DR. J. COLLIS BROWNE'S CHLORODYNE, THE ORIGINAL AND ONLY GENUINE.

CHLORO- DYNE

is admitted by the profession to be the most wonderful and valuable remedy ever discovered. is the best remedy known for Coughs, Consumption, Bronchitis, and Asthma. effectually checks and arrests those too often fatal diseases—Diphtheria, Fever, Croup, Ague. acts like a charm in Diarrhoea, and is the only specific in Cholera and Dysentery. effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms. is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis, &c.

A FEW DOSES QUITE EFFECTUAL.

CAUTION.—The extraordinary medical report on the efficacy of Chlorodyne renders it of vital importance that the public should obtain the genuine, which bears the words—"Dr. J. Collis Browne's Chlorodyne." Vice-Chancellor Wood stated that Dr. J. Collis Browne was undoubtedly the inventor of Chlorodyne; that the whole story of the defendant was deliberately untrue. Chemists throughout the land will confirm this decision that Dr. J. C. BROWNE was the inventor of CHLORODYNE. **Overwhelming Medical Testimony accompanies each Bottle.** *Sold in Bottles, 1s. 1½d., 2s. 9d., 4s. 6d., by all Chemists.*

GARDENING.

IN the beginning of this month sow early peas; early mazagan and long-pod beans during the first and last weeks; onions in very light soils; pars'ey, short-topped radish, and hardy green and brown Dutch lettuce. Prune all kinds of fruit-trees. Sow salads, carrots and kidney beans on slight hotbeds. Transplant herbaceous plants in light soils. Trim neatly roses and creeping plants.

LERWICK.

LERWICK, the "clay-bay"—from the Norse *leir*, mud or clay, and *vik*, a bay—is the capital of the Shetland Islands, and is a town of over four thousand inhabitants. It is of comparatively modern growth, its first house having been built about the beginning of the seventeenth century. In appearance it is not unlike a seaport town in the Netherlands. It lies for about a mile along the shores of a crescent-shaped bay, and consists mainly of one long street, very narrow in places. Our view is taken from Bressay, an island opposite Lerwick.

GARDENING.

SOW beans and peas in the beginning and end of the month; a few early cabbages, red cabbages and savoy in the last week. Sow also early horn carrots, Dutch turnips, onions for a full crop in light soils, with a few leeks. Strawberries may be planted about the end of the month. Continue the transplanting of hardy biennial flowers. On mild days admit air freely to auriculas, etc.

DOUGLAS.

THIS, the chief town of the Isle of Man, and a favourite watering-place, stands on a fine semi-circular bay on the east coast of the island. The older streets are irregular and narrow, but the modern ones, on terraces rising beyond the old town, are handsome and spacious. A splendid new pier, at which passengers can land and embark at all states of the tide, was erected in 1872, and a handsome promenade, enclosing the greater part of the shore, was constructed four years later.

GARDENING.

SOW main crops of peas, beans, cabbages, onions, leeks, carrots, parsnips, Brussels sprouts, borecoles, lettuces and spinach. In the beginning and also at the end of the month sow turnips and savoy's. In the last fortnight sow asparagus, cauliflowers, celery, &c. Plant the main crop of potatoes during the last fortnight. Sow hardy annuals about the end of the month.

ON THE CAM.

CAMBRIDGE, as everyone knows, is situated on the Cam, a river which forms the scene of the boating of the university. The races which are held here are picturesque spectacles never to be forgotten by those who have once witnessed them. The men spectators chiefly frequent the towing-path, and many run with one or other of the boats; those who have breath to spare shouting appropriate words of encouragement. The ladies, who prefer quiet to rushing, are to be seen watching the race from the meadows on the opposite bank.

SOW asparagus, sea-kale, beet, carrots, and onions on heavy soils. Sow broccoli and kidney beans both in the second and in the last week. Attend to the hoeing and thinning of spinach, onions, turnips, and stake peas. Sow main or succession cress and annuals of all sorts. Biennials and perennials should be sown before the middle of the month. Finish the transplanting of herbaceous plants by the end of the first week.

A MARBLE PALACE.

POTSDAM is the seat of government for the Prussian province of Brandenburg, and the summer residence of the German Emperor. It is almost entirely surrounded by a fringe of royal palaces, parks, and pleasure grounds, which fairly substantiate its claim to the title of a "German Versailles." It lies about sixteen miles south-west of Berlin, and is rather a sleepy town except in summer, when its streets are enlivened by endless streams of excursionists from the capital.

SHANGHAI.

THIS is one of the cities of China, situated on the western bank of the Hwang-p'u river, about twelve miles from the point where that river empties itself into the estuary of the Yang-tsze-Kiang. As a port Shanghai was thrown open to foreign trade in the year 1842, and its manifold advantages have attracted to it merchants of all nationalities. The streets of the native town may be said to illustrate all the worst features of Chinese cities—dirt, closeness, and absence of all sensible sanitary arrangements.

