allocation depends on the size of its employment, the industry it is in and its geographical location. This is achieved using a standard statistical modelling technique called regression analysis.

Local unit employment is obtained from the Business Register and Employment Survey (BRES), which collects data from local units, rather than enterprises. Results are then aggregated for each region /country and industry, using the industry classification of the local units. Each local unit is assigned a single SIC code, which corresponds to the unit's principal activity. Where more than one type of economic activity is carried out by a local unit or enterprise, its principal activity is the activity which contributes most to the value of the unit. Hence, although the sum of the regional results for the whole business economy will match the total for the national results, the sum of the regional results by industry will not necessarily match the UK industry totals, as local units might not all share the same industry classification as their parent units.

Changes to the regional weighting methodology were introduced to ABS from the 2009 regional results onwards. Further information on the methodology of the approach and analysis of the impact can be found in the ONS published note, 'Weighting in the Regional System - September 2011', available at: <http://www.ons.gov.uk/ons/guide-method/method-quality/specific/business-and-energy/annual-business-survey/quality-and-methods/weighting-in-the-regional-system.pdf>

Note that, as BRES is not carried out at the same time as ABS, differences in the timing of responses from ABS and BRES can lead to some reduction in the quality of the apportionment method.

For more information on the methodology used to compile regional ABS statistics, please consider the ONS background and technical documents available on-line at: <https://www.ons.gov.uk/businessindustryandtrade/business/businessservices/methodologies/annualbusinesssurveyabs#annual-business-survey-abs-quality-and-methods>

Business Ownership

Within SABS, business ownership is defined as:

- UK (Scotland registered)
- UK (registered in RUK)
- Abroad

Country of ownership is either UK or Abroad (outside the UK). Business country of ownership is determined by the nationality of the ultimate parent of the business (i.e. the institutional unit, proceeding up a business' chain of control, which is not controlled by another institutional unit). Where control of the business is shared, country of ownership is determined by the country of residence of the majority ultimate owner. Enterprise groups with foreign ownership are identified using data provided by Dun & Bradstreet. All businesses that do not belong to an enterprise group, and are therefore not under the control of another institutional unit, are classified as UK-owned.

Once it is determined that an enterprise is UK owned, the next step is to classify businesses into whether they are Scotland registered or registered in the Rest of the UK (RUK). Enterprises, and their associated local units, are classified as Scotland registered if the enterprise's VAT/PAYE registered office address is in Scotland. Enterprises, and their associated local units, are classified as registered in RUK if the enterprise's VAT/PAYE registered office address is, outside Scotland, elsewhere in the UK.

Total Employees/Employment and Per Head variables

For 2008 data onwards, Scottish Government analysts have merged BRES (employment survey) and ABS (financial survey) results in order to produce consistent "per employment" totals (e.g. GVA per Head). However, the BRES and ABS are sampled at different times of the year so where a BRES employee/employment estimate cannot be found or is significantly different for a business within the ABS, employee/employment totals are set to their values from the Inter-Departmental Business Register (IDBR).

The Total Employees/Employment variables included in SABS are based on a head count and **not** a Full Time Equivalent (FTE) measure. This distinction is particularly important for

sectors with high levels of part time employment (e.g. Retail and Accommodation & Food Service activities) especially when comparing Per Head figures ³.

Employees in BRES are defined as: An employee is anyone aged 16 years or over that an organisation directly pays from its payroll(s), in return for carrying out a full-time or part-time job or being on a training scheme. It excludes voluntary workers, self-employed, working owners who are not paid via PAYE.

Employment in BRES is defined as: Employees + Working owners who are not paid via PAYE.

Please note that SABS now provides just “per employment” figures for the productivity measures – older SABS publications led with “per employee” figures. Change was made due to a change in the [treatment of working owners](#), in the underlying BRES data (used in SABS). From the 2011 survey, BRES treats working owners of limited companies as employees rather than working owners (as was previously the case) – and as part of this change in the BRES survey it was identified that in the past there was some double counting of working owners of limited companies (i.e. they were being counted as working owners and employees). The BRES employment and employee data from 2010 onwards used in SABS have been adjusted to take account of these changes – however, this presents a break in the series with the employee/employment data for 2010 onwards not being strictly comparable to the 2008-09 employee/employment data. Although the employee and employment data have both been affected by these changes, the impact was larger for the employee data than it was for the employment data - and therefore to maintain as consistent a time series as possible the SABS publication now just provides “per employment” measures of productivity.

[3] The ONS publish sub-regional labour productivity figures in terms of GVA per hour worked and GVA per filled job. Both sets of figures are published at a NUTS 2 and NUTS 3 sub-regional geographies. Data is available at:

<https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/labourproductivity/articles/regionalandsubregionalproductivityintheuk/jan2017#results-for-nuts1-regions-and-countries>. However, note that results are not available broken down by industry group.

Data Reliability

SABS figures are based on an annual survey of businesses. In the context of overall Scottish figures, year-on-year differences are sometimes less obvious as they can be compensated for by other changes. However, at a more disaggregate level, such as sectoral or local authority area, changes in a small number of large companies can have a very marked effect on figures from one year to the next.

Structural changes

The business economy is constantly evolving as businesses merge, are taken over, or simply change the main focus of their business. These changes can result in the industry classification of a business changing. For example, if a business undertakes both manufacturing and wholesale activities, but most of its employment is within manufacturing, it will be classified to manufacturing. If the employment were to change substantially so that the majority worked in wholesale then the industry classification would change and the whole of the businesses turnover, for example, would move from manufacturing to wholesale. In industries where movements are common, or where large

businesses are involved, these changes can themselves sometimes cause large changes in ABS estimates. This should be taken in to consideration when changes over time are being assessed.

Quality Measures

Estimates derived from samples invariably produce results which differ from those that would have been obtained from a complete census of all businesses. If a number of different samples were selected then each would produce a different result. Sampling errors measure the extent to which these estimates can be expected to differ from the 'true' value. The standard error is the estimated value of the sampling error – the closer the standard error to zero, the more reliable the estimate.

From July 2014, Standard Errors and Coefficients of Variation for **regional** (includes Scotland) ABS data at 2-digit SIC level have been published by the Office for National Statistics (ONS). Please see link to latest Table [here](#).

From August 2015, in order to provide Standard Errors at **Local Authority area level**, the Scottish Government purchased this ad-hoc analysis from ONS. Please see link to Tables [here](#).

Note that quality measures have **not** been provided for the employment or employee variables. The employment and employee estimates are largely based on Business Register and Employment Survey (BRES) data, and sampling errors for BRES estimates are provided at a regional and local level, by ONS, at:

<http://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/employmentandemployeetypes/bulletins/businessregisterandemploymentsurveybresprovisionalresults/previousReleases>

Please note that Standard Errors Tables at links above replace alternative quality measures tables previously produced by the Scottish Government.

In addition to sampling errors there is the potential for non-statistical errors which cannot be easily quantified. Examples where these errors may occur are deficiencies in the sampling frame (IDBR) and errors made by respondents in completing the inquiry forms.

For more information on ABS data reliability, please consider the ONS background and technical documents available on-line at:

<https://www.ons.gov.uk/businessindustryandtrade/business/businessservices/methodologies/annualbusinesssurveyabs#annual-business-survey-abs-quality-and-methods>

Revisions Policy

In general, SABS follows the Revisions Policy for the ONS ABS results i.e. the latest results are provisional until the following year when they may be revised as a result of late returns or information received in the course of the following year's inquiry. So, for example, within SABS 2015 the latest results for 2015 are provisional and will be made final when they are re-published within SABS 2016 - at which point they may be revised due to late returns. Likewise the results for 2014 within SABS 2015, have been revised since SABS 2014 and are now final.

Although the general rule is to only revise back one year, if revisions have a significant impact on estimates for Scotland, then we may revise back the entire time series. Significant revisions of this sort, and their treatment within SABS, will be highlighted at the time of the release.

Major Historical Revisions

SABS 2013

Change in Purchases apportionment methodology – Data on purchases for 2012 and 2013 has been produced using a new method for the apportionment from the reporting unit purchases to the local unit level. This new method was introduced to preserve the additivity of purchases components values to the total purchases. This has introduced a discontinuity in the purchases and aGVA data series with 2008 to 2011 still calculated using the original method. This change in the calculation of purchases (and hence GVA) has minimal impact for the large majority of sectors. The industry affected to the greatest extent is 'Gambling and Betting (SIC 92)' which falls within the services sector. And therefore the fall in purchases and subsequent increase in GVA, between 2011 and 2012, for SIC 92 and the wider services sector should be considered alongside this methodological change. More detail of this change can be found in this [Information Paper](#). A detailed region by [industry impact assessment](#) has been published by ONS.

