INTRODUCTION TO THE REPORT

The 1997 Development Cooperation Report, (DCR) was prepared by the UNDP Country Office in Banjul, The Gambia in collaboration with the Government of The Gambia and the cooperation of The Gambia's development partners

The purpose of the report is to provide the Government of The Gambia and its partners a comprehensive analysis of the external assistance received by The Gambia in 1997. It gives an indication of the various interventions by donors at both the national and sectoral levels in accordance with their comparative advantage and the national priorities of the Government of The Gambia. This scope of data analysis makes the DCR a valuable instrument for assessing trends in aid flows and the impact of interventions over a period of time. It also makes the DCR useful, for aid consultations at the macro, sectoral and programme levels.

The 1997 DCR presents graphical illustrations, including Gross Domestic Product (GDP) by Economic Activity, Major Sources of External Assistance, External Assistance by Sector, Major Sources of Technical Co-operation, and, Technical Co-operation by Sector. In order to facilitate analysis, development assistance is also presented in the form of summary tables which break down data by sector, type, terms of assistance, beneficiary institution and donor. An inventory of ongoing projects is also included in the report.

The 1997 Development Cooperation Report is organized into three substantive parts.

Part One briefly discusses the country's social and economic conditions and recent economic performance.

Part Two analyzes the external assistance received by The Gambia in the calendar year 1997, using statistics disaggregated by several criteria. Aid coordination initiatives in The Gambia during 1997 are also discussed in this segment.

Part Three presents summary tables featuring quantitative information on external assistance provided to The Gambia in 1997. A different set of tables relate to Technical Cooperation. An inventory of external assistance projects is also included at the end of this section.

Total external assistance in 1997 amounted to US\$54.8 million representing a marginal increase of 18.72% over the previous year, 1996. This translates into a per capita external assistance of US\$54.13. The corresponding figures for the previous year was US\$44.55.

The UNDP Country Office wishes to express its appreciation to all the development partners, including the Dakar-based donors and the NGOs for their assistance in providing data for the 1997 DCR. Similarly, the office is indebted to the Government of the Gambia for providing data and for its coordinating role in the production of the 1997 DCR.

Zahra Nuru

UNDP Resident Representative and Resident Co-ordinator
of the United Nations System in The Gambia

BASIC FACTS ON THE GAMBIA

LAND AREA ¹	10,689 sq km
POPULATION ¹	1 038 million
GNP PER CAPITA ² (1996/97)	350 US dollars
LAND USE	
Cultivated ⁹	1,932 sq km
Grazing ⁹	6,316 sq km
Forest and Woodland ⁹	5,053 sq km
Other land ⁹	2,612 sq km
DEMOGRAPHIC STATISTICS	
Population density ¹	96 persons/sq km
Population growth rate ¹	4.2 percent
Population distribution ¹ Urban	37 %
Rural	63 %
HEALTH	
Infant mortality rate ¹	84/1000
Life expectancy at birth ¹	59.3 years
Access to safe water	
Urban ³	97 %
Rural ³	50 %
Overall ³	73 %
Population per doctor ³	15 269
Population per hospital bed ³	916
EDUCATION	
Combined enrolment ratio ³	35.3%
Adult Literacy ³	37%
ECONOMY	
Real growth in GDP (1996/97) ²	1.74%
Annual average growth rate (1990/91-1996/97) ²	1.74%
GDP distribution by main activity (1997) ²	
Agriculture	20 %
Industry	11.2%
Services	68.8 %

KEY DEFINITIONS

Types of Assistance

Official Development Assistance (ODA) - Official Development Assistance is defined as those flows to developing countries and multilateral institutions provided by official agencies, including state and local governments, or by their executive agencies, each transaction of which meets the following tests

- a) ODA is administered with the promotion of the economic development welfare of developing countries as its main objective,
- b) ODA is concessional in character and conveys a grant element of at least 25% (calculated at a rate of discount of 10%)

Free-Standing Technical Co-operation - The provision of resources aimed at the transfer of technical and managerial skills and know-how or of technology for the purpose of building up national capacity to undertake development activities, without reference to the implementation of any specific investment project(s) Free-standing technical co-operation includes pre-investment activities, such as feasibility studies, when the investment itself has not yet been approved or funding not yet secured

Investment-related Technical Co-operation - The provision of resources directly aimed at strengthening the capacity to execute specific investment projects Included under investment-related technical co-operation would be pre-investment type activities directly related to the implementation of an approved investment project By definition, investment-related technical co-operation exists only if a parallel investment project exists

Investment Project Assistance - The provision of financing, in cash or in kind, for specific capital investment projects, i.e. projects that create productive capital which can generate new goods or services, also known as capital assistance Investment project assistance may have a technical co-operation component

Programme/Budgetary Aid or Balance-of-Payments Support - The provision of assistance which is not cast in terms of specific investment or technical co-operation projects but which is instead provided in the context of broader development programme and macro-economic objectives and/or which is provided for the specific purpose of supporting the recipient's balance-of-payments position and making available foreign exchange This category includes non-food commodity input assistance in kind and financial grants and loans to pay for commodity inputs It also includes resources ascribed to public debt forgiveness

Food Aid - The provision of food for human consumption for developmental purposes, including grants and loans for the purchase of food Associated costs such as transport, storage, distribution, etc., are also included in this category, as well as donor supplied, food-related items such as animal food and agricultural inputs related to food growing when these are part of a food aid programme

Emergency and Relief Assistance - The provision of resources aimed at immediately relieving distress and improving the well-being of populations affected by natural or man-made disasters Food aid for humanitarian and emergency purposes is included in this category Emergency and relief assistance is usually not related to national development efforts nor to enhancing national capacity

Personnel and training

Consultant, International - A short-term (less than 12 months) expatriate professional or technical expert retained by an external donor to provide advisory or other services

Consultant, National - A short-term (less than 12 months) recipient country citizen or permanent resident retained at the professional/technical level by a technical co-operation or other externally funded development activity to provide advisory or other services

Expert, International - A long-term (12 months or more) expatriate resident of the recipient country filling a position created and/or funded by an external donor

Expert, National - A citizen or permanent resident of the recipient country who is employed at the professional/technical level by an externally funded development programme or project and paid by that project. A national expert is not a recipient country official paid by his/her own government to act as the recipient country counterpart to an international expert

Long-term international training - A long-term (one academic year or longer) provision of funds for educational purposes leading to a degree, diploma or certificate for a recipient country national outside his/her own country as part of a technical co-operation or other externally funded development programme or activity

Long-term national training - The same as long-term international training except that the training is tenable only within a recipient country institution

Short-term international training - Training outside the recipient country lasting less than one academic year, which may or may not lead to the award of a degree or a diploma

Short-term national training - Training inside the recipient country lasting less than one academic year, which may or may not lead to the award of a degree or a diploma

Volunteer, International - An expatriate individual who is working in the recipient country, on behalf of a technical co-operation programme or other externally funded development activity, and who is a member of a volunteer organization

Volunteer, National - A citizen or permanent resident of a recipient country who has been retained by a technical co-operation programme or other externally funded development activity and who is a member of a volunteer organization

Other definitions

Beneficiary institution - The beneficiary institution is the institution receiving the assistance of the development activity. There may be several such beneficiary institutions for any one project. A recipient government department or ministry may be a beneficiary institution

Donor - The origin of funds for development assistance (multilateral, bilateral and non-governmental organizations)

Executing institution - the institution actually implementing the programme or project. It can be the donor itself, the recipient Government or an intermediary institution executing the project on behalf of the donor

Reporting year - The reporting year corresponds to the year for which information is collected

National sectoral classification - The economic sectoral classification which is officially used in the recipient country

Non-governmental organization - An NGO is a private, voluntary, not-for-profit organization, supported at least in part by voluntary contributions from the public. For DCR purposes, an NGO may act as a donor (if it provides external assistance) or as an executing or beneficiary institution. The latter are usually local NGOs.

CLASSIFICATION BY SECTOR AND SUB-SECTOR

SECTOR

01 Economic Management

- 0101 Macro-economic policy and planning
- 0102 Fiscal Policy and Plann
- 0103 Monetary Policy and planning
- 0104 Employment Policy and planning

02 Development administration

- 0201 Public administration and management
- 0202 Foreign aid coordination and planning (includes round tables consulta , group meetings and country programme review missions)
- 0203 Debt management
- 0204 Technology Policy and planning
- 0205 General statistics
- 0206 General cartography
- 0207 Foreign affairs and international law (excluding trade law)

03 Natural resources

- 0301 Sector policy and plann
- 0302 Land use planning
- 0303 Water resources planning
- 0304 Environmental preservatn and rehabilitation
- 0305 Mineral resources exploration and exploitation
- 0306 Coal, petroleum exploration and exploitation
- 0307 Wildlife and national parks
- 0308 Seabed resources

SECTOR

04 Human resources development

- 0401 Sector policy and planning (incl manpower planning)
- 0402 Primary Schooling
- 0403 Secondary Schooling
- 0404 Tertiary education
- 0405 Technical and managerial education and training
- 0406 Non-formal education (includes literacy)

05 Agriculture, forestry and fisheries

- 0501 Sector policy and planning
- 0502 Research and development
- 0503 Support services (includes credit extension input supply, crop protection and agrometeorology)
- 0504 Food crops
- 0505 Industrial crops
- 0506 Livestock
- 0507 Forestry
- 0508 Fisheries (includes oceanography as it relates to fishing)

06 Area development

- 0601 Integrated rural development
- 0602 Village/community development
- 0603 Settlements
- 0604 Inter-country area development
- 0605 River basin development
- 0606 Regional planning and development

SECTOR**07 Industry**

- 0701 Sector policy and planning
- 0702 Technological research
- 0703 Support services and facilities (includes industrial estates and duty-free zones, credit (only if industry wide, otherwise under specific kinds of industry),
- 0704 Cottage and small-scale industry
- 0705 Medium-scale industry
- 0706 Large-scale industry

08 Energy

- 0801 Sector policy and planning
- 0802 New and renewable sources of energy (includes fuel wood, methane synthetic, solar biomass, wind, wave etc
- 0803 Hydroelectric power generation and transmission
- 0804 Geothermal power generation and transmission
- 0805 Conventional energy source generation and transmission (include coal, petroleum etc)
- 0806 Energy conservation (includes improved stoves)

09 International trade in goods and services etc)

- 0901 Sector policy and planning
- 0902 Global trade policies and procedures (including GATT, GSP etc)
- 0903 International trade in primary goods (food raw materials etc)
- 0904 International trade in secondary goods
- 0905 International trade in services (e g banking insurance etc
- 0906 Export Promotion

SUB-SECTOR**10 Domestic trade in goods and services**

- 1001 Sectoral policy and planning
- 1002 Domestic marketing
- 1003 Domestic trade
- 1004 Tourism
- 1005 Other service industries
- 1006 Patents

11 Transport

- 1101 Sector policy and planning
- 1102 Road transport
- 1103 Rail transport
- 1104 Water transport and shipping
- 1105 Air transport

12 Communications

- 1201 Sector planning and policy
- 1202 Postal services
- 1203 Telecommunications
- 1204 Television, radio and print media
- 1205 Development support communication

13 Social development

- 1301 Social legislation and administration (includes social security, occupational health and safety, legislation on women etc)
- 1302 Urban development (includes sites and services, urban planning etc)
- 1303 Drinking water and sanitation
- 1304 Housing
- 1305 Culture (includes preservation, copyrights, general libraries)
- 1306 Prevention of crime and drug abuse

14 Health

- 1401 Sector policy and planning
- 1402 Primary health care
(includes maternal and child health, nutrition)
- 1403 Immunization and other disease control campaigns
- 1404 Family planning
- 1405 Hospitals and clinics

15 Disaster preparedness

- 1501 Meteorology (as it relates to weather warning systems)
- 1502 Seismic predictions
- 1503 Early warning/food information systems
- 1504 Relief planning and institutional preparedness
- 1505 Physical measures

16 Humanitarian aid and relief

- 1601 Refugees and returnees
- 1602 Emergency relief (food, planning and logistics, medical supplies)

SOURCES AND METHODOLOGY

As in previous years, this Development Co-operation Report (DCR) has been prepared using a revised (April 1998) version of the Development Co-operation Analysis System (DCAS). This system enables

- a) the generation of profiles for individual projects and programmes which are updated on an annual basis,
- b) the continuous updating of information on development co-operation and the retention of information collected for analysis in subsequent years, and,
- c) the generation of ad hoc reports which list projects selected by a wide range of criteria, such as beneficiary institution, donor and executing institution, for use in the analysis of development co-operation

The use of DCAS has greatly facilitated the standardization of the format of the Development Co-operation Report, thus allowing comparison of data between countries and over time. Although the classification system remains the same, DCAS is under continuous review and periodic improvements are made to the system and the data collection methods to facilitate the use of the data and collection of data from respondents. This database is at the disposal of any government institution or donor agency which would like to use it. The system is installed at the UNDP Country Office, the Office of the Director of the Policy Analysis Unit, Office of the President, and, the Public Investment Programme Monitoring Unit, Department of State for Finance and Economic Affairs.