FORDINGBRIDGE.

As the crow flies, Fordingbridge lies about nine miles from Salisbury. It is a considerable town on the right bank of the Avon, which is here crossed by a bridge of seven arches, shown in our illustration. On the road from Salisbury to Fordingbridge are many objects of interest, including Longford Castle, the seat of the Earl of Radnor, with a splendid collection of paintings; Trafalgar House, the seat of Earl Nelson, and Breamore House, an Elizabethan mansion.

Gather and dry medicinal and pot-herbs ; also propagate such by slips and cuttings. Continue the summer pruning and training of all wall-trees. Take up the remainder of tuberous roots, such as anemone, ranunculus, etc.

THE THAMES EMBANKMENT.

The Victoria Embankment on the left bank of the river Thames, extending from Westminster to Blackfriars, a distance of about a mile and a quarter, is one of the great improvements of modern times in the metropolis. The whole of the space now occupied by the Embankment used to be covered by water or mud, according to the state of the tide. The substitution of the beautiful curve of the Embankment is a happy change from the squalid foreshore.

SANDRINGHAM CHURCH.

THE Church of St. Mary Magdalene at Sandringham is of ancient date, and has been twice restored and enlarged by the Prince of Wales since the purchase of his Norfolk seat. The Prince has caused several monuments, busts, etc., to be placed there, conspicuous being busts of the late Princess Alice and the Emperor Frederick, and a medallion to the late Duke of Albany. There is also a handsome brass lectern, placed by the Princess as a thank offering for the recovery of the Prince from his illness of typhoid fever.

Lift potatoes and store them. Gather and store carefully the autumnal sort of apples and pears. Continue the propagation of herbaceous plants. Plant evergreens. Keep down weeds.

CONWAY.

THE town of Conway beautifully situated on steep slope on the left bank of the river Conway where it falls into the ocean, and hence the name by which the Welsh generally designate it Aberconway. Conway Castle was erected by Edward I. in 1284 as security against Welsh insurrection, commanding the Pass of Pen-mae mawr, which then formed as it does now, the route to Snowdon and Anglesey. When in its perfect state, this castle must have been one of the most magnificent fortresses in Britain.

ST. ANDREWS.

THE ancient Fifeshire city of St. Andrews stands on an eminence hard by the sea. The cathedral of St. Andrews was founded in the year 1159. The remains of the archiepiscopal castle of St. Andrews stand on a rock at a short distance north-west of the Cathedral. The University of St. Andrews—the oldest in Scotland—was founded in 1411. But a more notable feature in the St. Andrews of the present day than cathedral, castle or university, is golf. The links of St. Andrews have for long been the most favoured resort of the devotees of the national game.

BUXTON.

THIS fashionable watering place is situated in Derbyshire and lies 160 miles from London. It stands high, being 900 feet above the level of the sea, and is surrounded at a distance by hills of considerable elevation, except on the south-west side, where the Wye, which rises about half a mile off, makes its exit. The mineral waters of Buxton, the most noted in England, are particularly efficacious in cases of rheumatism and gout. The season at Buxton extends from June to October.

GARDENING.

SOW a few beans and peas as in November. Very few operations can be carried on this month, with the exception of trenching and digging in dry weather, operations which should by all means be attended to. The ground should be thoroughly well turned up for exposure to the frost and snow. Plant all sorts of fruit-trees in mild weather. Proceed with pruning and nailing wall trees.

THE LAKE OF THUN.

THE scenery of the Lake of Thun is proverbial for its beauty. The northern shore presents a bold array of rugged mountains, the southern abounds in the most graceful and picturesque landscapes. The town of Thun is small, and only remarkable when connected with the magnificent country of which it forms the capital. The population is greatly increased during the summer months by the influx of strangers, who show a decided partiality for the banks of the Lake of Thun.

Principals are responsible for their agents. Each individual in partnership is responsible for the whole amount of the debts of the firm. A verbal contract for more than one year is void. The Months in the above Table are calculated at only Twelve Months to the Year. If the Yearly Wages be Guineas instead of Pounds, for each Guinea add one Penny to each Month, or one Farthing to each week. Thus, Six Pounds per Year are Ten Shillings per Month; but if the Wages be Six Guineas, add one Penny for each Guinea that is, Sixpence, and it will then be Ten Shillings and Sixpence per Month. In like manner, by adding Six Farthings to each Week, the Wages will be Two Shillings and Fivepence per Week.

WORK. The Illustrated Weekly Journal for Mechanics.

A £100 Scholarship, Medals, and Money Gained from Reading "Work."