SABS 2012

In line with Office for National Statistics (ONS) ABS releases, data for the **Insurance and Reinsurance sector (SIC 65.1 and 65.2)** has been removed from the SABS results for all years from 2008 to 2012. The previously published ABS data for the **Insurance and Reinsurance sector** has been excluded due to on-going volatility while ONS carry out a more detailed quality assessment. This does not affect any other industry sectors and, as the **Insurance and Reinsurance sector** data has been removed for all years in the series, this does **not** affect time series analysis.

SABS 2011

Please note that validation of data returns for 2011 highlighted that a small number of businesses within the **Insurance and Reinsurance sector (SIC 65.1 and 65.2)** were returning global figures rather than UK only. A revised 2010 estimate (together with new 2011 data) are now available in this publication. However, any global figures reported will remain in 2008 and 2009 published data in line with current Annual Business Survey (ABS) revisions policy. This can have a significant impact on Insurance, reinsurance, professional, scientific and technical activities (Section KM) time series data, as well as overall Totals, in particular local authority areas. Results for this sector are experimental and any comparisons between years should be undertaken with caution.

SABS 2010

Within industry 46.3 (Wholesale of food, beverages and tobacco), there has been a significant revision to the 2009 data. This revision was expected as it was identified in the analysis of SABS 2009 that there was an under-reporting of data within the Scottish results for 2008 and 2009. This under-reporting was a result of business data being inadvertently excluded from the Scottish results in both years. This error has now been corrected in the 2009 results contained in SABS 2010 – but the 2008 data remain

erroneous given the overarching ABS revisions policy of revising back the previous year only.

SABS 2009

Within industry 20.14 (Manufacture of other organic basic chemicals), a significant downwards revision has been made to the 2008 data, which has an impact on turnover and GVA for this group. This revision was required as it became apparent that previous data submitted was incorrect as it included turnover generated in other European countries. This error has been corrected for the 2008 data onwards.

Within industry 46.3 (Wholesale of food, beverages and tobacco), there is a significant under-reporting of data within the Scottish results for 2008 and 2009. This under-reporting is a result some business data being inadvertently excluded from the Scottish results in both years. This data is included in the overall UK results but not the Scottish results. This error in the Scottish results cannot be amended until the 2010 data and revised 2009 data are published in summer 2012.

Comparable Data

Statistics for the UK, English Government Office Regions, Scotland, Wales and Northern Ireland are available [here](#).

Other Sources of Economic and Business Statistics

Gross Value Added (GVA)

The SABS results include approximate GVA at 'basic prices'. There are differences between the ABS approximate measure of Gross Value Added and the GVA measures published in UK and Scottish National Accounts data. It is important to emphasise that ABS GVA does **not** cover the whole economy and that it does **not** include all the National Accounting adjustments that reconcile the ABS data with other data sources (especially taxes and subsidies, margins and the 'mixed income' economies).

The quarterly GDP index is the Scottish Government's preferred source for measuring real (inflation-adjusted) GVA change over time – for the Scottish economy as a whole and for broad sectors of the Scottish economy:

<http://www.gov.scot/Topics/Statistics/Browse/Economy/PubGDP>

Quarterly National Accounts Scotland (QNAS) published data series is the Scottish Government's preferred source for current price (non-inflation-adjusted) GVA change over time - for the Scottish economy as a whole and for broad sectors of the Scottish economy:

<http://www.gov.scot/Topics/Statistics/Browse/Economy/QNAS/Publications>

ONS has published an article on **A Comparison between Annual Business Survey and National Accounts Measures of Value Added** at: <http://www.ons.gov.uk/ons/guide-method/method-quality/specific/business-and-energy/annual-business-survey/quality-and-methods/a-comparison-between-abs-and-national-accounts-measures-of-value-added.pdf>

Information on the differences between ABS approximate GVA at 'basic prices' and National Accounts/Regional Accounts GVA is available in the ABS Technical Report published by ONS at: <http://www.ons.gov.uk/ons/guide-method/method-quality/specific/business-and-energy/annual-business-survey/quality-and-methods/abs-technical-report---june-2014.pdf>

Business Register and Employment Survey

Employee jobs/employment data, largely sourced from the Business Register and Employment Survey (BRES), are provided in the SABS results. These employment estimates are provided in SABS to enable consistent productivity measures to be calculated. The employee jobs/ employment estimates in SABS will tend to be lower than those published in BRES since BRES has wider industrial coverage than the ABS. There will also be differences between the employment estimates in BRES and the employment estimates as published in SABS as a result of differences in the samples selected for each survey.

If employee jobs/employment data by industry only is required (and so not to construct labour productivity measures), then the BRES is the preferred source for Scotland and local areas within Scotland. The latest BRES data is available [here](#).

Businesses in Scotland

Businesses in Scotland (formerly Scottish Corporate Sector Statistics) is another annual business statistics publication, released by the Scottish Government – the source of which is the IDBR. The main purpose of this publication is to provide information about the number of enterprises operating in Scotland. Like SABS, Businesses in Scotland provides estimates of employment and turnover by industry, local authority area and ownership. However, the employment and turnover estimates are provided in Businesses in Scotland publication as auxiliary variables that enable users to determine what proportion of employment/turnover generated in the economy can be attributed to businesses of different size. Employment and turnover, as published via Businesses in Scotland, do **not** relate to a single point in time and can be out of date for some small firms. For this reason, it is **not** the preferred the source for comparing employment and turnover estimates over time. More information on the key differences between Scottish Annual Business Statistics and Businesses in Scotland is available at:

<http://www.gov.scot/Topics/Statistics/Browse/Business/SourcesandSuitability/KeyDifferences>

Regional Capital Expenditure

It has been established that the estimation of regional capital expenditure is unreliable, and therefore Net Capital Expenditure figures are **not now available** on Scottish Annual Business Statistics website.

Please see **Future Developments** section below for on-going developments on this topic.

Office for National Statistics (ONS) has provided the following information:

Regional Capital Expenditure

Figures on regional capital expenditure are no longer made available on the ABS website pages. Accurate estimation of regional capital expenditure is dependent on there being a strong correlation between the variable on which any estimation is based, in this case local employment, and the variable for which we are attempting to produce estimates, here regional capital expenditure. It has been established that the relationship between regional employment and regional capital expenditure is, in fact, unreliable.

It will still be possible to obtain regional capital expenditure figures by requesting either standard extracts, for which there is no charge, or special analyses, for which a charge will be made. ONS does not recommend the use of these regional capital expenditure figures but recognises that some users will, nevertheless, wish to have them.

For more information about either of these services, please email ABS@ons.gsi.gov.uk

If you require Scottish Capital Expenditure figures only, you can alternatively contact the [Scottish Government](#).

Code of Practice for Official Statistics

This is a National Statistics publication. It has been produced to the high professional standards set out in the Code of Practice for Official Statistics ⁴ and the Pre-release Access to Official Statistics (Scotland) Order 2008 ⁵.

In 2012, the Scottish Annual Business Statistics publication was assessed by the United Kingdom Statistics Authority (UKSA) for compliance against the Code of Practice for Official Statistics. Details of the assessment are available at: [Assessment Report 189 - Statistics on Scottish Businesses and Research and Development \(96.4 Kb, Pdf document\)](#)

The UKSA has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods, and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

A UKSA assessment has also been carried out for the ONS Annual Business Survey statistical publications. Details of the assessment are available at: [Assessment Report 180 - Statistics from the Annual Business Survey \(126.8 Kb, Pdf document\)](#)

[4] Code of Practice for Official Statistics:

<http://www.statisticsauthority.gov.uk/assessment/code-of-practice/code-of-practice-for-official-statistics.pdf>

[5] Pre-release Access to Official Statistics (Scotland) Order 2008:

http://www.opsi.gov.uk/legislation/scotland/ssi2008/pdf/ssi_20080399_en.pdf

Future developments regarding the quality of the ABS data and up-coming SABS data releases are as follows:

- The Scottish Government continues to work with ONS to explore what could be done to improve the methodology used to estimate regional net capital expenditure. The historical methodology for estimating regional net capital expenditure is known to be unreliable, leading to its continued exclusion from the ABS regional publications. ONS has carried out a high level feasibility study to assess the viability of collecting capex data at different geography levels. Findings from this exercise can be found here: <http://www.ons.gov.uk/ons/guide-method/method-quality/specific/business-and-energy/annual-business-survey/quality-and-methods/capturing-regional-capex-on-the-abs---feasibility-study---october-2015.pdf>. Following on from this initial pilot, further regional net capital expenditure feasibility testing is due to be carried out by ONS by early 2018.
- One of the key actions following the UKSA assessments, of the SABS and the ONS ABS publications, was to improve the timeliness of the ABS publications. SABS data are currently published 20 months after the reference period covered by the data. The Scottish Government continues to work with the ONS on changing the publication process to reduce this time lag for future SABS releases. ONS have published a progress note on this work available at: <http://www.ons.gov.uk/ons/guide-method/method-quality/specific/business-and-energy/annual-business-survey/quality-and-methods/review-of-abs-timeliness.pdf>. ONS have advised that for the 2016 survey period they intend to fully test the feasibility of publishing the ABS results earlier (which in turn could impact on next SABS publication date). However, this will be a test year, so there is no confirmation as yet that earlier publications dates in 2018 are viable.
- As described in the ONS note [Improving the Coverage of the Standard Business Survey Population](#) published on 21 December 2015, the coverage of the Standard Business Survey population has been extended to include a population of solely Pay-As-You-Earn (PAYE) based businesses. These additional businesses will be included in the 2016 Annual Business Survey regional results in 2018. ONS are carrying out additional quality assurance on the impact of this.