The data collection process has been enhanced by a standard Questionnaire on External Assistance. In March, questionnaires were sent to the NGOs in the country, foreign missions and bilateral donors resident in the country as well as to the Dakar-based bilateral donors. Follow-up telephone calls and personal visits were made to ensure a speedy collection and the accuracy of the data.

One difficulty encountered during the data collection process was the differences in the reporting period. The DCR reporting period is based on the calendar year, while some donors operate on the basis of a different reporting period. This problem was resolved by aggregating quarterly aid flows. A second problem related to differences in currencies. This was resolved by using a weighted average of the United Nations official exchange rates for 1997.

Another difficulty, which arose during the data collection process, was the lack of information on some of the components of expenditure. For example, while donors always keep records of the total disbursements for the reporting year, they hardly keep records of the details of the different categories required by the DCAS, namely "personnel", "training", "others" and "unknown". Under such circumstances, total disbursements were either categorized under "others" or "unknown". Consequently, this rendered the analysis of the distribution of the costs between the project personnel and training components difficult.

Notwithstanding these difficulties, every effort was made to ensure accuracy and comprehensiveness. The overall response of donor agencies, NGOs and national institutions has been very cooperative and the information compiled in the DCR presents a fairly accurate picture of the external assistance provided to the country in 1997.

A number of tables cover a five-year period in order to provide information on trends in aid flows in the medium term. As this is the eighth year the DCR has been prepared under the new format, actual figures are provided for only 1994, 1995, 1996, and 1997. The 1998 figures are projections.

THE GAMBIA - 1997 DEVELOPMENT CO-OPERATION REPORT

PART ONE

COUNTRY BACKGROUND

PART ONE - COUNTRY BACKGROUND

1 GENERAL OBSERVATIONS

1.1 Geography, Climate and Demography

The Gambia is a small sub-tropical country in West Africa, lying between latitudes 13 and 14 degrees North, consisting of a narrow strip of land some 400 kilometres long and 30 kilometers wide on both sides of the Gambia river. The Gambia has an area of 10,689 square kilometres and is bisected by the River Gambia forming the North and South Banks, with the former being less developed than the latter. It is surrounded on three sides by Senegal and bordered on the West by the Atlantic Ocean. The population is estimated at 1.038m (1993), with a density of 96 persons per square kilometer, making it one of the most densely populated countries in Africa. At 4.2% per annum, population growth is relatively high and almost 40% of the population is concentrated in the urban areas around Banjul, the island capital. About 60% of the population is less than 25 years old (about half of this number under age 10 in 1993). The implication of this for education, health, and other social sector public expenditures is daunting. More importantly is the implication for growth in the labour force for which the prospects of employment opportunities outside training are bleak at the moment. The relatively high population growth has been recognized as one of the constraints on development.

The Gambia's small area, narrow physical configuration and its geographical location in the drought-threatened Sahelian scrubland have endowed her with an impoverished natural resource base. This has adverse economic and social repercussions. The prevailing climatic pattern favours only a short agrarian production regime (on average three months) which is the main source of employment and food supply for 80% of the population who reside in the rural areas.

The country has a Sahelian climate, typified by a long dry season (December to June), and a wet season (July to November). Rainfall ranges from 850mm to 1200mm. Average temperatures range from 18 to 30 degrees Celsius during the dry season (December to June) and 23 to 33 degrees Celsius during the wet season (July to November). The relative humidity is about 68% along the coast and 41% inland during the dry season and generally about 77% throughout the country during the wet season. Low rainfall and its poor distribution in the past two decades resulted in drought conditions which have affected the vegetation cover and food production potential.

The Gambia's social diversity is reflected in the different ethnic groups. The main ethnic groups are the Mandinkas (39.5%), Fula (18.8%), Wolof (14.6%), Jola and Karoninka (10.6%), Sarahule (8.9%), Serere (2.8%), Creole and Aku Marabout (1.8%), Manjago (0.8%), Bambara (0.7%), other Gambians (1.5%), ethnicity not stated (0.3%). The majority are Muslims (95%). A small minority are Creoles (1%) most of whom are Christians. Despite this ethnic pluralism there is a measure of homogeneity in cultural practices.

1.2 Political and Administrative Structure

The Gambia attained independence from Britain in February 1965 and acceded to Republican status in April 1971, with a political framework based on multi-party democracy and adherence to the rule of law. Since Independence elections were held every five years.

However on 22 July 1994, the Armed Forces Provisional Ruling Council (AFPRC) assumed the reins of government. The Gambia was ruled by the AFPRC with the assistance of Secretaries of State most of whom were civilians. The four-member council was made up of a Chairman, who was also the Head of State, a Vice Chairman, who was also the Secretary of State for Defence, and two other military officers with responsibility for the Departments of State for Interior and Local Government. A two-year transitional programme was drawn up to return the country to democratic rule.

The transition process for returning to democratic constitutional rule entered its final phase in August 1996, with the peaceful conduct of two polling activities. A referendum on the draft constitution was held on 8th August 1996. Presidential elections were subsequently held on 26 September 1996. Four parties took part in the elections. They included the Alliance for Patriotic Re-orientation and Construction (APRC), the United Democratic Party (UDP), the National Reconciliation Party (NRP) and the People's Democratic Organization for Independence and Socialism (PDOIS). The APRC emerged victorious with 56% of the votes. Immediately after the Presidential elections in September 1996, the Armed Forces Provisional Ruling Council was dissolved. Its military members have all retired from the army, and their leader is the newly-elected President of The Gambia. Parliamentary elections were held in January 1997. Thereafter, a new civilian cabinet was appointed. The National Assembly of the Second Republic was formally inaugurated on 16 January 1997, ushering The Gambia once again into constitutional democratic rule.

1.3 Bilateral Co-operation

Over the years, The Gambia has maintained friendly relations with several foreign nations, and donor institutions. Principal among these are United Kingdom, United States of America, The Netherlands, Italy, Switzerland, Belgium, Commonwealth countries, OAU States, Japan, Republic of China, the United German Republic, Islamic League of Nations, UN agencies, Bretton Woods institutions and more recently Libya and Taiwan. However, China has severed diplomatic relations with The Gambia following the latter's establishment of diplomatic relations with Taiwan.

2 ECONOMIC POLICY AND TRENDS

2.1 Analysis of General Country Situation

The Gambia belongs to the group of Least Developed Countries and remains one of the poorest African countries. Real GDP per capita according to the Central Statistics Department is about \$456 (1998). Living standards are low and the level of human development achieved is low. The Gambia's 1998 Human Development Index (HDI) ranking is 165 out of a total of 175 countries studied. A large part of the population does not benefit from adequate health care, sanitation, nutrition and education.

For example, only 50% of the rural population has access to clean water, compared with 97% of the urban population. Primary school enrolment is also much lower in the rural areas than in the urban areas. While women play a major role in The Gambian economy, their access to land, credit or such services as health, education and training is still very limited.

The relatively high rate of population growth (4.2% per annum) is one of the major constraints

on development With a population estimated at 1 038 million, The Gambia is one of the most densely populated countries in Africa (96 persons per square kilometer) About 60% of the population is less than 25 years old, increasing the burden of ensuring adequate health and educational services

Environmental degradation has become a serious problem For example, the beach from Kotu to Kololi has been retreating at a rate of 1-2 metres per year for the past 26 years, while severe erosion has produced sandy cliffs two metres high at Kololi point This environmental degradation has resulted from a combination of factors, such as inappropriate land use practices in agriculture, overgrazing of pasture lands, deforestation arising from overfelling of trees and bush fires, an increase in salinity of the Gambia river and erosion along the coastline

GDP BY ECONOMIC ACTIVITY, 1997
TOP TEN SECTORS IN 1996/97

2.2 Macro-economic Policy and Strategy

During the late seventies and early eighties, The Gambia experienced unprecedented deteriorating conditions as a result of the combined effects of unfavorable external factors and ineffective internal policies. These factors had led to low real growth rates, high unemployment, rapid increases in prices, uneven distribution of income, unsustainable deficits in the current account balances and rising external debts.

In response to this serious crisis in the economy, the Government of The Gambia introduced the Economic Recovery Programme (ERP) in June 1985. With the assistance of the World Bank, the International Monetary Fund (IMF) and other donors, the government designed and implemented economic, monetary and fiscal policies aimed at reversing the declining trend, redressing the imbalances and stabilizing the economy.

This strategy was effective in reversing the declining trend in the economy. The Gambia managed to combine adjustment with growth and can be considered as one of the successful African countries in the implementation of its Structural Adjustment Programme (SAP). From 1985/86 to 1989/90, the GDP growth rate averaged 4% per annum. The exchange rate stabilized and the rate of inflation fell below 10% since 1990/91. Foreign reserves have been continually maintained at about US\$90 million or the equivalent of 5 months of 1996/97 import cover. There has been no build-up of external debt arrears.

Implementation of the ERP was also accompanied by reforms in the structure and management of the government. An Administrative Reform Programme was launched in 1987 and measures were taken to reduce the size of the Civil Service and to consolidate key ministries and public sector agencies. The four line Departments of State responsible for Agriculture, Works, Health and Education were reorganized. The Personnel Management Office (PMO) was established with the objective of achieving an efficient civil service. Schemes of Service were developed for different cadres of staff, recruitment and promotion procedures were rationalized and a new performance appraisal system was introduced. The reform process also included the restructuring of Departments of State, of which the most recent has been the consolidation of the public finance and investment programming functions of the Department of State for Finance and Economic Affairs (DOSFEA). DOSFEA is the leading government agency for economic policy design and implementation.

As a follow-up to the ERP, the Government launched the Programme for Sustained Development (PSD), which received the support of the donor community during the Round Table Conference held in Geneva in December 1990. The PSD outlines the national development strategies for the 1990s. Its objectives are: (1) to consolidate the gains of the adjustment process; (2) to achieve a long-run expansion of the productive capacity of the economy that will support a significant improvement in the living standards of the population; (3) to provide an orderly framework within which private agents can raise the productivity and living standards of the population by using their skills, enterprise and financial resources to the best advantage; (4) to increase efficiency in the public sector through local training of public officials and the wider use of performance contracts; and (5) to provide an enabling environment to foster economic development. This includes the efficient day-to-day administration of Government and the provision of essential social services.

The PSD is consistent with a free-market economic approach and the promotion of a strong private sector is a key element in the government's development strategy. Instead of being directly involved in economic activities, the government intends to concentrate on developing sound and well defined economic policies and on creating a policy environment more conducive to private enterprise development.

Currently, the government intends to pursue a strategy termed "Vision 2020". The overall orientation of Vision 2020 is contained in its mission statement as follows: To transform The Gambia into a financial centre, a tourist paradise, a trading, export-oriented, agricultural and manufacturing nation thriving on free market policies and a vibrant private sector sustained by a well educated, trained, skilled, healthy, self-reliant and enterprising population, and guaranteeing a well balanced eco-system and a decent standard of living for one and all under a system of Government based on the consent of the citizens. Notwithstanding the remarkable macroeconomic record, there are underlying weaknesses which will undermine the long-term sustainability of growth and realisation of objectives of Vision 2020. These weaknesses include the level of the fiscal deficit, the escalating trend of the deficit in the current account, the high level of real interest rates,

the pressure of the debt service payment on the budget, the high level of unpaid bank loan portfolio and the incompetitiveness of the banking sector

The Government's commitment and adherence to sound financial policies, prudent fiscal and conservative monetary management will constitute the main thrust of the approach to the resolution of these problems. This policy stance will be designed to encourage openness and enhance the role of market forces in pursuit of the objectives of Vision 2020. The objectives of Vision 2020 will be pursued within the context of the medium term Policy Framework Paper which was concluded with the IMF in June 1998.