"SIR,—As my first success is due in a great measure to your journal, I have great pleasure in recording my experiences. I served an apprenticeship to joinery, during which period I began to study your journal, thus turning my thoughts to drawing and design. At the end of one year as journeyman I left the shop of my apprenticeship and was engaged by a firm of cabinet makers, with whom I remained till July, 1892. I forwarded my drawings and designs (in 1892) to South Kensington, and was awarded a National Scholarship (value £100), tenable for two years, at the National Art Schools, and was so far successful as to be awarded a third year as senior student, with an increased allowance. I have found your journal invaluable as an aid to the technical examinations held by the City and Guilds, for to your paper is due to a great extent my first-class silver medal in cabinet making, 1894, and first-class silver medal and £8 prize for plasterers' work, 1895.—JOHN B. DANIELL (*Kirkby-in-Furness*)."

Wages Increased through Reading "Work."

"SIR,—This is how I improved my position: Being, in the first place, only a brush hand or painters' labourer, I studied night and day to better my position and, above all, to understand my work thoroughly and well. This I was able to do through WORK and my own perseverance. Now I am recognised as a full-fledged painter, and in receipt of 36s. per week instead of 24s. per week.—R. ALFRED DAVEY (*Poplar, E.*)."

Many Pounds Earned through "Work."

"SIR,—I have found WORK one of the most valuable papers I ever read. I have earned many pounds in green-house repairing and resetting green-house boilers. I have also earned many pounds by repairing furniture of various kinds. So I must say that this paper WORK has been my tutor, and I hope to continue with it, as it is the best pennyworth I ever bought.—ALBERT E. PRIESTLEY (*Queensbury, near Bradford*)."

* * "WORK" is also published Monthly, price 6d., each Part containing a Coloured Plate; and in Volumes, 4s. each.

Building World.

"Building World" Recommends Itself.

"SIR,—I must congratulate you on the excellence of your 53rd number of BUILDING WORLD. Calling as I do upon joiners, builders, and contractors, I hear nothing but good opinions of your paper. Before this number was issued I had presented several copies to joiners, etc., most of whom have become readers. I may say that this is the first paper connected with the building trade that I have taken any interest in, and I am a subscriber to several; but the excellence of an article recommends itself. This is the only reason for interesting myself in it, and is it not a very good reason? I wish BUILDING WORLD the success it deserves.—J. B. R. (*Newcastle*)."

* * Also published Monthly, price 6d., each Part containing a valuable Coloured Plate; and in Volumes, 4s. each.

## USE ENO'S "FRUIT SALT."

It is Pleasant, Cooling, Soothing, Health-Giving, Refreshing and Invigorating.

You cannot overstate its great value in keeping the blood pure and free from disease.

**EVERYTHING but the Plainest Food Disagreed with me.**—"Onslow Gardens, London, S.W.—SIR, Allow me to express my gratitude for the wonderful preventive of Sick Headache you have given to the world in ENO'S "FRUIT SALT." For two years and a half I suffered from Sick Headache. Five months ago I commenced taking your "FRUIT SALT" daily, and have not had one headache during that time; whereas formerly everything but the plainest food disagreed with me. I am now almost indifferent as to diet. I cannot thank you sufficiently for conferring on me such a benefit.—I am, Sir, yours gratefully, TRUTH."

"DEAR SIR,—As an illustration of the beneficial effects of your "FRUIT SALT," I have no hesitation in giving the particulars of the case of one of my friends. Stagnation of the Liver and Bilious Headache affected him, so he was obliged to live upon only a few articles of diet, and to be most sparing in their use. This did nothing in effecting a cure, although persevered in for twenty-five years, and also consulting eminent members of the faculty. By the use of your "FRUIT SALT," he now enjoys vigorous health; he has never had a Headache or Constipation since he commenced to use it, about six months ago, and can partake of his food to the great satisfaction of himself and friends. You may well extend its use *pro bono publico*. I find it makes a very refreshing and invigorating drink.—I remain, dear Sir, yours faithfully, J. W. NEIL." (From the late Rev. J. W. NEIL, Holy Trinity Church, North Shields.)

**HEADACHE AND DISORDERED STOMACH.**—"After suffering for nearly two and a half years from severe headache and Disordered Stomach, and after trying almost everything, and spending much money, without finding any benefit, I was recommended by a friend to try your "FRUIT SALT," and, before I had finished one bottle I found it doing me a great deal of good, and now I am restored to my usual health; and others I know that have tried it have not enjoyed such good health for years.—Yours most truly, ROBERT HUMPHREYS, Post Office, Barrasford."

## THE VALUE OF ENO'S "FRUIT SALT" CANNOT BE TOLD.

Its success in Europe, Asia, Africa, America, Australia, and New Zealand proves it.

**THERE IS NO DOUBT** that where it has been taken in the earliest stages of a Disease it has in innumerable instances prevented what would otherwise have been a serious illness. The effect of ENO'S "FRUIT SALT" on a disordered and feverish condition of the system is simply marvellous. It is, in fact, Nature's own remedy and an unsurpassed one.

**CAUTION.**—Examine each Bottle, and see that the CAPSULE is marked ENO'S "FRUIT SALT." Without it you have been imposed on by a worthless imitation. Prepared only by

J. C. ENO, Ltd., at the "FRUIT SALT" WORKS, LONDON, by J. C. ENO'S Patent.