User Engagement

If you would like to be kept informed about ongoing developments with regards to the SABS publication and future releases of SABS data, please register to receive updates via [Scotstat](#) (under Economy topic pick Business and Industry and/or Productivity).

There is also the ScotStat Scottish Economic Statistics Consultation Group (SESCG) – more information on the group is available at:

<http://www.gov.scot/Topics/Statistics/Browse/Economy/ScotStat/comms>. If you would like to join SESCOG or provide feedback on the SABS publication, please contact us at:

Forms

The Annual Business Survey forms were addressed to the individual legal unit, i.e. the individual company, partnership, sole proprietorship, etc.

The forms, [listed here](#), are designed to ensure the burden on the individual contributor has been kept as low as possible. A number of different form-types are used in the survey:

- Long form-types were sent to all businesses with an employment of 250 or more and also to a proportion of selected businesses with lower employment.
- [Please find here an example of a Standard Long form for **Production industries**](#)
- [Please find here an example of a Standard Long form for **Services sectors**](#)
- Short form-types were sent to the remaining selected businesses.

The forms differ in that long form-types ask for a detailed breakdown of purchases; employment costs; taxes, duties and levies, whereas short form-types just ask for the totals of these variables.

Definitions

Number of Units

This relates to the number of individual business sites e.g. a plant, factory, shop etc.

Total Employment

This is the point in time estimate of full and part time employees on the payroll plus the number of working proprietors employed on a set day in September.

Please note that Total Employment is a head count and **not** a Full Time Equivalent (FTE) measure. This distinction is particularly important for sectors with high levels of part time employment (e.g. Retail and Accommodation & Food Service activities) especially when comparing Per Head figures.

Total employees

This is the point in time estimate of full and part time employees on the payroll on a set day in September.

This is also a head count and **not** a Full Time Equivalent (FTE) measure (see employment explanation above).

Total turnover

Turnover is defined as total sales and work done. This is calculated by adding together the values of:

- sales of goods produced
- goods purchased and resold without further processing
- work done and industrial services rendered
- non-industrial services rendered

Purchases of goods & services

This is the value of all goods and services purchased during the year.

Gross Value Added at Basic Prices

Approximate Gross Value Added (aGVA) represents the amount that individual businesses, industries or sectors contribute to the economy.

aGVA is a measure of the income generated by businesses within their industries and sectors, less the cost of goods and services used to create the income. The main component of income is turnover, while purchases is the main component of the consumed goods and services (referred to as intermediate consumption). Stock levels which may rise or fall can also have an impact on aGVA, as can the values of subsidies received or duty paid. Businesses' labour costs (for example, wages and salaries) are paid from the value of GVA, leaving an operating surplus which is a good approximation for profit. The cost of capital investment, financial charges and dividends to shareholders are met from the operating surplus.

The ABS publishes aGVA at 'basic prices'. Gross Value Added (GVA) at basic prices is the output at basic prices minus intermediate consumption at purchaser prices. The basic price is the amount receivable by the producer from the purchaser for a unit of a product, minus any tax payable plus any subsidy receivable on that product.

This ABS measure of aGVA is called 'approximate' because it does not fully allow for certain National Accounts concepts such as taxes, subsidies or income earned in kind.

aGVA = output at basic prices – intermediate consumption =

total turnover + movement in total stocks + work of a capital nature carried out by own staff + value of insurance claims received + other subsidies received + amounts paid in business rates + amounts paid in vehicle excise duty + acquisitions from computer software programs and databases, developed by own staff for business use - **total purchases** - amounts received through the Work Programme - total net taxes (note: for service industries, this is total taxes, not total net taxes)

Detailed information of the differences between ABS approximate GVA at 'basic prices' and National Accounts/Regional Accounts GVA is available in the ABS Technical Report published by ONS at: <http://www.ons.gov.uk/ons/guide-method/method-quality/specific/business-and-energy/annual-business-survey/quality-and-methods/abs-technical-report---june-2014.pdf>

ONS has also published an article on **A Comparison between Annual Business Survey and National Accounts Measures of Value Added** at: <http://www.ons.gov.uk/ons/guide-method/method-quality/specific/business-and-energy/annual-business-survey/quality-and-methods/a-comparison-between-abs-and-national-accounts-measures-of-value-added.pdf>

Total Taxes

These are the amounts payable to the government for taxes, levies and duties. Included are rates relating to industrial and commercial property which are payable to the government via local authorities.

Increase in Total stocks

This represents the increase during the year for materials, stores and fuel and goods on hand for sale. Amounts for materials which have been partially processed but which are not usually sold without further processing are also included.

Gross Wages & Salaries

This represents the amount paid to employees (in cash or kind). This includes gross wages and salaries and redundancy and severance payments to employees. Payment to working proprietors, travelling expenses etc. are excluded.

Total Labour Costs

This represents the total cost to employers of employing staff. This includes gross wages & salaries (as defined above) and also all overtime payments, bonuses, commissions, payments in kind, benefits in kind, holiday pay, employer's national insurance contributions, payments into pension funds by employers and redundancy payments less any amounts reimbursed for this purpose from government sources. No deduction is made

for income tax or employee's national insurance contributions etc. Payment to working proprietors, travelling expenses, lodgings allowances, etc are excluded.

Total Output at Basic Prices

Output is essentially the measure of productive activity and covers - market output, output produced for own final use and other non-market output.

Glossary

ONS have published an [ABS Glossary of terms](#) to help interpret technical descriptions and abbreviations associated with the Annual Business Survey.

Links

Links to areas within the Scottish Government

statistics.gov.scot

statistics.gov.scot website has replaced Scottish Neighbourhood Statistics (SNS) website. At this new site, you can access a range of official statistics about Scotland for information and re-use. You can explore the data by theme, organisation, or geography. You can also search for datasets, places or enter your postcode to find data about your local area. The data can be viewed as tables, maps and charts or downloaded in various formats.

[Growth Sector Statistics Database](#)

The Growth Sector statistics database provides economic statistics for the growth sectors (also known as key sectors) as set out in [Scotland's Economic Strategy 2015](#).

[Input-Output Tables and Multipliers for Scotland](#)

Input-Output tables provide a complete picture of the flows of goods and services (products) in the economy for a given year. They detail the relationship between producers and consumers and the interdependencies of industries.

[Businesses in Scotland](#)

Businesses in Scotland (formerly Scottish Corporate Sector Statistics) provide information on enterprises operating in Scotland. The main purpose of the publication is to provide an estimate of Scotland's business stock. Within the publication the Scottish business stock is broken down by various dimensions including industry, business size, local authority area, urban/rural area and country of ownership.

[Business, Enterprise and Energy - Data Sources and Suitability](#)

For background on Businesses in Scotland (formerly Scottish Corporate Sector Statistics) and Scottish Annual Business Statistics (SABS) as data sources including comparison of their differences.

[Scottish Export Statistics](#)

There are two sources of data: Export Statistics Scotland and the Index of Manufactured Exports.

Links to websites outside the Scottish Government

Please note that when accessing the following links you will leave the Scottish Government website. The Scottish Government and its staff are not responsible for content external to this website.

[Regional Annual Business Survey](#) - For Regional releases

[UK Annual Business Survey](#) - For National releases

[UK and Regional Annual Business Inquiry](#) - Up to 2008

UK and Regional Annual Business Survey (formerly Annual Business Inquiry) statistics produced by the Office for National Statistics.

[Business Register and Employment Survey \(BRES\)](#)

Business Register and Employment Survey (BRES) data and sampling errors are produced by the Office for National Statistics at a UK and regional level.

See **Other Sources of Economic and Business Statistics** in [Methodology & Notes](#) section for more information.

[The Virtual Microdata Laboratory \(VML\)](#)

The Virtual Microdata Laboratory (VML) is a facility within the Office for National Statistics (ONS) for providing secure access to sensitive detailed data for statistical research purposes that serve the public good. Access is provided for Approved Researchers working on defined and approved non-commercial projects. Available data sources include business surveys, earnings data, social surveys and Census samples. VML data can't be downloaded, but users can access the data at their desk if they are part of a government organisation, or in an ONS approved site if not. For information, a remote lab is located in Glasgow.