A programme with the Fund will not only help reinforce macroeconomic and budgetary discipline, it will also accelerate normalisation with development partners thus resulting in greater resource flows to mitigate the burden of adjustment.

Of more importance is the management of public resources. This explains the institution of the Public Expenditure Review (PER) mechanism as a permanent feature in Central government. The PER process will set performance targets against budgetary outlays to government sectors. It has thus far been conducted for the Health, Education, and Agricultural sectors. The process will eventually be conducted throughout government. It is also a step towards the institutionalisation of programme budgeting and a decentralised and more autonomous management of sectoral budgets with the advantage of flexibility in resource use and predictability in resource flows and availability.

2.3 Macroeconomic Performance and Prospects

Overall, macroeconomic performance in 1997 did better than projected with regard to growth, while the reserves, inflation and other monetary aggregates remained broadly within target. This performance is indicative of very strong signs of the economy emerging from the crisis environment of the recent past, precipitated by a combination of negative internal and external shocks. This rebound in activity is underpinned by a firm resurgence of private sector confidence, the increasing positive disposition of the international community and the recovery in tourism activities. The real growth rate of Gross Domestic Product in 1996/97 was 1.74%. External trade for the calendar year, 1997 was valued at D1,773 million (CIF), a decline of 35.2% from the D2,737 million registered in 1996. The decline affected both imports and exports. Imports, at D1,616 million plummeted by 36.1% as against D2,527 million in 1996, while exports at only D157 million is 25% below the D209 million of last year's level.

Economic activity in the Gambia is still based on a narrow range of goods and services. The agricultural sector contribution was quite remarkable. It grew by 5.1% in 1997 after contracting by 14% in 1996. However, the share of the sector's total contribution of GDP did not show any significant difference, 21.7% compared to 21.6% in 1996. Within the sector, the performance of the groundnut sub-sector increased while cereal production in 1997 fell relative to 1996, due mainly to a decline in maize production.

The industrial sector comprising manufacturing, utilities, construction and mining showed a marginal increase of 0.6% from D65.7 million in 1996 to D66.1 million in 1997. The sector's share of GDP also declined somewhat from 11.6% to 11.2%. While utilities increased by 1.5%, construction and mining 5%, manufacturing declined by 1.2%.

The services sector also grew by 5% through slower than the more robust 6.9% of 1996. This

performance is accounted for by the full recovery of the tourist industry. For this season, arrivals in December 1998 were estimated at 93,000. Telecommunication services increased by 9.2%, real estate and business services 3.5%, a 2% increase in transport, 2.4% in public administration and a marginal growth of 2% in the re-export trade.

The share of food in the total import bill is 31.7%, followed by machinery and transport equipment 21.4% and other manufactured goods 12.8%. Groundnuts accounted for 50.1% of total exports, fish and fish preparation 17.8%, while fruits and vegetables and cotton were at 9% each.

The geographical distribution of trade indicates that the Gambia's principal trading partners remained the United Kingdom accounting for 16.2% of imports followed by France 9% and USA 7.8%. The largest destination for exports is still the United Kingdom with 24%, then Spain 13% and Japan 6.7%.

The current account balance for 1997 was estimated at a deficit of 5% of GDP including transfers. If capital movements are considered, the overall balance of payments is a deficit of SDR 2.2 million. Gross official reserves have deteriorated only slightly from 5.5 months of import cover in 1996/97 to 5 months of import cover in 1997 equivalent to SDR 65 million.

On the monetary front, the achievement of the broad objective of price and exchange rate stability is indeed commendable. With inflation at 3% in 1997 up from 1.5 in December 1996, is still by any measure a remarkable achievement. The exchange rate depreciated on average by 2%, depreciating mainly against the Dollar (6.5%) and Sterling (10.3%) but appreciated against the Deutsche Mark by 12%. Interest rates remained stable and positive but very high in real terms.

In order to realise these impressive gains, tight monetary conditions were maintained with excess liquidity absorbed through the bi-weekly auction of Treasury and Central Bank Bills. Nevertheless, the net domestic assets of the banking system increased by 23% on account of increased lending to the private sector, with claims on this sector at D396.3 million as at end September 1997. Claims on Government (net) was almost neutral in respect of its impact on money supply as the net Government surplus with the banking system decreased marginally to stand at D39.6 million. This was on account of stronger revenue performance and keeping expenditures broadly within target. The buoyancy in domestic credit in response to high level economic activity and timely settlement of external obligations brought about a reduction in the Net Foreign Assets of the banking system. The net foreign assets position of the Monetary Authorities declined by about D14.0 million or 2% while that of the commercial banks declined sharply, by about D29.0 million.

During the year under review, the market-determined Treasury Bill rate remained unchanged at 16% so too were the bank and discount rates. Accordingly, the maximum (25%) and minimum (19.5%) lending rates of the commercial banks to major economic sectors were also unchanged. Deposit rates were stable at 9% for short-term deposits and 15% with maturities of over 12 months.

There was considerable buoyancy in the domestic foreign exchange market with an increase in funding activity of a stunning 66% over 1996. This is a reflection of increased economic activity and higher earnings from tourism, groundnuts and other export items, which had a stabilizing effect on the exchange rate of the Dalasi against major currencies on the inter-bank market. As in previous years, exchange rate policy continued to be guided by the foreign reserves target requirement, maintaining economic competitiveness and timely payment of external debt obligations. To this end it is noteworthy to mention that foreign reserves have been continually

maintained at comfortable levels, and there has also been no build-up of external debt arrears, as all external debt obligations of Government for 1997 amounting to D182 million have been met. This will contribute to the important objective of maintaining the credibility of the country's enviable record of creditworthiness. The Gambia's financial system continues to function smoothly under a highly deregulated framework within the system of a flexible interest and floating exchange rates regime. The authorities maintained a liberal economic stance tempered with strict prudential regulations and an enhanced regulatory capacity for monitoring of the banking system. This is aimed at creating a healthy and stable financial environment conducive to economic development.

In its efforts to create more competition within the banking system, the Central Bank encourages the establishment of new banks whenever they meet the prudential requirements. During the year 1997, a new bank, the Arab Gambia Islamic Bank (AGIB) began operations in The Gambia on Islamic principles. Additionally, during the period under review, the Banjul branch of the BICI Senegal was taken over by the International Bank for Commerce Limited (IBCL), a major commercial bank with headquarters in Mauritania. The sale of the bank to experienced commercial bankers in the sub-region leaves the viability of the banking system intact.

During the second half of 1997, the reorganisation of the defunct Meridian (BIAO) Bank Limited which was taken over by the Central Bank in 1995, following the collapse of the BIAO group was completed. Accordingly, a new bank named Trust Bank Limited was incorporated to take over the assets and liabilities of the Meridian BIAO Bank Gambia Limited. In effect, the bank is being held in trust by depositors' funds. This will enable the Central Bank to subsequently make arrangements for the preparation of a prospectus to float the shares of the bank in the open market by the beginning of 1998.

The commercial banks as a group recorded significant improvements in their performance compared with 1996. Their total assets increased by 19.6% from September 1997. In tandem with the increase in bank assets, loans and advances of the major economic sectors increased by 21% at the end of September 1997. The banks have also generally complied with their statutory requirements and in some cases, were well in excess of their required ratios set by the Central Bank. By and large, appropriate tight monetary stance has resulted in relatively stable interest rates that are strongly positive in real terms. Thus total deposits at the commercial banks expanded by 10.5% in 1997.

Prior to the promulgation of the constitution, Insurance business in The Gambia was regulated by the Commissioner of Insurance under the Department of State for Finance and Economic Affairs. The powers of registration and supervision were vested in the Commissioner of Insurance and Secretary of State under the Insurance Act of 1974. The Central Bank of the Gambia is now entrusted with the constitutional responsibility of directing and regulating the insurance industry in The Gambia as well. It is envisaged that close and proper supervision will help ensure that insurance companies are financially stable and that the public is protected. In line with its constitutional mandate and with a vision to provide an industry that is vibrant and responsive to the needs of the public at large, the Central Bank has commenced the process of ensuring that there is an insurance regulatory regime in 1998.

The micro finance sector witnessed major strides during the review period. With the operationalisation of the institutional framework that allows the establishment of different categories of non-bank financial institutions with a view to broadening the financial system, there has been a proliferation in the number of Village Savings and Credit Associations (VISACAs).

The remarkable performance of the micro-finance institutions demonstrates that some learning has taken place from the mistakes of subsidised credit. These institutions now charge interest rates and fees that cover the real cost of delivering financial services and are embracing financial self-sufficiency as a primary organisational goal. More and more institutions have crossed the hurdles in terms of outreach and are poised to mobilise resources from the commercial market to expand the provision of financial services.

The Government is fully aware of the fact that the success of the emerging institutions depends heavily on the importance placed on capacity building. The Micro finance fund which was established under the Department of State for Finance and Economic Affairs as part of the strategy for poverty alleviation will constitute a core-fund to finance eligible micro-finance institutions. This will not "crowd out" resources from the private sector, rather funding will be tailored to the needs of eligible micro-finance institutions to facilitate their graduation to the level where they can meet the demand for loans from domestically mobilised resources or can access funds from the banks. In particular, the facility will finance institutional development to enable micro finance institutions scale up operations successfully. The window will also provide access to whole sale credits from on-lending micro-enterprises.

2.4 Human development

According to the 1997 National Human Development Report (NHDR), the Human Development Index for The Gambia is 0.314. The various components of this index include a real GDP per capita index of 0.184 (1993), educational attainment index of 0.340 (1993), and, a life expectancy index of 0.5 (1993). The overall index has been depressed by the income component.

However, the Human Development Index varies from one geographical location to another. The capital, Banjul has the highest human development index (0.514) while Basse which is the farthest division in the country has the lowest (0.205). The statistics confirm that the availability of educational and health facilities is positively correlated with human development. It is evident that there are more educational and medical facilities in Banjul than elsewhere in the country. The statistics imply that for the Banjul index, the income component is very high to pull the overall index to 0.5.

In terms of years of life expectancy too, there are variations between the divisions. For instance, Mansakonko (44.7) and Basse (44.8) had the lowest life expectancy in 1993, whereas Banjul (57.6), Kanifing (54.0) and Brikama (50.2) had the highest life expectancy while Kerewan, Kuntaur and Janjanbureh have life expectancies of 48.3, 46.7 and 45.7 respectively.

The overall per capita income for the entire country is D2,989 (\$299). As expected, Banjul has the highest per capita income (D7,106 or \$711), followed by Kanifing with D5,150 (\$515), Western Division with D2,346 (\$235), North Bank Division with D2,097 (\$210), Central River Division with D2,070 (\$207), Lower River Division with D1,950 (\$195), and Upper River Division D1,817 or \$182. The levels of income, though not necessarily reflective of standards of living, tend to influence health and education and hence human development. The statistics tend to establish an inverse relationship between per capita income and distance from Banjul. This could be attributed to relatively lower levels of education, larger household sizes (characteristics of rural areas) and greater employment in the agricultural sector where incomes are low, as one moves further away from Banjul.

School Life Expectancy (SLE) also varies from one local government area to another. For the entire country as a whole, SLE in 1995 is 5.03. The SLE for both Banjul and Kanifing is 6.23 years, followed by Brikama (5.79), Mansakonko (4.99), Janjanbureh (4.34), Kerewan (3.83), Kuntaur (3.19), and Basse (2.25). These disparities are due presumably to both the relative availability of educational services and attitudes to the modern educational system. This can be partly explained by the over-concentration, for many years, of educational facilities, especially secondary schools in the Banjul and Kanifing area, a colonial legacy, which until recently seriously affected access to educational services. Primary schools in The Gambia are quite widely distributed while junior and secondary schools are largely concentrated in the Banjul, Kanifing and Brikama Local Government Areas.

In the Gambia, women and men assume different roles and therefore have different opportunities in life. Issues of concern, including employment, poverty and economic development are not gender neutral, implying that men and women are affected differently. In terms of life expectancy, females have, on average, a slightly higher life expectancy than males in all local government areas. For the entire country, life expectancy in 1993 was 55. Of all the local government areas, Banjul ranks first (57.6), followed by Kanifing (54), Brikama (50.5), Kerewan (48.3), Kuntaur (46.7), Janjanbureh (45.7), Basse (44.8) and Mansakonko (44.7). These differences in life expectancy also reflect differences in the availability of health and educational facilities.

Regarding education, males have a higher SLE than females in all the local government areas. For example, in Kanifing and Banjul, SLE is 7.0 and 5.6 for males and females respectively. In Brikama, it is 6.5 and 5.0, Mansakonko, 6.1 and 3.7, Kerewan, 4.7 and 3.0, Kuntaur, 4.1 and 2.3, Janjanbureh, 5.3 and 3.4, and, Basse, 2.9 and 1.6.

In terms of economic opportunities, there is a bias against women owing to the low levels of education among the majority of Gambian females. The cultural perception, especially among the rural folk is that a good woman marries and bears children and therefore has no business in education. This has resulted in unequal opportunities in education. For example, there were 13,345 employees in the public sector as at February 1997 but only 21% were females. According to the 1994 Employment and Remuneration Survey in the formal private sector, less than 32% of the formal private sector employees were females. The females are concentrated in the agricultural (51%), community, social and personal services (16%) and hotels and restaurants (15%) sub sectors. This, notwithstanding, 83% of managerial and administrative positions are held by males while 79% of unskilled employees are females.

Various factors inhibit the upward mobility of women on the employment ladder. Demands of child and family care, parental and marital obligations are some of the factors that reduce a woman's flexibility in pursuing further long-term training. As a result, most women lack the relevant qualifications for rising to higher positions.

2.5 The role of the Public Sector

The role of the public sector is to create an enabling environment for both domestic and foreign investment to thrive. It will also provide the regulatory framework to facilitate the integration of the economy into the global economy. Such a regulatory framework will include the revision of the investment code/policy and the trade policy and amendments to the Companies Act, Partnership Act and Contracts Act.

In order to provide public services more efficiently, the government will review its civil service reform efforts with a view to establishing a leaner, better focused and better motivated civil service. Savings derived from possible reductions in the size of the public service could then contribute to improving the remuneration of qualified personnel. In this regard, the government will continue the staff inspection programme, base civil service income policy on the availability of budgetary resources, economy-wide productivity gains, and changes in the cost of living, and develop a new job evaluation and merit-based pay system.

It will strengthen expenditure budgeting and control as well as the capacity for policy design and implementation through (1) the adoption and implementation of the new procurement code, (2) computerizing expenditure control and the Accountant General's Department, (2) conducting annual sectoral public expenditure reviews, (4) allocating adequate resources for the preparation of economic statistics, notably the national accounts and the balance of payments, and (5) continuing training efforts to improve economic management capacity. In the medium term, the government will develop and implement a framework for administrative reform and a strategy for institutional capacity building with technical assistance from the World Bank and other donors. These programmes will be aimed at improving on a sustainable basis the efficiency of the civil service, increasing institutional capacity, and enhancing the probity of public services by combating corruption. In addition, the government in collaboration with UNDP is formulating its programme on governance including local government reform and decentralization.

2.6 Parastatal Reform

The departure in the late 80s and 90s from predominantly owned public enterprises to semi-government organisations called parastatals marks the first signal of Government's commitment to private sector-led growth. This has culminated in a number of reforms.

Government's unwavering commitment to improving the performance of parastatals has resulted in the formulation of a Memorandum of Understanding (MOU) which like the Performance Contract is a binding contractual arrangement and spells out government's obligations vis-a-vis the parastatals and vice versa and reduces government's interference in their economic operations with the proviso that certain performance targets are met. The MOU also obliges the parastatals to be forerunners of economic and financial efficiency. This involves not only meeting targets but also honouring their obligations to government before declaring profits and bonuses.

2.7 Exchange Rate Developments

The exchange rate depreciated on average by 2%. It depreciated mainly against the Dollar (6.5%), and Sterling (10.3%) but appreciated against the Deutsche Mark by 12%. Interest rates remained stable and positive but very high in real terms.

2.8 Monetary Developments

On the monetary front, the achievement of the broad objective of price stability is indeed commendable. With inflation at 3% in 1997 up from 1.5% in December 1996, is still by any measure a remarkable achievement.

The increase in both the net foreign assets and net domestic assets of the banking system brought about an expansion in Broad Money (M2) by 19.1% at the end of December 1997. Compared to the fourth quarter in 1996, however, M2 expanded by 8.1%.

The narrow money component (M1) comprising currency outside banks and demand deposits expanded by 30.3%. Of this increase, currency outside banks increased by 55% and demand deposits increased by 7%. Quasi money (time and savings deposits) increased by 8.7% over the quarter ending December 1997 reflecting a 7% and 12.9% increase in savings and time deposits respectively.

Domestic interest rates were broadly stable during the quarter ending December 1997. The discount rate on both Treasury and Central Bank bills was 16%. The bank rate and the rediscount rate which are pegged at 2 percentage points below and 3 percentage points above the discount rate on Treasury bills remained unchanged at 14% and 19% respectively.

2.9 Sectoral Policies

Agriculture and Natural Resources

The objectives in the agricultural and natural resources sector include increased agricultural output, food security and gainful rural employment. The major projects in the sector performed favourably in general. The IFAD-funded Small Scale Water Development Project, ADB Rice Development Project and Jahally-Pacharr Small-holder Rice Project are all contributing significantly to increased rice production and food security. The World Bank and IFAD-funded Agricultural Services Project is making significant progress. A recently concluded mid-term review noted significant improvements in crop and livestock extension, particularly in the introduction of improved crop and animal husbandry production practices, especially for sheep and poultry over the last few years. It also noted the significant strides made in addressing institutional strengthening, human resource and entrepreneurial development and empowerment of women.

The government and civil society embarked on Tele-food initiatives by FAO geared towards increasing awareness and mobilising resources for accelerated decline in global hunger and malnutrition. Under the National Agricultural Research Institute (NARI), research efforts continue to focus on improving productivity, introducing new technologies and addressing the constraints on farmers. The Institute has also embarked upon diversifying the research areas by broadening its research programmes to include forestry, livestock and fisheries.

The livestock sub-sector continues to perform impressively by contributing positively to uplifting the standard of living of the rural population. Rural poverty alleviation programmes aimed at household food security lay particular emphasis on livestock rearing, in addition to food and cash crop production as an alternative source of income for both rural and urban families. Whilst the traditional extensive livestock productive system continues to receive adequate support, the Department of Livestock Services is also focusing attention on the modern sector, that is, the intensive and semi-intensive production systems.

Production performance of food crops in general during 1996/97 season varied. Cultivation of coarse grains – millet, maize and sorghum and rice continues to gain the attention of the average farmer in production efforts towards food security. Production of coarse grains and irrigated rice has increased over the years but that of swamp rice has been stagnating at a relatively low level. Overall, coarse grain production increased to 85,000 metric tons in 1996/97 reflecting an increase of 6%. Total swamp and upland rice, however, registered a slight decline from 18,900 metric tons in 1995/96 to 18,200 metric tons in 1996/97.

With our current population of about 1.2 million, the total effective demand for cereals is projected at 214,174 metric tons of milled rice equivalent. However, indications from 1997/98 provisional cereal balance sheet show that with the expected level of domestic food supply, even when supplemented by the total commercial imports, food aid and stocks held by farmers, substantial deficit of food grain is expected in 1998. Severe drought conditions, which prevailed in the months of July and August, have had a significant impact on the general crop production performance in 1996/97.

In the drive to transform the sector into a modern one as envisaged in Vision 2020, government has taken a number of bold initiatives to address several constraints inhibiting the sector's efficient performance. These include the procurement of 20 power-tillers which is provided at affordable prices to women groups preferably engaged in rice production and the provision of spare parts for the existing stock of village milling machines through the private dealer's network. It is envisaged that more machinery will be provided on similar terms to increase production capacities and productivity and thus catalyse product development. Further measures to improve both the production and marketing of rice include the reactivation of Kuntaur Rice Mill. Processing has begun in earnest and marketing is gradually picking up. Demand for the mill's broken rice is far in excess of supply, whereas for the long grain and Basmati rice, supply outstrips demand. Efficient pricing and marketing strategies are being adopted with a view to making more and more Gambian rice available to consumers.

Some notable achievements in the realisation of the government's national food security policy included the opening up of more land through the construction of anti-saline and water control structures by the Soil and Water Management Unit of the Department of Agricultural Services and the reclamation of 674 ha - 800 ha in 1996/97. Cotton production continues to benefit from the support of the Government assisted by Caisse Francaise de Developpement (CFD) due to its potential contribution to the diversification of the agricultural production base and as an important cash crop of the country. The second phase of the CDF project which lasted for five years ended on 31 December 1998, but was extended for another two years to 31 December 1999, despite low cotton production due to poor rainfall patterns.

The horticulture sub-sector is one of the most dynamic sub-sectors which is responding positively in our agricultural diversification efforts. In 1997, the production of horticultural crops especially vegetables increased. This increase has been catalysed by increased donor intervention particularly, UNDP, EDF, the American Embassy, the Republic of China, NGOs and the NGO fund sponsored by the Women in Development Project. The export of fruits and vegetables has also expanded albeit at a slow pace. Exports during the review period exceeded D25 million with the major participation coming from private commercial farms. As part of the promotional activities, a national horticultural show was conducted in 1997. In addition to its promotional objectives, the show also provided a forum for producers and marketing agents to exchange ideas and share experience. The horticulture unit of the Department of Agricultural Services continued to focus its efforts on promoting greater awareness and ability in marketing as well as strengthening of women's groups through training programmes and publication of training manuals.

The most important crop in terms of commercialisation is groundnuts but it continues to register a downward trend in production. Production of the crop declined to 45,000 tonnes in 1996/97 reflecting a decrease of 40%. Most of the drop in production is attributable to a significant decline in yield emanating from erratic weather conditions, low quality seed nuts and limited access to fertilisers.

In a bid to revitalize the sub-sector, the European Union-funded groundnut sub-sector study has been recently completed and submitted to Government and is currently being reviewed. The study critically examined the sub-sector and recommended strategies for food-improved production, productivity and marketing. As an outcome of the study, a project is envisaged which will facilitate the revitalization of the groundnut industry.

The 12th CILSS Head of States and Governments Summit and the 20th anniversary of the Club de Sahel were successfully hosted by the Gambia Government in September 1997. The Summit was preceded by the Sahel 21 Forum which brought people from all walks of life to map out the future course of action from the Sahel into the 21st Century. The Permanent Inter-state Committee for Drought Control in the Sahel (CILSS) initiated under its three-year development plan several programmes aimed at providing sustainable development in the areas of food security, natural resources management, information training, population and agro-socio-economic research.

Tourism and Culture

Emerging from the transition, which was fraught with awesome challenges, tourism has made significant strides at overcoming the setbacks and has in the process realised a diversification rate of up to 37.3 percent which is making all year round tourism a reality. Currently, a fair share of the market has now been claimed by the Dutch, Swiss, and German tourists all of whom are recent additions to tourist charters arriving in the Gambia.

These achievements notwithstanding, the focus in future will be on consolidating these gains and improving on the marketing of the product which tantamount to attracting more high-spending tourists. Emphasis will also be put on the implementation of the tourist policy launched in December 1996. This policy is designed to usher Gambian tourism into the 21st Century and its entrenchment as a worthwhile and viable undertaking.

One key feature in its implementation will be to adequately equip and train the staff of the Tourism Department with the requisite know-how to both collect relevant data and analyse them. Regulation of the industry, strict surveillance of operations in the Tourism Development Area along with creating an aura of safety for tourists will be among the priority areas envisioned to be addressed by government.