[UK Data Service](#)

The UK Data Service is funded by the Economic and Social Research Council (ESRC) to meet the data needs of researchers, students and teachers from all sectors, including academia, central and local government, charities and foundations, independent research centres, think tanks, and business consultants and the commercial sector. The UK Data Service collection includes major UK government-sponsored surveys, cross-national surveys, longitudinal studies, UK census data, international aggregate, business data, and qualitative data.

[UK Creative Industries data sourced to DCMS](#)

Department for Digital, Culture, Media & Sport (DCMS) publishes UK and Regional Creative Industries data. Please note that there are some methodology differences between DCMS publication and Scottish Creative Industries data published in Scottish Government's [Growth Sector Statistics Database](#). The Growth Sector definition is based on specific analysis of the Creative Industries in Scotland.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit [Methodology](#) link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see [Methodology](#) page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

- Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
[Please see Methodology page for more details.](#)
2. Results for Insurance and Reinsurance sector (covers SIC 65.1 & 65.2) continue to be removed from this publication in line with ABS data published by the Office for National Statistics. This is due to ongoing volatility in the data. This does not affect other industries.
For full background, please see Methodology link above.
3. Across the Production sector many divisions (in particular SIC 20) have been affected by a trend amongst multinational companies towards restructuring on an international basis. Such restructuring has caused companies to be classified under different sectors to those they have historically occupied, with movements from traditional production industries towards wholesalers and toll processors (SIC 46). Therefore care should be taken when making comparisons over time, particularly from 2011-12 onwards.
4. Within industry 46.3 (Wholesale of food, beverages and tobacco), there is a significant under-reporting of data within the Scottish results for 2008. This under-reporting is a result of some business data being inadvertently excluded from the Scottish results. This data is included in the overall UK results but not the Scottish results. This error in the Scottish results cannot be amended due to ABS revision policy of only revising one year's back data.
5. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges from the private/business sector to the public sector. This change brings FE Colleges outwith scope of ABS survey from 2010 onwards, which represents a step change in the 2010 results for SIC 85 compared to data for earlier years.
6. Data on purchases for 2012 onwards has been produced using a new method for apportionment. This new method was introduced to preserve the additivity of purchases components values to the total purchases. This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method. However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities. Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit Methodology link above for more details.
7. Totals may not sum due to rounding.
8. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
9. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.
10. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
[Please see Methodology page for more details.](#)

2. Results for Insurance and Reinsurance sector (covers SIC 65.1 & 65.2) continue to be removed from this publication in line with ABS data published by the Office for National Statistics. This is due to ongoing volatility in the data. This does not affect other industries.
For full background, please see Methodology link above.

3. Across the Production sector many divisions (in particular SIC 20) have been affected by a trend amongst multinational companies towards restructuring on an international basis. Such restructuring has caused companies to be classified under different sectors to those they have historically occupied, with movements from traditional production industries towards wholesalers and toll processors (SIC 46). Therefore care should be taken when making comparisons over time, particularly from 2011-12 onwards.

4. Within industry 46.3 (Wholesale of food, beverages and tobacco), there is a significant under-reporting of data within the Scottish results for 2008. This under-reporting is a result of some business data being inadvertently excluded from the Scottish results. This data is included in the overall UK results but not the Scottish results. This error in the Scottish results cannot be amended due to ABS revision policy of only revising one year's back data.

5. Colleges of Further Education were reclassified as Central Government entities on 13 October 2010, transferring FE Colleges from the private/business sector to the public sector. This change brings FE Colleges outwith scope of ABS survey from 2010 onwards, which represents a step change in the 2010 results for SIC 85 compared to data for earlier years.

6. Data on purchases for 2012 onwards has been produced using a new method for apportionment. This new method was introduced to preserve the additivity of purchases components values to the total purchases. This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method. However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities. Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

7. Totals may not sum due to rounding.

8. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

9. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

10. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Scottish and UK data is compiled by aggregating data into Sections according to the Standard Industrial Classification (SIC) code of each individual business site (e.g. factory, shop etc).

3. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

4. Totals may not sum due to rounding.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. The ONS uses data provided by Dun & Bradstreet to identify businesses with foreign ownership and/or subsidiaries.

3. For UK-owned companies operating in Scotland, a business site is classified as "UK (Scottish registered)" if the enterprise's registered office address is in Scotland. Otherwise, business site is classified as "UK (registered in RUK)" - i.e. enterprise registered office elsewhere in UK.

4. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

5. Totals may not sum due to rounding.

6. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

7. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

8. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. The ONS uses data provided by Dun & Bradstreet to identify businesses with foreign ownership and/or subsidiaries.

3. For UK-owned companies operating in Scotland, a business site is classified as "UK (Scottish registered)" if the enterprise's registered office address is in Scotland. Otherwise, business site is classified as "UK (registered in RUK)" - i.e. enterprise registered office elsewhere in UK.

4. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

5. Totals may not sum due to rounding.

6. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

7. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

8. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. The ONS uses data provided by Dun & Bradstreet to identify businesses with foreign ownership and/or subsidiaries.

3. For UK-owned companies operating in Scotland, a business site is classified as "UK (Scottish registered)" if the enterprise's registered office address is in Scotland. Otherwise, business site is classified as "UK (registered in RUK)" - i.e. enterprise registered office elsewhere in UK.

4. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

5. Totals may not sum due to rounding.

6. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

7. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

8. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

[Please visit Methodology link above for more details.](#)

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology link](#) above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology link](#) above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology link](#) above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology link](#) above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

[Please visit Methodology link above for more details.](#)

3. Across the Production sector many divisions (in particular SIC 20) have been affected by a trend amongst multinational companies towards restructuring on an international basis.

Such restructuring has caused companies to be classified under different sectors to those they have historically occupied, with movements from traditional production industries towards wholesalers and toll processors (SIC 46).

Therefore care should be taken when making comparisons over time, particularly from 2011-12 onwards.

4. Totals may not sum due to rounding.

5. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

6. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

7. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology](#) link above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology](#) page for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology](#) link above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology](#) page for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit [Methodology link](#) above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit [Methodology](#) link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see [Methodology](#) page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology link](#) above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology](#) link above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology](#) page for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology link](#) above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology](#) link above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology](#) page for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology link](#) above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

Please see Methodology page for more details.

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Section SIC07	Division SIC07	Description	Year	No. of Units	Total Employment Th's	Total Employees Th's	Total Turnover £m	Purchases of goods & services £m	Gross Value Added at Basic Prices £m	Gross Wages & Salaries £m	Total Labour Costs £m	Total Output at Basic Prices £m	Gross Value Added Per Head £	Gross Wages & Salaries Per Head £	Total labour Costs Per Head £

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
[Please see Methodology page for more details.](#)
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
[Please visit Methodology link above for more details.](#)
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page](#) for more details.
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology](#) link above for more details.
3. Totals may not sum due to rounding.
4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).
5. Please see [Methodology](#) page for details on estimation of Total Employment, Total Employees and Per Head figures.
6. * = Denotes disclosive data.

Sustainable Tourism's contribution to Local Economy: Gross Value Added 2015

Legend

Key facts:

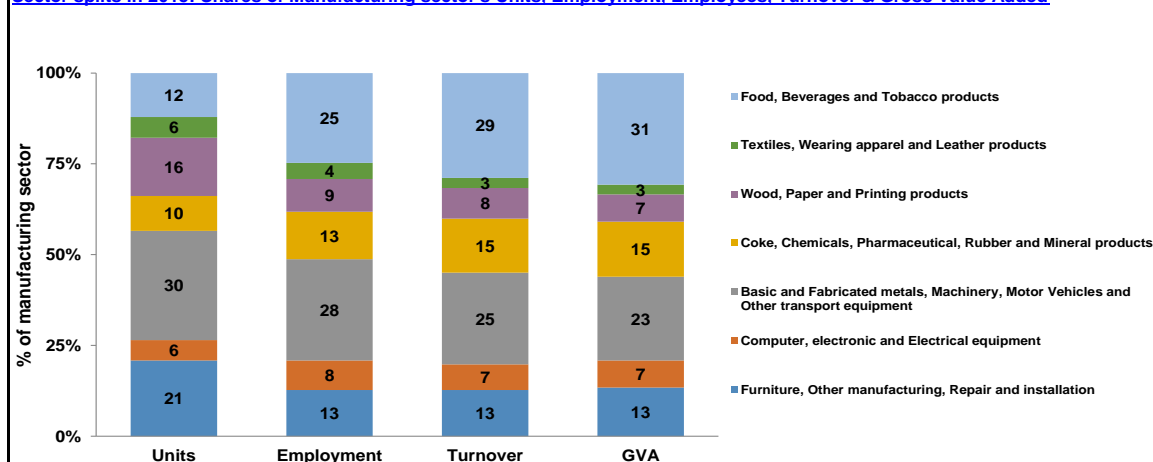

- * In 2015, cash terms Gross Value Added (GVA) in manufacturing amounted to £12.5 billion. Compared to GVA in services sector of £54.4 billion (excludes the financial sector and parts of the public sector) and £7.1 billion in construction. The remaining sectors, covered by the Annual Business Survey (ABS), amounted to £16.0 billion (oil and gas extraction accounted for £6.6 billion of this, note that the ABS includes off-shore oil and gas activity).
- * At a broad sector level, between 2014 and 2015, GVA in manufacturing fell by around £0.9 billion (-7%).
- * Scottish manufacturing accounted for around 7% of total UK manufacturing in terms of turnover and 8.3% of GVA.
- * The three largest contributions to GVA within manufacturing came from the beverages industry [SIC 11] at £2.3 billion (18.5% of total manufacturing GVA), food products industry [SIC 10] at £1.5 billion (12.2%) & repair and installation of machinery and equipment [SIC 33] at £1.3 billion (10.8%). Together these three industry divisions accounted for around 41% of total manufacturing GVA.
Chart below shows manufacturing sector split by broader industry groupings.
- * Within manufacturing, foreign-owned companies accounted for 42.3% of GVA and 32.4% of employment, whilst UK (Scotland registered) firms accounted for 45.4% of GVA and 57.3% of employment.
- * By comparison, in the services sector, foreign-owned companies accounted for 22.0% of GVA and 14.3% of employment, whilst UK (Scotland registered) firms accounted for 57.1% of GVA and 66.1% of employment.
- * The local authority areas contributing most to total GVA within manufacturing were Fife (10.7%), Aberdeen City (9.5%) and Glasgow City (8.6%).

Notes for Profile of Scottish Manufacturing Sector (SIC 10 to 33)

Standard Industrial Classification (SIC) definitions

6	Extraction of Crude Petroleum and Natural Gas
10 to 33	Manufacturing
41 to 43	Construction
45 to 96	Services (excludes the financial sector and parts of the public sector)

The Service Sector referred to in this profile is defined as division codes 45 to 96 of SIC 2007 (SIC07). Please note that it does NOT include the financial sector and parts of the public sector.

Please see Methodology page for more details at: [Methodology link](#)

Chart coverage (at 2-digit SIC)

10,11,12	Food, Beverages and Tobacco products
13,14,15	Textiles, Wearing apparel and Leather products
16,17,18	Wood, Paper and Printing products
19,20,21,22,23	Coke, Chemicals, Pharmaceutical, Rubber and Mineral products
24,25,28,29,30	Basic and Fabricated metals, Machinery, Motor Vehicles and Other transport equipment
26,27	Computer, electronic and Electrical equipment
31,32,33	Furniture, Other manufacturing, Repair and installation

Scotland as a % of UK

Scottish and UK data is compiled by aggregating data into sectors (including Manufacturing) according to the Standard Industrial Classification (SIC) code of each individual business site (e.g. factory, shop etc).

Industry trends

- Oil price changes can have an impact on Manufacturing sector's turnover.
- Across the Production sector, many divisions (in particular SIC 20) have been affected by a trend amongst multinational companies towards restructuring on an international basis. Such restructuring has caused companies to be classified under different sectors to those they have historically occupied, with movements from traditional production industries towards wholesalers and toll processors (SIC 46). Therefore care should be taken when making comparisons over time, particularly from 2011-12 onwards.

Both points outlined above impact on Manufacturing sector.

Source

The statistics come from the Annual Business Survey (ABS) conducted by the Office for National Statistics (ONS). ABS survey broadly excludes the financial sector & parts of agriculture and the public sector.

Please note that changes in one or two large companies can have a major impact, particularly on sectoral and local authority figures, from one year to the next.

Variable definitions

Number of Units

This relates to the number of individual business sites e.g. a plant, factory, shop etc.

Total Employment

This is the point in time estimate of full and part time employees on the payroll plus the number of working proprietors employed on a set day in September.

Please note that Total Employment is a head count and **not** a Full Time Equivalent (FTE) measure.

This distinction is particularly important for sectors with high levels of part time employment (e.g. Retail and Accommodation & Food Service activities) especially when comparing Per Head figures.

Total turnover

Turnover is defined as Total sales and work done.

Gross Value Added at Basic Prices (GVA)

Approximate Gross Value Added represents the amount that individual businesses, industries or sectors contribute to the economy.

For expanded GVA definition, please use following link: [Variables link](#)

Total Labour Costs

This represents the total cost to employers of employing staff.

This includes gross wages & salaries and also employers' National Insurance contributions and contributions to other pension and welfare schemes.

Gross Value Added Per Head

Calculated by dividing GVA by Total Employment

Total Labour Costs Per Head

Calculated by dividing Total Labour Costs by Total Employment

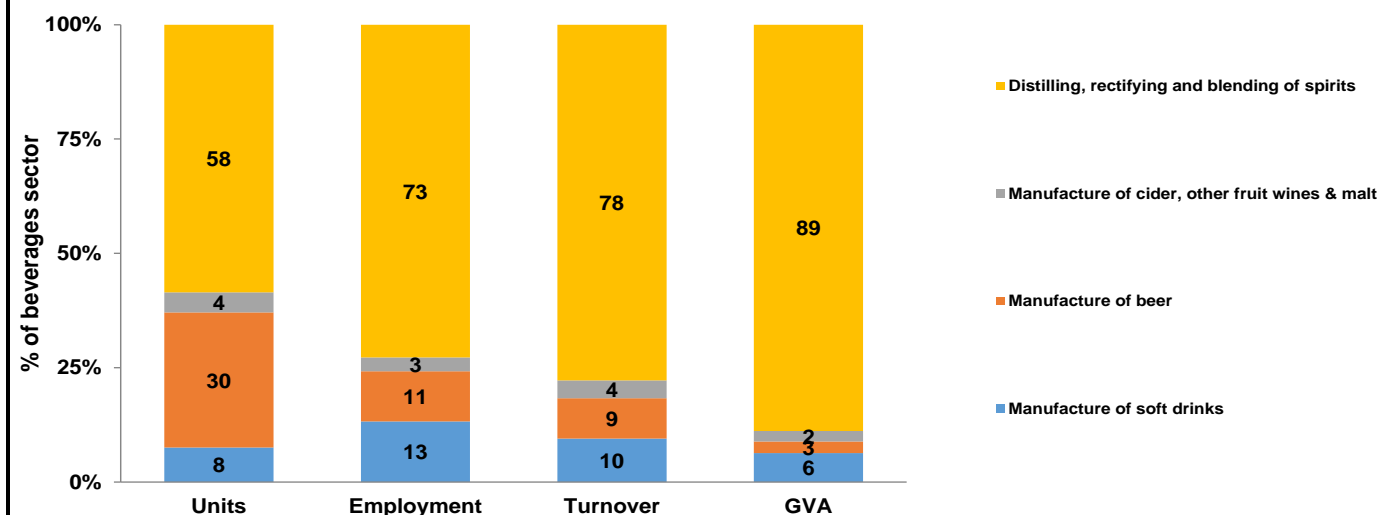

Key facts:

- * In 2015, Gross Value Added (GVA) in the Scottish spirits sector was £2.1 billion, whilst turnover stood at £3.2 billion.
- * The Scottish spirits sector accounted for the vast proportion of total UK output of the industry (around 86% for turnover and 91% of GVA). Compared to the whole of manufacturing, where Scotland accounted for around 7% of turnover and 8% of GVA of total UK manufacturing.
- * The importance of the spirits sector in the Scottish Beverages industry is demonstrated by the fact that it accounts for 78% of its total turnover and 89% of its total GVA. *See Chart below.*
- * Further, spirits accounts for 10% of turnover and 16% of GVA in Scottish manufacturing as a whole.
- Average GVA per head (£254,900) was over three and a half times greater than that found in the manufacturing sector as a whole (£68,800).
- Whilst labour costs per head (£48,800) were nearly 40% higher compared to total for manufacturing sector (£35,200).
- * The top six local authority areas (Fife, Moray, West Dunbartonshire, Glasgow City, North Lanarkshire and Renfrewshire) together accounted for 41% of the business sites, 68% of employment, 71% of turnover and 77% of GVA in the spirits sector. (It is not possible to supply a full individual list of top local authority areas with spirits activity for confidentiality reasons.)