Much work has been done in the area of restoring monuments and sites in Fort Bullen and Fort James and a cultural map of the Gambia have been drawn to help boost cultural tourism. In this connection, the 1997 Second International Roots Homecoming Festival, reinforced the link with the African Diaspora in its bid to renew the affinity that the separation through slavery had engendered. The 1998 edition of the festival has been equally successful.

The National Council for Arts and Culture's collaboration with Ireland's Agency for Personnel Services Overseas (APSO), the British VSO and UNESCO resulted in agreements reached for assistance in the implementation of several development projects in the future, particularly to review the arts and cultural policy as well as undertaking a nation-wide archaeological survey. Ample opportunities abound in the tourism sector and Government continues to encourage participation of Gambian entrepreneurs in the sector. More has been achieved, but yet more needs to be accomplished to promote ethno-tourism and eco-tourism in the bid to introduce tourism into the rural areas and maximise the returns.

Industry and Energy

Policy reforms initiated inter alia include preparation of a new investment code to provide broad based incentives, restructuring of IBAS to become a more functional institution to cater for the growing needs of small and medium-scale enterprises, and development of a trade policy to enhance competitiveness of Gambian exports. UNCTAD, in collaboration with UNDP, is assisting the government in these endeavours.

A high-level government delegation including the parastatals and the private sector had an investment forum in Singapore. The forum was well attended by investors in South East Asia. The objective of the mission was to attract foreign investors to the Gambia. The Indigenous Business Advisory Services (IBAS) provides training, marketing and financial assistance in the form of short-term soft loans. The institution has just launched a development fund for women and youths, a pilot scheme targeting the most vulnerable groups to poverty. The scheme provides soft loans to communities to operate consumer shops and is currently limited to Banjul and shall be replicated countrywide in the near future to enhance domestic savings mobilisation.

The entrepreneurial training programme is well on course. So far, twenty training programmes have been conducted. One hundred and thirty four loans have been approved with a total disbursement of about D1.5 million. The recovery rate for loans disbursed so far stands at 75%. In a similar endeavour, IBAS is experimenting with a new scheme called "Suppliers Guarantee Scheme". Under the scheme, IBAS guarantees its clients to acquire equipment or machinery provided that half the cost has been paid and the client provided sufficient security for the guarantee, and payment period on the balance guaranteed by IBAS does not exceed six months.

The draft document of the local consultancy component of the Trade Policy formulation has already been forwarded to UNCTAD. It should be noted that the Trade Policy represents the documentation of all measures be they laws, regulations or bills that affect imports, exports and general trading conditions in The Gambia. The documentation of the policy is to fulfill our obligations to the WTO and also to complement the trade policy co-ordination role of the government.

Within the framework of the proposed new Trade Policy, trade liberalisation and diversification efforts will contribute towards inducement of market firms and promotion of trade in the country. In this regard, support continues to be provided to local entrepreneurs, especially women entrepreneurs to participate in trade fairs and to establish contacts in export markets. Apart from trade fairs, the publications of a trade guide and business directory and a FLASH Magazine form an integral part of the government's promotional activities. The Trade Guide and Business Directory provide comprehensive information on business activities while the FLASH magazine seeks to serve as a "match making tool" to create links between potential suppliers and buyers overseas and in The Gambia.

Since the transfer of the sand mining site to Kartong and the opening of mines on 1st January 1997, the Geological Unit continues to enforce the management of the site by making sure that mining companies comply with an acceptable level of safety operations at the site. Following the exhaustion of the present surveyed reserve of sand at the identified site in 1998, it has been recommended to extend mining at Kartong for another year while an alternative site for sand mining is being identified.

Laterite and sand mining continues to be carried out in an uncontrolled fashion. The Geological

Unit in collaboration with the Department of Lands and Surveys have begun both topographic and geological mapping of Buffalo gravel quarry. This exercise is intended to make qualitative and quantitative assessment of gravel deposits in order to come up with a management plan that will address the present uncontrolled mining and its attendant environmental degradation. Identification of the sand mining site in the North Bank Division has started and this exercise is expected to be completed soon.

In order to conform with modern industrial practices, the Minerals Act Cap 64 of the laws of the Gambia is currently under review. The new Act will make provisions for the right to search for mine and work minerals with emphasis on control and disposal of minerals, mining operations and the restoration of mined sites to an environmentally acceptable state.

The Geology Unit is carrying out geological mapping with a view to fulfilling the gap created by the non-submission of the report on the Geological Mapping and Mineral Exploration Project by the People's Republic of China. Mapping and re-evaluation of the Kaolinite clay deposit in Kundam (URD) was initiated in August 1997 and Ghana Geological Survey (GGS) has been requested to help analyse samples collected from the site. Similarly, re-evaluation of Heavy Minerals quartz, and clay deposits is in progress.

Environment

The main policy framework for maintaining the environment in the Gambia is the Gambia Environmental Action Plan (GEAP) which is progressing satisfactorily. The cross-sectoral nature and inter-relationship between the environment and the key sectors is gradually being appreciated by Gambians. The sense of ownership of the whole process of environmental and natural resource management is becoming more and more strengthened. Active community involvement and popular participation is charting the way forward for sustainable management of the environment and scarce natural resources. Whereas GEAP implementation has mainly been through working groups and task forces at the level of the department, local community involvement and participation is enhancing the ownership of the process of environmental management.

Stakeholder involvement is a prerequisite for sustainability. Government is encouraging the general public to participate in both the decision making and implementation process, for it is only through these that our attempts at maintaining a good environment will be sustainable. Local capacity building is a cornerstone in constituency building. Pilot projects were initiated in some communities with serious environmental and natural resource problems to serve as springboards for local capacity building in natural resource management. In Mamur Fana in the Central River Division, a total of 300 hectares of heavily eroded farmlands was put back into productivity. At Kumbija, in the Upper River Division, also prone to heavy soil erosion, a causeway was constructed to serve as a barrier to contain the heavy runoff. In the process, 35 hectares of land were reclaimed. Similar interventions are currently taking place at Jamansarriba in the Baddibus where 500 hectares of land are being reclaimed in phases by the Village Community and the Soil and Water Management Unit (SWMU). In these exercises, the communities were involved in both the decision-making process and the actual rehabilitation of the land.

In the area of Wildlife Management, government is implementing the National Biodiversity Strategy and Action Plan project in collaboration with the United Nations Environment Project (UNEP). The country study forms part of the enabling activities identified under the Biodiversity Convention to which The Gambia is a signatory since 1994. The project agreement was concluded with UNEP in late 1996 and work commenced in 1997. Funding to the tune of US\$243,000 was provided.

by the Global Environment Facility (GEF) as the interim financial mechanism for the Convention on Biological Diversity

Health

The Department of State for Health has been restructured to reflect current health priorities in the country. Technical programmes such as acute respiratory infections, control of diarrhoea diseases, sexually transmitted diseases amongst others have been put in place. In addition, new facilities have been erected while the number of outreach clinics have increased significantly. Special cadres of staff have been trained for the numerous specialist interventions. In terms of access to quality care and coverage, significant progress has been made by the expansion of Primary Health Care, for instance Expanded Programme for Immunisation is 83% nation wide. The importance of these have been highlighted by the new strategy of Integrated Management of Childhood Illness (IMCI) under the guidance of UNICEF and WHO. The provision of health services is a dynamic phenomenon and as such its planning must take into account the changes in the rate of population and disease pattern in the country. The population growth rate has increased beyond expectation from 2.8% in 1973 to 4.1% in 1993 and continues to rise with significant changes in rural and urban distribution. Over 40% of the population now live in the urban areas. The increase in the size of the population no doubt corresponds to an increase in demand for services with serious implications on supply of manpower, material and financial resources. In view of these developments, the thrust of the new Health Policy is to ensure that health programmes are developed in a co-ordinated manner reflecting interventions that are cost-effective and will hopefully go a long way in reducing the incidence of diseases.

In this connection, a team has been constituted and assigned the responsibility to produce the report on the Public Sector Review (PER) of the sector. The PER will entail the analysis of the current sector's situation on the basis of relevant indicators and the identification of priorities that are relevant, affordable, measurable and sustainable. The costing of future interventions will also be undertaken. This will include the reclassification of recurrent and development expenditures, donor funds and the determination of the unit cost of delivery. The PER is expected to enhance institutional strengthening in planning, budgeting and financial management generally.

A team of World Bank staff and consultants was in The Gambia to appraise the Participatory Health, Population and Nutrition project. The project is generally intended for assistance in family health in the context of a more comprehensive framework that will take into account the ongoing and future activities of other donors. This will respond better to the country's priority health needs by focusing on Public Health interventions targeted at the country's most vulnerable population and will enhance access, equity and quality care. The project is to be implemented over five years at a total estimated cost of US\$20 million, of which the World Bank would provide US\$18 million.

The African Development Bank has also recently approved a US\$9.5 million project which will support health services delivery, strengthen laboratory and support services and project manpower. In particular, major activities will focus on the training of critical health and managerial health workers, strengthening divisional health teams, restructuring and development of the Directorate of Planning and Information of the Department of State through the provision of logistical support, technical assistance in health planning and management, human resource development and rehabilitation, construction and equipping the Central Medical Stores, Public Health Laboratory and five health centres and a dispensary, among others.

The Islamic Development Bank had also approved loans amounting to US\$2.5 million and US\$2.1 million respectively for the construction of the same Health Centre, medical equipment for Farafenni hospital and the upgrading and equipping of the Serrekunda Health Centre. In addition, government signed a D30 million contract for the construction of a 96-bed hospital in Bwiam.

The Federal Republic of Germany under the GTZ has agreed to finance a four-year Family Planning Programme to address reproductive health in the North Bank Division.

Within the context of the Social Sector consultations, the Government has funded the requisite documentation. This entails a review of the health, education and population policies, the formulation and costing of the priority programmes to implement these policies and a Technical Co-operation Programme, which was the basis of Government's discussions with donors for assistance in health and related sectors of population and education.

Works, Transport, Communications and Information

For the road sub-sector, the main activity has been the maintenance and rehabilitation of the country's road network which is the dominant internal transport infrastructure.

With regard to maintenance, a large part of the country's paved road network has been maintained in a fairly satisfactory condition. Upgrading to a bitumen standard of the Essau-Farafenni road and construction of a bridge over the Kerewan Bolong is underway and is expected to be completed in early 1999. Tenders for the rehabilitation and construction of the Kombo Coastal roads have been floated, while the reconstruction of the Trans-Gambia Highway and the Serrekunda-Mandina Ba is expected to be tendered in early 1999.

Furthermore, a major attempt at institutional improvement for the management of the country's road network has now been initiated. Studies to look into the feasibility of setting up a Highway Authority and a road fund have just been completed and government is currently receiving the recommendations of the report.

There are a number of projects in the pipeline slated for implementation. These include the reconstruction of Karansami, Darsilami, and Sara Alpha bridges. The European Development Fund has indicated interest in funding the resealing of the Soma-Basse trunk road, the regravelling of the Basse-Fatoto road, the study for upgrading the Mandina-Soma section of the South Bank roads and the technical assistance for the proposed roads and highway authority. The Kuwaiti Fund has agreed to finance the study for upgrading the Farafenni-Laminkoto section of the North Bank road and the reconstruction of the Kerewan-Farafenni section of the Essau-Farafenni road.

The construction of the new passenger terminal building at Banjul International airport is completed and the terminal is now fully operational. The Kuwaiti Fund has also consented to provide US\$10 million for the construction of an extended aircraft parking apron, provision of additional aircraft taxiways, a second stand-by generator and sewerage facilities.

In a bid to strengthen the postal network and enhance wider coverage of its services effectively and efficiently, the Central Post Office has been preoccupied with major rehabilitation works on some of its existing buildings and at the same time construction of new ones at strategic but under-served locations. The post offices in Banjul, Serrekunda and Farafenni have been refurbished into modern facilities whilst new structures have been constructed at Bakau, Kerewan and Soma.

In addition to the above the Department of State for Works Communications and Information is fervently working towards the creation of an autonomous postal services

The necessary arrangements for the transformation of the Government Printing and Stationery Office into an autonomous entity have now been finalized. In this regard as of 1 January 1998, this office has become a full-fledged autonomous institution called the National Printing and Stationery Corporation. This strategic move is another testimony of government's policy to direct its activities in areas that can be better managed with a commercial orientation where efficiency, greater productivity and profit will be the guiding principles.

Following the transfer of Radio Gambia to Gamtel in 1994 and the subsequent amalgamation of Radio Gambia and Gambia Television into what is now known as The Gambia, Radio and Television Services (GRTS), it has now become necessary to gradually separate Gamtel and Broadcasting. In this connection, an enabling bill establishing the Gambia Radio and Television Services (GRTS) has been drafted and promulgated by the National Assembly.

In conformity with constitutional provision, a bill to establish a National Media Commission (NMC) will be drafted and submitted for consideration and promulgation by the National Assembly. The National Media Commission will be mandated to regulate the content of information of the broadcasters (radio and television) journalist and other print media practitioners. The objectives of the NMC are two-fold to promote the freedom and independence of the print and broadcast media, and ensure a responsible press and other information media.

Education

The Department of State for Education's major activities in 1997 centred on the formulation of the Public Expenditure Review (PER), Revised Education Policy 1988-2005, the Master Plan and the Investment Programme 1998-2005. The education sector continues to achieve positive results in the efforts towards increasing access to education at all levels. The set targets in the education policy 1988-2003 of achieving 15 percent primary school enrolment rate and a transition rate from primary to junior secondary school of 60 percent by the year 2003 have been fully achieved. The primary school gross enrolment ratio is currently 70 percent, and the transition rates are 72 percent and 52 percent from primary to junior secondary and junior secondary to senior secondary respectively.

The revised education policy will help to put in place dynamic education policies in accordance with our national goals and needs. The revision is therefore, in response to the changing needs of the time by injecting fresh ideas, a broader vision of how the basic learning needs of all can be met. An enrolment rate of 68 percent has been achieved which far exceeds the 60 percent target for the year 2003. Therefore, the enrolment and transition targets to the year 2003 have been revised upwards from 90 percent to 95 percent respectively. The targets have been achieved owing to government's commitment to expanding educational facilities and the assistance of the development partners. In the 1996/97 academic year seventeen government and two mission primary schools have been opened alongside significant expansions in junior and senior secondary schools. However after the completion of the five junior secondary schools at Kafuta, Kalagi, Kwinella, Brikamaba and Nyakoi, in 1995/96 construction has been completed in 1998 of four junior secondary schools in Tujereng, Njabakunda, Albreda and Fatoto.

Furthermore, within the objective of increasing the gross enrolment ratio at senior secondary level,

particularly of girls to 33 percent by the year 2005, government plans to construct two senior secondary schools each in Upper River Division, Central River division, Lower River Division, North Bank Division and Western Division

Although the gross enrolment ratio of girls has increased from 58 percent to 61 percent at primary level and 21 percent to 25 percent at junior secondary level, between 1995/96 and 1996/97, it is still as low as 11% at the senior secondary level. In the light of this, particular emphasis continues to be placed on providing quality education for girls. Therefore, girls' education stands as a priority programme of its own in the Master Plan. The objective is to increase enrolment of girls and retention at all levels. The low school enrolment for girls is being addressed through the setting up of a scholarship scheme as a component of the girls education programme, which will bring about some change in the disparities between girls and boys and hence ensure gender equity in access to education and reduce cost of girls education at least by 50 percent.

The Master Plan and the Investment programme, 1998-2005 constitute programmes that will provide training opportunities for children, youths and adults, including those with learning difficulties in society. It will guide the development actions for the next seven years in line with universal standards and requirements.

Another important preoccupation of both the policy and Master Plan is the improvement of teacher qualification as they are recognised as most critical in the struggle to achieve the goal of EDUCATION FOR ALL. It is worth noting that 42 percent of the teachers at the lower cycle are untrained.

As we approach the 21st Century, education continues to be the nerve centre of development and therefore taking on increasing importance both to enhance greater creativity and vitality. Within the context of the next Education Sector Development Programme, the PER will be used as a tool to assist in prioritising expenditure with a view to raising quality while conserving the very limited resources. The Department of State for Education with a strategic planning process has reviewed the educational expenditures over the years to develop educational programmes for the rest of the period, 1998-2005, and has set in motion an Educational Agenda that focuses not only on quantity but quality and equity.

3 PLANNING AND AID CO-ORDINATION

The Programme for Sustained Development and the Policy Framework Paper constitute the long and medium term strategies of the Government in the 1990s. The strategies are implemented through a three-year (rolling) Public Investment Programme (PIP) supported by Public Expenditure Programme (PEP). The PIP/PEP mechanism is geared towards making programme priorities more explicit, ensuring that projects selected for inclusion in the programme meet prescribed minimum requirements and adequate funds flow to support endeavours aimed at meeting the priority needs of the country. A PIP/PEP mechanism also provides a framework for further strengthening the planning and implementation capacity of the key Departments of State.

In terms of long-term planning, the Government launched Vision 2020 in June 1996 in preparation for the challenges of the next millennium. The objectives of the vision will be pursued within the context of a medium-term Policy Framework Paper (PFP) covering the period 1998-2000. This PFP was, for the first time, prepared by Gambians in the spirit of encouraging "home-grown"

policies and ownership of development programmes. This has formed the basis of dialogue with the IMF and the World Bank and other leading multilateral institutions within the context of the Article IV Consultations. These consultations will pave the way for the Gambia's reintegration into the international economy and will encourage the flow of external aid and private capital inflows.

The co-ordination of external assistance is under the responsibility of the Secretary General, Office of the President, which now handles technical co-operation programmes from bilateral sources. Other Government agencies are also involved in aid co-ordination. These include the Department of State for Finance and Economic Affairs (DOSFEA), which is mainly responsible for the assistance provided by multilateral financial institutions and by the European Commission. In addition, the Department of State for External Affairs handles some bilateral aid. An NGO Affairs Agency has been set up under the Personnel Management Office to register and co-ordinate the interventions of NGOs. However, the Gambia has not yet developed an aid policy.

The Gambia continues to make use of the Round Table mechanism for resource mobilization. A Round Table Conference on Macro-economic Issues and Social Sectors was held in Geneva in July 1998. The main objectives of the Conference were to resume the tradition of policy dialogue with the development partners and to seek their endorsement of The Gambia's macro-economic policies and strategies. The main objectives of the Social Sector Consultations were to present to development partners The Gambia Government's Plans of Action to operationalise the education, health and population policies and programmes and to seek their endorsement thereof with a view to soliciting their assistance.

The development partners expressed the need for effective co-ordination of efforts to support The Gambia's development agenda. In this regard, the Policy Framework Paper prepared in consultation with the IMF and the World Bank will form the basis for various interventions of the development partners. The need to enhance co-ordination in the context of the government budget process by an annual process of consultation between the government and key development partners during the time of budget formulation was also emphasized. The government presented its external financing requirements for the period 1998-2000, amounting to SDR 158 million, of which SDR 51 million is needed in 1998. The total cash pledges received immediately for the Social Sectors amounted to \$53.1 million out of the funding gap of \$131 million.

THE GAMBIA - 1997 DEVELOPMENT CO-OPERATION REPORT

PART TWO

DEVELOPMENT ASSISTANCE TRENDS

1 TRENDS IN AID FLOWS

1.1 General characteristics of aid flows

This section gives an insight into trends in the different component of external assistance, namely Technical Co-operation, Investment Project Assistance, Programme/Project/ Budgetary/Balance of Payment Support Food Aid and Emergency and Relief Assistance. Part III of the report gives a detailed account of the various types of external assistance.

In 1997 total external assistance amounted to US\$54.8 million representing a substantial increase of 18.72%. This is equivalent to 54.13 US Dollars per capita compared to 46.16 US Dollars per capita the previous year. This substantial increase is partly attributed to the tremendous increase in Free-Standing Technical Cooperation (32.06%) and investment-related technical co-operation (130.67%) which increased from US\$ 37.31 million to US\$49.27 million and US\$0.75 million to US\$1.73 million from 1996 to 1997 respectively. It is worth mentioning that the total external assistance of US\$54.8 million excludes the interventions of Austria which submission arrived too late for inclusion in the 1997 DCR.

As in previous years, grants accounted for the bulk of external assistance, representing 88% while loans constituted 12%. This bears a striking resemblance to the previous year's figures of 88.4% and 11.6% respectively. Like 1996, except for Freestanding Technical Co-operation and Investment Project Assistance, all other types of external assistance were entirely grants. Grants accounted for 87.9% of Free-Standing Technical Cooperation compared with 12.1% for loans. The corresponding figures for the previous year were 98.7% and 1.3% respectively. On the other hand, grants accounted for 65.4% of investment project assistance while loans represented 34.6%. This contrasts sharply with the previous year's figures of 30.7% and 69.3% respectively. For further details, please refer to Table 1 and Table B2, both of which give a summary of external assistance by type and terms.

All the components of external assistance registered increases over the 1996/97 period except, investment project assistance, emergency and relief assistance, and programme/budgetary aid/balance of payment which declined by 71%, 14.7% and 100% respectively. Free-standing Technical Co-operation, investment-related technical co-operation and food aid increased by 32.06%, 130.67% and 50% respectively.

The scenario for the previous year was different with Free-standing Technical Co-operation increasing by 33.5% while Investment Related Technical Co-operation, Investment Project Assistance and Food Aid declining by 55.4%, 41.3% and 20% respectively.

In terms of type of assistance, Free-standing Technical Co-operation constituted 89.9%, Investment Related Technical Co-operation 3.16%, Investment project assistance 3.45%, Food aid 3.06% and Emergency and Relief assistance 0.44% of total external assistance. Thus the shares of Free-standing Technical Co-operation, Investment Related technical Co-operation and Food Aid have increased from 80.8% to 89.9%, 1.6% to 3.2% and 2.4% to 3.1% respectively over the period 1996-97, while the shares of Investment Project assistance, Emergency and Relief assistance and Programme Budgetary aid/ Balance of Payment support have declined from 14.1% to 3.4%, 0.6% to 0.4% and 0.4% to 0% respectively over the same period. Please refer to Table 1 for more details.

Table 1 SUMMARY OF EXTERNAL ASSISTANCE BY TYPE AND TERMS

TYPE OF ASSISTANCE	1995		1996		1997		OF WHICH % (1997)	
	US\$'M	%	US\$'M	%	US\$'M	%	Grants	Loans

Figure 1 DISTRIBUTION OF EXTERNAL ASSISTANCE IN 1997 BY MULTILATERALS (UN AND NON UN SYSTEM), BILATERALS AND NGOs

As in previous years, both multilateral and bilateral donors as well as Non Governmental Organisations provided assistance in 1997. In 1997, an amount of 14.14 million Dollars was contributed by the multi-lateral donors compared to 19.44 million US Dollars in 1996 representing a decline of 27.3%. The most prominent multilateral donors included the International Development Association (IDA) (3.5 million US Dollars), European Development Fund (EDF) (1.9 million US Dollars), United Nations International Children's Fund (UNICEF) (1.5 million US Dollars), African Development Bank (AFDF) (1.5 million US Dollars), United Nations Development Programme (UNDP) (1.5 million US Dollars), International Fund for Agricultural Development (IFAD) (0.9 million US Dollars), Islamic Development Bank (ISDB) (0.8 million US Dollars), United Nations Educational Scientific and Cultural Organization (UNESCO) (0.8 million US Dollars), World Health Organisation (WHO) (0.8 million US Dollars) and United Nations Fund for Population Activities (UNFPA) (0.7 million US Dollars). However, it is worth mentioning that information on UNDP's additional 1.3 million US Dollars came in too late for inclusion in this report. Please refer to Figure 1 for the distribution of external assistance by multilaterals (UN and Non-UN systems), bilaterals and NGOs. Regarding the distribution of UN system multi-lateral assistance, please refer to Figure 2.