Sector splits: Shares of Outputs & Employment in Beverages sector in 2015

Notes for Profile of Scottish Spirits Sector (including Whisky) (SIC 11.01)

Standard Industrial Classification (4-digit SIC) definition

11.01 Distilling, rectifying and blending of spirits
This includes manufacture of whisky, brandy, gin, liqueurs etc.

Chart coverage (at 4-digit SIC)

11.01 Distilling, rectifying and blending of spirits
11.02 *Manufacture of wine from grape (No Units in Scotland in 2015)*
1103 & 1106 Manufacture of cider, other fruit wines & malt
11.04 *Manufacture of other non-distilled fermented beverages (No Units in Scotland in 2015)*
11.05 Manufacture of beer
11.07 Manufacture of soft drinks; production of mineral waters and other bottled waters

Scotland as a % of UK

Scottish and UK data is compiled by aggregating data into sectors (including Spirits) according to the Standard Industrial Classification (SIC) code of each individual business site (e.g. factory, shop etc).

Source

The statistics come from the Annual Business Survey (ABS) conducted by the Office for National Statistics (ONS). ABS survey broadly excludes the financial sector & parts of agriculture and the public sector.

Please note that changes in one or two large companies can have a major impact, particularly on sectoral and local authority figures, from one year to the next.

At this disaggregate level of analysis (4-digit SIC), particular caution should be exercised in looking at year-on-year changes. Instead, figures should be used to chart general trends.

Variable definitions

Number of Units

Gross Value Added Per Head

Calculated by dividing GVA by Total Employment

Total Labour Costs Per Head

Calculated by dividing Total Labour Costs by Total Employment

Key facts:

* In 2015, Gross Value Added (GVA) in the Scottish shipbuilding sector was around £0.4 billion, whilst turnover stood at £1.6 billion.

* Scottish shipbuilding accounted for a significant proportion of total UK output of the industry (around 31% for turnover and 24% for GVA).

Compared to the whole of manufacturing, where Scotland accounted for around 7% of turnover and 8% of GVA of total UK manufacturing.

* Shipbuilding is a significant contributor in the Scottish Transport related manufacturing sectors. It accounted for 38% of total GVA in the related sectors (worth £1.1 billion). *See Chart below.*

* The top three local authority areas in terms of shipbuilding GVA (Glasgow City, Aberdeen City and Fife) accounted for 23% of the business sites, 76% of employment, 87% of turnover and 82% of GVA in the sector. (It is not possible to supply an individual list of local authorities with shipbuilding activity for confidentiality reasons.)

* The shipbuilding sector accounted for around 5% of turnover and 3% of GVA in Scottish manufacturing as a whole.

Shares of Outputs & Employment in Transport related manufacturing sectors in 2015

Notes for Profile of Scottish Shipbuilding Sector (SIC 30.11 & 33.15)

Standard Industrial Classification (4-digit SIC) definitions

30.11	Building of ships and floating structures
33.15	Repair and maintenance of ships and boats

Chart coverage (at 2, 3 & 4-digit SIC)

30.11 & 33.15	Building of ships and floating structures & Repair and maintenance of ships and boats
30.3 & 33.16	Manufacture of air and spacecraft and related machinery & Repair and maintenance of aircraft and spacecraft
30.12, 30.2, 30.4 & 30.9	Building of pleasure and sporting boats, Manufacture of railway locomotives and rolling stock, Manufacture of military fighting vehicles & Manufacture of transport equipment n.e.c.
29	Manufacture of motor vehicles, trailers and semi-trailers

Scotland as a % of UK

Scottish and UK data is compiled by aggregating data into sectors (including Shipbuilding) according to the Standard Industrial Classification (SIC) code of each individual business site (e.g. factory, shop etc).

Source

The statistics come from the Annual Business Survey (ABS) conducted by the Office for National Statistics (ONS). ABS survey broadly excludes the financial sector & parts of agriculture and the public sector.

Please note that changes in one or two large companies can have a major impact, particularly on sectoral and local authority figures, from one year to the next.

At this disaggregate level of analysis (4-digit SIC), particular caution should be exercised in looking at year-on-year changes. Instead, figures should be used to chart general trends.

Variable definitions

Number of Units

This relates to the number of individual business sites e.g. a plant, factory, shop etc.

Total Employment

This is the point in time estimate of full and part time employees on the payroll plus the number of working proprietors employed on a set day in September.

Please note that Total Employment is a head count and **not** a Full Time Equivalent (FTE) measure.

This distinction is particularly important for sectors with high levels of part time employment (e.g. Retail and Accommodation & Food Service activities) especially when comparing Per Head figures.

Total turnover

Turnover is defined as Total sales and work done.

Gross Value Added at Basic Prices (GVA)

Approximate Gross Value Added represents the amount that individual businesses, industries or sectors contribute to the economy.

For expanded GVA definition, please use following link: [Variables link](#)

Total Labour Costs

This represents the total cost to employers of employing staff.

This includes gross wages & salaries and also employers' National Insurance contributions and contributions to other pension and welfare schemes.

Gross Value Added Per Head

Calculated by dividing GVA by Total Employment

Total Labour Costs Per Head

Calculated by dividing Total Labour Costs by Total Employment

Profile of Scottish Aerospace Sector (SIC 30.3 & 33.16)

Last Update

August 2017

Key facts:

* In 2015, Gross Value Added (GVA) in the Scottish aerospace sector was around £0.4 billion (4.5% of UK total), whilst turnover stood around £1.7 billion (5.5% of UK total).

* Aerospace is a significant contributor in the Scottish Transport related manufacturing sectors. It accounted for 35% of total GVA in the related sectors (worth £1.1 billion). *See Chart below.*

* The top three local authority areas (South Ayrshire, Aberdeen City and Renfrewshire) accounted for 39% of the business sites in the Aerospace sector, 84% of employment, 95% of turnover and 90% of GVA. (It is not possible to supply an individual list of local authorities with aerospace activity for confidentiality reasons.)

* The aerospace sector accounted for around 5% of turnover and 3% of GVA in Scottish manufacturing as a whole.

This includes gross wages & salaries and also employers' National Insurance contributions and contributions to other pension and welfare schemes.

Gross Value Added Per Head

Calculated by dividing GVA by Total Employment

Total Labour Costs Per Head

Calculated by dividing Total Labour Costs by Total Employment

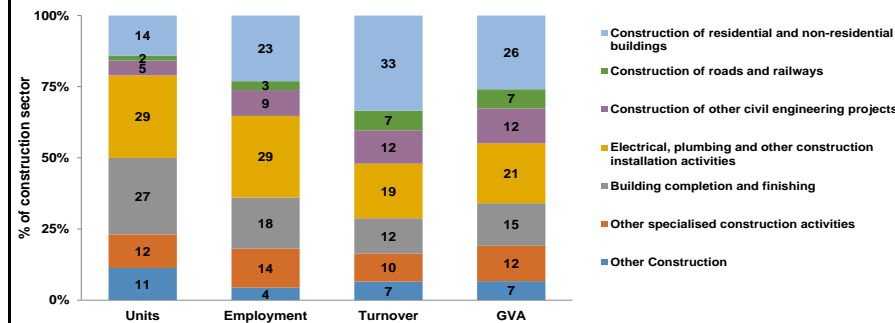

Key facts:

- * In 2015, cash terms Gross Value Added (GVA) in construction amounted to £7.1 billion. Compared to GVA in services sector of £54.4 billion (excludes the financial sector and parts of the public sector) and £12.5 billion in manufacturing. The remaining sectors, covered by the Annual Business Survey (ABS), amounted to £16.0 billion (oil and gas extraction accounted for £6.6 billion of this, note that the ABS includes off-shore oil and gas activity).
- * At a broad sector level, between 2014 and 2015, GVA in construction GVA increased by around £0.6 billion (8.4%).
- * Scottish construction accounted for around 7.2% of total UK construction in terms of turnover and 7.7% of GVA.
- * The sub-sectors making the largest contribution to construction GVA were "Construction of residential and non-residential buildings" (26%) and "Electrical, plumbing and other construction installation activities" (21%).
See Chart below
- * Within construction, foreign-owned companies accounted for 7.6% of GVA and 7.0% of employment, whilst UK (Scotland registered) firms accounted for 77.6% of GVA and 84.2% of employment.
- By comparison, within manufacturing, foreign-owned companies accounted for 42.3% of GVA and 32.4% of employment, whilst UK (Scotland registered) firms accounted for 45.4% of GVA and 57.3% of employment.
- * The local authority areas contributing most to total GVA within construction were Glasgow City (14.8%), Aberdeenshire (8.0%) and North Lanarkshire (7.7%).