**Figure 2 DISTRIBUTION OF MULTILATERAL ASSISTANCE IN 1997
(TOP SIX UN SYSTEM MULTILATERALS)**

Total UN System multilateral assistance declined from 12.2 million US Dollars in 1996 to 9.94 million US Dollars in 1997 representing a decline of 18.5%. The most outstanding UN System multilateral donors include IDA (3.47 million US Dollars), UNICEF (1.5 million US Dollars), UNDP (1.5 million US Dollars), International Fund for Agricultural Development (IFAD) (0.89 million US Dollars), UNESCO (0.8 million US Dollars) and WHO (0.8 million US Dollars). It is worth mentioning that information on UNDP's additional disbursement of 1.3 million US Dollars came in too late for inclusion in this report.

**Figure 3 DISTRIBUTION OF BILATERAL ASSISTANCE,
TOP SIX BILATERALS**

In 1997, an amount of 19.27 million Dollars was disbursed by bilateral donors compared to 17.48 million US Dollars in 1996 representing an increase of 10.2%. The most outstanding bilateral donors included the United Kingdom (7.24 million US Dollars), Germany, (3.72 million US Dollars), United States of America (3.31 million US Dollars), Nigeria (0.9 million US Dollars), the Netherlands (0.66 million US Dollars) and France (0.59 million US Dollars). Please refer to Figure 3 above for the distribution of bilateral assistance.

Non Governmental Organisations continue to be active in the Gambia. In 1997, they disbursed an amount of \$21.42 million US Dollars compared to 9.27 million US Dollars in 1996. This represents a dramatic increase of 131.1%. The principal NGOs active in The Gambia in 1997 included Christian Children's Fund (13.2 million US Dollars), Action Aid (3.2 million US Dollars), Catholic Relief Services (CRS) (0.55 million US Dollars), Future in our Hands (0.49 million US Dollars), Ireland Red Cross (0.38 million US Dollars), Concern Universal (0.344 million US Dollars), and Forut (0.35 million US Dollars). For more details on the distribution of NGO assistance, please refer to Figure 4.

**Figure 4 DISTRIBUTION OF NGO ASSISTANCE IN 1997
(TOP SIX UN SYSTEM MULTILATERALS)**

1.2 Sectoral Allocation of Resources

In 1997, the sector that registered the greatest increase is Energy (514.7%) followed by Area Development (116%), Agriculture, Forestry and Fisheries (70.7%), Health (63%), Natural Resources (40.7%) and Economic Management (5.9%). It is noteworthy that no assistance was provided to the Industrial and Domestic Trade in Goods and Services sectors in 1997. The sectors which registered declines included transport (99.3%), social development (72.9%), human resources development (55.8%), communications (46.9%), development administration (35.7%) and humanitarian aid and relief (31.3%).

In terms of sectoral allocation of resources, the bulk of the resources were deployed in Area Development (20.6 million US Dollars) compared to 9.53 million US Dollars, representing an increase of 116%. Of this 20.6 million US Dollars, technical co-operation resources constituted 99.16%, while investment project assistance accounted for 0.84%. The bulk of the resources were deployed in the Village and Community Development sub-sector (98.87%) while a meagre proportion of 1.13% was deployed in the Integrated Rural Development sub-sector. In 1997 the sector accounted for 37.63% of total external assistance compared to 20.6% the previous year.

The Health Sector continues to attract a large amount of resources. In 1997 it registered an amount of 14.42 million US Dollars compared to 8.846 million US Dollars in 1996 representing an increase of 63.01%. Its share of total external assistance stood at 26.31% compared with 19.16% in 1996. Technical co-operation resources constituted 89.93% while investment project assistance and Food Aid constituted 0.67% and 9.4% respectively. The major sub-sectors that benefited from resources deployed in the health sector included hospitals and clinics (7.75 million US Dollars), sector policy and planning (3.98 million US Dollars), primary health care (1.82 million US Dollars), and family planning (0.76 million US Dollars).

The Agricultural Forestry and Fisheries sector emerged as the third largest beneficiary of external assistance. Resources deployed in this sector have increased by 70.7% from 6 million US Dollars in 1996 to 10.3 million US Dollars in 1997. Its share has increased from 13% in 1996 to about 18.8% of total external assistance in 1997. Of all the types of assistance, technical co-operation resources constituted the bulk of the resources in this sector, accounting for 95.58%, while Food Aid and investment project Assistance accounted for 3.14% and 1.28% respectively. In terms of sub-sectoral allocation of resources, support services registered 3.9 million US Dollars, forestry (1.94 million US Dollars), food crops (1.77 million US Dollars), livestock (1.19 million US Dollars) and research and development (1.07 million US Dollars).

In 1997 human resource development received 5.14 million US Dollars compared to 11.63 million US Dollars in 1996. This represents a decline of 55.8%. The share of this sector in total development assistance plummeted from 25.19% in 1996 to 9.38% in 1997. Technical co-operation resources accounted for 73.64% while Investment Project Assistance and Emergency and Relief Assistance accounted for 26.24% and 0.12% respectively. The subsectors that benefited most from interventions in this sector included primary schooling (1.76 million US Dollars), technical and managerial education and training (1.04 million US Dollars), secondary schooling (1.03 million US Dollars), non formal education (0.78 million US Dollars), and tertiary education (0.51 million US Dollars).

Development administration continues to command priority in the development agenda of the development partners. An amount of 1.37 million US Dollars was deployed in this sector in 1997 compared with 2.13 million US Dollars in 1996 representing a decline of 35.68%. Its share of total development assistance declined marginally from 3.89% in 1996 to 2.97% in 1997. It is interesting to note that all the resources deployed in this sector constituted technical co-operation resources. Interventions in this sector concentrated on public administration and planning (0.806 million US Dollars), foreign aid co-ordination and Planning (0.432 million US Dollars) and debt management (0.062 million US Dollars).

In the area of Social Development, an amount of 0.799 million US Dollars were deployed in 1997 as opposed to 2.945 million US Dollars in 1996. This is equivalent to a decline of 72.9%. In terms of shares, this 1997 intervention which was 1.46% of total development assistance does not compare favourably with the 1996 share of 6.35%. Technical co-operation resources accounted for 87.11% of total development assistance while investment project assistance accounted for 12.89%. Interventions in this sector targeted mainly drinking water and sanitation (0.678 million US Dollars) and culture (0.84 million US Dollars).

The remaining sectors namely Humanitarian Aid and Relief (0.736 million US Dollars), Economic Management (0.542 million US Dollars), Natural Resources (0.387 million US Dollars), Energy (0.209 million US Dollars), Communications (0.164 million US Dollars), International

Trade in Goods and Services (0 096 million US Dollars) and Transport (0 021 million US Dollars), received negligible amounts of 1 34%, 0 99% 0 71%, 0 38%, 0 3%, 0 18% and 0 038%, respectively Please refer to Figure 5 for the distribution of external assistance by sector

**Figure 5 EXTERNAL ASSISTANCE BY SECTOR, 1997,
(MAJOR BENEFICIARIES, TOP TEN SECTORS)**

1 3 Technical co-operation

In 1997, technical co-operation resources amounted to 51 million US Dollars compared with 38 06 million US Dollars in 1996 accounting for a dramatic increase of 34%. Detailed analysis of technical co-operation disbursements for the past three years can be obtained from Table 1. As in previous years, Free-standing technical co-operation resources constituted the bulk of resources accounting for 96 61%, while Investment Related Technical Co-operation accounted for 3 39% of total technical co-operation resources. Free-Standing Technical Cooperation increased from 37 31 million US Dollars in 1996 to 49 27 million US Dollars in 1997 representing an increase of 32 06%, while Investment Related Technical Co-operation registered an increase of 130 67%, from UD\$0 75 million in 1996 to US\$1 73 million in 1997. As in previous years, grants constituted the bulk of technical co-operation resources accounting for 88 3%, while loans constituted 11 7%. The corresponding figures for 1996 were 98 6% and 1 4% respectively. For the period under review, both multilateral and bilateral donors contributed technical co-operation resources. The former contributed 13 11 million US Dollars while the latter contributed 17 29 million US Dollars. The NGO community contributed 20 6 million US Dollars. In terms of percentages, the contributions were 25 71%, 33 9% and 40 39% respectively. The corresponding figures for the previous year were 37 58%, 41 41% and 21% respectively.

In 1997, the most prominent multilateral donors included the International Development Association (IDA) (3 36 million US Dollars), European Development Fund (EDF) (1 75 million US Dollars), United Nations International Children's Fund (UNICEF) (1 51 million US Dollars), United Nations Development Programme (UNDP) (1 46 million US Dollars), African Development Fund

(ADF) (0 95 million US Dollars) International Fund for Agricultural Development (IFAD) (0 89 million US Dollars) and Islamic Development Bank (IDB) (0 81 million US Dollars) Please refer to Figure 6 for the distribution of technical co-operation resources by multilaterals, bi-laterals and NGOs

Figure 6 DISTRIBUTION OF TECHNICAL COOPERATION RESOURCES, 1997

For the period under review the major bilateral donors included the Medical Research Council (6 84 million US Dollars) German Agency for Technical Co-operation (2 48 million US Dollars), Kredistanstalt Fuer Wiederaufbau (1 13 million US Dollars) Peace Corps Volunteers (1 million US Dollars) United States Agency for International Development (USAID) (0 897 million US Dollars) and Nigerian Government (0 7 million US Dollars)

The major NGOs for the period under review included Christian Children's Fund (CCF) (13 2 million US Dollars), Action Aid The Gambia (3 24 million US Dollars) SOS kinderdof International (1 03 million US Dollars, Catholic Relief Services (CRS) (0 55 million US Dollars), Iceland Red Cross (0 38 million US Dollars) Concern Universal (0 344 million US Dollars) and Forut (0 339 million US Dollars) (Please refer to Table 2, Part III for further details)

Like the previous year all the sectors benefited from technical co-operation resources in 1997 except Domestic Trade in Goods and Services and Transport Indeed the former has not benefited from technical co-operation resources since 1995 The sectors which registered increases included Economic Management (5 7%) Natural Resources (40 73%) Agriculture, Forestry and Fisheries (63 2%) Area Development (116 16%) Energy (514 75%), International Trade in Goods and Services (4700%) and Health 75 82%) The sectors which registered declines included Development Administration (35 74%) Human Resource Development (57 53%) Communication (28 91%) Social Development (69 97%) and Humanitarian Aid and Relief (36 28%) Please refer to Table C5 of Part III for details of the sectoral allocation of resources

Figure 7 MAJOR BENEFICIARIES OF TECHNICAL COOPERATION RESOURCES, 1997 TOP TEN SECTORS

Like the previous year, Area Development emerged as the greatest beneficiary of technical co-operation resources. It registered an amount of 20 45 million US Dollars in 1997 compared with 9 46 million US Dollars in 1996 representing an increase of 116 17%.

The sub-sectors which benefited from technical co-operation resources deployed in this sector included Village and Community Development (20 35 million US Dollars), and Integrated Rural Development (0 097 million US Dollars). Its share in technical co-operation resources increased substantially from 24 9% in 1996 to 40 1% in 1997.

The Health sector continues to attract a large amount of technical co-operation resources. In 1997, it received an amount of 12 97 million US Dollars compared with 7 38 million US Dollars in 1996. This is equivalent to an increase of 75 82%. Resources in this sector were deployed mainly in sector policy and planning (2 53 million US Dollars), primary health care (1 82 million US Dollars), hospitals and clinics (7 75 million US Dollars) and family planning (0 7 million US Dollars). In terms of shares, this sector's contribution increased from 19 4% in 1996 to 25 4% in 1997.

In support of Agriculture, Forestry and Fisheries, an amount of 9 84 million US Dollars was disbursed in 1997 as opposed to an amount of 6 03 million US Dollars representing a dramatic increase of 63 2%. Technical co-operation resources were targeted mainly at Support Services (3 9 million US Dollars), Food crops (1 45 million US Dollars), Livestock (1 19 million US Dollars), Forestry (1 94 million US Dollars) and Research and Development (1 07 million US Dollars). The share of this sector increased from 15 8% in 1996 to 19 3% in 1997.

In 1997, Human Resource Development attracted an amount of 3 79 million US Dollars as against an amount of 8 91 million US Dollars in 1996 representing a substantial decline of 57 53%. The bulk of technical co-operation resources were concentrated mainly in primary schooling (1 28 million US Dollars), technical and managerial education and training (0 8 million US Dollars), Non-formal education (0 78 million US Dollars) and secondary schooling (0 4 million US Dollars). This sector's share declined from 23 4% in 1996 to 7 4% in 1997.

Development Administration continues to be a priority in the development agenda of the donors. In 1997, the sector received an amount of 1.37 million US Dollars in technical co-operation resources, as against an amount of 2.13 million US Dollars in 1996, a decline of 35.74%. The bulk of the resources were deployed in public administration and planning (0.81 million US Dollars). The share of this sector in technical co-operation resources declined from 5.6% in 1996 to 2.7% in 1997.

Social Development registered a phenomenal decline of 69.97% from 2.32 million US Dollars in 1996 to 0.7 million US Dollars in 1997. The sub-sectors targeted included drinking water and sanitation (0.59 million US Dollars) and culture (0.084 million US Dollars). The sector constituted a share of 1.4% in 1997 as against a share of 6.1% in 1996.

Economic Management recorded a modest increase of 5.65% from 0.51 million US Dollars in 1996 to 0.54 million US Dollars in 1997. However, its share of technical co-operation resources declined marginally from 1.3% in 1996 to 1.1% in 1997. The only sub-sector targeted was macroeconomic policy and planning (0.54 million US Dollars).

In terms of Humanitarian Aid and Relief, this sector registered a considerable decline of 36.28% from 0.79 million US Dollars in 1996 to 0.5 million US Dollars in 1997. Technical co-operation resources were concentrated mainly in Emergency Relief (0.36 million US Dollars) and Refugees and Returnees (0.15 million US Dollars).

The Natural Resource sector registered a significant increase of 40.73% from 0.28 million US Dollars in 1996 to 0.39 million US Dollars in 1997. Its share of 0.8% in 1997 bears a striking resemblance to the previous year's share of 0.7% in 1996. All technical co-operation resources were concentrated in environmental preservation and rehabilitation.

The Energy sector attracted an amount of 0.21 million US Dollars in 1997 as against an amount of 0.034 million US Dollars in 1996. This represents a phenomenal increase of 514.71%. In terms of shares, this sector contributed 0.4% to technical co-operation resources in 1997 as against a share of 0.1% in 1996. All the technical co-operation resources were deployed in conventional energy sources, generation and transmission.

In spite of the dramatic increase in technical co-operation resources in 1997, the number of international technical co-operation personnel has declined from 145 (83 experts and 62 volunteers) to 118 (80 experts and 38 volunteers). This is equivalent to a decline of 18.62%. Similarly, the number of national experts and volunteers also registered a dramatic decline of 73.27% from 101 (18 national long-term experts and 83 national volunteers) to 27. Please refer to Table E3 of Part III for further details.

Regarding the distribution by gender, women accounted for 16.25% of international long-term experts and 33.33% of national experts in 1997. This compares favourably with the previous year's figures of 15.7% and 22.2% respectively.

In 1997, women constituted 39.47% and 41.67% of international and national volunteer work as against 46.8% and 20.5% respectively in 1996. In terms of short-term international consultancy assignments, women accounted for 31.15% for the period under review as opposed to 36.4% in 1996.

Technical Co-operation personnel served in several institutions in 1997. These institutions include Department of State for Health, Social Welfare and Women's Affairs (30 international long-term experts, 3 national long-term experts and 31 international short-term consultants), the Department of State for Foreign Affairs (14 international long-term experts), Department of State for Education (11 international long-term experts, 3 national long-term experts, 2 international volunteers, 6 international short-term consultants), Department of State for Justice (6 international long-term experts), Department of State for Youth and Sports (6 international long-term experts), International Trypanotolerance Centre (6 international long-term experts), Kartong (10 national volunteers) and multiple beneficiaries (2 international long-term experts, 18 international volunteers and 1 national short-term consultant). For further details, please refer to Table E1.

International long-term fellowships witnessed a tremendous decline of 57.27% from 110 in 1996 to 47 in 1997. Since the introduction of the University Extension Programme three years ago, both government and donors have found it more cost-effective to sponsor students locally. This is reflected in national long-term training which has increased considerably from 131 in 1996 to 310 in 1997 representing an increase of 136.64%. The proportion of international fellowships awarded to women has increased marginally from 22.7% in 1996 to 25.53% in 1997. Similarly, women's share of national long-term awards increased from 12.9% in 1996 to 39.03% in 1997.

In the context of short-term training, there were 65 person-months of international short-term training in 1997 as opposed to 151 person-months in 1996, representing a decline of 56.95%. It is heartening to note that the number of international short-term awards granted to women increased from 21.19% in 1996 to 35.38% in 1997. However, the number of national short-term awards granted to women plummeted from 90.12% in 1996 to 33.65% in 1997. For further details, please refer to Table E4.

The areas of specialisation of the awardees included Administration, Business and Management, Public Administration, Horticulture, Farm Management, Animal Husbandry, Educational Administration and Planning, Vocational and Skilled Trades Instruction, Public Health and Medicine.

As in previous years, a substantial proportion of the awards was not specified in terms of gender. For example, of the 310 national long-term awards, 93 remain unspecified. Similarly, 22 of the 65 international short-term awards remain unspecified, while 902 of the 1694 national short-term awards remain unspecified. Therefore, the bias against or towards women in terms of these awards must be viewed within this context.

2 INITIATIVES IN AID CO-ORDINATION

Since 1990 the UNDP has assisted The Gambia in placing before its development partners the current broad framework and thrust of its long and medium term policies and programmes for critical review, frank discussions and endorsement, prior to their implementation. The last four Round Table meetings for The Gambia were held in 1990 to discuss the Programme for Sustained Development, in 1992 to review the Economic Management Capacity Building Programme, in 1994 to endorse the Strategy for Poverty Alleviation and in 1998 to seek endorsement of the macroeconomic policies and support for social sector programmes.

At the 1994 Round Table Conference on Poverty Alleviation, the Government of the Gambia indicated its intention to organise a series of follow-up aid co-ordination meetings. Indeed, included

in this indicative list which was formally spelt out in the last paragraph of the final communique of the 1994 Round Table Conference was a proposed Sectoral Consultation on Population, Health and Education scheduled for the first quarter of 1995. Preparations for these consultations were later stalled by the emerging priorities related to an orderly return to democratic constitutional rule in 1997, following a two-and-half-year transition. The objective of these social sector consultations was to critically review the Government's policies and strategies for population, health and education, discuss the interventions proposed for addressing the key identified challenges and mobilise co-ordinated support for reducing the resource constraints faced by The Gambia.

In addition, the World Bank and International Monetary Fund (IMF) have been collaborating with government in the preparation of the Policy framework Paper (PFP) which formed part of the foundation for the documentation for the Fifth Round Table Conference. The IMF has also extended an Enhanced Structural Adjustment Facility (ESAF), to the Gambia to enable it resume its macro-economic adjustment process.

Thus the Fifth Round Table Conference for The Gambia which was held in Geneva from 15-16 July 1998 was devoted to a discussion of the macro-economic issues and social sectors. This Round Table Conference is the result of a collaborative effort of the UN Agencies. While UNDP assumed its traditional co-ordination role, the overall process involved the participation in a Steering Committee of several UN Agencies and the other resident bilateral and multilateral development partners. In addition, WHO and UNFPA have contributed to financing consultancies related to the preparation of technical assistance in the development of the education sector documents.

During this Round Table, the development partners endorsed the macro-economic policies and strategies of the government and pledged financial assistance for interventions in the Social Sectors. In terms of pledges, an amount of USD52.4 million was made at the Round Table.

As a follow-up to this Round Table Conference, plans are underway to hold the Sixth Round Table Conference in April/May 1999 on the following:

- Trade, Investment and Private Sector Development,
- Agriculture, Natural Resources and Food Security, and
- Governance.

This will be followed by an investment forum.

Governance Programme

UNDP has been assisting the Government of The Gambia in the preparation of a comprehensive National Governance Framework which constitute the following sub-programmes: constitutional Review and Reform of Electoral Systems and Processes, Reform of Parliamentary Structures and Processes, Institutional arrangements for Civic Education, Reform of the Legal and Judicial processes, Public Sector Management and Administrative Reform, and Decentralisation and Strengthening Local Government Systems and Institutional Structures for popular participation and management development.

As part of the formulation process, UNDP provided support to the National Governance Workshop held in May 1997 which discussed emerging governance issues and priority concerns. On

the basis of the Workshop deliberations, a National Governance Forum II was held in Accra in June 1998. Subsequently, a Policy on Governance and a National Governance Programme, detailing financial requirements and Plan of Action are being formulated as part of the preparation for the Round Table Conference on Governance slated for April 1999. UNDP is also in collaboration with government, formulating a Programme Support Document (PSD) on Governance.

Economic Management

In the context of economic management, a second phase of the Economic Management Capacity Building programme has been formulated and approved in December 1998. The objective of this second phase is to consolidate the gains under phase 1 while simultaneously enhancing capacity in economic management in the Department of State for Finance and Economic Affairs, Policy Analysis Unit (Office of The President), Central Statistics Department and the Management Development Institute. It is envisaged that the capacity created under EMCBP II will help reinforce the public sector management component of the governance programme through enhancing the management capabilities of the major macroeconomic institutions. In addition, the programme will create linkages with UNCTAD and ILO in the context of the poverty alleviation programme to develop entrepreneurial skills for enhancing performance of micro enterprises in The Gambia thus contributing to employment creation. These backward and forward linkages with other programme areas will facilitate sustainability of the programme. In recognition of the large number of National Execution (NEX) projects, a project on NEX and Aid Co-ordination is being finalised for implementation. It is envisaged that this project will result in an increase in implementation rates and enhance aid co-ordination.

Poverty Alleviation

The Gambia government in collaboration with UNDP embarked on a three-year Internet project amounting to one million US Dollars. The project was conceived in the belief that access to reliable and up-to-date information is a prerequisite for sound decision-making in the process of Sustainable Human Development. It is an offshoot of the Regional Internet Initiative for Africa, which aims at establishing Internet Services in 10-12 Sub-Saharan African countries as a means of strengthening economic and social development. In support of this project, the UNDP Country Office in The Gambia launched a parallel project with a total budget of US\$100,000 for providing support to project monitoring and backstopping of activities by recruiting a National Project Professional Personnel. In this regard, UNDP mobilised US\$500,000 from the Government as cost-sharing for project implementation. Information, Education and Communication (IEC) activities constitute an integral component of the Internet Initiative. It is envisaged that this project could bring about fundamental changes in the productive and commercial life of the average Gambian, especially women, the youth and private sector operators.

A Broadcasting project has also been launched and will last for 18 months. It has a total budget of \$452,904.00. This project also mobilised an amount of \$302,904 from the government as cost sharing. UNDP's contribution is about \$150,000.

UNDP has also provided funds for the design and establishment of an umbrella funding mechanism for poverty alleviation. Within this framework, the ADB has provided an amount of \$5 million for the provision of credit and grant facilities in the Upper River Division and Greater Banjul Areas for this Social Development Fund.

This project aims at enhancing access to radio and television broadcasting by the entire population through the preparation of a master plan for the development of radio and television broadcasting by

- 1) three short-term international experts in Broadcast Network Planning, Manpower Planning/ Training and Financial Studies and Economic Assessments of Broadcasting systems, and,
- 2) three UN Volunteers in programme development production, maintenance of sound equipment and establishment of sound archival systems This project will also facilitate the finalisation and adoption of the National Information and Communication Policy

The project is an integral part of Pillar IV of the National Strategy for Poverty Alleviation and targets all broadcasting institutions in the public and private sectors as well as community radio stations The master plan will ensure the orderly and sustainable development of all broadcasting services by establishing efficient broadcasting systems for nation-wide coverage Such coverage can play an important role in supporting social communications for development activities initiated by the Government with the support of its development partners The project is also expected to have a positive impact on poverty alleviation since poverty-related activities require the dissemination of appropriate information as widely as possible, particularly in the rural areas