Notes for Profile of Scottish Construction Sector (SIC 41 to 43)

Standard Industrial Classification (2-digit SIC) definitions

41	Construction of buildings
42	Civil engineering
43	Specialised construction activities

Chart coverage (at 3-digit SIC)

41.2	Construction of residential and non-residential buildings
42.1	Construction of roads and railways
42.9	Construction of other civil engineering projects
43.2	Electrical, plumbing and other construction installation activities
43.3	Building completion and finishing
43.9	Other specialised construction activities
41.1, 42.2 & 43.1	Other Construction (<i>Development of building projects, Construction of utility projects & Demolition and site preparation</i>)

The Service Sector referred to in this profile is defined as division codes 45 to 96 of SIC 2007 (SIC07). Please note that it does NOT include the financial sector and parts of the public sector. Please see Methodology page for more details at: [Methodology link](#)

Scotland as a % of UK

Scottish and UK data is compiled by aggregating data into sectors (including Construction) according to the Standard Industrial Classification (SIC) code of each individual business site (e.g. factory, shop etc).

Source

The statistics come from the Annual Business Survey (ABS) conducted by the Office for National Statistics (ONS). ABS survey broadly excludes the financial sector & parts of agriculture and the public sector.

Please note that changes in one or two large companies can have a major impact, particularly on sectoral and local authority figures, from one year to the next.

Variable definitions

Number of Units

This relates to the number of individual business sites e.g. a plant, factory, shop etc.

Total Employment

This is the point in time estimate of full and part time employees on the payroll plus the number of working proprietors employed on a set day in September.

Please note that Total Employment is a head count and **not** a Full Time Equivalent (FTE) measure.

This distinction is particularly important for sectors with high levels of part time employment (e.g. Retail and Accommodation & Food Service activities) especially when comparing Per Head figures.

Total turnover

Turnover is defined as Total sales and work done.

Gross Value Added at Basic Prices (GVA)

Approximate Gross Value Added represents the amount that individual businesses, industries or sectors contribute to the economy.

For expanded GVA definition, please use following link: [Variables link](#)

Total Labour Costs

This represents the total cost to employers of employing staff.

This includes gross wages & salaries and also employers' National Insurance contributions and contributions to other pension and welfare schemes.

Gross Value Added Per Head

Calculated by dividing GVA by Total Employment

Total Labour Costs Per Head

Calculated by dividing Total Labour Costs by Total Employment

Key facts:

* In 2015, Gross Value Added (GVA) in the Scottish retail sector was £6.6 billion (8.8% of UK total), whilst turnover stood at £25.1 billion (7.1% of UK total).

* GVA in the Scottish retail sector fell by 6.1 % between 2014 and 2015 (from £7.0 bn to £6.6 bn).

* The sub-sectors making the largest contribution to retail GVA were "Retail sale in non-specialised stores" (51%) (e.g. supermarkets) and "Retail sale of other goods in specialised stores" (26%) (e.g. clothing shops, chemists). [See Chart below.](#)

* The local authority areas contributing most to total GVA within retail were Glasgow City (13.1%), Edinburgh City (12.8%) and Aberdeen City (8.7%). These three local authority areas together accounted for around 29% of the business sites, 31% of employment, 32% of turnover and 35% of GVA in the Scottish retail sector.

* Retail is an important contributor to the services sector (excludes the financial sector and parts of the public sector). Within services, the three largest contributions to GVA came from - retail trade [SIC 47] at £6.6 billion (12.1% of total services GVA), architectural & engineering activities [SIC 71] at £5.0 billion (9.2%) and wholesale trade [SIC 46] at £4.5 billion (8.3%).

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

Please see Methodology page for more details.

2. Totals for Food and Drink & Financial and Business Services relate only to those sectors covered in ABS publication. Full Growth Sector definitions include other industries not covered in ABS.

3. Following impacts on Energy sector figures:

Across the Production sector, many divisions (in particular SIC 20) have been affected by a trend amongst multinational companies towards restructuring on an international basis.

Such restructuring has caused companies to be classified under different sectors to those they have historically occupied, with movements towards traditional production industries towards wholesalers and toll processors (SIC 46).

Therefore care should be taken when making comparisons over time, particularly from 2011-12 onwards.

4. SIC 6 (Extraction of crude petroleum and natural gas) data is included in Energy Totals. ABS data is allocated to UK regions (including Scotland) according to the address at which the business is registered - onshore and offshore Oil & Gas extraction is allocated in this way.

Note that, such offshore activity, under UK Regional Accounts procedures is normally allocated to a separate "Extra-regio" category rather than allocated to a region within the UK.

5. Totals may not sum due to rounding.

6. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

7. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

8. * = Denotes disclosive data.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Please see Methodology page for more details.](#)

2. This table is restricted to the private sector only. Public corporations/nationalised bodies, central government and local authorities are **excluded** for all years.

3. The 2010 results onwards for Computer Games are **not** comparable with earlier years, since work has taken place to improve the coverage of the sector from 2010 onwards.

4. See separate sheet for list of Standard Industrial Classification (SIC) codes covered / proportions applied under each category.

5. Totals may not sum due to rounding.

6. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

7. Please see Methodology page for details on estimation of Total Employment, Total Employees and Per Head figures.

8. * = Denotes disclosive data.

(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

[Methodology link](#)

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities.

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit [Methodology link](#) above for more details.

3. Totals may not sum due to rounding.

4. Total employment and Total Employees figures are head counts only (so have not been adjusted to Full Time Equivalents).

5. Please see [Methodology page](#) for details on estimation of Total Employment, Total Employees and Per Head figures.

6. * = Denotes disclosive data.

Background

The Scottish Government holds historic manufacturing data from a number of different sources. We have integrated these datasets in order to produce a broadly consistent time-series of employee and financial variables.

Work involved in producing this integrated dataset included:

- Looking at what variables were available, and in which years
- Considering how best to integrate the various datasets
- Up-rating Scottish Register Employment data to allow for units with 10 or fewer employees
- Down-rating early *employment* data to be consistent with later *employee* data
- Up-rating early *GVA at factor cost* data to be consistent with later *GVA at basis prices* data
- Converting all data to a **SIC 2007** Industry Group level

Information on Standard Industrial Classification (SIC) codes can be found at:

<https://www.ons.gov.uk/methodology/classificationsandstandards/ukstandardindustrialclassificationofeconomicactivities/uksic2007>

Time series data

Only a limited number of variables in an aggregated SIC format were available in early years for the manufacturing sector. It was therefore determined that time series data at an Industry Group level only (on a SIC 2007 basis) would be produced for a selection of variables which spanned most years. **SIC 2007** Industry Groups produced cover:

Industry Group	SIC 2007 (2-digit codes)
Food, Beverages & Tobacco products	10,11,12
Textiles, Wearing apparel & Leather products	13,14,15
Wood, Paper & Printing products	16,17,18
Coke, Chemicals, Pharmaceutical, Rubber & Mineral products	19,20,21,22,23
Basic and Fabricated metals, Machinery, Motor Vehicles & Other transport equipment	24,25,28,29,30
Computer, electronic & Electrical equipment	26,27
Furniture, Other manufacturing, Repair & installation	31,32,33

Data used in integrated Manufacturing dataset

▪ **Scottish Register of Employment (SRE)**

In the integrated manufacturing dataset, Scottish Register Employment (SRE) employee figures for 1950-1969 only were used.

The SRE contains data on *manufacturing* units with greater than ten employees (a unit being defined as a single manufacturing site). The data runs from 1950 to around 1993 and was collected from a range of sources by the Scottish Government (then the Scottish Office). Data collection was discontinued because of the increasing scope of the Office for National Statistics (ONS) surveys.

SRE data was converted to a SIC07 basis via a number of steps. Initially SRE data at a 2-digit level was mapped from SIC80 to SIC92 and then for robustness data was aggregated to a SIC92 Industry Group level. Correlation factors were then calculated to scale the SRE data to match Scottish Production Database figures (more information below on this database).

Next, SRE only contains information on units where employment is greater than ten. In order to take account of the 'missing' data (i.e. units with ten or less employees), scaling factors were applied to the aggregated SRE data. The factors were calculated using averages determined by analysing data at SIC92 Industry Group level where total employment was divided by the employment figures for units with greater than ten employees.

By this point, SRE data had been converted to a SIC92 Industry Group basis with imputed employment for manufacturing units with ten or less employees. The SIC92 codes were then mapped to SIC07 using scaling factors calculated by analysing SIC03 v SIC07 data at an Industry Group level (at this level of analysis, any differences between SIC92 and SIC03 codes are negated). After factors applied, SRE data was then aggregated to the appropriate SIC07 Industry Group level.

Finally, 1950-1969 SRE employment data on a SIC07 basis needed to be downrated to match employee data available in later years. For this, scaling factors were calculated by analysing employee v employment data at Industry Group level and then factors applied to 1950-1969 data.

At this stage, 1950-1969 data had been converted to SIC07 Industry Group level and employee variable was consistent with other datasets.

Please note that it was determined, for consistency, to use employee data from 1970 onwards from alternative sources outlined below rather than from SRE database.

▪ **Scottish Production Database (SPD)**

In the integrated manufacturing dataset, Scottish Production Database (SPD) financial and employee figures for 1970-1997 only were used.

SPD data was sourced from returns from an annual sample survey, the Annual Census of Production (ACOP). This was a large survey of companies in the production sector carried out each year by the Office for National Statistics.

SPD data is not held in a consistent format over the period.

- From 1970 to 1978, data is available on a SIC68 basis
- From 1979 to 1991, data is available on a SIC80 basis
- From 1992 to 1997, data is available on a SIC92 basis

Following SIC conversions were therefore undertaken.

Firstly, the 1970 to 1978 data available on a SIC68 basis was converted in stages. Initially, this data was mapped from SIC68 to SIC80 and then to SIC92 codes mainly at a 2-digit SIC level. Then the SIC92 codes were mapped to SIC07 codes using scaling factors calculated by analysing SIC03 v SIC07 data at a 2-digit level (at this level of analysis, any differences between SIC92 and SIC03 codes are negated). After factors applied to 1970-1978 data, it was then aggregated to the appropriate SIC07 Industry Group level.

Secondly, the 1979 to 1991 data available on a SIC80 basis was also converted in stages. Initially, the data was mapped from SIC80 to SIC92 at a 2-digit level. Then the SIC92 codes were mapped to SIC07 codes using scaling factors calculated by analysing SIC03 v SIC07 data at a 2-digit level (at this level of analysis, any differences between SIC92 and SIC03 codes are negated). After factors applied to 1979-1991 data, it was then aggregated to the appropriate SIC07 Industry Group level.

Thirdly, the 1992 to 1997 data available on a SIC92 basis was converted to a SIC07 basis. The SIC92 codes were mapped to SIC07 codes using scaling factors calculated by analysing SIC03 v SIC07 data at a 3-digit level (at this level of analysis, any differences between SIC92 and SIC03 codes are negated). After factors applied to 1992-1997 data, it was then aggregated to the appropriate SIC07 Industry Group level.

At this stage, 1970-1997 data had been converted to SIC07 Industry Group level. However, there were two further issues with the data:

(a) 1970-1997 employment data on a SIC07 basis needed to be downrated to match employee data available in later years. For this, scaling factors were calculated by analysing employee v employment data at Industry Group level and then factors applied to 1970-1997 data.

(b) 1976-1995 GVA at factor cost data on a SIC07 basis needed to be uprated to match GVA at basic prices data available in later years. For this, scaling factors were calculated by analysing GVA at factor cost v GVA at basic prices at Industry Group level and then factors applied to 1976-1995 data.

For information, GVA variable is not available prior to 1976, whilst for 1996 onwards GVA at basic prices is available in datasets.

At this stage, 1970-1997 data had been converted to SIC07 Industry Group level and its variables were consistent with other datasets.

▪ **Scottish Annual Business Statistics (SABS)**

In the integrated manufacturing dataset, Scottish Annual Business Statistics (SABS) financial and employee figures for 1998 onwards were used.

Scottish Annual Business Statistics (SABS) is based on data from the Annual Business Survey (ABS) (formerly Annual Business Inquiry (ABI)) conducted by the Office for National Statistics. The ABS is an annual survey of registered businesses covering the production, construction, distribution and service industries which represent the UK Business Economy. This is about two thirds of the UK's whole economy in terms of Gross Value Added.

SABS data is not held in a consistent format over the period²⁹¹

- From 1998 to 2006, data is available on a SIC92 / SIC03 basis *(any differences between SIC92 and SIC03 codes are negated at level analysis undertaken at)*
- From 2007 onwards, data is available on a SIC07 basis

For 1998-2006 data, following SIC conversion was undertaken. SIC92 / SIC03 codes were mapped to SIC07 codes using scaling factors calculated by analysing SIC03 v SIC07 data at a 3-digit level (at this level of analysis, any differences between SIC92 and SIC03 codes are negated). After factors applied, 1998-2006 data was then aggregated to the appropriate SIC07 Industry Group level.

For 2007 data onwards, SIC07 codes already in datasets were used to aggregate data to a SIC07 Industry Group level.

At this stage, 1998 data onwards had been converted to a SIC07 Industry Group level and its variables were consistent with other datasets.

Converting current prices to constant prices

Integrated manufacturing dataset contains data on a SIC07 Industry Group level basis **at current prices**. Time series charts using this data have been compiled.

Integrated data **at constant prices** has also been produced. Current price data was converted using UK GDP deflators from Treasury website (at 2015 prices).

Please note that Charts do not include **GVA at constant prices**. Scottish Quarterly GDP series (includes Manufacturing) is already published on Scottish Government website.

Per Employee Charts

Per Employee Charts for selected financial variables have been compiled. For this, data for a financial variable is divided by the corresponding employee data to create a Per Employee figure e.g. Labour Costs data is divided by employees to create Labour Costs per employee values.

Charts for industries as proportion of Scottish manufacturing sector in each year

Charts have been compiled for selected financial variables which show industries as a proportion of Scottish manufacturing sector **in each year**. This is calculated by dividing variable totals for the seven sub-Manufacturing industries by the *overall* manufacturing sector total in the same year.

Charts should allow users to look at changes in industries over-time, although proportions do **not** show magnitude of actual figures. So for example, "Food, Beverages & Tobacco as a % of Manufacturing" may have risen in a specific year not necessarily due to an increase in its actual figures but due to a proportionally greater decrease in actual figures in the other sub-Manufacturing industries.

SIC 2007 compared to SIC 2003

Please note that the Manufacturing sector **reduced** under SIC 2007 compared to SIC 2003. This adjustment has been applied to all time series data in the Charts. For information, a background paper on **Assessing the Impact of SIC 2007** can be found at: <http://www.gov.scot/Topics/Statistics/Browse/Business/Corporate/sic2007note>

Conclusion

As outlined in this technical note, a considerable amount of estimation (particularly in converting data in early years to a SIC 2007 basis) was involved in producing the historic integrated dataset. Also, the datasets that have been combined have methodological differences in terms of sample collection and modelling processes to gross survey returns to business populations. No allowance is made for such differences in integrated dataset.

It is therefore anticipated that the manufacturing time series will be of most use in graphical form to look at long term trends, rather than looking at specific values for specific years. The dataset will be updated annually as each new year's data becomes available (which will also include revision of previous year's data).

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page for more details](#).
2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.
This new method was introduced to preserve the additivity of purchases components values to the total purchases.
This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.
However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities
(in particular there is volatility in estimates covering Payments to winning customers which are included under Purchase of other services in Table above).
Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.
Please visit [Methodology link](#) above for more details.
3. As outlined in Note 2 above, constituent variables sum to totals for Purchases of goods & services in each Section / Division from 2012 onwards.
4. Overall totals may not sum due to rounding.
5. * = Denotes disclosive data.
6. Please go to link below to view standard ABS forms which detail what is included under each constituent variable.
[ABS forms](#)

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see Methodology page for more details.

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2009 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities (in particular there is volatility in estimates covering Payments to winning customers which are included under Purchase of other services in Table above).

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit Methodology link above for more details.

3. As outlined in Note 2 above, constituent variables sum to totals for Purchases of goods & services in each Section / Division from 2012 onwards.

4. Overall totals may not sum due to rounding.

5. * = Denotes disclosure data.

6. Please go to link below to view standard ABS forms which detail what is included under each constituent variable.

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.
Please see [Methodology page for more details](#).

2. Data on purchases for 2012 onwards has been produced using a new method for apportionment.

This new method was introduced to preserve the additivity of purchases components values to the total purchases.

This has introduced a discontinuity in the purchases and GVA data series, with 2008 to 2011 still calculated using the original method.

However, an impact of this new methodology has resulted in volatility for a small number of multi-site businesses in Division 92 – Gambling and betting activities (in particular there is volatility in estimates covering Payments to winning customers which are included under Purchase of other services in Table above).

Figures for this Division should therefore be treated with caution until further analysis is carried out by the ONS.

Please visit [Methodology link](#) above for more details.

3. As outlined in Note 2 above, constituent variables sum to totals for Purchases of goods & services in each Section / Division from 2012 onwards.

4. Overall totals may not sum due to rounding.

5. * = Denotes disclosive data.

6. Please go to link below to view standard ABS forms which detail what is included under each constituent variable.

[ABS forms](#)

Source: Office for National Statistics, Annual Business Survey
(Compiled by Scottish Government)

Notes: 1. Annual Business Survey (ABS) coverage excludes certain areas such as the financial sector & parts of agriculture and the public sector.

Please see Methodology page for more details.

2. * = Denotes disclosive data.

A National Statistics publication for Scotland

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be interpreted to mean that the statistics: meet identified user needs; are produced, managed and disseminated to high standards; and are explained well.

Correspondence and enquiries

For enquiries about this publication please contact:

Marina Curran,
Office of the Chief Economic Adviser,
Telephone: 0131-244-6813,
e-mail: Marina.Curran@gov.scot

For general enquiries about Scottish Government statistics please contact:
